Subject: Affordable Housing

Here again is a repeat of information previously provided for other meetings or in support of the main topic of Affordable Housing. I have been on multiple lists in San Mateo, Foster City, San Carlos, and have been bypassed (in error...) by some, thus continue to wait while I'm told I'll be getting "that call" to make a correction... that never happens.

I know these issues because I, like so many other families, have been living this or see others who do.

I encourage and support any and all measures, plans, and solutions that would provide affordability.

First and foremost I would suggest that cities should hold properties accountable for seeing that they actually provide the housing opportunities to those they claim they will house when they receive their funding. Often times, it appears this seems to be bypassed once the money is given to certain properties.
