Subject: New message on Strive San Mateo

Name: Anna Fessler-Hoffman

Email: [REDACTED]

Message: I'd love to see a large sustainability/climate action element incorporated in the General Plan (not just in the CAP) so that climate change and sustainable development will be emphasized as a priority. Also, integrate equity: we need to support and protect everyone, especially during this time of growth on the peninsula. As the city expands, expand affordable housing, public transportation (that is cheap and actually convenient), bike/ped infrastructure, not just for some, but for ALL.
