Julia

Please understand I represent 5 other owners on my street. They want to change the zoning. I went to the city to start that process and was told to wait for the general plan to do so. Now I am being told to wait with no timeline what so ever. I have to know if at any point the city will consider our request or any request and look at specific areas. We cannot wait till 2040. If nothing is going to happen, if the city is not going to be changing any zoning before 2040 then I need to know that and tell the others. If there was no general plan then a year ago we would of started the application process. I need to know if that's what we have to go back to.

Thank you

louie
