Subject: Correction Please - 2040 Vision Survey Results

Hi Julia -

On the link http://strivesanmateo.org/wp-content/uploads/2018/12/12032018_Vision_results.pdf, the first respondent listed (from resident responses) is noted as being from "SM Residents Speak." The response reads as follows:

End OVERDEVELOPMENT, defined by economists as the US's outsized ecological footprint, excessive consumption, and high greenhouse gas emissions. Car-dependent suburbanism is the culprit, evinced by our 15.53 metric tons of annual CO2 emissions per capita (vs. the UK's 5.99). SM radically reinvests in its urban areas, ends resource-intensive SFH-exclusive zoning, and remakes itself as a walkable city that can grow its housing and population while shrinking its CO2 emissions.

I am the Admin and creator for San Mateo Residents Speak, a Facebook page, and this comment does not emanate from me and is not associated with my page in any way. I have almost 1,500 followers, and my posts on this page reach over 2,000 San Mateo residents. Since there is not another group or page which is actually called **SM Residents Speak**, this is obviously a blatant attempt to use the voice of my page wrongfully to promote someone else's agenda.

I ask merely that the words *SM Residents Speak* be removed, and not the comment itself. The comment should only be attributed to a residents, NOT SM Residents Speak.

Thanking you in advance and looking forward to a correction, please.

Lisa Taner
