Subject: Study session

Council members

It appears a plan is afoot to circumvent procedure for measures to be placed on the ballot. As stated, there isn't enough information regarding how this is to be written to pacify developers. One study session by Zoom isn't an in depth study. I assume the Bohannon group has presented the council with what they wish to have placed on the ballot. The subject as presented is so vague it is meaningless. Please do not continue to entertain this idea.

If, As you have said many times the general plan is the proper place to decide height and density then I believe it would be better to keep a "hands off" approach.

The council has already proven it is opposed to measure P.

Leave it alone. Play fair.
