---

I live in an affordable housing which is designated as a mixed use or transit neighborhood. Although we are at the mecca of transportation we have the problem of loud blowers at 6am-7am in the morning. In addition, because of increase building of affordable along the tracks the traffic congestion has increased. It used to take me 6 mins to get to work now it takes me 15 mins just to go down town to my office. The city ordinances have to be changed to include transit neighborhoods. I have tried for 2 years to get the ordinance change but it still is the same and we are still woken up by early blowing machines. The City Council have turned a deaf ear to both in person appearances and emails.
