Subject: Contextual Infill - Case Examples

Kohar,

Apropos of the recent general plan workshops on potential study areas for growth and intensification, particularly around transit centers, this upcoming webinar by the California Preservation Foundation may be instructive for planning staff and GP subcommittee members. It discusses, through good examples and bad, how to integrate new construction into commercial districts and historic neighborhoods while retaining their historic character and still allowing for higher density and access to public transit.

Planning & Zoning Part 4: Case Examples in Contextual Infill
