Message: Please stop stating that the community sessions vetted the decision to study particular parts of the city. That might have happened at subcommittee sessions. It did not happen at the public sessions, or at least the one at Hillsdale High School. This aspect of the plan has been a big surprise. It is inaccurate to state in communications to the city that the public chose these areas to study. It appears City Council and the city staffed committee did so, as well as the subcommittee (or advisory group--forgetting the specific name). No other public forum did so. Please revise the statements to the public to reflect this.
