**Subject:** More Affordable Housing

I support more affordable housing.

The need for housing is appearing at all levels - extremely low income, low income, and now the middle class. Everyone in these income categories is being priced out, and the situation is only getting worse.

We are torturing people by forcing them into long commutes. I am speaking on their behalf. Nationwide it is becoming more apparent that the people most impacted by environmental degradation have the least impact on decision making.

I ask the City of San Mateo to take bold steps to increase affordability.
