CITY OF SAN MATEO Planning Commission Special Meeting January 12, 2023 6:00 PM

COMMISSION MEMBERS Margaret Williams, Chair John Ebneter, Vice Chair Adam Nugent Seema Patel Martin Wiggins

San Mateo Main Library, Oak Room 55 West 3rd Avenue San Mateo CA 94402

ADJOURNED AGENDA

THIS MEETING IS BEING HELD PURSUANT TO THE GOVERNOR'S EXECUTIVE ORDERS WHICH SUSPEND CERTAIN REQUIREMENTS OF THE BROWN ACT. THIS MEETING CAN BE ATTENDED IN PERSON OR REMOTE BY JOINING ZOOM – SEE CODES BELOW. PUBLIC COMMENTS WILL BE ACCEPTED BOTH IN PERSON AND REMOTELY. SEE END OF AGENDA FOR OPTIONS AND INSTRUCTIONS ON HOW TO PARTICIPATE IN THE MEETING.

To join via Zoom – click here: January 12, 2023 To join via telephone: (408) 638-0968 Webinar ID: 839 9835 2815 Passcode: 780571

The Planning Commission meeting will conclude by 11:00 p.m. unless otherwise extended by commission vote. Any unheard items will automatically move forward to the next regular meeting.

CALL TO ORDER

Pledge of Allegiance

Roll Call

PUBLIC HEARING

Planning Commission decisions are final unless appealed to the City Council in accordance with Section 27.08.090 of the San Mateo Municipal Code. The time within which judicial review of any final decision may be sought is governed by Code of Civil Procedure section 1094.6. If any person challenges a Planning action in court, they may be limited to raising only those issues raised at the public hearing or in written correspondence delivered to the City of San Mateo, at or prior to, the public hearing. Some public hearings will be automatically referred to City Council and those will be indicated below.

1. General Plan Amendment to Adopt the City of San Mateo's Housing Element for 2023-2031

Recommend to the City Council the adoption of a resolution to approve a General Plan Amendment to update the Housing Element for the Sixth Housing Cycle (2023-2031) that is compliant with state law, provides a plan for at least 7,015 new housing units and affirmatively furthers fair housing, and is exempt from review under the California Environmental Quality Act, based on the listed findings.

ADJOURNMENT

AGENDAS: Agendas and material are posted on the City's website on the Friday preceding each Planning Commission Meeting and can be viewed on the City's website at www.cityofsanmateo.org . Any supplemental material distributed to the Commission after the posting of the agenda will be made part of the official record.

WATCHING A MEETING ON TV: City Council meetings are broadcast live on Comcast/channel 27, Wave/channel 26, or AT&T/channel 99.For transmission problems during the broadcast, please call (650) 522-7099. For all other broadcast comments, call (650) 522-7040, Monday-Friday, 8 a.m. - 5 p.m.

WATCHING A MEETING ON A COMPUTER: There are three ways to stream.

1) Public Meeting Portal www.cityofsanmateo.org/publicmeetings

2) City YouTube channel and stream it on YouTube: http://youtube.com/CityofSanMateo

3) Watch TV live stream: https://www.cityofsanmateo.org/193/Channel-San-Mateo-Live-Stream

PUBLIC COMMENTS/REQUEST TO SPEAK

Prior to the Meeting

Send comments to: planning@cityofsanmateo.org until 4 p.m. the day of the meeting.

During the meeting

By computer: Click the link at the top of the agenda and you'll be added to the meeting. All attendees are muted by default. When the item of interest is open for consideration, select the "Raise Your Hand" icon and you will be called on at the appropriate time.

By telephone: Call (408) 638-0968 and enter the conference ID found at the top of the meeting agenda. When the item of interest is open for consideration, select *9 to raise your hand. When called upon, press *6 to unmute, state your name and provide your comments. **By Zoom:** Click the link at the top of the agenda and you'll be added to the meeting. All attendees are muted by default. When the item of interest is open for consideration, select the "Raise Your Hand" icon and you will be called on at the appropriate time.

In Person: At the meeting complete a "Request to Speak" form, submit a request at the speaker kiosk or scan the QR code.

ACCESSIBILITY: In compliance with the Americans with Disabilities Act, those with disabilities requiring special accommodations to participate in this meeting may contact the Planning Division Office at (650) 522-7212 or planning@cityofsanmateo.org. Notification 48 hours prior to the meeting will enable the City to make reasonable arrangements to ensure accessibility to this meeting.

TO:	Planning Commission
FROM:	Christina Horrisberger, Director
PREPARED BY:	Community Development Department
MEETING DATE:	January 12, 2023

SUBJECT:

General Plan Amendment to Adopt the City of San Mateo's Housing Element for 2023-2031

RECOMMENDATION:

Recommend to the City Council the adoption of a resolution to approve a General Plan Amendment to update the Housing Element for the Sixth Housing Cycle (2023-2031) that is compliant with state law, provides a plan for at least 7,015 new housing units and affirmatively furthers fair housing, and is exempt from review under the California Environmental Quality Act, based on the listed findings.

BACKGROUND:

The City of San Mateo (City) has prepared a draft update to the Housing Element of the General Plan to affirmatively further fair housing and accommodate the City's 7,015-unit Regional Housing Needs Allocation (RHNA) for the 2023-2031 Housing Element cycle. The content of the draft 2023-2031 Housing Element is structured for consistency with the requirements set forth in state law. In addition to responding to requirements of state law, the Housing Element also demonstrates the City's strategy to meeting its housing needs as determined by local growth projections through identification of sites as well as policies and programs that promote housing development in the City. Public review and input have been a critical component of this Sixth Cycle Housing Element Update, as further described in the Public Outreach Summary section below.

This staff report provides a summary of the Housing Element requirements, an overview of the status of the City of San Mateo's draft Housing Element, the comments provided to the City by the California Department of Housing and Community Development (HCD) on the first 90-day review of the draft, and how the City has responded to HCD's comments, as well as how the draft element substantially complies with CA Government Code Title 7, Division 1, Chapter 3, Article 10.6 [65580 – 65589.11] for purposes of adoption.

Since 1969, California has required that all local governments (cities and counties) adequately plan to meet the housing needs of their community. California's local governments meet this requirement by adopting housing elements, which are updated every 5-8 years. The housing element is a "chapter" of a city's General Plan, which is also required by state law. However, it is the only element of the General Plan subject to state requirements for content, and it must be certified by HCD. State funding programs for transportation, infrastructure, and housing often require or consider a local jurisdiction's compliance with housing element law. In addition, non-compliance with housing element requirements and targets could potentially affect a local jurisdiction's ability to impose local zoning and land use controls over housing development and receive certain types of state funding and grants.

For the upcoming eight-year housing cycle (2023-2031), HCD has identified the nine-county Bay Area region's housing need to be 441,176 units, with this number broken down into four income categories, from very low-income households

(which includes extremely low) to market rate housing. This Regional Housing Needs Determination (RHND) is based on population projections produced by the California Department of Finance (DOF) as well as adjustments that incorporate the region's existing housing need. The City of San Mateo's Regional Housing Needs Allocation (RHNA) for this housing cycle is 7,015 new housing units distributed across the four income groups as outlined in Table 1.

Income Category	Very Low 50% AMI	Low 80% AMI	Moderate 120% AMI	Above Market Rate	Total
2023-31 Allocation	1,777	1,023	1,175	3,040	7,015

Table Source: Housing Element Cycle 6 RHNA Allocation

The City's Draft Housing Element identifies how the City can accommodate its RHNA of 7,015 new units over the next eight years, and establishes goals, policies and programs to help address the City's current and future housing needs. A draft resolution for the City Council to adopt a General Plan Amendment to update the Housing Element for the Sixth Housing Cycle (2023-2031) that is compliant with state Law, provides a plan for at least 7,015 new housing units and affirmatively furthers fair housing, and is exempt from review under the California Environmental Quality Act, based on the listed findings is attached as <u>Attachment 2</u> for the Commission's review and consideration. The draft resolution that memorializes the Planning Commission's recommendation to the City Council is included as <u>Attachment 1</u>.

The Revised Draft Housing Element (<u>Attachment 5</u>) includes the following sections:

- 1. <u>Introduction and Background</u> Includes the history of San Mateo, the legislative framework for housing, consistency and relationship with other General Plan Elements, and a discussion on water/sewer capacity.
- Housing Needs and Sites Inventory Describes the City's housing needs summary, RHNA allocation, sites inventory methodology, an overview of the adequate sites list and focused discussions on various areas that will support increased housing production (i.e. Accessory Dwelling Units, City Properties and Projects, the General Plan Update and Missing Middle Housing). A capacity of up to 9,934 housing units could be accommodated on the properties listed in the Sites Inventory under the City's existing land use and zoning designations.
- 3. <u>Other Required Housing Element Components</u> Provides an overview of the City's governmental and nongovernmental constraints to meet its housing goals, summarizes existing and potential housing resources, and describes the climate change context and energy conservation requirements for new housing developments.
- 4. <u>Public Participation</u> Summarizes the City's efforts to engage with the community, including under-represented groups, key accomplishments of the outreach efforts over the past 18 months, critical take-aways from the community input, and how this input was incorporated into the Housing Element's goals, policies and programs.
- 5. <u>Affirmatively Furthering Fair Housing (AFFH) Assessment</u> Provides an overview of AFFH requirements, a history of segregation in the region, and an assessment of the San Mateo's AFFH issues with primary findings, contributing factors, and the AFFH action plan.
- Housing Plan Describes the policies, programs, implementing actions, and timelines associated with the City's five goals for production and preservation of housing, protection of its residents, promotion of education and outreach, and affirmatively furthering fair housing.
- 7. <u>Quantified Objectives</u> Includes an estimate of actual housing units that could be achieved via preservation and production given available resources as well as projected pipeline projects anticipated for completion over the eight-year housing cycle.
- 8. <u>Review of Prior Housing Element</u> Highlights key accomplishments of, as well as challenges and opportunities learned from, the previous Housing Element and housing cycle (2015-2022).

The Housing Element also includes seven technical appendices (<u>Attachments 6 to 12</u>) that include detailed analysis and information that support the findings and conclusions in the main document.

Goals, Policies and Programs

Housing needs in the City are significant, especially for very low-, low-, and moderate-income households. These needs

affect the entire community, but disproportionately impact underrepresented, special needs, and ethnically diverse populations. Therefore, the Housing Element specifically focuses on the need to affirmatively further access to housing and promote fair housing policies and programs. Over the past two years, Staff conducted extensive community outreach, including 19 public meetings, four surveys, and numerous pop-up events, to inform the approach for addressing these needs in the Housing Element.

Based on the City's RHNA allocation, constraints analysis, AFFH issues, and input from the community, consultant team, and decisionmakers, the Housing Element articulates five goals to shape policies and programs over the next eight years as follows:

- <u>Goal 1 Production</u>. Facilitate and support the production of new housing at all income levels, but especially affordable housing. Twenty-one policies and 37 implementing actions have been identified to support this goal.
- <u>Goal 2 Preservation</u>. Preserve existing housing that is affordable to lower- and middle-income residents. Six policies with 10 implementing actions have been identified to support this goal.
- <u>Goal 3 Protection</u>. Protect current residents to prevent displacement. Seven policies with 16 implementing actions have been identified to support this goal.
- <u>Goal 4 Promotion</u>. Promote social resilience through public education and community outreach to make information more available and accessible. Five policies with 10 implementing actions have been identified to support this goal.
- <u>Goal 5 Affirmatively Furthering Fair Housing</u>. Address the issues of fair housing, equity and access while reinforcing the objective that affirmatively furthering fair housing is both a stand-alone priority and decisively inseparable from achieving the Housing Element's other goals. Fourteen policies with 16 quantified objectives have been identified to support this goal.

To support attainment of the five goals, each policy identifies the lead department, funding source if known, target work plan or program measure, implementation action(s), and a timeline, to provide an adequate level of specificity and accountability. Individual action items associated with some of these policies and programs account for City priorities and resources over the eight-year cycle and will be considered independently for adoption by Council through appropriate community engagement and environmental review.

Sites Inventory and RHNA Strategy

The purpose of the adequate sites list (Sites Inventory) is to evaluate whether there are sufficient sites with appropriate zoning capacity (density) to meet the City's RHNA goal. The Sites Inventory analysis was established based on development trends in the City over the last 5-10 years of consolidation and redevelopment of under-utilized sites, expressed interest or applications from developers and letters from property owners. However, it does not dictate where residential development will actually occur or what owners must do with their property.

The City used a conservative methodology to estimate the development potential of each property included on the Sites Inventory based on the criteria established by state law, development/redevelopment feasibility, site constraints, zoned capacity versus real capacity, prior project history, and developer/owner interest. The Sites Inventory in Appendix C of the Housing Element (Attachment 8) was updated to create site specific data sheets for some of the larger sites to adequately demonstrate their suitability for housing development and to provide additional information and analysis to support inclusion on the Sites Inventory. Based on this analysis, the City has capacity for potential development of up to 9,934 housing units, or 142% of the City's RHNA. Table 2, on the following page, provides a summary breakdown of the properties included on the Sites Inventory by income category and opportunity area.

Table 2 - San Mateo Sites Inventory Breakdown

Housing Opportunity Areas	Total Units	Very Low	Low	Moderate	Above Mod.	Pipeline
Bridgepointe	1,105	220	168	162	555	-
Hillsdale Station South	2,593	627	379	407	1,180	18
101/92 Interchange	2,452	455	221	248	1,528	961
Other Sites	3,784	570	473	500	2,012	1,936
ADUs	440	22	132	220	66	-
Totals	9,934	1,894	1,373	1,317	5,350	2,915
RHNA	7,015	1,777	1,023	1,175	3,040	-
Buffer	2,919 (42%)	177 (7%)	350 (34%)	142 (12%)	2,310 (76%)	-

Note: The pipeline project numbers are based on information as of December 30, 2022. Number of pipeline units may change over time based on project applications.

Most of the properties listed on the Sites Inventory are located within one of the ten General Plan Study Areas that are being evaluated for change and increased density as part of the City's General Plan Update process. The draft land use map increases land use densities within the Study Areas from 35-50 units per acre to 50-200 units per acre and adds capacity for up to 21,900 new housing units. Adoption of the updated General Plan, which is targeted for the end of 2023, would increase density on most of the housing sites and significantly increase development capacity and the City's RHNA buffer.

Affirmatively Furthering Fair Housing

Affirmatively Furthering Fair Housing, or AFFH, means taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and fosters inclusive communities free from barriers that restrict access to opportunity based on protected characteristics. California law, as established by AB 686, requires all public agencies to "administer programs and activities relating to housing and community development in a manner that affirmatively furthers fair housing, and take no action inconsistent with this obligation." The law also requires housing elements to include an analysis of fair housing outreach and capacity, integration and segregation, access to opportunity, disparate housing needs, and current fair housing practices.

For the City of San Mateo, a Fair Housing Assessment prepared by 21 Elements, a countywide jurisdictional collaborative, describes fair housing enforcement and outreach capacity, integration and segregation, access to opportunity and disparate housing needs as contributing factors that needed to be addressed in the City's fair housing action plan. In response to this analysis, as well as community input, an Affirmatively Furthering Fair Housing Action Plan, which details how the City proposes to respond to the factors contributing to the fair housing challenges identified in this analysis, was developed. The Action Plan is included in Appendix D of the Housing Element (<u>Attachment 9</u>) and the policies and programs to implement the Action Plan are included in the Housing Plan under Goal 5.

The updated draft of the Housing Element released on December 30, 2022 includes an extensive new narrative on a variety of topics in response to HCD comments, including more information on the history of the City's development; the prioritization of contributing factors; detail on fair housing legal cases and inquiries; data on changes in racial composition in the City; enhanced discussion of special needs groups; and greater analysis of Racially/Ethnically Concentrated Area of Poverty (R/ECAPs) and Racially Concentrated Areas of Affluence (RCAAs). The additional analysis confirmed the conclusions of the original fair housing analysis and did not present new information that would trigger additional AFFH programs.

Public Outreach Summary

To support the preparation of the Draft Housing Element, a robust and inclusive community outreach and engagement process was initiated in the summer of 2021 and has been ongoing for the past 18 months. During this time, the City has conducted 19 public and community meetings and workshops, five intercept/pop-up events, four surveys, and conducted additional community engagement through partnership with 21 Elements. This is in addition to the many General Plan Update related public outreach activities during this period that have also included significant discussions around housing related topics. The outreach efforts have included an emphasis on connecting with community members for whom English was not spoken at home, renters, those under 45 years of age, low-income and very low-income households, people with disabilities, seniors, single female heads of household, people experiencing homelessness, and those from under-represented neighborhoods. Themes that were incorporated into the Housing Plan included production of more missing middle housing, more outreach and education to tenants and landlords, streamlining and simplifying development review and permitting processes, establishing programs to address fair housing and equity, and ensuring that new housing is sustainable and addresses climate change. All public comments and input received as part of the Housing Element outreach and engagement activities are included in Appendix F – Public Participation (<u>Attachment 11</u>).

HCD Comments and Housing Element Revisions

Preparation of the City's Housing Element initially started in 2020, with the community engagement process starting in the summer of 2021. The Draft Housing Element was published at the beginning of April, 2022, with the 30-day Public Comment Period between April 6, 2022 and May 6, 2022. The Draft was reviewed by the Planning Commission at public meetings on April 26, 2022 and May 3, 2022, with City Council review and direction provided at a public meeting on May 23, 2022.

Staff revised the Draft Housing Element based on Council's direction and on July 1, 2022, the Draft 2023-2031 Housing Element was submitted to HCD for its first review (90-day review period). HCD completed its review and provided a first review letter with their feedback and comments on September 28, 2022 (<u>Attachment 4</u>).

On November 7, 2022, the City Council held a study session to review and discuss HCD's comments on the Draft Housing Element and provide staff with direction. HCD provided several comments which had the potential to result in significant changes to the goals, policies and programs which Council has previously reviewed and provided feedback. Council directed staff to take the necessary steps to strengthen the language in the Housing Element to address HCD's comments. Staff responded to HCD's comments and published a revised Housing Element on December 30, 2022, for a 10-day public review period, while only seven days are statutorily required.

The summary below highlights some of edits by topic area that were requested by HCD as part of their review and a description of the updates made to the Housing Element to address these comments.

- 1. Affirmatively Furthering Fair Housing:
 - a. Appendix D of the Housing Element has been updated as follows:
 - i. Includes more information on the history of the City's development and the prioritization of contributing factors.
 - ii. Provides more detail on fair housing legal cases and inquiries.
 - iii. Expands on data on changes in racial composition in the City.
 - iv. Includes an enhanced discussion of special needs groups.
 - v. Provides a greater analysis of R/ECAPs and RCAAs.
- 2. Other Housing Needs:
 - a. Appendix A of the Housing Element includes more information regarding extremely low-income households, overpaying households and housing costs
 - b. A section was added to highlight the need for missing middle housing and identifies the various policies and program measures that address this issue.
- 3. Housing Sites Inventory:
 - a. Includes more detail on pipeline projects that are under review, approved, or being constructed.
 - b. Developed a more detailed narrative by explaining each site individually and outlines basis for the realistic

capacity calculation.

- c. Added information regarding affordable housing projects in the pipeline and proposed on City land through a public private partnership effort.
- d. Updated narrative and methodology section for development on nonvacant sites and added background information on age/size of building demolished for recently entitled development, existing versus allowable floor area, etc.
- e. As noted above, the Sites Inventory has been updated to remove three sites (development feasibility during this cycle) and add two new sites (pipeline projects), and adjusted the realistic capacity of two sites (Hillsdale Mall and Borel Square) and ADU production during this cycle. As a result, the Sites Inventory now has identified sites with a capacity to develop up to 9,934 new units, or 142% of the City's RHNA.
- f. Updated the Sites Inventory with additional detailed descriptions of existing uses and maximum redevelopment potential, including referencing developer/owner interest and potential expanded capacity through the General Plan Update process, expected to be completed in 2024.
- g. Added a new policy for outreach to owners of properties on the Sites Inventory.
- 4. Zoning:
 - a. Reviewed existing requirements and constraints analysis against state law based on HCD's comments.
 - b. Added AB 139 discussion and program to address emergency shelter parking requirements.
 - c. Policy H3.7 was updated to allow Low Barrier Navigation Centers in areas consistent with Government Code section 65660.
 - d. Reviewed existing Zoning requirements for Single Room Occupancy (SRO) units, Manufactured Housing, and Accessory Dwelling Units (ADUs), and updated draft program language where appropriate.
- 5. Constraints Analysis:
 - a. Updated Appendix B to add more information on the City's land use controls and how they do or do not impact housing development to tie them to the proposed programs.
 - b. Updated the constraints analysis to evaluate open space requirements in the R-3 zone and design review constraints and amended policies H1.8 and H1.13 accordingly.
 - c. Added additional information about the General Plan Update (GPU) and how Measure Y will be addressed as part of the GPU adoption process in 2023/24.
- 6. Goals, Policies and Programs:
 - a. Updated and clarified timelines for various programs.
 - b. Implementation timelines were revised for various programs per HCD's comments, with many of the implementation timelines moved up to the front end of the Housing Cycle.
 - c. Added two new policies to Goal H1 (Production) and one new policy to Goal H4 (Promotion). Many of the policies and program measures under all five goals were revised to provide additional clarity and to address constraints.

The draft resolution for the Commission's recommendation on the adoption of the Housing Element (<u>Attachment 1</u>) references the draft City Council resolution (<u>Attachment 2</u>), which demonstrates how the Housing Element conforms with state law. Specifically, Exhibit A shows how the Housing Element conforms with each applicable provision in the State's housing element statutes, and Exhibit B provides a response to each of HCD's comments.

Findings for Adoption

The following section outlines the required findings for adoption of the updated Housing Element and HCD's required changes, including information on the City's response. As required by the City's Municipal Code Section 27.06.040(b), the Planning Commission reviews and makes a recommendation to the City Council for all General Plan Amendments. Staff recommends that the Planning Commission make a favorable recommendation to the City Council to adopt the 2023-2031 Housing Element based on the following key findings and as further expanded upon in the draft City Council resolution. Under State law, a recommendation for approval must be made by a majority of the total membership of the Planning Commission (three votes).

- 1. The 2023-2031 Housing Element, as updated, is internally consistent with the City's 2030 General Plan.
- State Law (Government Code Sections 65580-65589.11) To be in substantial compliance with state law, a
 housing element must contain all of the elements mandated by state housing element law (See Fonseca v. City of
 Gilroy (2007) 148 Cal.App.4th 1174, 1191-92). Exhibit A in the draft City Council resolution, Conformance of
 Housing Element with state Law Requirements, demonstrates that the City of San Mateo's 2023-2031 Housing
 Element contains each of the elements mandated by state law.
- 3. HCD Review Letter Outstanding Comments Pursuant to Government Code Section 65585(b), HCD reviewed the Draft Housing Element and reported the results of its review. HCD's comment letter requested additional background information and further analysis in several areas of the Housing Element, including the feasibility of future housing sites, fair housing policy, housing goals, policies, and programs and removing constraints to building housing. HCD's comments and the City's responses to each comment are included in Exhibit B of the draft City Council resolution.

NEXT STEPS:

The following summarizes the next steps and anticipated timeline for approval and certification of the Housing Element:

- January 10, 2023 Planning Commission review and recommendation
- January 23, 2023 City Council review and adoption of Housing Element
- January 31, 2023 Submit adopted Housing Element to HCD for certification

Following City Council adoption, the Housing Element will be submitted to HCD for final certification. Housing elements are required to comply with current state housing element law for the sixth housing cycle (2023-2031) on the established due date, which is **January 31, 2023** for the Bay Area region. If a sixth cycle housing element has not been locally adopted by this deadline, the housing element would likely be deemed out of compliance with state law by HCD. Until recently, it was a widely held assumption across the state that the 120-day grace period outlined in state Law would apply to housing elements still being reviewed by HCD or being updated by local jurisdictions in response to HCD comments. However, HCD has recently taken the position that the grace period does not apply beyond the January 31, 2023 deadline, and any jurisdiction without an adopted sixth cycle housing element would be deemed out of compliance.

It should be noted that in some circumstances, HCD certification is not required for a housing element to be found substantially compliant with state law. If HCD determines that a housing element does not substantially comply with state law, a jurisdiction must either revise the document to implement HCD requirements or adopt its own findings explaining why it complies with the statute despite HCD's comments. Thus, a local jurisdiction can continue to work with HCD to achieve certification of its adopted housing element after the deadline, without being deemed out of compliance. City staff believes that the Revised Draft Housing Element implements all changes requested by HCD and is consistent with state law, as extensively documented in the draft City Council resolution.

In the Sixth Housing Element cycle, jurisdictions face a number of new consequences for not having a certified Housing Element. Under legislation enacted in recent years, if a city does not comply with state housing law, HCD may refer the city to the Attorney General. Significant fines may be imposed if a city does not comply with a court order for one year. A court finding a housing element inadequate may limit local land use decision-making authority until the jurisdiction brings its housing element into compliance, or local governments may lose the right to deny certain projects due to the "Builder's Remedy" provision in the Housing Accountability Act (HAA). According to the HAA, if a jurisdiction has a noncompliant housing element, the city or county must approve any housing development project, regardless of the local General Plan and Zoning requirements.

Conversely, an HCD-certified housing element makes cities eligible for, or with higher priority for, numerous sources of funding, such as Local Housing Allocations, Affordable Housing and Sustainable Communities Grants, SB 1 Planning Grants, CalHOME Program Grants, Infill Infrastructure Grants, Pro-Housing Design funding, Local Housing Trust Funds, and

Regional Transportation Funds (such as MTC's OneBayArea Grants).

As such, staff recommends that the City Council adopt the Housing Element in January, which can then be submitted to HCD by January 31, 2023. After the Planning Commission makes their recommendation, there is a required 10-day public noticing period between the Planning Commission public hearing and the City Council public hearing. Therefore, staff recommends that the Planning Commission provide a formal recommendation to the City Council (<u>Attachment 1</u>) regarding the adoption of the Housing Element at the January 10, 2023 public hearing.

BUDGET IMPACT:

Although there are no direct budgetary impacts to taking this action, the preparation of the 2023-2031 Housing Element document has involved a significant amount of City staff time and the use of consultants. The preparation of the Housing Element is primarily funded by the City's Advanced Planning Fund (Fund 25, through a fee collected with each building permit), with some state grants funds also being used for outreach and environmental review. To implement the Housing Element, a funding source is identified with each policy, and the Community Development Department will identify and allocate appropriate staff and budgetary resources to complete each effort.

ENVIRONMENTAL DETERMINATION:

As described in <u>Attachment 2</u>, this Housing Element is not a project subject to CEQA, because it can be seen with certainty that it will not cause a physical change in the environment, as there are no rezonings proposed (Public Resources Code Section 21065). The proposed adoption of the 2023-2031 Housing Element is considered exempt under the "common sense" exemption under state CEQA Guidelines Section 15061(b)(3) because the project involves policies, programs, and actions to meet the City's RHNA and AFFH goals that would not have any potential for causing a significant effect on the environment, and identifying programs and actions that could remove constraints and promote affordable housing development. Because the City does not have to rezone any sites or make any physical improvements to adopt the Housing Element, it can be seen with certainty that there is no possibility that the Housing Element would have a significant effect on the environment. Thus, the General Plan Amendment to update the Housing Element for the Sixth Housing Cycle (2023-2031) is exempt from CEQA under the common sense exemption. Preparation of documentation to support this CEQA determination has been provided (<u>Attachment 3</u>) for consideration of the Housing Element by the Planning Commission and City Council for adoption.

NOTICE PROVIDED:

All meeting noticing requirements were met. A public hearing notice for consideration of the Draft Housing Element at the January 10, 2022 Planning Commission special meeting was published in the San Mateo Daily Journal on December 30, 2022, January 4, 2023 and January 9, 2023. Notice of updated Housing Element availability was displayed on the home page of the City's <u>website</u>, posted to the City's Housing Element <u>website</u> and a physical copy was made available at City Hall and the Main Library. Notice of updated Housing Element publication was also included in the City's E-Newsletter and sent out to various email distribution lists, including the Housing Policy, Housing Element and General Plan Update email distribution lists.

PUBLIC COMMENTS:

Appendix F in the Housing Element (<u>Attachment 1</u>1) includes community feedback, communications and documentation that support the Housing Element preparation. All public comments submitted since the publication of the Revised Draft Housing Element on December 30, 2022 are included in Appendix G (<u>Attachment 12</u>), which also includes all comments received during the initial 30-day public review period (April 6, 2022 to May 6, 2022). Public comments submitted after the publication of the January 10, 2023 meeting agenda packet are posted to this item on the City's <u>Public Meeting Portal</u> as "Post Packet Public Comments."

CITY OF SAN MATEO RESOLUTION NO. ____ (2023)

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF SAN MATEO, RECOMMENDING TO THE CITY COUNCIL ADOPTION OF A GENERAL PLAN AMENDMENT TO REPEAL THE 2015-2022 HOUSING ELEMENT AND TO ADOPT THE HOUSING ELEMENT OF THE GENERAL PLAN FOR THE PERIOD OF 2023-2031, IN ORDER TO AFFIRMATIVELY FURTHER FAIR HOUSING AND TO COMPLY WITH STATE LAW

WHEREAS, the legislature has found that, "California has a housing supply and affordability crisis of historic proportions. The consequences of failing to effectively and aggressively confront this crisis are hurting millions of Californians, robbing future generations of the chance to call California home, stifling economic opportunities for workers and businesses, worsening poverty and homelessness, and undermining the state's environmental and climate objectives." (Gov. Code Section 65589.5.); and

WHEREAS, the legislature has further found that, "Among the consequences of those actions are discrimination against low-income and minority households, lack of housing to support employment growth, imbalance in jobs and housing, reduced mobility, urban sprawl, excessive commuting, and air quality deterioration." (Gov. Code Section 65589.5.); and

WHEREAS, the legislature adopted the Housing Crisis Act of 2019 (SB 330) which states, "In 2018, California ranked 49th out of the 50 states in housing units per capita... California needs an estimated 180,000 additional homes annually to keep up with population growth, and the Governor has called for 3.5 million new homes to be built over 7 years;" and

WHEREAS, State Housing Element Law (Government Code Sections 65580 et seq.) requires that the City Council adopt a housing element for the eight-year period of 2023-2031 to accommodate the City of San Mateo's (City's) regional housing need allocation (RHNA) of 7,015 housing units, comprised of 1,777 very low-income units, 1,023 low-income units, 1,175 moderate-income units, and 3,040 above moderate-income units; and

WHEREAS, the City of San Mateo has prepared its 2023-2031 Housing Element ("Housing Element") in compliance with State Housing Element Law and has identified sites that can accommodate housing units to meet the City's RHNA plus a buffer; and

WHEREAS, as provided in Government Code Section 65350 et seq., adoption of the Housing Element constitutes a General Plan Amendment; and

WHEREAS, Government Code Section 65354 requires that the Planning Commission make a written recommendation to the City Council on the adoption a General Plan Amendment; and

WHEREAS, San Mateo Municipal Code Section 27.06.040(b) requires the Planning Commission to review and provide a recommendation to the City Council on General Plan Amendments; and

WHEREAS, as provided in Government Code Sections 65352 – 65352.5, on April 22, 2022, the City mailed a public notice to all California Native American tribes on the contact list provided by the Native American Heritage Commission and other entities listed; and

WHEREAS, no California Native American tribe requested consultation; and

WHEREAS, the City has conducted extensive community outreach over the last 18 months, including 19 public and community meetings and workshops, five intercept/pop-up events, four surveys, and additional community engagement through partnership with 21 Elements (San Mateo County regional planning collaborative); and

WHEREAS, in accordance with Government Code Section 65585 (b), on April 6, 2022, the City published the Draft Housing Element and requested public comment for a 30-day review period, and on July 1, 2022, after responding to public comments, the City submitted the Draft Housing Element to the State Department of Housing and Community Development (HCD) for its first review; and

WHEREAS, on September 28, 2022, the City received a letter from HCD providing its comments regarding the Draft Housing Element; and

WHEREAS, on December 30, 2022, the City published a Revised Draft Housing Element responding to HCD's comments, and made the Revised Draft available for public review through January 9, 2023; and

WHEREAS, the Housing Element was reviewed for conformance with the California Environmental Quality Act and was found to be exempt under Section 15061(b)(3) as it can be seen with certainty that the proposed adoption of the Housing Element (which proposes no rezonings or intensification of land use) would not have a significant effect on the environment; and

WHEREAS, on January 10, 2023, the Planning Commission conducted a duly and properly noticed public hearing to take public testimony and consider this Resolution regarding the Housing Element, reviewed the Housing Element and all pertinent maps, documents and exhibits, including HCD's comments, the City's response to HCD's comments, the agenda report and all attachments, and oral and written public comments.

NOW, THEREFORE BE IT RESOLVED, THAT THE PLANNING COMMISSION OF THE CITY OF SAN MATEO, CALIFORNIA HEREBY finds and determines that, based on substantial evidence in the record:

- 1. The foregoing recitals are true and correct and are incorporated by reference into this action.
- 2. In accordance with Government Code Section 65300.5, the Housing Element is internally consistent with the City's 2030 General Plan.
- The Housing Element substantially complies with State Law, as further described in the Draft City Council Resolution findings and determinations, which are hereby incorporated by reference. The Draft City Council Resolution has been presented to the Planning Commission as Attachment 2 of the accompanying agenda report.
- 4. The Planning Commission recommends that the City Council the repeal the 2015-2022 Housing Element.
- 5. The Planning Commission adopts the findings listed in Attachment 2 and hereby recommends to the City Council adoption of the 2022-2031 Housing Element, which is incorporated by this reference.

CITY OF SAN MATEO RESOLUTION NO. ____ (2023)

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF SAN MATEO, ADOPTING A GENERAL PLAN AMENDMENT TO REPEAL THE 2015-2022 HOUSING ELEMENT AND ADOPT THE HOUSING ELEMENT OF THE GENERAL PLAN FOR THE PERIOD OF 2023-2031, IN ORDER TO AFFIRMATIVELY FURTHER FAIR HOUSING AND TO COMPLY WITH STATE HOUSING ELEMENT LAW

WHEREAS, the legislature has found that, "California has a housing supply and affordability crisis of historic proportions. The consequences of failing to effectively and aggressively confront this crisis are hurting millions of Californians, robbing future generations of the chance to call California home, stifling economic opportunities for workers and businesses, worsening poverty and homelessness, and undermining the state's environmental and climate objectives." (Gov. Code Section 65589.5.); and

WHEREAS, the legislature has further found that, "Among the consequences of those actions are discrimination against low-income and minority households, lack of housing to support employment growth, imbalance in jobs and housing, reduced mobility, urban sprawl, excessive commuting, and air quality deterioration." (Gov. Code Section 65589.5.); and

WHEREAS, the legislature adopted the Housing Crisis Act of 2019 (SB 330) which states, "In 2018, California ranked 49th out of the 50 states in housing units per capita... California needs an estimated 180,000 additional homes annually to keep up with population growth, and the Governor has called for 3.5 million new homes to be built over 7 years;" and

WHEREAS, State Housing Element Law (Government Code Sections 65580 et seq.) requires that the City Council adopt a Housing Element for the eight-year period 2023-2031 to accommodate the City of San Mateo (City) regional housing need allocation (RHNA) of 7,015 housing units, comprised of 1,777 very low-income units, 1,023 low-income units, 1,175 moderate-income units, and 3,040 above moderate-income units; and

WHEREAS, the City of San Mateo has prepared Housing Element 2023-2031 ("Housing Element") in compliance with the State Housing Element Law and has identified sites that can accommodate housing units to meet the City's RHNA; and

WHEREAS, as provided in Government Code Section 65350 et. seq., adoption of this Housing Element Update 2023-2031 constitutes a General Plan Amendment; and

WHEREAS, as provided in Government Code Sections 65352 – 65352.5 on April 22, 2022, the City mailed a public notice to all California Native American tribes provided by the Native American Heritage Commission and other entities listed; and

WHEREAS, no California Native American tribe requested consultation; and

WHEREAS, the City has conducted extensive community outreach over the last two years, including six public meetings before the Planning Commission and the City Council; and

WHEREAS, in accordance with Government Code Section 65585 (b), on April 6, 2022, the City published the Draft Housing Element and requested public comment for a 30-day review period, and on July 1, 2022, after responding to public comments, the City submitted the Draft Housing Element to the State Department of Housing and Community Development (HCD) for its review; and

WHEREAS, on September 28, 2022, the City received a letter from HCD providing its comments regarding the Draft Housing Element; and

WHEREAS, on December 30, 2022, the City published a Revised Draft Housing Element responding to HCD's comments, and made the Draft available for public review through January 9, 2023; and

WHEREAS, on January 10, 2023, the Planning Commission held a duly and properly noticed public hearing, received all written and oral public comments, and voted _____ to recommend that the City Council _____ the Revised Draft Housing Element based on the listed findings that ______; and

WHEREAS, the Revised Draft Housing Element was reviewed for conformance with the California Environmental Quality Act and was found to be exempt under Sections 15061(b)(3) as it can be seen with certainty that the proposed adoption of the Housing Element (which proposes no rezonings or intensification of land use) would not have a significant effect on the environment; and

WHEREAS, on _____, 2023, the City Council conducted a duly and properly noticed public hearing to take public testimony and consider this Resolution regarding the Housing Element, reviewed the Housing Element and all pertinent maps, documents and exhibits, including HCD's comments, the City's response to HCD's comments, the agenda report and all attachments, the Planning Commission recommendation and oral and written public comments.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF SAN MATEO, CALIFORNIA, HEREBY finds and determines that, based on substantial evidence in the record, that:

- 1. The foregoing recitals are true and correct and are incorporated by reference into this action.
- In accordance with Government Code Section 65300.5, the Housing Element is internally consistent with the City's 2030 General Plan; and as required by San Mateo Municipal Code Section 27.06.040(b), the Planning Commission has reviewed and provided a recommendation to the City Council on this General Plan Amendment.
- 3. The Housing Element substantially complies with Housing Element Law, as provided in Government Code 65580 et seq., and contains all provisions required by State Housing Element Law, as shown in Exhibit A to this Resolution, incorporated herein by this reference.
- Based on substantial evidence in the record, the existing uses on the non-vacant sites identified in the Site Inventory to accommodate the City's RHNA are likely to be discontinued during the planning period and therefore do not constitute an impediment to planned residential development on the site during the planning period. Section 65583.2(g)(2) of the Government Code requires that any jurisdiction relying on non-vacant sites to meet more than 50 percent of the RHNA for lower-income households must make findings based on substantial evidence that the existing use on the nonvacant site is not an impediment to residential development during the planning period. In the City of San Mateo, 99.2 percent of the lower-income unit capacity is on non-vacant sites (183 of 189 sites are non-vacant). The City has provided such substantial evidence in Appendix C of the Housing Element that the existing uses will be discontinued and/or will not be an impediment to residential development during the planning period based on the physical characteristics, existing uses, redevelopment potential (including improvement to land value ratio, floor area ratio, and known developer/owner interest), location and context, local knowledge, and environmental and infrastructure constraints. Specifically, Table A in the Appendix C of the Housing Element demonstrates that six of the largest non-vacant sites in the Sites Inventory have owners that have expressed interest in residential or mixed-use development during this planning period; with the

remaining sites having the ability to accommodate new housing without displacing existing uses (i.e. large parking lots or vacant areas, have under-utilized buildings or long-standing vacancies, or have conceptual proposals, development applications or planning approvals).

- 5. As required by Government Code Section 65585(e), the City Council has considered the comments made by HCD, including those in HCD's letter to the City of San Mateo dated September 28, 2022, consistent with Government Code Section 65585(f), and as described in Exhibit B to this resolution, incorporated herein by this reference, and updated the Housing Element in response to the comments to substantially comply with the requirements of State Housing Element Law as interpreted by HCD.
- 6. The 2015-2022 Housing Element is repealed in its entirety.
- 7. This Resolution shall become effective upon adoption by the City Council.
- 8. The City Manager or their designee is hereby directed to file all necessary materials with HCD for HCD to find that the Housing Element is in conformance with State Housing Element Law and is further directed and authorized to make all non-substantive changes to the Housing Element to make it internally consistent or to address any non-substantive changes or amendments requested by HCD to achieve certification.
- 9. The Community Development Department Director or designee is hereby directed to distribute copies of the Housing Element in the manner provided in Government Code Sections 65357 and 65589.7.

BE IT FURTHER RESOLVED, that the City Council hereby adopts the 2023-2031 Housing Element in its current form, which has been found to be in substantial compliance with all applicable state statutes and HCD requirements.

Exhibit A Compliance with Statutory Provisions

Column 1 lists the sections of the California Government Code that are applicable to certification of the City's 2023-2031 Housing Element and Column 2 identifies how the Housing Element is in compliance with that section.

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
Section 65583	
The housing element shall consist of an identification and analysis of existing and projected housing needs and a statement of goals, policies, quantified objectives, financial resources, and scheduled programs for the preservation, improvement, and development of housing.	See below for details.
The housing element shall identify adequate sites for housing, including rental housing, factory-built housing, mobilehomes, and emergency shelters, and shall make adequate provision for the existing and projected needs of all economic segments of the community.	See below for details
The element shall contain all of the following:	
(a) An assessment of housing needs and an inventory of resources and constraints relevant to the meeting of these needs. The assessment and inventory shall include all of the following:	Housing needs – see Appendix A, Needs Analysis Resources – see Appendix C, Housing Resources Constraints – see Appendix B, Constraints
(a)(1) An analysis of population and employment trends and documentation of projections	Appendix A, pp H-A-9 through H-A-22
(a)(1) A quantification of the locality's existing and projected housing needs for all income levels, including extremely low income households, as defined in subdivision (b) of Section 50105 and Section 50106 of the Health and Safety Code. These existing and projected needs shall include the locality's share of the regional housing need in accordance with Section 65584. Local agencies shall calculate the subset of very low income households allotted under Section 65584 that qualify as extremely low income households. The local agency may either use available census data to calculate the percentage of very low income households that qualify as extremely low income households or presume that 50 percent of the very low income households qualify as extremely low income households. The number of extremely low income households and very low income	Appendix A, pp H-A-9 through H-A-22; for ELI data, see H-A-22 et seq.

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
households shall equal the jurisdiction's allocation of very low income households pursuant to Section 65584.	
(a)(2) An analysis and documentation of household characteristics, including level of payment compared to ability to pay,	Appendix A, H-A-23 through H-A-31; for overpayment see H-A-43 et seq.
(a)(2) housing characteristics, including overcrowding, and	Appendix A, H-A-43 et seq.
(a)(2) housing stock condition.	Appendix A, H-A-36 et seq.
(a)(3) An inventory of land suitable and available for residential development, including vacant sites and sites having realistic and demonstrated potential for redevelopment during the planning period to meet the locality's housing need for a designated income level, and an analysis of the relationship of zoning and public	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.)
facilities and services to these sites, and an analysis of the relationship of the sites identified in the land inventory to the jurisdiction's duty to affirmatively further fair housing. Note: Please see Section 65583.2 regarding the land inventory.	For detail on individual sites, nonvacant site analysis and relationship to constraints, etc., see Appendix C, pp H-C-12 et seq.
	For AFFH analysis of inventory, see Appendix D, H-D-72 et seq.
[Note that AB 2339 (Chapter 654, Statutes of 2022) amended Section 65583(a)(4). It does not apply to ABAG-area housing elements unless the first draft of the housing element is submitted to ABAG after January 31, 2023 or a draft is submitted after April 1, 2023. Therefore the sections below include the statutory provisions of Section 65583(a)(4) effective in 2022. Jurisdictions adopting their housing element after January 1, 2023 should describe why AB 2339 is not applicable to them.]	
(a)(4)(A) The identification of a zone or zones where emergency shelters are allowed as a permitted use without a conditional use or other discretionary permit. The identified zone or zones shall include sufficient capacity to accommodate the need for emergency shelter identified in paragraph (7), except that each local government shall identify a zone or zones that can accommodate at least one year-round emergency shelter.	Appendix B, H-B-39 through H-B-42; see also base document's Policy H3.7, page H-80
(a)(4)(A) If the local government cannot identify a zone or zones with sufficient capacity, the local government shall include a program to amend its zoning ordinance to meet the requirements of this paragraph within one year of the adoption of the housing element. The local government may identify additional zones where emergency shelters are permitted with a conditional use permit.	Appendix B, H-B-39 through H-B-42; see also base document's Policy H3.7, page H-80

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(a)(4)(A) The local government shall also demonstrate that existing or proposed permit processing, development, and management standards are objective and encourage and facilitate the development of, or conversion to, emergency shelters.	Appendix B, H-B-39 through H-B-42; see also base document's Policy H3.7, page H-80
 (a)(4)(A) Emergency shelters may only be subject to those development and management standards that apply to residential or commercial development within the same zone except that a local government may apply written, objective standards that include all of the following: (i) The maximum number of beds or persons permitted to be served nightly by the facility. (ii) Sufficient parking to accommodate all staff working in the emergency shelter, provided that the standards do not require more parking for emergency shelters than other residential or commercial uses within the same zone. (iii) The size and location of exterior and interior onsite waiting and client intake areas. (iv) The provision of onsite management. (v) The proximity to other emergency shelters, provided that emergency shelters are not required to be more than 300 feet apart. (vi) The length of stay. (vii) Lighting. (viii) Security during hours that the emergency shelter is in operation. 	Appendix B, H-B-39 through H-B-42; see also base document's Policy H3.7, page H-80
(a)(4)(B) The permit processing, development, and management standards applied under this paragraph shall not be deemed to be discretionary acts within the meaning of the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code).	Appendix B, H-B-39 through H-B-42; see also base document's Policy H3.7, page H-80
(a)(4)(C) A local government that can demonstrate to the satisfaction of the department the existence of one or more emergency shelters either within its jurisdiction or pursuant to a multijurisdictional agreement that can accommodate that jurisdiction's need for emergency shelter identified in paragraph (7) may comply with the zoning requirements of subparagraph (A) by identifying a zone or zones where new emergency shelters are allowed with a conditional use permit.	Appendix B, H-B-39 through H-B-42; see also base document's Policy H3.7, page H-80
(a)(4)(D) A local government with an existing ordinance or ordinances that comply with this paragraph shall not be required to take additional action to identify zones for emergency shelters. The housing element must only describe how existing ordinances, policies, and standards are consistent with the requirements of this paragraph.	Appendix B, H-B-39 through H-B-42; see also base document's Policy H3.7, page H-80

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(a)(5) An analysis of potential and actual governmental constraints upon the maintenance, improvement, or development of housing for all income levels, including the types of housing identified in paragraph (1) of subdivision (c), and [Note: The types of housing identified in Section 65583(c)(1) include multifamily rental housing, factory-built housing, mobilehomes, housing for agricultural employees, supportive housing, single-room occupancy units, emergency shelters, and transitional housing.]	See Constraints, Appendix B. For detail, see below
(a)(5) for persons with disabilities as identified in the analysis pursuant to paragraph (7),	Appendix B, H-B-37 et seq.
(a)(5) including land use controls,	Appendix B, H-B-5 through H-B-11
(a)(5) building codes and their enforcement,	Appendix B, H-B-15 through H-B-16
(a)(5) site improvements,	Appendix B, H-B-18 through H-B-19
(a)(5) fees and other exactions required of developers,	Appendix B, H-B-31 though H-B-36
(a)(5) local processing and permit procedures,	Appendix B, H-B-20 through H-B-31
(a)(5) and any locally adopted ordinances that directly impact the cost and supply of residential development.	Appendix B, H-B-15 and H-B-12
(a)(5) The analysis shall also demonstrate local efforts to remove governmental constraints that hinder the locality from meeting its share of the regional housing need in accordance with Section 65584	Base document Policies H1.1 through H1.21, especially Policies H1.3, H1.4, H1.6, H1.7, H1.13, H1.18
(a)(5) and from meeting the need for housing for persons with disabilities, supportive housing, transitional housing, and emergency shelters identified pursuant to paragraph (7).	Appendix B, H-B-38, and base document policies H1.14, H4.3, H4.4 H5.1.1, H5.1.2, H5.2.1, H5.2.2, H5.2.3, H5.4.1, H5.4.2, H5.4.3, and H5.4.4
(a)(6) An analysis of potential and actual nongovernmental constraints upon the maintenance, improvement, or development of housing for all income levels, including the availability of financing,	Appendix B, H-B-46 through H-B-56
(a)(6) the price of land,	Appendix B, H-B-46 through H-B-47

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(a)(6) the cost of construction,	Appendix B, H-B-47 through H-B-50
(a)(6) the requests to develop housing at densities below those anticipated in the analysis required by subdivision (c) of Section 65583.2,	Appendix B, H-B-51
(a)(6) and the length of time between receiving approval for a housing development and submittal of an application for building permits for that housing development that hinder the construction of a locality's share of the regional housing need in accordance with Section 65584.	Appendix B, H-B-51
(a)(6) The analysis shall also demonstrate local efforts to remove nongovernmental constraints that create a gap between the locality's planning for the development of housing for all income levels and the construction of that housing.	Appendix B, H-B-46 through H-B-55, and base document policies H1.9, H1.10 and H1.21
(a)(7) An analysis of any special housing needs, such as those of the	
(a)(7) elderly;	Appendix A, H-A-23 et seq. and H-A-55 et seq.
(a)(7) persons with disabilities, including a developmental disability, as defined in Section 4512 of the Welfare and Institutions Code;	Appendix A, H-A-56 through H-A-59
(a)(7) large families;	Appendix A, H-A-53 et seq.
(a)(7) farmworkers;	Appendix A, H-A-66 et seq.
(a)(7) families with female heads of households;	Appendix A, H-A-54 et seq.
(a)(7) and families and persons in need of emergency shelter.	Appendix A, H-A-59 through H-A-65
(a)(7) The need for emergency shelter shall be assessed based on the capacity necessary to accommodate the most recent homeless point-in-time count conducted before the start of the planning period, the need for emergency shelter based on number of beds available on a year-round and seasonal basis, the number of shelter beds that go unused on an average monthly basis within a one-year period, and the percentage of those in emergency shelters that move to permanent housing solutions.	Appendix A, H-A-59 through H-A-65; see also Appendix B, H-B-39 through H-B-42

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(a)(7) The need for emergency shelter may be reduced by the number of supportive housing units that are identified in an adopted 10-year plan to end chronic homelessness and that are either vacant or for which funding has been identified to allow construction during the planning period.	Appendix A, H-A-59 through H-A-65; see also Appendix B, H-B-39 through H-B-42
(a)(7) An analysis of special housing needs by a city or county may include an analysis of the need for frequent user coordinated care housing services.	N/A
(a)(8) An analysis of opportunities for energy conservation with respect to residential development. Cities and counties are encouraged to include weatherization and energy efficiency improvements as part of publicly subsidized housing rehabilitation projects. This may include energy efficiency measures that encompass the building envelope, its heating and cooling systems, and its electrical system.	Base document, H-48 and H-49, and policy H2.3
(a)(9) An analysis of existing assisted housing developments that are eligible to change from low-income housing uses during the next 10 years due to termination of subsidy contracts, mortgage prepayment, or expiration of restrictions on use. "Assisted housing developments," for the purpose of this section, shall mean multifamily rental housing that receives governmental assistance under federal programs listed in subdivision (a) of Section 65863.10, state and local multifamily revenue bond programs, local redevelopment programs, the federal Community Development Block Grant Program, or local in-lieu fees. "Assisted housing developments" shall also include multifamily rental units that were developed pursuant to a local inclusionary housing program or used to qualify for a density bonus pursuant to Section 65915.	Base document, H-24 through H-27; complete list of developments is in Appendix A, Attachment 2
(a)(9)(A) The analysis shall include a listing of each development by project name and address, the type of governmental assistance received, the earliest possible date of change from low-income use, and the total number of elderly and nonelderly units that could be lost from the locality's low-income housing stock in each year during the 10-year period. For purposes of state and federally funded projects, the analysis required by this subparagraph need only contain information available on a statewide basis.	Appendix A, Attachment 2
(a)(9)(B) The analysis shall estimate the total cost of producing new rental housing that is comparable in size and rent levels, to replace the units that could change from low-income use, and an estimated cost of preserving the assisted housing developments. This cost analysis for replacement housing may be done aggregately for each five-year period and does not have to contain a project-by-project cost estimate.	Base document, H-24 through H-27
(a)(9)(C) The analysis shall identify public and private nonprofit corporations known to the local government that have legal and managerial capacity to acquire and manage these housing developments.	Base document, H-24 through H-27

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(a)(9)(D) The analysis shall identify and consider the use of all federal, state, and local financing and subsidy programs that can be used to preserve, for lower income households, the assisted housing developments, identified in this paragraph, including, but not limited to, federal Community Development Block Grant Program funds, tax increment funds received by a redevelopment agency of the community, and administrative fees received by a housing authority operating within the community. In considering the use of these financing and subsidy programs, the analysis shall identify the amounts of funds under each available program that have not been legally obligated for other purposes and that could be available for use in preserving assisted housing developments.	Base document, H-24 through H-27
(b) (1) A statement of the community's goals, quantified objectives, and policies relative to affirmatively furthering fair housing and to the maintenance, preservation, improvement, and development of housing.	Base document Goals, Policies and Programs, including AFFH, H-71 through H-87
	Quantified objectives: base document, H-88 through H-91
(2) It is recognized that the total housing needs identified pursuant to subdivision (a) may exceed available resources and the community's ability to satisfy this need within the content of the general plan requirements outlined in Article 5 (commencing with Section 65300). Under these circumstances, the quantified objectives need not be identical to the total housing needs. The quantified objectives shall establish the maximum number of housing units by income category, including extremely low income, that can be constructed, rehabilitated, and conserved over a five-year time period.	Quantified objectives: base document, H-88 through H-91
(c) A program that sets forth a schedule of actions during the planning period, each with a timeline for implementation, that may recognize that certain programs are ongoing, such that there will be beneficial impacts of the programs within the planning period, that the local government is undertaking or intends to undertake to implement the policies and achieve the goals and objectives of the housing element	Base document Goals, Policies and Programs, including AFFH: base document, H-71 through H-87
(c) through the administration of land use and development controls,	Base document Policies H1.1 through H1.21
(c) the provision of regulatory concessions and incentives,	Base document Policies H1.3, H1.4, H1.6, H1.7 H1.13, H1.18, and others
(c) the utilization of appropriate federal and state financing and subsidy programs when available,	Base document Policy H1.2 and H2.1

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(c) and the utilization of moneys in a low- and moderate-income housing fund of an agency if the locality has established a redevelopment project area pursuant to the Community Redevelopment Law (Division 24 (commencing with Section 33000) of the Health and Safety Code).	Base document Policy H1.2 and H2.1
In order to make adequate provision for the housing needs of all economic segments of the community, the program shall do all of the following:	
(c)(1) Identify actions that will be taken to make sites available during the planning period with appropriate zoning and development standards and with services and facilities to accommodate that portion of the city's or county's share of the regional housing need for each income level that could not be accommodated on sites identified in the inventory completed pursuant to paragraph (3) of subdivision (a) without rezoning, and to comply with the requirements of Section 65584.09.	No sites need to be rezoned in order to accommodate the RHNA allocation
(c)(1) Sites shall be identified as needed to affirmatively further fair housing	For AFFH analysis of inventory, see Appendix D, H-D-72 et seq.
(c)(1) and to facilitate and encourage the development of a variety of types of housing for all income levels, including multifamily rental housing,	See base document programs, H-71 through H- 87; see also discussion in Constraints Analysis, Appendix B, beginning on H-B-5
(c)(1) factory-built housing,	Appendix B, H-B-44
(c)(1) mobilehomes,	Appendix B, H-B-44
(c)(1) housing for agricultural employees,	Appendix B, H-B-43
(c)(1) supportive housing,	Appendix B, H-B-42
(c)(1) single-room occupancy units,	Appendix B, H-B-45; and base document H-44
(c)(1) emergency shelters,	Appendix B, H-B-39 et seq.
(c)(1) and transitional housing.	Appendix B, H-B-42

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(c)(1)(A) Where the inventory of sites, pursuant to paragraph (3) of subdivision (a), does not identify adequate sites to accommodate the need for groups of all household income levels pursuant to Section 65584, rezoning of those sites, including adoption of minimum density and development standards, for jurisdictions with an eight-year housing element planning period pursuant to Section 65588, shall be completed no later than three years after either the date the housing element is adopted pursuant to subdivision (f) of Section 65585 or the date that is 90 days after receipt of comments from the department pursuant to subdivision (b) of Section 65585, whichever is earlier, unless the deadline is extended pursuant to subdivision (f). Notwithstanding the foregoing, for a local government that fails to adopt a housing element that the department has found to be in substantial compliance with this article within 120 days of the statutory deadline in Section 65588 for adoption of the housing element, rezoning of those sites, including adoption of minimum density and development standards, shall be completed no later than one year from the statutory deadline in Section 65588 for adoption of the housing element.	No sites need to be rezoned in order to accommodate the RHNA allocation
(c)(1)(B) Where the inventory of sites, pursuant to paragraph (3) of subdivision (a), does not identify adequate sites to accommodate the need for groups of all household income levels pursuant to Section 65584, the program shall identify sites that can be developed for housing within the planning period pursuant to subdivision (h) of Section 65583.2. The identification of sites shall include all components specified in Section 65583.2. Note: Please see Section 65583.2 regarding the land inventory and conformance with subdivision (h).	No sites need to be rezoned in order to accommodate the RHNA allocation
(c)(1)(C) Where the inventory of sites pursuant to paragraph (3) of subdivision (a) does not identify adequate sites to accommodate the need for farmworker housing, the program shall provide for sufficient sites to meet the need with zoning that permits farmworker housing use by right, including density and development standards that could accommodate and facilitate the feasibility of the development of farmworker households.	Base document implementation plan, Policy H1.17
(c)(2) Assist in the development of adequate housing to meet the needs of extremely low, very low, low-, and moderate-income households.	Base document Policies H1.1 through H1.21
(c)(3) Address and, where appropriate and legally possible, remove governmental and nongovernmental constraints to the maintenance, improvement, and development of housing, including housing for all income levels	Base document Policies H1.1 through H1.21, especially Policies H1.3, H1.4, H1.6, H1.7, H1.13, H1.18

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(c)(3) and housing for persons with disabilities. The program shall remove constraints to, and provide reasonable accommodations for housing designed for, intended for occupancy by, or with supportive services for, persons with disabilities.	Appendix B, H-B-38, and base document policies H1.14, H4.3, H4.4 H5.1.1, H5.1.2, H5.2.1, H5.2.2, H5.2.3, H5.4.1, H5.4.2, H5.4.3, and H5.4.4
(c)(3) Transitional housing and supportive housing shall be considered a residential use of property and shall be subject only to those restrictions that apply to other residential dwellings of the same type in the same zone.	Appendix B, H-B-42 and base document policy H1.15
(c)(3)Supportive housing, as defined in Section 65650, shall be a use by right in all zones where multifamily and mixed uses are permitted, as provided in Article 11 (commencing with Section 65650).	Appendix B, H-B-42 and base document policy H1.15
(c)(4) Conserve and improve the condition of the existing affordable housing stock, which may include addressing ways to mitigate the loss of dwelling units demolished by public or private action.	Base document Policies H2.1, H2.2, H2.4, H2.6
(c)(5) Promote and affirmatively further fair housing opportunities and promote housing throughout the community or communities for all persons regardless of race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability, and other characteristics protected by the California Fair Employment and Housing Act (Part 2.8 (commencing with Section 12900) of Division 3 of Title 2), Section 65008, and any other state and federal fair housing and planning law.	AFFH policies in base document, H5.1.1 through H5.4.5
(c)(6) Preserve for lower income households the assisted housing developments identified pursuant to paragraph (9) of subdivision (a).	Base document policy H2.2
(c)(6) The program for preservation of the assisted housing developments shall utilize, to the extent necessary, all available federal, state, and local financing and subsidy programs identified in paragraph (9) of subdivision (a), except where a community has other urgent needs for which alternative funding sources are not available.	Base document, H-24 through H-27 and policy H2.2
(c)(6) The program may include strategies that involve local regulation and technical assistance.	Base document, H-24 through H-27 and policy H2.2
(c)(7) Develop a plan that incentivizes and promotes the creation of accessory dwelling units that can be offered at affordable rent, as defined in Section 50053 of the Health and Safety Code, for very low, low-, or	Base document policies H1.4 and H5.1.3

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
moderate-income households. For purposes of this paragraph, "accessory dwelling units" has the same meaning as "accessory dwelling unit" as defined in paragraph (4) of subdivision (i) of Section 65852.2.\	
(c)(8) Include an identification of the agencies and officials responsible for the implementation of the various actions and the means by which consistency will be achieved with other general plan elements and	For responsible parties, including AFFH: base document, pages H-71 through H-87
community goals.	Consistency with the general plan: base document, page H-19
(c)(9) Include a diligent effort by the local government to achieve public participation of all economic segments of the community in the development of the housing element, and the program shall describe this effort.	See Appendix F in its entirety, and the base document for a summary (H-50 through H-60)
(c)(10)(A) Affirmatively further fair housing in accordance with Chapter 15 (commencing with Section 8899.50) of Division 1 of Title 2. The program shall include an assessment of fair housing in the jurisdiction that shall include all of the following components:	Appendix D in its entirety
(c)(10)(A)(i) A summary of fair housing issues in the jurisdiction	Appendix D, H-D-10 through H-D-15
(c)(10)(A)(i) and an assessment of the jurisdiction's fair housing enforcement and fair housing outreach capacity.	Appendix D, H-D-16 through H-D-23
(c)(10)(A)(ii) An analysis of available federal, state, and local data and knowledge to identify integration and segregation patterns and trends,	Appendix D, H-D-24 through H-D-49
(c)(10)(A)(ii)racially or ethnically concentrated areas of poverty and affluence,	Appendix D, H-D-41 through H-D-49
(c)(10)(A)(ii) disparities in access to opportunity,	Appendix D, H-D-50 through H-D-56
(c)(10)(A)(ii) and disproportionate housing needs,	Appendix D, H-D-57 though H-D-71
(c)(10)(A)(ii) including displacement risk.	Appendix D, H-D-67 through H-D-71
(c)(10)(A)(ii) The analysis shall identify and examine such patterns, trends, areas, disparities, and needs, both within the jurisdiction.	Appendix D in its entirety, as this information is woven throughout

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(c)(10)(A)(ii) and comparing the jurisdiction to the region in which it is located, based on race and other characteristics protected by the California Fair Employment and Housing Act (Part 2.8 (commencing with Section 12900) of Division 3 of Title 2) and Section 65008.	Appendix D in its entirety, as this information is woven throughout
(c)(10)(A)(iii) An assessment of the contributing factors, including the local and regional historical origins	Appendix D, H-D-6 through H-D-15
(c)(10)(A)(iii) and current policies and practices, for the fair housing issues identified under clauses (i) and (ii).	Appendix D, H-D-16 through H-D-23
(c)(10)(A)(iv) An identification of the jurisdiction's fair housing priorities and goals, giving highest priority to those factors identified in clause (iii) that limit or deny fair housing choice or access to opportunity, or negatively impact fair housing or civil rights compliance,	Appendix D, H-D-14 et seq.
(c)(10)(A)(iv) and identifying the metrics and milestones for determining what fair housing results will be achieved.	AFFH policies are located in the base document, policies H5.1.1 through H5.4.5
(c)(10)(A)(v) Strategies and actions to implement those priorities and goals, which may include, but are not limited to, enhancing mobility strategies	AFFH policies H5.1.1 through H5.1.3
(c)(10)(A)(v) and encouraging development of new affordable housing in areas of opportunity,	AFFH policies H5.2.1 through H5.2.3
(c)(10)(A)(v) as well as place-based strategies to encourage community revitalization, including preservation of existing affordable housing,	AFFH policies H5.3.1 through H5.3.3
(c)(10)(A)(v) and protecting existing residents from displacement.	AFFH policies H5.4.1 through H5.4.5
(c)(10)(B) A jurisdiction that completes or revises an assessment of fair housing pursuant to Subpart A (commencing with Section 5.150) of Part 5 of Subtitle A of Title 24 of the Code of Federal Regulations, as published in Volume 80 of the Federal Register, Number 136, page 42272, dated July 16, 2015, or an analysis of impediments to fair housing choice in accordance with the requirements of Section 91.225 of Title 24 of the Code of Federal Regulations in effect before August 17, 2015, may incorporate relevant portions of that assessment or revised assessment of fair housing or analysis or revised analysis of impediments to fair housing element.	N/A
(c)(10)(C) The requirements of this paragraph shall apply to housing elements due to be revised pursuant to Section 65588 on or after January 1, 2021.	See above

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(d)(1) A local government may satisfy all or part of its requirement to identify a zone or zones suitable for the development of emergency shelters pursuant to paragraph (4) of subdivision (a) by adopting and implementing a multijurisdictional agreement, with a maximum of two other adjacent communities, that requires the participating jurisdictions to develop at least one year-round emergency shelter within two years of the beginning of the planning period.	N/A
(d)(2) The agreement shall allocate a portion of the new shelter capacity to each jurisdiction as credit toward its emergency shelter need, and each jurisdiction shall describe how the capacity was allocated as part of its housing element.	N/A
(d)(3) Each member jurisdiction of a multijurisdictional agreement shall describe in its housing element all of the following:	N/A
(d)(3)(A) How the joint facility will meet the jurisdiction's emergency shelter need.	N/A
(d)(3)(B) The jurisdiction's contribution to the facility for both the development and ongoing operation and management of the facility.	
(d)(3)(C) The amount and source of the funding that the jurisdiction contributes to the facility.	
(d)(4) The aggregate capacity claimed by the participating jurisdictions in their housing elements shall not exceed the actual capacity of the shelter.	N/A
(e) Except as otherwise provided in this article, amendments to this article that alter the required content of a housing element shall apply to both of the following: [Note that this provision is applicable to AB 2339 (Chapter 654, Statutes of 2022), which amended Section 65583(a)(4). Jurisdictions adopting their housing element after January 1, 2023 should describe why this amendment is not applicable to them.]	N/A
(1) A housing element or housing element amendment prepared pursuant to subdivision (e) of Section 65588 or Section 65584.02, when a city, county, or city and county submits a draft to the department for review pursuant to Section 65585 more than 90 days after the effective date of the amendment to this section.	N/A
(2) Any housing element or housing element amendment prepared pursuant to subdivision (e) of Section 65588 or Section 65584.02, when the city, county, or city and county fails to submit the first draft to the department before the due date specified in Section 65588 or 65584.02.	N/A

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(f) – (j): Not applicable	N/A
Section 65583.1(a)	
(a) The Department of Housing and Community Development, in evaluating a proposed or adopted housing element for substantial compliance with this article, may also allow a city or county to identify sites for accessory dwelling units based on the number of accessory dwelling units developed in the prior housing element planning period whether or not the units are permitted by right, the need for these units in the community, the resources or incentives available for their development, and any other relevant factors, as determined by the department.	Base document H-39 et seq.
(b) Sites that contain permanent housing units located on a military base undergoing closure or conversion as a result of action pursuant to the Defense Authorization Amendments and Base Closure and Realignment Act (Public Law 100-526), the Defense Base Closure and Realignment Act of 1990 (Public Law 101-510), or any subsequent act requiring the closure or conversion of a military base may be identified as an adequate site if the housing element demonstrates that the housing units will be available for occupancy by households within the planning period of the element. No sites containing housing units scheduled or planned for demolition or conversion to nonresidential uses shall qualify as an adequate site.	N/A
Note: If communities are using the provisions of Section 65583.1(c), which allow RHNA credit for conversion of non-affordable to affordable housing and for preservation of existing affordable housing at risk of loss, the applicable provisions need to be added to this table.	N/A
Section 65583.2	
(a) A city's or county's inventory of land suitable for residential development pursuant to paragraph (3) of subdivision (a) of Section 65583 shall be used to identify sites throughout the community, consistent with paragraph (10) of subdivision (c) of Section 65583,	Base document methodology discussion, H-27 through H-44
(a) that can be developed for housing within the planning period and that are sufficient to provide for the jurisdiction's share of the regional housing need for all income levels pursuant to Section 65584. As used in this section, "land suitable for residential development" includes all of the following sites that meet the standards set forth in subdivisions (c) and (g):	See below
(a)(1) Vacant sites zoned for residential use.	See electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
	well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(a)(2) Vacant sites zoned for nonresidential use that allows residential development.	See electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(a)(3) Residentially zoned sites that are capable of being developed at a higher density, including sites owned or leased by a city, county, or city and county	See electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(a)(4) Sites zoned for nonresidential use that can be redeveloped for residential use, and for which the housing element includes a program to rezone the site, as necessary, rezoned for, to permit residential use, including sites owned or leased by a city, county, or city and county.	See electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(b) The inventory of land shall include all of the following:	
(b)(1) A listing of properties by assessor parcel number.	See electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53
(b)(2) The size of each property listed pursuant to paragraph (1), and the general plan designation and zoning of each property.	See electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53
(b)(3) For nonvacant sites, a description of the existing use of each property.	See electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53
(b)(3) If a site subject to this paragraph is owned by the city or county, the description shall also include whether there are any plans to dispose of the property during the planning period and how the city or county will comply with Article 8 (commencing with Section 54220) of Chapter 5 of Part 1 of Division 2 of Title 5.	See electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53. Publicly owned sites generally have pending projects on them

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(b)(4) A general description of any environmental constraints to the development of housing within the jurisdiction, the documentation for which has been made available to the jurisdiction. This information need not be identified on a site-specific basis.	See discussion on-site constraints in Appendix C, H-C-13 et seq.
	See electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
	See also discussion in Appendix B, H-B-52 through H-B-54
(b)(5)(A) A description of existing or planned water, sewer, and other dry utilities supply, including the availability and access to distribution facilities.	See discussion on-site constraints in Appendix C, H-C-13 et seq.
	See electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
	See also discussion in Appendix B, H-B-52 through H-B-54
(b)(5)(B) Parcels included in the inventory must have sufficient water, sewer, and dry utilities supply available and accessible to support housing development or be included in an existing general plan program or other mandatory program or plan, including a program or plan of a public or private entity providing water or sewer service, to secure sufficient water, sewer, and dry utilities supply to support housing development. This paragraph does not impose any additional duty on the city or county to construct, finance, or otherwise provide water, sewer, or dry utilities to parcels included in the inventory.	See discussion on-site constraints in Appendix C, H-C-13 et seq.
	See electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
	See also discussion in Appendix B, H-B-52 through H-B-54
(b)(6) Sites identified as available for housing for above moderate-income households in areas not served by public sewer systems. This information need not be identified on a site-specific basis.	N/A

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(b)(7) A map that shows the location of the sites included in the inventory, such as the land use map from the jurisdiction's general plan, for reference purposes only.	See map figures in base document, pages H-38 and H-43, and Appendix C, pages H-C-15 and H- C-51
(c) Based on the information provided in subdivision (b), a city or county shall determine whether each site in the inventory can accommodate the development of some portion of its share of the regional housing need by income level during the planning period, as determined pursuant to Section 65584. The inventory shall specify for each site the number of units that can realistically be accommodated on that site and whether the site is adequate to accommodate lower income housing, moderate-income housing, or above moderate-income housing.	Base document methodology discussion, H-27 through H-44
(c) A nonvacant site identified pursuant to paragraph (3) or (4) of subdivision (a) in a prior housing element and a vacant site that has been included in two or more consecutive planning periods that was not approved	Appendix C, H-C-14 et seq.
to develop a portion of the locality's housing need shall not be deemed adequate to accommodate a portion of the housing need for lower income households that must be accommodated in the current housing element planning period unless the site is zoned at residential densities consistent with paragraph (3) of this subdivision and the site is subject to a program in the housing element requiring rezoning within three years of the beginning of the planning period to allow residential use by right for housing developments in which at least 20 percent of the units are affordable to lower income households. An unincorporated area in a nonmetropolitan county pursuant to clause (ii) of subparagraph (B) of paragraph (3) shall not be subject to the requirements of this subdivision to allow residential use by right.	Note: No rezoning required.
(c) Notwithstanding the foregoing, for a local government that fails to adopt a housing element that the department has found to be in substantial compliance with state law within 120 days of the statutory deadline in Section 65588 for adoption of the housing element, rezoning pursuant to this subdivision shall be completed no later than one year from the statutory deadline in Section 65588 for adoption of the housing element.	To be adopted by January 31, 2023.
(c) The analysis shall determine whether the inventory can provide for a variety of types of housing, including multifamily rental housing,	See base document programs, H-71 through H- 87; see also discussion in Constraints, Appendix B, beginning on H-B-5
(c) factory-built housing, mobilehomes,	Appendix B, H-B-44
(c) housing for agricultural employees,	Appendix B, H-B-43

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(c) supportive housing,	Appendix B, H-B-42
(c) single-room occupancy units,	Appendix B, H-B-45; see also base document H- 44
(c) emergency shelters, and	Appendix B, H-B-39 et seq.
(c) transitional housing	Appendix B, H-B-42
(c) and whether the inventory affirmatively furthers fair housing .	For AFFH analysis of inventory, see Appendix D, H-D-72 et seq.
(c) The city or county shall determine the number of housing units that can be accommodated on each site as follows:	
(c)(1) If local law or regulations require the development of a site at a minimum density, the department shall accept the planning agency's calculation of the total housing unit capacity on that site based on the established minimum density. If the city or county does not adopt a law or regulation requiring the development of a site at a minimum density, then it shall demonstrate how the number of units determined for that site pursuant to this subdivision will be accommodated.	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.)
(c)(2) The number of units calculated pursuant to paragraph (1) shall be adjusted as necessary, based on the land use controls and site improvements requirement identified in paragraph (5) of subdivision (a) of Section 65583,	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.)
(c)(2) the realistic development capacity for the site,	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.)
(c)(2) typical densities of existing or approved residential developments at a similar affordability level in that jurisdiction,	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.)

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(c)(2) and on the current or planned availability and accessibility of sufficient water, sewer, and dry utilities.	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.)
	See also electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(c)(2)(A) A site smaller than half an acre shall not be deemed adequate to accommodate lower income housing need unless the locality can demonstrate that sites of equivalent size were successfully developed during the prior planning period for an equivalent number of lower income housing units as projected for the site or unless the locality provides other evidence to the department that the site is adequate to accommodate lower income housing.	N/A – no sites less than half an acre are included as sites for lower income
(c)(2)(B) A site larger than 10 acres shall not be deemed adequate to accommodate lower income housing need unless the locality can demonstrate that sites of equivalent size were successfully developed during the prior planning period for an equivalent number of lower income housing units as projected for the site or unless the locality provides other evidence to the department that the site can be developed as lower income housing.	Base Housing Element document, H-35 through H-37
(c)(2)(B) For purposes of this subparagraph, "site" means that portion of a parcel or parcels designated to accommodate lower income housing needs pursuant to this subdivision.	
(c)(2)(C) A site may be presumed to be realistic for development to accommodate lower income housing need if, at the time of the adoption of the housing element, a development affordable to lower income households has been proposed and approved for development on the site.	See pipeline projects, base document H-39 and Appendix C, H-C-22 through H-C-34
(c)(3) For the number of units calculated to accommodate its share of the regional housing need for lower income households pursuant to paragraph (2), a city or county shall do either of the following:	
(c)(3)(A) Provide an analysis demonstrating how the adopted densities accommodate this need. The analysis shall include, but is not limited to, factors such as market demand, financial feasibility, or information based on development project experience within a zone or zones that provide housing for lower income households.	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.)

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
	See also electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
 (c)(3)(B) The following densities shall be deemed appropriate to accommodate housing for lower income households: (i) For an incorporated city within a nonmetropolitan county and for a nonmetropolitan county that has a micropolitan area: sites allowing at least 15 units per acre. (ii) For an unincorporated area in a nonmetropolitan county not included in clause (i): sites allowing at least 10 units per acre. (iii) For a suburban jurisdiction: sites allowing at least 20 units per acre. (iv) For a jurisdiction in a metropolitan county: sites allowing at least 30 units per acre. 	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.) See also electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(4)(A) For a metropolitan jurisdiction:	
(4)(A)(i) At least 25 percent of the jurisdiction's share of the regional housing need for moderate-income housing shall be allocated to sites with zoning that allows at least 4 units of housing, but not more than 100 units per acre of housing.	See base document, H-45
(4)(A)(ii) At least 25 percent of the jurisdiction's share of the regional housing need for above moderate- income housing shall be allocated to sites with zoning that allows at least 4 units of housing.	See base document, H-45
(B) The allocation of moderate-income and above moderate-income housing to sites pursuant to this paragraph shall not be a basis for the jurisdiction to do either of the following:	
(i) Deny a project that does not comply with the allocation.	
(ii) Impose a price minimum, price maximum, price control, or any other exaction or condition of approval in lieu thereof. This clause does not prohibit a jurisdiction from imposing any price minimum, price maximum, price control, exaction, or condition in lieu thereof, pursuant to any other law.	
(iii) The provisions of this subparagraph do not constitute a change in, but are declaratory of, existing law with regard to the allocation of sites pursuant to this section.	
(C) This paragraph does not apply to an unincorporated area.	

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(D) For purposes of this paragraph:	
(i) "Housing development project" has the same meaning as defined in paragraph (2) of subdivision (h) of Section 65589.5.	
(ii) "Unit of housing" does not include an accessory dwelling unit or junior accessory dwelling unit that could be approved pursuant to Section 65852.2 or Section 65852.22 or through a local ordinance or other provision implementing either of those sections. This paragraph shall not limit the ability of a local government to count the actual production of accessory dwelling units or junior accessory dwelling units in an annual progress report submitted pursuant to Section 65400 or other progress report as determined by the department.	
(E) Nothing in this subdivision shall preclude the subdivision of a parcel, provided that the subdivision is subject to the Subdivision Map Act (Division 2 (commencing with Section 66410)) or any other applicable law authorizing the subdivision of land.	
(d) For purposes of this section, a metropolitan county, nonmetropolitan county, and nonmetropolitan county with a micropolitan area shall be as determined by the United States Census Bureau. A nonmetropolitan county with a micropolitan area includes the following counties: Del Norte, Humboldt, Lake, Mendocino, Nevada, Tehama, and Tuolumne and other counties as may be determined by the United States Census Bureau to be nonmetropolitan counties with micropolitan areas in the future.	
(e) (1) Except as provided in paragraph (2), a jurisdiction shall be considered suburban if the jurisdiction does not meet the requirements of clauses (i) and (ii) of subparagraph (B) of paragraph (3) of subdivision (c) and is located in a Metropolitan Statistical Area (MSA) of less than 2,000,000 in population, unless that jurisdiction's population is greater than 100,000, in which case it shall be considered metropolitan. A county, not including the City and County of San Francisco, shall be considered suburban unless the county is in an MSA of 2,000,000 or greater in population in which case the county shall be considered metropolitan.	
(2)(A)(i) Notwithstanding paragraph (1), if a county that is in the San Francisco-Oakland-Fremont California MSA has a population of less than 400,000, that county shall be considered suburban. If this county includes an incorporated city that has a population of less than 100,000, this city shall also be considered suburban. This paragraph shall apply to a housing element revision cycle, as described in subparagraph (A) of paragraph (3) of subdivision (e) of Section 65588, that is in effect from July 1, 2014, to December 31, 2028, inclusive.	

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(2)(A)(ii) A county subject to this subparagraph shall utilize the sum existing in the county's housing trust fund as of June 30, 2013, for the development and preservation of housing affordable to low- and very low income households.	
(2)(B) A jurisdiction that is classified as suburban pursuant to this paragraph shall report to the Assembly Committee on Housing and Community Development, the Senate Committee on Housing, and the Department of Housing and Community Development regarding its progress in developing low- and very low income housing consistent with the requirements of Section 65400. The report shall be provided three times: once, on or before December 31, 2019, which report shall address the initial four years of the housing element cycle, a second time, on or before December 31, 2023, which report shall address the subsequent four years of the housing element cycle, and a third time, on or before December 31, 2027, which report shall address the subsequent four years of the housing element cycle as a whole. The reports shall be provided consistent with the requirements of Section 9795.	
(f) A jurisdiction shall be considered metropolitan if the jurisdiction does not meet the requirements for "suburban area" above and is located in an MSA of 2,000,000 or greater in population, unless that jurisdiction's population is less than 25,000 in which case it shall be considered suburban.	
(g)(1) For sites described in paragraph (3) of subdivision (b) [non-vacant sites], the city or county shall specify the additional development potential for each site within the planning period and shall provide an explanation of the methodology used to determine the development potential.	
(g)(1) The methodology shall consider factors including the extent to which existing uses may constitute an impediment to additional residential development,	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.)
	See also electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(g)(1) the city's or county's past experience with converting existing uses to higher density residential development,	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.)

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
	See also electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(g)(1) the current market demand for the existing use,	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.) See also electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(g)(1) an analysis of any existing leases or other contracts that would perpetuate the existing use or prevent redevelopment of the site for additional residential development,	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.)
	See also electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(g)(1) development trends,	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.)
	See also electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(g)(1) market conditions,	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.)
	See also electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53,

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
	as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(g)(1) and regulatory or other incentives or standards to encourage additional residential development on these sites.	See base document (2023-231 City of San Mateo Draft Housing Element) for detailed methodology of inventory (H-27 et seq.)
	See also electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(g)(2) In addition to the analysis required in paragraph (1), when a city or county is relying on nonvacant sites described in paragraph (3) of subdivision (b) to accommodate 50 percent or more of its housing need for	See base document for detailed methodology of inventory (H-27 et seq.)
lower income households, the methodology used to determine additional development potential shall demonstrate that the existing use identified pursuant to paragraph (3) of subdivision (b) does not constitute an impediment to additional residential development during the period covered by the housing element. An existing use shall be presumed to impede additional residential development, absent findings based on substantial evidence that the use is likely to be discontinued during the planning period.	See also electronic sites inventory in Appendix C, Housing Resources starting on page H-C-53, as well as individual sites analyses in the same Appendix, H-C-16 through H-C-51.
(g)(3) Notwithstanding any other law, and in addition to the requirements in paragraphs (1) and (2), sites that currently have residential uses, or within the past five years have had residential uses that have been vacated or demolished, that are or were subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of low or very low income, subject to any other form of rent or price control through a public entity's valid exercise of its police power, or occupied by low or very low income households, shall be subject to a policy requiring the replacement of all those units affordable to the same or lower income level as a condition of any development on the site. Replacement requirements shall be consistent with those set forth in paragraph (3) of subdivision (c) of Section 65915.	Base document Policy H2.6
(h) The program required by subparagraph (A) of paragraph (1) of subdivision (c) of Section 65583 shall accommodate 100 percent of the need for housing for very low and low-income households allocated pursuant to Section 65584 for which site capacity has not been identified in the inventory of sites pursuant to paragraph (3) of subdivision (a) on sites that shall be zoned to permit owner-occupied and rental multifamily residential use by right for developments in which at least 20 percent of the units are affordable to lower income households during the planning period.	No rezoning is required to meet the RHNA allocation. All sites in the inventory on which lower income units are identified are zoned at least 30 units per acre See also base document Policy H1.10

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(h) These sites shall be zoned with minimum density and development standards that permit at least	No rezoning is required to meet the RHNA allocation. All sites in the inventory on which lower income units are identified are zoned for at least 30 units per acre
(h) 16 units per site at a density of at least 16 units per acre in jurisdictions described in clause (i) of subdivision (c),	No rezoning is required to meet the RHNA allocation. All sites in the inventory on which lower income units are identified are zoned for at least 30 units per acre
(h) shall be at least 20 units per acre in jurisdictions described in clauses (iii) and (iv) of subparagraph (B) of paragraph (3) of subdivision (c)	No rezoning is required to meet the RHNA allocation. All sites in the inventory on which lower income units are identified are zoned for at least 30 units per acre
(h) and shall meet the standards set forth in subparagraph (B) of paragraph (5) of subdivision (b).	No rezoning is required to meet the RHNA allocation. All sites in the inventory on which lower income units are identified are zoned for at least 30 units per acre
(h) At least 50 percent of the very low and low-income housing need shall be accommodated on sites designated for residential use and for which nonresidential uses or mixed uses are not permitted, except that a city or county may accommodate all of the very low and low-income housing need on sites designated for mixed uses if those sites allow 100 percent residential use and require that residential use occupy 50 percent of the total floor area of a mixed-use project.	No rezoning is required to meet the RHNA allocation. All sites in the inventory on which lower income units are identified are zoned for at least 30 units per acre
(i) For purposes of this section and Section 65583, the phrase "use by right" shall mean that the local government's review of the owner-occupied or multifamily residential use may not require a conditional use permit, planned unit development permit, or other discretionary local government review or approval that would constitute a "project" for purposes of Division 13 (commencing with Section 21000) of the Public Resources Code. Any subdivision of the sites shall be subject to all laws, including, but not limited to, the local government ordinance implementing the Subdivision Map Act.	

GOVERNMENT CODE PROVISION	HOUSING ELEMENT COMPLIANCE
(i) A local ordinance may provide that "use by right" does not exempt the use from design review. However, that design review shall not constitute a "project" for purposes of Division 13 (commencing with Section 21000) of the Public Resources Code.	
(i) Use by right for all rental multifamily residential housing shall be provided in accordance with subdivision (f) of Section 65589.5.	
(j) Notwithstanding any other provision of this section, within one-half mile of a Sonoma-Marin Area Rail Transit station, housing density requirements in place on June 30, 2014, shall apply.	

Exhibit B Revisions in Response to HCD Comment Letter dated September 28, 2022

Comment				
<u>Number</u>	<u>Section</u>	HCD Comment	City Response	Location
1	Past Housing Element Review	As part of the evaluation of programs in the past cycle, the element must analyze the effectiveness of goals, policies, and related actions in meeting the housing needs of special needs populations (e.g., elderly, persons with disabilities, large households, female headed households, farmworkers and persons experiencing homelessness). Programs should be revised as appropriate to reflect the results of this evaluation.	Reviewed/updated past HE evaluation to analyze effectiveness, and identified areas where GPPs in 23-31 HE will be strengthened/expanded, as needed.	Appendix E
2	Needs - AFFH	Fair Housing Issues: The element must include other relevant factors that contribute to fair housing issues in the jurisdiction. For instance, the element can analyze historical land use and investment practices or other information and demographic trends	The requested information has been updated.	See H-D-6, as well as H-D-17 et seq.
3	Needs - AFFH	Enforcement: While the element lists fair housing laws in Appendix D, it must state whether the City complies with federal and state fair housing laws. If the City does not currently comply, a program should be added as appropriate.	Revised 23-31 HE to add more specific language on how it complies with federal and state fair housing laws.	See page H-D- 16 through H- D-23
4	Needs - AFFH	Integration and Segregation: The element provided some data regarding segregation and integration of race, disability, familial status, and income. The element must describe the census tracts that have geographic concentrations of race (i.e., concentrations identified as white majority). In addition, the element must discuss and analyze data on persons with disabilities for trends over time and patterns across census tracts as well as evaluate patterns at a regional basis, comparing the City to the region. The element must also include a local and regional analysis of integration and segregation for familial status. Lastly, the element must describe and analyze concentrations of income geographically throughout the City.	Additional language has been added to address this comment.	See H-D-24 through H-D-49
5	Needs - AFFH	Racial/Ethnic Areas of Concentration of Poverty and Affluence (R/ECAP): The element includes information relative to R/ECAP within the City but should also analyze where they are in the region. The element must also address concentrated areas of affluence both locally and regionally. The combination of the R/ECAP and areas of affluence analyses will help guide goals and actions to address fair housing issues. The analysis should evaluate the patterns and changes over time at a local (e.g., neighborhood to neighborhood) and regional level (e.g., city to region).	As information was not yet available on RCAAs when the draft was submitted, it is included in this revision.	See H-D-41 and through H-D- 49.

6	Needs -	Disproportionate Housing Needs including Displacement: While the element	More narrative has been provided on	See H-D-57
	AFFH	includes some data on disproportionate needs, additional information is needed. The element must describe any geographic concentration of cost burden and overcrowding by tenure, as well as any concentrations of substandard housing both locally and regionally. In addition, the element must describe and analyze the census tracts with displacement risk. While the map depicts a lot of areas vulnerable to displacement, this must be supported with an analysis.	disproportionate needs.	though H-D-71
7	Needs - AFFH	Sites Inventory: While the element includes a summary of some factors, the analysis must identify whether sites improve or exacerbate conditions and whether sites are isolated by income group. A full analysis should address the income categories of identified sites with respect to location, the number of sites and units by all income groups and how that affects the existing patterns for all components of the assessment of fair housing (e.g., segregation and integration, access to opportunity). If sites exacerbate conditions, the element should identify further program actions that will be taken to promote equitable quality of life throughout the community (e.g., anti-displacement and place-based community revitalization strategies).	The Draft HE contained an extensive discussion of how the inventory relates to AFFH criteria. This analysis was crafted by Root Policy in conjunction with staff.	See H-D-72 through H-D-77
8	Needs - AFFH	Contributing Factors: The element identifies many contributing factors to fair housing issues. The element must prioritize these factors to better formulate policies and programs and carry out meaningful actions to Affirmatively Furthering Fair Housing (AFFH). In addition, the element must describe how the actions in Appendix D Fair Housing Plan are tied to the housing element programs and include implementation.	The 23-31 HE has been updated to include prioritization of contributing factors.	See H-D-14 et seq.
9	Needs - AFFH	Goals, Actions, Metrics, and Milestones: The element must be revised to add or modify goals and actions based on the outcomes of a complete analysis. Goals and actions must specifically respond to the analysis and to the identified and prioritized contributing factors to fair housing issues and must be significant and meaningful enough to overcome identified patterns and trends. Actions must have specific commitment, metrics, and milestones as appropriate and must address housing mobility enhancement, new housing choices and affordability in high opportunity areas, place-based strategies for community preservation and revitalization and displacement protection.	The 23-31 HE Implementation Plan has been revised to provide more defined metrics, outcomes and timing, as appropriate.	See implementation plan in the main Housing Element document, beginning on H- 84.
10	Needs - Other	Extremely Low-Income Households (ELI): The element must quantify the number of existing and projected ELI households, and also analyze their housing needs. The analysis of ELI housing needs should consider tenure and rates of overpayment.	This information is included in the needs packet provided by ABAG and the 23-31 HE has been updated to provide expand information, including in AFFH.	See throughout Appendix A, starting on page H-A-22; see also narrative

				woven throughout the AFFH, Appendix D.
11	Needs - Other	<u>Overpayment</u> : The element must quantify and analyze the number of lower- income households overpaying by tenure (i.e., renter and owner).	This information has been added to Appendix A.	See H-A-43 through H-A-46
12	Needs - Other	Housing Costs: While the element includes estimated rents for residents, it utilizes American Community Survey (ACS) data. The element should supplement census data with other sources (e.g., local knowledge).	This information was included in Appendix A.	See H-A-41 through H-A-43
13	Inventory	Progress in Meeting the Regional Housing Need Allocation (RHNA): The City's RHNA may be reduced by the number of new units built since June 30, 2022; however, the element must demonstrate their affordability based on actual sales price, rent level or other mechanisms ensuring affordability (e.g., deed restrictions). The element should also discuss the status, any barriers to development and other relevant factors to demonstrate their availability in the planning period.	Detailed information for pipeline projects, as well as other sites in the Sites Inventory, added to Appendix C.	See detailed sites discussion in Appendix C, Housing Resources, beginning on page H-C-22.
14	Inventory	Realistic Capacity: While the element provides assumptions of buildout for sites included in the inventory, it must also provide support for these assumptions. For example, the element should demonstrate what specific trends, factors, and other evidence led to the assumptions. The estimate of the number of units for each site must be adjusted as necessary, based on the land use controls and site improvements and typical densities of existing or approved residential developments at a similar affordability level. The element currently assumes realistic capacity at 100 percent of base zoned density for multifamily units in R-3, R-4, and R-5 zones. The analysis must provide substantial support and demonstrate a history of developing at maximum density within the City. Examples to support realistic capacity assumptions should also include affordability levels, and percent of maximum densities.	The 23-31 HE has been updated to provide additional narrative to support and justify using 100% of zoned capacity as the realistic capacity for a site on the Sites Inventory.	See base document for detailed methodology of inventory (H-27 et seq.). Also see detailed sites discussion in Appendix C.
15	Inventory	The calculation of residential capacity must also account for the likelihood of residential development in zoning where 100 percent nonresidential uses are allowed. The analysis should be based on factors such as development trends including nonresidential, performance standards requiring residential uses or other relevant factors such as enhanced policies and programs. For example, the element could analyze all development activity in these nonresidential zones, how often residential development occurs and adjust residential capacity calculations, policies, and programs accordingly.	Additional language has been added to the 23-31 HE to address this comment	See base document for detailed methodology of inventory (H-27 et seq.). Also See detailed sites discussion in Appendix C.

16	Inventory	Small and Large Sites: Sites smaller than an half acre and larger than 10 acres in size are deemed inadequate to accommodate housing for lower-income housing unless it is demonstrated that sites of equivalent size were successfully <u>developed during the prior planning period</u> for an equivalent number of lower-income housing units as projected for the site or unless the housing element describes other evidence to HCD that the site is adequate to accommodate lower-income housing (Gov. Code, § 65583.2, subd. (a) (3)	This information is provided in 23-31 HE narrative (i.e. Concar Passage) for large sites; there are no small sites that have been identified as potentially affordable.	See base document pages H-35 through H-37
17	Inventory	In addition, the element must describe feasibility of the Hillsdale and Bridgepointe sites including likelihood of development during the planning period, whether a specific plan is needed, and if the existing uses will remain.	23-31 HE has been updated to include additional information on individual development sites, including Hillsdale Mall and Bridgepointe Shopping Center.	See base document page H-35 through H-37
18	Inventory	Lastly the element must describe a history of lot consolidation as a method of developing housing as well as whether the City has any incentives to consolidate lots with different owners.	Analysis added to Appendix C with specific projects identified	See H-C-14 and individual sites analyses in Appendix C.
19	Inventory	<u>Suitability of Nonvacant Sites</u> : The element must include an analysis demonstrating the potential for redevelopment of <u>nonvacant sites</u> . To address this requirement, the element describes in general the existing use of each nonvacant site, for example, "commercial" or "parking lot". This alone is not adequate to demonstrate the potential for redevelopment in the planning period. The description of existing uses should be sufficiently detailed to facilitate an analysis demonstrating the potential for additional development in the planning period.	Greater analysis of individual sites has been included in the Housing Resources Appendix and a new policy added to the 23-31 HE	See individual sites' analysis in Appendix C, as well as narrative beginning on H- C-14. In addition, Policy H4.5 has been added, to conduct outreach to property owners.

20	Inventory	In addition, the element must analyze the extent that existing uses may	Greater analysis of individual sites has been	See individual
		impede additional residential development. For example, the element	included in the Housing Resources Appendix.	sites' analysis in
		includes sites identified as parking lots, church, gas station, an auto repair, and		Appendix C.
		a warehouse; but must also demonstrate whether these existing uses would		Some sites

		Section 54220) of Chapter 5 of Part 1 of Division 2 of Title 5.	about the 445 S. B St site.	

23	Inventory	Replacement Housing Requirements:If the sites inventory identifies sites with existing residential uses, it must identify whether the current residential uses are affordable to lower-income households or describe whether the additional residential development on the site requires the demolition of the existing residential use. For nonvacant sites with existing, vacated, or demolished residential uses and occupied by, or subject to an affordability requirement for, lower-income households within the last five years there must be a replacement housing program for units affordable to lower-income households. (Gov. Code, § 65583.2, subd. (g)(3).)Absent a replacement housing program, these sites are not adequate sites to accommodate lower-income households. The replacement housing program has the same requirements as set forth in Government Code section 65915, subdivision (c)(3). The housing element must be revised to include such analysis and a program, if necessary.	The sites inventory table identifies sites with existing residential uses and a preliminary check indicated that none of these units are deed restricted or affordable to low-income households. The City has an existing replacement housing program under the Housing Crisis Act. The Housing Element includes a policy (H-2.6) to require no net loss of all housing units (per the Housing Crisis Act sunset date of 2034) and to study implementation beyond 2034.	See revised language on page H-45, as well as Policy H 2.6.
24	Inventory	 Previously Identified Nonvacant and Vacant Sites: If nonvacant sites identified in a prior adopted housing element or vacant sites identified in two or more consecutive planning periods, the sites are inadequate to accommodate housing for lower-income households unless: The site's current zoning is appropriate for the development of housing affordable to lower-income households by either including analysis or meeting the appropriate density and The site is subject to a housing element program that requires rezoning within three years of the beginning of the planning period to allow residential use by right for housing developments in which at least 20 percent of the units are affordable to lower-income households. (Gov. Code, § 65583.2, subd. (c).) 	A program has been added to address this comment.	See Policy H1.10.
25	Inventory	Accessory Dwelling Units (ADU): The element projects 480 ADUs over the planning period or approximately 60 ADUs per year over the eight-year planning period. The element also notes permitting 44 ADUs in 2019, 47 in 2020, and 66 in 2021. The trend does not consider the number of permits in 2018 (eight ADUs) and does not support an assumption of 60 ADUs per year. To support assumptions for ADUs in the planning period, the element should reduce the number of ADUs assumed per year and reconcile trends with HCD records, including additional information such as more recent permitted units and inquiries, resources and incentives, other relevant factors and modify policies and programs as appropriate. Further, programs should commit to additional incentives and strategies, frequent monitoring (every other year) and specific commitment to adopt alternative measures such as rezoning or amending the element within a specific time (e.g., six months) if needed.	More analysis and discussion has been added to the 23-31 HE, the ADU production estimates have been adjusted to align with the four year permitting average and the policy has updated with more detailed/new implementation programs has been add to ensure ongoing monitoring, compliance with state law and robust ADU development to meet production estimates.	See pages H-39 and H-40 and Policy H1.4.

26	Inventory	<u>AB 725</u> : For jurisdictions that are considered Metropolitan, the element must identify at least 25 percent of the remaining moderate and above moderate RHNA on sites that allow at least four units of housing (e.g., four plex or greater) (Gov. Code, § 65583.2, subd. (c)(4)).	Language has been included to address this requirement.	See H-45
27	Inventory	Infrastructure: While the element includes a general discussion on water and sewer capacity, it must demonstrate sufficient existing or planned water and sewer capacity to accommodate the City's regional housing need for the planning period. (Gov. Code, § 65583.2, subd. (b).).	The 23-31 HE is using existing zoning capacity to meet its RHNA, and both of the City's water providers have an adopted Urban Water Management Plans based on this existing zoning capacity; sewer capacity has been demonstrated with the current and future treatment plant.	See H-19 and H- 20; and new Policy H1.20
28	Inventory	In addition, the element generally mentions infrastructure constraints for infill development. The element must describe and analyze the constraints as well as their impacts on the identified sites to meet the RHNA.	The individual sites analysis in Housing Resources includes site-by-site discussion of infrastructure constraints. In addition, added narrative is found in Appendix B.	See H-B-17 and H-B- 51, as well as individual sites tear sheets in Appendix C
29	Inventory	For your information, water and sewer service providers must establish specific procedures to grant priority water and sewer service to developments with units affordable to lower-income households. (Gov. Code, § 65589.7.) Local governments are required to immediately deliver the housing element to water and sewer service providers. HCD recommends including a cover memo describing the City's housing element, including the City's housing needs and regional housing need. The element should demonstrate compliance with these requirements and add or modify programs, if necessary. For additional information and sample cover memo, see the Building Blocks at https://www.hcd.ca.gov/priority-for-water-and-sewer.	The 23-31 HE includes information to demonstrate compliance with this requirement.	See H-19 and H- 20; and new Policy H1.20
30	Inventory	Environmental Constraints: While the element generally describes a few environmental conditions within the City (p. H-B-44), it must relate those conditions to identified sites and describe any other known environmental or other constraints that could impact housing development on identified sites in the planning period.	The individual sites analysis in Housing Resources includes site-by-site discussion of infrastructure constraints.	See individual sites tear sheets starting on H-C-16

31	Zoning for Housing Types Zoning for	Emergency Shelters: The housing element must demonstrate the permit processing, development, and management standards for emergency shelters are objective and encourage and facilitate the development of, or conversion to, emergency shelters. In particular, the element describes development standards for emergency shelters; however these standards are beyond the development standards allowed under housing element law. <u>The element</u> <u>must demonstrate that emergency shelters are subject to the same</u> <u>development and management standards applicable to residential or</u> <u>commercial development within the same zone except for those standards</u> <u>prescribed by Government Code section 65583 (a)(4)(A).</u> The element must also clarify that emergency shelters are allowed without	The Constraints Analysis provides general information about zoning capacity, strategies and programs to provide emergency shelters and address homelessness. In addition, a new policy has been added to address this comment.	See Appendix B H-B-39 et seq., and Policy H3.7 with explicit references to the code.
52	Housing Types	discretionary action in the C2 zone and describe sufficient and suitable capacity in the identified zone.		
33	Zoning	In addition, the element should describe how emergency shelter parking requirements comply with AB139/Government Code section 65583, subdivision (a)(4)(A) or include a program to comply with this requirement.		
34	Zoning	 Low Barrier Navigation Centers: While the element includes a program to allow Low Barrier Navigation Centers, it is limited to emergency shelter zones. Low Barrier Navigation Centers shall be a use by-right in zones where multifamily and mixed uses are permitted, including nonresidential zones permitting multifamily uses pursuant to Government Code section 65660. The element must demonstrate compliance with this requirement and include programs as appropriate. 	Discussion in Constraints Analysis has been updated to include information on these uses, and a new program addresses this comment.	See H-B-42 et seq.; see also Policy H3.7.
35	Zoning	Single Room Occupancy (SRO) Units: The element must describe where SROs are allowed or add a program as appropriate.	The 23-31 HE has been updated to include a program that explicitly identifies where SROs can be located.	See Policy H1.7.
36	Zoning	Manufactured Housing: The element must clarify whether manufactured homes are subject to additional regulations beyond state law if on a permanent foundation and add a program as needed	The 23-31 HE has been updated to include a program to explicitly allow manufactured housing and be subject to the same zoning requirements as single-family homes.	See Policy H1.7.
37	Zoning	Accessory Dwelling Unit (ADU): The element indicates the City modifies its zoning code to ease barriers to the development of ADU's. However, after a cursory review of the City's ordinance, HCD discovered several areas which are not consistent with State ADU Law. HCD will provide a complete listing of ADU non-compliance issues under a separate cover. As a result, the element should add a program to update the City's ADU ordinance in order to comply with state law. For more information, please consult HCD's ADU Guidebook, published in December 2020, which provides detailed information on new state requirements surrounding ADU development	The City has still not received a letter from HCD which identifies the non-compliance issues with the City's ADU Ordinance; however, a program has been added to address this comment once it has been received.	See Policy H1.4.

38	Constraints	Land Use Controls: The element must identify and analyze all relevant land use controls impacts as potential constraints on a variety of housing types. The analysis should analyze land use controls independently and cumulatively with other land use controls. The analysis should specifically address requirements related to parking, heights, lot coverage and limits on allowable densities. The analysis should address any impacts on cost, supply, housing choice, affordability, timing, approval certainty and ability to achieve maximum densities and include programs to address identified constraints.	The Constraints Analysis has been updated throughout to address this comment.	See Appendix B in its entirety.
39	Constraints	The element must analyze the maximum heights of 35 feet in multifamily zones and whether three-story buildings are allowed as well as whether allowed densities can be met in the TOD Hillsdale Station with a 24-foot height restriction.	The maximum height in multi-family zones ranges between 35 to 55 feet. There are no limits on building stories in the City. The Hillsdale Station TOD area allows maximum heights of 24 feet to 55 feet. The 24 feet height limit applies to single-family zoned parcels in the Hillsdale TOD Specific Plan. The narrative has been edited in the Land Use Controls section (Table 2) to clarify the height requirements as up to 55 feet.	See Appendix B, beginning on H-B-5
40	Constraints	The element should also analyze the open space requirements for the R-3 zone.	A program was identified to study impediments to missing middle housing (including open space requirements). The Constraints Analysis was updated to evaluate the impacts.	See Appendix B H-B-6 and Policy H1.13.
41	Constraints	In addition, the element should analyze requiring more than one parking space for studio and one-bedroom units and the minimum requirement of 2.2 spaces for 1,400 square foot units regardless of bedroom size and add programs to specifically address the constraints.	Additional narrative has been added to address this comment, and a policy has been amended to reflect compliance a variety of parking requirements.	See Appendix B H-B-11 and Policy H1.7.
42	Constraints	In addition, the element should clarify how multifamily developments are allowed in the E and C zones and whether they require a use permit. Both in the element and in public comments, height restrictions, floor area definitions, maximum densities of 50 dwelling units an acre, and design review guidelines were identified as constraints to development and should be addressed in programs as appropriate.	Multi-family developments are allowed in certain E and C zones, both by-right and through a Special Use Permit (noted in Appendix B, Section 2.7.7). The 23-31 HE analysis and policies have been updated to address this comment as follows: - Revise floor area definition (Policy H1.7) - Adopt Objective Design Standards (Policy H1.8). - Existing height and density requirements do not preclude multi-family development or prevent the City from meeting its RHNA.	See Appendix B H-B-5 and policies H1.7, H1.8, H1.13, and H1.21

			- The General Plan Update process is anticipated to allow for increased heights and densities.	
43	Constraints	Fees and Exaction: The element must describe all required fees for single family and multifamily housing development, including impact fees, and analyze their impact as potential constraints on housing supply and affordability. For example, the analysis could identify the total amount of fees and their proportion to the development costs for both single family and multifamily housing. While Table 4 lists fee deposits, the element should also include typical fees for each and clarify whether the fees are the same for single family and multifamily developments.	Constraints Analysis included fees and analysis by typical single-family and multi- family development (Table 6). Additional narrative has been included to add to the analysis.	See Appendix B beginning on H- B-20
44	Constraints	The element should also identify fees related to annexation, variances, conditional use permits (CUP), general plan amendments, zone changes, site plan review, planned unit developments, specific plans, development agreements, and environmental fees. Table 6 should also describe the typical fees as a percent of the total development cost for both single family and multifamily developments and add a program as appropriate.	Additional narrative and analysis have been included.	See Appendix B beginning on H- B-20 and then beginning on H- B-31, as well as Table 6.
45	Constraints	Local Processing and Permit Procedures: While the element includes information about processing times, it should also <u>describe the procedures for</u> <u>a typical single family and multifamily development.</u> The analysis should address the approval body, the number of public hearing if any, approval findings and any other relevant information, specifically for special use permits, site plans and architectural review (a <u>s well as whether finding five is</u> <u>related to a crime free ordinance</u>). The analysis should address impacts on housing cost, supply, timing and approval certainty. The element should identify and analyze approval findings for impacts on approval certainty, <u>the</u> <u>presence of processes or guidelines to promote certainty and add or modify</u> <u>programs as appropriate</u> . The element should also clarify whether the listed typical approval times are for both single family and multifamily <u>developments</u> . Lastly, it should clarify whether the preapplication process <u>adds six to nine months in addition to the typical approval times listed and add</u> <u>or modify programs as appropriate</u> .	Additional narrative and analysis have been included.	See Appendix B beginning on H- B-24
46	Constraints	Local Ordinances: While the element identifies the City's community benefit program, it must describe whether the incentives are in addition to state density bonus law. The element must clarify how the 75 dwelling units an acre allowed using the community benefit program interacts with the restricted densities under measure Y. In addition, the element must describe how the inclusionary program, community benefit program, and state density bonus law interact with incentives provided.	Constraints analysis has been updated to describe the envisioned layering of density bonus and community benefits.	See Appendix B H-B-13 and Policy H1.3.

47	Constraints	Zoning Fees and Transparency: The element must <u>clarify its</u> compliance with new transparency requirements for posting all zoning and development standards, and inclusionary requirements for each parcel on the jurisdiction's website pursuant to Government Code section 65940.1(a)(1).	The constraints section states that the City meets all transparency requirements for Gov. Code Section 65940.1(a)(1).	See Appendix B, Section 2.7.1, links to webpages added in footnotes, cross- references in Sections 2.7.1 & 2.7.2
48	Constraints	Measure Y: The element must describe the impacts of measure Y on height and density restrictions as a constraint on housing development and affordability. The element must add a program to include outreach and mitigation measures for the impact of Measure Y on housing development throughout the planning period. The element should analyze the measure as a constraint on development based on site suitability for development.	The 23-31 HE identifies a path to meeting the City's 6th cycle RHNA allocation within the limits of Measure Y; and Measure Y was discussed in the Constraints Analysis, noting it as non-governmental constraint on housing production that results in additional sites needed to meet the City's RHNA. The community discussion about Measure Y and housing growth in the City over the next 20 years is happening and will continue as part of the GPU adoption process. New narrative added to the HE.	See Appendix B beginning on page H-B-55; page H-40 in main document, and Policy H1.21
49	Constraints	State Density Bonus Law: The City's current density bonus ordinance should be reviewed for compliance with current state density bonus law and programs should be added as necessary. (Gov. Code, § 65915.)	The City's current Density Bonus Ordinance was last updated in 2018 and may not be fully consistent with State law. The City has been defaulting to the state statutes for implementation. A policy has been added to review and update as necessary to be consistent with state law.	Policy H1.3 includes provisions for updating the ordinance in 2023-24.
50	Constraints	Design Review: The element must describe and analyze the design review guidelines and process, including approval procedures and decision-making criteria, for their impact as potential constraints on housing supply and affordability. For example, the analysis could describe required findings and discuss whether objective standards and guidelines improve development certainty and mitigate cost impacts. The element must demonstrate this process is not a constraint or include a program to address this permitting requirement, as appropriate.	The City is in the process of developing Objective Design Standards and has a program to implement. Additional narrative has been provided to address this comment.	See Appendix B H-B-29 et seq., as well as Policy H1.6.

51	Constraints	On/Off-Site Improvements: The element must identify subdivision level improvement requirements, such as minimum street widths (e.g., 40-foot minimum street width) and analyze their impact as potential constraints on housing supply and affordability.	The Constraints Analysis has been updated to provide additional narrative to address this comment.	See Appendix B H-B-18
52	Constraints	Constraints on Housing for Persons with Disabilities: The element briefly describes its reasonable accommodation procedures. However, the element should also describe the process and decision-making criteria such as approval findings and analyze any potential constraints on housing for persons with disabilities.	More narrative has been included on the City's Reasonable Accommodation requirements, including those that can be accomplished by-right.	See Appendix B beginning on H- B-38
53	Constraints	In addition, the element states that Policy H.1.14 commits to revise the definition of family, but there are no actions within the program to revise the definition of family to remove constraints. The element must add or revise a program to remove the constraints as noted.	A program has been modified to address this comment.	See Policy H1.14
54	Constraints	Lastly, group homes for seven or more persons appears to be excluded from several zones allowing residential uses and subject to a CUP. The element should evaluate these requirements as constraints and include specific commitment to amend zoning and permit procedures to allow these uses in all residential zones with objectivity to facilitate approval certainty.	This was included as a program to allow larger group homes consistent with State law and fair housing requirements. Additional narrative has been added to the constraints section about group homes.	See Appendix B H-B-37 et seq. and amended Policy H1.14
55	Constraints	Developed Densities and Permit Times: The element must be revised to include analysis of requests to develop housing at densities below those anticipated, and the length of time between receiving approval for a housing development and submittal of an application for building permits that potentially hinder the construction of a locality's share of the regional housing need.	The Draft HE included an analysis of time lapse between planning approval and building permit submittal, as well as requests for developments at reduced densities.	See Appendix B H-B-51
56	Needs	Special Needs Populations: While the element quantifies the City's special needs populations, it must also analyze their special housing needs. For a complete analysis of each population group, the element should discuss challenges faced by the population, the existing resources to meet those needs (availability senior housing units, # of large units, # of deed restricted units, etc.), an assessment of any gaps in resources, and proposed policies, programs, and funding to help address those gaps. In addition, the element must quantify and analyze the number of elderly persons in the City	This information was provided in the needs packet supplied by ABAG, and in other places throughout the Element (such as in the resources section).	See both Appendix A (Needs) as well as Appendix D (AFFH).
57	GPPs	To address the program requirements of Government Code section 65583, subdivision (c)(1-6), and to facilitate implementation, programs should include: (1) a description of the City's specific role in implementation; (2) definitive implementation timelines; (3) objectives, quantified where appropriate; and (4) identification of responsible agencies and officials. Programs to be revised include the following:	With respect to all comments on programs requiring additional information, please see the revised implementation plan at the end of the 23-31 HE for revisions.	

58	Policy 1.2 (Utilize Public Funding): This program should include proactive outreach to developers throughout the planning period as well as a geographic target for the metric.	Policy has been updated.	Policy H1.2
59	Policy 1.4 (Incentivize ADU Development): This program should revise action C to include discrete timing of how often it will be completed and monitored. In addition, action D should include back-up actions if estimates are not met (e.g., identify additional sites or provide additional incentives) as well as monitor affordability.	Policy has been updated.	Policy H1.4
60	Policy 1.5 (Encourage Family Housing): The program should include back-up actions, with specific timing, if the identified incentives are not implemented.	The current program measure and implementation action discuss proposing 3- bedroom affordable units as part of the City's inclusionary requirements. However, this requires further study before implementation. Back up implementation measure added.	Policy H1.5
61	Policy 1.6 (Streamline Housing Application Review): Action B must include specific timing of when permit application requirements will be updated. In addition, the timing of action C must be completed earlier in the planning period.	Policy has been updated.	Policy H1.6
62	Policies 1.15 (Supportive Housing Requirements) and 1.16 (Mobile Home Parks): These programs must revise timing to be implemented earlier in the planning period for a beneficial impact.	Policy has been updated.	Policy H1.15
63	Policy 1.17 (Farmworker Housing): This program must move up timing to be implemented earlier in the planning period. In addition, the program should cite the Government Code for farmworker housing.	Policy has been updated.	Policy H1.17
64	Policy 1.18 (Permitting and Development Fee Review): This program must clarify timing in Action A, specifically whether the study will be complete within the identified timeframe or if the fees will be reduced by that date. In addition, Action B must specify when the first review will occur and when adjustments will take place.	Policy has been updated.	Policy H1.18
65	Policy 1.19 (Senior Housing): This program must clarify what potential actions will be implemented for seniors as well as whether other special needs groups are included in the program.	Policy has been updated.	Policy H1.19
66	Policy 2.1 (Housing Rehabilitation Efforts), 2.3 (Energy and Water Efficiency), 3.4 (Expand Tenant Protections), and 4.3 (Community Education and Outreach): This program must describe how often outreach will occur throughout the planning period.	Policies have been updated.	See implementation programs in each of the

				referenced policies
67		Policy 3.3 (Evaluate Housing Revenue Sources): This program must describe the implementation component for action A.	Policy has been updated.	Policy H3.3
68		Policy 3.5 (Creation of Below Market Rate Set Asides): This program must add implementation and timing for what will result from the study.	Policy has been updated.	Policy H3.5
69		Policy 4.2 (Countywide Below Market Rate Unit Waitlist): This program must clarify how support will be provided as well as how often throughout the planning period.	Policy has been updated.	Policy H4.2
70		Policy 4.4 (Enable Affirmative Marketing): Timing must be clarified to state whether the marketing will occur once in the planning, or on a project-by-project basis.	Policy has been updated.	Policy H4.4
71		Policy 5.1.2 (Regional Down Payment Assistance): This program should include outreach for education.	Policy has been updated.	Policy H5.1.2
72		Policy 5.2.2 (Incentivize Developers): This program must clarify whether incentives are in place, timing to implement the incentives, as well as conducting proactive outreach.	Policy has been updated.	Policy H5.2.2
73		Policy 5.3.2 (Fund Minor Home Repairs): The program should clarify how often outreach will occur as well as specify whether the metrics are annually or throughout the planning period.	Policy has been updated.	Policy H5.3.2
74		Policy 5.4.2 (Project Sentinel): This program should be revised to include outreach and describe how awareness will be increased.	Policy has been updated.	Policy H5.4.2
75		Policy 5.4.3 (Fair Housing Webpage): This program should describe how often the website will be updated and whether outreach will be included.	Policy has been updated.	Policy H5.4.3
76		Policy 5.4.5 (Future Improvements in Disadvantaged Communities): This program must include an action to implement the feasibility study as well as a back-up if the study is not implemented.	Policy has been updated.	Policy H5.4.5
77	Other GPPs	Policy 1.1 (Monitor RHNA): While this program ensures sufficient sites are identified, it should commit to identifying additional sites throughout the planning period if needed to accommodate the City's RHNA.	Policy has been updated.	Policy H1.1

78	Other GPPs	Policy 1.10 (Establish By-Right Housing for Prior Housing Sites) and 2.6: Previously identified nonvacant sites are inadequate to accommodate the need for lower-income households unless the site is subject to a housing element program that requires rezoning within three years of the beginning of the planning period to allow residential use by-right for housing developments in which at least 20 percent of the units are affordable to lower-income households. (Gov. Code, § 65583.2, subd. (c).) The program must be revised to comply as well as clarify that the densities for the identified sites are	Policy has been updated.	Policy H1.10
		appropriate for lower-income households. In addition, timing of Policy 2.6 should occur no later than 3 years from the start of the planning period.		
79	Other GPPs	Policy 1.12 (Encourage Residential Uses within Housing Overlay): The program must clarify which commercial zones will be included in the program actions.	Policy has been updated.	Policy H1.12
80	Other GPPs	Policy 2.4 (Capital Improvements in Lower-Resourced Neighborhoods): The program should describe what capital improvements will be included.	Policy has been updated.	Policy H2.4
81	Other GPPs	Policy 3.7 (Expanding Homeless Shelters): This program must clarify implementation actions after the study in action A. In addition, a government citation must be added for Action C and implementation timing must be earlier in the planning period to ensure beneficial impact.	Policy has been updated.	Policy H3.7
82	Other GPPs	While the element includes Policy 5.1.3 (Regional Forgivable Loan Program) to support the regional program to assist ELI households, it is a regional policy. The element should specify what actions the City is taking to address the ELI need. The program should also specify whether proactive outreach will occur to implement the program.	Policy has been updated.	Policy H5.1.3
83	Other GPPs	Policy 1.3 (Increase Below Market Rate Unit Production): This program should be revised to include an action to comply with State Density Bonus law as well as specific timing for implementation. The program should clarify whether the action currently listed is in addition to state law requirements.	Policy has been updated.	Policy H1.3
84	Other GPPs	Policy 1.7 (Update Zoning Code Development Standards): This program must make a firm commitment to remove parking requirements that are a constraint to multifamily development.	Policy has been updated.	Policy H1.7
85	Other GPPs	Policy 1.13 (Encourage Development of Missing Middle Housing): This program should include specific implementation and specify whether the identified policies and codes will be revised to remove constraints.	Policy has been updated.	Policy H1.13
86	Other GPPs	Policy 1.14 (Evaluate and Update Special Needs Group Housing Requirements): This policy should commit to reviewing and revising procedural requirements to permit group homes for seven or more persons in all zones allowing residential uses based on objective criteria to facilitate	Policy has been updated.	Policy H1.14

		approval certainty. In addition, the program must be implemented earlier in the planning period to ensure a beneficial impact.		
87	GPPs AFFH	While programs in Table 13 include specific timelines, all programs in the element that AFFH must include specific metrics and milestones with geographic targets that address the fair housing analysis. In addition, Policy 5.2.1 (City Supported Housing) should specify what actions will be taken to add more affordable housing to moderate and high resource areas as well as whether incentives are provided.	Policy has been updated.	Policy H5.2.1
88	Other GPPs	Policy 2.2 (Retention of Existing Lower-Income Units) and 5.3.3 (Monitor Affordable Housing Projects) should reference State Preservation Notice Law (Gov. Code, § 65863.10, 65863.11, and 65863.13) and state noticing requirements to tenants and affected public entities. The program should also be expanded to include other potential at-risk properties not included in the analysis. HCD will send additional information under separate cover.	Policy has been updated.	Policy H2.2
89	Quantified Objectives	The element must include quantified objectives to establish an estimate of housing units by income category that can be constructed, rehabilitated, and conserved over the planning period. While the element includes these objectives for construction, it must also include estimates for rehabilitation and not limit conserved units to at-risk properties.	The City anticipates doing 31 rehab projects annually through CDBG (248 over the eight year cycle); and 10 CALHOME rehabs annually (80 over the eight year cycle). This information was included in the Draft.	See base document page H-89
90	Public Participation	While the element includes a summary of public participation including outreach to the community, it must also describe whether translation services were available outside of the Lets Talk Housing sessions.	Information on translation services has been included in the public participation Appendix and the 23-31 HE.	See base document page H-52 and Appendix F
91	Consistency with the GP	While the element discusses how internal consistency will be achieved with other elements of the general plan as part of the housing element update, it should also discuss how internal consistency will be maintained throughout the planning period.	Additional narrative has been added to address this comment.	See discussion in the main document, page H-19

Housing Element Update CEQA Exemption Technical Memorandum

City of San Mateo

1. Introduction

1.1 PURPOSE

This Technical Memorandum serves as an evaluation of the City of San Mateo 6th Cycle Housing Element Update (proposed project) for California Environmental Quality Act (CEQA) compliance. This Technical Memorandum was prepared to present: 1) the findings resulting from the CEQA compliance review, as described below; and 2) the recommendations concerning the appropriate CEQA compliance documentation.

1.2 STATUTORY AUTHORITY AND REQUIREMENTS

Once it is determined that an activity is a project subject to CEQA, it is then determined whether the project is exempt from CEQA. State CEQA Guidelines Section 15061(b) outlines the ways in which a project may be exempt as follows:

A project is exempt from CEQA if:

- 1) The project is exempt by statute (see, e.g. Article 18, commencing with Section 15260).
- 2) The project is exempt pursuant to a categorical exemption (see Article 19, commencing with Section 15300) and the application of that categorical exemption is not barred by one of the exceptions set forth in Section 15300.2.
- 3) The activity is covered by the common-sense exemption that CEQA applies only to projects which have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA.
- 4) The project will be rejected or disapproved by a public agency. (See Section 15270(b)).
- 5) The project is exempt pursuant to the provisions of Article 12.5 of Chapter 3.

The proposed project would be exempt as a "common sense" exemption under State CEQA Guidelines Section 15061(b)(3) because implementation of the Housing Element Update would not have the potential to cause a significant effect on the environment, as further discussed below in Section 3, *Findings Concerning CEQA Exemption*.

2. Project Description

2.1 REGIONAL LOCATION

San Mateo is in the northern portion of San Mateo County. It is bordered by the San Francisco Bay and City of Foster City to the east, the City of Burlingame and Town of Hillsborough to the north, the City of Belmont to the south, and the Town of Hillsborough and unincorporated San Mateo County to the west. San Mateo is roughly 10 miles south of San Francisco and 25 miles northwest of downtown San Jose. State Route 82 (El Camino Real), State Route 92, Highway 101, and Caltrain provide regional transportation connections.

2.2 PROPOSED PROJECT

2.2.1 Project Background

The City of San Mateo is preparing a comprehensive update to its existing Housing Element. The update is expected to be completed in January 2023 and will guide the City's housing development from January 2023 through January 2031.

The 6th Cycle Housing Element is a State-mandated eight-year policy document that is a component of the San Mateo General Plan. The overall purpose of the Housing Element Update is to identify current and projected housing needs, show locations where housing can be built, and set goals, policies, and programs to meet the community's housing needs. The foundation of the Housing Element is the Regional Housing Needs Allocation (RHNA), which begins with a determination of housing need issued by the California Housing and Community Development Department (HCD) and allocated by the Association of Bay Area Governments (ABAG). A jurisdiction is required to demonstrate whether it has sufficient capacity to achieve its RHNA. However, identification of a site's capacity does not guarantee that construction will occur on that site, as the actual construction of units would occur as a result of a development application from a private or non-profit developer. The RHNA for San Mateo for this Housing Element Update is 7,015 units, including 1,777 Very Low income units, 1,023 Low income units, 1,175 Moderate income units, and 3,040 Above Moderate income units.

2.2.2 Proposed Sites and Zoning

State law requires that the Housing Element identify adequate sites for housing by including an inventory of land suitable for residential development, including vacant sites and non-vacant sites having potential for redevelopment, with an analysis of the development capacity that can realistically be achieved for each site. The purpose of the Sites Inventory is to evaluate whether there are sufficient sites with appropriate zoning density to meet the RHNA. It is based on the City's current land use designations and zoning requirements. The City of San Mateo's Sites Inventory for future housing identifies housing sites spread

Project Description

throughout the city that could be developed with up to 10,820 new housing units, exceeding the RHNA assigned to the City. Figure 2-1, *Housing Sites Inventory*, shows a map of where each site is located within the city and the housing opportunity areas. The development capacity of each of the identified housing sites is based on existing land use and zoning densities currently in place. No redesignations or rezoning are necessary and no redesignation or rezoning would occur as part of the adoption of the proposed Housing Element Update. Most of the identified sites are currently developed, although not to the maximum extent allowed under current land use and zoning designations. Based on market trends observed in the city, property owner and developer interests, and the characteristics of new development approved over the past five years, the City has developed a sites inventory that includes properties most likely to be redeveloped to provide new housing over the next eight years. A significant number of these sites are located in high resource areas to meet Affirmatively Furthering Fair Housing (AFFH) requirements and avoid adding to any Racially/Ethnically Concentrated Areas of Poverty (RECAP).

2.2.3 Proposed Housing Plan

The City has identified five goals to guide the Housing Element Update's policies and programs. Goals H1 through H3 address the region's housing needs through a combination of production, preservation, and protection. Goal H4 promotes community engagement and public outreach to support social resilience, and Goal H5 is to affirmatively further fair housing.

Goal H1 is to facilitate and support the production of new housing at all income levels, but especially affordable housing. The City will employ two approaches to support this goal: being directly involved in housing production and encouraging and streamlining housing developments. Policies proposed under this goal encourage utilization of public funds to build more units, partnerships to support increased production of accessory dwelling units, usage of local ordinances to require developers to create affordable units that serve a variety of populations and provide incentives for affordable unit development, adoption of objective design standards, updates to the Zoning Code, creation of minimum densities for mixed-use projects with a housing component, development of policies to support production of "missing middle"¹ housing, and streamlined application review and processing timelines for affordable development projects. Those policies under Goal H1 that have the potential to affect land use regulations related to housing production are discussed in further detail and analyzed below in Section 3.2, *Analysis in Support of Findings*.

¹ "Missing middle" housing refers to multi-family housing in walkable neighborhoods built at a scale compatible with single-family homes.

Project Description

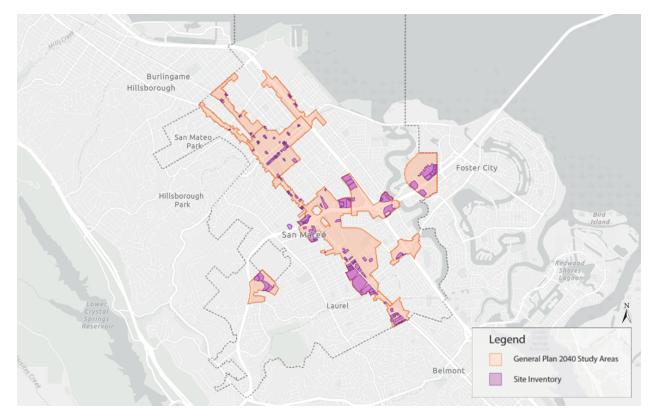

Figure 2-1 Housing Sites Inventory

Project Description

Goal H2 is to preserve existing housing that is affordable to lower- and middle-income residents. This goal can be achieved most directly through policies encouraging the use of public funds to acquire existing affordable housing units or requiring developers to replace any lost units. Alternatively, the City can indirectly achieve this goal by improving the quality of life for the current residents through policies incentivizing upgrades through rehabilitation, accessibility modifications, or energy efficiency changes. Enhancements to low-income neighborhoods can also be achieved through capital improvements and resiliency projects that protect against threats posed by climate change.

Goal H3 is to protect current residents and prevent displacement. Commercial linkage fees, relocation fees, documentation requirements for landlords, and right to return policies are proposed under this goal to help balance the scales against market forces that lead to displacement, while extending vital tenant protection. Policies under this goal also address homelessness and increase shelter capacity that can protect housing insecure individuals and families from having to leave San Mateo entirely, allowing service providers an opportunity to intervene and lead clients to housing stability. Other policies relate to affirmative marketing, prioritizing special needs tenants in below market rate units, establishing a rental registry to monitor trends in evictions, and undertaking several actions to affirmatively further fair housing.

Goal H4 is to promote social resilience through public education and outreach. Policies under this goal work to increase community outreach and availability of resources in multiple languages, support the development of a countywide affordable rental waitlist, expand community education and outreach, and enable affirmative housing.

Goal H5 is the Fair Housing Action Plan, meant to implement the overarching goal of AFFH. Action areas under this goal include enhancing housing mobility strategies, encouraging new housing choices and affordability in high resource areas, improving place-based strategies to encourage community conservation and revitalization (including preservation of existing affordable housing), and protecting existing residents from displacement. Many of the policies and programs that support AFFH also support the other goals of the Housing Element Update discussed above, which further highlights how fair housing is interwoven with achieving the City's larger housing production, preservation, protection, and promotion goals.

3. Findings Concerning CEQA Exemption

3.1 SECTION 15061 (B) (3): COMMON SENSE EXEMPTION

The proposed project is exempt as a "common sense" exemption under State CEQA Guidelines Section 15061(b)(3) because the project involves policies, programs, and actions to meet the City's RHNA and AFFH goals. As described above, the Housing Element Update creates a roadmap on how to achieve its RHNA and AFFH goals through identification of suitable sites for development and identifying programs and actions that could remove constraints and promote affordable housing development. Because the City does not have to rezone any sites or make any physical improvements to adopt the Housing Element, it can be seen with certainty that there is no possibility that the proposed Housing Element Update would have a significant effect on the environment. Thus, the Housing Element Update is exempt from CEQA under the common-sense exemption.

3.2 ANALYSIS IN SUPPORT OF FINDINGS

The proposed Housing Element Update is strictly a policy document that does not provide entitlements to any specific development projects and would not result in any direct or indirect physical changes to the environment. As discussed in Section 2.2.2, *Proposed Sites and Zoning*, the Housing Sites Inventory utilizes existing land use and zoning densities and does not require redesignation or rezoning to meet the City's RHNA. The Housing Element Update does not propose any changes to the City of San Mateo General Plan land use map and would not modify any General Plan land use designations. Future implementation actions would include amendments to zoning and other regulations to facilitate housing development consistent with State housing law. These future amendments are discussed in detail below.

Policies, programs, and actions included in the proposed Housing Element Update encourage housing production and outline steps for the future implementation of certain actions. As discussed in Section 2.2.3, *Proposed Housing Plan*, Goal H1 of the proposed Housing Element Update is to produce new housing at all income levels, with a focus on affordable housing. Policy H1.5 encourages family housing by prioritizing acquisition and new construction of housing that accommodates families when possible and requiring subsidized projects to include family-sized units. Policy H1.8 is to adopt Objective Design Standards for multi-family residential projects and mixed-use projects with a residential component to expedite the production of housing. Policy H1.9 creates minimum residential density requirements to ensure mixed-use development will contain an appropriate amount of housing in commercial/office developments. Policy H1.12 encourages residential uses within the Housing Overlay by amending the overlay to encourage residential projects in commercial zones, not just mixed-use zones. Policy H1.13 encourages development

Findings Concerning CEQA Exemption

of missing middle housing by supporting small infill residential construction (4-10 units) through policy updates and code amendments. These policies encourage and promote housing production under existing land use regulations but do not increase the amount of allowable development allowed in the city when compared to existing land use regulations.

The policies described above—and their corresponding implementing programs and actions—under Goal H1 could be considered potentially growth inducing. However, none of these policies involve any land use or zoning changes that could increase the amount of housing allowed in the city or otherwise create physical impacts on the environment. These policies are structured to incentivize housing development within the framework of existing density and buildout provisions envisioned in the City's existing General Plan, and through the appropriate ministerial or discretionary review depending on the type of projects proposed by developmers.

Furthermore, the proposed Housing Element Update would not increase water demand in comparison to growth projections already reflected in relevant urban water supply planning documents. The City of San Mateo receives its water supply from California Water Service (CalWater) and Estero Municipal Improvement District (EMID). Urban water management plans (UWMP) are prepared by urban water suppliers and are updated every five years to support the supplier's long-term resource planning to ensure that adequate water supplies are available to meet existing and future water needs. Because the proposed Housing Element Update would retain existing land use and zoning designations, the Housing Element Update would not increase water demand projections for San Mateo. Furthermore, it is reasonable to assume that 2025 UWMPs will be prepared in the future based on the City's forthcoming 2040 growth projections from the City of San Mateo General Plan, which is currently undergoing an update separate from the proposed Housing Element Update.

The proposed Housing Element Update does not include specific amendments to any land use regulations at this time but rather provides a timeline for future amendments. Subsequent amendments to the City's land use or zoning regulations would be subject to separate CEQA review at the time those amendments are prepared, if required. Therefore, it can be seen with certainty that the City of San Mateo 6th Cycle Housing Element Update would not have a significant effect on the environment and is therefore exempt from CEQA review.

DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT DIVISION OF HOUSING POLICY DEVELOPMENT 2020 W. El Camino Avenue, Suite 500 Sacramento, CA 95833 (916) 263-2911 / FAX (916) 263-7453 www.hcd.ca.gov

September 28, 2022

Christina Horrisberger, Director Director of Community Department City of San Mateo 330 West 20th Avenue San Mateo, CA 94403

Dear Christina Horrisberger:

RE: City of San Mateo's 6th Cycle (2023-2031) Draft Housing Element

Thank you for submitting the City of San Mateo's (City) draft housing element received for review on July 1, 2022. Pursuant to Government Code section 65585, subdivision (b), the California Department of Housing and Community Development (HCD) is reporting the results of its review. Our review was facilitated by a conversation on August 31, 2022 with yourself, Zachary Dahl, Eloiza Murillo-Garcia, Manira Sandhir, Nicholas Vu, and consultant Diana Elrod. In addition, HCD considered comments from Housing Leadership Council, YIMBY Law and Greenbelt Alliance, One San Mateo, Adam Nugent, and Adam Buchbinder pursuant to Government Code section 65585, subdivision (c).

The draft element addresses many statutory requirements; however, revisions will be necessary to comply with State Housing Element Law (Article 10.6 of the Gov. Code). The enclosed Appendix describes the revisions needed to comply with State Housing Element Law.

Public participation in the development, adoption and implementation of the housing element is essential to effective housing planning. Throughout the housing element process, the City should continue to engage the community, including organizations that represent lower-income and special needs households, by making information regularly available and considering and incorporating comments where appropriate. Please be aware, any revisions to the element must be posted on the local government's website and to email a link to all individuals and organizations that have previously requested notices relating to the local government's housing element at least seven days before submitting to HCD.

For your information, pursuant to Assembly Bill 1398 (Chapter 358, Statutes of 2021), if a local government fails to adopt a compliant housing element within 120 days of the statutory deadline (January 31, 2023), then any rezoning to accommodate the regional

Christina Horrisberger, Director Page 2

housing needs allocation (RHNA), including for lower-income households, shall be completed no later than one year from the statutory deadline. Otherwise, the local government's housing element will no longer comply with State Housing Element Law, and HCD may revoke its finding of substantial compliance pursuant to Government Code section 65585, subdivision (i).

Several federal, state, and regional funding programs consider housing element compliance as an eligibility or ranking criteria. For example, the CalTrans Senate Bill (SB) 1 Sustainable Communities grant; the Strategic Growth Council and HCD's Affordable Housing and Sustainable Communities programs; and HCD's Permanent Local Housing Allocation consider housing element compliance and/or annual reporting requirements pursuant to Government Code section 65400. With a compliant housing element, the City will meet housing element requirements for these and other funding sources.

We are committed to assist the City in addressing all statutory requirements of State Housing Element Law. If you have any questions or need additional technical assistance, please contact Hillary Prasad, of our staff, at <u>Hillary.Prasad@hcd.ca.gov</u>.

Sincerely,

Paul McDougall Senior Program Manager

Enclosure

APPENDIX CITY OF SAN MATEO

The following changes are necessary to bring the City's housing element into compliance with Article 10.6 of the Government Code. Accompanying each recommended change, we cite the supporting section of the Government Code.

Housing element technical assistance information is available on HCD's website at <u>https://www.hcd.ca.gov/hcd-memos</u>. Among other resources, the housing element section contains HCD's latest technical assistance tool, *Building Blocks for Effective Housing Elements (Building Blocks)*, available at <u>https://www.hcd.ca.gov/building-blocks</u> and includes the Government Code addressing State Housing Element Law and other resources.

A. <u>Review and Revision</u>

Review the previous element to evaluate the appropriateness, effectiveness, and progress in implementation, and reflect the results of this review in the revised element. (Gov. Code, § 65588 (a) and (b).)

The review requirement is one of the most important features of the element update. The review of past programs should analyze the City's accomplishments over the previous planning period. This information provides the basis for developing an effective housing program.

A thorough program-by-program review is necessary to evaluate City's performance in addressing housing goals. While the element describes actual results of the prior element's programs, it must provide a description of how the objectives and programs of the updated element incorporate changes resulting from the evaluation.

As part of the evaluation of programs in the past cycle, the element must analyze the effectiveness of goals, policies, and related actions in meeting the housing needs of special needs populations (e.g., elderly, persons with disabilities, large households, female headed households, farmworkers and persons experiencing homelessness). Programs should be revised as appropriate to reflect the results of this evaluation.

B. Housing Needs, Resources, and Constraints

 Affirmatively further[ing] fair housing in accordance with Chapter 15 (commencing with Section 8899.50) of Division 1 of Title 2...shall include an assessment of fair housing in the jurisdiction. (Gov. Code, § 65583, subd. (c)(10)(A).)

<u>Fair Housing Issues</u>: The element must include other relevant factors that contribute to fair housing issues in the jurisdiction. For instance, the element can analyze historical land use and investment practices or other information and demographic trends.

<u>Enforcement</u>: While the element lists fair housing laws in Appendix D, it must state whether the City complies with federal and state fair housing laws. If the City does not currently comply, a program should be added as appropriate.

Integration and Segregation: The element provided some data regarding segregation and integration of race, disability, familial status, and income. The element must describe the census tracts that have geographic concentrations of race (i.e., concentrations identified as white majority). In addition, the element must discuss and analyze data on persons with disabilities for trends over time and patterns across census tracts as well as evaluate patterns at a regional basis, comparing the City to the region. The element must also include a local and regional analysis of integration and segregation for familial status. Lastly, the element must describe and analyze concentrations of income geographically throughout the City.

Racial/Ethnic Areas of Concentration of Poverty and Affluence (R/ECAP): The element includes information relative to R/ECAP within the City but should also analyze where they are in the region. The element must also address concentrated areas of affluence both locally and regionally. The combination of the R/ECAP and areas of affluence analyses will help guide goals and actions to address fair housing issues. The analysis should evaluate the patterns and changes over time at a local (e.g., neighborhood to neighborhood) and regional level (e.g., city to region).

Disproportionate Housing Needs including Displacement: While the element includes some data on disproportionate needs, additional information is needed. The element must describe any geographic concentration of cost burden and overcrowding by tenure, as well as any concentrations of substandard housing both locally and regionally. In addition, the element must describe and analyze the census tracts with displacement risk. While the map depicts a lot of areas vulnerable to displacement, this must be supported with an analysis.

<u>Sites Inventory</u>: While the element includes a summary of some factors, the analysis must identify whether sites improve or exacerbate conditions and whether sites are isolated by income group. A full analysis should address the income categories of identified sites with respect to location, the number of sites and units by all income groups and how that affects the existing patterns for all components of the assessment of fair housing (e.g., segregation and integration, access to opportunity). If sites exacerbate conditions, the element should identify further program actions that will be taken to promote equitable quality of life throughout the community (e.g., anti-displacement and place-based community revitalization strategies).

<u>Contributing Factors</u>: The element identifies many contributing factors to fair housing issues. The element must prioritize these factors to better formulate policies and programs and carry out meaningful actions to Affirmatively Furthering Fair Housing (AFFH). In addition, the element must describe how the actions in Appendix D Fair Housing Plan are tied to the housing element programs and include implementation.

<u>Goals, Actions, Metrics, and Milestones</u>: The element must be revised to add or modify goals and actions based on the outcomes of a complete analysis. Goals and actions must

specifically respond to the analysis and to the identified and prioritized contributing factors to fair housing issues and must be significant and meaningful enough to overcome identified patterns and trends. Actions must have specific commitment, metrics, and milestones as appropriate and must address housing mobility enhancement, new housing choices and affordability in high opportunity areas, place-based strategies for community preservation and revitalization and displacement protection.

2. Include an analysis of population and employment trends and documentation of projections and a quantification of the locality's existing and projected needs for all income levels, including extremely low-income households. (Gov. Code, § 65583, subd. (a)(1).)

<u>Extremely Low-Income Households (ELI)</u>: The element must quantify the number of existing and projected ELI households, and also analyze their housing needs. The analysis of ELI housing needs should consider tenure and rates of overpayment.

3. Include an analysis and documentation of household characteristics, including level of payment compared to ability to pay, housing characteristics, including overcrowding, and housing stock condition. (Gov. Code, § 65583, subd. (a)(2).)

<u>Overpayment</u>: The element must quantify and analyze the number of lower-income households overpaying by tenure (i.e., renter and owner).

<u>Housing Costs</u>: While the element includes estimated rents for residents, it utilizes American Community Survey (ACS) data. The element should supplement census data with other sources (e.g., local knowledge).

4. An inventory of land suitable and available for residential development, including vacant sites and sites having realistic and demonstrated potential for redevelopment during the planning period to meet the locality's housing need for a designated income level, and an analysis of the relationship of zoning and public facilities and services to these sites. (Gov. Code, § 65583, subd. (a)(3).)

<u>Progress in Meeting the Regional Housing Need Allocation (RHNA)</u>: The City's RHNA may be reduced by the number of new units built since June 30, 2022; however, the element must demonstrate their affordability based on actual sales price, rent level or other mechanisms ensuring affordability (e.g., deed restrictions). The element should also discuss the status, any barriers to development and other relevant factors to demonstrate their availability in the planning period.

<u>Realistic Capacity</u>: While the element provides assumptions of buildout for sites included in the inventory, it must also provide support for these assumptions. For example, the element should demonstrate what specific trends, factors, and other evidence led to the assumptions. The estimate of the number of units for each site must be adjusted as necessary, based on the land use controls and site improvements and typical densities of existing or approved residential developments at a similar affordability level. The element currently assumes realistic capacity at 100 percent of base zoned density for multifamily units in R-3, R-4, and R-5 zones. The analysis must provide substantial support and demonstrate a history of developing at maximum density within the City. Examples to support realistic capacity assumptions should also include affordability levels, and percent of maximum densities. The calculation of residential capacity must also account for the likelihood of residential development in zoning where 100 percent nonresidential uses are allowed. The analysis should be based on factors such as development trends including nonresidential, performance standards requiring residential uses or other relevant factors such as enhanced policies and programs. For example, the element could analyze all development activity in these nonresidential zones, how often residential development occurs and adjust residential capacity calculations, policies, and programs accordingly.

<u>Small and Large Sites</u>: Sites smaller than an half acre and larger than 10 acres in size are deemed inadequate to accommodate housing for lower-income housing unless it is demonstrated that sites of equivalent size were successfully developed during the prior planning period for an equivalent number of lower-income housing units as projected for the site or unless the housing element describes other evidence to HCD that the site is adequate to accommodate lower-income housing (Gov. Code, § 65583.2, subd. (c)(2)(A).). For example, a site with a proposed and approved housing development that contains units affordable to lower-income households would be an appropriate site to accommodate housing for lower-income households. (Gov. Code, § 65583.2, subd. (c)(2)(C).) In addition, the element must describe feasibility of the Hillsdale and Bridgepointe sites including likelihood of development during the planning period, whether a specific plan is needed, and if the existing uses will remain. Lastly the element must describe a history of lot consolidation as a method of developing housing as well as whether the City has any incentives to consolidate lots with different owners.

Suitability of Nonvacant Sites: The element must include an analysis demonstrating the potential for redevelopment of nonvacant sites. To address this requirement, the element describes in general the existing use of each nonvacant site, for example, "commercial" or "parking lot". This alone is not adequate to demonstrate the potential for redevelopment in the planning period. The description of existing uses should be sufficiently detailed to facilitate an analysis demonstrating the potential for additional development in the planning period. In addition, the element must analyze the extent that existing uses may impede additional residential development. For example, the element includes sites identified as parking lots, church, gas station, an auto repair, and a warehouse; but must also demonstrate whether these existing uses would impede development of these sites within the planning period. The element can summarize past experiences converting existing uses to higher density residential development, include current market demand for the existing use, provide analysis of existing leases or contracts that would perpetuate the existing use or prevent additional residential development and include current information on development trends and market conditions in the City and relate those trends to the sites identified. The element could also consider indicators such as age and condition of the existing structure, expressed developer interest, existing versus allowable floor area, low improvement to land value ratio, and other factors.

In addition, as noted in the housing element, the housing element relies upon nonvacant sites to accommodate more than 50 percent of the RHNA for lower-income households. For your information, the housing element must demonstrate existing uses are not an impediment to additional residential development and will likely discontinue in the planning

period (Gov. Code, § 65583.2, subd. (g)(2).). Absent findings (e.g., adoption resolution) based on substantial evidence, the existing uses will be presumed to impede additional residential development and will not be utilized toward demonstrating adequate sites to accommodate the regional housing need allocation.

<u>City-Owned Sites</u>: The element must include additional discussion on each of the Cityowned sites identified to accommodate the RHNA. Specifically, the analysis should address general plan designations, allowable densities, support for residential capacity assumptions, existing uses and any known conditions that preclude development in the planning period and the potential schedule for development. If zoning does not currently allow residential uses at appropriate densities, then the element must include programs to rezone sites pursuant to Government Code section 65583.2, subdivisions (h) and (i). In addition, the housing element must include a description of whether there are any plans to sell the property during the planning period and how the jurisdiction will comply with the Surplus Land Act Article 8 (commencing with Section 54220) of Chapter 5 of Part 1 of Division 2 of Title 5.

<u>Replacement Housing Requirements</u>: If the sites inventory identifies sites with existing residential uses, it must identify whether the current residential uses are affordable to lower-income households or describe whether the additional residential development on the site requires the demolition of the existing residential use. For nonvacant sites with existing, vacated, or demolished residential uses and occupied by, or subject to an affordability requirement for, lower-income households within the last five years there must be a replacement housing program for units affordable to lower-income households. (Gov. Code, § 65583.2, subd. (g)(3).) Absent a replacement housing program, these sites are not adequate sites to accommodate lower-income households. The replacement housing program has the same requirements as set forth in Government Code section 65915, subdivision (c)(3). The housing element must be revised to include such analysis and a program, if necessary.

<u>Previously Identified Nonvacant and Vacant Sites</u>: If nonvacant sites identified in a prior adopted housing element or vacant sites identified in two or more consecutive planning periods, the sites are inadequate to accommodate housing for lower-income households unless:

- The site's current zoning is appropriate for the development of housing affordable to lower-income households by either including analysis or meeting the appropriate density and
- The site is subject to a housing element program that requires rezoning within three years of the beginning of the planning period to allow residential use by right for housing developments in which at least 20 percent of the units are affordable to lower-income households. (Gov. Code, § 65583.2, subd. (c).)

<u>Accessory Dwelling Units (ADU)</u>: The element projects 480 ADUs over the planning period or approximately 60 ADUs per year over the eight-year planning period. The element also notes permitting 44 ADUs in 2019, 47 in 2020, and 66 in 2021. The trend does not consider the number of permits in 2018 (eight ADUs) and does not support an assumption

of 60 ADUs per year. To support assumptions for ADUs in the planning period, the element should reduce the number of ADUs assumed per year and reconcile trends with HCD records, including additional information such as more recent permitted units and inquiries, resources and incentives, other relevant factors and modify policies and programs as appropriate. Further, programs should commit to additional incentives and strategies, frequent monitoring (every other year) and specific commitment to adopt alternative measures such as rezoning or amending the element within a specific time (e.g., six months) if needed.

<u>AB 725</u>: For jurisdictions that are considered Metropolitan, the element must identify at least 25 percent of the remaining moderate and above moderate RHNA on sites that allow at least four units of housing (e.g., four plex or greater) (Gov. Code, § 65583.2, subd. (c)(4)).

<u>Infrastructure</u>: While the element includes a general discussion on water and sewer capacity, it must demonstrate sufficient existing or planned water and sewer capacity to accommodate the City's regional housing need for the planning period. (Gov. Code, § 65583.2, subd. (b).). In addition, the element generally mentions infrastructure constraints for infill development. The element must describe and analyze the constraints as well as their impacts on the identified sites to meet the RHNA.

For your information, water and sewer service providers must establish specific procedures to grant priority water and sewer service to developments with units affordable to lower-income households. (Gov. Code, § 65589.7.) Local governments are required to immediately deliver the housing element to water and sewer service providers. HCD recommends including a cover memo describing the City 's housing element, including the City's housing needs and regional housing need. The element should demonstrate compliance with these requirements and add or modify programs, if necessary. For additional information and sample cover memo, see the *Building Blocks* at https://www.hcd.ca.gov/priority-for-water-and-sewer.

<u>Environmental Constraints</u>: While the element generally describes a few environmental conditions within the City (p. H-B-44), it must relate those conditions to identified sites and describe any other known environmental or other constraints that could impact housing development on identified sites in the planning period.

Zoning for a Variety of Housing Types:

 Emergency Shelters: The housing element must demonstrate the permit processing, development, and management standards for emergency shelters are objective and encourage and facilitate the development of, or conversion to, emergency shelters. In particular, the element describes development standards for emergency shelters; however these standards are beyond the development standards allowed under housing element law. The element must demonstrate that emergency shelters are subject to the same development and management standards applicable to residential or commercial development within the same zone except for those standards prescribed by Government Code section 65583 (a)(4)(A). The element must also clarify that emergency shelters are allowed without discretionary action in the C2 zone and describe sufficient and suitable capacity in the identified zone. In addition, the element should describe how emergency shelter parking requirements comply with AB139/Government Code section 65583, subdivision (a)(4)(A) or include a program to comply with this requirement.

- Low Barrier Navigation Centers: While the element includes a program to allow Low Barrier Navigation Centers, it is limited to emergency shelter zones. Low Barrier Navigation Centers shall be a use by-right in zones where multifamily and mixed uses are permitted, including nonresidential zones permitting multifamily uses pursuant to Government Code section 65660. The element must demonstrate compliance with this requirement and include programs as appropriate.
- Single Room Occupancy (SRO) Units: The element must describe where SROs are allowed or add a program as appropriate.
- *Manufactured Housing*: The element must clarify whether manufactured homes are subject to additional regulations beyond state law if on a permanent foundation and add a program as needed.
- Accessory Dwelling Unit (ADU): The element indicates the City modifies its zoning code to ease barriers to the development of ADU's. However, after a cursory review of the City's ordinance, HCD discovered several areas which are not consistent with State ADU Law. HCD will provide a complete listing of ADU non-compliance issues under a separate cover. As a result, the element should add a program to update the City's ADU ordinance in order to comply with state law. For more information, please consult HCD's ADU Guidebook, published in December 2020, which provides detailed information on new state requirements surrounding ADU development.
- 5. An analysis of potential and actual governmental constraints upon the maintenance, improvement, or development of housing for all income levels, including the types of housing identified in paragraph (1) of subdivision (c), and for persons with disabilities as identified in the analysis pursuant to paragraph (7), including land use controls, building codes and their enforcement, site improvements, fees and other exactions required of developers, and local processing and permit procedures... (Gov. Code, § 65583, subd. (a)(5).)

Land Use Controls: The element must identify and analyze all relevant land use controls impacts as potential constraints on a variety of housing types. The analysis should analyze land use controls independently and cumulatively with other land use controls. The analysis should specifically address requirements related to parking, heights, lot coverage and limits on allowable densities. The analysis should address any impacts on cost, supply, housing choice, affordability, timing, approval certainty and ability to achieve maximum densities and include programs to address identified constraints. The element must analyze the maximum heights of 35 feet in multifamily zones and whether three-story buildings are allowed as well as whether allowed densities can be met in the TOD Hillsdale Station with a 24-foot height restriction. The element should also analyze the open space requirements for the R-3 zone. In addition, the element should analyze requiring more than one parking space for studio and one-bedroom units and the minimum requirement of 2.2 spaces for 1,400 square foot units regardless of bedroom size and add programs to specifically address the constraints. In addition, the element should clarify

how multifamily developments are allowed in the E and C zones and whether they require a use permit. Both in the element and in public comments, height restrictions, floor area definitions, maximum densities of 50 dwelling units an acre, and design review guidelines were identified as constraints to development and should be addressed in programs as appropriate.

<u>Fees and Exaction</u>: The element must describe all required fees for single family and multifamily housing development, including impact fees, and analyze their impact as potential constraints on housing supply and affordability. For example, the analysis could identify the total amount of fees and their proportion to the development costs for both single family and multifamily housing. While Table 4 lists fee deposits, the element should also include typical fees for each and clarify whether the fees are the same for single family and multifamily developments. The element should also identify fees related to annexation, variances, conditional use permits (CUP), general plan amendments, zone changes, site plan review, planned unit developments, specific plans, development agreements, and environmental fees. Table 6 should also describe the typical fees as a percent of the total development cost for both single family and multifamily development cost for both single family and multifamily development agreements, and environmental fees. Table 6 should also describe the typical fees as a percent of the total development cost for both single family and multifamily developments and add a program as appropriate.

Local Processing and Permit Procedures: While the element includes information about processing times, it should also describe the procedures for a typical single family and multifamily development. The analysis should address the approval body, the number of public hearing if any, approval findings and any other relevant information, specifically for special use permits, site plans and architectural review (as well as whether finding five is related to a crime free ordinance). The analysis should address impacts on housing cost, supply, timing and approval certainty. The element should identify and analyze approval findings for impacts on approval certainty, the presence of processes or guidelines to promote certainty and add or modify programs as appropriate. The element should also clarify whether the listed typical approval times are for both single family and multifamily developments. Lastly, it should clarify whether the preapplication process adds six to nine months in addition to the typical approval times listed and add or modify programs as appropriate.

<u>Local Ordinances</u>: While the element identifies the City's community benefit program, it must describe whether the incentives are in addition to state density bonus law. The element must clarify how the 75 dwelling units an acre allowed using the community benefit program interacts with the restricted densities under measure Y. In addition, the element must describe how the inclusionary program, community benefit program, and state density bonus law interact with incentives provided.

<u>Zoning Fees and Transparency</u>: The element must clarify its compliance with new transparency requirements for posting all zoning and development standards, and inclusionary requirements for each parcel on the jurisdiction's website pursuant to Government Code section 65940.1(a)(1).

<u>Measure Y</u>: The element must describe the impacts of measure Y on height and density restrictions as a constraint on housing development and affordability. The element must add a program to include outreach and mitigation measures for the impact of Measure Y

on housing development throughout the planning period. The element should analyze the measure as a constraint on development based on site suitability for development.

<u>State Density Bonus Law</u>: The City's current density bonus ordinance should be reviewed for compliance with current state density bonus law and programs should be added as necessary. (Gov. Code, § 65915.)

<u>Design Review</u>: The element must describe and analyze the design review guidelines and process, including approval procedures and decision-making criteria, for their impact as potential constraints on housing supply and affordability. For example, the analysis could describe required findings and discuss whether objective standards and guidelines improve development certainty and mitigate cost impacts. The element must demonstrate this process is not a constraint or include a program to address this permitting requirement, as appropriate.

<u>On/Off-Site Improvements</u>: The element must identify subdivision level improvement requirements, such as minimum street widths (e.g., 40-foot minimum street width) and analyze their impact as potential constraints on housing supply and affordability.

<u>Constraints on Housing for Persons with Disabilities</u>: The element briefly describes its reasonable accommodation procedures. However, the element should also describe the process and decision-making criteria such as approval findings and analyze any potential constraints on housing for persons with disabilities. In addition, the element states that Policy H.1.14 commits to revise the definition of family, but there are no actions within the program to revise the definition of family to remove constraints. The element must add or revise a program to remove the constraints as noted. Lastly, group homes for seven or more persons appears to be excluded from several zones allowing residential uses and subject to a CUP. The element should evaluate these requirements as constraints and include specific commitment to amend zoning and permit procedures to allow these uses in all residential zones with objectivity to facilitate approval certainty.

6. An analysis of potential and actual nongovernmental constraints upon the maintenance, improvement, or development of housing for all income levels, including.....requests to develop housing at densities below those anticipated in the analysis required by subdivision (c) of Government Code section 65583.2, and the length of time between receiving approval for a housing development and submittal of an application for building permits for that housing development that hinder the construction of a locality's share of the regional housing need in accordance with Government Code section 65584... (Gov. Code, § 65583, subd. (a)(6).)

<u>Developed Densities and Permit Times</u>: The element must be revised to include analysis of requests to develop housing at densities below those anticipated, and the length of time between receiving approval for a housing development and submittal of an application for building permits that potentially hinder the construction of a locality's share of the regional housing need.

7. Analyze any special housing needs such as elderly; persons with disabilities, including a developmental disability; large families; farmworkers; families with female heads of

households; and families and persons in need of emergency shelter. (Gov. Code, § 65583, subd. (a)(7).)

<u>Special Needs Populations</u>: While the element quantifies the City's special needs populations, it must also analyze their special housing needs. For a complete analysis of each population group, the element should discuss challenges faced by the population, the existing resources to meet those needs (availability senior housing units, # of large units, # of deed restricted units, etc.), an assessment of any gaps in resources, and proposed policies, programs, and funding to help address those gaps. In addition, the element must quantify and analyze the number of elderly persons in the City.

C. Housing Programs

1. Include a program which sets forth a schedule of actions during the planning period, each with a timeline for implementation, which may recognize that certain programs are ongoing, such that there will be beneficial impacts of the programs within the planning period, that the local government is undertaking or intends to undertake to implement the policies and achieve the goals and objectives of the Housing Element. (Gov. Code, § 65583, subd. (c).)

To address the program requirements of Government Code section 65583, subdivision (c)(1-6), and to facilitate implementation, programs should include: (1) a description of the City's specific role in implementation; (2) definitive implementation timelines; (..3) objectives, quantified where appropriate; and (4) identification of responsible agencies and officials. Programs to be revised include the following:

- Policy 1.2 (Utilize Public Funding): This program should include proactive outreach to developers throughout the planning period as well as a geographic target for the metric.
- Policy 1.4 (Incentivize ADU Development): This program should revise action C to include discrete timing of how often it will be completed and monitored. In addition, action D should include back-up actions if estimates are not met (e.g., identify additional sites or provide additional incentives) as well as monitor affordability.
- Policy 1.5 (Encourage Family Housing): The program should include back-up actions, with specific timing, if the identified incentives are not implemented.
- Policy 1.6 (Streamline Housing Application Review): Action B must include specific timing of when permit application requirements will be updated. In addition, the timing of action C must be completed earlier in the planning period.
- Policies 1.15 (Supportive Housing Requirements) and 1.16 (Mobile Home Parks): These programs must revise timing to be implemented earlier in the planning period for a beneficial impact.
- Policy 1.17 (Farmworker Housing): This program must move up timing to be implemented earlier in the planning period. In addition, the program should cite the government code for farmworker housing.
- Policy 1.18 (Permitting and Development Fee Review): This program must clarify timing in Action A, specifically whether the study will be complete within the

Page 10

identified timeframe or if the fees will be reduced by that date. In addition, Action B must specify when the first review will occur and when adjustments will take place.

- Policy 1.19 (Senior Housing): This program must clarify what potential actions will be implemented for seniors as well as whether other special needs groups are included in the program.
- Policy 2.1 (Housing Rehabilitation Efforts), 2.3 (Energy and Water Efficiency), 3.4 (Expand Tenant Protections), and 4.3 (Community Education and Outreach): This program must describe how often outreach will occur throughout the planning period.
- Policy 3.3 (Evaluate Housing Revenue Sources): This program must describe the implementation component for action A.
- Policy 3.5 (Creation of Below Market Rate Set Asides): This program must add implementation and timing for what will result from the study.
- Policy 4.2 (Countywide Below Market Rate Unit Waitlist): This program must clarify how support will be provided as well as how often throughout the planning period.
- Policy 4.4 (Enable Affirmative Marketing): Timing must be clarified to state whether the marketing will occur once in the planning, or on a project-by-project basis.
- Policy 5.1.2 (Regional Down Payment Assistance): This program should include outreach for education.
- Policy 5.2.2 (Incentivize Developers): This program must clarify whether incentives are in place, timing to implement the incentives, as well as conducting proactive outreach.
- Policy 5.3.2 (Fund Minor Home Repairs): The program should clarify how often outreach will occur as well as specify whether the metrics are annually or throughout the planning period.
- Policy 5.4.2 (Project Sentinel): This program should be revised to include outreach and describe how awareness will be increased.
- Policy 5.4.3 (Fair Housing Webpage): This program should describe how often the website will be updated and whether outreach will be included.
- Policy 5.4.5 (Future Improvements in Disadvantaged Communities): This program must include an action to implement the feasibility study as well as a back-up if the study is not implemented.
- 2. Identify actions that will be taken to make sites available during the planning period with appropriate zoning and development standards and with services and facilities to accommodate that portion of the city's or county's share of the regional housing need for each income level that could not be accommodated on sites identified in the inventory completed pursuant to paragraph (3) of subdivision (a) without rezoning, and to comply with the requirements of Government Code section 65584.09. Sites shall be identified as needed to facilitate and encourage the development of a variety of types of housing for all income levels, including multifamily rental housing, factory-built housing, mobilehomes, housing for agricultural employees, supportive housing, single-room occupancy units, emergency shelters, and transitional housing. (Gov. Code, § 65583, subd. (c)(1).)

As noted in Finding B4, the element does not include a complete site analysis, therefore, the adequacy of sites and zoning were not established. Based on the results of a complete sites inventory and analysis, the City may need to add or revise programs to address a

shortfall of sites or zoning available to encourage a variety of housing types. In addition, the element should be revised as follows:

<u>Policy 1.1 (Monitor RHNA)</u>: While this program ensures sufficient sites are identified, it should commit to identifying additional sites throughout the planning period if needed to accommodate the City's RHNA.

Policy 1.10 (Establish By-Right Housing for Prior Housing Sites) and 2.6: Previously identified nonvacant sites are inadequate to accommodate the need for lower-income households unless the site is subject to a housing element program that requires rezoning within three years of the beginning of the planning period to allow residential use by-right for housing developments in which at least 20 percent of the units are affordable to lower-income households. (Gov. Code, § 65583.2, subd. (c).) The program must be revised to comply as well as clarify that the densities for the identified sites are appropriate for lower-income households. In addition, timing of Policy 2.6 should occur no later than 3 years from the start of the planning period.

<u>Policy 1.12 (Encourage Residential Uses within Housing Overlay)</u>: The program must clarify which commercial zones will be included in the program actions.

Policy 2.4 (Capital Improvements in Lower-Resourced Neighborhoods): The program should describe what capital improvements will be included.

<u>Policy 3.7 (Expanding Homeless Shelters)</u>: This program must clarify implementation actions after the study in action A. In addition, a government citation must be added for Action C and implementation timing must be earlier in the planning period to ensure beneficial impact.

3. The Housing Element shall contain programs which assist in the development of adequate housing to meet the needs of extremely low-, very low-, low- and moderate-income households. (Gov. Code, § 65583, subd. (c)(2).)

While the element includes Policy 5.1.3 (Regional Forgivable Loan Program) to support the regional program to assist ELI households, it is a regional policy. The element should specify what actions the City is taking to address the ELI need. The program should also specify whether proactive outreach will occur to implement the program.

4. Address and, where appropriate and legally possible, remove governmental and nongovernmental constraints to the maintenance, improvement, and development of housing, including housing for all income levels and housing for persons with disabilities. The program shall remove constraints to, and provide reasonable accommodations for housing designed for, intended for occupancy by, or with supportive services for, persons with disabilities. (Gov. Code, § 65583, subd. (c)(3).)

As noted in Findings B5 and B6, the element requires a complete analysis of potential governmental and nongovernmental constraints. Depending upon the results of that analysis, the City may need to revise or add programs and address and remove or mitigate any identified constraints. In addition, the element should be revised as follows:

- Policy 1.3 (Increase Below Market Rate Unit Production): This program should be revised to include an action to comply with State Density Bonus law as well as specific timing for implementation. The program should clarify whether the action currently listed is in addition to state law requirements.
- Policy 1.7 (Update Zoning Code Development Standards): This program must make a firm commitment to remove parking requirements that are a constraint to multifamily development.
- Policy 1.13 (Encourage Development of Missing Middle Housing): This program should include specific implementation and specify whether the identified policies and codes will be revised to remove constraints.
- Policy 1.14 (Evaluate and Update Special Needs Group Housing Requirements): This policy should commit to reviewing and revising procedural requirements to permit group homes for seven or more persons in all zones allowing residential uses based on objective criteria to facilitate approval certainty. In addition, the program must be implemented earlier in the planning period to ensure a beneficial impact.
- 5. Promote and affirmatively further fair housing opportunities and promote housing throughout the community or communities for all persons regardless of race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability, and other characteristics... (Gov. Code, § 65583, subd. (c)(5).)

As noted in Finding B1, the element must include a complete analysis of AFFH. The element must be revised to add goals and actions based on the outcomes of a complete analysis. Goals and actions must specifically respond to the analysis and to the identified and prioritized contributing factors to fair housing issues and must be significant and meaningful enough to overcome identified patterns and trends. Actions must have specific commitment, metrics, and milestones as appropriate and must address housing mobility enhancement, new housing choices and affordability in high opportunity areas, place-based strategies for community preservation and revitalization and displacement protection.

While programs in Table 13 include specific timelines, all programs in the element that AFFH must include specific metrics and milestones with geographic targets that address the fair housing analysis. In addition, Policy 5.2.1 (City Supported Housing) should specify what actions will be taken to add more affordable housing to moderate and high resource areas as well as whether incentives are provided.

6. The housing program shall preserve for low-income household the assisted housing developments identified pursuant to paragraph (9) of subdivision (a). The program for preservation of the assisted housing developments shall utilize, to the extent necessary, all available federal, state, and local financing and subsidy programs identified in paragraph (9) of subdivision (a), except where a community has other urgent needs for which alternative funding sources are not available. The program may include strategies that involve local regulation and technical assistance. (Gov. Code, § 65583, subd. (c)(6).)

Policy 2.2 (Retention of Existing Lower-Income Units) and 5.3.3 (Monitor Affordable Housing Projects) should reference State Preservation Notice Law (Gov. Code, § 65863.10, 65863.11, and 65863.13) and state noticing requirements to tenants and affected public entities. The program should also be expanded to include other potential at-risk properties not included in the analysis. HCD will send additional information under separate cover.

D. <u>Quantified Objectives</u>

Establish the number of housing units, by income level, that can be constructed, rehabilitated, and conserved over a five-year time frame. (Gov. Code, § 65583, subd. (b)(1 & 2).)

The element must include quantified objectives to establish an estimate of housing units by income category that can be constructed, rehabilitated, and conserved over the planning period. While the element includes these objectives for construction, it must also include estimates for rehabilitation and not limit conserved units to at-risk properties.

E. Public Participation

Local governments shall make a diligent effort to achieve public participation of all economic segments of the community in the development of the Housing Element, and the element shall describe this effort. (Gov. Code, § 65583, subd.(c)(9).)

While the element includes a summary of public participation including outreach to the community, it must also describe whether translation services were available outside of the Lets Talk Housing sessions.

F. Consistency with General Plan

The Housing Element shall describe the means by which consistency will be achieved with other general plan elements and community goals. (Gov. Code, § 65583, subd. (c)(7).)

While the element discusses how internal consistency will be achieved with other elements of the general plan as part of the housing element update, it should also discuss how internal consistency will be maintained throughout the planning period.

1. EXECUTIVE SUMMARY

San Mateo's 2023-2031 Housing Element is a plan to help address the region's housing crisis, a blueprint for supporting all forms of housing, and a demonstration of the City's commitment to achieving greater housing equity and access for all residents. The Housing Element identifies existing housing conditions and community needs, describes where new

"Home is where one starts from." – T.S. Eliot

housing can be developed, establishes goals, policies and programs, and creates a plan for supporting the production of housing to meet the needs of the City's current and future residents. It includes nine sections as outlined below.

1. Executive Summary

This Executive Summary provides a high-level summary of each section, and its findings and conclusions. The Sites Inventory is in Section 3, the Affirmatively Furthering Fair Housing Assessment is in Section 6 and the Housing Plan, with a complete breakdown of the goals, policies and programs, is included in Section 6. Detailed technical information and documentation to support the Housing Element's findings and conclusions are included in the seven appendices.

2. Introduction and Background

The City of San Mateo is located in San Mateo County, California, on the San Francisco Bay Peninsula and has a population of 105,661 per the 2020 Census. It is approximately 20 miles south of San Francisco and borders Burlingame to the north, Hillsborough to the west, the San Francisco Bay and Foster City to the east and Belmont to the south.

The Housing Element is an integral part of the General Plan, which guides the City of San Mateo's development and policy decisions, and it is the only element that requires certification by the state. California has also established a significant number of new housing related laws to address the state's housing crisis and this section provides an overview of the applicable legislation that the Housing Element is required to comply with and address. The State Department of Housing and Community Development (HCD) is tasked with reviewing housing elements for compliance and adequacy and is responsible for certifying the City's Housing Element.

All new housing units need to have access to adequate infrastructure and municipal services, and in particular, sewage disposal and water capacity must be demonstrated. The City's electrical and natural gas provider is Pacific Gas and Electric (PG&E), and the water service provider is predominantly the California Water Company, except for the portion of San Mateo east of the slough, which is served by the Estero Municipal Improvement District. Recology provides recycling, composting and waste disposal services and sewage disposal services are provided by a Joint Powers Authority led by the City. An assessment of Cal Water's Urban Water Management Plan combined with increased water efficiency and conservation requirements found that there is sufficient water capacity to serve at least 7,015 new housing units by 2031. For sewage disposal, the City is currently building an updated sewage treatment facility which will have the capacity to serve the City into the future, including the new units for this housing cycle.

3. Housing Needs and Sites Inventory

For this upcoming eight-year housing cycle, HCD has identified the nine-county Bay Area region's housing need to be 441,176 units; with this number broken down into four income categories that cover housing types for all income levels, from extremely low-income households to market rate (above moderate income) housing. This Regional Housing Needs Determination (RHND) is based on population projections produced by the California Department of Finance (DOF) as well as adjustments that incorporate the region's existing housing need. The City of San Mateo's Regional Housing Needs Allocation (RHNA) for this cycle is 7,015 new housing units.

A summary of facts about San Mateo's demographic data is provided to establish a basis for the City's housing needs and issues. A full version of the City's demographic report can be found in Appendix A. A key fact identified in this data is that the number of homes in San Mateo increased 3.6% from 2010 to 2020, which is *below* the growth rate for San Mateo County and *below* the growth rate of the region's housing stock during this time period. And, during this time period, home prices increased by 115.6% and rental prices increased by 74.2%. Overall, this demographic data supports the finding that the City does not have sufficient housing units to meet the needs of its residents and that housing affordability is a significant barrier for many middle- and lower-income residents.

An analysis of existing affordable housing units that are at risk of conversion/reversion to market rate, rendering them no longer affordable to the people living in them, identified 65 units in two developments (Bridgepoint Condominiums and Belmont Building) that have expiring affordability covenants. The potential loss of existing affordable housing units is an important issue to the City due to displacement of lower-income tenants and the limited alternative housing available to such persons. Preservation of these units can be achieved in a variety of ways and policies and programs have been included in the Housing Plan to explore options to retain the units as affordable, replace the units elsewhere, or relocate tenants into alternative housing that is affordable to them.

To demonstrate how San Mateo can accommodate its RHNA of 7,015 new housing units, the Housing Element must identify adequate sites for housing (Sites Inventory), including rental housing, factory-built housing, and mobile homes, and make adequate provision for the existing and projected needs of all economic segments of the community. The Sites Inventory is required to include an inventory of land suitable for residential development, including vacant sites and sites having potential for redevelopment, and analyze the development capacity that can realistically be achieved for each site.

The purpose of the Sites Inventory is to evaluate whether there are sufficient sites with appropriate zoning capacity to meet the City's RHNA goal. The Sites Inventory analysis does not include the economic feasibility of specific sites, does not necessarily take into consideration the owner's intended use of the land now or in the future, and does not dictate where residential development will actually occur. Based on previous Housing Elements, it is anticipated that some of the sites on the list will be developed with new housing, some will not, and some housing will be built on sites not listed in the Sites Inventory.

The methodology used to estimate the development potential of each property included on the Sites Inventory was developed based on the criteria established by state law, development/redevelopment feasibility, site constraints, zoned capacity versus real capacity, and prior project history. To ensure a higher likelihood of new developments exceeding the estimates in the Sites Inventory, conservative assumptions were employed. Overall, the Sites Inventory identified sites spread around the City with

capacity to develop up to <u>9,934</u> units, or <u>142</u>% of the City's RHNA. This development capacity exists within the City's current zoned densities and does not require any rezoning to achieve. <u>While many of the sites</u> <u>identified are non-vacant sites</u>, they have a significantly high redevelopment potential as noted through example projects, individual site analysis including developer or owner interest, and other factors such as aging building stock and low utilization rates including underutilized parking lots or strip malls (Appendix <u>C).</u> The following table provides a summary breakdown of the Sites Inventory by income category.

Housing Opportunity Areas	Total Units	Very Low	Low	Moderate	Above Moderate	Pipeline
Bridgepointe	<u>1,105</u>	<u>220</u>	<u>168</u>	<u>162</u>	<u>555</u>	-

San Mateo Sites Inventory Breakdown

This information is included as Table 8 in Section 3.5 of the Housing Element.

4. Other Required Housing Element Components

This section provides a summary and evaluation of housing production constraints, an overview of the funding opportunities and housing resources provided by the City, and the applicable energy conservation and climate change policies and requirements for new housing developments.

The constraints section analyzes potential and actual governmental and non-governmental constraints to the maintenance, improvement, or development of housing that hinder a jurisdiction from meeting its housing goals. Governmental constraints to housing include zoning and development standards, infrastructure requirements, development impact and permitting fees, and the development review and permitting processes. Non-governmental constraints include availability of financing, the price of land, the cost of construction, <u>Measure Y (voter approved growth limits)</u> and the length of time to design and construct new housing.

The city is in the process of implementing measures to reduce development costs, streamline the development review process and amend/simplify the Zoning Code to reduce these constraints. A comprehensive evaluation of all housing impact and permitting fees, with a focus on reducing costs for smaller multi-family projects, will also be completed. Non-governmental constraints are largely determined by market conditions and other factors over which the City has little control. However, the General Plan Update process is facilitating a community conversation around Measure Y, with a goal of building consensus around a path forward to bring forward an updated ballot measure that would allow for the production of more housing, in particular affordable housing, to meet the City's current and future needs.

The Housing Resources of the City are grouped into three categories. The first is the various funding sources that the City is able to leverage for affordable housing production, preservation, and protection;

the second are the existing programs that the City manages and supports to increase the housing supply or otherwise serve past, current, and prospective residents of affordable housing; and the third is the inventory of sites that are adequate for development to meet projected housing needs.

Home energy efficiency has become an increasingly significant factor in housing construction, particularly in the past few years with the increasing demand to build energy efficient and sustainable buildings in California. The California Energy Code and the California Green Building Code in State Title 24 establish uniform energy efficiency and green building standards that all construction must adhere. The City's 2020 Climate Action Plan (CAP) sets standards to reduce greenhouse gas (GHG) emissions for housing and construction by exceeding minimum state requirements, providing education and outreach on benefits and financial incentives associated with energy upgrades, and continuing support for energy efficiency and electrification retrofits.

5. Public Participation

Over the past twelve months, the city has conducted a significant community outreach effort to engage with the community, with over nineteen public and community meetings and workshops, five intercept/pop-up events, four surveys and partnership with 21 Elements. The outreach effort included an emphasis on connecting with community members for whom English was not spoken at home, renters, those under 45 years of age, low-income and very low-income households, people with disabilities, seniors, single female heads of household, people experiencing homelessness, and those from underrepresented neighborhoods.

Key accomplishments of the community outreach efforts included:

- Launch of a <u>Housing Element Update website</u> that included links to past event video recordings, meeting materials, outreach and survey summaries, and information about upcoming meetings and ways to get involved.
- Two mailers one citywide in October 2021 was sent to 27,000 households and a second in January 2022 targeted to renters – inviting community members to participate in community workshops, public meetings, and online surveys. <u>Both mailers included printed information in English and Spanish.</u>
- Three public Housing Element workshops, <u>six</u> presentations/discussions at City Council and Planning Commission public meetings, a focus group discussion with builders, developers and architects, and presentations to many local community-based organizations, including the Chamber of Commerce, Downtown Merchants Association and San Mateo-Foster City School District Parent Teacher Association (SMFCSD PTA).
- Two related Housing Element Surveys conducted by the City between October 11, 2021 and January 16, 2022 received a total of 750 responses. Online responses from community members accounted for 594 responses, with 156 additional responses to a subset of questions collected by staff and the consultant team as intercept surveys during pop-up events in the North Central and Shoreview Neighborhoods, as well as Macedonia food distribution events.

Feedback and insights from tenants, non-English speakers, lower-income residents, property owners and developers helped to highlight new policy opportunities and ways to strengthen and improve existing policies, with the overarching challenge of housing affordability and availability being a reoccurring topic. Themes that were incorporated into the Housing Plan included production of more missing middle

housing, more outreach and education to tenants and landlords, streamlining and simplifying development review and permitting processes, doing more to address fair housing and equity, and ensuring that new housing is sustainable and addresses climate change.

On April 6, 2022, the City published the Draft Housing Element for public review. The 30-day public review period ended on May 6, 2022. During the review period, the City received 20 public comment letters. Comments reflected a broad range of sentiments including support for housing generally and the Draft Housing Element, a desire for the Draft Housing Element to articulate methods to greatly expand the supply of housing and tenant protections, concern about the future of existing very low density neighborhoods, and worry that future growth would strain the City's transportation infrastructure and available water supplies. On April 26 and May 3, 2022, the Planning Commission held public hearings and provided input on the Draft. On May 23, 2022, the City Council held a public hearing to consider the public comments and provide staff with input and direction. On November 7, 2022, the City Council held a study session to discuss HCD's first review letter and considered public comments. Following an update to the Housing Element to address HCD comments, public comments and City Council direction, the updated Housing Element was published for public review on December 30, 2022.

6. Affirmatively Furthering Fair Housing (AFFH) Assessment

This section provides an overview of AFFH requirements; a history of segregation in the region; and an assessment of the San Mateo's AFFH issues.

"Affirmatively furthering fair housing" means taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics. California law, as established by AB 686, requires all public agencies to "administer programs and activities relating to housing and community development in a manner that affirmatively furthers fair housing, and take no action inconsistent with this obligation." The law also required that housing elements include an analysis of fair housing outreach and capacity, integration and segregation, access to opportunity, disparate housing needs, and current fair housing practices.

The United States' oldest cities have a history of mandating segregated living patterns—and Northern California cities are no exception. The Association of Bay Area Governments (ABAG), in its recent Fair Housing Equity Assessment, attributes segregation in the Bay Area to historically discriminatory practices—highlighting redlining and discriminatory mortgage approvals—as well as "structural inequities" in society, and "self-segregation" (i.e., preferences to live near similar people).

A Fair Housing Assessment for all San Mateo County jurisdictions was conducted by 21 Elements, a countywide jurisdictional collaborative. For the City of San Mateo, the Assessment describes fair housing enforcement and outreach capacity, integration and segregation, access to opportunity and disparate housing needs as contributing factors that should be addressed in the city's fair housing action plan. Some primary findings in the Fair Housing Assessment included:

- 16% of fair housing complaints filed in San Mateo County between 2017 to 2021 (57 total) were in the City of San Mateo (9 total), which is approximately aligned with the city share of the county's population (14%).
- Racial and ethnic minority populations are disproportionately impacted by poverty, low

household incomes, overcrowding, and homelessness compared to the non-Hispanic White population in the City of San Mateo. Additionally, racial and ethnic minorities are more likely to live in moderate resources areas and be denied for a home mortgage loan.

- The northeast area of San Mateo is disproportionately impacted by high poverty, low education opportunity, low economic opportunity, low environmental scores, high social vulnerability scores, concentrations of cost burdened households, overcrowding, and moderate resource scores. These areas are generally on either side of Highway 101 and stretch to the San Francisco Bay waterfront, encompassing the North Central and Shoreview neighborhoods.
- The City of San Mateo has a slight concentration of residents with a disability with 9% of the population compared to 8% in the county. Residents living with a disability in the city are more likely to be unemployed and are largely concentrated in areas around Highway 101.
- Racial and ethnic minority students in the City of San Mateo—served by the San Mateo Union High School District and the San Mateo-Foster Elementary School District—experience lower educational outcomes compared to other students.
- Nearly half of all renter households in the City of San Mateo are cost burdened—spending more than 30% of their gross income on housing costs—and one in four are extremely cost burdened—spending more than 50% of their gross income on housing costs.

Contributing factors to these Primary Findings include:

- Higher rates of mortgage denial rates among Hispanic households stems from decades of discrimination in housing markets and challenges building wealth through economic mobility and homeownership.
- The northern portion of the city offers the most affordable homes, and as such, residents living in these areas have lower incomes and higher rates of poverty.
- Hispanic residents are more likely than others to work low wage jobs that do not support the City's or region's housing prices, resulting in higher rates of cost burden and overcrowding.
- Hispanic residents are primarily concentrated in the northeastern area of the city where residents face higher poverty and cost burden as well as poor opportunity outcomes according to TCAC's opportunity maps.
- Concentration of naturally occurring affordable ownership and rental housing opportunities in the northeast areas of the city further concentrates poverty, cost burden, and overcrowding in areas with low economic and environmental outcomes.
- There is a relative lack of affordable housing opportunities in higher resourced areas of the city.
- Highway 101 creates a major barrier between the Shoreview neighborhood and the rest of the City of San Mateo.
- The unemployment rate for the City of San Mateo's residents with a disability is four times that of persons without a disability.
- The undersupply of accessible housing units, particularly for renters, creates a scarcity of units for residents living with a disability.
- There are concentrations of the population living with a disability west of Highway 101 in the North Central neighborhood.
- Residents with disabilities and Hispanic households face increased housing discrimination.

In response to this analysis, as well as community input, an Affirmatively Furthering Fair Housing Action Plan, which details how the City proposes to respond to the factors contributing to the fair housing

challenges identified in this analysis, was developed. The Action Plan is included in Appendix D and the policies and programs to implement the Action Plan are included in the Housing Plan under Goal 5.

7. Housing Plan

The City of San Mateo's primary objective is to maintain and provide a diversity of housing opportunities for current and future residents. There should be a variety of housing types and sizes, a mixture of rental and ownership housing, and housing that supports special needs populations, including seniors, farmworkers, single female heads of household, people with disabilities, and those who are unhoused. This variety of housing opportunities should accommodate a diverse population, leading to a variety of household sizes and types at all income levels.

In addition, the city needs to increase housing supply to meet the housing demand caused by current and future job growth. The types of new housing created should accommodate all income levels consistent with the city's RHNA. The goals, polices, and actions contained in this Housing Plan support these overarching objectives while also ensuring that the city will meet its statutory obligations to affirmatively further fair housing and facilitate housing production at all income levels.

The City has identified five goals to guide the Housing Element's policies and programs. The first three are based upon the "3Ps" framework that seeks to address the region's housing needs through a combination of Production, Preservation and Protection and is endorsed by the Association of Bay Area Governments (ABAG). The fourth goal, or "fourth P," is Promotion of community engagement and public outreach to support social resilience, and the fifth goal is to Affirmatively Further Fair Housing (AFFH).

- <u>Production</u> Facilitate and support the production of new housing at all income levels, but especially affordable housing. <u>Twenty-one</u> policies <u>with thirty-seven implementing actions</u> have been identified to support this goal.
- <u>Preservation</u> Preserve existing housing that is affordable to lower- and middle-income residents. Six policies with ten implementing actions have been identified to support this goal.
- <u>Protection</u> Protect current residents to prevent displacement. Seven policies <u>with sixteen</u> <u>implementing actions</u> have been identified to support this goal.
- <u>Promotion</u> Promote social resilience through public education and community outreach to make information more available and accessible. <u>Five</u> policies with <u>ten implementing actions</u> have been identified to support this goal.
- <u>Affirmatively Further Fair Housing</u> Address the issues of fair housing, equity and access while reinforcing the objective that affirmatively furthering fair housing is both a stand-alone priority and decisively inseparable from achieving the Housing Element's other goals. <u>Fourteen</u> policies <u>with sixteen quantified objectives</u> have been identified to support this goal.

8. Quantified Objectives

In addition to the Sites Inventory and the Housing Plan, the city is required to provide an estimate of actual housing units that can be preserved and produced given available resources, permits issued and projected pipeline projects expected to be completed within the next housing cycle. State law recognizes that the city's total housing needs exceed available resources and the community's ability to satisfy this need within the content of the general plan. The total development cost for the RHNA allocation would <u>exceed</u>

\$4 billion dollars, of which <u>over</u>\$3 billion would be required to develop the lower-income units. Thus, the quantified objectives do not need to completely account for San Mateo's RHNA but <u>do</u> establish the maximum number of housing units that can <u>realistically</u> be constructed, rehabilitated, and conserved in the City over an eight-year timeframe.

For the upcoming housing cycle, the city's quantified objectives for conservation are 719 units, with 323 being affordable units, and the quantified objectives for construction are 5,639 units, with 1,426 being affordable units. The total of quantified objectives for the city are 6,358 units, including 1,749 affordable units. For a full breakdown of units by affordability level and by project or category, see Table 14 - Quantified Objectives for Cycle 6 (2023 - 2031), in this Section.

9. Review of Prior Housing Element

The final section provides a summary of the key accomplishments, challenges, and opportunities learned from the city's previous Housing Element. The city's RHNA for the fifth housing cycle (2015 – 2022) was 3,100 units. The city was able to achieve many its goals through successful implementation of most of its policies and programs but fell short of its affordable housing goals. Key accomplishments include increased accessory dwelling unit (ADU) production, new funding sources, protecting existing affordable housing units, and using new technology to speed up development. Significant progress was also made on the design and entitlement of two affordable housing projects on city-owned properties in Downtown. From 2015 through January 2022, the City has been able to achieve a total of 2,573 new housing units and exceed its market rate housing target; however, this only represents <u>81</u> percent of the city's RHNA. A variety of factors have contributed to this production shortfall, including high land and construction costs¹, outdated policies, and community division regarding growth and building heights. The lessons learned over this past cycle have been used to help inform the Housing Plan in this Housing Element.

¹ It should be noted during Cycle 5, national and global factors contributed to the high cost of construction including: a) The Great Recession which affected the banking industry and residential investments; b) COVID-19 pandemic which contributed to construction worker shortage, and c) 2021-2022 Global Supply Chain Crisis which contributed to construction material cost increases and delays that extended construction schedules locally by a year or more.

2. INTRODUCTION AND BACKGROUND

The Bay Area continues to see growth in both population and jobs, which means more housing of various types and sizes is needed to ensure that residents across all income levels, ages, and abilities have a place to call home. While the number of people drawn to the region over the past 30 years has steadily increased, housing production has not kept pace, contributing to the housing shortage that communities around the Bay Area are experiencing today. In many cities, this has resulted in residents being priced out, increased traffic congestion caused by longer commutes, and fewer people, particularly those in the middle- and lower-income tiers, being able to purchase homes or meet surging rents.

The Housing Element is part of the City's General Plan and sets forth the policies and programs to address the housing needs for San Mateo. It is the City's eight-year housing strategy from the period of 2023-2031 for how it will meet the community's housing needs. State law (Government Code Sections 65580-65589.8) requires that every city and county in California adopt a Housing Element, subject to State approval, as part of its General Plan. Per SB 375 (Statutes of 2008), the planning period for the Housing Element is eight years.

Since 1969, State law requires that jurisdictions throughout California complete a Housing Element. The City itself is not responsible for building or producing this housing, but it must demonstrate that it has policies and programs in place to support housing construction for all income levels, as well as available land appropriately zoned to accommodate new housing. The Housing Element must include a variety of statistics on housing needs, constraints to development, and policies and programs to implement a variety of housing-related land use actions, and a detailed inventory of "opportunity sites" on which future housing may be built.

The Housing Element is the only element of a locality's General Plan that must be approved ("certified") by the State, through its Department of Housing and Community Development (HCD) to ensure it meets all statutory requirements. Having a certified Housing Element is a prerequisite for many State grants and funding programs. This is the sixth cycle of the Housing Element and covers the eight-year period from 2023 to 2031.

2.1 **The** History of San Mateo

One of only two charter cities in San Mateo County, the City of San Mateo was incorporated in 1894 and is governed by a five-member City Council. The city encompasses 15.9 square miles in the San Francisco Bay Area in the center of the Peninsula and is currently home to an estimated 105,661 residents.² Its strategic location at the crossroad of the east-west coastal stagecoach and the north-south railroad drew a number of residents after its incorporation. The land around this settlement was controlled by some of the wealthiest families in the state, who created large suburban estates. San Mateo emerged in the postwar periods as a rapidly expanding and progressive city when the population of the city nearly

² US Census estimate, April 2020. https://www.census.gov/quickfacts/sanmateocitycalifornia

quadrupled between 1940 and 1990.³ Some of the current land use constraints, such as voter approved Measure H, P, and Y in 1991, 2004, and 2020, respectively, which limit heights to 55 feet and density to no more than 50 units per acre in the city were a direct result of this rapid expansion.

Despite the Measure Y growth limitations, San Mateo has seen a significant amount of growth over the past two decades. Recent development activity includes a mix of single-family homes, multi-family dwellings, senior housing, office space, retail areas, hotels, and mixed-use (commercial and residential) projects.

San Mateo has very few remaining vacant sites with development potential (approximately 40 parcels). The areas that are undeveloped are generally protected as open space, parks, and waterways. However, there are many sites that have aging buildings or are under-developed that provide opportunity for new mixed-use and higher-density housing development. Development interest in San Mateo remains high with a variety of projects in the pipeline, including those in the early planning stages.

San Mateo's economy has grown quickly in recent years, in large part due to the strength of Silicon Valley technology companies and the city's strategic geographic location. Current low vacancy rates for retail, office, and industrial space confirm that businesses find San Mateo a desirable location, and new development projects will produce more non-residential space to help meet that demand. Between 2010 and 2019, the number of jobs in San Mateo increased by 33 percent, and there are <u>currently</u> approximately 52,800 people⁴ employed in the city. The "professional and technical services" sector, which includes technology jobs, makes up about 20 percent of local jobs, about the same proportion as in San Francisco and more than in Silicon Valley. Retail, health care, food services, public agencies, are other primary employment sectors in the community.

San Mateo's vibrant Downtown, desirable neighborhoods, diversity of employment options, high quality public services, and recent developments such as Hillsdale/Bay Meadows and Station Park Green, make it an ever-popular place to live and work. Major new development in San Mateo is concentrated primarily near the three Caltrain stations (in the Downtown, Hayward Park and Hillsdale areas), and along El Camino Real. The city's three Caltrain stations, extensive bicycle and pedestrian network, SamTrans bus system, and well-maintained local roadways lead efficiently to destinations in the city, on the Peninsula, and beyond.

The city has many distinct and diverse individual neighborhoods, including two designated historic districts, the Downtown and the Glazenwood Historic Districts. The Downtown area, which maintains a 1930s character, is of particular importance and interest with respect to historic structures. The residential neighborhood of Glazenwood is a unique early 1920's development of Spanish Colonial Revival homes. Other areas of the city contain buildings of exceptional architectural interest and reflect local historical periods.

³ Mitchell P. Postel, *San Mateo – A Centennial History*, "Foreword", 1994, Page ix.

⁴ City of San Mateo, *General Plan Update - Alternatives Evaluation*, 2019.

San Mateo has about 41,250 housing units; roughly half are rental units and half are occupied by homeowners, which are also split almost evenly between single-family and multi-family residences. Older homes are common in San Mateo, with almost 50 percent being 60 years or older. Local housing costs are very high, driven by high demand and a lack of production, which is due to a variety of factors including lack of available land and regulatory limits. The average cost for a single-family home in San Mateo is about \$1.7 million, up more than 80 percent in just five years.⁵ A typical rental unit costs \$2,900 a month, 31 percent higher than five years ago. With the current median annual income of \$166,000, a four-person household in San Mateo could comfortably afford to purchase a home priced at up to \$700,000 – less than half of the realistic cost.⁶ Even with the high housing costs, the city population continues to increase and is anticipated to grow by up to 55,000 people by 2040, based on the preliminary land use map that was selected to be part of the City's 2040 General Plan Update.

2.2 Legislative Context

Since the city's last Housing Element was adopted and certified in 2014, <u>several</u> substantive changes to State housing law and Housing Element requirements <u>have occurred</u>, as <u>summarized below</u>.

Affordable Housing Streamlined Approval Process. Senate Bill 35 (2017), Assembly Bill 168 (2020) and Assembly Bill 831 (2020). SB 35 created a streamlined, ministerial review process for qualifying multifamily, urban infill projects in jurisdictions that have failed to approve housing projects sufficient to meet their State-mandated RHNA. Among other requirements, to qualify for streamlining under SB 35, a project must incorporate one of two threshold levels of affordable housing: (1) 10 percent of the project's units in jurisdictions that have not approved housing projects sufficient to meet their RHNA for above moderate- income housing or have failed to submit an annual progress report as required under state law; or (2) 50 percent of the project's units in jurisdictions that have not approved housing. AB 168 added a requirement to provide a formal notice to each California Native American tribe that is affiliated with the area of the proposed project. The Housing Element must describe the City's processing procedures related to SB 35. This is discussed further in Appendix B.

Additional Housing Element Sites Analysis Requirements. Assembly Bill 879 (2017) and Assembly Bill 1397 (2017). These bills require additional analysis and justification of the sites included in the sites inventory of the city's Housing Element. The Housing Element may only count non-vacant sites included in one previous housing element inventory and vacant sites included in two previous housing elements if the sites are subject to a program that allows affordable housing by right. Additionally, the bills require additional analysis of non-vacant sites and additional analysis of infrastructure capacity, and place size restrictions on all sites.

Affirmatively Furthering Fair Housing. Assembly Bill 686 (2017). AB 686 law ensures that public entities, including local governments, administer their programs relating to housing and urban development in a

⁵ San Mateo County Association of Realtors, 2018

⁶ CoStar; Economic & Planning Systems, Inc., 2018.

manner affirmatively to further the purposes of the federal Fair Housing Act and do not take any action that is materially inconsistent with its obligation to affirmatively further fair housing. It also requires that housing elements of each city and county promote and affirmatively further fair housing opportunities throughout the community for all persons regardless of race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability, and other characteristics protected by the California Fair Employment and Housing Act, Government Code Section 65008, and any other state and federal fair housing and planning law. AB 686 requires jurisdictions to conduct an assessment of fair housing in the housing element, prepare the housing element site inventory through the lens of affirmatively furthering fair housing, and include program(s) to affirmatively further fair housing.

No-Net-Loss Zoning. Senate Bill 166 (2017). SB 166 amended the No-Net-Loss rule to require that the land inventory and site identification programs in the Housing Element include sufficient sites to accommodate the unmet RHNA. When a site identified in the Housing Element as available to accommodate the lower-income portion of the RHNA is actually developed for a higher income group, the city must either (1) identify, and rezone if necessary, an adequate substitute site or (2) demonstrate that the land inventory already contains an adequate substitute site.

AB 1397, Low (Chapter 375, Statutes of 2017). The law made several revisions to the site inventory analysis requirements of Housing Element Law. In particular, it requires stronger justification when nonvacant sites are used to meet housing needs, particularly for lower income housing, requires by right housing when sites are included in more than one housing element, and adds conditions around size of sites, among others.

Safety Element to Address Adaptation and Resiliency. Senate Bill 1035 (2018). SB 1035 requires the General Plan Safety Element to be reviewed and revised to include any new information on fire hazards, flood hazards, and climate adaptation and resiliency strategies with each revision of the housing element.

By Right Transitional and Permanent Supportive Housing. Assembly Bill 2162 (2018) and Assembly Bill 101 (2019). AB 2162 requires the city to change its zoning to provide a "by right" process and expedited review for supportive housing. The bill prohibits the city from applying a conditional use permit or other discretionary review to the approval of 100 percent affordable developments that include a percentage of supportive housing units, either 25 percent or 12 units, whichever is greater. The change in the law applies to sites in zones where multifamily and mixed uses are permitted, including in nonresidential zones permitting multifamily use. Additionally, AB 101 requires that a Low Barrier Navigation Center development be a use by right in mixed-use zones and nonresidential zones permitting multifamily uses if it meets specified requirements.

Accessory Dwelling Units (ADUs). Assembly Bill 2299 (2016), Senate Bill 1069 (2016), Assembly Bill 494 (2017), Senate Bill 229 (2017), Assembly Bill 68 (2019), Assembly Bill 881 (2019), Assembly 587 (2019), Senate Bill 13 (2019), Assembly Bill 670 (2019), Assembly Bill 671 (2019), Assembly Bill 3182 (2020). In recent years, multiple bills have added requirements for local governments related to ADU ordinances. The 2016 and 2017 updates to State law included changes pertaining to the allowed size of ADUs, permitting ADUs by right in at least some areas of a jurisdiction, and limits on parking requirements

related to ADUs. More recent bills reduce the time to review and approve ADU applications to 60 days, remove lot size requirements and replacement parking space requirements and require local jurisdictions to permit junior ADUs. AB 68 allows an ADU and a junior ADU to be built on a single-family lot, if certain conditions are met. The State has also removed owner-occupancy requirements for ADUs, created a tiered fee structure that charges ADUs based on their size and location, prohibits fees on units of less than 750 square feet, and permits ADUs at existing multi-family developments. AB 671 requires the Housing Element to include plans to incentivize and encourage affordable ADU rentals. AB 3182 prohibits homeowner's associations from imposing rental restrictions on ADUs.

Density Bonus and Development Incentives. Assembly Bill 1763 (2019) and Assembly Bill 2345 (2020).

AB 1763 amended California's density bonus law to authorize significant development incentives to encourage 100 percent affordable housing projects, allowing developments with 100 percent affordable housing units to receive an 80 percent density bonus from the otherwise maximum allowable density on the site. If the project is within half a mile of a major transit stop, the city may not apply any density limit to the project, and it can also receive a height increase of up to three additional stories (or 33 feet). In addition to the density bonus, qualifying projects will receive up to four regulatory concessions. Additionally, the city may not impose minimum parking requirements on projects with 100 percent affordable housing units that are dedicated to special needs or supportive housing. AB 2345 created additional density bonus incentives for affordable housing units provided in a housing development project. It also requires that the annual report include information regarding density bonuses that were granted.

Housing Crisis Act of 2019. Senate Bill 330 (2019). SB 330 enacts changes to local development policies, permitting, and processes that will be in effect through January 1, 2025. SB 330 places new criteria on the application requirements and processing times for housing developments; prevents localities from decreasing the housing capacity of any site, such as through downzoning or increasing open space requirements, if such a decrease would preclude the jurisdiction from meeting its RHNA housing targets; prohibits localities from imposing a moratorium or similar restriction or limitation on housing development; prevents localities from establishing non-objective standards; and requires that any proposed demolition of housing units be accompanied by a project that would replace or exceed the total number of units demolished. Additionally, any demolished units that were occupied by lower-income households must be replaced with new units affordable to households with those same income levels. The City's processing procedures related to SB 330 are described further in Appendix B.

Surplus Land Act Amendments. Assembly Bill 1486 and AB 1255 (2019). AB 1486 refines the Surplus Land Act to provide clarity and further enforcement to increase the supply of affordable housing. The <u>law</u> requires the city to include specific information relating to surplus lands in the Housing Element and Housing Element Annual Progress Reports, and to provide a list of sites owned by the city or county that have been sold, leased, or otherwise disposed of in the prior year. AB 1255 requires the city to create a central inventory of surplus and excess public land each year. The city is required to transmit the inventory to HCD and to provide it to the public upon request. As of April 2022, the City of San Mateo has identified three surplus sites, two of which are under negotiations for affordable housing development (4th Avenue and Railroad Avenue known as the Talbot's Site), and one is a city parking lot available for affordable

housing development (located at 308 5th Avenue).

AB 1486, Ting (Chapter 644, Statutes of 2019). The law expanded the definition of surplus land and added additional requirements on the disposal of surplus land. In addition, local agencies must send notices of availability to interested entities on a list maintained by HCD. This list and notices of availability are maintained on HCD's website. Local agencies must also send a description of the notice and subsequent negotiations for the sale of the land, which HCD must review, and within 30 days submit written finding of violations of law. Violations of the Surplus Land Act can be referred to the Attorney General. Finally, it adds a requirement in Housing Element Law for the jurisdiction to identify which of the sites included in the inventory are surplus property.

Housing Impact Fee Data. Assembly Bill 1483 (2019). AB 1483 requires the city to publicly share information about zoning ordinances, development standards, fees, exactions, and affordability requirements. The city is also required to update such information within 30 days of changes. This Housing Element describes governmental constraints on the production of housing, including a look at zoning requirements, development standards, fees, exactions, and affordability requirements. Changes in requirements made during the Housing Element planning period will also be reported as part of the city's annual Housing Element Progress Report.

SB 6, Beall (Chapter 667, Statutes of 2019). Jurisdictions are required to prepare the housing site inventory on forms developed by HCD and send an electronic version with their adopted housing element to HCD. HCD will then send those inventories to the Department of General Services by December 31 of each year.

Housing Opportunity and More Efficiency (HOME) Act. Senate Bill 9, Atkins (Chapter 162, Statutes of 2021). SB 9 requires the City to allow up to two residential dwelling units and residential lot splits in single-family zones. SB 9 allows for reduced standards, such as setbacks, minimum parcel dimensions, and parking. The city must apply objective zoning standards that do not preclude construction of up to two 800 square-feet units. To prevent displacement, the State does not allow SB 9 projects to demolish any affordable or rent controlled housing, or housing that has been occupied by a tenant within the last three years. Projects that meet the qualifying criteria and requirements must be ministerially approved and are not subject to CEQA review. The City adopted a local SB 9 Ordinance as described in Policy H1.11.

Senate Bill 10, Wiener (Chapter 163, Statutes of 2021). SB 10 authorizes cities to adopt an ordinance to zone for up to ten units of residential density on any parcel located within transit rich or urban infill areas. If adopted, the ordinance allows ministerial approval of up to ten units (not counting ADUs or JADUs) at a height specified by the City. The intent of this bill is to streamline production of housing in urban infill neighborhoods with access to transit. SB 10 includes a sunset date of January 1, 2029; the City has identified Policy H1.13 to evaluate sites and "Missing Middle" housing policies consistent with SB 10 by 2024.

2.3 Consistency with the General Plan

As this Housing Element is being developed, the city is also undertaking a larger effort to comprehensively update the General Plan. Section 3.4.6 provides additional information about the General Plan Update. The Housing Element is the only chapter in a general plan with statutorily-prescribed timelines for completion, so it is being prepared on a shorter schedule than the rest of the General Plan Update, which is anticipated to be adopted by the end of 2023. To ensure internal consistency among all General Plan elements, work on both the General Plan Update and the Housing Element Update is being coordinated. Other elements of the General Plan that specifically require updates statutorily triggered by the Housing Element include:

- Flood Hazard and Management (Gov. Code § 65302(d)(3) and (g)(2)(B))
- Fire Hazard (Gov. Code § 65302 and 65302.5) (Safety Element updates)
- Environmental Justice (Gov. Code § 65302(h))
- Climate Adaptation (sustainability throughout the General Plan Update)

All four of these topics will be addressed as part of the General Plan Update. To ensure ongoing consistency among all elements of the General Plan, the City tracks all General Plan amendments as they occur and prepares revisions as needed. This will ensure ongoing consistency throughout the planning period.

2.4 Water/Sewer Capacity

As part of the Housing Element, jurisdictions must provide information regarding water and sewer capacity to accommodate future development. In addition, jurisdictions must include narratives about how they will comply with two specific pieces of legislation, SB 1087 and SB 244.

- **SB 1087 Housing Elements** Requires a city to immediately forward its adopted Housing Element to its water providers so they can grant priority for service allocations to proposed housing developments that include units affordable to lower-income households.
- SB 244 Land Use and General Plans Requires cities and counties, prior to adoption of a housing element, to address the infrastructure needs of disadvantaged unincorporated communities outside the city's limits but within the city's planning area. Because the city's planning area does not contain any unincorporated areas, no such conditions exist.

The cities, water districts and private utilities represented by the Bay Area Water Supply and Conservation Agency (BAWSCA) rely upon the Hetch Hetchy system for water to protect the health, safety and economic well-being of 1.8 million citizens, businesses and community organizations. Together, the BAWSCA agencies account for two-thirds of water consumption from the system and pay for two-thirds of its upkeep.

The regional water system provides water to 2.7 million people in San Francisco, Santa Clara, Alameda

and San Mateo counties. Eighty-five percent of the water comes from Sierra Nevada snowmelt stored in the Hetch Hetchy reservoir situated on the Tuolumne River in Yosemite National Park. Hetch Hetchy water travels 160 miles via gravity from Yosemite to the San Francisco Bay Area. The remaining 15 percent of water comes from runoff in the Alameda and Peninsula watersheds and is captured in reservoirs located in San Mateo and Alameda counties. Overall, this regional system, which consists of over 280 miles of pipelines, over 60 miles of tunnels, 11 reservoirs, five pump stations and two water treatment plants, delivers approximately 260 million gallons of water per day.

The City's water providers are California Water Company (Cal Water) and Estero Municipal Improvement District (EMID). Cal Water's Mid-Peninsula District, which includes the City of San Carlos, serves the majority of San Mateo, and EMID serves the bayside portions of San Mateo east of Seal Slough and the City of Foster City.

The City's wastewater treatment plant, which is currently undergoing upgrades that are expected to be completed in 2024, is jointly owned by the City of San Mateo and the City of Foster City/Estero Municipal Improvement District (EMID). The treatment facility serves more than 130,000 people and businesses in its service area at an average flow of 12 million gallons each day. By effectively treating wastewater at an advanced biological treatment facility, the plant helps keep San Francisco Bay environmentally clean and safe.

Both Cal Water and EMID have adopted Urban Water Management Plans that were developed based on the City's existing zoning densities. Since the City will not need to increase density or rezone any sites to meet its RHNA, combined with increased water efficiency and conservation requirements for new development, there appears to be sufficient water capacity to serve at least 7,015 new housing units by 2031. However, it needs to be noted that the region is experiencing a prolonged drought and there are significant concerns about the ability to maintain water supply into the future if current drought conditions persist. The City will continue to collaborate with the two water providers as part of its General Plan Update to ensure there is an adequate and sustainable water supply for current and future development.

The upgrades to the sewage treatment facility will result in increased capacity to serve San Mateo and Foster City well into the future. Based on this information, it is anticipated that the City has sufficient water service capacity and sewage processing capacity to meet new housing development needs for this housing cycle. The current facilities and/or infrastructure are reported to be in good operating condition. Therefore, it is determined that the City has sufficient capacity to serve the 7,015 housing units stipulated the 2023-2031 Regional Housing Needs Allocation. Policy H1.20 supports this finding and helps to ensure that the City's water and sewer providers promptly receive the adopted Housing Element and prioritize now housing projects for sewer and water connections.

3. HOUSING NEEDS AND SITES INVENTORY

3.1 Housing Needs Summary

The Plan Bay Area 2050 Final Blueprint⁴ forecasts that the nine-county Bay Area will add 1.4 million new households between 2015 and 2050. For the eight-year timeframe covered by this Housing Element, the Department of Housing and Community Development (HCD) has identified the region's housing need as 441,176 units. The total number of housing units assigned by HCD is separated into four income categories that cover housing types for all income levels, from extremely low-income households to market rate housing.

Every year, the US Department of Housing and Urban Development (HUD), in conjunction with the State of California, establish income categories based on the median income in each county. Based on new requirements for the completion of the Housing Element, jurisdictions must now report on the following categories of income:

- Extremely Low Income: 0-30% of Area Median Income, or AMI
- Very Low Income: 30-50% AMI
- Low Income: 50-80% AMI
- Moderate Income: 80-120% AMI
- Above Moderate Income: 120%+ AMI

The following table illustrates the income categories for San Mateo County in 2022. The median income for a family of four is \$166,000.

Number of Persons in Household:		1	2	3	4	5	6	7	8
San Mateo	Acutely Low	\$17,450	\$19,900	\$22,400	\$24,900	\$26,900	\$28,900	\$30,900	\$32,850
County Area	Extremely Low	\$39,150	\$44,750	\$50,350	\$55,900	\$60,400	\$64,850	\$69,350	\$73,800
Median Income:	Very Low Income	\$65,250	\$74,600	\$83,900	\$93,200	\$100,700	\$108,150	\$115,600	\$123,050
\$166,000	Low Income	\$104,400	\$119,300	\$134,200	\$149,100	\$161,050	\$173,000	\$184,900	\$196,850
	Median Income	\$116,200	\$132,800	\$149,400	166,000	\$179,300	\$192,550	\$205,850	\$219,100
	Moderate Income	\$139,450	\$159,350	\$179,300	\$199,200	\$215,150	\$231,050	\$247,000	\$262,950

Table 1: Income Limits for San Mateo County, 2022

Source: State of California Department of Housing and Community Development, May 13, 2022. <u>https://www.hcd.ca.gov/grants-funding/income-limits/state-and-federal-income-limits.shtml</u>

The Regional Housing Needs Determination (RHND) is based on population projections produced by the

California Department of Finance (DOF) as well as adjustments that incorporate the region's existing housing need. The adjustments result from recent legislation requiring HCD to apply additional adjustment factors to the baseline growth projection from the DOF, in order for the regions to get closer to healthy housing markets. To this end, adjustments focus on the region's vacancy rate, level of overcrowding and the share of cost burdened households and seek to bring the region more in line with comparable ones.⁵ These new laws governing the methodology for how HCD calculates the RHND resulted in a significantly higher number of housing units for which the Bay Area must plan compared to previous RHNA cycles.

Almost all jurisdictions in the Bay Area received a larger RHNA this cycle compared to the last cycle, primarily due to changes in state law that led to a considerably higher RHND compared to previous cycles. The allocation that San Mateo received from the Draft RHNA Methodology is broken down by income category as follows:

Income Group	San Mateo Units	San Mateo County Units	Bay Area Units	San Mateo Percent	San Mateo County Percent	Bay Area Percent
Very Low Income (<50% of AMI)	1,777	12,196	114,442	25.3%	25.6%	25.9%
Low Income (50%- 80% of AMI)	1,023	7,023	65,892	14.6%	14.7%	14.9%
Moderate Income (80%-120% of AMI)	1,175	7,937	72,712	16.7%	16.6%	16.5%
Above Moderate Income (>120% of AMI)	3,040	20,531	188,130	43.3%	43.1%	42.6%
Total	7,015	47,687	441,176	100.0%	100.0%	100.0%

Table 2: Final Regional Housing Needs Allocations

Source: Association of Bay Area Governments Final Regional Housing Needs Allocations Plan, adopted on December 16, 2021 and approved by California Housing and Community Development on January 12, 2022.

3.2 Demographics

The following are key facts regarding the City's demographic data and housing needs and issues from the demographic report, which can be found in Appendix A.

- **Population** Generally, the population of the Bay Area continues to grow because of natural growth and because the strong economy draws new residents to the region. The population of San Mateo increased by 11.5% from 2000 to 2020, which is below the growth rate of the Bay Area.
- Age In 2019, San Mateo's youth population under the age of 18 was 21,827 and senior population 65 and older was 16,093. These age groups represent 20.9% and 15.4%, respectively, of San Mateo's population.
- **Race/Ethnicity** In 2020, 40.9% of San Mateo's population was White while 1.9% was African American, 26.2% was Asian, and 25.1% was Latinx. People of color in San Mateo comprise a

proportion below the overall proportion in the Bay Area as a whole.

- Employment San Mateo residents most commonly work in the Financial & Professional Services industry. From January 2010 to January 2021, the unemployment rate in San Mateo decreased by 3.6 percentage points. Since 2010, the number of jobs located in the jurisdiction increased by 16,810 (42.7%). Additionally, the jobs-household ratio in San Mateo has increased from 1.17 in 2002 to 1.45 jobs per household in 2018.
- Number of Homes The number of new homes built in the Bay Area has not kept pace with the demand, resulting in longer commutes, increasing prices, and exacerbating issues of displacement and homelessness. The number of homes in San Mateo increased 3.6% from 2010 to 2020, which is *below* the growth rate for San Mateo County and *below* the growth rate of the region's housing stock during this time period.
- Home Prices A diversity of homes at all income levels creates opportunities for all San Mateo residents to live and thrive in the community.
 - **Ownership** The largest proportion of homes had a value in the range of \$1M-\$1.5M in 2019. Home prices increased by 115.6% from 2010 to 2020.
 - Rental Prices The typical monthly rent for an apartment in San Mateo was \$2,380 in 2019. Rental prices increased by 74.2% from 2009 to 2019. To rent a typical apartment without cost burden, a household would need to make \$95,240 per year.
- Housing Type It is important to have a variety of housing types to meet the needs of a community today and in the future. In 2020, 44.3% of homes in San Mateo were single family detached, 9.9% were single family attached, 6.3% were small multifamily (2-4 units), and 39.4% were medium or large multifamily (5+ units). Between 2010 and 2020, the number of multi-family units increased more than single-family units. Generally, in San Mateo, the share of the housing stock that is detached single family homes is below that of other jurisdictions in the region.
- Cost Burden HUD considers housing to be affordable for a household if the household spends less than 30% of its income on housing costs. A household is considered "cost-burdened" if it spends more than 30% of its monthly income on housing costs, while those who spend more than 50% of their income on housing costs are considered "severely cost-burdened." In San Mateo, 20.8% of households spend 30%-50% of their income on housing, while 16.8% of households are severely cost burden and use the majority of their income for housing.
- Displacement/Gentrification According to research from The University of California, Berkeley, 0.0% of households in San Mateo live in neighborhoods that are susceptible to or experiencing displacement, and 0.0% live in areas at risk of or undergoing gentrification. 63.4% of households in San Mateo live in neighborhoods where low-income households are likely excluded due to prohibitive housing costs. There are various ways to address displacement including ensuring new housing at all income levels is built.
- Neighborhood 56.4% of residents in San Mateo live in neighborhoods identified as "Highest Resource" or "High Resource" areas by State-commissioned research, while 0.0% of residents live in areas identified by this research as "Low Resource" or "High Segregation and Poverty" areas.

These neighborhood designations are based on a range of indicators covering areas such as education, poverty, proximity to jobs and economic opportunities, low pollution levels, and other factors.

• **Special Housing Needs** – Some population groups may have special housing needs that require specific program responses, and these groups may experience barriers to accessing stable housing due to their specific housing circumstances. In San Mateo, 9.1% of residents have a disability of some kind and may require accessible housing. Additionally, 9.0% of San Mateo households are larger households with five or more people, who likely need larger housing units with three bedrooms or more. 9.1% of households are female-headed families, which are often at greater risk of housing insecurity.

3.3 Units at Risk of Conversion to Market Rate

State law requires that each city provide analysis and programs for preserving existing affordable multifamily rental housing units that were developed with public subsidies. Units at risk of conversion are those units in which the restrictions, agreements or contracts to maintain the affordability of the units expire or are otherwise terminated. At expiration, units may revert to market rate, rendering them no longer affordable to the people living in them. Loss of affordability can occur at the termination of bond funding, the expiration of density bonuses, and other similar local programs.

The potential loss of existing affordable housing units is an important issue to the City due to displacement of lower-income tenants and the limited alternative housing for such persons. It is typically less expensive to preserve the affordability of these units than to subsidize construction of new affordable units due to the inflation of land and construction costs which has occurred since the original development of the affordable housing projects.

3.3.1 Preservation and Replacement Options

Based on City records and information from the California Housing Partnership Corporation, a total of 65 units <u>in San Mateo</u> have affordability covenants <u>that will expire</u> during the next ten years (2023-2033):

Bridgepointe Condominiums. This development from 1999 contains the City's first Below Market Rate (BMR) units, 59 in all, of which 24 are very low income (50% AMI) and the remainder (35) are at 120% of AMI, at the top of the moderate-income level. The expiration date for the 59 units is 2027, and the city has included a program (H 2.2) to assist in the preservation of these units. However, the 24 very low-income units are most at risk since rents at 120% of median are closer to market rate.

Belmont Building. Originally financed in 1993, this project involved the conversion of six units to family rentals, serving very low-income households (50% AMI). The affordability of the project was created through loans in two programs. Federal HUD loans were used for the rehabilitation of the building. These loans are set to expire in 2032. The developer of this project was a private entity, but a longtime participant in the Section 8 voucher program.

Preservation of at-risk projects can be achieved in a variety of ways, with adequate funding availability. Alternatively, units that are converted to market rate may be replaced with new assisted multi-family units with specified affordability timeframes.

Rehabilitation Projects. The City funds rehabilitation projects for low-income residents of San Mateo to promote access to suitable living environments within each home. The Minor Home Repair program is funded through the Community Development Block Grant (CDBG) program and serves an annual goal of 10 units through general repairs, 14 units through accessibility modifications, and 7 units through weatherization upgrades. Furthermore, the City provides low-interest loans for rehabilitation projects of up to \$60,000 per home for low-income homeowners through the CALHOME program. During this cycle, 10 rehabilitation loan projects are anticipated to be completed. **Overall, these programs will result in the rehabilitation of a total of 258 affordable housing units.**

3.3.2 Rental Assistance

State, local, or other funding sources can be used to provide rental subsidies to maintain the affordability of at-risk projects. These subsidies can be structured to mirror the Housing Choice Voucher/Section 8 program, whereby the subsidy covers the cost of the unit above what is determined to be affordable for the tenant's household income (including a utility allowance) up to the fair market value of the apartment. Unit sizes for the at-risk properties range from studios to two-bedroom units and are generally reserved for very low-income households. The total annual subsidy to maintain the 30 at-risk units (the 24 from Bridgepointe and the six from Belmont Building) is estimated at about \$600,000.

3.3.3 Transfer of Ownership

If the current organizations managing the units at risk are no longer able to maintain the project, transferring ownership of the affordable units to a nonprofit housing organization is a viable way to preserve affordable housing for the long term. The estimated market value for the 30 affordable units that are potentially at high risk of converting to market rate is nearly \$350,000 per unit, or \$10.5 million total.

3.3.4 Construction of Replacement Units

The construction of new low-income housing can be a means to replace at-risk units, though extremely costly. The cost of developing new housing depends on a variety of factors including density, size of units, construction quality and type, location, land and development costs. Using the Terner Center's research on the cost to develop affordable housing around the Bay Area, the cost to replace the units could be as much as \$700,00 per unit, or \$21 million.

3.3.5 Entities Interested in Participating in California's First Right of Refusal Program

An owner of a multi-family rental housing development with rental restrictions (i.e., is under agreement with federal, State, and local entities to receive subsidies for low-income tenants), may plan to sell their "at risk" property. The California Department of Housing and Community Development (HCD) have listed qualified entities that may be interested in participating in California's First Right of Refusal Program. If an owner decides to terminate a subsidy contract or prepay the mortgage or sell or otherwise dispose of the assisted housing development, or if the owner has an assisted housing development in which there will be the expiration of rental restrictions, the owner must first give notice of the opportunity to offer to purchase to a list of qualified entities provided to the owner.

HCD has identified six entities that may be interested in participating in California's First Right of Refusal Program in San Mateo County:

- ROEM Development Corporation
- Northern California Land Trust, Inc.
- Housing Corporation of America
- Mid-Peninsula Housing Coalition
- Affordable Housing Foundation
- Alta Housing (previously Palo Alto Housing Corp)

Of these entities, some have worked specifically in San Mateo, and others have completed projects in surrounding areas. If a development becomes at risk of conversion to market-rate housing, the city will maintain contact with local organizations and housing providers who may have an interest in acquiring at-risk units and will assist other organizations in applying for funding to acquire at-risk units.

3.3.6 Funding Sources

A critical component to implement any of these preservation options is the availability of adequate funding, which can be difficult to secure. In general, Low-Income Housing Tax Credit funding is not readily available for rehabilitation and preservation, as the grant application process is highly competitive and prioritizes new construction. The City's previous ongoing funding source, Low/Mod Housing Funds available through the Redevelopment Agency, no longer exists due to the dissolution of Redevelopment more than a decade ago. However, affordable housing impact fees are a new, local funding source, and the city may consider developing inclusionary zoning in lieu fees as well. Additional available funding sources that can support affordable housing preservation include sources from the federal and state governments, as well as local and regional funding.

Federal Funding

- HOME Investment Partnerships (HOME) Program
- Project-Based Vouchers (Section 8)
- Section 811 Project Rental Assistance
- Veterans Affairs Supportive Housing (VASH) Vouchers

State Funding

- Affordable Housing and Sustainable Communities (AHSC) Program
- Golden State Acquisition Fund (GSAF)
- Project Homekey
- Housing for a Healthy California (HHC)
- Multifamily Housing Program (MHP)
- National Housing Trust Fund
- Predevelopment Loan Program (PDLP)
- Permanent Location Housing Allocation (PLHA)

Regional, Local, and Nonprofit Funding

- San Mateo County Affordable Housing Fund
- Housing Successor Agency for the Redevelopment Agency
- City Housing Fund
- Commercial Linkage Fee (CLF)
- City General Fund

As noted in the Goals, Policies and Programs, the City will work with the owners of both the Bridgepointe and Belmont Building projects prior to the expiration of their affordability restrictions to develop a plan to retain the units as affordable, replace the units elsewhere, or relocate tenants into alternative housing that is affordable to them.

3.4 RHNA Allocation Summary and Methodology

3.4.1 Legislative Context for the Housing Element's Inventory of Sites

Per State law, the State of California, in conjunction with Association of Bay Area Governments (ABAG), has projected future population figures for the nine Bay Areas counties which translates into the need for additional housing units. Each jurisdiction is then assigned a portion of the regional need based on factors such as growth of population and adjusted by factors including proximity to jobs, and high resource areas that have excellent access to amenities such as good school and employment centers. This assignment is known as the Regional Housing Needs Allocation (RHNA). Each jurisdiction must ensure that there is enough land at appropriate zoning densities to accommodate its RHNA in its Housing Element in four income categories (very low-, low-, moderate- and above moderate-income). The RHNA for City of San Mateo for the Housing Element 2023-2031 is 7,015 units, which are broken down by income category in Table 3.

Table 3: San Mateo RHNA Targets Summary

Income Category	Very Low	Low	Moderate	Above	Total
	50% AMI	80% AMI	120% AMI	Market Rate	
2023-31 Allocation	1,777	1,023	1,175	3,040	7,015

Table Source: Housing Element Cycle 6 RHNA Allocation

A key component of the Housing Element is a projection of a jurisdiction's housing supply. State law requires that the element identify adequate sites for housing, including rental housing, factory-built housing, and mobile homes, and make adequate provision for the existing and projected needs of all economic segments of the community. This sites list is required to include an inventory of land suitable for residential development, including vacant sites and sites having potential for redevelopment, including analysis of the development capacity that can realistically be achieved for each site.

The purpose of the Sites Inventory is to evaluate whether there are sufficient sites with appropriate zoning to meet the RHNA goal. It is based on the City's current land use designations and zoning requirements. The analysis does not include the economic feasibility of specific sites, nor does it take into consideration the owner's intended use of the land now or in the future. It does not dictate where residential development will actually occur, and the decision whether or not to develop any particular site always remains with the owner of the property, not the City. Based on previous Housing Elements, the City

anticipates that some of the sites on the list will be developed with new housing, some will not, and some housing will be built on sites not listed in the inventory. The Sites Inventory is further outlined below, with a breakdown of the units in Table 8. The complete Sites Inventory is included as Appendix C.

A number of new housing laws have significantly changed how a sites inventory is developed, introducing changes to the following components of the site inventory:

- Design and development of the site inventory (SB 6, 2019)
- Requirements in the site inventory table (AB 1397, 2017 AB 1486, 2019)
- Capacity calculation (AB 1397, 2017)
- Infrastructure requirements (AB 1397, 2017)
- Suitability of nonvacant sites (AB 1397, 2017)
- Size of site requirements (AB 1397, 2017)
- Locational requirements of identified sites (AB 686, 2018)
- Sites identified in previous housing elements (AB 1397, 2017)
- Non-vacant site replacement unit requirements (AB 1397, 2017)
- Rezone program requirements (AB 1397, 2017)

These laws are further described in Section 2.2 (Legislative Context) of the Housing Element<u>and were</u> adhered to for development of the Sites Inventory.

3.4.2 Site Inventory Methodology

City staff inventoried vacant and underutilized parcels in San Mateo to determine what land is available for development at various levels of density. Types of sites included:

- Vacant sites zoned for residential use.
- Vacant sites zoned for nonresidential use that allow residential development.
- Residentially zoned sites, including non-residentially zoned sites with a residential overlay, that are capable of being developed at a higher density (non-vacant sites, including underutilized sites).
- Sites owned or leased by a city, county, or city and county.

The number of units that might be able to be developed at various affordability levels was then estimated, e.g., available land zoned at higher densities can be counted toward the very low- and low-income level needs, and land zoned at lower densities are counted toward the moderate and above moderate-income housing need. The analysis was then completed using the actual average residential densities for <u>comparable</u> developments built on land with various zoning designations over the past five years.

The City of San Mateo's Sites Inventory for future housing includes property zoned for multi-family use that is currently vacant as well as land that is underutilized. Sites that are zoned commercial or office but allow residential uses were included. As seen in Table 8 below, the adequate sites analysis demonstrates that there is enough land with sufficient zoning capacity to meet the City's RHNA. The analysis for affordable housing units for extremely low, very low, and low-income households is based on the assumption that land zoned at densities higher than 30 units to the acre can facilitate affordable housing development, given the City's inclusionary requirements of 15%. More than 50% of the City's below market rate housing would be developed on lands that are underutilized. However, the city is experiencing

SAN OF

a high volume of residential and mixed-use development projects looking to revitalize these sites and seeking density bonus and other incentives to achieve higher density residential development. <u>Example projects that demonstrate this trend are included in Attachment C.</u>

3.4.3 Site Inventory Approach

Staff conducted a site-by-site review of all potential development sites, citywide. As <u>is</u> demonstrated below, <u>there are enough sites with sufficient acreage</u> that <u>can meet</u> the RHNA, plus a reasonable buffer, within the existing zoning densities and the growth limits of the voter-approved initiative known as Measure Y.⁷ <u>However, it should be noted that because of the density limit set by Measure Y, additional sites and overall acreage are included in the Sites Inventory to meet the RHNA. It is anticipated that once the land use map in the City's 2040 General Plan Update is adopted, half as many sites currently listed would be needed to achieve the RHNA for this housing cycle.</u>

Development Potential Ranking. Each site – or potential aggregation of sites – was analyzed to discern the likelihood and feasibility of development during the period 2023-2031. Factors such as underperforming or vacant uses, owner or developer interest, age and size of current improvements, site size, and site constraints were reviewed. Depending on these considerations, sites were ranked from 1 to 5, with 1 being a site unlikely to develop/redevelop within the planning period, and 5 being highly likely to develop/redevelop during the period. Samples of these rankings include, but are not limited to:

- National chain gas stations, national chain fast food restaurants, and community-serving grocery stores. The State has indicated these types of sites are the most difficult to justify including in an inventory. <u>Generally, no sites in this category are included in the inventory</u>; however, the city has identified two groups of sites with redevelopment interest that are ranked 4 (<u>sites within</u> Bridgepointe Shopping Center and <u>Bel Mateo's</u> Olympic Plaza <u>shopping area</u>).
- Sites that are extremely small <u>(less than 0.5 acres in size)</u> with little opportunity for aggregation, sites that may require substantial environmental clean-up, and other heavily constrained sites. <u>No sites in this category are included in the inventory.</u>
- Sites with existing uses that could be redeveloped along with adjacent parcels, but which may have multiple owners, small underperforming strip malls, and certain office developments. <u>Many of the City's sites are within this category but follow recent trends of consolidation and development patterns in the City.</u>
- Sites that have uses on them but in which a developer has expressed interest in the site, shopping
 malls with significant potential for redevelopment, adjacent sites with only one or two owners,
 and low-density commercial developments in high-density areas. <u>Many of the City's sites are
 within this category.</u>
- Large sites with potential for substantial development, vacant sites, or sites with proposed or soon to be proposed projects and approved projects that have not yet been built. <u>Majority of the City's</u> <u>sites are in this category and have either proposed or approved projects that have not yet been</u> <u>built.</u>

Zoned versus Realistic Capacity. When establishing realistic unit capacity calculations, the jurisdiction must consider current development trends of existing or approved residential developments at a similar affordability level in that jurisdiction, as well as the cumulative impact of standards such as maximum lot

⁷ Measure Y imposes growth limits on the height, density and intensity of new development that can be built in San Mateo through 2030.

coverage, height, open space, parking, and floor area ratios. The capacity methodology must be adjusted to account for any limitation as a result of availability and accessibility of sufficient water, sewer, and dry utilities. For non-residential zoned sites (mixed-use areas or commercial sites that allow residential development), the capacity methodology must account for the likelihood of residential development on these sites. While a site may be zoned to accommodate, say, 100 units, site constraints or other development standards may preclude development to the full 100 units.

Residential Zones. Since the certification of the last Housing Element, a series of new laws have been implemented that make it easier for developers to use the State density bonus provisions by providing a certain percentage of units in proposed developments as affordable.⁸ As a result, many developers are taking advantage of the additional density offered, which has resulted in significant changes to the realistic capacity for development. The following table illustrates that for last <u>six</u> years, from 2017-2022, a significant number of residential development projects have been proposed and/or approved at densities <u>meeting or exceeding</u> 100% of zoned density <u>(11 of 14 infill projects)</u>. Although the State has specifically stated that cities cannot rely on density bonuses alone to calculate capacity (primarily because use of the density bonus is optional), cities can use up to 100% of zoned density as the realistic capacity as long as the<u>y</u> can demonstrate that as-built densities are consistently above zoned density.

Table 4: 2017 – <u>2022</u> Residential Project Densities

⁸ For more than forty years, California's Density Bonus Law (Government Code Section 65915 et seq.) has been a mechanism to encourage developers to incorporate affordable units within a residential project in exchange for density bonuses and relief from other base development standards through concessions and waivers. The amount of additional density allowed depends on the level of affordability provided

Outlier Development Address	Acres	Units	Max Base Density (DU/A)	Percent of Base Density	Resulting Density (DU/A)
1, 2 and 3 Waters Park Dr.	11.1	190	35	49%	17
Promenade, 220 N. Bayshore Blvd.	2.1	42	50	40%	20
Peninsula Heights, 2988 Campus Dr.	15.5	290	35	53%	19
Outlier Aggregate Units per Acre	28.7	522		47%	18.2

Although the maximum base densities of Multi-family Zones R3, R4 and R5 range from 35 to 50 dwelling units per acre, the average residential <u>density for recently approved</u> projects is 58.3 dwelling units per acre (du/ac) due to projects almost always utilizing State Density Bonus provisions. Therefore, it is appropriate and justifiable to use the maximum density of 50 du/ac as the realistic capacity for <u>many of the</u> new infill housing development <u>sites that have comparable characteristics to these recently approved projects</u>. However, there were three outlier development <u>projects</u> that had much lower densities than the <u>infill</u> housing projects. These developments had specific site and use related restrictions such as being in the flood zone, being located far away from transit, or being used for ownership housing instead of rental housing. These outlier projects had an average density of 18.2 du/ac, which can be used as a density assumption for sites that have similar challenges or site characteristics. Based on this history, the Sites Inventory generally calculates the realistic capacity as follows:

- 100% of base zoned density for infill sites zoned as multi-family residential (R3, R4, R5);
- Calculated at either 50 du/ac or 35 du/ac in accordance with base zoning;
- For sites smaller than 0.5 acre, 50% of base density; and
- For sites with characteristics similar to the outlier projects, density estimated at 18.2 du/ac.

Mixed-Use/Commercial Zones. San Mateo has several office and commercial zones that also allow residential development. As a result, a significant number of projects in the last <u>six</u> years located in commercial or mixed-use zones have included a residential component. The only commercial zone that prohibits residential uses is the C-4 Service Commercial district, which includes uses such as auto repair and light industrial uses and encompasses less than 1% of the total commercial-zoned land within the city. <u>Table 5</u> shows the number of approved projects on sites in commercial and mixed-use zones from 2017-<u>2022</u>.

Although the percentage of residential uses in these projects varied, the average density was <u>49</u> units to the acre <u>(98% of base zoned density)</u>. Since historically <u>80</u>% of the commercially zoned sites included housing, the State guidance is to extrapolate the trend by multiplying the <u>80</u>% probability times the <u>49</u> du/ac average, which results in <u>39</u> du/ac. For those sites that assume mixed-use with residential components in the sites inventory, potential density is assumed more conservatively at 30 to <u>35</u> du/ac. For small sites less than 0.5 acres, it was generally assumed that the realistic capacity would be approximately 50% of zoned capacity, given the physical constraints associated with maximizing use of those sites.

Identification of Sites for Affordable Housing. Sites on the Inventory must also be classified as suitable for various income levels including very low, low, moderate and above moderate. Several housing laws impact how sites are selected for inclusion by income category. In general, sites less than 0.5 acres cannot

be considered as available for lower income development **unless** the jurisdiction demonstrates that it has a track record of affordable developments at this size of lot. For this inventory, no individual site less than 0.5 acres is allocated toward lower income units; however, as per State guidance, such small sites can be considered either for moderate income, above moderate income, or both.

Sites larger than 10 acres are generally considered unavailable for affordable housing, unless the Housing Element can demonstrate a track record for developing such sites of this size, or the city can demonstrate it is otherwise feasible to develop affordable housing. The City has a demonstrated track record of large site development, typically completed in phases, that includes affordable residential development. Station Park Green (12 acres), Concar Passage (14.5 acres), and Bay Meadows (175 acres) are examples of approved large development projects that include substantial numbers of affordable units.

In this inventory, there are only <u>three</u> sites larger than 10 acres. <u>This includes Concar Passage</u>, <u>Hillsdale</u> <u>Mall</u>, and <u>Bridgepointe</u> Shopping Center. Concar Passage (14.53 acre) is an approved mixed-use development proposing commercial, retail and residential uses. The project provides 961 residential units, including 73 units that are affordable for lower income families (80% AMI). Additional information on Concar Passage can be found in Appendix C. The following discussion will focus on the Hillsdale and Bridgepointe shopping centers as feasible sites for affordable housing.

Hillsdale Mall.

Originally built in the 1940's, the Hillsdale Shopping <u>Center</u> is approximately 47 acres in total, of which about <u>33</u> acres are included in the inventory. The property owner, the Bohannon Organization, has expressed interest in redeveloping a significant portion of the site to address what it calls "a changing retail landscape." In a recent article in the Daily Journal, David Bohannon (President) stated that his organization is interested in bringing more vibrancy to the place, with additional office and housing on site. In 2019, more than 4,000 people provided input on what should happen with the Hillsdale Mall on the https://reimaginehillsdale.com/ website, and 54.2% stated that providing new housing, including affordable workforce housing, was very important to respondents. Based on the express interest in providing <u>a mixed-use development with</u> housing for the site, the inventory shows a distribution of affordable units based on the RHNA calculations at <u>42</u> units per acre. It should also be noted that the preliminary land use map in the General Plan Update has identified this site for Mixed-Use Medium (up to 100 units/acres) and Mixed-Use High (up to 200 units/acre) land use designations. To support this effort and ensure sufficient development capacity through 2040, the City has a program to adopt the General Plan Update in 2023/2024 (Housing Policy H1.21).

Within the Housing Element planning period, it is anticipated that the property owner will submit a planning application for a Master Plan to redevelop a large portion of the property. This is based upon the property owner's letter of interest⁹, as well as the owner's ongoing commitment (since 2019) to gather input from the community through a robust outreach and engagement strategy which includes an interactive learning, ideation, and sharing space called the "Idea Store" within the center, a 25-question in-store and online survey, public presentations, dialogue sessions, website and social media. Given the

⁹ "Hillsdale Shopping Center—Preferred Land Use Scenario," David Bohannan, updated April 15, 2022, https://strivesanmateo.org/wp-content/uploads/2022/04/2022 04 15 Bohannon-Organization Redacted.pdf

changing retail climate, it is anticipated that some of the existing commercial uses in the center may choose to relocate elsewhere while others may choose to find a new space within the new development. While the site has a zoned capacity of 50 units per acre (approx. 2,000 units), to account for a mixed-use redevelopment of the site, a portion being maintained as a retail shopping center and per the owner's assessment of what could be developed on the site, a realistic capacity of 1,200 units (35 units per acre) has been estimated for this site. A detailed narrative of the Hillsdale sites is provided in Appendix C.

Bridgepointe. The inventory also includes <u>sites within</u> Bridgepointe, an underutilized commercial shopping center, with significant amounts of surface parking, with the largest parcel at about 12 acres. There have been a variety of discussions with the shopping center's <u>ownership representatives</u> who have expressed interest in mixed-use redevelopment that includes both housing and commercial. By assuming mixed-use development on these parcels, <u>primarily on the areas occupied by surface parking</u>, the City is calculating the realistic capacity at <u>30</u> units per acre. The General Plan Update is exploring policies to create an updated Bridgepointe Area Plan that would guide redevelopment of the shopping center into a mixed-use neighborhood that supports a variety of housing types, including affordable housing. The draft land use plan designates Bridgepointe as Mixed-Use High, which could allow up to 200 units per acre. A detailed narrative of the Bridgepointe sites is provided in Appendix C.

The new requirements for Affirmatively Further Fair Housing (AFFH), pursuant to AB 686, dictate that the city avoid, to the extent possible, the location of potential affordable housing in the inventory in a manner that would exacerbate existing concentrations of poverty, as well as contribute to increasing the number of lower-income households in lower-income neighborhoods. The city must also consider locating housing away from environmental constraints such as sea level rise <u>or high fire hazard severity zones</u>, and near areas of higher or highest opportunities, including quality schools, parks, and educational opportunities. The State indicates that jurisdictions consider the following factors when determining the best locations for affordable housing.

- Proximity to transit.
- Access to high performing schools and jobs.
- Access to amenities, such as parks and services.
- Access to health care facilities and grocery stores.
- Locational scoring criteria for Low-income Housing Tax Credit (TCAC) Program funding.
- Proximity to available infrastructure and utilities.
- Sites that do not require environmental mitigation.
- Presence of development streamlining processes, environmental exemptions, and other development incentives.

One measurement tool to evaluate neighborhood amenities and resources is the Tax Credit Allocation Committee (TCAC) Opportunity Area Map. Each site in the inventory list is rated as either Low, Moderate, High or Highest Resource area utilizing the mapping tool (there are no "Low" resource areas in San Mateo). The Sites Inventory, which includes properties citywide, many of which are in high resource areas, appears to comply with these requirements as currently understood. Overall, the sites identified as suitable for lower income housing in San Mateo are located in moderate or high resource areas. The inventory

currently does not project <u>any new</u> affordable housing to be developed in the Shoreview, North Central, and similar areas, which include higher concentration of lower-income households than other areas of the city. Information about <u>all of</u> the AFFH requirements <u>and how they have been addressed in</u> the Sites Inventory is included in Appendix D. <u>A map that shows the HCD/TCAC Opportunity Map overlaid with the Sites Inventory housing sites is provided as Figure 1.</u>

Distribution of Units by Affordability. Consistent with State guidance, individual sites less than 0.5 acres were assumed to be developed with moderate- and above-moderate income, split 50% to each. For sites larger than 0.5 acres, the distribution of units by income category fell into two types:

- For sites in the pipeline, the actual proposed distribution of units by affordability was included. For example, Concar Passage (Planning Application PA-2018-052) includes a total of 961 units, of which 73 will be very low-income. These are the figures used in the spreadsheet.
- 2. For all other sites, the distribution of units by affordability is in the same proportion as the RHNA allocation.

The State recommends using the proportion of units in the RHNA allocation as a guide for allocating units among sites. This mathematical process is intended to demonstrate that there are enough sites zoned at appropriate densities to accommodate all of the RHNA allocation, rather than an assumption about the specific location and number of affordable units that will actually be built. In part, this is because the city does not determine specific sites for affordable housing, but rather reviews and evaluates projects as they are proposed by <u>property owners</u>, developers and other outside entities.

CITY OF SAN MATEO 2040 GENERAL PLAN HOUSING ELEMENT

Figure 1: 2021 TCAC/HCD Opportunity Map

Source: California Tax Credit Allocation Committee, 2021; City of San Mateo, 2022.

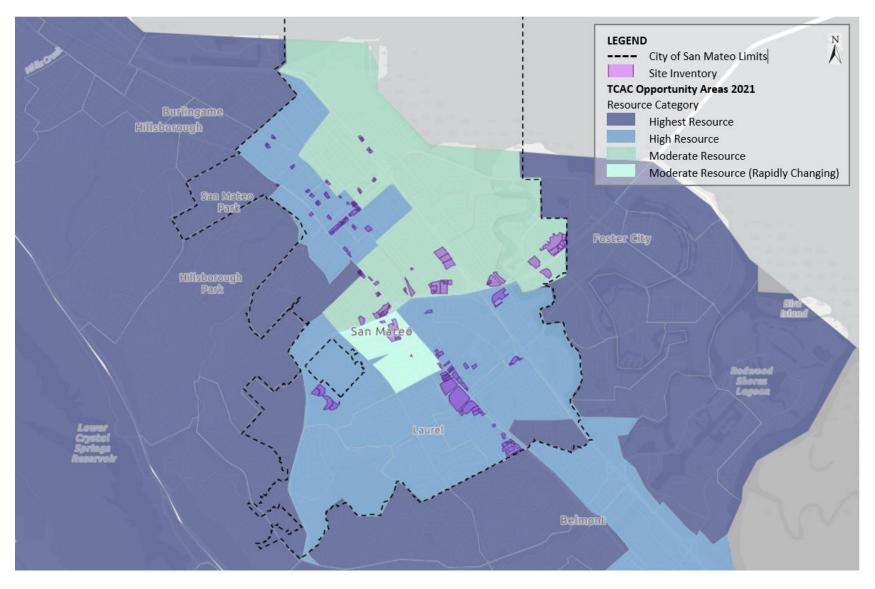

Table 6: Example RHNA Income Distribution

RHNA Allocation Income Distribution								
Very Low Income Low Income Moderate Income Above Moderate Income Total								
26%	15%	17%	43%	100%				

Thus, for a 1-acre site at 50 du/ac, the distribution would be as follows:

RHNA Allocation Income Distribution									
Very Low Income Low Income Moderate Income Above Moderate Income Total									
13 7 8 21 50									

In addition, because of new rules in the Housing Accountability Act's "No Net Loss" provisions (SB 166 of 2017), the land inventory and site identification programs in the Housing Element must always include sufficient sites to accommodate the unmet RHNA, in terms of the number of housing units, as well as the level of affordability. When a site identified in the Element as available for the development of housing to accommodate the lower-income portion of the RHNA is developed at a higher income level, the locality must either (1) identify and rezone, if necessary, an adequate substitute site, or (2) demonstrate that the land inventory already contains an adequate substitute site. By distributing units to sites according to the distribution of the RHNA allocation – including above moderate income – it will be easier to ensure ongoing compliance with the No Net Loss provisions.

3.4.4 Pipeline Projects

In addition to the sites potentially available for development or redevelopment, projects that have been approved, permitted, or received a certificate of occupancy since the beginning of the RHNA period may be credited toward meeting the RHNA allocation based on the affordability and unit count of the development. For these projects, affordability is based on the actual or projected sale prices, rent levels, or other mechanisms establishing affordability in the planning period of the units within the project. These sites are included in the Sites Inventory (Appendix C), as each <u>project is anticipated to</u> receive its Certificate of Occupancy during this housing cycle (after June 30, 2022). New development currently in the pipeline includes approximately 640 new housing units under construction, 1,580 new housing units approved and 680 new housing units under review. The total number of pipeline project units is 2,915, which accounts for 42% of the City's total RHNA.

3.4.5 Accessory Dwelling Units

Accessory dwelling units (ADUs) are a housing type that can meet the needs of middle- and lower-income individuals and households. Based on increased documentation and State guidance, jurisdictions are allowed to count projected development of ADUs based on prior year production averages. As outlined in Table 7, the City has issued an <u>annual</u> average of <u>57</u> building permits for ADUs, <u>including JADUs</u>, over the last four years (2019-2022). Consistent with th<u>e accepted approach using a</u> four-year average of <u>permitting data</u>, the Sites Inventory includes a projection of <u>55</u> new ADUs annually, **resulting in <u>440</u> new ADUs over the eight-year cycle.** It should be noted that in both 2021 and 2022, ADU permits issued by the City significantly exceed the annual estimate of <u>55</u>.

Table 7: ADU/JADU Annual Permit Data

2019	2020	2021	2022≛	4-Year Ave.
------	------	------	-------	-------------

Applications Submitted	56	94	94	<u>80</u>	<u>81</u>
Permits Issued	44	47	66	<u>70</u>	<u>57</u>

A study conducted by the Association of Bay Area Governments (ABAG) in September 2021 found that ADUs are rented at a variety of rates and often meet lower income affordability requirements based on the incomes of the occupants and/or their rental rates. Based on these findings, local jurisdictions are justified in using certain percentages to meet their affordable housing allocations. The study's recommended affordability breakdown that a Bay Area jurisdiction can use for ADUs, which is noted as being conservative, is 30% very low, 30% low, 30% moderate and 10% above moderate. The report also notes that if a jurisdiction has fair housing concerns, they may want to use even more conservative assumptions and go with 5% very low, 30% low, 50% moderate and 15% above moderate. This affordability mix is consistent with the data in its study of market rate Peninsula ADUs, which specified 6% very low, 31% low, 48% moderate, and 15% above moderate. Thus, it should be noted that the City is using the very conservative assumption of 5/30/50/15 to estimate the ADU affordability mix in the Sites Inventory.

3.4.6 San Mateo General Plan Update

The City's General Plan Update (GPU) kicked off in Fall 2018 with a series of visioning workshops and community meetings. From April 2019 through November 2022, the City identified study areas where growth and change would occur, to create a range of growth alternatives, and receive feedback and direction on the preferred land use

and circulation scenarios from the community and, ultimately, the City Council. In April 2022, the preferred land use and circulation scenarios were selected by the City Council, and in July 2022, the draft land use map that would go into the GPU was confirmed by the City Council.

The draft land use map in the GPU's Land Use Element includes significant changes to the allowable heights and densities within the ten Study Areas, with densities increasing from 35-50 units per acre to 100-200 units per acre. The increased density in the draft land use map will allow for up to 21,900 new housing units to be developed over the next 20 years. Adoption of the GPU will also significantly increase the housing capacity of the housing sites identified on the Sites Inventory since over 90 percent of these sites are within a Study Area and will have an updated land use designation with increased base density. Figure 2 illustrates how the Sites Inventory sites overlay with the 10 General Plan Update Study Areas.

As part of the GPU process, a community conversation about Measure Y, the voter approved initiative that sets growth and density limits until 2030, is being facilitated in order to build consensus around a path forward that allows for the housing growth that is needed over the next 20 years while balancing community concerns about growth and change. The draft land use map in the GPU includes building heights and densities that exceed the limits set by Measure Y, so over the next year, the community discussion around Measure Y and the GPU will continue. Ultimately, all elements of the GPU that exceed the growth limits set by Measure Y will require voter approval before they can take effect. Community input, and ultimately City Council direction, will guide how to best address the elements of the GPU that

go beyond the Measure Y height and density limits. Next steps in this discussion include a study session with the City Council in Spring 2023 and community outreach in Spring and Summer 2023. Ultimately, as part of the City Council's adoption of the GPU, an initiative that updates and/or modifies Measure Y could be placed on the ballot in 2024. Policy H1.21 has been added to support this community discussion and highlight the non-governmental constraint on housing production posed by Measure Y.

Publication of the Draft General Plan and the Draft Environmental Impact Report (EIR) is planned for Spring 2023, with a target for adoption by the end of 2023. More information about the General Plan Update can be found at www.StriveSanMateo.org.

3.4.7 City Properties and Funding

The City of San Mateo is committed to supporting the development of affordable housing by utilizing City owned properties and funding to help achieve this goal. Two significant 100% affordable housing projects are currently underway on City owned parcels (formerly public parking lots).

480 E. 4th Avenue (Kiku Crossing)

This project will provide 225 affordable homes for families and individuals in San Mateo, including 22 units for formerly homeless households and 8 units for individuals with intellectual and developmental disabilities, and 57 units for public employees. The affordability of the units will be a mix of ELI, VLI and LI. Construction started in January 2022 and is expected to complete in spring 2024. It is being

built on City owned property and funded by a combination of City, State, and Federal dollars.

445 S. B Street (Bespoke)

This project is a public-private partnership that will redevelop a full City block that includes a City owned property and a City-monetary contribution. The project will provide 60 affordable apartment units (at ELI, VLI and LI levels), community facilities, and commercial and office space. The project is currently under review, with a target for approval in 2023/2024 and construction starting in 2025/2026.

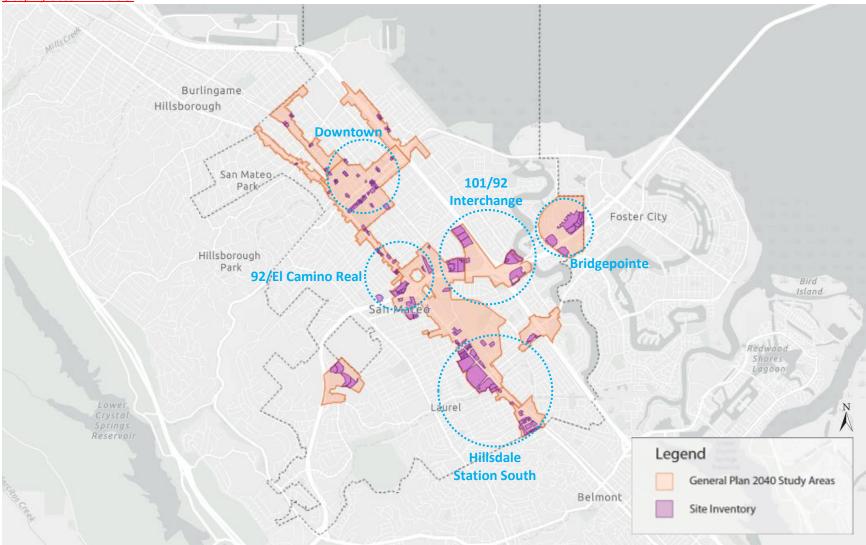

To support the ongoing development of new affordable housing in San Mateo, the City established a dedicated funding source in 2016 with the adoption of an Affordable Housing Commercial Linkage Fee (SMMC Chapter 23.61). In addition, the City has a policy to set aside 20% of the general fund property tax revenues from former Redevelopment Area (RDA) sites for its Housing Fund. Based on these two funding sources, as well as the Permanent Local Housing Allocation (PLHA), Below Market Rate (BMR) fractional and in-lieu fees, and other miscellaneous housing funds, the City's Affordable Housing Fund currently has approximately \$5.8M, and is estimated to generate approximately \$26M over the next eight years. Using the estimate of 100k per affordable unit, the City estimates that it may be able to create 260 new affordable units throughout the 6th Housing Element Cycle. The Housing Fund was used to support both the Kiku Crossing and Bespoke affordable projects and the City continues to actively look for other partnership opportunities to construct additional affordable housing in San Mateo in the coming years (Policy H1.2). In total, the City has contributed property and funding to support the development of **283 affordable housing units** and maintains a Housing Fund with dedicated revenue that has a target of constructing an additional **260 affordable housing units**, for a total of **543 new affordable housing units** during this cycle.

Figure 2: Sites Inventory Map

Universe: Sites Inventory, December 2022.

Notes: The individual sites identified as suitable for housing redevelopment are marked in pink while blue circles indicate groupings of sites. Site affordability breakdown by grouping is seen in Table 8.

3.4.8 Missing Middle Housing

Missing middle housing and constraints to the development of such housing has been identified as a key programmatic priority for the City. Missing Middle housing describes small to medium-scale development such as duplexes, triplexes, and 4-10 unit projects that are compatible in scale with single-family homes within walkable neighborhoods. To address this need and existing zoning constraints in the City that limit production of this type of housing, multiple policies and programs are included in the Housing Element that would directly or indirectly support the production of such housing. Specifically, programs and implementation measures under the following policies are focused on reducing development standard constraints, reducing costs, expanding opportunities and streamlining the development review process for missing middle housing projects. The City is committed to expanding opportunities for Missing Middle housing and has included six policies that support this objective.

- Policy H1.4 Incentivize Accessory Dwelling Unit Development
- Policy H1.6 Streamline Housing Application Review
- Policy H1.7 Update Zoning Code Development Standards
- Policy H1.8 Adopt Objective Design Standards
- Policy H1.13 Encourage Development of Missing Middle Housing
- Policy H1.18 Permitting and Development Fee Review

3.4.9 Single Room Occupancies (SRO) Housing

Single Room Occupancy (SRO) units are a type of housing alternative that is typically available to residents with low or minimal incomes. SROs are single-room (zero bedroom) units that are typically intended for occupancy by a single resident who shares a kitchen and bathrooms with other residents in a multi-tenant building. Government Code 65583(c)(1) requires local jurisdictions to specify the areas where SROs are permitted. Currently SROs are not identified as a separate allowed use in the City's Municipal Code. However, given the nature of the use, they would be considered similar to multiple-family dwellings and would be allowed as a special use in several zoning districts that allow multi-family developments including R3, R4 and R5. The Housing Element includes a new program in Policy H-1.7 to amend the Zoning Code to reduce or eliminate constraints to housing construction including the identification of the R3, R4 and R5 districts where SROs will be permitted consistent with state law.

3.5 Sites Inventory

Based on the methodology and approach outlined above, the Sites Inventory includes a range of sites located citywide that could be developed with up to <u>9,934</u> new housing units. Table 8 provides a high-level summary of the sites listed on the Sites Inventory broken down by income. Figure 1 shows a map of where each site is located within the city and the housing opportunity areas.

Housing Opportunity Areas	Total Units	Very Low	Low	Moderate	Above Moderate	Pipeline
Bridgepointe	<u>1,105</u>	<u>220</u>	<u>168</u>	<u>162</u>	<u>555</u>	<u> </u>
Hillsdale Station South	<u>2,593</u>	<u>627</u>	<u>379</u>	<u>407</u>	<u>1,180</u>	<u>18</u>
101/92 Interchange	<u>2,452</u>	<u>455</u>	<u>221</u>	<u>248</u>	<u>1,528</u>	<u>961</u>
Other Sites	<u>3,784</u>	<u>570</u>	<u>473</u>	<u>500</u>	<u>2,021</u>	1, <u>936</u>
ADUs	<u>440</u>	<u>22</u>	<u>132</u>	<u>220</u>	<u>66</u>	

Table 8: Sites Inventory Affordability Breakdown

Totals	<u>9,934</u>	<u>1,894</u>	<u>1,373</u>	<u>1,317</u>	<u>5,350</u>	<u>2,915</u>
RHNA	7,015	1,777	1,023	1,175	3,040	
Buffer	<u>2,919</u>	<u>17</u> 7	<u>350</u>	<u>142</u>	2, <u>310</u>	
	(4 <u>2</u> %)	(<u>7</u> %)	(<u>3</u> 4%)	(<u>1</u> 2%)	(7 <u>6</u> %)	

Table Source: Housing Resources Sites Inventory

The Sites Inventory was developed to meet all applicable statutory requirements and provide a realistic and achievable roadmap for the city to meet and potentially exceed its RHNA. The Sites Inventory is summarized as follows:

- The housing sites are spread throughout the city, with a significant number located in high resource areas, to meet AFFH requirements.
- The housing projections utilize existing land use and zoning densities, and no rezoning is necessary.
- <u>The housing sites capacity estimates utilize</u> conservative production and density assumptions.
- <u>A</u> significant number of <u>housing units are already in the</u> pipeline <u>and</u> are anticipated to be completed <u>during</u> this housing cycle.
 - 640+ housing units are currently under construction;
 - 1,580+ housing units are approved or entitled; and
 - <u>680+ housing units are under review as active projects.</u>
- The housing projections do not have any reliance on new units developed under SB 9 and a low reliance on new ADU production.
- In accordance with AB 725, the inventory identifies more than 25 percent of the moderate and above moderate RHNA units on sites that allow at least four units of housing; and all sites are zoned at least R-3 (multi-family) or equivalent, which allow five or more units by right.
- For sites with existing residential units that are anticipated to be demolished for new housing development, the City will require replacement housing units subject to the requirements of Government Code Section 65915(c)(3), for units that are restricted or have been occupied by a lower income household in the past five years. The City will also conduct a study to create a permanent replacement housing program (Policy H-2.6).

In addition, <u>as discussed above</u>, the City's General Plan Update process is currently underway, with a target for adoption at the end of 2023. <u>Over 90%</u> of the <u>sites</u> listed in the Sites Inventory are located within one of the ten General Plan Land Use Study Areas that are <u>targeted</u> for increased density. Adoption of the updated General Plan <u>and the updated land use map will</u> increase <u>the base</u> density on <u>most</u> of the housing sites, further increase <u>housing</u> capacity <u>throughout the City</u> and <u>significantly increase</u> the City's RHNA buffer<u>for this and future housing cycles</u>.

The analytical process that went into creating the Sites Inventory and the justification for commercial site redevelopment are fully detailed in the Sites Inventory Approach and Methodology sections above <u>as well</u> <u>as in the Sites Inventory section of Appendix C, Housing Resources</u>. The full list of sites adequate for housing development identified by the city is included in Appendix C.

4.1 Constraints Analysis Summary

The purpose of the constraints analysis section, per Government Code Section 65583(a)(5-6), is to identify and analyze potential and actual governmental and non-governmental constraints to the maintenance, improvement, or development of housing that hinder a jurisdiction from meeting its share of the regional housing needs. A summary of governmental and non-governmental constraints is provided below, and a more detailed analysis is contained in Appendix B.

4.1.1 Governmental Constraints

State law (California Government Code, Section 65583(a)(5)) requires Housing Elements to contain an analysis of governmental policies and regulations that can result in both positive and negative effects on the availability and affordability of housing. Potential constraints to housing include zoning regulations, development standards, infrastructure requirements, permit and development impact fees, and the development approval processes. While government policies and regulations are intended to serve public objectives and further the public good, the City recognizes that its actions can potentially constrain the availability and affordability of housing to meet the community's future needs. The City has implemented several measures to reduce development costs and streamline the approval process and has identified additional opportunities for streamlining the City's review process. The City has identified outdated zoning code regulations and development standards in several areas that may pose as a barrier to housing development and have included Housing Element implementation programs to review zoning code requirements and amend as necessary to remove these barriers (Policies H1.6 and H1.7). This includes evaluating development standards for parking, lot coverage, floor area ratio and existing limits on building heights. The City is also in the process of preparing and adopting Objective Design Standards (ODS) for multi-family projects (Policy H1.8). To address permitting and development impact fees, an implementation program has been included to evaluate the City's cumulative permit fee costs for new housing developments, with the goal of reducing overall costs and a particular focus on reducing per unit costs for small multi-family or "Missing Middle" projects (Policy H1.18). Further information and analysis are provided in Appendix B.

4.1.2 Non-Governmental Constraints

State law (California Government Code, Section 65583(a)(6)) requires Housing Elements to contain an analysis of non-governmental constraints to the maintenance, improvement, or development of housing for all income levels, including the availability of financing, the price of land, the cost of construction, and the length of time between receiving entitlement approval for a housing development and submittal of an application for building permits for that development. Potential non-governmental constraints are largely determined by market conditions or other factors, over which local jurisdictions have little control. However, local governments can influence market conditions and their associated costs indirectly.

Aside from the high costs of land and construction in the Bay Area, the most significant Non-Governmental <u>Constraint that affects housing production in San Mateo is the voter-approved ballot initiative Measure</u> Y, which restricts density, heights, and intensity of <u>new</u> development. <u>Under Measure Y, building height</u> is limited to 55 feet (up to 75 feet in specific areas) and residential density is limited to 50 dwelling units per acre. Measure Y was approved in November 2020 and sunsets in 2030. The City's original growth control ballot initiative (Measure H) was approved by the voters in 1990, followed by the adoption of Measure P in 2004, and then Measure Y in 2020.

Additional discussion about how the City plans to address the constraints created by Measure Y is provided in Section 3.4.6 (General Plan Update) and accounted for in Policy H1.21. Further information and analysis about Measure Y and other non-governmental constraints are provided in Appendix B.

4.2 Housing Resources Summary

The Housing Resources of the City of San Mateo can be summarized into three sections. The first is the various funding sources the City is able to pool together for affordable housing production, preservation, and protection. The second is a list of the existing programs the City manages and supports to increase the housing supply or otherwise serve past, current, and prospective residents of affordable housing. The third is an inventory of sites that are adequate for projected housing needs. A full description of each funding source and housing program are included in Appendix C - Housing Resources, including detailed inventory.

4.2.1 Funding Opportunities

Activities that housing funding may be used for includes but is not limited to the following: predevelopment, acquisition, construction, rehabilitation, conversion and preservation. Also included is funding that is used for housing related activities, which provide service to the residents of low-income housing. A list of the most relevant funding sources is as follows:

Federal Programs

- Community Development Block Grant (CDBG)
- HOME Investment Partnerships Program (HOME)
- Low Income Housing Tax Credits (LIHTC)
- Section 8 Rental Assistance Program
- Other Federal Sources (Section 811 Project Rental Assistance, Veterans Affairs Supportive Housing (VASH) Vouchers)

State Programs

- Permanent Local Housing Allocation (PLHA)
- Other State Sources (CALHome, CalHFA, Infill Infrastructure Grant (IIG), Local Housing Trust Fund (LHTF), Affordable Housing and Sustainable Communities (AHSC) Program, Golden State Acquisition Fund (GSAF), Project Homekey, Housing for a Healthy California (HHC), Multifamily Housing Program (MHP), Predevelopment Loan Program (PDLP))

Other Public Funds

- Housing Successor Agency for the Redevelopment Agency
- Below Market Rate Program (BMR)
- City Housing Fund
- San Mateo County Affordable Housing Fund

Private For-Profit and Nonprofit Sources

- Community Reinvestment Act (CRA)
- Private Developers
- Non-Profit Agencies
- Housing Endowment and Regional Trust (HEART)

4.2.2 Existing Housing Programs

The city manages and supports several programs that aim to either increase the housing supply, improve existing housing, or serve residents of San Mateo within the scope of housing or homelessness. While many of these programs are a direct effort of the City, some are part of a regional collaboration across San Mateo County, of which the City is an active participant. A list of these programs are as follows:

- Minor Home Repair
- Home Rehabilitation
- Lead-Based Paint Hazard Reduction
- First Time Home Buyers Program
- Acquisition of Land
- Acquisition and Rehabilitation of Existing Housing
- Community Housing Development Organizations (CHDO)
- New Construction
- Accessory Dwelling Units
- Special Needs Housing Operation Subsidies
- Homeless Programs
- Regional Collaborations
- Chronic Homelessness
- Homeless Prevention
- Discharge Policy

4.3 Climate Change and Energy Conservation

Home energy efficiency has become an increasingly significant factor in housing construction, particularly in the past few years with the increasing demand to build energy efficient and sustainable buildings in California. Energy costs related to housing include not only the energy required for home heating, cooling and the operation of appliances, but the energy required for transportation to and from home.

State Title 24 Part 6 is the California Energy Code, first enacted in the 1980s, permits builders of new residential units to achieve compliance either by calculating energy performance in a prescribed manner or by performance based on computer modeling. The energy code is updated every three years by the Energy Commission to advance the energy efficiency standards for building construction. In addition to the energy code, the state Green Building code establishes sustainable building construction standards. The Green Building code addresses the use of sustainable materials, methods of construction, recycling of construction waste, and electric vehicle infrastructure. These measures contribute to overall building energy efficiency and sustainability and have an added ongoing benefit throughout the useful life of a building.

In order to save natural resources and to make utilities more affordable, the City's Home Repair programs, implemented under Policy <u>H</u>2.3, provide both funding and information referral for participants to include weatherization improvements and utilize energy and water efficient appliances and fixtures. Program participants are encouraged to use the energy conservation programs provided by Pacific Gas and Electric (PG&E).

All new development, including housing projects, are also subject to compliance with applicable greenhouse gas (GHG) emission reduction strategies contained in the City's Climate Action Plan (CAP). The CAP, which was last updated in 2020, demonstrates the City's leadership to reduce GHG emissions and provides a comprehensive list of community-wide actions that will help reduce the community's GHG emissions. Specifically, for housing and new construction, the CAP includes Measures EE 1, EE 2, EE 3, ME 1 and ME 2 for exceeding minimum state energy efficiency requirements, providing education and outreach on benefits and financial incentives associated with energy upgrades, and continuing support for energy efficiency upgrades through utility programs and programs with local and regional agencies.

The CAP also identifies building electrification strategies (Measures BE 1, BE 2 and ME 3) to encourage the transition from gas to electric equipment, in line with the City's goal to phase out natural gas in existing buildings by 2030. Strategies include outreach and education to residents, businesses and contractors on the benefits of building electrification and rebates for electric technologies (e.g., induction cooktops, heat pump water heaters, electric clothes dryers) and adopting policies to encourage or require eliminating the use of natural gas in new or existing buildings.

Policies and programs that explicitly address the City's CAP, as well as energy efficiency and sustainability, will be contained in other elements of the City's updated General Plan, but are not contained the Housing Element. However, as outlined above, addressing climate change, continuing to improve energy efficiency and building homes sustainably are key City priorities and will be applied to housing projects and housing program implementation for the upcoming housing cycle.

5. PUBLIC PARTICIPATION

5.1 Overview

The City of San Mateo recognizes an engaged community is essential to drafting and implementing a strong Housing Element. A key strength of this draft Housing Element is the incorporation of key findings collected at over nineteen public and community meetings and workshops, five intercept/pop-up events, and four surveys. A summary of public participation and community outreach activities and key takeaways are included here. The collected public input received is included as an appendix to this draft Element (Appendix F). To reach as many community members who live in or are a part of the San Mateo as possible, the city developed and implemented a proactive outreach plan at the outset of the draft Housing Element development process. Its goals were to:

- Raise awareness among San Mateo residents of the importance of the Housing Element update on shaping the future of the community
- Have robust and diverse community participation throughout the process that is representative of the full range of demographics, perspectives, and experiences in the San Mateo community
- Build a level of public trust in the update process and support for the Housing Element that will lead to its successful implementation after adoption.

The city proactively engaged community members for whom English was not spoken at home, renters, those under 45 years of age, low-income and very low-income households, people with disabilities, seniors, single female heads of household, people experiencing homelessness, and those from under-represented neighborhoods.

In recent years, the community has participated in many conversations about affordable housing, tenant rights, displacement, and fair housing. In addition to conversations focused on the Housing Element, the City's efforts to establish district elections, the ongoing General Plan Update effort, and the 2019 Community Conversations: Housing in San Mateo event series have provided opportunities for many additional collaborative outreach activities. For other outreach work, we partnered with other San Mateo County jurisdictions for a first-of-its-kind countywide outreach effort, through an award-winning collaboration called <u>21 Elements</u>. Specific activities included:

Website, Social Media, and Printed Mailing. The City of San Mateo launched a <u>Housing Element Update</u> <u>website</u>, and conducted extensive email and social media outreach beginning in March 2021. Physical mailers were sent city-wide in October 2021 (to 27,000 households), and a second targeted mailer was sent out in January 2022. <u>Physical mailers included printed information in English and Spanish.</u> City staff and consultants also participated in and helped shape the *Let's Talk Housing initiative*. Through this award-winning collaborative, the jurisdictions of San Mateo County worked together to increase awareness of and participation in the Housing Element Update process and make sure everyone is involved in shaping our shared future.

Community Meetings. The city organized three public Housing Element workshops and presented at five public commission/council meetings. These included:

- Community and Housing Needs Workshop /Community Relations Commission 9/29/21
- Housing Element Update/Planning Commission 10/12/21
- Housing Policy Workshop 11/2/21

- Housing Element Update/Senior Commission 11/8/21
- Housing Element Update/City Council 11/15/21
- Fair Housing Workshop 1/13/22
- Joint PC/CC Study Session Housing Programs /Policies Study Session 2/7/22

Focus groups and presentations at the meetings of local community-based organizations included:

- Housing Element and General Plan Update/ Bay Area Community Health Advisory Council (BACHAC) 9/9/21
- Builders Focus Group 11/15/21
- Housing Element Update/Chamber of Commerce 12/14/21
- Housing Element Update/Downtown Merchants Association 12/14/21
- Housing Element Update/ SMFCSD PTA Association 1/10/22

The city also participated in several meetings and webinars in partnership with 21 Elements, including:

- Let's Talk Housing Introduction to the Housing Element
 - o 3/25/21 (Joint with Millbrae, Burlingame, Hillsborough, East Palo Alto)
 - 7/26/21 (Virtual countywide meeting about the Housing Element update in Spanish)
- All About RHNA 4/23/21 (countywide)
- Listening Sessions (countywide)
 - Fair Housing 9/27/21
 - Housing Advocates 10/18/21
 - o Builders 11/01/21
 - Service Providers 11/15/21

Outreach Activities. City staff and consultants conducted an online survey, in-person intercept surveys at pop-up events and other community events, and a statistically reliable community survey that included some Housing Element-related questions.

These efforts included:

- Harvest Festival at King Park in North Central 10/16/21
- Central Park Storytime in the Park 10/27/21
- Mi Rancho Market in North Central 10/29/21
- Chavez Market in Shoreview 11/18/21
- Macedonia Food Distribution, Various Tuesdays October to December
- Online Survey 10/11/21 to 1/16/22
- Intercept Surveys 10/16/21 to 12/21/21
- True North Community Survey 1/21/22 to 2/2/22

The City also supported an Equity Advisory Group with 21 Elements to ensure outreach was set up to meet people where they were at as much as possible. Specifically, all intercept surveys were conducted in printed and conducted in both English-language and Spanish-language, with English and Spanish speakers available to engage and facilitate completion of the surveys and record first person accounts of housing needs and challenges. Examples of the Spanish and English intercept surveys are included in Appendix F.

5.2 Accomplishments and Key Takeaways

5.2.1 Website, Social Media, and Printed Mailing

As a starting point for accomplishing extensive research, San Mateo launched a <u>Housing Element Update</u> <u>website</u> that included links to past event video recordings, meeting materials, outreach and survey summaries, and information about upcoming meetings and ways to get involved. It also contained draft Housing Element documents and collected community feedback. Email Blasts and social media efforts from March 2021 through January 2022 included invitations to participate in community workshops, public meetings, and online survey to several city-maintained email lists. The City was also successful in similar messages being circulated in the newsletters of at least five community groups including: San Mateo High School District Employees Newsletter, San Mateo-Foster City School District Parent Teacher Association (SMFCSD PTA) Newsletter, Chamber of Commerce Newsletter, Downtown San Mateo Association Newsletter, and to the affordable housing residents of Human Investment Project (HIP) Housing and MidPen Housing properties within San Mateo.

A Citywide mailer was sent to every household (27,000) on October 18, 2021 and a second mailer targeted to renters was sent on January 2, 2022 also inviting community members to participate in community workshops, public meetings, and online surveys. <u>Mailers included printed information in English and Spanish.</u> An example of the mailer is included in Appendix F (Additional Community Outreach Collateral and Activities). Community intermediaries also distributed stacks of printed fliers with similar content to businesses with significant Spanish-speaking clientele in the North Central and Shoreview neighborhoods. an example is also included in Appendix F.

From September to November 2021, four joint Housing Element and General Plan Update-focused Facebook live events were conducted in Spanish by Peninsula Conflict Resolution Center (PCRC), a trusted community partner in Spanish-speaking communities to introduce the Housing Element and General Plan Update and keep community members informed about events and updates. Participants expressed an interest in a variety of housing and community safety topics and supported the City's emphasis on getting input from the Latinx community.

The City also participated in, and helped shape, the <u>Let's Talk Housing initiative with 21 Elements</u>, which included a_countywide website available in five languages, detailing our timeline, engagement activities, and resources, videos about the process in several languages, and a social media presence. As of February 2022, the website had been visited more than 17,000 times, with more than 20% from mobile devices.

5.2.2 Community Meetings

The city held three public Housing Element workshops, presented at five public commission/council meetings, hosted a focus group discussion with housing architects and developers, and provided presentations to local community-based organizations including the Chamber of Commerce, Downtown Merchants Association, San Mateo-Foster City School District Parent Teacher Association (SMFCSD PTA) and neighborhood associations. The workshops were advertised and offered in Spanish and English-language formats.

In partnership with 21 Elements/Let's Talk Housing: *An Introduction to the Housing Element* event, provided a housing element overview with breakout discussion rooms that was part of a series of introductory meetings attended by more than 32 people in San Mateo and over 1,000 community

members countywide. Additionally, *Let's Talk Housing* held an *All About RHNA* webinar and a countywide four-part webinar series to help educate and inform San Mateo County residents and stakeholders on regional and local housing issues. The four-part series took place on Zoom in fall of 2021, focusing on the following topics and how they intersect with the Bay Area's housing challenges and opportunities: Why Affordability Matters, Housing and Racial Equity, Housing in a Climate of Change, Putting it All Together for a Better Future. The series included speaker presentations, audience Q&A, breakout sessions for connection and debrief discussions.

The sessions were advertised and offered in Spanish, Mandarin and Cantonese, though participation in non-English channels was limited. The *All About RHNA* webinar provided an in-depth dive into sites methodology. On July 26th, San Mateo joined a virtual countywide meeting about the Housing Element update in Spanish, hosted by El Comité, a trusted community organization. English interpretation was provided so non-Spanish speaking staff could participate in the conversation, and a total of 57 people participated.

5.2.3 Key Takeaways

- <u>Housing is personal</u>: People often have differing views on housing because it is a very personal issue tied to feelings of safety, belonging and identity. Often the comments reflected people's current housing situation. Many people shared meaningful stories of being priced out of their communities or of their children not being able to live in the community where they grew up.
- <u>The price of housing is a major concern</u>: Many voiced concerns about the high cost to rent or buy a home today, either for themselves, friends, or family. It is an issue that touches a lot of lives. There was significant concern raised that service workers, teachers, first responders, and small business owners were being priced out of San Mateo.
- <u>More housing is needed</u>: Generally, people believe we need more housing, particularly affordable housing. However, there are diverging views on how to accomplish this, where housing should go, and what it should look like. There was strong interest in locating higher density developments close to transit, in walkable, mixed-use areas.
- <u>Single-family neighborhoods are polarizing</u>: While some people voiced their interest in up zoning single-family neighborhoods or eliminating them altogether, other homeowners want to protect them and are concerned with the future of investments they have made.
- <u>Affordable housing is a top concern</u>: Many felt that more needs to be done to promote affordable housing. They also felt that developers should be eligible for incentives and opportunities that make them more competitive, and that affordable housing should be spread throughout the entire city.
- <u>Specific concern for individuals with all types of disabilities</u>: There was interest in prioritizing the creation of new units and prioritizing accessible units for people with disabilities.
- <u>Other common themes</u>: equity, regional considerations, the difficulty of the development process, the interconnected nature of land-use and transportation decisions, and diversity.

Also, in partnership with 21 Elements/Let's Talk Housing, a series of four stakeholder listening sessions allowed jurisdictions to listen to and interact with stakeholder groups arranged by topic: Fair Housing, Housing Advocates, Builders, Service Providers. More than 30 groups participated. Key takeaways include:

• <u>Fair Housing</u>: Concern for the end of the eviction moratorium, the importance of transit-oriented affordable housing and anti-displacement policies, and the need for education around

accessibility regulations and tenant protections. Eight (8) stakeholder groups provided this feedback.

- <u>Housing Advocates</u>: Concern for rent increases and the need for ongoing outreach to underserved and diverse communities, workforce housing, deeply affordable and dense infill, and tenant protections for the most vulnerable. 6 stakeholder groups provided this feedback.
- <u>Builders and Developers</u>: Local funding, tax credit availability, and concern that appropriate sites limit their ability to develop affordable housing while limited sites, construction costs, and city development review requirements and processes limit the development of market-rate housing. 12 stakeholder groups provided this feedback.
- <u>Service Providers</u>: More affordable housing and vouchers or subsidies for market-rate housing are needed, along with on-site services and housing near transit, and jurisdictions should work with providers and people experiencing issues before creating programs. Ten (10) stakeholder groups provided this feedback.

The following key themes were collected as part of a builder's focus group discussion with housing developers, builders, and architects on policies and programs for San Mateo's Housing Element on November 15, 2021. The Constraints Analysis Section also includes key themes from the builders focus group and related feedback. Seven external participants, including non-profit housing developers, for-profit housing developers, and architects familiar with multi-family construction provided feedback. Key themes include:

- Relaxing height restrictions, particularly as they can conflict with minimum height requirements for ground floor uses.
- Streamlining the development review and entitlement process and establishing clearer objective development standards.
- Expanding incentive programs for affordable housing, including local density bonus incentives.
- Relaxing parking requirements, particularly in walkable areas close to transit.
- A walkable downtown is an amenity and could be a rationale for exceptions to other required amenities, including required open space.

5.2.4 Outreach Activities

San Mateo conducted a Housing Element online survey from October 11, 2021 to January 16, 2022. The online survey received 594 responses. In the fall, to ensure survey results were as representative as possible, City staff and their consultant team also organized pop-up events and conducted an intercept survey and received 156 responses in the North Central and Shoreview Neighborhoods, as well as Macedonia food distribution events. True North Research, Inc. was retained to conduct statistically reliable community survey in January and February of 2022 across a variety of topics, including some housing-related questions.

Community-wide survey. In order to provide decision makers with a statistically reliable understanding of its residents' satisfaction, priorities, opinions, and concerns as they relate to city services, facilities, and policies, True North Research, Inc. was retained to conduct a community-wide survey. The survey was specifically designed to avoid the self-selection bias common in informal feedback mechanisms, public comment fora, and other mechanisms for public engagement. A statistically reliable community survey was conducted in January and February of 2022 across a variety of topics, including some housing-related questions and was completed by 775 community members. Key Housing Element-related themes include:

- When residents were asked to indicate the one thing city government could change to make San Mateo a better place to live, now and in the future, providing more affordable housing was the most common (19%)
- Respondents were less satisfied with the City's efforts to facilitate the creation of affordable housing (33%), and address homelessness (42%)
- Approximately two-thirds of residents indicated that there is currently too little housing that is affordable
- Factors that were viewed as most important in planning for future housing were ensuring adequate water supplies, minimizing greenhouse gases, creating homes that are affordable for low- and middle-income residents, preserving open space and parklands, and creating pedestrian friendly areas that encourage people to walk rather than drive.
- 63% were willing to support higher density buildings up to 12 stories near downtown/transit

Housing Element Online Survey. Results of the "Housing Needs in San Mateo – Housing Element 2023-31" online survey conducted by the City between October 11, 2021 and January 16, 2022 are presented below. A total of 594 surveys were completed online by community members. The information in this report should be considered with a similar weight as other qualitative forms of feedback and should not be treated as statistically reliable. When compared to City averages overall, survey respondents tended to be older, more white, more likely to own their own home, more likely to live in a single-family home, and less likely to be low income. Some areas resulted in conflicting input from the community with many commenters emphasizing their belief that increasing housing supply was a top priority for the city, while many others emphasizing the view that "new housing is not needed or desired". Key themes are summarized below:

- <u>Most important housing related challenges</u>: "Service workers' salaries cannot support existing rents in San Mateo" and "Service workers, teachers, first responders, and small business owners are moving out of San Mateo."
- <u>Best location to place additional housing</u>: "New housing should be walkable/bikeable to shops and services," and "New housing should be concentrated near public transit." Key themes from open ended responses: "new housing should be located in high opportunity areas," and "new housing is not needed or not desired."
- <u>Best strategies to manage production of new housing</u>: "Encourage mixed-use projects that have both commercial and residential uses," "Create housing by redeveloping existing properties that have additional potential," and "Increase allowable density in areas that are close to transit." Key themes from open ended responses: "increase density throughout the city," "new housing is not needed or not desired" and "prioritize single family housing."
- <u>What types of housing should be prioritized</u>: "Smaller units that are less expensive to live in." Key themes from open ended responses: "support for building housing in general," "prioritize affordable housing, require affordable housing, or establish mandatory inclusionary zoning," and "prioritize senior housing."
- <u>Best ways to address housing affordability</u>: "Incentives for private developers to build more affordable housing," "Locate affordable housing near transit and jobs," and "Financial assistance for people who cannot afford housing, such as subsidized rent and down payment loans." Key themes from open ended responses: "strengthen rent regulations or establish rent control" and "streamline regulations: reduce height, density, parking, or other regulations."

- Most important ways to ensure housing opportunities are available to all members of San Mateo, especially those who have not had fair access to housing in the past: "Ensure affordable housing opportunities are created throughout the entire city" and "Improve infrastructure, transit and services in underserved neighborhoods." Key theme from open ended responses: "more housing equals more opportunity, focus on expanding supply."
- <u>Common themes</u>: Additional comments (296 open-ended responses) were analyzed for common themes, these included:
 - Housing is a priority issue: use whatever means are available to substantially increase supply
 - Improve public transportation and make walking and biking safer, this is also better for the environment
 - Infrastructure improvements should happen before housing is built, with particular emphasis on traffic congestion, roads, parking, and water
 - Locate new housing in Transit Oriented Developments (TOD)/increase density most in transit-rich areas
 - New housing is not needed or not desired

Intercept surveys. In the Fall, to ensure survey results were as representative as possible, City staff and their consultant team also organized pop-up events and conducted an intercept survey and received 156 responses in the North Central and Shoreview Neighborhoods, as well as Macedonia food distribution events. The locations, dates, and times of these events were selected with the advice of Peninsula Conflict Resolution Center (PCRC), who also helped to staff these events. Events at Mi Rancho Market in North Central (10/29/21), Chavez Market in Shoreview (11/18/21), and Macedonia food distribution events were staffed by English-Spanish bilingual community outreach staff. The information in this report should be considered with a similar weight as other qualitative forms of feedback and should not be treated as statistically reliable. When compared to City averages overall, intercept survey respondents were more likely to be Hispanic or Latinx, 35-50 years old, and reside in the 94401 zip code, which includes the North Central and North Shoreview neighborhoods. Key themes are summarized below:

- To manage the production of housing overall, there was notable interest in redeveloping existing properties that have potential for more housing (45%), creating accessory units on existing single-family properties (22%), and encouraging mixed-use projects that have both commercial and residential uses (21%).
- To address housing affordability, there was substantial interest in financial assistance programs for people who cannot afford housing, such as subsidized rent and down payment loans (47%), and public funding to construct new housing (26%).
- The current housing situation in San Mateo is affecting them or people they know due to the high cost of housing in general; the cost of housing's impact on types of individuals (childcare workers, adult children, older adults); inability to purchase a home due to cost; self or others moving away due to price, traffic, and difficulty commuting.
- Some direct quotes: "Include up-scale neighborhoods in zoning changes," "Always include preferences for people w/ developmental disabilities + others," "I have to move b/c its getting too expensive, I will move away from County to an in-law unit with relatives in Marin," and "I'm homeless, I sleep on street behind the gas station. I can't afford rent, I can hardly get food."

Equity Advisory Group. In partnership with 21 Elements / Let's Talk Housing, and in alignment with community outreach best practices, it was important to include the guidance of and foster partnerships with community organizations to help ensure everyone's voices were heard during the Housing Element update. In response, an Equity Advisory Group (EAG) was formed consisting of 15 organizations or leaders across the county that are advancing equity and affordable housing. To date, EAG members have facilitated and hosted community meetings in partnership with 21 Elements, collected community housing stories to put a face to housing needs, advised on messaging, and amplified events and activities to their communities. All participating organizations are featured on the Let's Talk Housing <u>website</u>.

San Mateo County Fair Housing Survey. In partnership with 21 Elements / Let's Talk Housing, and conducted by Root Policy, the San Mateo County Fair Housing Survey has gathered 108 responses from residents in the City of San Mateo as of January 20, 2022. Key challenges include:

- Income is too low to find housing
- Housing unit is too small
- Displacement
- Denied housing when looking due to "income too low"
- Difficulty for voucher holders to find an affordable unit
- Homes not meeting needs of a household member with a disability
- When asked what type of help they needed to improve their housing security, top answers included: Help me with a down payment/purchase (39%); Help me get a loan to buy a house (27%); and Help me with the housing search (23%). Other resources to improve quality of life were also identified in the survey results.

5.3 Draft Housing Element Public Review Period

During the formal 30-day public review period of the Draft Housing Element, which ran from April 6, 2022 to May 6, 2022, a total of 20 comment letters were received, and are included in Appendix G. The comments received by the City offered a wide variety of opinions and input on the Draft Housing Element. Those that expressed opposition to the planned growth noted concerns about whether the City's resources, specifically water supply, would be able to support the population increase and that singlefamily neighborhoods would be negatively impacted or even eliminated. Other comments pushed for the Housing Element to go further beyond the goals currently outlined in the plan, noting concern that the City is too optimistic in redevelopment potential of the sites contained in the Sites Inventory. They encouraged the City to include re-zoning of the single-family neighborhoods as a program while going further to remove existing constraints to development (namely Measure Y) to increase housing production potential. Both those for and against the draft plan agreed that if housing density were to increase, commensurate upgrades to transit options must be made to mitigate traffic impacts and not reduce quality of life for residents. Finally, some commenters emphasized the importance of working towards housing affordability as vital for protecting individuals with disabilities, for sheltering low-income families in danger of experiencing homelessness, and to affirmatively further fair housing through racial equity.

On April 26 and May 3, <u>2022</u>, the Planning Commission also received public comments and provided input on the Draft Housing Element. On May 23, 2022, the City Council held a special meeting to consider the Draft Housing Element, receive public comments and provide staff with direction. Overall, the Council expressed support for the Draft, with several modifications and updates, and directed staff to submit the draft to HCD for first review. The minutes from these meetings are included in Appendix G. <u>Additionally</u>, during this period, city staff conducted intercept outreach activities to inform the public of the draft plan and invite their attendance and participation in the public meetings. A key activity included engaging and distributing information to approximately 150 households in English and Spanish during the very popular annual city-wide community event known as "Eggstravaganza" on April 16, 2022. Intercept materials, designed to engage families with young children were developed and distributed in English and Spanish-language formats. Examples are included in Appendix F.

5.4 How We Incorporated What We Heard into the Plan

The extensive outreach and community engagement conducted over the past year played a significant role in the development of the goals, policies, and programs within the 2023-2031 Housing Element. Feedback and insights from tenants, non-English speakers, lower-income residents, property owners and developers helped to highlight new policy opportunities and ways to strengthen and improve existing policies. And the overarching challenge of housing affordability and availability was heard during most every meeting and conversation. In addition, themes such as investing in disadvantaged communities, improving walkability in neighborhoods and access to transit, and addressing climate change helped inform policies in the Housing Element as well as the General Plan Update which is being prepared concurrently. The following is a summary list of topics and the associated policy(s) that were added or improved as a result of that community and stakeholder feedback.

- Support the production of more missing middle housing. (*Policies H1.4, H1.11 and H1.13*)
- Improve awareness and availability of resources for landlords and tenants. (Policies H4.1, H4.2, H4.3 and H4.4)
- Streamline the permitting process and simplify the rules and regulations for new housing development. (*Policies H1.6, H1.7 and H1.8*)
- Fair housing setup a rental registry, adopt first right of refusal for existing tenants' rules. (*Policies* H3.4 and H3.6)
- New housing should be sustainable and support the City's climate action plan. (*Policies H2.3 and H2.5*)
- Provide more materials and information in languages other than English. (*Policies H4.1 and H4.4*)
- Improve walkability and access to transit in disadvantaged communities. (Policy H2.4)
- Provide training/education about fair housing laws to landlord. (*Policy H3.2*)
- Support the construction of more accessory dwelling units (ADUs). (*Policy H1.4*)
- Establish a BMR unit set-aside for tenants with physical or developmental needs. (*Policy H3.5*) Support the development of larger units with more bedrooms for families. (*Policy H1.5*)

In response to the public comments made during and after the Public Review Period, and City Council discussion and direction, multiple additional revisions, clarifying edits, and corrections were made to the Draft prior to submittal to HCD. Those revisions and updates include:

All policies and programs were reviewed and, where appropriate, updated, to be more specific and action oriented.

- Sites inventory methodology was updated to remove outliers and distinguish average densities by project types; and additional information was provided for justification of the ADU projections.
- Constraints summary was modified based on updates to Appendix B.

- Policies and programs were updated to reflect public comments and decision-maker direction to increased housing support for people with disabilities including those with developmental disability; greater support for missing middle housing options; and increased attention to identifying new funding sources for housing programs.
- The Sites Inventory was reviewed and updated to add information related to site selection, anticipated GPU land use designation, and explanations for density projections were bolstered.
- The Constraints analysis was updated to include corrections and further information related to the City's fees.
- Staff followed-up with water providers (Cal Water and Estero Municipal Improvement District) to provide additional information on existing water infrastructure and future supply to support the projected growth in the Housing Element.
- Policies and programs related to transportation and circulation upgrades will be addressed as part of the updated Circulation Element in the GPU.

5.5 Attachments included in Appendices F and G

Appendix F includes community feedback, communications and documentation that support the findings and conclusions in this Section.

Appendix G includes public review period comments received by the City during the 30-day public review

period.

- 30-Day Public <u>Review</u> Period <u>Comments</u> Received April 6, 2022 to May 6, 2022
- Second Public Review Period Comments Received December 30, 2022 to January 9, 2023

6. AFFIRMATIVELY FURTHERING FAIR HOUSING (AFFH) SUMMARY

6.1 What is Affirmatively Furthering Fair Housing?

Affirmatively Furthering Fair Housing

"Affirmatively furthering fair housing" means taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics. Specifically, affirmatively furthering fair housing means taking meaningful actions that, taken together, address significant disparities in housing needs and in access to opportunity, replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty into areas of opportunity, and fostering and maintaining compliance with civil rights and fair housing laws. The duty to affirmatively further fair housing extends to all of a public agency's activities and programs relating to housing and community development. (Gov. Code, § 8899.50, subd. (a)(1).)"

Figure 3: AFFH Definition

Source: California Department of Housing and Community Development Guidance, 2021, page 14.

California Assembly Bill 686, which was signed into law in 2018 requires that all public agencies in the state affirmatively further fair housing (AFFH) beginning January 1, 2019. Public agencies receiving funding from the U.S. Department of Housing and Urban Development (HUD) are also required to demonstrate their commitment to AFFH. The federal obligation stems from the fair housing component of the federal Civil Rights Act mandating federal fund recipients to take "meaningful actions" to address segregation and related barriers to fair housing choice.

AB 686 requires all public agencies to "administer programs and activities relating to housing and community development in a manner that affirmatively furthers fair housing, and take no action inconsistent with this obligation"^[1]

AB 686 also makes changes to Housing Element Law to incorporate requirements to AFFH as part of the housing element and general plan to include an analysis of fair housing outreach and capacity, integration and segregation, access to opportunity, disparate housing needs, and current fair housing practices.

6.2 History of segregation in the region

The United States' oldest cities have a history of mandating segregated living patterns—and Northern California cities are no exception. ABAG, in its recent Fair Housing Equity Assessment, attributes segregation in the Bay Area to historically discriminatory practices—highlighting redlining and discriminatory mortgage approvals—as well as "structural inequities" in society, and "self-segregation" (i.e., preferences to live near similar people).

Researcher Richard Rothstein's 2017 book *The Color of Law: A Forgotten History of How Our Government Segregated America* chronicles how the public sector contributed to the segregation that exists today. Rothstein highlights several significant developments in the Bay Area region that played a large role in where the region's non-White residents settled.

Pre-civil rights San Mateo County faced resistance to racial integration, yet it was reportedly less direct than in some Northern California communities, taking the form of "blockbusting" and "steering" or intervention by public officials. These local discriminatory practices were exacerbated by actions of the Federal Housing Administration which excluded low-income neighborhoods, where the majority of people of color lived, from its mortgage loan program.

According to the San Mateo County Historical Association, San Mateo County's early African Americans worked in a variety of industries, from logging, to agriculture, to restaurants and entertainment. Expansion of jobs, particularly related to shipbuilding during and after World War II attracted many new residents into the Peninsula, including the first sizable migration of African Americans. Enforcement of racial covenants after the war forced the migration of the county's African Americans into neighborhoods where they were allowed to occupy housing—housing segregated into less desirable areas, next to highways, and concentrated in public housing and urban renewal developments.

The private sector contributed to segregation through activities that discouraged (blockbusting) or prohibited (restrictive covenants) integrated neighborhoods. In the City of San Mateo, builders of the Hillsdale neighborhood in the mid-1900s recorded deeds that specified that only "members of the Caucasian or White race shall be permitted" to occupy sold homes—the exception being "domestics in the employ[ment] on the premises."^[2] This developer went on to develop many race-restricted neighborhoods in the Bay Area, became president of the National Association of Home Builders (NAHB), became national president of the Urban Land Institute (ULI), and was inducted into California's Homebuilding Foundation Hall of Fame.

The timeline of major federal Acts and court decisions related to fair housing choice and zoning and land use appears on the following page. As shown in the timeline, exclusive zoning practices were common in the early 1900s. Courts struck down only the most discriminatory practices and allowed those that would be considered today to have a "disparate impact" on classes protected by the Fair Housing Act. For example, the 1926 case *Village of Euclid v. Ambler Realty Co. (272 U.S. 365)* supported the segregation of residential, business, and industrial uses, justifying separation by characterizing apartment buildings as "mere parasite(s)" with the potential to "utterly destroy" the character and desirability of neighborhoods. At that time, multifamily apartments were the only housing options for people of color, including immigrants.

The Federal Fair Housing Act was not enacted until nearly 60 years after the first racial zoning ordinances appeared in U.S. cities. This coincided with a shift away from federal control over low-income housing toward locally-tailored approaches (block grants) and market-oriented choice (Section 8 subsidies)—the latter of which is only effective when adequate affordable rental units are available.

6.3 San Mateo's Fair Housing Assessment

The Fair Housing Assessment (Appendix D) follows the April 2021 State of California State Guidance for AFFH. The study was conducted as part of the 21 Elements process, which facilitates the completion of Housing Elements for all San Mateo County jurisdictions. It includes the following sections:

6.3.1 Primary Findings

Primary findings from the Fair Housing Assessment for the City of San Mateo describes fair housing enforcement and outreach capacity, integration and segregation, access to opportunity, disparate

housing needs, and contributing factors and the city's fair housing action plan.

• 16% of fair housing complaints filed in San Mateo County from 2017 to 2021 (57 total) were in the City of San Mateo (9 total), which is approximately aligned with the city share of the county's population (14%). The most common issues cited in the city were refusal to rent and discrimination in terms, conditions, privileges relating to rental. Most complaints were on the basis of disability status (6 complaints) and race (3 complaints) in the city.

Racial and ethnic minority populations are **disproportionately impacted by poverty, low household incomes, overcrowding, and homelessness** compared to the non-Hispanic White population in the City of San Mateo. Additionally, racial and ethnic minorities are more likely **to live in moderate resources areas and be denied for a home mortgage loan**.

- Racial and ethnic minority populations generally have higher rates of poverty (Figure II-5) and lower household incomes (Figure II-4) compared to the non-Hispanic White population in the City of San Mateo.
- Racial and ethnic minorities are more likely than non-Hispanic White households to experience overcrowding (Figure IV-17). Low- and moderate-income households are also more likely to be overcrowded (Figure IV-18).
- People who identify as American Indian or Alaskan Native, Black, White, and Hispanic are overrepresented in the homeless population compared to their share of the general population (Figure IV-22).
- Hispanic, Asian, and Black residents are more likely to live in moderate resource areas compared to high resource areas (Figure III-12). It is important to note there are no designated low resource areas in the City of San Mateo.
- Hispanic and American Indian or Alaska Native households have the highest denial rates for mortgage loan applications in 2018 and 2019 (Figure IV-33).

Geospatially, **the northeast area of the city** is disproportionately impacted by high poverty, low education opportunity, low economic opportunity, low environmental scores, high social vulnerability scores, concentrations of cost burdened households, overcrowding, and moderate resource scores. These areas are generally on either side of Highway 101 and stretch to the San Francisco Bay waterfront, encompassing the North Central and Shoreview neighborhoods. These areas have:

- Higher poverty rates between 10% and 20% (Figure II-28).
- Education opportunity scores between 0.25 and 0.5—meaning they have lower education scores compared to the rest of the city (Figure III-1).
- Low economic opportunity scores between zero and 0.5 (Figure III-7).
- Low environmental scores—which account for PM2.5, diesel PM, drinking water, pesticides, toxic release, traffic, cleanup sites, groundwater threats, hazardous waste, impaired water bodies, and solid waste sites (Figure III-9). The northeast area of the City of San Mateo has particularly poor environmental outcomes for traffic, impaired water, groundwater threats, hazardous waste, and asthma.
- The composite opportunity score for the City of San Mateo shows Census Tracts in the northeast area of the city fall within moderate resource areas while the rest of the city is within high or highest resource areas (Figure III-14).

- The Social Vulnerability Index (SVI) provided by the Centers for Disease Control and Prevention (CDC) ranks census tracts based on their ability to respond to a disaster and includes four themes of socioeconomic status, household composition, race or ethnicity, and housing and transportation. The northeast area of the city is most vulnerable according to the SVI (Figure III-15).
- Concentration (60% to 80% of households) of cost burdened households (Figure IV-13).
- Overcrowded households are concentrated in the same areas as cost burdened households (Figure IV-19).
- These areas are also within Special Flood Hazard Areas (Figure IV-31) and are vulnerable to displacement (Figure IV-28).

The City of San Mateo has a slight concentration of residents with a disability with 9% of the population compared to 8% in the county (Figure III-17). Residents living with a disability in the city are more likely to be unemployed and are largely concentrated in areas around Highway 101. Finally, the aging population is putting a strain on paratransit access countywide.

• Unemployment is disproportionately high among residents living with a disability at 12% compared to 3% for residents without a disability in the City of San Mateo—particularly when compared to the county (Figure III-20).

Racial and ethnic minority students in the City of San Mateo—served by the San Mateo Union High School District and the San Mateo-Foster Elementary School District—**experience lower educational outcomes compared to other students**. Many high schoolers in the county met admission standards for a University of California (UC) or California State University (CSU) school. However, **Pacific Islander, Hispanic, and Black students in the San Mateo Union district were less likely to meet the admission standards**. Although San Mateo Union High School has relatively low dropout rates—4% of students—compared to other districts in the county, **dropout rates among Hispanic (7%)**, **Black (6%)**, **and Pacific Islander students are higher** (Figures will be included in the access to education supplement).

- Nearly half of all renter households in the City of San Mateo are cost burdened—spending more than 30% of their gross income on housing costs—and one in four are extremely cost burdened spending more than 50% of their gross income on housing costs (Figure IV-9). There are disparities in housing cost burden in the City of San Mateo by race and ethnicity and family size (Figure IV-11 and Figure IV-12).
- 15% of respondents to the resident survey conducted for this AFFH said that schools in their neighborhood were of poor quality.

Resident needs collected through local survey. A survey administered to capture residents' needs and support the AFFH found the following housing challenges. Nearly 150 residents completed the survey:

- About 26% of residents said their house or apartment is too small for their family;
 - 36% for racial and/or ethnic minority households;
 - 42% for single parent households
- 14% of renters said they worry that if they request a repair they will experience rent increase or get evicted;

- o 16% for racial and/or ethnic minority households
- 21% for single parent households
- 27% of respondents indicated they had been discriminated against when looking for housing in San Mateo County;
 - o 31% for racial and/or ethnic minority respondents;
 - 43% for residents with a disability;
- 10% (14% for single parent households) of renters are often late on rent and 14% (20% for residents with a disability) can't <u>afford</u> utilities.

6.3.2 Contributing factors and Fair Housing Action Plan

The disparities in housing choice and access to opportunity discussed above stem from historical actions, socioeconomic factors that limit employment and income growth, the inability of the broader region to respond to housing demand, regional barriers to open housing choice, and, until recently, very limited resources to respond to needs.

Fair housing issue: Hispanic households have disproportionate housing needs. These needs are evident in mortgage denial gaps, geographic distribution of affordable housing, cost burden, and overcrowding.

Contributing factors:

- Higher rates of mortgage denial rates among Hispanic households stems from decades of discrimination in housing markets and challenges building wealth through economic mobility and homeownership.
- Although voucher holders and affordable housing (as captured in the HCD Location Affordability Index) are not as highly concentrated in the City of San Mateo as in many surrounding jurisdictions, the northern portion of the city offers the most affordable homes. As such, residents living in these areas have lower incomes and higher rates of poverty. Preference may be at play as well: A recent article in Cityscape found that Hispanic homebuyers—when controlled for demographics, loan characteristics, and finances—are more likely to purchase homes in neighborhoods with fewer non-Hispanic White homeowners and lower economic opportunity.^[1]
- Hispanic residents are more likely than others to work low wage jobs that do not support the City's or region's housing prices, resulting in higher rates of cost burden and overcrowding. Although, it is customary for Hispanic households to live in multigenerational settings, which may account for higher rates of perceived overcrowding, overcrowding is also an indicator of lack of access to affordable and right-sized housing.
- Hispanic residents are primarily concentrated in the northeastern area of the city where residents
 face higher poverty and cost burden as well as poor opportunity outcomes according to TCAC's
 opportunity maps.

Fair housing issue: Hispanic residents and single female parent households are concentrated in census tracts with higher poverty, low economic and environmental opportunity, high-cost burden, overcrowding, and flood hazards compared to the rest of the City of San Mateo.

Contributing factors:

• Concentration of naturally occurring affordable ownership and rental housing opportunities in the northeast areas of the city further concentrates poverty, cost burden, and overcrowding in

areas with low economic and environmental outcomes.

- There is a relative lack of affordable housing opportunities in higher resourced areas of the city.
- Highway 101 creates a major barrier between the Shoreview neighborhood—where the geographic concentrations of these groups exist—and the rest of the City of San Mateo.

Fair housing issue: Persons with disabilities have higher housing needs due to challenges accessing employment and housing discrimination and are concentrated in areas with lower environmental and economic opportunity scores.

Contributing factors:

- The unemployment rate for the City of San Mateo's residents with a disability is four times that of persons without a disability. The exact reasons for this disparity are unclear and are likely related to limited job opportunities, access to employment, and market discrimination.
- The undersupply of accessible housing units, particularly for renters, creates a scarcity of units for residents living with a disability.
- There were six complaints—out of the nine total complaints in the city—filed with HUD in the City of San Mateo from 2017 to 2020 where the issues cited included a failure to make reasonable accommodations. Landlords and property owners are required to provide reasonable accommodations to residents living with a disability upon request.
- There are concentrations of the population living with a disability west of Highway 101 in the North Central neighborhood. This area of the city has a concentration of low- and moderate-income households (more than 50% per census tract) and scores low on TCAC's environmental and economic opportunity scores.

Fair housing issue: Persons with disabilities and persons of color are most likely to file complaints of housing discrimination due to discriminatory terms, conditions, privileges, or services and facilities and failure to make reasonable accommodations.

Contributing factors:

- Housing discrimination residents with disabilities and Hispanic households.
- Lack of understanding of reasonable accommodation requirements by landlords and property owners.

The Affirmatively Furthering Fair Housing (AFFH) Action Plan, developed in response to this analysis as well as community input, is included in Appendix D and as Goal 5 in the Housing Element. The AFFH Action Plan details how the city proposes to respond to the factors contributing to the fair housing challenges identified in this analysis. The updated Appendix D includes extensive new narrative on a variety of topics in response to State HCD comments, including more information on the history of the City's development; the prioritization of contributing factors; detail on fair housing legal cases and inquiries; data on changes in racial composition in the City; enhanced discussion of special needs groups; and greater analysis of R/ECAPs and RCAAs.

7. HOUSING PLAN

The City of San Mateo has many positive attributes, especially being a desirable residential community to live in, work, and play in. Thus, one of the City's primary objectives is to expand housing opportunities and increase the diversity of housing supply. There should be a variety of housing types and sizes, a mixture of rental and ownership housing, and housing that supports special needs populations, including single-female heads of household, people with disabilities, those who are unhoused and farmworkers. This variety of housing opportunities will need to accommodate a diverse population, leading to a variety of household sizes, all age groups and a wide range of income levels in order for the City to continue to thrive into the future.

In addition, San Mateo will need to increase its housing supply to meet the housing demand caused by current and future job growth. The types of new housing created should accommodate all income levels consistent with the Regional Housing Needs Allocation. The goals, polices, and actions contained in this Housing Plan support these overarching objectives while also ensuring that the City will meet its statutory obligations, affirmatively further fair housing and facilitate housing production at all income levels.

7.1 Goals, Policies, and Programs Summary

The City has identified five goals to guide the Housing Element's policies and programs. The first three are based upon the "3Ps" framework that seeks to address the region's housing needs through a combination of Production, Preservation and Protection and is endorsed by the Association of Bay Area Governments (ABAG). The fourth goal, or "fourth P," is Promotion of community engagement and public outreach to support social resilience, and the fifth goal is to Affirmatively Further Fair Housing (AFFH). This goal provides a framework for how the City will comprehensively address fair housing issues and meet State law requirements. Many of the policies and programs that support AFFH also support the Housing Element's other goals, which just further highlights how the issue of fair housing is interwoven with achieving the City's larger housing production, preservation, protection and promotion goals.

The first goal, Goal H1, is to facilitate and support the production of new housing at all income levels, but especially affordable housing. <u>Twenty-one</u> policies have been identified to achieve this goal.

- Policy H1.1 Monitor Regional Housing Needs Allocation
- Policy H1.2 Utilize Public Funding for New Affordable Housing
- Policy H1.3 Increase Affordable Housing Production
- Policy H1.4 Incentivize Accessory Dwelling Unit Development
- Policy H1.5 Encourage Family Housing
- Policy H1.6 Streamline Housing Application Review
- Policy H1.7 Update Zoning Code Development Standards
- Policy H1.8 Adopt Objective Design Standards
- Policy H1.9 <u>Establish</u> Minimum Densities for Mixed-Use Projects
- Policy H1.10 Establish By-Right Housing Designation for Prior Housing Sites
- Policy H1.11 Implement the SB 9 Ordinance
- Policy H1.12 Encourage Residential Uses within Housing Overlay
- Policy H1.13 Encourage Development of Missing Middle Housing

- Policy H1.14 Evaluate and Update Special Needs Group Housing Requirements
- Policy H1.15 Evaluate and Update Supportive Housing Requirements
- Policy H1.16 Update Requirements for Mobile Home Parks Requirements
- Policy H1.17 Update Requirements for Farmworker Housing Requirements
- Policy H1.18 Permitting and Development Fee Review
- Policy H1.19 <u>Increase</u> Senior Housing <u>Production</u>
- Policy H1.20 Provide Housing Element to Water and Sewer Providers
- Policy H1.21 Adopt San Mateo General Plan 2040

The second goal, Goal H2, is to preserve existing housing that is affordable to lower- and middle-income residents. Six policies have been identified to support this goal:

- Policy H2.1 Fund Housing Rehabilitation Efforts
- Policy H2.2 Support Retention of Existing Lower Income Units
- Policy H2.3 Increase Energy and Water Efficiency in Existing Units
- Policy H2.4 Implement Capital Improvements in lower-resourced Neighborhoods
- Policy H2.5 Promote Housing Resilience
- Policy H2.6 Require Replacement Units

The third goal, Goal H3, is to protect current residents and prevent displacement. Seven policies have been identified to support this goal:

- Policy H3.1 Prevent Homelessness
- Policy H3.2 Investigate Fair Housing Cases
- Policy H3.3 Evaluate Housing Revenue Sources
- Policy H3.4 Expand Tenant Protections
- Policy H3.5 Study the Creation of Below Market Rate Set Asides
- Policy H3.6 Evaluate Rental Registry Options
- Policy H3.7 Evaluate City Policies and Encourage Collaboration Opportunities for Expanding Homeless Shelters

The fourth goal, Goal H4, is the promotion of social resilience through public education and outreach, which is a priority identified by staff based on community input and feedback. This can be achieved by making information more available and accessible, and conducting targeted outreach to ensure more universal awareness of housing programs and policies. Five policies have been identified to support this goal:

- Policy H4.1 Update the Housing Webpage
- Policy H4.2 Support a Countywide Below Market Rate Unit Waitlist
- Policy H4.3 Expand Community Education and Outreach
- Policy H4.4 Enable Affirmative Marketing
- Policy H4.5 Conduct Outreach to Sites Inventory Property Owners

The fifth goal, Goal H5, is simultaneously the Fair Housing Action Plan, meant to implement the overarching goal of Affirmatively Furthering Fair Housing (AFFH), with many policies overlapping with those in the previous goals. This approach is intentional and meant to reinforce that the objective of that Fair Housing is both enough a stand-alone priority that warrants its own section but decisively inseparable from achieving the main goals of the Housing Element. To address the many fair housing issues that

disparately impact Hispanic, single-female, and disabled households, as identified in the AFFH summary, <u>four</u>teen policies have been identified:

- Policy H5.1.1 Adjust the City's Below Market Rate (inclusionary) program to provide larger density bonuses, and/or increased city support in exchange for affordable units that address the needs of residents with disproportionate housing needs.
- Policy H5.1.2 Participate in a regional down payment assistance program with affirmative marketing to households with disproportionate housing needs including persons with disabilities, single parents, and Hispanic households.
- Policy H5.1.3 Support the design of a regional forgivable loan program for homeowners to construct an ADU that is held affordable for extremely low-income households for 15 years.
- Policy H5.2.1 Add more City supported housing with affordability restrictions in moderate and high resource areas; and affirmatively market the units to households with disproportionate housing needs including persons with disabilities, farmworkers, single-parents, and Hispanic households.
- Policy H5.2.2 Incentivize developers through direct subsidies, fee waivers, and/or density bonuses, to increase accessibility requirements beyond the federal requirement of 5% for subsidized developments.
- Policy H5.2.3 Prioritize City funding proposals for city-funded affordable housing that are committed to serving hard to serve residents.
- Policy H5.3.1 As part of the General Plan Update, conduct an area plan for the North Shoreview and North Central neighborhoods and prioritize land use and design around Highway 101 to improve access and reduce the division of the urban form produced by the highway.
- Policy H5.3.2 Continue to fund minor home repairs and implement a preference for projects in low opportunity census tracts identified in the analysis.
- Policy H5.3.3 Monitor affordable housing projects that are at risk of conversion to market rate; support regional and local efforts to examine displacement of affordable housing and lower income households; and assist with the retention of special needs housing that is at risk of expiring affordability requirements.
- Policy H5.4.1 Establish tenant protections in local ordinance to extend measures of AB 1482 related to relocation, documentation, and right to return policy in eviction cases.
- Policy H5.4.2 Partner with Project Sentinel to perform fair housing training for landlords and tenants; and focus enforcement efforts on race-based discrimination and reasonable accommodations.
- Policy H5.4.3 Create a webpage specific to fair housing including resources for residents who feel they have experienced discrimination, information about filing fair housing complaints with HCD or HUD, and information about protected classes under the Fair Housing Act.
- Policy H5.4.4 Ensure that all multifamily residential developments contain signage to explain the right to request reasonable accommodations for persons with disabilities. Make this information available and clearly transparent on the city's website and fund landlord training and outreach on reasonable accommodations.

• Policy H5.4.5 - Ensure that future improvements in disadvantaged communities will not produce a net loss of affordable housing or the displacement of residents and seek to increase the amount of affordable housing in disadvantaged communities.

To implement each of these policies, the city has identified specific programs and actions, which are outlined in the Implementation Plan (Tables 9, 10, 11, 12 and 13).

7.2 Implementation Plan

7.2.1 GOAL H1: Production of new housing at all income levels, with a focus on affordable housing

The need for additional affordable housing was the most prominent and pervasive sentiment noted throughout the Housing Element outreach process. Households of various sizes and socioeconomic backgrounds have reported feeling the pressure of the high costs of housing. To meet the targets set by RHNA, the city must facilitate the production of abundant and affordable new housing in a wide diversity of forms. To support this goal, the city will be employing two approaches, with the first being directly involved in housing production. This can be done by utilizing public funds to build more units, partnering with nonprofits and other groups to <u>support the production of all types of housing</u>, including ADUs, and using local ordinances to require that developers create more affordable units that can serve a diverse variety of populations and providing incentives for additional affordable unit development. In addition, the policies outlined below would encourage and streamline housing development through the adoption of objective design standards, updates to the Zoning Code, creating minimum densities for housing projects, developing policies for missing middle housing, and streamlining the application review and processing timelines for affordable development projects. And, to address the housing constraint associated with the growth limits imposed by Measure Y, there is a policy to support adoption of the General Plan Update which is facilitating a community conversation about Measure Y and building consensus about a path forward for updating the growth limits.

Table 9: Goal H1: Production - Implementation Plan

Number	Policy	Lead Agency/Department/Division	Funding Source(s)	Program Measure(s)	Implementation Action(s)	Target Timeline	New/Existing Program
Policy H 1.1	Monitor Regional Housing Needs Allocation	Housing Division	N/A	Monitor housing production against ABAG Fair Share Allocation in compliance with no net loss requirements during planning period.	Provide an annual report on housing production to the City Council each March, prior to submittal of the Annual Progress Report to HCD by April 1 st . <u>The report will include</u> an assessment on the City's RHNA progress and, as <u>needed</u> , identify additional sites to ensure ongoing <u>compliance with "no net loss" provisions of State law.</u>	2023 – 2031 (Annually)	Existing
Policy H 1.2	Utilize Public Funding for New Affordable Housing	City of San Mateo	City funds and state, and federal funds, as available	Produce City supported housing projects with affordability restrictions utilizing local public funds; and use this funding to leverage other regional, state, and federal funding sources to increase the number of affordable housing units developed in each project.	revenues from former RDA areas (aka "Boomerang Funds"), as well as the Affordable Housing Commercial Linkage Fee Fund to use for affordable housing	a) 2023 - 2031 (Ongoing) b) 2024 - 2025 c) 2023 - 2031 (Ongoing)	Existing New New

Number	Policy	Lead Agency/Department/Division	Funding Source(s)	Program Measure(s)	Implementation Action(s)	Target Timeline	New/Existing Program
Policy H 1.3	Increase <u>Affordable Housing</u> Production .through Inclusionary Housing, Density Bonus, and Community Benefit Programs	Community Development Department	N/A	Update the City's Inclusionary <u>Housing</u> requirements for ownership and rental residential developments to allow for alternative compliance options other than on-site construction and to establish an updated Density Bonus/Community Benefits program that incentivizes production of additional affordable units.	 a) Amend the Affordable Housing Ordinance (SMMC Chapter 27.16.050) and Inclusionary <u>Housing</u> Policy to allow for alternative compliance options to onsite inclusionary unit development within one year of Housing Element adoption. b) Adopt an updated <u>Density Bonus/Community Benefits</u> program that provides additional incentives and/or streamlining options for housing projects that provide additional affordable units <u>or the most needed unit</u> <u>types</u> beyond minimum state requirements. <u>Both of these actions would include an assessment of applicable state law to ensure that the City meets or exceeds all requirements.</u> This item is connected to Policy H5.1.1 and <u>H</u>5.2.2. 	a) 2023 – 2024 b) 2024 – 2025	New New
Policy H1.4	Incentivize Accessory Dwelling Unit Development	Planning Division	N/A	Implement and maintain programs to encourage and support ADU production to increase lower income housing opportunities.	 a) Amend the City's ADU Ordinance (SMMC Chapter 27.19) to align with current State law and to resolve any inconsistencies identified by HCD. b) Maintain and expand the ADU information and resources available to home owners and applicants provided on the City's website. b)C Collaborate with 21 Elements and other countywide jurisdictions to collaborate on ways to enhance available ADU resources, establish uniform standards and requirements, and effective ways to monitor ADU affordability. c)C Continue to offer flat fees for ADU building permits, and requirements, and effective ways to monitor ADU affordability. c)d) Continue to offer flat fees for ADU building permits, and requirements and encessary to reduce cost barriers. d)e) Provide an annual report on ADU permitting data to verify that Housing Element production targets are being achieved. If ADU production targets are not achieved for two consecutive years, then, within six months, pursue additional actions, including fee reductions, increased homeowner resources and assistance, funding assistance and/or code amendments, to incentivize ADU production. This item is connected to Policy H-5.1.3. 	a) 2023 – 2024 b) 2023 – 2031 (Ongoing) c) 2023 – 2031 (Ongoing) d) 2023 – 2031 (Ongoing) () e) 2023 – 2031 (Annually)	New Existing Existing New

CITY OF SAN MATEO 2031 HOUSING ELEMENT

Number	Policy	Lead Agency/Department/Division	Funding Source(s)	Program Measure(s)	Implementation Action(s)	Target Timeline	New/Existing Program
Policy H1.5	Encourage Family Housing	Planning Division	N/A	Prioritize acquisition and new construction of housing that accommodates families (larger units) when possible and require subsidized projects to include family-sized units.	 a) Present options to City Council for requiring a minimum percentage of three-bedroom units in City subsidized projects; b) Present options to City Council for requiring a minimum percentage of family-sized units in private development projects as part of the Inclusionary Policy update. a) Should such policy recommendations not materialize into code amendments, explore alternative methods to promote family sized units through the community benefits program. This item is connected to Policy H5.1.1 and H5.2.3. 	a. 2025 – 2026 b) 2023 – 2025 a)c) 2025 – 2026	New <u>New</u> <u>New</u>
Policy H 1.6	Streamline Housing Application Review- including for Design Review	Community Development Department	N/A	Reduce the development review timeline for housing projects by streamlining the development review process and simplifying <u>design review and</u> submittal requirements.	 a) Update the City Council resolutions that establish the pre-application and development review processes to simplify and streamline requirements. b) Update permit application submittal requirements. c) Develop Zoning Code amendments to align City requirements with SB 330 and make a recommendation to the City Council. c) Streamline the Design Review process for residential and mixed-use projects to either increase the threshold for review or completely eliminate the third-party design review requirement. 	a) 2023 - 2024 b) <u>2024 - 2025</u> c) <u>2024 - 2025</u> d) 2024 - <u>2025</u>	New New <u>New</u>
Policy H 1.7	Update Zoning Code Development Standards relating to floor area ratios and parking requirements	Planning Division	N/A	Evaluate Zoning Code development standards that apply to multi-family residential projects to reduce or eliminate constraints, incentivize production of additional housing units and support development of a variety of housing types.	 a) Evaluate the standards and requirements in all zone districts that allow for multi-family residential and Aamend the Zoning Code as needed to reduce or eliminate constraints to housing construction. Specifically: 1) Exclude covered parking and other elements as needed from Floor Area Ratio [FAR] calculation for housing projects with affordable units, 2) Specify where Single-Room Occupancy (SRO) units are permitted consistent with government Code 65583(c)(1), and 3) specify that Manufactured Homess that are built on a permanent foundation are subject to the same zoning requirements and development standards as single-family homes. b) Evaluate off-street parking requirements for multifamily and mixed-use development projects in and amend SMMC Chapter 27.64 (Off-Street Parking) to remove any requirements that are identified as a constraint. 	a) 2024 – 2025 b) 2025 – 2026	New <u>New</u>
Policy H1.8	Adopt Objective Design Standards	Planning Division	N/A	Adopt Objective Design Standards to expedite production of housing.	Adopt Objective Design Standards for multi-family residential projects and mixed-use projects with a residential component.	2023 – 2024	New

Number	Policy	Lead Agency/Department/Division	Funding Source(s)	Program Measure(s)	Implementation Action(s)	Target Timeline	New/Existing Program
Policy H 1.9	Establish Minimum Densities for Mixed-Use Residential Projects	Planning Division	N/A	Create minimum residential density requirements to ensure mixed-use development will contain an appropriate amount of housing in commercial/office developments.	 a) Amend the Zoning Code to establish a minimum residential density for mixed-use projects that include a residential component. b) Study and present to City Council options for requiring a residential component in all mixed-use projects in certain zones or areas. 	a) 2023 – 2024 b) 2023 – 2024	New New
Policy H1.10	Establish By-Right Housing Designation for Prior Housing Sites	Planning Division	N/A	Designate housing sites that have carried over from the prior Housing Element to allow housing development by-right.	Amend the Zoning Code to establish a By-Right designation for housing sites reused from prior Housing Elements for housing projects that propose a minimum of 20% affordable units. Zoning for these sites must be at least 30 units/acre to meet default density requirements for lower- income households per Gov. Code Section 65583.2 [©] (c).	2024 – 2025 (must be completed within three years of certification)	New
Policy H 1.11	Implement the SB 9 Ordinance	Planning Division	N/A	Implement the Zoning Code to allow duplexes and lot splits on appropriate single-family sites consistent with SB 9.	Implement the City's ordinance amendments adopted in September 2022 to implement the provisions of SB 9 in single-family zones (R1).	202 <u>3 – 2031 (ongoing)</u>	New
Policy H1.12	Encourage Residential Uses within Housing Overlay	Planning Division	N/A	Amend Housing Overlay to encourage residential projects in commercial zones (not just mixed-use).	Amend Housing Overlay Ordinance to allow multi-family housing as a permitted use in <u>the C1, C2 and C3 Zoning</u> Districts.	<u>2024 – 2025</u>	New
Policy H1.13	Encourage Development of Missing Middle Housing by removing zoning constraints and exploring SB 10	Planning Division	N/A	Support small infill residential construction (Missing Middle, 4-10 units) through policy updates and <u>Zoning Code</u> amendments.	 a) Evaluate residential zoning districts that have sites with potential for Missing Middle Housing (R2, R3 and R4 zones) and identify development standards that create barriers for small-scale development, including minimum lot size, setbacks, floor area ratio, parking and open space requirements, and amend the Zoning Code to reduce or eliminate any identified constraints. b) Research and evaluate policies and code amendments to allow for Missing Middle housing under SB 10 and schedule for City Council consideration and adoption. 	a) 2025 – 2026 b) 2025 – 2026	New New

Number	Policy	Lead Agency/Department/Division	Funding Source(s)	Program Measure(s)	Implementation Action(s)	Target Timeline	New/Existing Program
Policy H1.14	Evaluate and -Update Special Needs Group Housing Requirements	Planning Division	N/A	Research current code requirement regarding special needs group homes for people with disabilities for consistency with Fair Housing Requirements.	 a) Review and amend the Zoning Code to allow group homes and residential care facilities for seniors and non-seniors (including persons with disabilities) in all residential zones, only subject to those objective standards that apply to other residential uses of the same type in the same zone in conformance with state law. b) Review and amend the Zoning Code definition for family, and other related regulations, to ensure consistency with State and Federal fair housing laws related to persons with disabilities. This effort may also include consideration of new definitions such as single-unit and multi-unit dwellings to accommodate various housing situations. c) Study best practices and develop a universal design ordinance that may better address housing needs for persons with disabilities. This item is connected to Policy H5.1.1 and H5.2.3 	a) 2024 <u>- 2025</u> b) 2024 <u>- 2025</u> a)c) 2026 <u>- 2027</u>	New
Policy H1.15	Evaluate and Update Supportive Housing Requirements	Planning Division	N/A	Review and amend zoning code regarding multi-family housing development.			New
Policy H1.16	Update Mobile Home Parks <u>Requirements</u>	Planning Division	N/A	Amend zoning code requirements regarding mobile home parks.	Amend the Zoning Code to allow mobile home parks as a special use in all residential zones to be consistent with Government Code Section 65852.7	<u>2024</u> – <u>2025</u>	New
Policy H1.17	Update Farmworker Housing <u>Requirements</u>	Planning Division	N/A	Amend zoning code requirements regarding farmworker housing.	Amend the Zoning Code to define and allow farmworker housing within the Agricultural District consistent with <u>Government Code Section 17021.6.</u>	<u>2024 – 2025</u>	New
Policy H1.18	Permitting and Development Fee Review	Community Development Department	N/A	Regularly review development application, building permit and impact fees to identify opportunities to reduce per unit costs for housing developments, with a focus on reducing per unit costs for small multi-family projects (Missing Middle).	 a) Study cumulative permit fee costs for new housing development of various sizes and use information to identify <u>opportunities to</u> reduce per unit permitting costs; with fee reductions for small multi-family projects being prioritized. <u>Present findings to the City Council with recommendations for adoption.</u> b) Conduct a comprehensive review and update of the fee schedule every 5-<u>6</u> years, with a focus on evaluating and adjusting fees with potential barriers to housing production. <u>Next review will be conducted in 2026 (last fee study completed in 2021).</u> 	a) 2024 - 2025 b) 2023 - 2031 (Ongoing)	New New

Number	Policy	Lead Agency/Department/Division	Funding Source(s)	Program Measure(s)	Implementation Action(s)	Target Timeline	New/Existing Program
Policy H1.19	Increase Senior Housing Production	Community Development Department	N/A	Evaluate potential policies and code amendments to support the production of housing for seniors.	Evaluate code amendments and/or policies to encourage and support the development of senior housing, <u>including</u> <u>through shared- housing arrangements, community care</u> <u>facilities, supportive housing, and assisted living for</u> <u>seniors</u> , and make a recommendation to the City Council.	2029 – 2030	New
Policy H1.20	Provide Housing Element to Water and Sewer Providers	<u>Community Development</u> <u>Department</u>	<u>N/A</u>	All City water and sewer providers shall promptly receive amendments to Housing Element, per Government Code Section 65589.7.	 a) Deliver the adopted Housing Element to local water providers, California Water Company and Estero Municipal Improvement District, and the local sewer provider, City of San Mateo, within one month of adoption. b) Work with California Water Company and Estero Municipal Improvement District to establish procedures to prioritize water service connections to developments with affordable housing units. Note: Action b) does not apply to the City's sewer service provider since improvements to the wastewater treatment plant ensure that there is sufficient capacity for all new development through 2031, and beyond, so prioritization of service connections is not necessary. 	<u>a) 2023</u> <u>b) 2023 – 2031</u> (Ongoing)	<u>New</u> <u>New</u>
Policy H1.21	<u>Adopt San Mateo General</u> <u>Plan 2040</u>	<u>Community Development</u> <u>Department</u>	<u>N/A</u>	Adopt a General Plan Update that provides sufficient development capacity to meet the City's housing needs through 2040.	Complete the General Plan Update process and present final draft to the City Council for adoption. The GPU will include an approach to address all components of the GPU that exceed the growth limits set by Measure Y.	<u>2023 – 2024</u>	Existing

7.2.2 GOAL H2: Preservation of existing housing that is affordable to lower- and middle-income residents

As the City continues to grow, it remains important to maintain and preserve existing affordable housing as well as non-deed restricted housing that is naturally affordable for middle and lower-income households. The most direct method of achieving this goal would be to prevent the conversion of existing affordable units from becoming market rate by renegotiating agreements, using public funds to acquire the units, or requiring developers to replace any lost units. Alternatively, the city can indirectly preserve affordable housing by improving the quality of life for individuals and families who currently reside in them. Residents that are able to thrive in low-income housing are less likely to be displaced. Therefore, the city proposes to incentivize upgrades to low-income homes through rehabilitation, accessibility modifications, or energy efficiency changes. In addition, enhancements to low-income neighborhoods can also be achieved through capital improvements and resiliency projects that protect against threats posed by climate change.

Table 10: Goal H2: Preservation - Implementation Plan

Number	Policy	Lead Agency/Department/Division	Funding Source(s)	Program Measure(s)	Implementation Action(s)	Target Timeline	New/Existing Program
Policy H2.1	Fund Housing Rehabilitation Efforts	Housing Division	CDBG/CALHome	 a) Fund minor home repairs and accessibility improvements b) Provide opportunity for home rehabilitation loans for low- income residents. c) Allow accessibility improvements on rental properties with owner permission. 	 a) Complete annual goals of 10 minor home repairs and 14 accessibility modifications through grants for low-income residents. b) Provide home rehabilitation loans for low-income residents up to a total of approximately \$500,000 available. c) Affirmatively market the availability of these funds to both homeowners and renters to increase awareness. Marketing efforts include translating flyers into Spanish and distributing flyers to various locations throughout the City, including libraries, senior and community centers and non-profit agencies. <u>Outreach will be conducted biannually.</u> This item is connected to Policy H5.3.2. 	2023 - 2031 (Annually by June 30)	Existing Existing New
Policy H2.2	Support Retention of Existing Lower Income Units	Housing Division	TBD (potential sources include: PLHA)	 a) Identify funding source for preservation b) Monitor affordable housing projects that are at risk of conversion to market rate. c) Support regional and local efforts to examine displacement of affordable housing and lower income households. d) Assist with the retention of special needs housing that is at risk of expiring affordability requirements. 	Bridgepointe Condominiums affordability requirements for 59 affordable units expire in 2027, out of which 24 are very low-income units (35 are at 120% AMI). Belmont Building affordability requirements for 6 units expire in 2032. The rental property is owned by a for-profit entity, potential for loss of units is high. Proactively coordinate with owners to preserve the 24 very low-income units as affordable, including identifying potential funding sources, advertise conversion units to non-profits, conduct tenant outreach and education, add a displacement preference for new affordable housing for people displaced, including those displaced as a result of conversion. Outreach and negotiate with owners for affordability extensions. <u>Provide noticing to tenants and affected public entities in accordance with Gov. Code, § 65863.10, 65863.11, and 65863.13 This item is connected to Policy H-5.3.3.</u>	a) 2025-2027 (Bridgepointe Condominiums) b) 2030-2032 (Belmont Building)	New New
Policy H2.3	Increase Energy and Water Efficiency in Existing Units	Community Development Department, City Manager's Office	CDBG/City Funds	Increase energy and water efficiency in all existing residential units. Fund weatherization upgrades for low- and moderate- income homeowners.	 a) Complete seven weatherization upgrades through grants for low-income residents annually. b) Implement energy-efficiency and electrification strategies identified in the City's Climate Action Plan through updates to the City's Reach Codes as part of the building permit review process. <u>Outreach will be conducted biannually.</u> This item is connected to Policy H5.3.2. 	 a) 2023 - 2031 (Annually, June 30) b) Reach codes are updated every three years. 	Existing New

Number	Policy	Lead Agency/Department/Division	Funding Source(s)	Program Measure(s)	Implementation Action(s)	Target Timeline	New/Existing Program
Policy H2.4	Implement Capital Improvements in Lower- <u>Resourced</u> Neighborhoods	Housing Division	CDBG	Invest more resources in lower resource neighborhoods (utilize federal CDBG to provide capital improvements).	Use available CDBG funds to make CIP improvements in <u>identified Equity</u> <u>Priority N</u> eighborhoods (<u>including</u> North Central and North Shoreview neighborhoods). <u>Potential improvements may include: street work, crosswalk</u> <u>implementation</u> , ADA ramp installation, striping, sidewalk improvements. <u>traffic signal replacement</u> , and other pedestrian/bicycle enhancements. Allocate available CDBG funds on an annual basis. Implement Bike Master Plan and Pedestrian Master Plan through capital improvements in <u>Equity Priority N</u> eighborhoods. <u>Conduct proactive public outreach to identify and prioritize capital</u> <u>improvements that best align with a neighborhood's most critical needs.</u>	2023 - 2031 (Annually)	Existing
Policy H2.5	Promote Housing Resilience	Public Works Department	City Funds	Use resources to protect housing at risk of damage due to changing environmental conditions.	Provide Flood Improvements for the North Shoreview neighborhood through the levee project with Public Works.	Started in Fall 2020, with completion anticipated in Spring 2023	Existing
Policy H2.6	Require Replacement Units	Planning Division	N/A	Require equivalent replacement units for all housing units lost during any construction or demolition projects (Housing Crisis Act).	 a) Conduct a study to determine whether the City should update the zoning ordinance and other policies to permanently require replacement of units (beyond Housing Crisis Act sunset date of 2034). This action must be completed within three years from the start of the planning period. a) The City will require replacement housing units subject to the requirements of Government Code Section 65915(c)(3), when a development project or demolition occurs on sites with existing residential units that are restricted or have been occupied by a lower income household in the past five years. 	a) 2024-2026 b) Effective Immediately	New <u>New</u>

7.2.3 GOAL H3: Protection of current residents to prevent displacement

San Mateo's demographics will fluctuate as the city continues to grow and evolve. But while change is inevitable, the loss of the existing community is not. Therefore, it remains a priority for the city to prevent gentrification and displacement through protection of lower-income residents. Policy tools included within this goal such as commercial linkage fees, relocation fees, documentation requirements for landlords, and right to return policies help balance the scales against the market forces that lead to displacement while extending vital tenant protections. Programs are included to address homelessness and increase shelter capacity that can protect housing insecure individuals and families from having to leave the City entirely. These programs allow service providers an opportunity to intervene and lead clients to housing stability. The City also proactively affirms its commitment to combat inequities in housing that exist across people of protected classes through affirmative marketing, prioritizing special needs tenants in below market rate units, establishing a rental registry to monitor trends in evictions, and undertaking several actions to affirmatively further fair housing.

Lead New/Existing Funding Number Policy Program Measure(s) Implementation Action(s) **Target Timeline** Agency/Department/Division Source(s) Program Policy Prevent Housing Division CDBG/PLHA/City Support where feasible programs and facilities to a) Allocate PLHA, CDBG, and other local funds to support homeless a) 2023 – 2031 Existing H3.1 Homelessness prevent homelessness through city actions, while prevention these may include the following programs: LifeMoves Rapid (Annually by June New coordinating with County and Continuum of Care. Rehousing Program, Safe Harbor Shelter, Vendome Hotel supportive 30) units, LifeMoves First Step for Housing program, HIP Housing home b) 2023 – 2031 sharing and Montara assisted units for the formerly homeless. (Annually) b) Support the County in its efforts to convert the Stone Villa Hotel into a 44-room temporary shelter space as part of the Project Homekey programs. Policy Investigate Fair Housing Division CDBG Continue funding and support for outreach services As CDBG funding permits, achieve the Annual Fair Housing Activity Goals: 2023 - 2031 (Annually Existing H3.2 Housing Cases for homeowners and renters at risk of being by June 30) Investigate at least 18 cases: displaced and/or facing fair housing challenges. Provide consultation to at least 30 individuals: Public Education/Outreach to at least 26 individuals; and . ٠ Provide legal assistance to at least 185 renters. These numbers are subject to change based on funding availability. See Goal H5/AFFH Action Plan for full list of items. Policy **Evaluate Housing** Community Development N/A a) Conduct a feasibility study to determine a potential a) Conduct a feasibility study on increasing the fee to generate additional a) 2025 - 2026 New H3.3 **Revenue Sources** Department increase of the Commercial Linkage Fee to ensure housing funds gathered from commercial development, analyze the b) 2023 - 2031 New commensurate housing funding with commercial study, conduct community outreach and make a recommendation to (Annually, as the City Council. Regional opportunities and coordinate with City partners, including non-profit and Local funding opportunities for affordable housing developers on how best to leverage these resources. housing and determining how to leverage these funds to build or rehabilitate more affordable housing. Policy Expand Tenant **Community Development** N/A Expand tenant protections in local ordinance to a) Extend AB1482 provisions to require tenant relocation payments for a) 2023 – 2024 New H3.4 Protections Department extend measures of AB1482 related to relocation, No Fault evictions for those with tenure less than one year. b) 2025 – 2026 New documentation, and right to return policy in eviction b) Make recommendations to the City Council for establishing tenant c) 2023 – 2024 New cases. protection policies that include the requirement of documentation c)d) 2023 – 2031 New (biannually) from landlords who use the substantial remodel exemption to evict tenants and a Right to Return policy for tenants displaced from homes due to demolition or substantial remodels. c) Amend the Code to strengthen enforcement penalty structure to aid in protecting tenants from unsafe or substandard units. eld) Conduct outreach to the community on a biannual basis. This item is connected to Policy H5.4.1.

Table 11: Goal H3: Protection - Implementation Plan

Number	Policy	Lead Agency/Department/Division	Funding Source(s)	Program Measure(s)	Implementation Action(s)	Target Timeline	New/Existing Program
Policy H3.5	Study the Creation of Below Market Rate Set Asides	Community Development Department	N/A	Examine the feasibility of establishing priority allocation for households with special needs and large families in City-assisted and private development projects with BMR units.	Conduct a best practices research on prioritization of households with special needs and large families. <u>Analyze the data, conduct community outreach and make recommendations to the City Council. Proceed as directed by Council.</u>	2025 – 2026	New
Policy H3.6	<u>Evaluate</u> Rental Registry Option <u>s</u>	Community Development Department	N/A	Explore a rental registry to track rents and evictions citywide.	Research options and best practices for a rental registry list, including determining necessary financial and human resources needed to establish such a program. Make recommendations to City Council.	2023 - 2024	New
Policy H 3.7	Evaluate Opportunities for Expanding Homeless Shelters	Community Development Department	N/A	Examine best practices and policies to expand shelter capacity for individuals experiencing homelessness. Study feasibility of new shelter programs and collaborate with the County to end homelessness.	 a) Study best practices for expansion of homeless shelter sites. b) Regularly evaluate zoning to ensure enough sites are available to accommodate the capacity for emergency shelters, based on the countywide Point in Time Homeless Count. c) Review and amend the zoning code to allow emergency shelters in C2, C3, and other zones as needed to ensure there is sufficient capacity on available sites to accommodate the need for emergency shelter as identified in the most recent point-in-time count conducted before the start of the planning period, in compliance with Government Code 65583. b)d) Review and amend the zoning code as needed to comply with Government Code 65583 including to remove the 300 feet buffer from a single-family dwelling, clarify that emergency shelters are not required to be more than 300 feet apart and adopt objective development standards, such as parking for shelters in compliance with Government Code Section 65583(4)(4)(A)(ii). c) Review and amend the zoning code as needed to comply with requirements of AB 101 (2019) to allow Low Barrier Navigation Centers (LBNC) as a permitted use by right in areas zoned for mixed use and nonresidential zones permiting (by right or through a Special Use Permit) multifamily uses if it meets specific requirements in Government Code section 655680 – 65668. 	a) 2023 - 2031 (Ongoing) b) 2023 - 2031 (Ongoing) c) 2023-2031 (Ongoing) d) 2023-2025 c)e) 2023-2025	New New <u>New</u> <u>New</u>

7.2.4 GOAL H4: Promotion of community engagement and public outreach

To increase effectiveness and successfully achieve the Housing Element's goals and policies, the City should increase access and awareness of housing programs through use of new technology as part of a robust and proactive public outreach strategy. By expanding availability of digital resources, the barriers of proximity, transportation, and time opportunity cost can be reduced for many. In addition, by providing education and information on regulatory requirements and specific programs and protections offered locally, regionally, and by the state, the city can improve access to housing for all income groups and special needs communities. Public outreach in a diversity of methods, forms and languages can be used to reach the widest breadth of residents and program beneficiaries to ensure those in need can find supportive programs and service providers. Targeted digital, print, and in-person outreach and engagement methods can also be effective at reaching the communities most affected by housing policies and programs.

Table 12: Goal H4: Promotion - Implementation Plan

Number	Policy	Lead Agency/Department/Division	Funding Source(s)	Program Measure(s)	Implementation Action(s)	Target Timeline	New/Existing Program
Policy H4.1	Update the Housing Webpage	Housing Division	N/A	Increase community outreach and availability of resources in multiple languages through the Housing Webpage.	 a) Maintain and improve webpage with comprehensive housing related information and materials, and coordinate with providers to market programs electronically. b) Provide information in multiple languages using common terms. This item is connected to Policy H5.4.3. 	2023 - 2031 (Ongoing)	Existing New
Policy H4.2	Support a Countywide Below Market Rate Unit Waitlist	County of San Mateo	N/A	Support development of the countywide affordable rental waitlist to streamline and centralize occupancy of BMR units by joining the <u>County's waiting list process</u> -	Support the county's online portal for a BMR waitlist <u>by transitioning the</u> <u>City's BMR waiting list to the Countywide system. In addition, work with</u> <u>BMR property managers/owners to advertise available BMR units on the</u> <u>County's portal to streamline the rental process.</u>	2023 – 2024 <u>(Transition to</u> <u>Countywide</u> <u>portal</u>) (and ongoing)	Existing
Policy H4.3	Expand Community Education and Outreach	Community Development Department	N/A	Support and engage in efforts to educate community stakeholders and residents, including those with special needs (such as farmworkers, people with disabilities including those with developmental disability, and single-female head of household), about housing gaps and the effects of programs and policies on addressing those gaps. Proactively create opportunities for all communities to have a voice and be involved in shaping policies and programs.	 a) Housing initiatives and policy implementation shall be supported with robust and adaptive community engagement including surveys, workshops, pop-up events, mailings, and targeted outreach to underrepresented groups. <u>Outreach will be conducted biannually</u>. b) Continue to participate in Countywide (and other) efforts to share best practices on equitable engagement and inclusive outreach. (e.g. Home For All "Learning Network") c) Actively provide information on County and State resources for tenant protections, discriminatory practices (CC&R's), special needs groups, and households with disproportionate housing needs. 	2023 - 2031 (Ongoing)	Existing New New
Policy H4.4	Enable Affirmative Marketing	Housing Division	N/A	Develop Marketing Plan with developers of affordable housing projects during final phase of construction <u>on a project-by-project</u> <u>basis</u> . Conduct focused outreach to the owners of properties on the Sites Inventory to determine interest in redevelopment or construction of additional housing on their site(s). The outreach shall include provision of information on the City's development process, fees, and timelines associated with such applications. Initial outreach shall be conducted within two years of adoption and shall be ongoing throughout the housing cycle.	<u>2023 – 2031</u> (ongoing)	<u>New</u>

7.2.5 Goal H5: Affirmatively Furthering Fair Housing

To reinforce the objective that AFFH is a top priority for the city, an AFFH Fair Housing Action Plan with programs and actions has been included as the fifth goal of the Housing Element. This Action Plan cross references items that are interwoven with the Housing Plan's other four goals, policies, and programs. The actions to achieve the Fair Housing goal are meant to address the fair housing issues found in the AFFH analysis, specifically for groups that have disparate housing impacts when compared to the whole of San Mateo. This includes, for example, Hispanic and single-female heads of households who have disproportionate housing needs while being concentrated in census tracts that have high rates of poverty. Persons with disabilities are also more likely to experience housing discrimination due to low economic opportunity and failure of landlords to provide reasonable accommodations. Each of the actions identified in Table 13 have specific quantified objectives to reach the target households.

Table 13: Goal H5: AFFH - Implementation Plan

Actions	Fair Housing Issues	Contributing Factors	Fair Housing Category	Action	Type of Action	Responsible Party	Objectives	Quantified Objectives	Timeline
Action Area 1. Enhancing housing mo		-							
Policy <u>H</u> 5.1.1: Adjust the city's Below Market Rate (inclusionary) program to provide larger density bonuses, and/or increased City support in exchange for affordable units that address the needs of residents with disproportionate housing needs (e.g., accessible/visit able units for persons with disabilities, child- friendly developments with day care on site for single parents, and 3-4 bedroom units for larger families).	Hispanic and single female parent households are concentrated in low opportunity census tracts.	Lack of affordable housing in high opportunity areas; Lack of accessible affordable units	Disparities in access to opportunities	Assist in development of housing for low- income households and households with special needs	Land use resources	City of San Mateo	Expand the variety of housing units produced under the inclusionary housing program. Currently developments of 11 or more units require 15% affordable to moderate income families for ownership and 15% for low -income families for renters.	Perform a feasibility analysis to redesign the program to allow a menu of options. Ensure analysis includes review housing for households with disproportionate housing needs, along with income levels. This item is connected to Policy H 1.3, Policy H 1.5., Policy H 1.14, and Policy H 1.15.	Complete feasibility analysis by Fall 2023; Implement redesigned program by Spring 2024.
Policy <u>H</u> 5.1.2: Participate in a regional down payment assistance program with affirmative marketing to households with disproportionate housing needs including persons with disabilities, single parents, and Hispanic households (e.g., Spanish and English, targeted to northeast neighborhoods).	Hispanic households have disproportionate housing needs.	Historic discrimination and continued mortgage denials; Concentration in low opportunity census tracts; High housing costs and low wages	Disparities in access to opportunities	Promote equal housing opportunity	Financial resources	Regional Partnership with HEART (San Mateo County has program with them)	Improve accessibility to home mortgage loans for Hispanic households who have the highest loan denial rates. Provide wealth building through homeownership for moderate income households.	Affirmatively market down payment assistance to 20 Hispanic households; Provide down payment assistance to 30 total households; Provide homebuyer education to 200 households. In addition, the City will work with other jurisdictions to conduct outreach and education. Ensure that programs target/affirmatively market to households in impacted neighborhoods, including North Central and North Shoreview, among others This item is connected to Policy H 4.4.	Meet quantified objectives by the end of the Housing Element period in 2031; Conduct homebuyer/outreach and education quarterly in partnership with HEART
Policy <u>H</u> 5.1.3: Support the design of a regional forgivable loan program for homeowners to construct an ADU that is held affordable for extremely low-income households for 15 years. Action Area 2. Encouraging new hous	Hispanic and single female parent households are concentrated in low opportunity census tracts.	Lack of affordable housing in high opportunity areas; Lack of accessible affordable units	Disparities in access to opportunities	Incentivize accessory dwelling units (ADUs)	Land use resources	21 Elements/HEART	Increase opportunities for lower-income households to find housing that is affordable.	Design a regional loan forgiveness program. Ensure that programs target/affirmatively market to households in impacted neighborhoods, including North Central and North Shoreview, among others. Target those with disproportionate housing needs, with a goal to reach 5 households annually. This item is connected to Policy H1.4.	Begin design in Summer 2025 and complete by winter 2026.

Actions	Fair Housing Issues	Contributing Factors	Fair Housing Category	Action	Type of Action	Responsible Party	Objectives	Quantified Objectives	Timeline
ry <u>H</u> 5.2.1: Add more city ported housing with affordability rictions in moderate and high urce areas. Affirmatively market nousing to households with roportionate housing needs iding persons with disabilities, workers, single parents, and anic households (e.g., Spanish English, targeted to northeast hborhoods).	Hispanic and single female parent households are concentrated in low opportunity census tracts.	Lack of affordable housing in high opportunity areas; Lack of accessible affordable units; Concentration of Naturally Occurring Affordable Housing (NOAH) in low opportunity census tracts.	Disproportionate housing need for low-income households and protected classes	Assist in development of housing for low- income households and households with special needs	Financial resources	City of San Mateo	Affirmatively market the housing to households with disproportionate housing needs including persons with disabilities, single parents, farmworkers, and Hispanic households (e.g., Spanish and English, targeted identified neighborhoods).	Require developers to affirmatively market 1,000 units to those with disproportionate housing needs over the eight-year period (approximately 125 annually). <u>Ensure that programs</u> <u>target/affirmatively market to</u> households with disproportionate housing needs. Continue to update the housing inventory and provide on the <u>City's website so that developers can</u> <u>target housing in moderate and high</u> <u>opportunity areas</u> . This item is connected to Policy H1.2. and Policy H-4.4.	2023 - 2031 (Annually); as development projects come i for approvals/financing
licy H5.2.2: Incentivize developers ough direct subsidies, fee ivers, and/or density bonuses, to rease accessibility requirements yond the federal requirement of for subsidized developments.	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts.	Disproportionate housing need for low-income households and protected classes	Promote equal housing opportunity	Financial resources	City of San Mateo	Increase development of accessible units beyond minimum requirements	 a. <u>Update</u> develop<u>ment</u> agreements <u>for</u> projects with City subsidies to include additional accessible units. b. <u>Update the City's Inclusionary</u> Housing Policy to require projects that receive City subsidies to increase the percentage of units that meet accessibility requirements. This item is connected to Policy H1.3 	2023 - 2031 (ongoing) as development opportunities come available. 2025 - 2026 Update Inclusionary Housing Policy; make recommendations to City Council in 2025 - 2026
icy H5.2.3: Prioritize city funding posals for city funded affordable using that are committed to ving hard to serve residents (e.g., remely low income, special eds, on site services)	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts.	Disparities in access to opportunity	Promote equal housing opportunity	Financial resources	City of San Mateo	Create more housing for hard to serve households.	Conduct a best practices review and develop a program to prioritize City funding for housing projects. This item is connected to Policy H1.5, Policy H1.14, and Policy H1.15.	2027 - 2028 Conduct <u>a review</u> of best practices <u>and</u> develop a program for City Council <u>adoption</u>

concentrated poverty.

Actions	Fair Housing Issues	Contributing Factors	Fair Housing Category	Action	Type of Action	Responsible Party	Objectives	Quantified Objectives	Timeline
Policy <u>H5.3.1</u> : As part of the General Plan, conduct an area plan for the North Shoreview and North Central neighborhoods and prioritize land use and design around Highway 101 to improve access and reduce the division of the urban form produced by the highway.	Hispanic and single female parent households are concentrated in low opportunity census tracts.	Lack of affordable housing in high opportunity areas; Lack of accessible affordable units; Concentration of NOAH in low opportunity census tracts.	Segregation/ integration patterns; disparities in access to opportunities	Conserve and improve the existing affordable housing stock	Land use resources	City of San Mateo	Reduce overcrowding, improve health and safety, and improve mobility and access to services in impacted neighborhoods.	Prepare an area plan for North Shoreview and North Central neighborhoods.	Create plan through the General Plan Update implementation process (2027 - 2029)
Policy <u>H</u> 5.3.2: Continue to fund minor home repairs and implement a preference for projects in low opportunity census tracts identified in the analysis.	Hispanic and single female parent households are concentrated in low opportunity census tracts.	Lack of affordable housing in high opportunity areas; Lack of accessible affordable units	Disparities in access to opportunity	Conserve and improve the existing affordable housing stock	Financial resources	City of San Mateo	Fund minor home repairs and accessibility improvements. Provide opportunity for home rehabilitation loans for low- income residents. Allow accessibility improvements on rental properties with owner permission.	Complete annual goals of 10 minor home repairs and 14 accessibility modifications through grants for low- income residents. Provide home rehabilitation loans for low- income residents. Affirmatively market to Hispanic and single female heads of household biannually; ensure that programs target/affirmatively market to households in impacted neighborhoods, including North Central and North Shoreview, among others. This item is connected to Policy H2.1 and Policy H2.3.	2023-2031 (<u>Fund a</u> nnually; consistent with Policy H2.1 <u></u> ; <u>outreach biannually in target</u> <u>neighborhoods</u>)
Policy <u>H</u> 5.3.3: Monitor affordable housing projects that are at risk of conversion to market rate. Support regional and local efforts to examine displacement of affordable housing and lower income households. Assist with the retention of special needs housing that is at risk of expiring affordability requirements.	Hispanic households have disproportionate housing needs.	Historic discrimination and continued mortgage denials; Concentration in low opportunity census tracts; High housing costs and low wages	Outreach capacity and enforcement	Conserve and improve the existing affordable housing stock	Human resources	City of San Mateo	Monitor affordable units whose subsidies are set to expire within the planning period develop a plan for preservation of the units to keep them affordable long term.	Bridgepointe Condominiums affordability requirements for 59 affordable units expire in 2027, out of which 24 are very low- income units (35 are at 120% AMI). Belmont Building affordability requirements for 6 units expire in 2032. The rental property is owned by a for-profit entity, potential for loss of units is high. Proactively coordinate with owners to preserve the 24 very low- income units as affordable, including identifying potential funding sources, advertise conversion units to non-profits, provide conduct tenant outreach and education, add a displacement preference for new affordable housing for people displaced, including those displaced as a result of conversion. <u>Provide noticing to tenants</u> and affected public entities in accordance with Gov. Code. § 65863.10, <u>65863.11, and 65863.13</u> Outreach and negotiate with owners for affordability extensions beginning at least two years prior to the affordability expiration date. This item is connected to Policy H2.2	a) 2025-2027 (Bridgepointe Condominiums) b) 2030-2032 (Belmont Building); Consistent with Policy H2.2

Actions	Fair Housing Issues	Contributing Factors	Fair Housing Category	Action	Type of Action	Responsible Party	Objectives	Quantified Objectives	Timeline
Policy H5.4.4: Ensure that all multi- family residential developments contain signage to explain the right to request reasonable accommodations for persons with disabilities. Make this information available and clearly transparent on the city's website and fund landlord training and outreach on reasonable accommodations.	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts; Lack of understanding of reasonable accommodation requirements by landlords and property owners.	Outreach capacity and enforcement	Promote equal housing opportunity	Human resources	City of San Mateo	Increase awareness of fair housing laws and tenants' rights to reduce unlawful discrimination and displacement.	Initially, create ongoing condition of approval to ensure both BMR and all- affordable developments contain this information. Explore options for recording against the property and/or including in the affordable housing agreement.	Create ongoing conditions of approval by fall 2024; conduct best practices review on options to record reasonable accommodation language by January 2025, and implement a program by January 2026
Policy H5.4.5: Ensure that future improvements in disadvantaged communities will not produce a net loss of affordable housing or the displacement of residents and seek to increase the amount of affordable housing in disadvantaged communities.	Persons with disabilities and persons of color have disproportionate housing needs.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts; Lack of investment in older housing stock.	Disparities in access to opportunity	Promote equal housing opportunity	Human resources	City of San Mateo	Ensure that lower-income and protected class households are not displaced because of community improvements.	In collaboration with nonprofit and for- profit housing developers, study the feasibility of collaborating with the Northern California Land Trust, or establishing a new community land trust, that will support long-term community ownership and housing affordability in disadvantaged communities. <u>Implement findings as part</u> of the General Plan Update.	To be completed as part of the larger General Plan Update, with the expected date of completion by 2027

8. QUANTIFIED OBJECTIVES

The quantified objectives section estimates the number of units likely to be constructed, rehabilitated, or conserved/preserved by income level during the 2023-2031 planning period. The quantified objectives do not represent a ceiling on development, but rather set a target goal for the jurisdiction to achieve, based on needs, resources, and constraints.

According to HCD, the sum of the quantified objectives for the programs should ideally be equal to or surpass the community's identified housing needs. However, State law recognizes that the total housing needs identified may exceed available resources and the community's ability to satisfy this need within the content of the general plan. Under these circumstances, the quantified objectives need not match the identified existing housing needs but should establish the maximum number of housing units that can be constructed, rehabilitated, and conserved over an eight-year time frame. The quantified objectives do not necessarily meet the goals of RHNA because they are not a full projection of anticipated housing development within the Housing Element Cycle. It is an estimate of actual production, given available resources and projected pipelines projects.

With respect to affordable units, the City has estimated the potential subsidies available during the planning period and has calculated the potential number of units that could be assisted <u>and/or</u> <u>constructed</u> with these funds. In addition, staff has compiled a list of known or expected development projects in the next few years, including preservation projects, anticipated to be completed within the next eight years.

Based on these estimates, along with the known pipeline projects that have been initially reviewed, approved or are under construction, the total quantified objective for affordable units is 1,732. This includes 323 conserved/preserved affordable units, 543 City funded new construction affordable units and 866 non-subsidized affordable units in new private development.

The total development cost for the City's RHNA allocation would exceed \$4 billion dollars, of which over \$3 billion would be required to develop the affordable units. Thus, the quantified objectives do not completely account for San Mateo's RHNA but do establish the maximum number of housing units that can realistically be constructed, rehabilitated, and conserved in the City over an eight-year timeframe with current resources. A breakdown of the total quantified objectives for housing production over the next eight years and how they align with the City's overall RHNA are outlined in the two tables below.

9. PRIOR ACCOMPLISHMENTS SUMMARY

The update of the Housing Element provides an opportunity to reflect on past achievements and challenges. The following summary highlights key accomplishments and challenges from the previous Housing Element's planning period (2015 to 2022), as well as identifies opportunities for where the city took lessons learned and applied them as future tasks for current Housing Element. A detailed evaluation of the prior housing element can be found in Appendix E - Review of Prior Housing Element.

The following achievements were made:

- Progress towards meeting affordable housing goals
- New policies to generate affordable housing funds
- Market rate housing goals were met
- The rate of ADU production have increased greatly
- Accessing new funding sources from non-local sources
- Increasing efficiency in the housing development process
- Interventions to preserve affordable housing

The following challenges were experienced:

- A divided and polarized vision for the future of the city
- High land and construction costs
- Outdated housing programs and policies
- Falling short of the quantified objectives

The following opportunities were identified:

- Rewrite the zoning code
- The General Plan update
- New opportunities for Transit Oriented Development
- Creative solutions to site limitations
- More uses for technology to increase efficiency of housing programs
- New affordable housing opportunities identified

The 2015-<u>2022</u> quantified objectives goal for total housing units, including market rate housing, was 3,164 units. Through the seventh year of this housing cycle, a total of 2,573 units have been completed <u>or are</u> <u>expected to be completed from the projects identified in the quantified objectives</u>. The following two tables summarize the quantified objectives from the last Housing Element Update and detail the City's progress in achieving those objectives.

1 INTRODUCTION

The Bay Area continues to see growth in both population and jobs, which means more housing of various types and sizes is needed to ensure that residents across all income levels, ages, and abilities have a place to call home. While the number of people drawn to the region over the past 30 years has steadily increased, housing production has stalled, contributing to the housing shortage that communities are experiencing today. In many cities, this has resulted in residents being priced out, increased traffic congestion caused by longer commutes, and fewer people across incomes being able to purchase homes or meet surging rents.

The 2023-2031 Housing Element Update provides a roadmap for how to meet our growth and housing challenges. Required by the state, the Housing Element identifies what the existing housing conditions and community needs are, reiterates goals, and creates a plan for more housing. The Housing Element is an integral part of the General Plan, which guides the policies of San Mateo.

2 SUMMARY OF KEY FACTS

- **Population** Generally, the population of the Bay Area continues to grow because of natural growth and because the strong economy draws new residents to the region. The population of San Mateo increased by 11.5% from 2000 to 2020, which is below the growth rate of the Bay Area.
- Age In 2019, San Mateo's youth population under the age of 18 was 21,827 and senior population 65 and older was 16,093. These age groups represent 20.9% and 15.4%, respectively, of San Mateo's population.
- Race/Ethnicity In 2020, 40.9% of San Mateo's population was White while 1.9% was African American, 26.2% was Asian, and 25.1% was Latinx. People of color in San Mateo comprise a proportion below the overall proportion in the Bay Area as a whole.¹
- Employment San Mateo residents most commonly work in the Financial & Professional Services industry. From January 2010 to January 2021, the unemployment rate in San Mateo decreased by 3.6 percentage points. Since 2010, the number of jobs located in the jurisdiction increased by 16,810 (42.7%). Additionally, the jobs-household ratio in San Mateo has increased from 1.17 in 2002 to 1.45 jobs per household in 2018.
- Number of Homes The number of new homes built in the Bay Area has not kept pace with the demand, resulting in longer commutes, increasing prices, and exacerbating issues of displacement and homelessness. The number of homes in San Mateo increased, 3.6% from 2010 to 2020, which is *below* the growth rate for San Mateo County and *below* the growth rate of the region's housing stock during this time period.
- Home Prices A diversity of homes at all income levels creates opportunities for all San Mateo residents to live and thrive in the community.
 - Ownership The largest proportion of homes had a value in the range of \$1M-\$1.5M in 2019. Home prices increased by 115.6% from 2010 to 2020.
 - Rental Prices The typical contract rent for an apartment in San Mateo was \$2,380 in 2019. Rental prices increased by 74.2% from 2009 to 2019. To rent a typical apartment without cost burden, a household would need to make \$95,240 per year.²

¹ The Census Bureau's American Community Survey accounts for ethnic origin separate from racial identity. The numbers reported here use an accounting of both such that the racial categories are shown exclusive of Latinx status, to allow for an accounting of the Latinx population regardless of racial identity. The term Hispanic has historically been used to describe people from numerous Central American, South American, and Caribbean countries. In recent years, the term Latino or Latinx has become preferred. This report generally uses Latinx, but occasionally when discussing US Census data, we use Hispanic or Non-Hispanic, to clearly link to the data source.

² Note that contract rents may differ significantly from, and often being lower than, current listing prices.

- Housing Type It is important to have a variety of housing types to meet the needs of a community today and in the future. In 2020, 44.3% of homes in San Mateo were single family detached, 9.9% were single family attached, 6.3% were small multifamily (2-4 units), and 39.4% were medium or large multifamily (5+ units). Between 2010 and 2020, the number of multi-family units increased more than single-family units. Generally, in San Mateo, the share of the housing stock that is detached single family homes is below that of other jurisdictions in the region.
- Cost Burden The U.S. Department of Housing and Urban Development considers housing to be affordable for a household if the household spends less than 30% of its income on housing costs. A household is considered "cost-burdened" if it spends more than 30% of its monthly income on housing costs, while those who spend more than 50% of their income on housing costs are considered "severely cost-burdened." In San Mateo, 20.8% of households spend 30%-50% of their income on housing, while 16.8% of households are severely cost burden and use the majority of their income for housing.
- Displacement/Gentrification According to research from The University of California, Berkeley, no households in San Mateo live in neighborhoods that are susceptible to or experiencing displacement, and none currently live in areas at risk of or undergoing gentrification. 63.4% of households in San Mateo live in neighborhoods where low-income households are likely excluded due to prohibitive housing costs. There are various ways to address displacement including ensuring new housing at all income levels is built.
- Neighborhood 56.4% of residents in San Mateo live in neighborhoods identified as "Highest Resource" or "High Resource" areas by State-commissioned research, while 0.0% of residents live in areas identified by this research as "Low Resource" or "High Segregation and Poverty" areas. These neighborhood designations are based on a range of indicators covering areas such as education, poverty, proximity to jobs and economic opportunities, low pollution levels, and other factors.³
- Special Housing Needs Some population groups may have special housing needs that require specific program responses, and these groups may experience barriers to accessing stable housing due to their specific housing circumstances. In San Mateo, 9.1% of residents have a disability of any kind and may require accessible housing. Additionally, 9.0% of San Mateo households are larger households with five or more people, who likely need larger housing units with three bedrooms or more. 9.1% of households are female-headed families, which are often at greater risk of housing insecurity.

³ For more information on the "opportunity area" categories developed by Department of Housing and Community Development (HCD) and the California Tax Credit Allocation Committee, see this website: <u>www.treasurer.ca.gov/ctcac/opportunity.asp</u>. The degree to which different jurisdictions and neighborhoods have access to opportunity will likely need to be analyzed as part of new Housing Element requirements related to affirmatively furthering fair housing. ABAG/MTC will be providing jurisdictions with technical assistance on this topic this summer, following the release of additional guidance from HCD.

Note on Data

Many of the tables in this report are sourced from data from the Census Bureau's American Community Survey or U.S. Department of Housing and Urban Development's Comprehensive Housing Affordability Strategy (CHAS) data, both of which are samples and as such, are subject to sampling variability. This means that data is an estimate, and that other estimates could be possible if another set of respondents had been reached. We use the five-year release to get a larger data pool to minimize this "margin of error" but particularly for the smaller cities, the data will be based on fewer responses, and the information should be interpreted accordingly.

Additionally, there may be instances where there is no data available for a jurisdiction for particular data point, or where a value is 0 and the automatically generated text cannot perform a calculation. In these cases, the automatically generated text is "NODATA." Staff should reword these sentences before using them in the context of the Housing Element or other documents.

Note on Figures

Any figure that does not specify geography in the figure name represents data for San Mateo.

3 LOOKING TO THE FUTURE: REGIONAL HOUSING NEEDS

3.1 Regional Housing Needs Determination

The Plan Bay Area 2050⁴ Final Blueprint forecasts that the nine-county Bay Area will add 1.4 million new households between 2015 and 2050. For the eight-year time frame covered by this Housing Element Update, the Department of Housing and Community Development (HCD) has identified the region's housing need as 441,176 units. The total number of housing units assigned by HCD is separated into four income categories that cover housing types for all income levels, from very low-income households to market rate housing.

Every year, the US Department of Housing and Urban Development, in conjunction with the State of California, establish income categories based on the median income in each county. Based on new requirements for the completion of the Housing Element, jurisdictions must now report on the following categories of income:

- Extremely Low Income: 0-30% of Area Median Income, or AMI
- Very Low Income: 30-50% AMI
- Low Income: 50-80% AMI
- Moderate Income: 80-120% AMI
- Above Moderate Income: 120%+ AMI

Table 1 below illustrates the income categories for San Mateo County in 202<u>2</u>. The median income for a family of four is \$1<u>66,0</u>00.

Table 1. State income limits for sam water county, $202\frac{2}{2}$											
Income Group		Number of Persons in Household:									
Income	Group	1	2	3	4	5	6	7	8

Table 1: State Income Limits for San Mateo County, 2022

Source: State of California Department of Housing and Community Development, <u>May 13, 2022</u>: <u>www.hcd.ca.gov/grants-funding/income-limits/state-and-federal-income-limits.shtml</u>

⁴ Plan Bay Area 2050 is a long-range plan charting the course for the future of the nine-county San Francisco Bay Area. It covers four key issues: the economy, the environment, housing, and transportation.

The Regional Housing Needs Determination (RHND) is based on population projections produced by the California Department of Finance as well as adjustments that incorporate the region's existing housing need. The adjustments result from recent legislation requiring HCD to apply additional adjustment factors to the baseline growth projection from California Department of Finance, in order for the regions to get closer to healthy housing markets. To this end, adjustments focus on the region's vacancy rate, level of overcrowding and the share of cost burdened households, and seek to bring the region more in line with comparable ones.⁵ These new laws governing the methodology for how HCD calculates the RHND resulted in a significantly higher number of housing units for which the Bay Area must plan compared to previous RHNA cycles.

3.2 Regional Housing Needs Allocation

A starting point for the Housing Element Update process for every California jurisdiction is the Regional Housing Needs Allocation or RHNA – the share of the RHND assigned to each jurisdiction by the Association of Bay Area Governments (ABAG). State Housing Element Law requires ABAG to develop a methodology that calculates the number of housing units assigned to each city and county and distributes each jurisdiction's housing unit allocation among four affordability levels. For this RHNA cycle, the RHND increased by 135%, from 187,990 to 441,776. Almost all jurisdictions in the Bay Area are likely to receive a larger RHNA this cycle compared to the last cycle, primarily due to changes in state law that led to a considerably higher RHND compared to previous cycles. For more information on the RHNA process this cycle, see ABAG's website: www.abag.ca.gov/our-work/housing/rhna-regional-housing-needs-allocation

On January 12, 2022, HCD approved the Sixth Cycle RHNA plans. For San Mateo, the final RHNA to be planned for this cycle is 7,015 units, a slated increase from the last cycle. The allocation that San Mateo would receive from the Final RHNA Methodology is broken down by income category as follows:

Table 2: Final Regional Housing Needs Allocations								
Income Group	San Mateo City Units	San Mateo County Units	Bay Area Units	San Mateo City Percent	San Mateo County Percent	Bay Area Percent		
Very Low Income	1,777	12,196	114,442	25.3%	25.6%	25.9%		
Low Income	1,023	7,023	65,892	14.6%	14.7%	14.9%		
Moderate Income	1,175	7,937	72,712	16.7%	16.6%	16.5%		
Above Moderate Income	3,040	20,531	188,130	43.3%	43.1%	42.6%		
Total	7,015	47,687	441,176	100.0%	100.0%	100.0%		

Source: Association of Bay Area Governments Final Regional Housing Needs Allocations Plan, adopted on December 16, 2021 and approved by California Housing and Community Development on January 12, 2022.

⁵ For more information on HCD's RHND calculation for the Bay Area, see this letter sent to ABAG from HCD on June 9, 2020: <u>www.hcd.ca.gov/community-development/housing-element/docs/abagrhna-final060920(r).pdf</u>

4 **POPULATION, EMPLOYMENT AND HOUSEHOLD CHARACTERISTICS**

4.1 Population

The Bay Area is the fifth-largest metropolitan area in the nation and has seen a steady increase in population since 1990, except for a dip during the Great Recession. Many cities in the region have experienced significant growth in jobs and population. While these trends have led to a corresponding increase in demand for housing across the region, the regional production of housing has largely not kept pace with job and population growth. Since 2000, San Mateo's population has increased by 11.5%; this rate is below that of the region as a whole, at 14.8%. In San Mateo, roughly 14.4% of its population moved during the past year, a number 1.0 percentage points greater than the regional rate of 13.4%.

In 2020, the population of San Mateo was estimated to be 103,087 (see Table 3). From 1990 to 2000, the population increased by 8.0%, while it increased by 5.1% during the first decade of the 2000s. In the most recent decade, the population increased by 6.0%. The population of San Mateo makes up 13.3% of San Mateo County.⁶

Table 3: Population Growth Trends							
Geography	1990	1995	2000	2005	2010	2015	2020
San Mateo City	85,619	90,733	92,482	93,883	97,207	101,830	103,087
San Mateo County	649,623	685,354	707,163	719,844	718,451	761,748	773,244
Bay Area	6,020,147	6,381,961	6,784,348	7,073,912	7,150,739	7,595,694	7,790,537

Universe: Total population

Source: California Department of Finance, E-5 series

For more years of data, please refer to the Data Packet Workbook, Table POPEMP-01.

⁶ To compare the rate of growth across various geographic scales, Figure 1 shows population for the jurisdiction, county, and region indexed to the population in the year 1990. This means that the data points represent the population growth (i.e. percent change) in each of these geographies relative to their populations in 1990.

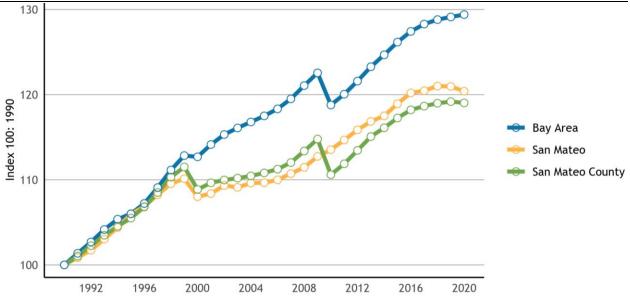

Figure 1: Population Growth Trends

Source: California Department of Finance, E-5 series Note: The data shown on the graph represents population for the jurisdiction, county, and region indexed to the population in the first year shown. The data points represent the relative population growth in each of these geographies relative to their populations in that year.

For some jurisdictions, a break may appear at the end of each decade (1999, 2009) as estimates are compared to census counts. DOF uses the decennial census to benchmark subsequent population estimates.

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-01.

4.2 Age

The distribution of age groups in a city shapes what types of housing the community may need in the near future. An increase in the older population may mean there is a developing need for more senior housing options, while higher numbers of children and young families can point to the need for more family housing options and related services. There has also been a move by many to age-in-place or downsize to stay within their communities, which can mean more multifamily and accessible units are also needed.

In San Mateo, the median age in 2000 was 37.4; by 2019, this figure had increased, landing at around 38 years. More specifically, the population of those under 14 has increased since 2010, while the 65-and-over population has increased (see Figure 2).

Looking at the senior and youth population by race can add an additional layer of understanding, as families and seniors of color are even more likely to experience challenges finding affordable housing. People of color⁷ make up 33.5% of seniors and 53.6% of youth under 18 (see Figure 3).

⁷ Here, we count all non-white racial groups

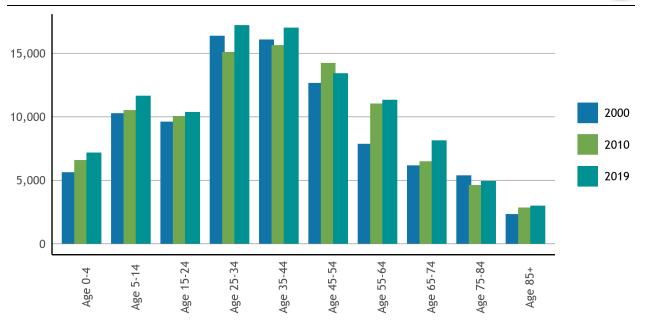

Figure 2: Population by Age, 2000-2019

Universe: Total population

Source: U.S. Census Bureau, Census 2000 SF1, Table P12; U.S. Census Bureau, Census 2010 SF1, Table P12; U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B01001

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-04.

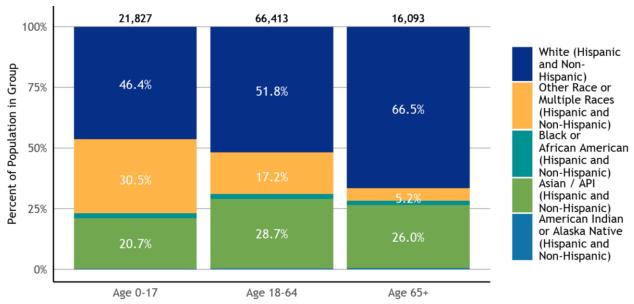

Figure 3: Senior and Youth Population by Race

Universe: Total population

Notes: In the sources for this table, the Census Bureau does not disaggregate racial groups by Hispanic/Latinx ethnicity, and an overlapping category of Hispanic / non-Hispanic groups has not been shown to avoid double counting in the stacked bar chart. Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B01001(A-G) For the data table behind this figure, please refer to the Data Packet Workbook, Table SEN-02.

4.3 Race and Ethnicity

Understanding the racial makeup of a city and region is important for designing and implementing effective housing policies and programs. These patterns are shaped by both market factors and government actions, such as exclusionary zoning, discriminatory lending practices and displacement that has occurred over time and continues to impact communities of color today⁸. Since 2000, the percentage of residents in San Mateo identifying as White has decreased – and by the same token the percentage of residents of all *other* races and ethnicities has *increased* – by 17.6 percentage points, with the 2019 population standing at 42,623 (see Figure 4). In absolute terms, the *Asian / API, Non-Hispanic* population increased the most while the *White, Non-Hispanic* population decreased the most.

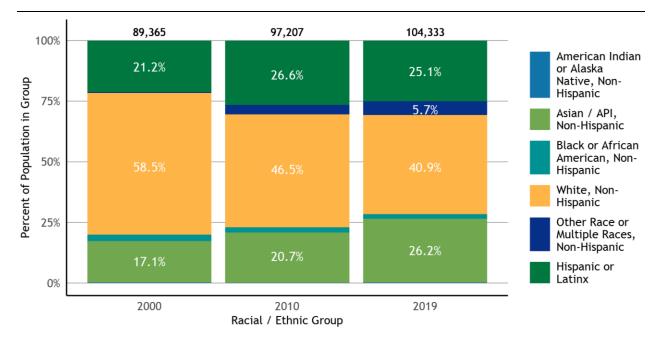

Figure 4: Population by Race, 2000-2019

Universe: Total population

Notes: Data for 2019 represents 2015-2019 ACS estimates. The Census Bureau defines Hispanic/Latinx ethnicity separate from racial categories. For the purposes of this graph, the "Hispanic or Latinx" racial/ethnic group represents those who identify as having Hispanic/Latinx ethnicity and may also be members of any racial group. All other racial categories on this graph represent those who identify with that racial category and do not identify with Hispanic/Latinx ethnicity.

Source: U.S. Census Bureau, Census 2000, Table P004; U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B03002

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-02.

4.4 Employment Trends

4.4.1 Balance of Jobs and Workers

A city houses employed residents who either work in the community where they live or work elsewhere in the region. Conversely, a city may have job sites that employ residents from the same city, but more often employ workers commuting from outside of it. Smaller cities typically will have more employed residents than jobs there and export workers, while larger cities tend to have a surplus of jobs and import workers. To some extent the regional transportation system is set up for this flow of workers to the region's core job centers. At the same time, as the housing affordability crisis has illustrated, local imbalances may be severe, where local jobs and worker populations are out of sync at a sub-regional scale.

One measure of this is the relationship between workers and jobs. A city with a surplus of workers "exports" workers to other parts of the region, while a city with a surplus of jobs must conversely "import" them. Between 2002 and 2018, the number of jobs in San Mateo increased by 27.1% (see Figure 5).

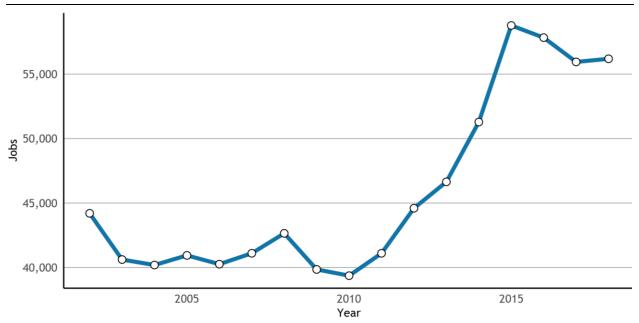

Figure 5: Jobs in a Jurisdiction

Universe: Jobs from unemployment insurance-covered employment (private, state and local government) plus United States Office of Personnel Management-sourced Federal employment

Notes: The data is tabulated by place of work, regardless of where a worker lives. The source data is provided at the census block level. These are crosswalked to jurisdictions and summarized.

Source: U.S. Census Bureau, Longitudinal Employer-Household Dynamics, Workplace Area Characteristics (WAC) files, 2002-2018 For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-11.

The largest-growing sectors during this period included Professional and Managerial Services (93%), Construction (62%) and Health and Educational Services (49%). In contrast, Agriculture and Natural Resources (-96%), Information (-36%) and Retail (15%) all saw substantial losses in the same time period.

There are 56,657 employed residents, and 57,196 jobs⁹ in San Mateo - the ratio of jobs to resident workers is 1.01; San Mateo is *a net importer of workers*.

Figure 6 shows the balance when comparing jobs to workers, broken down by different wage groups, offering additional insight into local dynamics. A community may offer employment for relatively low-income workers but have relatively few housing options for those workers - or conversely, it may house residents who are low wage workers but offer few employment opportunities for them. Such relationships may cast extra light on potentially pent-up demand for housing in particular price categories. A relative *surplus* of jobs relative to residents in a given wage category suggests the need to import those workers, while conversely, surpluses of workers in a wage group relative to jobs means the community will export those workers to other jurisdictions. Such flows are not inherently bad, though over time, sub-regional imbalances may appear. San Mateo has more low-wage *jobs* than low-wage *residents* (where low-wage refers to jobs paying less than \$25,000). At the other end of the wage spectrum, the city has more high-wage *residents* than high-wage *jobs* (where high-wage refers to jobs paying more than \$75,000)¹⁰ (see Figure 6).

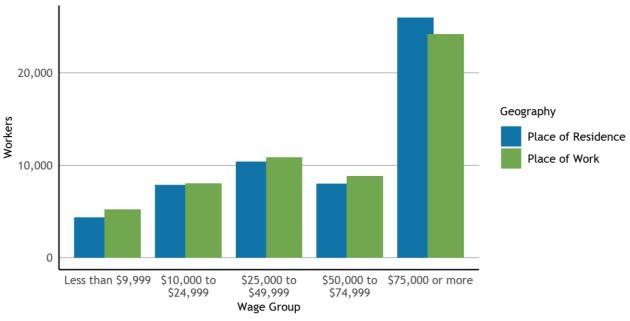

Figure 6: Workers by Earnings, by Jurisdiction as Place of Work and Place of Residence

Universe: Workers 16 years and over with earnings Source: U.S. Census Bureau, American Community Survey 5-Year Data 2015-2019, B08119, B08519 For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-10.

Page H-A-16

⁹ Employed *residents* in a jurisdiction is counted by place of residence (they may work elsewhere) while *jobs* in a jurisdiction are counted by place of work (they may live elsewhere). The jobs may differ from those reported in Figure 5 as the source for the time series is from administrative data, while the cross-sectional data is from a survey.

¹⁰ The source table is top-coded at \$75,000, precluding more fine grained analysis at the higher end of the wage spectrum.

Figure 7 shows the balance of a jurisdiction's resident workers to the jobs located there for different wage groups as a ratio instead - a value of 1 means that a city has the same number of jobs in a wage group as it has resident workers - in principle, a balance. Values above 1 indicate a jurisdiction will need to import workers for jobs in a given wage group. At the regional scale, this ratio is 1.04 jobs for each worker, implying a modest import of workers from outside the region (see Figure 7).

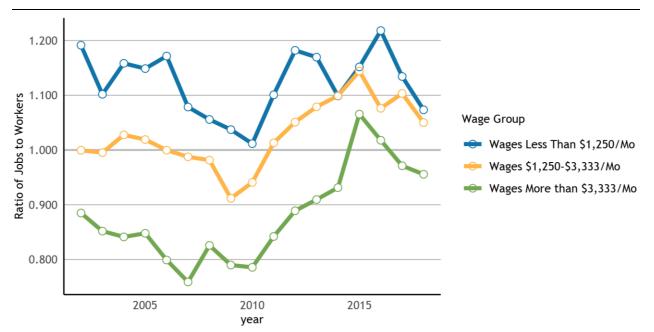

Figure 7: Jobs-Worker Ratios, By Wage Group

Universe: Jobs in a jurisdiction from unemployment insurance-covered employment (private, state and local government) plus United States Office of Personnel Management-sourced Federal employment

Notes: The ratio compares job counts by wage group from two tabulations of LEHD data: Counts by place of work relative to counts by place of residence. See text for details.

Source: U.S. Census Bureau, Longitudinal Employer-Household Dynamics, Workplace Area Characteristics (WAC) files (Jobs); Residence Area Characteristics (RAC) files (Employed Residents), 2010-2018

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-14.

Such balances between jobs and workers may directly influence the housing demand in a community. New jobs may draw new residents, and when there is high demand for housing relative to supply, many workers may be unable to afford to live where they work, particularly where job growth has been in relatively lower wage jobs. This dynamic not only means many workers will need to prepare for long commutes and time spent on the road, but in the aggregate it contributes to traffic congestion and time lost for all road users.

If there are more jobs than employed residents, it means a city is relatively jobs-rich, typically also with a high jobs to household ratio. Thus bringing housing into the measure, the *jobs-household ratio* in San Mateo has increased from 1.17 in 2002, to 1.45 jobs per household in 2018 (see Figure 8).

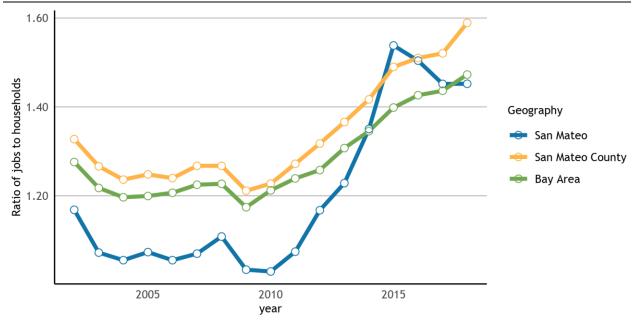

Figure 8: Jobs-Household Ratio

Universe: Jobs in a jurisdiction from unemployment insurance-covered employment (private, state and local government) plus United States Office of Personnel Management-sourced Federal employment; households in a jurisdiction

Notes: The data is tabulated by place of work, regardless of where a worker lives. The source data is provided at the census block level. These are crosswalked to jurisdictions and summarized. The ratio compares place of work wage and salary jobs with households, or occupied housing units. A similar measure is the ratio of jobs to housing units. However, this jobs-household ratio serves to compare the number of jobs in a jurisdiction to the number of housing units that are actually occupied. The difference between a jurisdiction's jobs-household ratio and jobs-household ratio will be most pronounced in jurisdictions with high vacancy rates, a high rate of units used for seasonal use, or a high rate of units used as short-term rentals.

Source: U.S. Census Bureau, Longitudinal Employer-Household Dynamics, Workplace Area Characteristics (WAC) files (Jobs), 2002-2018; California Department of Finance, E-5 (Households)

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-13.

4.4.2 Sector Composition

In terms of sectoral composition, the largest industry in which San Mateo residents work is *Financial & Professional Services*, and the largest sector in which San Mateo residents work is *Health & Educational Services* (see Figure 9). For the Bay Area as a whole, the *Health & Educational Services* industry employs the most workers.

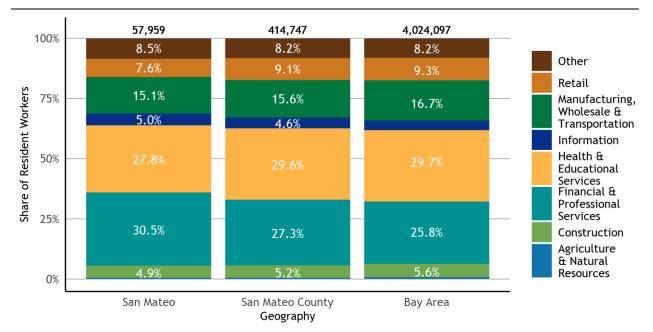

Figure 9: Resident Employment by Industry

Universe: Civilian employed population age 16 years and over

Notes: The data displayed shows the industries in which jurisdiction residents work, regardless of the location where those residents are employed (whether within the jurisdiction or not). Categories are derived from the following source tables: Agriculture & Natural Resources: C24030_003E, C24030_030E; Construction: C24030_006E, C24030_033E; Manufacturing, Wholesale & Transportation: C24030_007E, C24030_034E, C24030_008E, C24030_035E, C24030_010E, C24030_037E; Retail: C24030_009E, C24030_036E; Information: C24030_013E, C24030_040E; Financial & Professional Services: C24030_014E, C24030_041E, C24030_017E, C24030_044E; Health & Educational Services: C24030_021E, C24030_024E, C24030_048E, C24030_055E

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table C24030 For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-06.

Looked at a different way, Management, Business, Science and Arts occupations comprise about 53% of all residents' employment, which is roughly similar to San Mateo County and the Bay Area as a whole (see Figure 10).

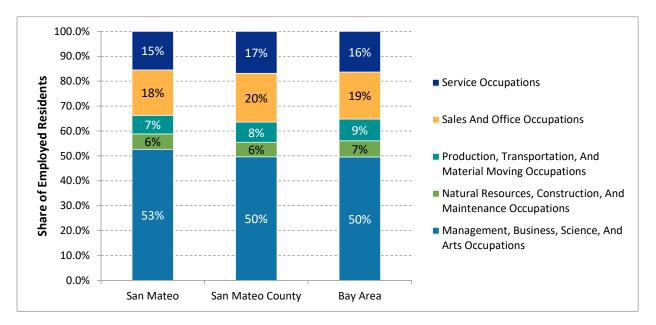

Figure 10: Resident Employment by Occupation

Universe: Civilian employed population age 16 years and over

Notes: The data displayed shows the occupations of jurisdiction residents, regardless of the location where those residents are employed (whether within the jurisdiction or not).

-Categories are derived from the following source tables: management, business, science, and arts occupations: C24010_003E, C24010_039E; service occupations: C24010_019E, C24010_055E; sales and office occupations: C24010_027E, C24010_063E; natural resources, construction, and maintenance occupations: C24010_030E, C24010_066E; production, transportation, and material moving occupations: C24010_034E, C24010_070E

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table C24010

4.4.3 Unemployment

In San Mateo, there was a 3.6 percentage point decrease in the unemployment rate between January 2010 and January 2021. Jurisdictions through the region experienced a sharp rise in unemployment in 2020 due to impacts related to the COVID-19 pandemic, though with a general improvement and recovery in the later months of 2020. As of May, 2021, the State Employment Development Department estimates the City of San Mateo's unemployment rate at 3.9%. In contrast, the rate for San Mateo County as a whole is estimated at 4.6%.

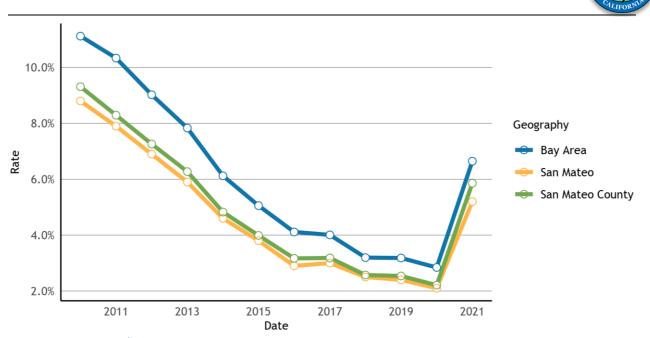

Figure 11: Unemployment Rate

Universe: Civilian noninstitutional population ages 16 and older

Notes: Unemployment rates for the jurisdiction level is derived from larger-geography estimates. This method assumes that the rates of change in employment and unemployment are exactly the same in each sub-county area as at the county level. If this assumption is not true for a specific sub-county area, then the estimates for that area may not be representative of the current economic conditions. Since this assumption is untested, caution should be employed when using these data. Only not seasonally-adjusted labor force (unemployment rates) data are developed for cities and CDPs.

Source: California Employment Development Department, Local Area Unemployment Statistics (LAUS), Sub-county areas monthly updates, 2010-2021.

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-15.

4.5 2018-2028 Occupation Projections

The State Employment Development Department has published job projections for the period between 2018 and 2028. Although the data include both San Mateo and San Francisco counties, some assumptions can be made about the impact of the number of jobs and the corresponding wages in the region. Many of the occupations with the most job openings will earn the employee less than \$35,000 annually. Based on 2021 State income limits, such individuals are considered extremely low-income.

Table 4: Occupations with the Most Job Openings, 2018-2028						
	Total Job	Median	Median			
Occupational Title	Openings	Hourly Wage	Annual Wage			
Personal Care Aides	62,650	\$12.16	\$25,283			
Combined Food Prep and Servers, incl. Fast Food	52,090	\$13.71	\$28,524			
Wait Staff	48,580	\$14.73	\$30,632			
Software Developers, Applications	38,710	\$67.39	\$140,175			
Cashiers	37,140	\$13.54	\$28,161			
Janitors and Cleaners, Except Maids and Housekeeping Cleaners	28,060	\$14.81	\$30,807			
Cooks, Restaurant	26,840	\$16.35	\$34,016			
Retail Salespersons	25,280	\$14.28	\$29,700			

Table 4: Occupations with the Most Job Openings, 2018-2028

Page H-A-21

Occupational Title	Total Job Openings	Median Hourly Wage	Median Annual Wage
Market Research Analysis/Marketing Specialists	24,060	\$42.60	\$88,609
Taxi Drivers and Chauffeurs	21,540	\$18.57	\$38,644

Notes: Total job openings are the sum of numeric change, exits, and transfers projected between 2018 and 2028. Wages are from the 2020 first quarter and do not include self-employed or unpaid family workers. If an estimate could not be provided for wages, they are excluded from this table.

Excludes "All Other" categories. These are residual codes that do not represent a detailed occupation. Sources: U.S. Bureau of Labor Statistics' Current Employment Statistics (CES) March 2019 benchmark and Quarterly Census of Employment and Wages (QCEW) industry employment. <u>https://www.labormarketinfo.edd.ca.gov/data/employment-projections.html</u>

4.6 Extremely Low-Income Households

Despite the economic and job growth experienced throughout the region since 1990, the income gap has continued to widen. California is one of the most economically unequal states in the nation, and the Bay Area has the highest income inequality between high- and low-income households in the state¹¹.

In San Mateo, 49.3% of households make more than 100% of the Area Median Income (AMI)¹², compared to 12.7% making less than 30% of AMI, which is considered extremely low-income (see Figure 12).

Regionally, more than half of all households make more than 100% AMI, while 15% make less than 30% AMI. In San Mateo County, 30% AMI is the equivalent to the annual income of \$44,000 for a family of four. Many households with multiple wage earners – including food service workers, full-time students, teachers, farmworkers and healthcare professionals – can fall into lower AMI categories due to relatively stagnant wages in many industries.

State law requires jurisdictions to estimate the number if extremely low-income households – those earning less than 30% of median income. According to the data shown below (Figure 12), 9,468 of San Mateo's households are 0-50% AMI while 4,895 are extremely low-income. Therefore, extremely low-income households represent 51.7% of households who are 0-50% AMI, as 4,895 divided by 9,468 is 51.7%. This option aligns with HCD's guidance to use U.S. Census data to calculate the percentage of very low-income RHNA that qualifies for extremely low-income households, as the information in Figure 12 represents a tabulation of Census Bureau Data.

¹¹ Bohn, S.et al. 2020. Income Inequality and Economic Opportunity in California. *Public Policy Institute of California*.

¹² Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located. Households making between 80 and 120 percent of the AMI are moderate-income, those making 50 to 80 percent are low-income, those making 30 to 50 percent are very low-income, and those making less than 30 percent are extremely low-income. This is then adjusted for household size.

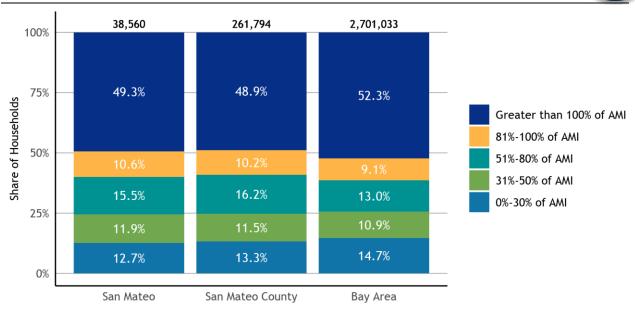

Figure 12: Households by Household Income Level

Universe: Occupied housing units

Notes: Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located. The data that is reported for the Bay Area is not based on a regional AMI but instead refers to the regional total of households in an income group relative to the AMI for the county where that household is located. Local jurisdictions are required to provide an estimate for their projected extremely low-income households (0-30% AMI) in their Housing Elements. HCD's official Housing Element guidance notes that jurisdictions can use their RHNA for very low-income households (those making 0-50% AMI) to calculate their projected extremely low-income households. As Bay Area jurisdictions have not yet received their final RHNA numbers, this document does not contain the required data point of projected extremely low-income households. The report portion of the housing data needs packet contains more specific guidance for how local staff can calculate an estimate for projected extremely low-income households once jurisdictions receive their 6th cycle RHNA numbers.

For the data table behind this figure, please refer to the Data Packet Workbook, Table ELI-01.

Understanding households by income and race/ethnicity can shed light on the challenges faced by people of color in terms of access to housing that is affordable. Table 5 below illustrates the disparities between households that are White versus households in other racial/ethnic categories. Although 13% of households are extremely low-income Citywide, 22% of Hispanic/Latinx households are in this income category. ¹³ Further, Hispanic/Latinx and Black/African-American households are significantly underrepresented in the greater than 100% AMI category.

Table 5. Household Distribution by Race/Ethnicity and meetine							
Racial / Ethnic Group	0%-30% of AMI	31%-50% of AMI	51%-80% of AMI	81%-100% of AMI	Greater than 100% of AMI		
American Indian or Alaska Native, Non-Hispanic	0%	23%	12%	0%	65%		
Asian / API, Non-Hispanic	10%	10%	13%	11%	56%		
Black or African American, Non- Hispanic	18%	29%	16%	13%	23%

Other Race or Multiple Races, Non-Hispanic	8%	12%	20%	10%	50%		
Hispanic or Latinx	22%	21%	23%	9%	24%		
Totals	13%	12%	16%	11%	49%		

Table 5: Household Distribution by Race/Ethnicity and Income

Universe: Occupied housing units

Notes: Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located.

-For the purposes of this graph, the "Hispanic or Latinx" racial/ethnic group represents those who identify as having Hispanic/Latinx ethnicity and may also be members of any racial group. All other racial categories on this graph represent those who identify with that racial category and do not identify with Hispanic/Latinx ethnicity.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release. For the data table behind this figure, please refer to the Data Packet Workbook, Table ELI-02.

¹³These figures are somewhat skewed because White households make up the vast majority of households in the City but are illustrative of differences.

Throughout the region, there are disparities between the incomes of homeowners and renters. Typically, the number of low-income renters greatly outpaces the amount of housing available that is affordable for these households.

In San Mateo, the largest proportion of renters falls in the *Greater than 100% of AMI* income group, while the largest proportion of homeowners are found in the *Greater than 100% of AMI* group (see Figure 13).

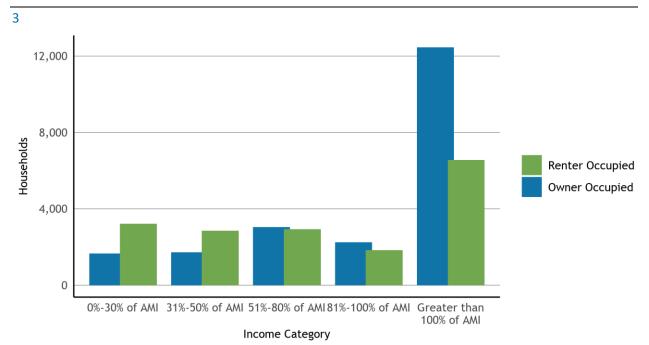

Figure 13: Household Income Level by Tenure

Universe: Occupied housing units

Notes: Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located.

For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-21.

Currently, people of color are more likely to experience poverty and financial instability as a result of federal and local housing policies that have historically excluded them from the same opportunities extended to white residents.¹⁴ These economic disparities also leave communities of color at higher risk for housing insecurity, displacement or homelessness. In San Mateo, Other Race or Multiple Races (Hispanic and Non-Hispanic) residents experience the highest rates of poverty, followed by Black or African American (Hispanic and Non-Hispanic) residents (see Figure 14).

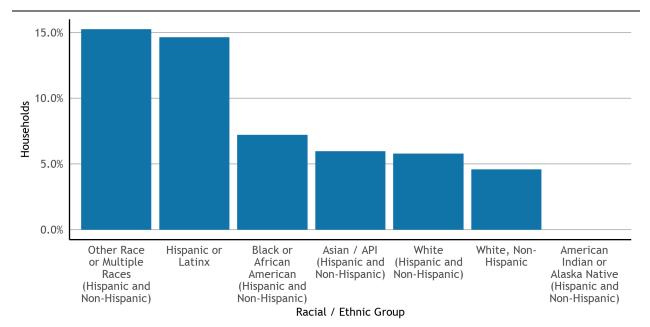

Figure 14: Poverty Status by Race

Universe: Population for whom poverty status is determined

Notes: The Census Bureau uses a federally defined poverty threshold that remains constant throughout the country and does not correspond to Area Median Income. For this table, the Census Bureau does not disaggregate racial groups by Hispanic/Latinx ethnicity. However, data for the white racial group is also reported for white householders who are not Hispanic/Latinx. Since residents who identify as white and Hispanic/Latinx may have very different experiences within the housing market and the economy from those who identify as white and non-Hispanic/Latinx, data for multiple white sub-groups are reported here. The racial/ethnic groups reported in this table are not all mutually exclusive. Therefore, the data should not be summed as the sum exceeds the population for whom poverty status is determined for this jurisdiction. However, all groups labelled "Hispanic and Non-Hispanic" are mutually exclusive, and the sum of the data for these groups is equivalent to the population for whom poverty status is determined.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B17001(A-I) For the data table behind this figure, please refer to the Data Packet Workbook, Table ELI-03.

4.7 Tenure

The number of residents who own their homes compared to those who rent their homes can help identify the level of housing insecurity – ability for individuals to stay in their homes – in a city and region. Generally, renters may be displaced more quickly if prices increase. In San Mateo there are a total of 38,549 housing units, and fewer residents rent than own their homes: 45.6% versus 54.4% (see Figure 15). By comparison, 39.8% of households in San Mateo County are renters, while 44% of Bay Area households rent their homes.

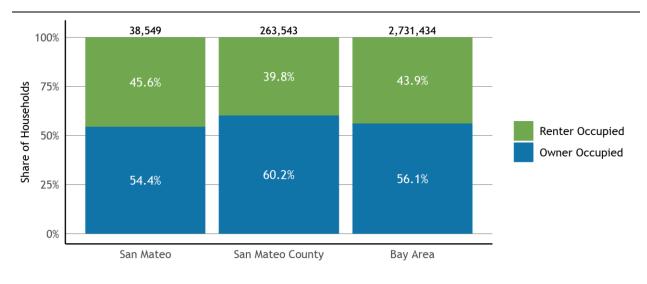

Figure 15: Housing Tenure

Universe: Occupied housing units Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003

Homeownership rates often vary considerably across race/ethnicity in the Bay Area and throughout the country. These disparities not only reflect differences in income and wealth but also stem from federal, state, and local policies that limited access to homeownership for communities of color while facilitating homebuying for white residents. While many of these policies, such as redlining, have been formally disbanded, the impacts of race-based policy are still evident across Bay Area communities.¹⁵ In San Mateo, 26.1% of Black households owned their homes, while homeownership rates were 58.9% for Asian households, 31.0% for Latinx households, and 58.7% for White households. Notably, recent changes to state law require local jurisdictions to examine these dynamics and other fair housing issues when updating their Housing Elements.

¹⁵ See, for example, Rothstein, R. (2017). The color of law : a forgotten history of how our government segregated America. New York, NY & London, UK: Liveright Publishing.

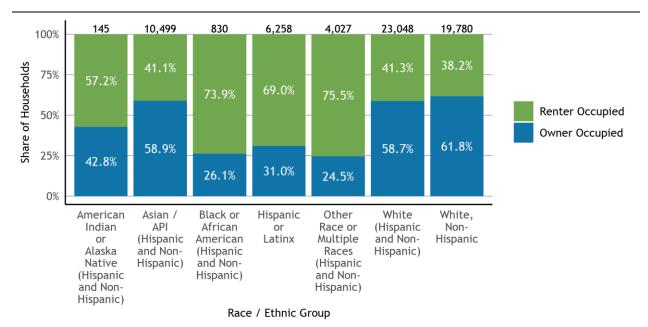

Figure 16: Housing Tenure by Race of Householder

Universe: Occupied housing units

Notes: For this table, the Census Bureau does not disaggregate racial groups by Hispanic/Latinx ethnicity. However, data for the white racial group is also reported for white householders who are not Hispanic/Latinx. Since residents who identify as white and Hispanic/Latinx may have very different experiences within the housing market and the economy from those who identify as white and non-Hispanic/Latinx, data for multiple white sub-groups are reported here. The racial/ethnic groups reported in this table are not all mutually exclusive. Therefore, the data should not be summed as the sum exceeds the total number of occupied housing units for this jurisdiction. However, all groups labelled "Hispanic and Non-Hispanic" are mutually exclusive, and the sum of the data for these groups is equivalent to the total number of occupied housing units.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25003(A-I) For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-20.

The age of residents who rent or own their home can also signal the housing challenges a community is experiencing. Younger households tend to rent and may struggle to buy a first home in the Bay Area due to high housing costs. At the same time, senior homeowners seeking to downsize may have limited options in an expensive housing market.

In San Mateo, 64.6% of householders between the ages of 25 and 44 are renters, while 25.8% of householders over 65 are (see Figure 17).

Universe: Occupied housing units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25007 For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-18.

Tenure information based on the year in which a household moved to further illustrates the differences between long-term residents, who tend to trend older, with newer residents. The following chart shows that 94% of households that moved in in 1989 or earlier are owner occupied, whereas only 22% of households that moved in in 2017 or later are owner occupied.

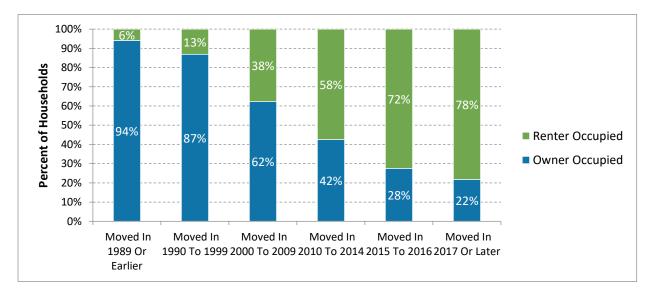

Figure 18: Housing Tenure by Year Moved to Current Residence

Universe: Occupied housing units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25038 For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-19.

In many cities, homeownership rates for households in single-family homes are substantially higher than the rates for households in multi-family housing. In San Mateo, 83.1% of households in detached single-family homes are homeowners, while 25.0% of households in multi-family housing are homeowners (see Figure 19).

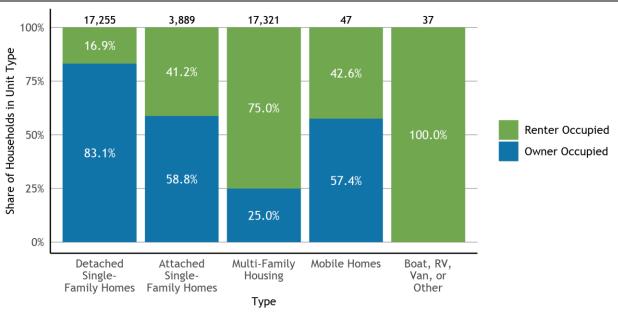

Figure 19: Housing Tenure by Housing Type

Universe: Occupied housing units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25032 For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-22.

4.8 Displacement

Because of increasing housing prices, displacement is a major concern in the Bay Area. Displacement has the most severe impacts on low- and moderate-income residents. When individuals or families are forced to leave their homes and communities, they also lose their support network.

The University of California, Berkeley has mapped all neighborhoods in the Bay area, identifying their risk for gentrification. They find that in San Mateo, 0.0% of households live in neighborhoods that are susceptible to or experiencing displacement and 0.0% live in neighborhoods at risk of or undergoing gentrification.

Equally important, some neighborhoods in the Bay Area do not have housing appropriate for a broad section of the workforce. UC Berkeley estimates that 63.4% of households in San Mateo live in neighborhoods where low-income households are likely to be excluded due to prohibitive housing costs.¹⁶

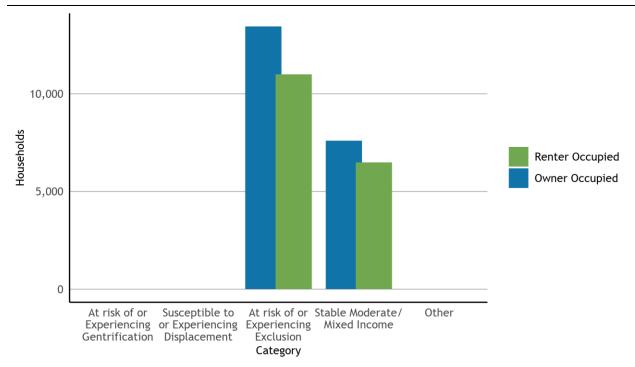

Figure 20: Households by Displacement Risk and Tenure

Universe: Households

Notes: Displacement data is available at the census tract level. Staff aggregated tracts up to jurisdiction level using census 2010 population weights, assigning a tract to jurisdiction in proportion to block level population weights. Total household count may differ slightly from counts in other tables sourced from jurisdiction level sources. Categories are combined as follows for simplicity: At risk of or Experiencing Exclusion: At Risk of Becoming Exclusive; Becoming Exclusive; Stable/Advanced Exclusive At risk of or Experiencing Gentrification: At Risk of Gentrification; Early/Ongoing Gentrification; Advanced Gentrification Stable Moderate/Mixed Income Susceptible to or Experiencing Displacement: Low-Income/Susceptible to Displacement; Ongoing Displacement Other: High Student Population; Unavailable or Unreliable Data

Source: Urban Displacement Project for classification, American Community Survey 5-Year Data (2015-2019), Table B25003 for tenure. For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-25.

¹⁶ More information about this gentrification and displacement data is available at the Urban Displacement Project's webpage: <u>https://www.urbandisplacement.org/</u>. Specifically, one can learn more about the different gentrification/displacement typologies shown in Figure 18 at this link: <u>https://www.urbandisplacement.org/sites/default/files/typology_sheet_2018_0.png</u>. Additionally, one can view maps that show which typologies correspond to which parts of a jurisdiction here: <u>https://www.urbandisplacement.org/san-francisco/sf-bay-area-gentrification-and-displacement</u>

5 HOUSING STOCK CHARACTERISTICS

5.1 Housing Types, Year Built, Vacancy, and Permits

In recent years, most housing produced in the region and across the state consisted of single-family homes and larger multi-unit buildings. However, some households are increasingly interested in "missing middle housing" – including duplexes, triplexes, townhomes, cottage clusters and accessory dwelling units (ADUs). These housing types may open up more options across incomes and tenure, from young households seeking homeownership options to seniors looking to downsize and age-in-place.

The housing stock of San Mateo in 2020 was made up of 44.3% single family detached homes, 9.9% single family attached homes, 6.3% multifamily homes with 2 to 4 units, 39.4% multifamily homes with 5 or more units, and 0.1% mobile homes (see Figure 21). In San Mateo, the housing type that experienced the most growth between 2010 and 2020 was *Multifamily Housing: Five-plus Units*.

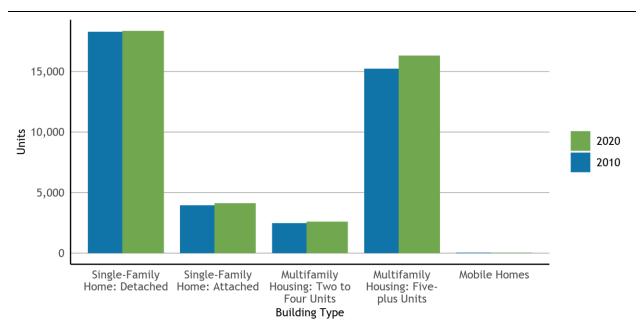

Figure 21: Housing Type Trends

Universe: Housing units

Source: California Department of Finance, E-5 series

For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-01.

Production has not kept up with housing demand for several decades in the Bay Area, as the total number of units built and available has not yet come close to meeting the population and job growth experienced throughout the region. In San Mateo, the largest proportion of the housing stock was built 1940 to 1959, with 14,721 units constructed during this period (see Figure 22). Since 2010, 4.6% of the current housing stock was built, which is 1,887 units.

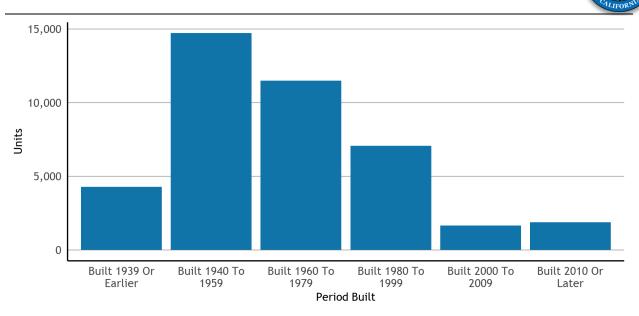

Figure 22: Housing Units by Year Structure Built

Universe: Housing units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25034 For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-04.

Vacant units make up 6.2% of the overall housing stock in San Mateo. The rental vacancy stands at 6.4%, while the ownership vacancy rate is 1.7%. Of the vacant units, the most common type of vacancy is *For Rent* (see Figure 23).¹⁷

Throughout the Bay Area, vacancies make up 2.6% of the total housing units, with homes listed for rent; units used for *recreational or occasional use*, and units not otherwise classified (*other vacant*) making up the majority of vacancies. The Census Bureau classifies a unit as vacant if no one is occupying it when census interviewers are conducting the American Community Survey or Decennial Census. Vacant units classified as "for recreational or occasional use" are those that are held for short-term periods of use throughout the year. Accordingly, vacation rentals and short-term rentals like AirBnB are likely to fall in this category. The Census Bureau classifies units as "other vacant" if they are vacant due to foreclosure, personal/family reasons, legal proceedings, repairs/renovations, abandonment, preparation for being rented or sold, or vacant for an extended absence for reasons such as a work assignment, military duty, or incarceration.¹⁸ In a region with a thriving economy and housing market like the Bay Area, units being renovated/repaired and prepared for rental or sale are likely to represent a large portion of the "other vacant" category. Additionally, the need for seismic retrofitting in older housing stock could also influence

¹⁷ The vacancy rates by tenure is for a smaller universe than the total vacancy rate first reported, which in principle includes the full stock (6.2%). The vacancy by tenure counts are rates relative to the rental stock (occupied and vacant) and ownership stock (occupied and vacant) - but exclude a a significant number of vacancy categories, including the numerically significant *other vacant*.

¹⁸ For more information, see pages 3 through 6 of this list of definitions prepared by the Census Bureau: <u>https://www.census.gov/housing/hvs/definitions.pdf</u>.

the proportion of "other vacant" units in some jurisdictions.¹⁹ In San Mateo, the State Department of Finance currently estimates the vacancy rate is approximately 6.4%. Countywide, it is estimated at 5.5%.

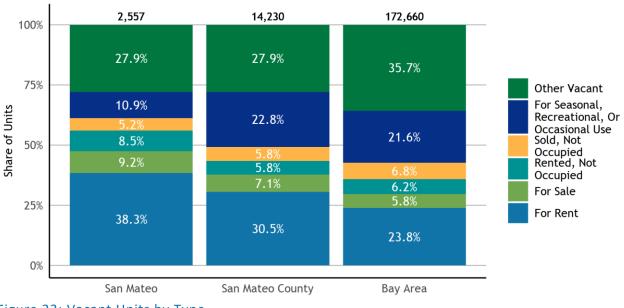

Figure 23: Vacant Units by Type

Universe: Vacant housing units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25004 For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-03.

Between 2015 and 2021, 2,133 housing units were issued permits in San Mateo. 83.6% of permits issued in San Mateo were for above moderate-income housing, 6.2% were for moderate-income housing, and 10.1% were for low- or very low-income housing as shown below (Table 6).

Table 6: Housing Permitting						
Income Category	Number of Permits					
Very Low Income Permits	126					
Low Income Permits	90					
Moderate Income Permits	133					
Above Moderate Income	1,784					

Universe: Housing permits issued between 2015 and 2021

Notes: HCD uses the following definitions for the four income categories: Very Low Income: units affordable to households making less than 50% of the Area Median Income for the county in which the jurisdiction is located. Low Income: units affordable to households making between 50% and 80% of the Area Median Income for the county in which the jurisdiction is located. Moderate Income: units affordable to households making between 80% and 120% of the Area Median Income for the county in

¹⁹ See Dow, P. (2018). Unpacking the Growth in San Francisco's Vacant Housing Stock: Client Report for the San Francisco Planning Department. University of California, Berkeley.

which the jurisdiction is located. Above Moderate Income: units affordable to households making above 120% of the Area Median Income for the county in which the jurisdiction is located.

Source: California Department of Housing and Community Development (HCD), 5th Cycle Annual Progress Report Permit Summary (2021)

This table is included in the Data Packet Workbook as Table HSG-11.

5.2 Assisted Housing Developments At-Risk of Conversion

While there is an immense need to produce new affordable housing units, ensuring that the existing affordable housing stock remains affordable is equally important. Additionally, it is typically faster and less expensive to preserve currently affordable units that are at risk of converting to market-rate than it is to build new affordable housing.

The data below in Table 7 comes from the California Housing Partnership's Preservation Database, the state's most comprehensive source of information on subsidized affordable housing at risk of losing its affordable status and converting to market-rate housing. However, this database does not include all deed-restricted affordable units in the state, so there may be at-risk assisted units in a jurisdiction that are not captured in this data table. There are 702 assisted units in San Mateo in the Preservation Database. Of these units, 10.3% are at *High Risk* or *Very High Risk* of conversion.²⁰

Table 7: Assisted Units at Risk of Conversion							
Risk	San Mateo	San Mateo County	Bay Area				
Low	630	4,656	110,177				
Moderate	0	191	3,375				
High	72	359	1,854				
Very High	0	58	1,053				
Total Assisted Units in Database	702	5,264	116,459				

Universe: HUD, Low-Income Housing Tax Credit (LIHTC), USDA, and CalHFA projects. Subsidized or assisted developments that do not have one of the aforementioned financing sources may not be included.

Notes: California Housing Partnership uses the following categories for assisted housing developments in its database: Very-High Risk: affordable homes that are at-risk of converting to market rate within the next year that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer. High Risk: affordable homes that are at-risk of converting to market rate in the next 1-5 years that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer. Moderate Risk: affordable homes that are at-risk of converting to market rate in the next 5-10 years that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer. Low Risk:

²⁰ California Housing Partnership uses the following categories for assisted housing developments in its database:

Very-High Risk: affordable homes that are at-risk of converting to market rate within the next year that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.

High Risk: affordable homes that are at-risk of converting to market rate in the next 1-5 years that do not have a known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer. Moderate Risk: affordable homes that are at-risk of converting to market rate in the next 5-10 years that do not have a

known overlapping subsidy that would extend affordability and are not owned by a large/stable non-profit, mission-driven developer.

Low Risk: affordable homes that are at-risk of converting to market rate in 10+ years and/or are owned by a large/stable non-profit, mission-driven developer.

affordable homes that are at-risk of converting to market rate in 10+ years and/or are owned by a large/stable non-profit, missiondriven developer. Source: California Housing Partnership, Preservation Database (2020) This table is included in the Data Packet Workbook as Table RISK-01.

5.3 Substandard Housing

Housing costs in the region are among the highest in the country, which could result in households, particularly renters, needing to live in substandard conditions in order to afford housing. Generally, there is limited data on the extent of substandard housing issues in a community. However, the Census Bureau data included in the graph below gives a sense of some of the substandard conditions that may be present in San Mateo. For example, 1.3% of renters in San Mateo reported lacking a kitchen and 0.4% of renters lack plumbing, compared to 0.4% of owners who lack a kitchen and 0.3% of owners who lack plumbing.

Note on Substandard Housing

HCD requires Housing Elements to estimate the number of units in need of rehabilitation and replacement. As a data source for housing units in need of rehabilitation and replacement is not available for all jurisdictions in the region, ABAG was not able to provide this required data point in this document. To produce an estimate of housing needs in need of rehabilitation and replacement, staff can supplement the data below on substandard housing issues with additional local information from code enforcement, recent windshield surveys of properties, building department data, knowledgeable builders/developers in the community, or nonprofit housing developers or organizations. For more information, visit HCD's Building Blocks page on Housing Stock Characteristics.

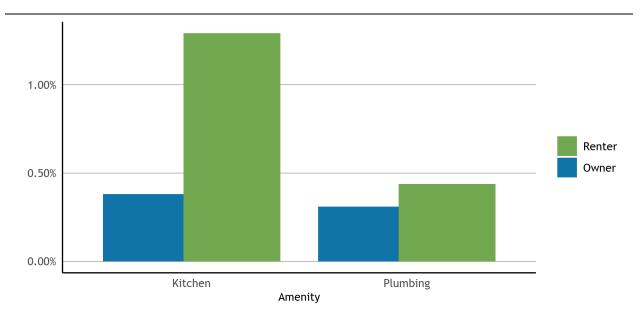

Figure 24: Substandard Housing Issues

Universe: Occupied housing units

Notes: Per HCD guidance, this data should be supplemented by local estimates of units needing to be rehabilitated or replaced based on recent windshield surveys, local building department data, knowledgeable builders/developers in the community, or nonprofit housing developers or organizations.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25053, Table B25043, Table B25049 For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-06.

One measure of housing condition is the age of housing. In general, the older the unit, the greater it can be assumed to be in need of some level of rehabilitation. A general rule in the housing industry is that structures older than 20 years begin to show signs of deterioration and require renovation to maintain their quality. Unless properly maintained, homes older than 50 years can pose health, safety and welfare problems for occupants. Property maintenance is often deferred, especially for lower-income residents who may be unable to afford the rising costs to maintain their homes.

Consistent with State guidance, the table below estimates the number of units in need of rehabilitation and the number of units needing replacement. Although the exact number of San Mateo units in need of rehab is not currently known, the State accepts estimates based on a formula that assumes the older the unit, the more likely the rehab need. By applying an increasing percentage to the housing stock in each age category, it is estimated that there are approximately 839 units in need of some level of rehabilitation in San Mateo, representing 9.1% of the housing stock. The range of rehabilitation needs can include anything from minor repairs to major structural replacements. It is estimated that nearly all of the units in need of rehabilitation can be repaired without replacement.

Year Built	Net Number of Units	Percent of Total	Units Needing Rehab, Percent	Units Needing Rehab, Total	
2014 or later	1,380	3%			
2010 to 2013	420	1%			
2000 to 2009	1,515	4%	0.5%	8	
1990 to 1999	3,439	8%	1.0%	34	
1980 to 1989	3,988	10%	3.0%	120	
1970 to 1979	5,147	12%	5.0%	257	
1960 to 1969	5,839	14%	10.0%	584

Table 8: Age of Housing Stock and Estimated Rehabilitation Needs

5.4 Home and Rent Values

Home prices reflect a complex mix of supply and demand factors, including an area's demographic profile, labor market, prevailing wages and job outlook, coupled with land and construction costs. In the Bay Area, the costs of housing have long been among the highest in the nation. The typical home value in San Mateo was estimated at \$1,444,840 by December of 2020, per data from Zillow. The largest proportion of homes were valued between \$1M-\$1.5M (see Figure 25). By comparison, the typical home value is \$1,418,330 in

San Mateo County and \$1,077,230 the Bay Area, with the largest share of units valued \$1m-\$1.5m (county) and \$500k-\$750k (region).

The region's home values have increased steadily since 2000, besides a decrease during the Great Recession. The rise in home prices has been especially steep since 2012, with the median home value in the Bay Area nearly doubling during this time. Since 2001, the typical home value has increased 149.2% in San Mateo from \$579,810 to \$1,444,840. This change is above the change in San Mateo County, and above the change for the region (see Figure 26).

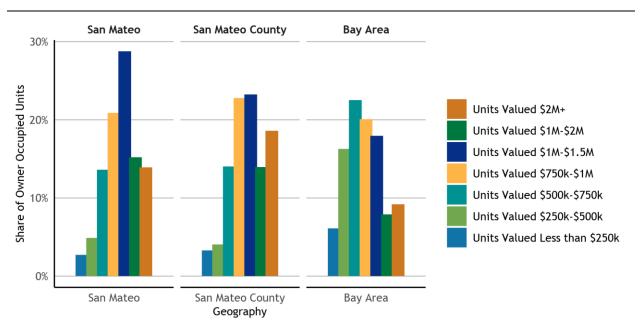

Figure 25: Home Values of Owner-Occupied Units

Universe: Owner-occupied units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25075 For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-07.

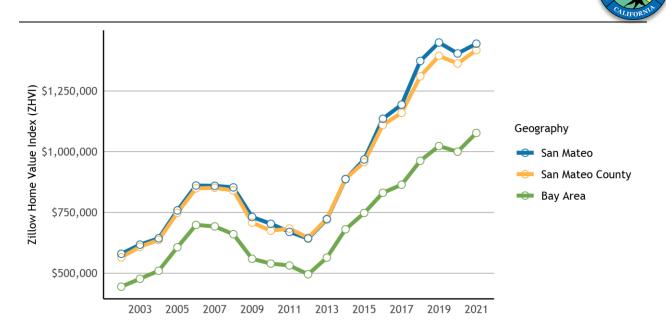

Figure 26: Zillow Home Value Index (ZHVI)

Universe: Owner-occupied housing units

Notes: Zillow describes the ZHVI as a smoothed, seasonally adjusted measure of the typical home value and market changes across a given region and housing type. The ZHVI reflects the typical value for homes in the 35th to 65th percentile range. The ZHVI includes all owner-occupied housing units, including both single-family homes and condominiums. More information on the ZHVI is available from Zillow. The regional estimate is a household-weighted average of county-level ZHVI files, where household counts are yearly estimates from DOF's E-5 series For unincorporated areas, the value is a population weighted average of unincorporated communities in the county matched to census-designated population counts. Source: Zillow, Zillow Home Value Index (ZHVI)

For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-08.

Similar to home values, rents have also increased dramatically across the Bay Area in recent years. Many renters have been priced out, evicted or displaced, particularly communities of color. Residents finding themselves in one of these situations may have had to choose between commuting long distances to their jobs and schools or moving out of the region, and sometimes, out of the state.

In San Mateo, the largest proportion of rental units rented in the *Rent \$3000 or more* category, totaling 26.7%, followed by 21.1% of units renting in the *Rent \$1500-\$2000* category (see Figure 27). Looking beyond the city, the largest share of units is in the *\$3000 or more* category (county) compared to the *\$1500-\$2000* category for the region as a whole.

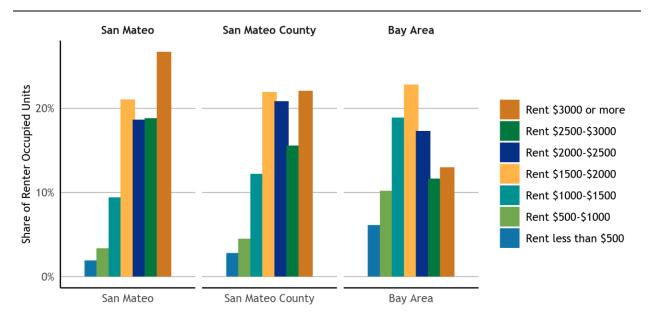

Figure 27: Contract Rents for Renter-Occupied Units

Universe: Renter-occupied housing units paying cash rent Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25056 For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-09.

Since 2009, the median rent has increased by 74.2% in San Mateo, from \$1,630 to \$2,380 per month (see Figure 28). In San Mateo County, the median rent has increased 41.1%, from \$1,560 to \$2,200. The median rent in the region has increased significantly during this time from \$1,200 to \$1,850, a 54% increase.²¹

²¹ While the data on home values shown in Figure 24 comes from Zillow, Zillow does not have data on rent prices available for most Bay Area jurisdictions. To have a more comprehensive dataset on rental data for the region, the rent data in this document comes from the U.S. Census Bureau's American Community Survey, which may not fully reflect current rents. Local jurisdiction staff may want to supplement the data on rents with local realtor data or other sources for rent data that are more current than Census Bureau data.

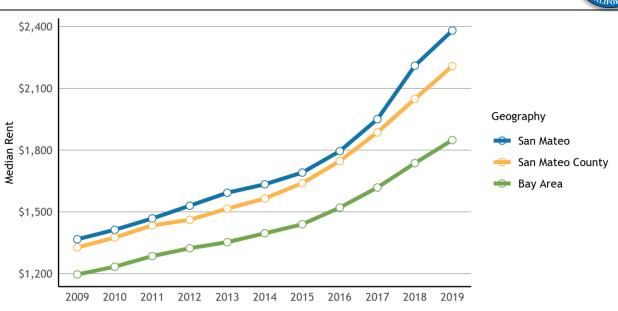

Figure 28: Median Contract Rent

Universe: Renter-occupied housing units paying cash rent

Notes: For unincorporated areas, median is calculated using distribution in B25056.

Source: U.S. Census Bureau, American Community Survey 5-Year Data releases, starting with 2005-2009 through 2015-2019, B25058, B25056 (for unincorporated areas). County and regional counts are weighted averages of jurisdiction median using B25003 rental unit counts from the relevant year.

For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-10.

According to Zumper, an online rent statistics aggregator, the average rent for a studio in San Mateo was \$2,729 in June of 2022, whereas the average rent for a one-bedroom was \$3,200. The average rent for a two-bedroom apartment was \$3,439.²²

5.5 Housing Affordability

The National Association of Homebuilders reports that California cities have some of the lowest homeowner affordability rates in the country, defined as the percentage of homes affordable to the median income family. Despite the high median incomes, especially in the Bay Area, many cannot afford the cost to purchase a home. The San Francisco-Redwood City Division, of which San Mateo is a part, ranked 230th out of 233 metropolitan areas studied in the first quarter of 2021.

Trulia -- an online residential real estate site for homebuyers, sellers, renters and real estate professionals -- provides statistics based on actual sales of housing by location. According to a study conducted by zip code in 2019, only a small percentage of homes of homes in San Mateo were affordable to the metropolitan median income of \$101,000. The following table contains data for the three primary zip codes.

Table 10: Housing Affordability by Zip Code			
Zip Code	% of Homes Affordable to Metro Median Income	Median Home Value	
94401	9.4%	\$903,631	
94402	0.0%	\$1,758,419	
94403	1.9%	\$1,344,813	
Source: National Association of Homebuilders, 2021, see website for more information:			

https://www.trulia.com/research/affordable-neighborhoods/

The high cost of housing means that people wanting to own a home in San Mateo must have significant incomes, even for the relatively less expensive condos.

The decreasing supply of affordable rental units is a countywide phenomenon; it can include Ellis Act evictions (where an owner of a rental property decides to leave the rental business) to owner move-in evictions. Until additional construction of rental units occurs, the combination of strong demand and low vacancies will contribute to an increasingly severe shortage of rental units and a decrease in their affordability.

The following table illustrates the affordable rents associated with each income category. In the case of an extremely low-income household of two people (for example, a single parent with a child), the annual income of \$43,850 translates to a full-time job paying \$21.08 per hour. In this scenario, the maximum rent they could afford would be about \$1,096 per month – far below average rents in the area, even for studios. According to statistics on RentCafe.com, an online data aggregator, the average rent for an apartment is \$2,908 as of June, 2021, a decrease of 10% from the previous year but still much higher than what a lower income household can afford. A household has to earn at least \$116,320 in order to afford the average rent.

Table 11. Anordable Kents for two- and three terson nouseholds					
Income Category	Percent of Median	Income Limit (Two- Person Household)	Two-Person Affordable Rent	Income Limit (ThreePerson Household)	ThreePerson Affordable Rent
Extremely Low-Income	30%	\$43,850	\$1,096	\$49,350	\$1,234
Very Low- Income	50%	\$73,100	\$1,828	\$82,250	\$2,056
Low-Income	80%	\$117,100	\$2,928	\$131,750	\$3,294
Median- Income	100%	\$119,700	\$2,993	\$134,650	\$3,366
Moderate- Income	120%	\$143,600	\$3,590	\$161,550	\$4,039

Table 11: Affordable Rents for Two- and Three-Person Households

Notes: Affordable rents are calculated based on 30% of annual income divided by 12 months. Source: State Department of Housing and Community Development and San Mateo Housing, 2021

Through its Section 8 and other housing programs, HUD provides rental housing assistance to lowerincome households. According to the State Department of Housing and Community Development, more than 500 households in San Mateo currently receive Section 8 rental assistance, in the form of Housing Choice Vouchers.

5.5 Overpayment and Overcrowding

A household is considered "cost-burdened" if it spends more than 30% of its monthly income on housing costs, while those who spend more than 50% of their income on housing costs are considered "severely cost-burdened." Low-income residents are the most impacted by high housing costs and experience the highest rates of cost burden. Spending such large portions of their income on housing puts low-income households at higher risk of displacement, eviction, or homelessness.

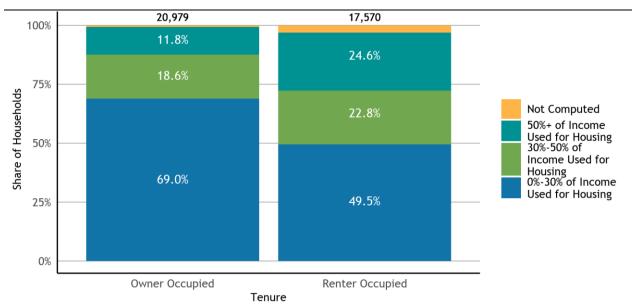

Figure 29: Cost Burden by Tenure

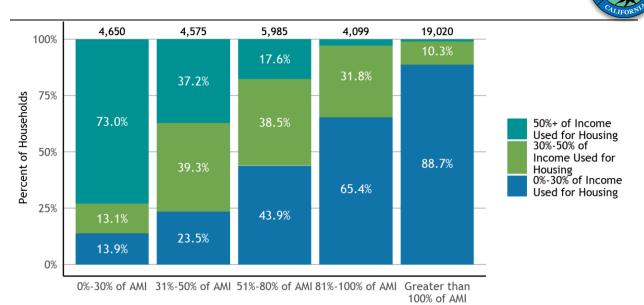

Universe: Occupied housing units

Notes: Cost burden is the ratio of housing costs to household income. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost is "select monthly owner costs", which includes mortgage payment, utilities, association fees, insurance, and real estate taxes. HUD defines cost-burdened households as those whose monthly housing costs exceed 30% of monthly income, while severely cost-burdened households are those whose monthly housing costs exceed 50% of monthly income.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25070, B25091 For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-06.

Renters are often more cost-burdened than owners. While the housing market has resulted in home prices increasing dramatically, homeowners often have mortgages with fixed rates, whereas renters are more likely to be impacted by market increases. When looking at the cost burden across tenure in San Mateo, 22.8% of renters spend 30% to 50% of their income on housing compared to 18.6% of those that own (see Figure 29). Additionally, 24.6% of renters spend 50% or more of their income on housing, while 11.8% of owners are severely cost-burdened.

In San Mateo, 16.8% of households spend 50% or more of their income on housing, while 20.8% spend 30% to 50%. However, these rates vary greatly across income categories (see Figure 30). For example, 73.0% of San Mateo households making less than 30% of AMI spend the majority of their income on housing. For San Mateo residents making more than 100% of AMI, just 0.9% are severely cost-burdened, and 88.7% of those making more than 100% of AMI spend less than 30% of their income on housing.

Income

Figure 30: Cost Burden by Income Level

Universe: Occupied housing units

Notes: Cost burden is the ratio of housing costs to household income. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost is "select monthly owner costs", which includes mortgage payment, utilities, association fees, insurance, and real estate taxes. HUD defines cost-burdened households as those whose monthly housing costs exceed 30% of monthly income, while severely cost-burdened households are those whose monthly housing costs exceed 50% of monthly income. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-05.

Currently, people of color are more likely to experience poverty and financial instability as a result of federal and local housing policies that have historically excluded them from the same opportunities extended to white residents. As a result, they often pay a greater percentage of their income on housing, and in turn, are at a greater risk of housing insecurity.

Black or African American, Non-Hispanic residents are the most cost burdened with *37.9%* spending 30% to 50% of their income on housing, and *Hispanic or Latinx* residents are the most severely cost burdened with *28.6%* spending more than 50% of their income on housing (see Figure 31).

Table 12: Quantified Cost Burden of Low-Income Households by Tenure

Income by Cost Burden (Renters only)	Cost burden > 30%	Cost burden > 50%	Total
Household Income <= 30% HAMFI	3,360	2,825	3,840
Household Income >30% to <=50% HAMFI	1,935	960	2,190
Household Income >50% to <=80% HAMFI	1,845	305	3,060
Household Income >80% to <=100% HAMFI	615	0	1,850
Household Income >100% HAMFI	305	0	6,625
Total	8,060	4,090	17,570
Income by Cost Burden (Owners only)	Cost burden > 30%	Cost burden > 50%	
······································	Cost burden > 30%	Cost builden > 50%	Total
Household Income <= 30% HAMFI	1,515	1,130	2,065
Household Income <= 30% HAMFI	1,515	1,130	2,065
Household Income <= 30% HAMFI Household Income >30% to <=50% HAMFI	1,515 975	1,130 590	2,065 1,875
Household Income <= 30% HAMFI Household Income >30% to <=50% HAMFI Household Income >50% to <=80% HAMFI	1,515 975 1,350	1,130 590 440	2,065 1,875 3,380

<u>CUniverse: Occupied housing units</u>

Notes: Cost burden is the ratio of housing costs to household income. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost is "select monthly owner costs", which includes mortgage payment, utilities, association fees, insurance, and real estate taxes.

Cost burdened renters in the City of San Mateo far outnumber the cost burdened homeowners in most low-income categories. For households at the 30% AMI level, 3,360 renter families are paying over 30% of their household income towards housing while 2,825 renter families are paying over 50% of their income towards housing costs. Meanwhile, at the same 30% AMI level, there are only 1,515 homeowners paying over 30% of their income towards housing and only 1,130 homeowners paying over 50% of their income towards housing. It can be deduced that renters at the extremely low-income category are disproportionately cost burdened by housing costs in the City of San Mateo at a ratio of 3:2 in total population compared to homeowners. At the 50% AMI level, renters are continuing to be slightly more cost burdened in comparison to homeowners with totals of 2,190 and 1,875 respectively. At the 80% AMI level, cost burdened homeowners begin to slightly outnumber cost burdened renter households. At higher income levels, the number of cost burdened homeowner families begin to greatly outnumber the total number cost burdened renters. It is likely that as household income increases compared to AMI, families are more likely to seek ownership housing. Therefore, when quantifying cost burdened households in the City of San Mateo, there is an imbalance of disproportionately high amount of renters at extremely low and very low-income levels while there is a corresponding imbalance of cost burdened homeowners at moderate and above average income levels.

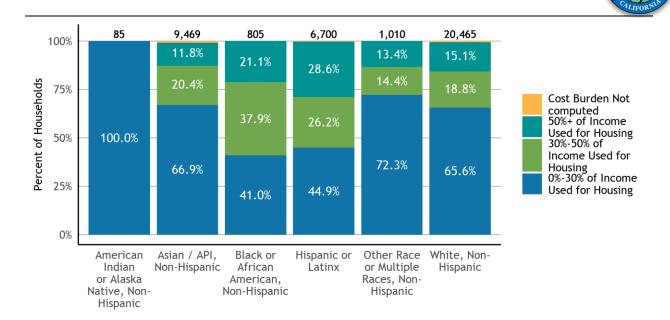

Figure 31: Cost Burden by Race

Universe: Occupied housing units

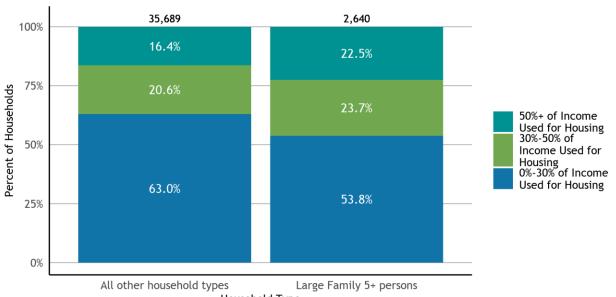

Notes: Cost burden is the ratio of housing costs to household income. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost is "select monthly owner costs", which includes mortgage payment, utilities, association fees, insurance, and real estate taxes. HUD defines cost-burdened households as those whose monthly housing costs exceed 30% of monthly income, while severely cost-burdened households are those whose monthly housing costs exceed 50% of monthly income. For the purposes of this graph, the "Hispanic or Latinx" racial/ethnic group represents those who identify as having Hispanic/Latinx ethnicity and may also be members of any racial group. All other racial categories on this graph represent those who identify with that racial category and do not identify with Hispanic/Latinx ethnicity.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-08.

Large family households often have special housing needs due to a lack of adequately sized affordable housing available. The higher costs required for homes with multiple bedrooms can result in larger families experiencing a disproportionate cost burden than the rest of the population and can increase the risk of housing insecurity.

In San Mateo, 23.7% of large family households experience a cost burden of 30%-50%, while 22.5% of households spend more than half of their income on housing. Some 20.6% of all other households have a cost burden of 30%-50%, with 16.4% of households spending more than 50% of their income on housing (see Figure 32).

Household Type

Figure 32: Cost Burden by Household Size

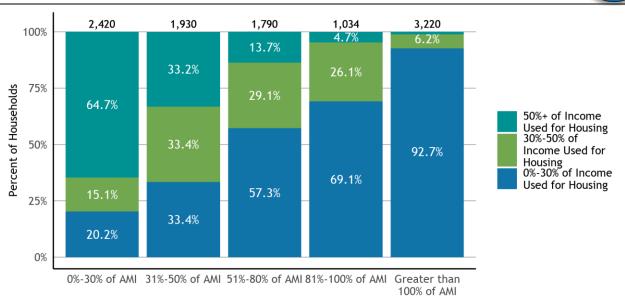

Universe: Occupied housing units

Notes: Cost burden is the ratio of housing costs to household income. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost is "select monthly owner costs", which includes mortgage payment, utilities, association fees, insurance, and real estate taxes. HUD defines cost-burdened households as those whose monthly housing costs exceed 30% of monthly income, while severely cost-burdened households are those whose monthly housing costs exceed 50% of monthly income.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-09.

When cost-burdened seniors are no longer able to make house payments or pay rents, displacement from their homes can occur, putting further stress on the local rental market or forcing residents out of the community they call home. Understanding how seniors might be cost-burdened is of particular importance due to their special housing needs, particularly for low-income seniors. 64.7% of seniors making less than 30% of AMI are spending the majority of their income on housing. For seniors making more than 100% of AMI, 92.7% are not cost-burdened and spend less than 30% of their income on housing (see Figure 33).

Household Income

Figure 33: Cost-Burdened Senior Households by Income Level

Universe: Senior households

Notes: For the purposes of this graph, senior households are those with a householder who is aged 62 or older. Cost burden is the ratio of housing costs to household income. For renters, housing cost is gross rent (contract rent plus utilities). For owners, housing cost is "select monthly owner costs", which includes mortgage payment, utilities, association fees, insurance, and real estate taxes. HUD defines cost-burdened households as those whose monthly housing costs exceed 30% of monthly income, while severely cost-burdened households are those whose monthly housing costs exceed 50% of monthly income. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table SEN-03.

Overcrowding occurs when the number of people living in a household is greater than the home was designed to hold. There are several different standards for defining overcrowding, but this report uses the Census Bureau definition, which is more than one occupant per room (not including bathrooms or kitchens). Additionally, the Census Bureau considers units with more than 1.5 occupants per room to be severely overcrowded.

Overcrowding is often related to the cost of housing and can occur when demand in a city or region is high. In many cities, overcrowding is seen more amongst those that are renting, with multiple households sharing a unit to make it possible to stay in their communities. In San Mateo, 5.5% of households that rent are severely overcrowded (more than 1.5 occupants per room), compared to 0.5% of households that own (see Figure 34). In San Mateo, 7.5% of renters experience moderate overcrowding (1 to 1.5 occupants per room), compared to 1.5% for those who own.

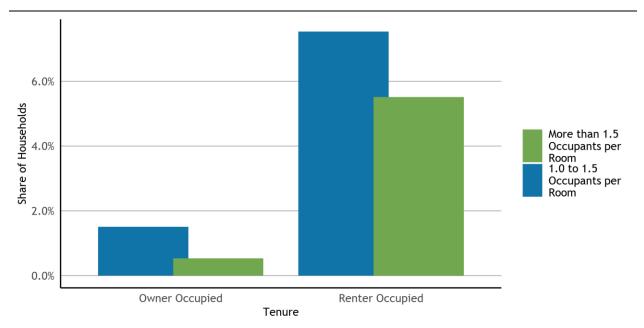

Figure 34: Overcrowding by Tenure and Severity

Universe: Occupied housing units

Notes: The Census Bureau defines an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens), and units with more than 1.5 persons per room are considered severely overcrowded.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-01.

Overcrowding often disproportionately impacts low-income households. 4.4% of very low-income households (below 50% AMI) experience severe overcrowding, while 1.0% of households above 100% experience this level of overcrowding (see Figure 35).

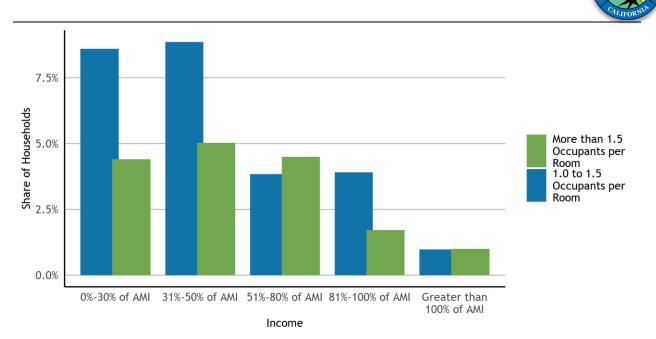

Figure 35: Overcrowding by Income Level and Severity

Universe: Occupied housing units

Notes: The Census Bureau defines an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens), and units with more than 1.5 persons per room are considered severely overcrowded. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-04.

Communities of color are more likely to experience overcrowding similar to how they are more likely to experience poverty, financial instability, and housing insecurity. People of color tend to experience overcrowding at higher rates than White residents. In San Mateo, the racial group with the largest overcrowding rate is *Other Race or Multiple Races (Hispanic and Non-Hispanic)* (see Figure 36)

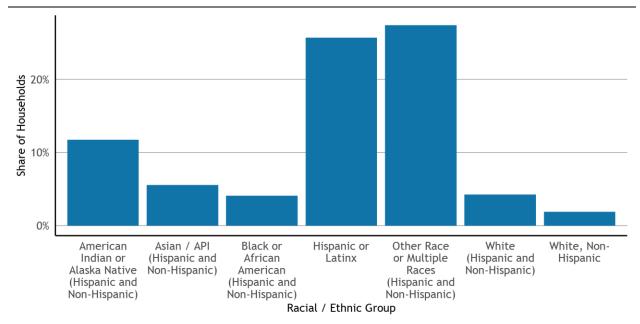

Figure 36: Overcrowding by Race

Universe: Occupied housing units

Notes: The Census Bureau defines an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens), and units with more than 1.5 persons per room are considered severely overcrowded. For this table, the Census Bureau does not disaggregate racial groups by Hispanic/Latinx ethnicity. However, data for the white racial group is also reported for white householders who are not Hispanic/Latinx. Since residents who identify as white and Hispanic/Latinx may have very different experiences within the housing market and the economy from those who identify as white and non-Hispanic/Latinx, data for multiple white sub-groups are reported here. The racial/ethnic groups reported in this table are not all mutually exclusive. Therefore, the data should not be summed as the sum exceeds the total number of occupied housing units for this jurisdiction. However, all groups labelled "Hispanic and Non-Hispanic" are mutually exclusive, and the sum of the data for these groups is equivalent to the total number of occupied housing units.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25014 For the data table behind this figure, please refer to the Data Packet Workbook, Table OVER-03.

6.1 Large Households

Large households often have different housing needs than smaller households. If a city's rental housing stock does not include larger apartments, large households who rent could end up living in overcrowded conditions. In San Mateo, for large households with 5 or more persons, most units (51.6%) are owner occupied (see Figure 37). In 2017, 33.1% of large households were very low-income, earning less than 50% of the area median income (AMI).

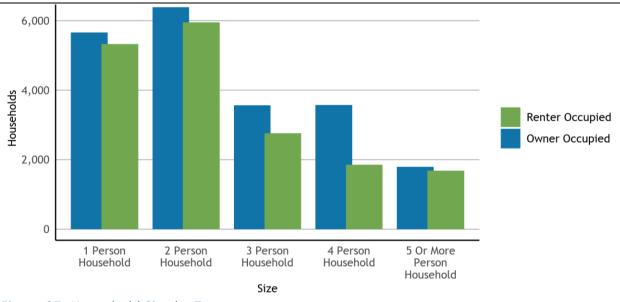

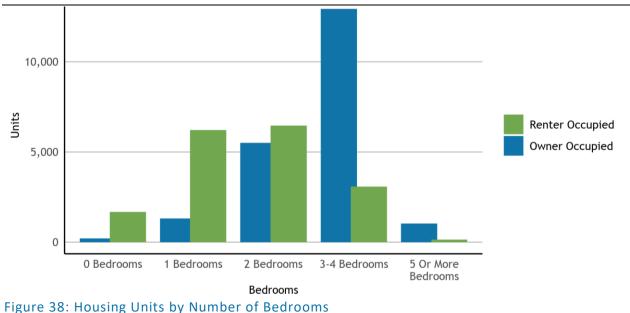

Figure 37: Household Size by Tenure

Universe: Occupied housing units

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25009 For the data table behind this figure, please refer to the Data Packet Workbook, Table LGFEM-01.

In addition to overcrowding, large households also often have a cost burden. In San Mateo, half of all large households that pay too much for housing are lower-income households earning between 0% and 80% of median income.

The unit sizes available in a community affect the household sizes that can access that community. Large families are generally served by housing units with 3 or more bedrooms, of which there are 17,173 units in San Mateo. Among these large units with 3 or more bedrooms, 18.7% are owner-occupied and 81.3% are renter occupied (see Figure 38).

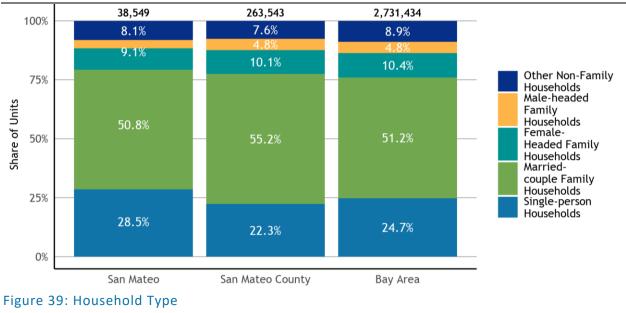

```
Universe: Housing units
```

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B25042 For the data table behind this figure, please refer to the Data Packet Workbook, Table HSG-05.

6.2 Female-Headed Households

Households headed by one person are often at greater risk of housing insecurity, particularly femaleheaded households, who may be supporting children or a family with only one income. In San Mateo, the largest proportion of households is *Married-couple Family Households* at 50.8% of total, while *Female-Headed Households* make up 9.1% of all households.

Universe: Households

Notes: For data from the Census Bureau, a "family household" is a household where two or more people are related by birth, marriage, or adoption. "Non-family households" are households of one person living alone, as well as households where none of the people are related to each other.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B11001 For the data table behind this figure, please refer to the Data Packet Workbook, Table POPEMP-23.

Female-headed households with children may face particular housing challenges, with pervasive gender inequality resulting in lower wages for women. Moreover, the added need for childcare can make finding a home that is affordable more challenging.

In San Mateo, 16.6% of female-headed households with children fall below the Federal Poverty Line, while 4.6% of female-headed households *without* children live in poverty (see Figure 40).

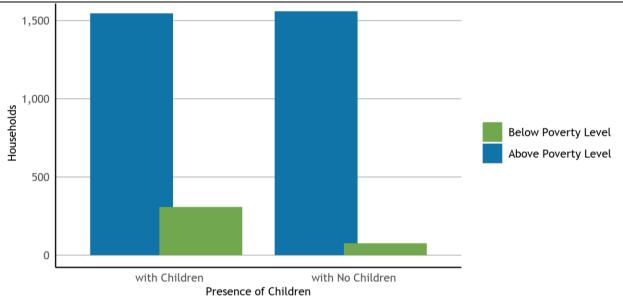

Figure 40: Female-Headed Households by Poverty Status

Universe: Female Households

Notes: The Census Bureau uses a federally defined poverty threshold that remains constant throughout the country and does not correspond to Area Median Income.

Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B17012 For the data table behind this figure, please refer to the Data Packet Workbook, Table LGFEM-05.

6.3 Seniors

Senior households often experience a combination of factors that can make accessing or keeping affordable housing a challenge. They often live on fixed incomes and are more likely to have disabilities, chronic health conditions and/or reduced mobility.

Seniors who rent may be at even greater risk for housing challenges than those who own, due to income differences between these groups. The largest proportion of senior households who rent make 0%-30% of AMI, while the largest proportion of senior households who are homeowners falls in the income group Greater than 100% of AMI (see Figure 41).

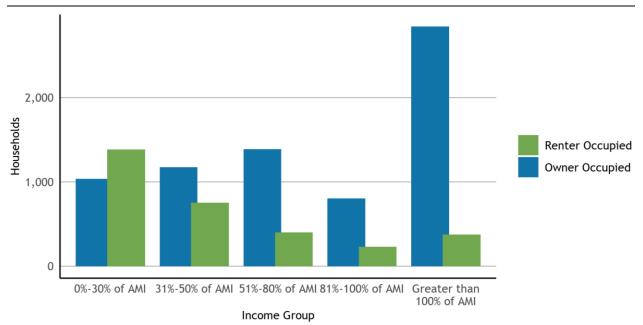

Figure 41: Senior Households by Income and Tenure

Universe: Senior households

Notes: For the purposes of this graph, senior households are those with a householder who is aged 62 or older. Income groups are based on HUD calculations for Area Median Income (AMI). HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County). The AMI levels in this chart are based on the HUD metro area where this jurisdiction is located.

Source: U.S. Department of Housing and Urban Development (HUD), Comprehensive Housing Affordability Strategy (CHAS) ACS tabulation, 2013-2017 release

For the data table behind this figure, please refer to the Data Packet Workbook, Table SEN-01.

6.4 People with Disabilities

People with disabilities face additional housing challenges. Encompassing a broad group of individuals living with a variety of physical, cognitive and sensory impairments, many people with disabilities live on fixed incomes and are in need of specialized care, yet often rely on family members for assistance due to the high cost of care.

When it comes to housing, people with disabilities are not only in need of affordable housing but accessibly designed housing, which offers greater mobility and opportunity for independence. Unfortunately, the need typically outweighs what is available, particularly in a housing market with such high demand. People with disabilities are at a high risk for housing insecurity, homelessness and institutionalization, particularly when they lose aging caregivers. Figure 42 shows the rates at which

different disabilities are present among residents of San Mateo. Overall, 9.1% of people in San Mateo have a disability of any kind.²³

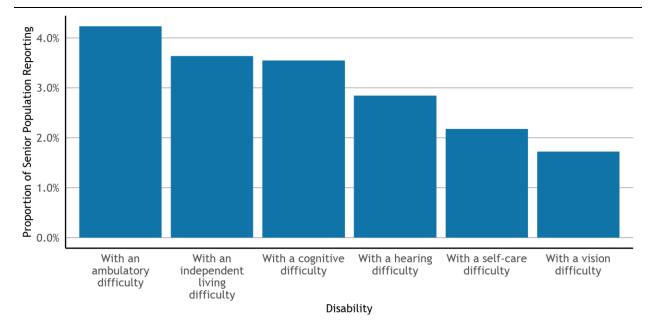

Figure 42: Disability by Type

Universe: Civilian noninstitutionalized population 18 years and over

Notes: These disabilities are counted separately and are not mutually exclusive, as an individual may report more than one disability. These counts should not be summed. The Census Bureau provides the following definitions for these disability types: Hearing difficulty: deaf or has serious difficulty hearing. Vision difficulty: blind or has serious difficulty seeing even with glasses. Cognitive difficulty: has serious difficulty concentrating, remembering, or making decisions. Ambulatory difficulty: has serious difficulty: has serious difficulty: has difficulty: has difficulty and difficulty: has di

For the data table behind this figure, please refer to the Data Packet Workbook, Table DISAB-01.

State law also requires Housing Elements to examine the housing needs of people with developmental disabilities. Developmental disabilities are defined as severe, chronic, and attributed to a mental or physical impairment that begins before a person turns 18 years old. This can include Down's Syndrome, autism, epilepsy, cerebral palsy, and mild to severe mental retardation. Some people with developmental disabilities are unable to work, rely on Supplemental Security Income, and live with family members. In addition to their specific housing needs, they are at increased risk of housing insecurity after an aging parent or family member is no longer able to care for them.²⁴

²³ These disabilities are counted separately and are not mutually exclusive, as an individual may report more than one disability. These counts should not be summed.

²⁴ For more information or data on developmental disabilities in your jurisdiction, contact the Golden Gate Regional Center for Marin, San Francisco and San Mateo Counties; the North Bay Regional Center for Napa, Solano and Sonoma Counties; the

In San Mateo, of the population with a developmental disability, children under the age of 18 make up 35.6%, while adults account for 64.4%.

Universe: Population with developmental disabilities

Notes: The California Department of Developmental Services is responsible for overseeing the coordination and delivery of services to more than 330,000 Californians with developmental disabilities including cerebral palsy, intellectual disability, Down syndrome, autism, epilepsy, and related conditions. The California Department of Developmental Services provides ZIP code level counts. To get jurisdiction-level estimates, ZIP code counts were crosswalked to jurisdictions using census block population counts from Census 2010 SF1 to determine the share of a ZIP code to assign to a given jurisdiction.

Source: California Department of Developmental Services, Consumer Count by California ZIP Code and Age Group (2020) This table is included in the Data Packet Workbook as Table DISAB-04.

Many developmentally disabled persons can live and work independently within a conventional housing environment. More severely disabled individuals require a group living environment where supervision is provided. The most severely affected individuals may require an institutional environment where medical attention and physical therapy are provided. Because developmental disabilities exist before adulthood, the first issue in supportive housing for the developmentally disabled is the transition from the person's living situation as a child to an appropriate level of independence as an adult.

The State Department of Developmental Services (DDS) currently provides community-based services to approximately 329,000 persons with developmental disabilities and their families through a statewide system of 21 regional centers, four developmental centers, and two community-based facilities. The Golden Gate Regional Center provides point of entry to services for people with developmental disabilities in San Mateo County. The center is a private, non-profit community agency that contracts with local businesses to offer a wide range of services to individuals with developmental disabilities and their families. According to its website, as of December 2020, 9,323 consumers were served, of which 63% are male and 37% are female. The average per capita expenditures for all ages is \$32,319. See website: www.dds.ca.gov/rc/dashboard/overview

The most common living arrangement for individuals with disabilities in San Mateo is the home of parent, family, and/or guardian.

6.5 Homelessness

Homelessness remains an urgent challenge in many communities across the state, reflecting a range of social, economic, and psychological factors. Rising housing costs result in increased risks of community members experiencing homelessness. Far too many residents who have found themselves housing insecure have ended up unhoused or homeless in recent years, either temporarily or longer term. Addressing the specific housing needs for the unhoused population remains a priority throughout the region, particularly since homelessness is disproportionately experienced by people of color, people with disabilities, those struggling with addiction and those dealing with traumatic life circumstances. In San Mateo County, the most common type of household experiencing homelessness is those without children in their care. Among households experiencing homelessness that do not have children, 75.5% are unsheltered. Of homeless households with children, most are sheltered in transitional housing (see Figure 43).

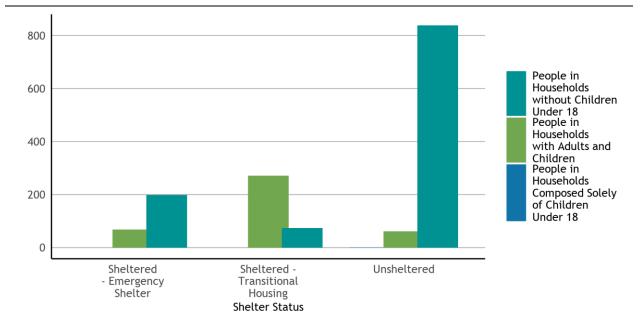

Figure 43: Homelessness by Household Type and Shelter Status, San Mateo County

Universe: Population experiencing homelessness

Notes: This data is based on Point-in-Time (PIT) information provided to HUD by CoCs in the application for CoC Homeless Assistance Programs. The PIT Count provides a count of sheltered and unsheltered homeless persons on a single night during the last ten days in January. Each Bay Area county is its own CoC, and so the data for this table is provided at the county-level. Per HCD's requirements, jurisdictions will need to supplement this county-level data with local estimates of people experiencing homelessness.

Source: U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports (2019)

For the data table behind this figure, please refer to the Data Packet Workbook, Table HOMELS-01.

People of color are more likely to experience poverty and financial instability as a result of federal and local housing policies that have historically excluded them from the same opportunities extended to white residents. Consequently, people of color are often disproportionately impacted by homelessness, particularly Black residents of the Bay Area. In San Mateo County, White (Hispanic and Non-Hispanic) residents represent the largest proportion of residents experiencing homelessness and account for 66.6% of the homeless population, while making up 50.6% of the overall population (see Figure 44).

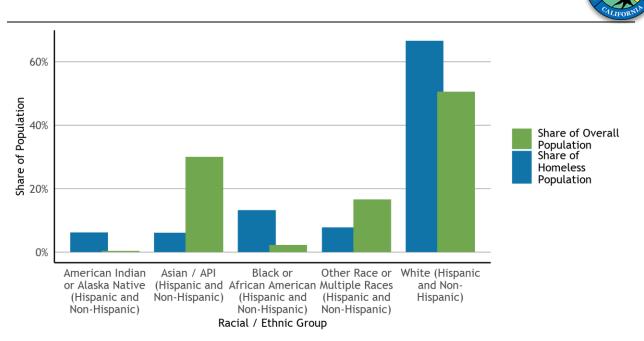

Figure 44: Racial Group Share of General and Homeless Populations, San Mateo County

Universe: Population experiencing homelessness

Notes: This data is based on Point-in-Time (PIT) information provided to HUD by CoCs in the application for CoC Homeless Assistance Programs. The PIT Count provides a count of sheltered and unsheltered homeless persons on a single night during the last ten days in January. Each Bay Area county is its own CoC, and so the data for this table is provided at the county-level. Per HCD's requirements, jurisdictions will need to supplement this county-level data with local estimates of people experiencing homelessness. HUD does not disaggregate racial demographic data by Hispanic/Latinx ethnicity for people experiencing homelessness. Instead, HUD reports data on Hispanic/Latinx ethnicity for people experiencing homelessness in a separate table. Accordingly, the racial group data listed here includes both Hispanic/Latinx and non-Hispanic/Latinx individuals.

Source: U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports (2019); U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B01001(A-I) For the data table behind this figure, please refer to the Data Packet Workbook, Table HOMELS-02.

In San Mateo, Latinx residents represent 38.1% of the population experiencing homelessness, while Latinx residents comprise 24.7% of the general population (see Figure 45).

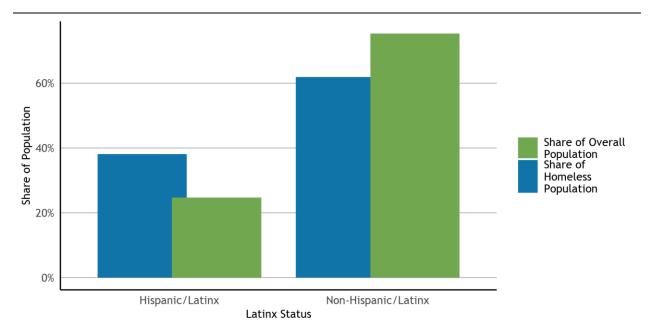

Figure 45: Latinx Share of General and Homeless Populations, San Mateo County

Universe: Population experiencing homelessness

Notes: This data is based on Point-in-Time (PIT) information provided to HUD by CoCs in the application for CoC Homeless Assistance Programs. The PIT Count provides a count of sheltered and unsheltered homeless persons on a single night during the last ten days in January. Each Bay Area county is its own CoC, and so the data for this table is provided at the county-level. Per HCD's requirements, jurisdictions will need to supplement this county-level data with local estimates of people experiencing homelessness. The data from HUD on Hispanic/Latinx ethnicity for individuals experiencing homelessness does not specify racial group identity. Accordingly, individuals in either ethnic group identity category (Hispanic/Latinx or non-Hispanic/Latinx) could be of any racial background.

Source: U.S. Department of Housing and Urban Development (HUD), Continuum of Care (CoC) Homeless Populations and Subpopulations Reports (2019); U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B01001(A-I) For the data table behind this figure, please refer to the Data Packet Workbook, Table HOMELS-03.

Many of those experiencing homelessness are dealing with severe issues – including mental illness, substance abuse and domestic violence – that are potentially life threatening and require additional assistance. In San Mateo County, homeless individuals are commonly challenged by severe mental illness, with 305 reporting this condition (see Figure 46). Of those, some 62.0% are unsheltered, further adding to the challenge of handling the issue.

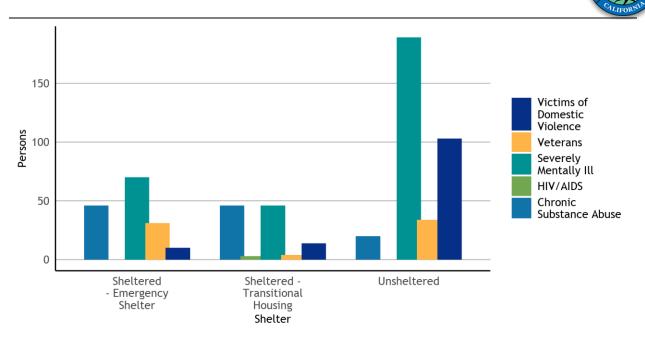

Figure 46: Characteristics for the Population Experiencing Homelessness, San Mateo County

Universe: Population experiencing homelessness

Notes: This data is based on Point-in-Time (PIT) information provided to HUD by CoCs in the application for CoC Homeless Assistance Programs. The PIT Count provides a count of sheltered and unsheltered homeless persons on a single night during the last ten days in January. Each Bay Area county is its own CoC, and so the data for this table is provided at the county-level. Per HCD's requirements, jurisdictions will need to supplement this county-level data with local estimates of people experiencing homelessness. These challenges/characteristics are counted separately and are not mutually exclusive, as an individual may report more than one challenge/characteristic. These counts should not be summed.

For the data table behind this figure, please refer to the Data Packet Workbook, Table HOMELS-04.

In San Mateo, the student population experiencing homelessness totaled 313 during the 2019-2020 school year and decreased by 24.6% since the 2016-2017 school year. By comparison, San Mateo County has seen a 37.5% decrease in the population of students experiencing homelessness since the 2016-17 school year, and the Bay Area population of students experiencing homelessness decreased by 8.5%. During the 2019-2020 school year, there were still some 13,718 students experiencing homelessness throughout the region, adding undue burdens on learning and thriving, with the potential for longer term negative effects.

The number of students in San Mateo experiencing homelessness in 2019 represents 26.2% of the San Mateo County total and 2.3% of the Bay Area total.

The data used for this table was obtained at the school site level, matched to a file containing school locations, geocoded and assigned to jurisdiction, and finally summarized by geography.

Source: California Department of Education, California Longitudinal Pupil Achievement Data System (CALPADS), Cumulative Enrollment Data (Academic Years 2016-2017, 2017-2018, 2018-2019, 2019-2020)

This table is included in the Data Packet Workbook as Table HOMELS-05.

The San Mateo County Human Services Agency (HSA), in close collaboration with community partners, conducts the bi-annual One Day Homeless Count and Survey (count). The purpose of the One Day Homeless Count and Survey is to gather and analyze information to help the community understand homelessness in San Mateo County. This is one data set, among others, that provides information for effective planning of services to assist people experiencing homelessness and people at risk of homelessness. HSA's Center on Homelessness and the San Mateo County Continuum of Care (CoC) Steering Committee were responsible for overseeing this data collection effort, with assistance from a broad group of community partners, including non-profit social service providers, city and town governments, and people who had former or current homelessness experience.

The One Day Homeless Count and Survey was designed to meet two related sets of data needs. The first is the requirement of the United States Department of Housing and Urban Development (HUD) that communities applying for McKinney-Vento Homelessness Assistance funds (also known as Continuum of Care or "CoC" funds) must conduct a point-in-time count of homeless people a minimum of every two years. These counts are required to take place in the last ten days of January. The One Day Homeless Count and Survey was conducted in January 2019 to meet this HUD requirement. The previous HUDmandated count was conducted in January 2017.

The second set of data needs is for local homeless system planning, as the One Day Homeless Count and Survey provides information about people experiencing homelessness and about trends over time.

The 2019 count determined that there were 1,512 people experiencing homelessness in San Mateo County on the night of January 30, 2019, comprised of:

- 901 unsheltered homeless people (living on streets, in cars, in recreational vehicles (RVs), in tents/encampments), and
- **611 sheltered** homeless people (in emergency shelters and transitional housing programs).

This finding of 1,512 people was higher than the 2017 and 2015 counts, but lower than the 2011 and 2013 counts. The number of people living in shelters in 2019 remained similar to the number counted in 2017.

The overall increase in homelessness from 2017 to 2019 was driven primarily by a significant increase in the number of people living in RVs (127% increase). There was also an increase in the number of people sleeping on the street (24% increase). However, compared to 2017, the 2019 count found a decrease in people estimated to be sleeping in cars (7% decrease) and in tents/encampments (31% decrease).

While no unsheltered families were directly observed during the 2019 count, the number of families with children experiencing unsheltered homelessness was estimated to have been 16 (in cars, tents/encampments, and/or RVs). This number represents a 16% decrease in families from the 19 families estimated to be unsheltered in the 2017 count.

The count found 74 unsheltered individuals in the City of San Mateo, representing 8% of the Countywide unsheltered population. This was an increase from 2017, when 48 homeless individuals were located, but lower than in 2013, when 103 people were counted. Although demographic data are not available for each individual jurisdiction, a number of key findings were made.

The 2019 One Day Homeless Count and Survey counted 1,018 households comprised of 1,110 single adults and 119 family households comprised of 401 adults and children.

A person in an adult only household was most likely to be unsheltered (75.5%), over 25 years old (95.1%), male (75.6%), non-Hispanic (64.9%), Caucasian (70.5%), and not experiencing chronic homelessness (71.4%). In contrast, family households were most likely to be in transitional housing (67.6%), have more children than adults (59.1% vs. 40.9% respectively), and be headed by a female (57.1%). People heading family households were also predominantly non-Hispanic (53.6%) and Caucasian (55.9%), however, race and ethnicity showed more variation in family households than adult only households.

Further, the percentage of people experiencing chronic homelessness over time increased from 19% in 2017 to 21% in 2019, but this figure was substantially lower than in 2013, when 45% were chronically homeless. Veterans in 2019 represented 5% of adults, a reduction from 11% in 2019. Severe mental illness, alcohol and/or drug use, and history of domestic violence were some of the self-reported conditions of those who were counted. For more information, see website: <u>hsa.smcgov.org/2019-one-day-homeless-count</u>

 HOUSING
 ELEMENT

6.6 Farmworkers

Farmworkers are traditionally defined as persons whose primary incomes are earned through seasonal or permanent agricultural work. Farmworkers have special housing needs because they earn lower incomes than many other workers. In many parts of Northern California, agriculture production is an important contribution to local economies, especially in Napa and Sonoma Counties. According to the U.S. Department of Agriculture Census of Farmworkers, the number of permanent farmworkers in San Mateo County has decreased since 2002, totaling 978 in 2017, while the number of seasonal farm workers has decreased, totaling 343 in 2017 (see Figure 47).

In San Mateo, there are no known farmworkers, and it does not have any farm housing or land remaining in agricultural use. Further, no land within San Mateo is designated for agricultural use, except for the San Mateo County Event Center site and a parcel located within the College of San Mateo. According to ACS 2019 five-year data, there could be an estimated 30 farmworkers in San Mateo; however, the margin of error for this figure is +/- 42, meaning that this information is unreliable. Even at 30 farmworkers, this represents only 0.03% of the total population in the City. Maps from the State of California Department of Conservation Farmland Mapping and Monitoring Program show no farmland in San Mateo. Due to the low number of agricultural workers in the City, the housing needs of migrant and/or farmworker housing need can be met through general affordable housing programs.

In San Mateo, there were no reported students of migrant workers in the 2019-2020 school year, which is consistent with the finding that there are likely no farmworkers in the community (see Table 15). The trend for the region for the past few years has been a decline of 2.4% in the number of migrant worker students since the 2016-2017 school year. The change at the county level is a 57.1% decrease in the number of migrant worker students since the 2016-2017 school year.

Notes: Farm workers are considered seasonal if they work on a farm less than 150 days in a year, while farm workers who work on a farm more than 150 days are considered to be permanent workers for that farm.

Source: U.S. Department of Agriculture, Census of Farmworkers (2002, 2007, 2012, 2017), Table 7: Hired Farm Labor

For the data table behind this figure, please refer to the Data Packet Workbook, Table FARM-02.

6.7 Non-English Speakers

California has long been an immigration gateway to the United States, which means that many languages are spoken throughout the Bay Area. Since learning a new language is universally challenging, it is not uncommon for residents who have immigrated to the United States to have limited English proficiency. This limit can lead to additional disparities if there is a disruption in housing, such as an eviction, because residents might not be aware of their rights or they might be wary to engage due to immigration status concerns. In San Mateo, 8.5% of residents 5 years and older identify as speaking English not well or not at all, which is above the proportion for San Mateo County. Throughout the region the proportion of residents 5 years and older with limited English proficiency is 8%.

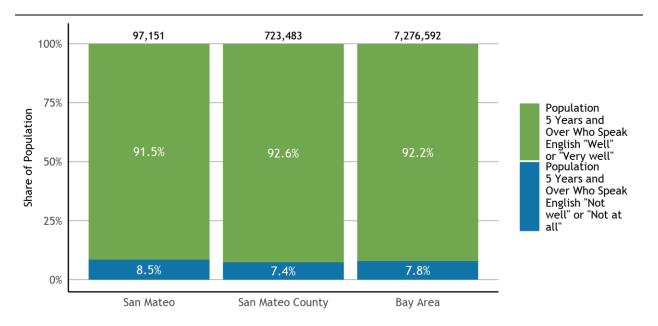

Figure 48: Population with Limited English Proficiency

Universe: Population 5 years and over Source: U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B16005 For the data table behind this figure, please refer to the Data Packet Workbook, Table AFFH-03.

INTRODUCTION

San Mateo County is a great place to work, live and play. But like the rest of the region, we are experiencing housing challenges. While a lack of housing to meet the demands of our dynamic economy and growing workforce remains a key issue, our housing needs are also diverse and changing. Just as our individual housing needs change over the course of our lifetime, the housing needed by our communities change too. Understanding those changes is critical to shaping housing policies and programs that ensure our communities are places where all of us can thrive, regardless of our age, income, and specific circumstances.

Here are some highlights of trends related to the people, jobs, and households of San MateoCounty, and what they mean for our housing needs today and into the future.

KEY TAKEAWAYS:

- By 2026, one out of five residents will be 65 or over
- San Mateo County's population is becoming more diverse

- The number of households will continue to grow
- Housing rent and prices continue to increase

- The number of jobs will continue to grow
- Although the median income is high, many jobs paylow wages

Jobs

PEOPLE

By 2026, one outof five residents will be 65 or over

Under 25 25-44 45-64 65+

15% Age 2020 27% 29% 27% 4ge 2026 27% 26%

San Mateo County makes up 10 percent of the total Bay Area population, which is the fifth largest metropolitan area in the country. The number of people living here has steadily grown the past few decades. **In 2020, the population was estimated to be 773,244, an increase of 19 percent since 1990¹.** That trend is expected to continue despite the impact of the recent pandemic because more jobs continue to be added.

People are also living longer, with those 65 and over expected to make up nearly 20 percent of the population by 2026. Equally important is the fact that Millennials recently surpassed the Baby Boomers as our largest generation. As Millennials enter their 40s, they will continue to shape countywide housing needs.By 2026, people 25-44 and 45-64 will make up more than 50 percent of the population².

What does this mean for housing needs?

Both generations have been showing a preference

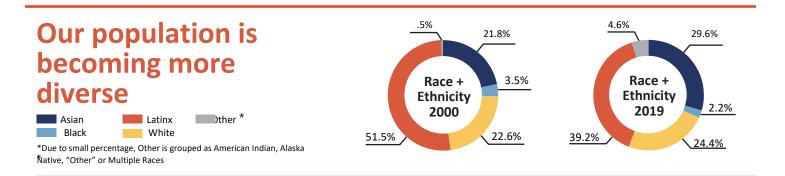

for more walkable, mixed-use neighborhoods, that are close to work, schools, parks, and amenities. The majority of seniors prefer to stay in their homes and communities, or age-in-place. Yet many live on fixed incomes and may have mobility issues as they age, which require supportive services.

Simultaneously, Millennials are less likely to own homes and have less savings than previous generations; are more likely to live alone and delay marriage; and as they start families, may be in greaterneed of support when purchasing their first home. Coupled with increasing housing prices, it is harder foryounger generations to rent or purchase a home than it was for current residents.

With more people 65 and over than there were 10 or 20 years ago we have to address how to support our seniors as they get older so they can stay in their homes and communities, and make sure young people, new families and our workers can find housing they can afford that meets their needs.

¹ U.S. Census, American Community Survey ² Claritias Population Facts 2021

San Mateo County is a very diverse place to live, even when compared to the State of California. Countywide,more than one-third of the population are foreign bornand almost half speak a language other than English at home. By contrast, a quarter of all Californians are foreign born and less than a quarter speak a languageother than English at home. Over 120 identified languages are spoken in San Mateo County, with top languages including Spanish (17 percent), Chinese (8 percent) and Tagalog (6 percent).

Our population has become increasingly more diverse over time. In 2000, more than half of people identified as White, which fell to 39 percent in 2019, and is expected to decrease further to 35 percent by 2026. However, while the Asian and Latinx populations increased during that time, the Black population decreased by almost half, from 3.5 to 2.2 percent³.

What does this mean for housing needs?

When planning for housing, we need to consider a variety of housing needs—like larger homes for multi- generational families or those with more children—and how to create opportunities for everyone to access quality, affordable housing near schools, transit, jobs, and services.

Past exclusionary practices have prevented people of color from purchasing homes, living in certain neighborhoods, and building wealth over time. As a result, they are more likely to experience poverty, housing insecurity, displacement, and homelessness. And while many of our communities are very diverse, we are still contending with segregation and a lack of equitable opportunities. To help prevent displacement due to gentrification and create a future where it is possible for everyone to find the housing they need, it will be important to plan for a variety of housing types and affordability options in all neighborhoods.

DIVERSITY Past and projected percentage of Black, Indigenous and People of Color (BIPOC) 49% 2000 2019 2026 Since 2000: **BIPOC** population growth **†** 12.3% from 48.5% to 60.8% 7.8% **Asian Population growth** from 21.8% to 29.6% 2.3% **Black Population decline** from 3.5% to 2.2%

HOUSEHOLDS + HOUSING

The number of households will continue to grow

265K Households in 2020 Households in 2050

394K

That's a **48%** increase

Over the past 30 years, new home construction has notkept up with the number of jobs our economy keeps adding. This has led to a housing shortage.

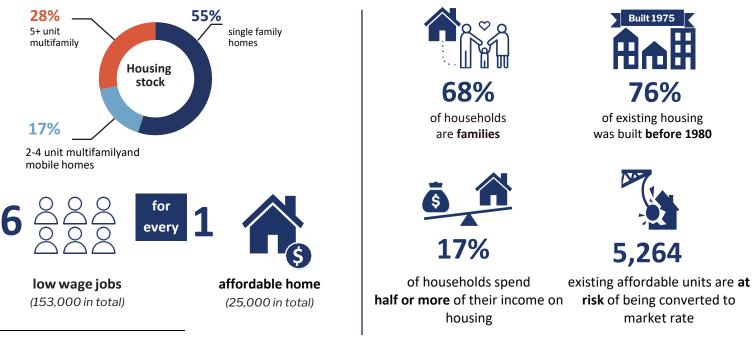

In 2020, there were 265,000 households in San Mateo County. By 2050 we expect that to increase by almost half to 394,000⁴. This growing demand will continue to put pressure on home prices and rents. And given that nearly 75 percent of our housing was built before 1980 there will also be the need to upgrade older homes. While this will be essential to make sure housing is of high quality and safe to residents, redevelopment or repair can sometimes result in a loss of affordable housing, especially in older multi-unit buildings.

For every six low-wage jobs (20 an hour) there is one home in the county that is affordable to such a worker (monthly rent of 1,500)⁵.

What does this mean for housing needs?

We not only need to plan for more housing, but also consider how to best support the development of low and moderate income housing options while preserving existing affordable homes. This includes transitional and supportive housing options for the unhoused, and universal design to meet accessibility and mobility needs.

Although the majority of housing produced in the pastfew decades has been single-family homes or larger multifamily buildings, some households have become increasingly interested in "missing middle" housing— smaller homes that include duplexes, triplexes, townhomes, cottage clusters, garden apartments and accessory dwelling units (ADUs). These smaller homesmay provide more options to a diversity of community members across income, age, and household size.

⁴ Plan Bay Area 2050 <u>Projected Growth Pattern</u>, U.S. Census, American Community Survey ⁵ Association of Bay Area Governments <u>Jobs Housing Fit</u>

Housing rent and prices continue to increase

2009 to 2020

Median rent increased 41%

Home values more than doubled

\$1.4M

The Bay Area is a great place to live. But throughout the region and county there just isn't enough housing for all income levels, which has made costs go up. Home prices and rents have been steadily increasing the pasttwo decades, but in recent years the jump has been dramatic. **Since 2009, the median rent increased 41 percent to \$2,200, and median home values have more than doubled to \$1,445,000**⁶.

Overall, many residents are paying too much on housing, while many others have been priced out entirely. If a household spends more than 30 percent of its monthly income on housing, it is considered *cost-burdened*. If it spends more than 50 percent, it is considered *severely costburdened*. Renters are usually more cost-burdened than homeowners. While home prices have increased dramatically, homeownersoften benefit from mortgages at fixed rates, whereas renters are subject to ups and downs of the market.

In San Mateo County, 17 percent of households spendhalf or more of their income on housing, while 19 percent spend between a third to a half. However, these rates vary greatly across income and race. Of those who are extremely low income—making 30 percent or less of the area median income (AMI)—88 percent spend more than half their income on housing. And Latino renters and Black homeowners are disproportionately cost burdened and severely cost-burdened. Given that people in this situation have a small amount of income to start with, spendingmore than half what they make on housing leaves them with very little to meet other costs, such as food, transportation, education, and healthcare. Often very low-income households paying more than 50 percent of their income on rent are at a greater risk ofhomelessness⁷.

As a result, more people are living in overcrowded or unsafe living conditions. They are also making the tough choice to move further away and commute long distances to work or school, which has created more traffic. Since low income residents and communities of color are the most cost burdened, they are at the highest risk for eviction, displacement, and homelessness.

What does this mean for housing needs?

\$675K

Although there are complex supply, demand and economic factors impacting costs, not having enough housing across all incomes has meant rents and pricesare just higher. Programs and policies that can support more homes across all income levels, particularly very low, low, and moderate income, are essential, as are more safe, affordable housing options to addresshomelessness.

JOBS

The number of jobs will continueto grow

416.7K Jobs in 2020

507K

Jobs in 2050

That's a **22%** increase

The Bay Area and San Mateo County have had very strong economies for decades. While some communities have more jobs, and some have less, we have all been impacted by the imbalance of job growthand housing.

Since 2010 we have added over 100,000 jobs but only 10,000 homes⁸. At the same time, our population is growing naturally, meaning more people are living longer while our children are growing up and moving out into homes of their own. All of this impacts housing demand and contributes to the rising cost of homes. We need more housing to create a better balance.

In 2020, there were 416,700 jobs and by 2050 we expect that to increase 22 percent to 507,000°. While some jobs pay very well, wages for many others haven't kept up with how costly it is to live here.

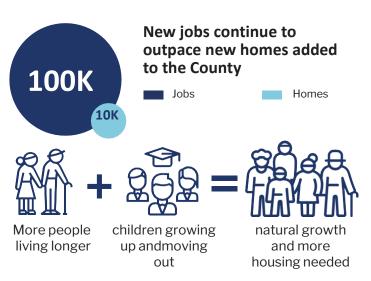

What does this mean for housing needs?

As we plan for housing, we need to consider the needs of our workforce—folks who are a part of our communities, but often end their day by commuting long distances to a place they can afford. Many have been displaced in recent decades or years, as housing and rent prices soared along with our job-generating economy. The lack of workforce housing affects us all, with teachers, fire fighters, health care professionals, food service providers and many essential workers being excluded from the communities they contribute to every day. The long-term sustainability of our communities depends on our ability to create more affordable and equitable housing options.

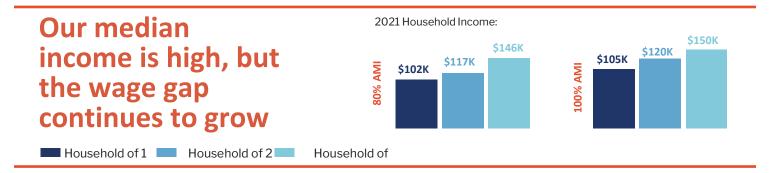

NEW JOBS TO NEW HOUSING

2010 - 2020

⁸ U.S. Census American Community Survey, State of CA Employment Development Dept (EDD) ⁹ Plan Bay Area 2050 <u>Projected Growth Pattern</u>

To be considered low or moderate income in the Bay Area means a very different thing than in most parts of the country. The *income or wage gap—the difference between the highest and lowest wages*—is large in our region. Affordable housing here can mean that your favorite hairstylist, your child's principal, or the friendly medical assistant at your doctor's office can qualify for—and often needs—below market rate or subsidizedaffordable housing so they can live close to their work.

The starting point for this calculation is the Area Median Income (AMI)—the middle spot between the lowest and highest incomes earned in San Mateo County. Simply put, half of households make more, and half of households make less. Moderate income is80 to 120 percent of the AMI, low income is 50 to 80 percent AMI and very low income is 30 to 50 percent AMI. Below 30 percent AMI is considered extremely low income. The rule of thumb is households should expect to pay about a third of their income on housing.

In San Mateo County, the AMI is \$104,700 for a single person, \$119,700 for a household of two and \$149,600 for a family of four. When we talk about affordable housing, we mean housing that is moderately priced for low or moderate income residents so that new families and the workforce can live in our communities. Affordable housing programs are generally for those who earn 80 percent or below the AMI, which is \$102,450 for a single person, \$117,100 for a household of two and \$146,350 a yearfor a household of four¹⁰.

What does this mean for housing needs?

Given the price of land in San Mateo County and what it costs to build new housing, creating affordable housing is extremely challenging—and often impossible withoutsome form of subsidy. Sometimes this is in the form of donated land from a local government or school district. Sometimes this is in the form of incentives to developers or zoning rules requiring affordable units to be included. And most commonly, this is through special financing, grants, and tax credits. Often all of these factors and more are needed to make affordablehousing work. The housing element process is an opportunity for each community to look at what's possible and put in place supportive policies and programs to help make affordability a reality.

1 INTRODUCTION

The purpose of the constraints analysis section, per Government Code Section 65583(a)(5-6), is to identify and analyze governmental and non-governmental factors (constraints) that inhibit the development, improvement or maintenance of housing that hinder a jurisdiction from meeting its share of the regional housing needs.

The analysis in this appendix assesses the specific governmental standards and processes; and identifies local efforts to remove these constraints. Examples of such constraints include land use controls, development standards, entitlement and permit fees, review processes, and compliance with Federal and State laws intended to facilitate housing for lower-income and special needs households.

Additionally, non-governmental constraints that inhibit the development, improvement or maintenance of housing are evaluated in this document, including the availability of financing, price of land, cost of construction, access to credit, requests to develop housing at reduced densities, and length of time between receiving approval for a housing development and submittal of an application for building permits for that housing development.

The analysis within this appendix has informed the City of San Mateo's policy approach in the current Housing Element cycle to reduce constraints and make it easier and more affordable to develop housing including housing for persons with disabilities, supportive housing, transitional housing, and emergency shelters.

2 GOVERNMENTAL CONSTRAINTS

Governmental policies and regulations can result in both positive and negative effects on the availability and affordability of housing. This section, as required by Government Code Section (a)(5), describes City policies and regulations that could potentially constrain the City's ability to achieve its housing goals. Potential constraints to housing include zoning regulations, development standards, infrastructure requirements, development impact fees, and the development approval processes. While government policies and regulations are intended to serve public objectives and further the public good, the City of San Mateo recognizes that its actions can potentially constrain the availability and affordability of housing to meet the community's future needs. The City has implemented several measures to reduce development costs and streamline the approval process, as described in this section.

2.1 Land Use Controls

2.1.1 Planning and Zoning Code

The Zoning Code has the most immediate effect on the built environment. Zoning regulates the use of land and structures, the density of development¹ and population, the height and bulk of structures, parking provisions, open space requirements, landscaping standards and other design requirements. The City of San Mateo's Zoning Code has been written to accommodate residential uses throughout the city, as shown in Table 1. This includes single-family housing, multi-family housing, emergency shelters, and senior housing, among other uses. A summary of the City's residential development standards for all zoning districts is provided as Table 2.

Single-family neighborhoods include the zones R1-A, R1-B, and R1-C. The R1-A zone consists of the San Mateo Park neighborhood and College of San Mateo campus. These parcels are generally larger in size and have a floor area ratio (FAR) allowance of 0.4 and minimum parcel area of 10,000 square-feet. The R1-B and R1-C zones represent most single-family neighborhoods throughout the city. Both zones have a maximum FAR of 0.5 and the minimum parcel size is 6,000 square-feet for R1-B and 5,000 square-feet for R1-C. Most of the city's single-family neighborhoods are developed but the City has seen a significant increase in permit applications for accessory dwelling units since 2020.

A substantial amount of land is zoned for multi-family residential uses, mixed-use residential and commercial development. Multi-family uses are concentrated around the Downtown core, Transit Oriented Development (TOD) zone, El Camino Real and highway corridors. Commercial (C) and office (E) districts also permit housing development through residential overlay zones (/R, /R4, and /R5). <u>Sites</u> <u>located outside the residential overlay zones also allow housing development through a Special Use</u> <u>Permit, as discussed further in Section 2.7.7.</u> There are also special standards to allow increased density

¹ The City also has development restrictions associated with voter-approved Measure Y as described in Section 3.5 of this Appendix.

for senior citizen housing units and for affordable housing projects pursuant to the State Density Bonus Law.

The setbacks for multi-family residences are modest and vary by location. Maximum heights range between 35 feet to 55 feet in the R3, R4, R5 and R6 zones, with the downtown zones primarily allowing up to 55 feet. The City does not limit the number of stories in buildings, thus a three-story building is typically allowed under the 35-foot height limit. Open space requirements apply to Multi-family (R3, R4-D, R5-D, R6-D) zones and Residential Overlay (/R, /R4 and /R5) zoning districts. However, this requirement can be provided as private open space, such as patios and deck area, or by incorporating public open space, such as common plaza and garden areas, or a combination of both. Additionally, landscaped areas located within the required building setback areas also count towards meeting the open space requirement. The City allows maximum flexibility in meeting these requirements. Concerns were raised regarding open space requirements for multi-family residences located in the R3 zones. However, in review of recently approved projects, staff found that these standards do not preclude residential developments. Examples of recently approved projects in the R3 zone include a small three-unit townhome development located on a 7,500 square-feet lot. The project was able to achieve a new threestory, three-bedroom detached townhome proposal under the current standards for parking, open space, density (17 DUA) and building height (35 feet) limitations. The City will continue to evaluate development standards in these districts to encourage Missing Middle housing under Policy H 1.13. In addition, density and floor area ratio increase for larger land areas located within multi-family zoning districts. Multi-family residential density is based on land area and ranges from 17 to 50 dwelling units per net acre. Projects may also request up to 75 dwelling units per net acre with the City's Community Benefits Program, as discussed further in the following sections.

Through community outreach conducted for this Housing Element, staff convened a focus-group of local housing developers and architects (Builders Focus Group) to discuss constraints associated with past projects. A key theme that emerged was related to constraints of the City's existing height limits, floor area definitions, maximum density of 50 dwelling units per acre under Measure Y, and design review guidelines that feel subjective. Most projects apply the State Density Bonus in order to exceed existing density and height limitations. The City recognizes these constraints and is in the process of developing Objective Design Standards (ODS) for multi-family housing projects (Housing Policy H 1.18) and evaluating the potential for a joint Density Bonus and Community Benefits Program that provides greater flexibility to developers and enhanced options when projects exceed minimum state requirements for affordability (Policy H 1.3). Additionally, the City will evaluate and update the zoning code with a focus toward facilitating affordable and Missing Middle housing, reducing constraints on housing and mixed-use developments by updating definitions for floor area, reviewing and modernizing parking and open space requirements, potentially including a minimum housing density requirement, and exploring housing overlay and other development standards applicable to housing and mixed-use developments (Housing Policies H 1.9, 1.10, 1.11, 1.12 and H 1.13). The City has also included a program to complete the General Plan Update, which is facilitating a community discussion to build consensus around how to best address

the housing constraints that result from the building height and density limits under Measure Y (Housing Policy H 1.21).

Source: City of San Mateo, 2022

Notes: Blank indicates not permitted; P = Permitted and subject to compliance with development standards; P1 = Permitted and subject to additional regulations; S = Special Use Permit; and S1 = Special Use Permit and subject to additional regulations.

Accessory Dwelling Units (ADUs) are allowed in all residential zoning districts, including commercial and office districts that contain a residential overlay.

Manufactured Home is defined as a structure designed to be used as a dwelling with or without permanent foundation. Senior Citizen Housing is subject to a Special Use Permit and standards listed in SMMC 27.61.

<u>Apartment Hotels are intended for permanent quests to reside in individual quest rooms or dwelling units. Kitchen facilities</u> <u>are not required.</u>

Boarding and Lodging Houses are not considered residential care facilities and are defined as "a building where lodging and meals are provided for compensation for residents and do not function as common household." The R3 district limits boarding and lodging houses to a maximum of 5 person.

Table 2: Residential Development Standards

Source: City of San Mateo, 2022.

- 1. Building height shall not exceed the standards set forth on the Building Height Plan of the General Plan. Parcels located within the Downtown Specific Plan area shall not exceed the standards set forth in Chapter 27.40.
- 2. For all zones except the Downtown Residential, a reduced minimum parcel area of 4,000 square-feet and 40' lot width is permitted for a parcel located northeast of El Camino Real and recorded prior to March 3, 1947.
- 3. In the R1 zones, the maximum floor area ratio (FAR) is determined by the following: R1-A allows 0.4 FAR for the first 10,000 square-feet of parcel area plus 0.2 for any additional parcel area over 10,000 square-feet; and R1-B and R1-C allow 0.5 FAR for the first 6,000 square-feet of parcel area plus 0.2 FAR for any additional parcel area over 6,000 square-feet. However, in no case shall the maximum FAR exceed 6,000 square-feet total.
- 4. R1A zone parcels in the San Mateo Park Planning Area require an interior side yard setback of 7' for lot widths less than 75' or 10' for lot widths equal to or greater than 75'.
- 5. R2 zone parcels located in the Central Neighborhood and North Central Neighborhood shall not exceed 0.5 FAR for parcels up to 7,500 square feet and 0.6 FAR for parcels greater than 7,500 square feet.
- 6. For R3, R4, and R5 zone properties along El Camino real from 9th Ave. south to the City limits, buildings over 2 stories in height shall provide a minimum 10' setback from El Camino Real. Properties abutting an R1 or R2 zone require additional setbacks of 15' or ½ the building height, whichever is greater. Special downtown yard requirements are provided within 27.22.095, 27.22.097, 27.28.023, 27.28.053.
- 7. Downtown Residential zoned properties (R4-D, R5-D, R6-D) within the Gateway area, as defined in the Downtown Specific Plan, shall conform with the building height and special yard requirements within Sections 27.28.023 and 27.28.053.
- 8. In the Downtown Residential Zones (R4-D, R5-D, R6-D), a reduced minimum parcel area of 4,400 square-feet and 40' lot width is permitted for a parcel located northeast of El Camino Real and recorded prior to March 3, 1947.
- 9. Residential units permitted on parcels designated with a residential overlay district (/R, /R4, /R5 or /Q) for all C and E districts.
- 10. Residential development may exceed the floor area ratio of the underlying district provided that the maximum floor area ratio, including the residential overlay, shall not exceed the following: 2.0 FAR in /R4 districts; 3.0 FAR in /R5 districts; and the underlying zoning district FAR in /R districts.
- 11. Commercial zones (C1, C2, and C3) require additional buffers, setback and built-to-line standards as described in Sections 27.30.060, 27.30.070, 27.32.060, 27.32.070, 27.34.060, 27.34.070, 27.38.100, 27.38.120, 27.39.090 and 27.39.110.
- 12. E1 and E2 zones require buffers when the parcel is contiguous to any residential district as described in Sections 27.44.090 and 27.48.100.
- 13. Hillsdale Station Area Plan, https://www.cityofsanmateo.org/DocumentCenter/View/59484/Hillsdale-Station-Area-Plan

2.1.2 Specific Plans and Transit Oriented Development

The City of San Mateo uses Specific Plans to facilitate a diversity of housing opportunities not allowed under standard zoning districts.² This allows greater flexibility in design and facilitates larger housing developments. Examples of specific plans include Bay Meadows and the Transit-Oriented Development (TOD), as described further below.

The Bay Meadows Specific Plan (BMSP), first adopted in 1997, envisioned redevelopment of the former horse racetrack into a vibrant, transit oriented, mixed-use community. The plan permitted a variety of housing types that includes live-work units, small lot single-family dwellings, townhouse units, multi-family residential units and accessory dwelling units. Today, Bay Meadows is largely built-out with housing, office, and commercial uses, as well as improved vehicular, pedestrian and bicycle circulation throughout the plan area.

The San Mateo Rail Corridor Transit-Oriented Development (TOD) Plan was adopted in 2005 to incentivize transit supportive land uses and housing policies near the Hayward Park and Hillsdale Caltrain Stations. The Plan provides for mixed use development at the highest residential densities and building heights near the train stations to encourage a vibrant, transit oriented, and pedestrian friendly environment. Building upon these efforts, the city also adopted the Hillsdale Station Area Plan in 2011 to establish a TOD zone west of the Hillsdale Caltrain station. The Plan allows high-density multi-family housing that range between 25 to 50 units per net acre, as well as mixed-use buildings with ground floor retail combined with residential or office uses. This Plan compliments the Bay Meadows development by concentrating density on both sides of the Hillsdale station. Major development projects that have been approved in the plan areas include Station Park Green and Concar Passage, located near the Hayward Park Caltrain station.

2.1.3 Planned Developments

The purpose of Planned Development (PD) is to allow greater flexibility of site design while also preserving the natural, scenic environment. Under Chapter 27.62 of the Zoning Code, PD projects are processed under a Special Use Permit and may be approved if projects demonstrate that deviating from the underlying zone's development standards will result in better site design. PD regulations emphasize preserving open space and recreation areas at a minimum of 6 acres per 1,000 population. Most of the City's PD_projects occurred in the 1980s, when larger vacant lands were available. The most recently approved PD is the Waters Technology Office Park in 2019, which redeveloped an existing 11.1 acre office park with 190 new dwelling units, including 19 Below Market Rate (BMR) units that are affordable at the low, lower or moderate income levels.

² The City's Specific Plan documents are available online: <u>www.cityofsanmateo.org/1135/Planning-Resource-Documents</u>

2.1.4 Parking Standards

Parking requirements for residential development are summarized in Table 3 and vary by residential use type. The City also allows reduced parking requirements for new residential uses located within a parking assessment and special district. The Central Parking Improvement District (CPID) includes the downtown and allows developments to pay in-lieu fees for required parking not provided on site. Additionally, the CPID allows projects to conduct a parking demand study to determine a lower, project-specific parking standard.

The San Mateo Rail Corridor Transit-Oriented Development Plan requires Transportation Demand Management (TDM) plans for all new development projects located within TOD zones. Parking requirements are generally reduced in conjunction with transit-oriented development projects. This allows projects to implement trip reduction goals with minimal automobile traffic impacts. Within the TOD zone, the Hillsdale Station Area Plan specifies the reduced parking ratios as provided in Table 3.

Consistent with State law, the city allows reduced parking standards of 0.5 to 1 stall per unit for affordable or senior housing projects located near transit. No additional parking is required for accessory dwelling units located within a quarter mile of transit.

While state laws provide parking relief for projects seeking density bonus, ADUs, and SB 9, the City's parking requirements present some constraint to the development of housing that do not fall within this category. For example, multi-family residential projects located outside the TOD and Central Parking Improvement Districts are subject to standard off-street parking requirements of 1.5 stall to 2.2 stalls per unit. As shown in Table 3, this requirement varies by unit type and size and is inclusive of residents and visitors. Additionally, at least one of the required stalls per unit shall be covered within a garage or carport structure. Staff have identified this as a constraint that may limit a project's proposed dwelling unit mix and ability to achieve the maximum base density. The City will be evaluating all its parking requirements for residential projects to allow increased flexibility and evaluate if the minimum requirements need to be modified, as described in Policy H 1.7.

At the Builders Focus Group³, participants commented that existing parking requirements often constrain project feasibility due to development costs and floor area limitations for above-grade parking facilities. Recognizing these constraints, the City is currently evaluating code amendments to allow automated and mechanical parking facilities for multi-family or mixed-use residential projects. This allows larger residential projects to utilize land more efficiently and avoid high costs associated with underground parking facilities. <u>More recently, the State passed AB 2097</u>, which goes into effect January 1, 2023 and <u>removes minimum parking requirements for any residential, commercial, or other development projects</u> <u>located within one-half of major transit.</u>

³ Builders Focus Group: On November 15, 2021, Staff convened a focus group of local developers to discuss and solicit feedback on policies and programs to increase ease of constructing new housing. Meeting notes and summary are available in Appendix F.

2.2 **Below Market Rate Inclusionary Program**

The City originally adopted the Below Market Rate (BMR) Inclusionary Program in 1992 (with subsequent revisions in 2010 and 2020), requiring developments to provide a certain percentage of housing units at prices affordable to low- and very low-income households. Under the current program, effective February 3, 2020 for developments consisting of 11 or more units, 15 percent of ownership units are required to be affordable to moderate income families, and 15 percent of rental units are required to be affordable to low-income families.

Inclusionary zoning programs – of which the City's local BMR program is one variant – are sometimes perceived as adding to the cost of housing by requiring the market-rate units to subsidize the affordable units. This is an area of much dispute, both in the Bay Area and nationally. A study conducted by the National Housing Conference's (NHC) Center for Housing Policy (2000) highlighted several important contributions to inclusionary zoning to communities, not the least of which is the creation of incomeintegrated communities without sprawl. Several studies specifically address the issue of who pays for inclusionary zoning.

Some of these studies assert that the costs associated with inclusionary programs are passed on to the market priced homes, while other studies state that the cost is not borne by the end users at all. A study from 2004 asserts that market-rate buyers (and to some extent, renters) will be forced to pay higher amounts than they otherwise would for their units because of inclusionary zoning's implicit tax on other units⁴. However, an article published in the Hastings School of Law Review in 2002⁵ noted that ultimately, the price for a unit is dependent on what the market will bear based on the land price which over time

⁴ Reason Foundation (Benjamin Powell and Edward Stringham), Housing Supply and Affordability: Do Affordable Housing Mandates Work? (April 2004), https://reason.org/policy-study/housing-supply-and-affordabili/, Accessed on April 1, 2022 ⁵ Barbara Ehrlich Kautz, In Defense of Inclusionary Housing: Successfully Creating Affordable Housing, 2002. https://repository.usfca.edu/cgi/viewcontent.cgi?article=1060&context=usflawreview Accessed on April 1, 2022.

absorbs the increased costs of development within the community; it is not directly affected by the affordability requirement. Developers can charge market rate rents and sales prices on the unrestricted units regardless of the development costs. Although the BMR program does impact the developer's profit, it is difficult to determine at what point those impacts are great enough to discourage the project from moving forward or decreasing the number of units on a site. Jurisdictions implement a number of incentives and cost benefits to mitigate these impacts so that whatever constraint has been identified, there is an offset offered to mitigate it.

Specifically in San Mateo, developers are given the option of utilizing the City's Interim Community Benefits Program or the state Density Bonus program that provides up to a 35 percent increase in units in exchange for additional affordable units in the BMR program plus 1 to 4 development concessions depending on the level of affordability of the housing units provided. The City has also revised its BMR requirements over the years to include more flexibility in the size and amenities of the affordable units to help offset some of the costs to the developer and has identified several development standards that could be modified using incentives without causing public health and safety impacts. The City, under the current Housing Element cycle, will also be updating its BMR requirements to provide developers with an alternative means of compliance to provide additional flexibility (see Policy H 1.3).

Therefore, the City has considered the pros and cons of providing affordable housing through the City's BMR program and has determined that the benefits far outweigh the costs, especially since developers are afforded incentives to mitigate the costs.

2.3 Density Bonus Ordinance

State law (California Government Code, sections 65915-65918) requires cities and counties to approve density bonuses for housing developments that contain specified percentages of affordable housing units or units restricted to occupancy by seniors. A density bonus is the allocation of development rights that allows a parcel to accommodate additional square footage or additional residential units beyond the maximum for which the parcel is zoned. Projects that qualify for density bonus are also eligible for reduced parking standards, additional concessions or incentives that provide "identifiable and actual cost reductions to provide for affordable housing costs", or waivers from development standards that would physically preclude the project at proposed densities. The legislature has made frequent changes to State density bonus law over the years. Assembly Bill (AB) 1763, passed in 2019, significantly increased density bonus provisions for 100 percent affordable projects to 80 percent, including allowing for additional 33 feet or 3 stories of height, and up to four concessions. AB 2345, in 2021, also allows for 50% density bonus to be granted to housing projects consisting of a mix of affordable and market-rate homes, up from the previous maximum 35 percent density bonus for mixed income developments; lowers some thresholds for obtaining incentives and concessions from local jurisdictions, and adopts density bonus reporting requirements. Both these bills also further reduced parking requirements for many projects qualifying for a density bonus.

The City's density bonus law is outlined in Chapter 27.15 of the Zoning Code. The code was last updated in 2018 and does not reflect the recent changes in State law. As described in Housing Element Policy H 1.3, the City will update its density bonus ordinance to be consistent with State law requirements, and further streamline and incentivize projects that exceed minimum state requirements by combining it with the Community Benefits Program. The Community Benefits Program would layer additional benefits above and beyond the minimums allowed under state density bonus law. For example, under a community benefits program, an applicant can avail themselves of higher densities up to 75 dwelling units per acre in certain areas of the City. By layering state density bonus law provision on top of the community benefits program, an applicant could potentially further exceed the density caps under Measure Y. As part of the program, the City will explore incentives or concessions that may be available to applicants who provide community benefits to address the most critical needs in terms of types of housing units; or projects that further AFFH objectives.

2.4 Building Codes and Code Compliance

Building codes apply to all dwellings and include plumbing, mechanical, electrical installations and accessibility and energy compliance. Building codes ensure that development is constructed in compliance with applicable code standards to protect general welfare and public health. The City of San Mateo requires all new development to comply with the California 2019 Building Standards Code that went into effect January 1, 2020. Building code amendments and City code compliance practices are described below.

2.4.1 Local Amendments to State Building Code

On September 3, 2019, the City of San Mateo adopted mandatory local green building and energy code amendments, also known as reach codes. These reach codes went into effect on January 1, 2020, concurrent with the 2019 Edition of the California Building Standards Code (Title 24) and apply to new construction and rehabilitation of housing projects. Local building code amendments are found in Chapter 23 of the San Mateo Municipal Code. These local code amendments are not considered onerous to the cost or construction of housing, as analyzed in the Cost-Effectiveness Studies released by the California Statewide Codes and Standards Program.⁶

2.4.2 Building Electrification and Electric Vehicle Ordinances

The City's Climate Action Plan (CAP) identifies building electrification and electric vehicle (EV) charging infrastructure as key strategies in reducing greenhouse gas emissions (GHGs). On October 5, 2020, the City adopted an ordinance to require all new residential buildings and office buildings to be all-electric. Applicable residential building types include new single-family and two-family dwellings, as well as multi-family buildings and accessory dwelling units. Building electrification costs for installation and utility are generally lower than natural gas devices and infrastructure, leading to overall cost saving benefits in the long term.

The City amended its Green Building Ordinance in 2020 to mandate electric vehicle (EV) charging capacity for new developments. New single-family and two-family dwellings, as well as town houses require a complete EV outlet. New multi-family buildings are required to provide 15 percent EV capable spaces. Requiring EV ready spaces at the onset of new construction provides significant cost reduction, when compared to retrofits to add EV capacity later. Collectively, these measures are not considered constraints and have ability to significantly reduce GHGs from the built environment, lower construction costs and improve air quality and public health.

⁶ Cost-Effectiveness Studies, 2021: <u>https://explorer.localenergycodes.com/jurisdiction/san-mateo-city/</u>

2.4.3 Code Compliance

Building, Zoning, and other related code standards are enforced through the Code Enforcement Division. The City's code enforcement program is an important tool to maintain existing housing stock and protect residents from unsafe or substandard building conditions. Local enforcement includes state and federal codes that set minimum health and safety standards for buildings. Like many jurisdictions, the City of San Mateo responds to code violations largely on a complaint basis. The City aims to address all alleged violations in a timely manner, with priority given to violations that pose the most imminent threat to health and safety or the environment.

To minimize displacement associated with substandard dwellings, the City's tenant relocation ordinance requires property owners to provide relocation assistance and payments when tenants are displaced from unsafe or substandard units. The City also requires discretionary review for projects requesting to demolish 50 percent or more of an existing residential structure. To encourage rehabilitation of existing dwellings, the City offers a Housing Rehabilitation Loan program to assist low-income homeowners with needed repairs. This program includes services to correct code violations and general property improvements related to deferred maintenance. This approach allows the city to identify housing problems early on, before requiring more extensive repairs or demolition in some case. Therefore, the City's code enforcement practices and regulations are not considered additional constraints to the provision of housing.

CITY OF SAN MATEO 2031 HOUSING ELEMENT

2.5 Infrastructure Requirements

Various City departments implement on- and off-site improvement requirements, including standards for street construction, sidewalks, curbs, gutters, on-street parking and bicycle lanes. Residential development may also necessitate constructing water, sewer, and drainage improvements. All improvements are generally required as conditions of approval and are developer financed. Complying with certain infrastructure improvements may be perceived as a constraint on the provision of housing for all income levels.

For infill projects, the City's Municipal Code requires the construction of standard improvements that may include repair of defective sidewalks, construction of standard driveways, and maneuvering areas to ensure that the public's access to/from and around the site is safe and meets Americans with Disabilities Act requirements. In cases where a project is proposing to remove and replace full-street or alley frontages to accommodate the project's desired site layout, and where access is necessary for emergency egress and ingress, the City's Municipal Code also requires dedication of an access easement to ensure access is not blocked and is maintained. The City's Planning Commission and City Council may review and approve exceptions from City's Municipal Code requirements or standards based on hardship considerations on a case-by-case basis. For example, San Mateo Municipal Code Section 27.78 Variance allows deviations from standard number of parking spaces and stall dimensions, number of loading spaces and shared loading zones, and other requirements for infill and other projects. A developer could also request concessions or waivers from such requirements if proposing projects that utilize density bonus provisions.

Although infrastructure requirements represent a cost to developing housing, these improvement standards are intended to ensure the public's safe access and meet ADA requirements, and are not unreasonable nor do they represent a significant constraint. However, the City recognizes there are issues with infrastructure adequacy in certain areas of the City, including infill areas with aging infrastructure. These infrastructure deficiencies are a recognized constraint for infill development in the City. Additionally, there are Housing Element programs that are designed to help fund infrastructure capital improvement projects in low-income neighborhoods to address infrastructure inequalities. One Example is the North Central Bike Lanes Project which received funding from the federal Community Development Block Grant (CDBG) to implement pedestrian and bicycle improvements in the North Central neighborhood which is an identified disadvantaged community.

In addition to the above, the City continues to collaborate with regional agencies on infrastructure projects or adaptation strategies intended to address impacts due to climate change. Portions of the City, primarily east of Highway 101 and a portion of the North Central neighborhood, are located in the flood zone and projected to be impacted by sea level rise in future years. The City has initiated infrastructure projects such as the North Shoreview Flood Improvement Project which will provide improvements to the Coyote Point and Poplar Avenue Pump Stations to increase pump capacity and raise a 1,300-foot levee segment located between the San Mateo and Burlingame border off Airport Boulevard. Construction began in September 2020 and is anticipated to continue through 2022. While regional collaborations on

infrastructure projects and other adaptation strategies are necessary to address impacts due to climate change, the actual funding for infrastructure improvement projects come from a variety of sources including federal or state grants, local bonds, taxes, as well as, contribution from new developments in the form of impact fees. The impact fees paid by new developments may be perceived as a constraint; however, the City's impacts fees are determined based on the project's proportionate share of infrastructure projects, or the nexus, and vetted through a public process. The City hires professional consultants to evaluate permit and impact fees; and holds public meetings to obtain input prior to updating fees. The most recent Development Impact Fee Study was completed in 2021, and following multiple public meetings, the updated fees were incorporated into the Comprehensive Fee Schedule in November 2021. As the City periodically evaluates and updates its fees through a public process that includes an implementation program (Policy H 1.18) to ensure the City continues to periodically review and update planning entitlement, building permit and impact fees consistent with AB 602⁷.

2.6 On- and Off-Site Improvements

As the City is entirely built-out, new developments are not required to complete vast infrastructure improvements as may be needed in more rural communities. Most new housing development occurs on existing lots that are already served by an existing network of streets and utility infrastructure.

The City has adopted on-site and off-site improvement requirements as codified in the City's Municipal Code, and in citywide infrastructure plans such as the Bicycle Master Plan, Green Infrastructure Plan, and Pedestrian Master Plan. Additionally, the City's Department of Public Works has developed detailed engineering standards that work in combination with the Municipal Code and adopted plans to help ensure that minimum levels of design and construction quality are maintained, and adequate levels of street improvements are provided. Per these adopted plans and standards, right of way widths in the majority of the city are already established and vary depending upon the street typology (i.e. freeways, arterials, collectors and local street as defined in the City's General Plan).

The most common improvements for a typical new residential development include: upgrading sewer mains as needed if they are aged or insufficient to meet needed capacity due to the new development; upgrading water mains as needed if they are aged or insufficient to meet fire safety requirements; restoration of streets surrounding the development site; and reconstruction of frontages when necessary to accommodate the new development project. New subdivisions are required to construct sidewalks if none exist and where there are existing sidewalks, the sidewalks are evaluated and required to meet current sidewalk standards including meeting requirements for disabled access (ADA requirements). New subdivisions that include new travel lanes within the project site are required to provide a minimum lane width of no less than 11 feet to ensure safe through traffic movement for vehicles, and sidewalks are

⁷AB 602, September 29, 2021: <u>https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB602</u>

required to be no less than five feet to ensure safe pedestrian access as well as meeting ADA requirements.

For infill developments, exceptions may be reviewed and considered by the city's Director of Public Works on a case-by-case basis as part of the city's development review process provided that the alternative design meets the city's findings for safety and meets ADA requirements. The street design guidelines and standards have a potential to affect housing costs; however, they are necessary to provide a minimum level of design and construction quality in the City's neighborhoods, ensure the community's ability to access housing developments and maneuver around it on safe surfaces, and meet ADA requirements. From an equity standpoint, the minimum standards help to ensure that improvements are of a consistent quality regardless of the average income in the neighborhood. The on- and off-site improvement standards imposed by the City are typical for most communities and do not pose unusual constraints for housing development. While these improvements may increase the cost of development, it is important to note that adequate sewer, water, street and accessible sidewalk infrastructure are a necessary component of a healthy, equitable and productive city. Additionally, conditions of approval to complete on and off-site improvements are provided to applicants in a timely manner and do not have a significant impact on project timing.

2.7 Local Entitlement Fee and Procedure

The development application and environmental review process necessary to obtain appropriate entitlements and a building permit may significantly affect the cost of a project, both in processing fees and time. San Mateo's planning application fees and process was updated in 2020-2021 to reduce inefficiencies, minimize project delays and provide transparency for the applicant and public. Consistent with Government Code 65940.1(a)(1), the City posts on its website a current schedule of fees, exactions, all zoning and development standards, inclusionary requirements and other requirements imposed by the City that are applicable to proposed housing developments.⁸

Additionally, the development review process in San Mateo has been structured to minimize processing delay, while providing opportunities for public input. However, the Builders Focus Group⁹ identified the pre-application processing time for large projects, specifically the non-SB330 Pre-Application for large projects, as a constraint. The discussion in the process section below provides additional background and status of changes being made to address this constraint.

2.7.1 Planning Application Entitlement Fee

At the planning stage, projects are subject to planning fees shown in the following table (Table 4), in addition to building and impact fees discussed in Section 2.8. The City Council Resolution directs that planning application charges reflect the actual costs of staff time spent on each project and all direct costs associated with the processing of the application including, but not limited to: initial review, project routing, site visits, letters to applicants, review of revisions, coordination with other departments and agencies, public outreach, preparation of staff reports, legal noticing, public meetings/hearings and costs for technical consultants. The City posts a current Comprehensive Fee Schedule on its website that includes all planning application, building permit and impact fees (refer to links in section 2.7 above).

Planning Application fee deposits for residential developments are listed in Table 4 and vary by approval body. Planning applications reviewed by the Zoning Administrator include parcel maps, housing development projects proposing up to six-units, and Variances and Special Use Permits for minor site improvements and single-family or duplex dwellings, as identified in Section 27.06.020 of the City of San Mateo Municipal Code (Municipal Code). No public hearing is required for Zoning Administrator decisions unless an appeal is filed for the project. The majority of housing development projects heard at the Planning Commission level are proposing over six-units and/or requesting entitlements for subdivision (tentative maps), Variances and Special Use Permits identified in Section 27.06.040 of the Municipal Code.

<u>⁸ Comprehensive Fee Schedule, City of San Mateo, accessed December 16, 2022: https://www.cityofsanmateo.org/FeeSchedule;</u> Zoning Code, City of San Mateo, accessed December 16, 2022: https://law.cityofsanmateo.org/us/ca/cities/san-mateo/code; Inclusionary (Below Market Rate) Requirements, development standards and other development related resources, accessed December 16, 2022: https://www.cityofsanmateo.org/1135/Planning-Resource-Documents.

⁹ Builders Focus Group: On November 15, 2021, Staff convened a focus group of local developers to discuss and solicit feedback on policies and programs to increase ease of constructing new housing. Meeting notes and summary are available in Appendix F.

<u>Projects</u> heard at City Council level are those requesting entitlements for Planned Development amendments, <u>zone changes</u>, General Plan amendments and/or height concessions that exceed the limits set by Measure Y.

Costs associated with processing planning applications will vary between development projects due to variations in project complexity. While much of the cost of development is born by the applicant, the City has in the last 20 years systematically re-evaluated and explored alternative fee structures, and development processes with the goal of streamlining processes and achieving cost efficiencies. Most recently, in 2021, the City conducted an evaluation of total costs for planning applications processed at different approval levels (i.e. Zoning Administrator, Planning Commission and City Council). The evaluation considered initial deposits, number of invoices, staff time, project delays and total costs associated with the processing of sample projects. It found that project delays and unnecessary staff time was spent seeking additional funds from applicants, some resulting in processing delays of several months due to lack of payment. Following the evaluation, the city consolidated the planning entitlement fees to require a larger initial deposit which was based on an average of similar projects in previous years. In the eight months since the new fee adoption, staff has seen a reduction in time spent processing invoices and payments, and there are no project delays due to lack of funds.

Table 4: Planning Application Fees	
PLANNING APPLICATION DEPOSIT/FEE TYPE	REQUIRED DEPOSIT -or FLAT FEE AMOUNT
Planning Application for single-family and up to 6 units (Zoning Administrator)	\$4,000
Planning Application for SB 330 and other than single-family (Zoning Administrator)	\$6,000
Planning Application for multi-family and mixed-use developments with 20 units or less (Planning Commission)	\$10,000
Planning Application for multi-family and mixed-use developments over 20 units (Planning Commission)	\$50,000
Planning Application for multi-family and mixed-use developments over 20 units (Planning Commission and City Council)	\$100,000
Large Project Non-SB330 Pre-Application for multi-family and mixed-use developments over 20 dwelling units (Planning Commission study session)	\$25,000
Planning Application for Day Care Facilities which require a Special Use Permit (Planning Commission)	\$2,000 (flat fee)
Environmental Review (CEQA) Categorical or Statutory Exemption	<u>\$500</u>
Initial Study / Negative Declaration or Mitigated Negative Declaration	Actual Cost
Initial Study / Environmental Impact Review (EIR)	Actual Cost
Source: City of San Mateo, 2022.	

Table 4: Planning Application Fees

Source: City of San Mateo, 2022. Notes: Fee deposit at application includes concurrent processing of multiple planning approvals, environmental exemption, reviews by development review departments (including: planning, building, fire, public works, police, arborist and parks departments). Consistent with City Council resolution, if the total deposit is not expended when the final decision is made, the balance is refunded to the applicant. Additionally, exceptions for the initial deposit can be made to the Director of Community Development and considered on a case-by-case basis.

Day Care Facilities means "any facility which provides non-medical care to persons in need of personal services, supervision, or assistance essential for sustaining the activities of daily living or for the protection of the individual on less than a 24-hour basis" (SMMC 27.04.030).

Table 5: Total Fees (Includes Entitlement, Building Permits, and Impact Fees) per Unit

Source: 21 Elements Survey and Century Urban Report on Big Picture Summary, Updated July 10, 2022: http://21elements.com/constraints

The jurisdiction-imposed fees represent a small percentage of the overall cost to develop new housing. However, if a jurisdiction's fees are significantly higher than neighboring or peer jurisdictions, the fees could have the impact of discouraging projects within the jurisdiction. With the high cost of construction in recent years, it is difficult for moderate- or low-income housing to be profitable. High fees can be a constraint to housing development. This is particularly challenging for deed restricted affordable housing developers.

Most, if not all, developers consider any fee a constraint to the development of affordable housing. For 100% affordable housing projects, financing generally includes some form of state, federal or local assistance, with rents set through the funding program. As such, fees cannot and do not increase the rents. Although various fees account for a portion of the development cost, the fees collected are necessary to pay for much needed infrastructure and to help mitigate new growth throughout the City.

Out of the jurisdictions that provided data, the City's fees are the third highest for single-family development (out of 19 jurisdictions), the fourth highest for small multifamily development (out of 15 jurisdictions) and the second highest (out of 12 jurisdictions). If fees (per dwelling unit) are higher for multi-family construction than for single-family construction within a jurisdiction, this could be seen as a constraint on naturally affordable multi-family housing and a fair housing issue. This is not the case in San Mateo. Fees for both small and large multi-family developments are lower than for single-family development as shown below.

Note: Calculations use average soft costs (including an average of jurisdiction charged fees) and average land costs for the county.

2.7.2 Planning Application Entitlement Processing Time and Procedure

Development review procedures exist to ensure that proposals for new residential development comply with local regulations and are compatible with adjacent land uses. The development review process in San Mateo has been structured to minimize processing delay, while providing opportunities for public input. This is accomplished in multiple ways: processing time and processing goals.

Processing Time

During the discretionary review process, the final approval body determines the action on development proposals by making the appropriate findings. These findings are based primarily on conformance to the City's General Plan and Municipal Code, and environmental review is based on the California Environmental Quality Act (CEQA). Typical City of San Mateo findings by permit type for residential uses are discussed further in the following sections 2.7.5 through 2.7.7. If a development proposal meets the required findings for approval, the City's Municipal Code directs that the project shall be approved.

Review times differ on a project-by-project basis depending on the type and complexity of the project as shown in Table 5, no distinction is made for projects with or without affordable housing units. As codified in the City's Zoning Code (Chapter 27.06), the Zoning Administrator has authority to approve <u>single-family</u> <u>projects</u>, <u>which typically takes 2 – 5 months</u>, and <u>multi-family</u> development projects with up to six-units, including any associated Variances and Parcel Maps; with typical reviews between 2-7 months, depending on project complexity.

Planning Commission has authority to approve <u>multi-family</u> development projects with more than sixunits, including associated Variances, Tentative Maps, some Special Use Permits. The typical review period for a Planning Commission-level project is between 9-12 months.

Development projects that rise to City Council-level are those that require rezoning, General Plan Amendment, Planned Developments, Special Use Permit or height concessions that exceed Measure Y limits for high-rise buildings, and for projects that are fully or partially funded by the City. The typical review period for a City Council-level project is between 9-13 months.

In addition to the formal planning application process, since 1990s, the City has required a non-SB 330 pre-application planning process (Pre-Application) for large projects, including multi-family projects with over 20 units. This requires applicants to hold meetings with neighborhood residents and a design focused study session with the Planning Commission to allow for early input on the design of a project before submitting a formal planning application. While this process adds additional time at the early stages of a development, the applicant obtains public comments and direction from the Planning Commission, which helps to expedite the review during the formal planning application process.

The Builders Focus Group discussion included feedback on the City's Pre-Application process. While developers generally appreciated the opportunity to obtain early feedback and direction on project scope and design before they expend resources in developing plans for the formal planning application submittal, some commented that the requests to revise conceptual plans during the Pre-Application

process added time to the process. In response, the City held a Planning Commission study session meeting in February 2022 to discuss ways to streamline and improve the Pre-Application process to reduce processing times from 6-9+ months to 3-4 months, and to focus the plan requirements and materials necessary to complete the process. <u>Staff implemented the improvements immediately, resulting in a shorter average review time of 4 months for all Pre-Applications submitted in 2022. When the average 4-month pre-application is added to the 9-13 month process time for multi-family development projects, the overall process time is between 13-17 months. Since the Pre-Application process was established via City Council resolution, revisions/changes to the process will require City Council approval, which is targeted for Council consideration in 2023/2024.</u>

Processing Goals

From an implementation standpoint, the City has internal goals for processing time associated with formal planning application development projects that are tracked and reported on a quarterly basis. When a developer has submitted all application materials, including any studies required for CEQA, the following timelines are targeted: 24 calendar days for Zoning Administrator decisions; 40 calendar days for Planning Commission decisions for projects that are exempt from CEQA; 60 calendar days for projects requiring Negative Declarations; and 90 calendar days for projects requiring approval by the City Council. The internal processing target for Pre-Applications is four months.

The City uses an efficient and comprehensive approach toward development review and permitting that allows for quick response to developer applications. The City uses many practices to expedite formal planning application processing, reduce costs, and clarify the process to developers and homeowners. Increased development costs resulting from delays in the City's formal planning application review, public hearing, and permitting process are not considered a constraint on housing development, although there may be room for further streamlining and improvements. The City's development review process as a whole is not generally viewed as a constraint to the development of housing because the City has consistently demonstrated its willingness to receive feedback, be pro-active in re-evaluating and making adjustments to streamline its processes. Further descriptions of permits and their processing procedures are provided in the following subsections.

Table 7: Planning Application Timelines					
Application Type	Approval Body	Estimated Time from Application Date to Approval Date (months)			
Single-Family Dwelling Unit	Zoning Administrator	2-5			
Residential Development with or without Tentative Parcel Maps (6 units or less)	Zoning Administrator	4-7			
Residential Development with or without with Tentative Maps (more than 6 units)	Planning Commission	9-12			
Residential Development needing Special Use Permit	Planning Commission	9-12			
Residential Development as a Planned Development (reduced setbacks, reduced parking, increased floor area,	Planning Commission and City Council	9-13			
General Plan Amendment	Planning Commission and City Council	9-13			
Residential Development with Environmental Impact Report	Planning Commission or City Council	9-13			
Residential Development with Negative Declaration or Mitigated Negative Declaration	Planning Commission or City Council	9-13			
Source: City of San Mateo, 2022.					

To facilitate the application and processing of planning applications, and provide transparency of the planning application entitlement process, the City posts all zoning and development standards and other development related resources on its website (refer to links in section 2.7 above). This includes, but is not limited to, the entire municipal code including the zoning code, various development standards, application guides, FAQs, and informational handouts. The City maintains and updates these documents and website regularly.

Long permitting processing times, or permit processes that have a high degree of uncertainty (i.e. discretionary reviews or processes with multiple public meetings) increase the cost of housing development for developers, either by increasing their carrying costs as they wait for permits, or by increasing the chance that a project will be rejected after a long wait. A developer working in a jurisdiction with such a permitting process will demand higher profits to account for the increased risk, thereby increasing the overall development cost.

The City participated in a countywide study with jurisdictions reporting their process times for housing projects - 18 jurisdictions in the County provided data. The City's processing time for single-family is between 2-5 months and does not require a public hearing which is the third lowest (out of 10 jurisdictions). The City's processing time of 9-12 months for multi-family development projects that require Planning Commission review is the fifth highest (out of 16 jurisdictions); however, it is similar to four other jurisdictions in the County.

Large multi-family development projects that are over 20 units require a non-SB 330 pre-application which takes an average of 4 months. When combined with the 9-13 month process time, the overall process time is 13-17 months. This is on-par with other jurisdictions in the County that process similar scale

development projects such as Redwood City and San Bruno. A permitting process that is more onerous or uncertain for multi-family units than for single-family may present a fair housing concern and could be considered a constraint on multi-family housing. In San Mateo, permitting times for multi-family projects are not significantly longer than for single-family projects when accounting for the size and scope of the project.

Table 8: Planning Processing Time (in months)

2.7.3 Senate Bill 35 Streamlined Processing

Senate Bill (SB) 35, passed in 2017, requires jurisdictions that have not approved enough housing projects to meet their RHNA to provide a streamlined, ministerial entitlement process for housing developments that incorporate affordable housing. Per SB 35, the review and approval of proposed projects with at least 50 percent affordability in the city must be based on objective standards and cannot be based on

subjective design guidelines.¹⁰ However, to be eligible, projects must also meet a long list of other criteria, including prevailing wage requirements for projects. In order for applicants to take advantage of SB 35, per Government Code Section 65913.4(10)(b)(1)(a)(et seq.) they need to submit a Notice of Intent and jurisdictions need to give Native American tribes an opportunity for consultation. The City of San Mateo has developed a Notice of Intent form consistent with the law. Additionally, the City is in the process of developing Multifamily and Mixed-Use Objective Design Standards (ODS), which once complete will help facilitate the review and approval of residential developments. The ODS project is projected to be completed in 2022, prior to City Council action on this Housing Element. The City is also in the process of streamlining its pre-application and design review process to further introduce efficiencies during planning application reviews. There have been no SB 35 applications in the City.

2.7.4 Senate Bill 330 Processing Procedure

Senate Bill (SB) 330, Housing Crisis Act of 2019, prohibits cities and counties from enacting a development policy, standard, or condition that would impose or enforce design standards that are not objective design standards on or after January 1, 2020 [Government Code Section 663300 (b)(C)]. The bill also established specific requirements and limitations on development application procedures.

Per SB 330, housing developers may submit a "preliminary application" for a residential development project. Submittal of a preliminary application allows a developer to provide a specific subset of information on the proposed housing development before providing the full amount of information required by the local government for a housing development application. Submittal of the preliminary application secures the applicable development standards and fees adopted at that time. The project is considered vested and all fees and standards are frozen, unless the project changes substantially.

The City of San Mateo has developed a preliminary application form consistent with SB 330. In addition, the bill limits the application review process to 30 days, for projects less than 150 units, and 60 days, for projects greater than 150 units, and no more than five total public hearings, including planning commission, design review, and city council.

SB 330 also prohibits cities and counties from enacting a development policy, standard, or condition that would have the effect of: (A) changing the land use designation or zoning to a less intensive use or reducing the intensity of land use within an existing zoning district below what was allowed on January 1, 2018; (B) imposing or enforcing a moratorium on housing development; (C) imposing or enforcing new design standards established on or after January 1, 2020, that are not objective design standards; or (D) establishing or implementing certain limits on the number of permits issued. There have been multiple SB

¹⁰ HCD, SB 35 Statewide Determination Summary, Accessed April 1, 2022: <u>https://www.hcd.ca.gov/policy-research/docs/sb35_statewidedeterminationsummary.pdf</u>

330 applications submitted to the City, and the State mandated timelines and requirements have been adhered to.

2.7.5 Site Plan and Architectural Review

Discretionary Site Plan and Architectural Review (SPAR) is required for projects that are not eligible for ministerial review. Discretionary design review is more flexible in nature with regards to design rules. Site Plan and Architectural Review has three levels of project review:

• Zoning Administrator (ZA)

Zoning Administrator-level reviews are staff level and consist of residential and mixed-use projects with six units or less and permitted non-residential uses less than 10,000 square-feet. The Zoning Administrator is authorized to approved projects that meet all applicable development code requirements and standards; and is consistent with applicable policies in the General Plan and Specific Plans and applicable design guidelines. ZA-level reviews involve public noticing, but no public hearing is required.

• Planning Commission (PC)

Planning Commission-level reviews involve public hearing and noticing. The Planning Commission is authorized to approve residential and mixed-use projects that require: Special Use Permits, deviations from development code requirements, standards or design guidelines; and appeals of Zoning Administrator decisions. Additionally, the Planning Commission reviews and makes a recommendation to the City Council for projects that require the provision of community benefit to exceed building height limits in areas designated in the General Plan (pursuant to Measure Y¹¹); rezoning; General Plan Amendment, and public funds or city land.

• City Council (CC)

City Council-level reviews involve public noticing and public hearing. City Council makes final determination for appeals as well as residential and mixed-use projects where building(s) exceed 55 feet in height or where required by express General Plan provisions (Measure Y); and projects that require rezoning, General Plan Amendments, and use of public funds or city land.

Site Plan and Architectural Review ensures that proposed developments are consistent with the General Plan and any applicable community or specific plans. In addition, this review ensures that utilities and infrastructure are sufficient to support the proposed development and are compatible with City standards and that the design of the proposed development is compatible with surrounding development. Use compatibility is not considered in Site Plan and Architectural Review for permitted uses. Compatibility is

¹¹ Measure Y is a 2020 voter approved ballot measure that limits building heights, density, and intensity (or floor area) in the City. As required in the measure, the measure amends and is incorporated throughout the General Plan. The measure will sunset at the end of 2030. Source: <u>https://www.cityofsanmateo.org/DocumentCenter/View/86090/Resolution-with-Measure-Y-ballot-language</u>

determined using design guidelines and General Plan consistency. Conditional use permits, described below, consider the appropriateness of a use for a specific area.

Additionally, deviations from zoning code requirements and development standards would be considered through Site Plan and Architectural Review. In these cases, the entitlement would be heard at the Planning Commission-level. For example, a building could reduce the number of required on-site parking spaces with approval at a Planning Commission-level hearing.

In order to approve a project, the decision-maker (i.e., Zoning Administrator, Planning Commission and City Council) must find that a project is consistent with each of the findings outlined in Section 27.08.030 (a) of the San Mateo Municipal Code. For development projects not located in a historic district and not involving a landmark, the decision-maker may approve an application for Site Plan and Architectural Review based on all of the following findings:

- 1. The structures, site plan, and landscaping are in scale and harmonious with the character of the neighborhood;
- 2. The development will not be detrimental to the harmonious and orderly growth of the City;
- 3. The development will not impair the desirability of investment or occupation in the vicinity, and otherwise is in the best interests of the public health, safety, or welfare;
- 4. The development meets all applicable standards as adopted by the Planning Commission and City Council, conforms with the General Plan, and will correct any violations of the zoning ordinance, building code, or other municipal codes that exist on the site;
- 5. The development will not adversely affect matters regarding police protection, crime prevention, and security.

Staff have not found that these consistency findings are a constraint on housing production or that they slow the City's ability to recommend approval of projects. <u>Furthermore, finding 5 is not associated with a crime free ordinance.</u> During the 5th Cycle, the City approved all residential and mixed-use development projects that were submitted to the City with one exception. The 10-unit residential development at 4 W. Santa Inez was the only project that was <u>initially</u> denied <u>due to inconsistency with the City's multi-family</u> <u>design guidelines</u>, and the decision was subsequently challenged in court. Following the court's decision, the City has approved the original development project<u>and adopted interim</u> mechanical parking <u>standards</u>.

While the above findings do not present a constraint, the City does have an extensive design review process for projects over six units that requires a third-party peer-review of the design. To address this constraint, the City is evaluating streamlining the design review process or eliminating it altogether for smaller projects (Policy H 1.6). The City is also in the process of developing Objective Design Standards (ODS) for Multi-family and Mixed-Use developments <u>under Housing Policy H 1.8</u>. Upon completion, development projects that comply with ODS cannot be denied or reduced in density, subject to a narrow

health and safety exception. As part of implementation, all planners shall receive training and have a procedures manual to ensure consistent application of ODS in the review of multi-family and mixed-use projects.

2.7.6 Site Plan and Architectural Review for Cultural Resources

Discretionary Site Plan and Architectural Review (SPAR) for cultural resources is required for projects that are not eligible for ministerial review or for projects that cannot meet established design guidelines and development standards and are located within a historic district or involve a listed landmark or locally significant structure in the San Mateo's historic resource inventory.

This discretionary review process is identical to the city-wide discretionary SPAR review described above, except projects which are consistent with the U.S. Secretary of the Interior Standards for the Treatment of Historic Properties (Standards) are taken through the conventional design review entitlement process, while projects that are not consistent with the Standards would typically involve a more extensive hearing process and preparation of a detailed environmental analysis for CEQA purposes prior to approval.

2.7.7 Special Use Permit Process

Housing is generally permitted by-right in most zones, except for commercial and office zones without a residential overlay. In these areas, a Special Use Permit (SUP) may be approved and is subject to the required findings described in Chapter 27.74 of the City's Zoning Code, as follows:

- 1. When granting non-designated special uses, the approval body concludes that the proposed use(s) are so similar to any specifically allowed use in the district as to be virtually identical thereto in terms of impact and land use requirements.
- 2. Granting of the Special Permit will not adversely affect the general health, safety and/or welfare of the community nor will it cause injury or disturbance to adjacent property by traffic or by excessive noise, smoke, odor, noxious gas, dust, glare, heat, fumes or industrial waste.

The SUP primarily reviews the location, size, design, and operating characteristics of the proposed use. This discretionary process ensures that the proposed residential use is compatible with adjacent properties. Conditions may be applied to ensure that the project has no adverse effect, such as traffic or noise, on the surrounding neighborhood. Depending on the number of residential units proposed, an SUP may be granted at the discretion of the Planning Commission or City Council, as described in the prior section.

2.8 Building Permit and Development Impact Fees, and Process

2.8.1 Building Permit and Development Impact Fees

The City collects building permit fees to review construction plans for compliance with applicable codes and inspect construction at multiple phases. The City also collects development impact fees to finance the

design, construction, installation, and acquisition of public infrastructure. Fees can also be used to recover the costs of adding capacity in existing public infrastructure. Development impact fees in the City of San Mateo are determined in proportion to the square footage of the proposed project rather than by the unit type.

From a housing constraints standpoint, the fees that the city collects may be viewed in different ways: 1) total cost per unit based on type of unit, 2) cost in comparison to other cities, and 3) transparent costs.

Total Cost by Unit Type

As the table below illustrates, the cost for a new single-family dwelling is the highest at approximately \$89,108 per unit, followed by the cost in a small multi-family development at approximately \$60,728 per unit, and cost in a large multi-family at approximately \$41,547 per unit. Table 6 below provides a detailed breakdown of the City's permitting and impact fees associated with these three categories of housing projects. There are several factors accounting for the reduced cost per unit when number of units in a development increase. Chief among them is the ability to spread the cost of shared components of a development across more units such as construction costs for foundation, garage, roofing, common areas and amenities, and utility infrastructure.

It should also be noted that the majority of sites in the city's Adequate Sites Inventory List are located in areas designated for residential or mixed-use development with higher density. Both the City's fees and zoning designations are aligned to support higher-density housing production in these areas, which would also result in greater number of affordable units pursuant to the City's inclusionary requirements.

Overall, City fees make up 7 percent or less of total cost of development and thus, are not considered barriers to residential development. Total development cost is calculated using City of San Mateo specific land costs and fees, along with average soft and hard costs provided by the Century Urban Report.¹²

Table 9: Building Permit and Impact Fee Estimate (New Construction), 2021			
	Type of Project		
Type of Fee	Single-Family <u>Detached</u>	Small Multi-family (10-Unit)	Large Multi-family (100-units)
Entitlement Fees			
Planning Application	\$4,979	\$50,000	\$205,000
Building Permit Fees			
Building Plan Review	\$7,393	\$25,240	\$54,068
Fire Plan Check	\$407	\$986	\$1,577

Source: City of San Mateo, fees calculated based on City's Comprehensive Fee Schedule for fiscal year 2021-2022. Notes:

Valuations based on habitable square footage areas (exempts uninhabitable spaces such as: garage, storage, balconies). Additional fees may apply such as sewer and water tap fees, Construction & Demolition Recycling Deposit (Refundable), etc. Unexpended portion of the Public Works Building Support Services Deposit is refunded back to the applicant.

Comparison with Other Cities

Through 21 Elements, a San Mateo County Planning Collaborative, the City participated in a study conducted by Century Urban on the Cost to Build in San Mateo and Santa Clara Counties¹³. The study included planning entitlement fees, building permit fees and development impact fees. With regards to development fees in San Mateo County, Century Urban's report showed an average of \$350,000 for a small multi-family project (10 units) and an average of \$2,800,000 for a large multi-family project (100 units).

¹³ 21 Elements Century Urban Report on the Cost to Build in San Mateo County, Accessed June 7, 2022: http://www.21elements.com/constraints

With regards to building permit fees, a more detailed look at the raw data from cities¹⁴ showed building permit fees for small multi-family projects ranging from a low of \$34,561 (Brisbane) to a high of over \$400,000 (Foster City, San Bruno). In comparison, San Mateo's building permit fees of \$198,431 for a small multi-family development is below the average for cities in the County.

For large multi-family developments, the raw data from cities showed building permit fees ranging from \$223,028 (South San Francisco) to over \$1,000,000 (East Palo Alto, Foster City, and San Bruno). In comparison, San Mateo's building permit fees of \$611,684 for large multi-family is at the median for the County.

Impact fees are also a factor in the cost of development. For small multi-family developments, total impact fees in the County ranged from \$19,653 (Redwood City) to over \$500,000 (Millbrae, South San Francisco); and San Mateo's impact fee for this category are \$358,850. For large multi-family development, total impact fees ranged from \$243,750 (Daly City) to over \$5,000,000 (Millbrae); and San Mateo's impact fees are \$3,338,000.

It should be noted that the impact fee comparison is a high-level comparison which does not take into consideration the actual on-the-ground needs that can vary from city to city based on the condition of existing infrastructure and improvements needed to accommodate future growth.

The City of San Mateo's impact fees provide an opportunity for new developments to contribute its fair share toward infrastructure improvements. For example, when compared with other jurisdictions in the county, San Mateo's transportation impact fee may appear higher; however, each city's impact fee is directly linked to the number and type of infrastructure projects within that jurisdiction. Therefore, it is reasonable that infrastructure improvement projects differ among cities. San Mateo has unique infrastructure needs that are not shared by other cities in the county. For example, the City has three Caltrain stations, nine at grade crossings, and there is a list of pedestrian, bicycle and transit supportive infrastructure improvement projects that have been identified to foster increased bicycle and pedestrian use, provide connections to transit and services, etc. San Mateo has been pro-active in transportation planning to ensure that the list of infrastructure projects are up to date and relevant. Examples of transportation planning in the City include the 2020 Bicycle Master Plan, and Complete Streets Plan which is currently in development.

Additionally, it is reasonable for cities that are anticipated to accommodate more growth to evaluate its existing infrastructure in relation to projected growth and require new developments to share in the cost of infrastructure improvements needed to serve the growth from new developments. Cities that do so must meet legal requirements to establish a nexus to development and fees must be reviewed through a public process.

¹⁴ 21 Elements Survey Results spreadsheet with raw data provided by cities. Accessed June 7, 2022: http://www.21elements.com/constraints

While San Mateo's infrastructure impact fees are the median for cities in San Mateo County, it should be noted that San Mateo City has the highest Regional Housing Needs Allocation for both Housing Element Cycle 5 and Cycle 6, with 3,100 and 7,015 dwelling units, respectively. To accommodate new growth, the city's impact fees are evaluated to ensure nexus requirements are met and updated through a transparent public hearing process that is open to the public.

Transparent Costs

The City has been pro-active in re-evaluating and updating development related fees, and in meeting State requirements to increase transparency and predictability of fees. All applicable fees are available online (refer to links in Section 2.7). Additionally, the City allows developers to request a building permit fee estimate online by submitting an electronic worksheet.

The City also completed a development impact fee study in 2021 to ensure that fees are consistent with best practices, align with the stated services, and accurately reflect new developments' proportionate share of infrastructure costs. The consultant's recommendations have been incorporated into the City's Comprehensive Fee Schedule which was used to calculate the costs of development in Table 6.

While the City's current fees meet nexus requirements and have been recently updated, the City plans to review development application, building permit and impact fees to identify opportunities to reduce per unit costs for housing developments, with a focus on reducing per unit costs for small multi-family projects (Housing Element Policy H1.18).

In addition to City fees, there are additional fees required from other agencies to account for the impact of development. The combined San Mateo Union High School District and San Mateo/Foster City Elementary School District Impact Fee is \$4.08 per square foot for residential¹⁵. No fees are charged for new construction or additions that are under 500 square feet. While this is not a city fee, City staff helps applicants find information about the fee and connects them with the school district.

Other Considerations that Support Housing

In addition to evaluating fees and their role in housing development, the city also recognizes that wages are a contributing factor in a household's ability to enter the housing market. In 2017, the City Council adopted a provision allowing a reduction of 25% of the Affordable Housing Linkage Fee for developments that are subject to the fee and voluntarily agrees to pay area standard wages to construction workers on the development and enters into an agreement with the City to do so.

¹⁵ Combined San Mateo Union High School and San Mateo/Foster City Elementary School District School Fees; https://www.smuhsd.org/Page/5186

2.8.2 Building Permit Process

The length of time between a project's planning entitlement approval and building permit issuance in many cases is determined by the applicant, as further described under Non-Government Constraints in section III (below). The City has developed online application portal and streamlined the building permit review process with dedicated Development Review Technicians who actively manage concurrent reviews by all the development review departments including Planning, Building, Fire, Police, Arborist, Parks and Recreation, and Public Works. Once a project begins the building permit application review process, the following general timelines can be achieved with responsive applicants:

- 1. Single-family dwelling unit projects generally take 1-3 months*
- 2. Multi-family and mixed-use projects generally take 6-10 months*

The City also established Building application plan check review goals of an initial 20-day review period, then 10-days, then 5-days for subsequent resubmittals. These goals help to align plan check review timelines across all departments. (*Note: It should be noted that actual timelines vary depending upon how fast an applicant can resubmit plans with corrections, the quality of submittals, variations in project complexity, required reviews by external agencies (i.e. as Department Fish and Wildlife, Regional Water Quality Control Board [RWQCB], etc.)

2.9 Housing Special Needs Groups

The City of San Mateo encourages and facilitates the development of a variety of housing types that caters to special needs groups, including accessible housing, emergency shelters (i.e., temporary residential shelters), transitional housing, <u>single-room occupancy (SRO) housing</u>, supportive housing, and housing for farmworkers. Government Code Section 65583 and 65583.2 also require the Housing Element to provide various housing types for all economic segments of the population. The following analysis explains how the City facilitates these housing types consistent with State law requirements.

2.9.1 Housing for Persons with Disabilities

Nine percent of San Mateo residents have disabilities, compared with eight percent in the county. In addition to the need for housing that is accessible or ADA- compliant, housing affordability is a key limitation as many residents living with disability live on disability incomes or fixed income as some disabilities limit the ability to work, restrict mobility, or make it difficult to care for oneself. Persons with special needs or disabilities have several housing needs related to housing accessibility; access to transportation, employment, and commercial services; and alternative living arrangements that include on-site or nearby supportive living services.

The City has permitted and/or contributed funding for supportive housing for persons with disabilities. One example is the Humboldt House, located near downtown. The apartment building was originally purchased by a private owner to serve the mentally ill, before Mateo Lodge, Inc.'s acquisition and subsequent rehabilitation of the building. The City provided a Redevelopment Agency (RDA) loan to acquire the property, and subsequently also provided a HOME loan in 2000 for rehabilitation of the building. Currently, Mateo Lodge runs the facility which houses up to 29 residents and includes residential programs that provide supportive and rehabilitative services to residents. The following is a description of City regulations, policies, and procedures that support housing opportunities for people with disabilities. To further facilitate the production of new housing or conversion of existing housing for persons with disability, the Housing Element includes an implementation action in Policy H1.14 to study a universal design ordinance that may better address housing needs for persons with disabilities.

2.9.2 Residential and Family Care Facilities

State law requires that State-licensed group homes of six or fewer residents be regulated in the same manner as single-unit residences for zoning purposes. The San Mateo Municipal Code allows group homes with six or fewer residents by right in all zoned districts that permit single-family dwellings consistent with State law (SMMC 27.27 Residential Care Facilities).

Group homes with more than six residents (defined by the City's municipal code as "residential care facilities") are permitted by right in C2 and C3 zoned districts and with a SUP in R3 and R4 zoned districts, as shown in Table 2. While not explicitly required by State law, the SUP requirements for group homes of more than six persons could be considered a fair housing issue. The Housing Element includes an implementation program (Policy H1.14) to review the City's Zoning Code requirements for larger group

homes and amend the Zoning Code to ensure State law requirements related to fair housing and group homes are met.

To facilitate permitting of group homes and residential care facilities for seniors and non-seniors (including persons with disabilities), the Housing Element includes an implementation action in Policy H1.14 to amend the Zoning Code to allow group homes and residential care facilities for seven or more persons in all residential zones, only subject to those objections standards that apply to other residential uses of the same type in the same zone in conformance with state law.

2.9.3 Definition of Family

Historically zoning codes have included narrow definitions of the term dwelling unit and family that have been used to deny housing opportunities for unrelated individuals. San Mateo Municipal Code 27.04.195 defines "family" as "a person or persons living together and maintaining a common household". Upon analysis, the use of the term family may be utilized in a manner to discriminate against unrelated persons with disabilities living together. The Housing Element includes an implementation program (Policy H1.14) to review the City's Zoning Code requirements for family and other related regulations; and amend the code to ensure State law requirements related to persons with disabilities are met. This effort may also include consideration of new definitions such as single-unit and multi-unit dwellings to accommodate various housing situations.

2.9.4 Reasonable Accommodation Ordinance

The City of San Mateo has a process to ensure that reasonable accommodations are made for persons with disabilities. The Reasonable Accommodations for Residential Uses ordinance (SMMC 27.78) was established to provide people with disabilities a way to ensure that their needs are met by the City's zoning, building, and permitting process. Any person may request a reasonable accommodation from applicable zoning requirements, based on the disability of residents. The request is reviewed by the Zoning Administrator and applicants submit documentation that meet the following findings:

- 1. The housing, which is the subject of the request, will be used by a person with disabilities.
- 2. Due to the physical attributes of the subject property or the structures on site, the requested reasonable accommodation is necessary to make the specific housing available to an individual with a disability under the Federal Fair Housing Act and the California Fair Employment and Housing Act.
- 3. The requested reasonable accommodation would not create an undue financial or administrative burden for the City.
- 4. The requested reasonable accommodation would not require a fundamental alteration in City's land use and zoning ordinances, programs or policies. In making this finding, the decision-making body may consider, but its consideration is not limited to, the following factors:

- a. Whether the proposed changes to the subject property and structures, would adversely impact the health, safety or use of adjacent properties or the City right-of-way.
- b. Whether any reasonable alternatives have been identified that would provide an equivalent level of benefit without requiring a reasonable accommodation or exception to the City's applicable rules, standards and practices.

No fees are required for the application and assistance to apply is available upon request. The process is based on the requirements of federal and state housing laws, including the Fair Housing Act, and is intended to remove constraints on housing for persons with disabilities. Since the ordinance adoption in 2014, one application has been submitted and approved to provide flexibility in accommodating the homeowners' accessibility needs. It should be noted that the City's Zoning Code permits by right access to the main entry of residential unit as allowable intrusions into setbacks through a ministerial building permit application. Under this provision, applicants can apply for a building permit to construct ramps, lifts, railings and other elements necessary to ensure access to the dwelling unit without a need to seek reasonable accommodation.

2.9.5 Emergency Homeless Shelters

The California Health and Safety Code (Section 50801[e]) defines an emergency shelter as "housing with minimal supportive services for homeless persons that is limited to occupancy of six months or less by a homeless person. No individual or household may be denied emergency shelter because of an inability to pay."

California Government Code (Section 65583) requires each jurisdiction to identify one or more zoning districts where emergency homeless shelters are allowed without a discretionary permit. A building permit application is required to verify that the proposed project meets the City's development standards as part of a plan check review. The building permit review is a ministerial process and no public hearing is required. The zoning code development standards for emergency shelters include:

- In C2 zoned district, no emergency shelter shall be located within 300 feet of a single-family dwelling.
- Required parking shall be provided on-site with two garage stalls for the owner/manager, and one parking stall for every 6 occupants.

The Housing Element includes an implementation program (Policy H3.7) to evaluate and update the Zoning Code to remove the 300 feet buffer from a single-family dwelling and adopt objective development standards, including parking for shelters, in compliance with State requirements.

Government Code Section 65583(a)(4)(A) requires the Housing Element to demonstrate that the zones where emergency shelters are allowed by right include sufficient capacity on available sites to accommodate the need for emergency shelter identified in the most recent point-in-time count

conducted before the start of the planning period. <u>The Housing Element includes an implementation</u> program (Policy H3.7) to review and amend the zoning code to allow emergency shelters in C2, C3, and other zones as needed to comply with Government Code 65583 and ensure there is sufficient capacity on available sites to accommodate the need for emergency shelter as identified in the most recent point-intime count conducted before the start of the planning period.

The City participates in the countywide one-day homeless count which typically occurs every two years. No homeless count was conducted in 2021 due to the COVID-19 pandemic. Instead, the County of San Mateo conducted a count on February 23, 2022. The result shows a 21% increase countywide in the number of unsheltered, from 901 to 1,902 persons; however, the homeless population in the City of San Mateo decreased from 74 to 60 persons¹⁶.

As of December 2022, there are three emergency shelters located within the City of San Mateo that collectively can serve up to 181 individuals per night. The shelters are:

- First Step for Families The shelter serves up to 117 individuals per night with 39 family units. It is operated by Life Moves to provide interim shelter and supportive services including weekly financial literacy, housing and employment workshops.
- 2. Lisa's House The shelter serves up to 20 persons per night. It is operated by CORA and includes a variety of support services such as children's programs, crisis intervention, legal and mental services.
- 3. El Camino House The shelter serves up to 44 persons per night. It is operated by Samaritan House which provides a wide range of services including but not limited to children's programs, clothing, financial coaching and assistance, food services, job search assistance, and transportation assistance.

<u>Collectively, this demonstrates that there is sufficient capacity within the City to accommodate the 60</u> <u>unhoused individuals identified in the latest count.</u>

2.9.6 Zoning Capacity for Emergency Shelters

The City's Municipal Code currently allows emergency shelters by right in the C2 and C3 Regional/Community Commercial zoning district(s) with an approved building permit. There are approximately 76 acres (260 parcels ranging in size from 0.1 to 3.6 acres with an overall average parcel size of 0.3 acres) of land available in <u>these zoning districts</u>. These sites are located in areas with a mix of uses including offices, commercial, service commercial and light manufacturing uses (there is no heavy hazardous manufacturing); and are within half-mile of transit and services.

¹⁶ One Day Homeless Count Report dated August 2022: https://www.smcgov.org/hsa/2022-one-day-homeless-count

As discussed above, the City's collaboration with the County appears to be helping to close the gap in that the three existing shelters can accommodate the 60 unhoused individuals in the City. However, to facilitate additional emergency shelters, the Housing Element includes an implementation program (Policy H3.7) to review and amend Zoning Code requirements and standards as needed for temporary residential shelters to ensure sufficient capacity for changes in homeless counts in future years and continue to meet State law. Housing Policy H3.7 includes the following two key actions:

- Review and amend the zoning code to allow emergency shelters in C2, C3, and other zones as needed to ensure there is sufficient capacity on available sites to accommodate the need for emergency shelter as identified in the most recent point-in-time count conducted before the start of the planning period, in compliance with Government Code 65583.
- Review and amend the zoning code as needed to comply with Government Code 65583 including remove the 300 feet buffer from a single-family dwelling, clarify that emergency shelters are not required to be more than 300 feet apart, in compliance Government Code Section 65583(a)(4)(A)(v), and adopt objective development standards, such as parking for shelters in compliance with Government Code Section 65583(a)(4)(A)(ii).

2.9.7 Strategies for Providing Emergency Shelters

While the zoning capacity analysis above meets the requirements of State law, the City will continue to study best practices and explore collaboration opportunities to expand shelter capacity. These strategies may include unique partnerships with private companies, non-profit entities, and faith-based organizations to convert existing, underutilized buildings as emergency shelters. The City will also continue to collaborate with the County to close the gap when potential sites are identified within the city limits. The Housing Element Policy H3.7 articulates the City's intent to regularly evaluate City policies, best practices and collaboration opportunities to end homelessness within the City.

2.9.8 Collaboration with County to Address Homelessness

The City collaborates with the County of San Mateo on countywide homeless counts, which occurs every two years; and follows the County's "Continuum of Care" (CofC) program to address homeless. In 2016, the CofC released its current Strategic Plan titled "Ending Homelessness in San Mateo County". The overarching goal is to create a centralized countywide system that is both data driven, and client focused to respond effectively and rapidly to the crisis of homelessness. The system utilizes the Housing First practice, where access to safe and secure housing is made the first step in the process of achieving long term housing stability. The Coordinated Entry System (CES) pulls together all of the service providers across the county to ensure that resources are available all across the county regardless of which jurisdiction an individual enters the system from. This also allows for tracking of individuals if they are to re-enter the system after exiting, which allows the CofC to gauge the effectiveness of the programs being used.

The plan also outlines several programs to address homelessness, including outreach, emergency shelters, transitional housing, rapid rehousing, supportive housing, and homeless prevention programs. The City jointly funds these programs with other jurisdictions throughout the County and evaluates their performance together as part of the Steering Committee. The purpose of the plan was originally to outline a comprehensive strategic plan to end homelessness throughout San Mateo County by the year 2020. Many of the target achievements of the plan were drastically altered by the spread of the coronavirus pandemic and the resulting housing instability that occurred from loss of income across many households. The City of San Mateo continues to be a partner in the CofC as both a funder of shelters and programs as well as a voting member in the CofC Steering Committee, which is reflected in the Housing Element Policy H3.1.

2.9.9 Low Barrier Navigation Centers

Assembly Bill 101, passed in 2019 and codified in Government Code Section 65622, requires that a low barrier navigation center be a use permitted by right in mixed-use zones and nonresidential zones permitting multi-family uses if it meets specified requirements. AB 101 defines "low barrier navigation center" as a housing first, low-barrier, service-enriched shelter focused on moving people into permanent housing that provides temporary living facilities while case managers connect individuals experiencing homelessness to income, public benefits, health services, shelter, and housing. The Housing Element includes an implementation program (Policy H3.7) to evaluate and amend the Zoning Code to comply with this new requirement and to allow these in the same <u>areas zoned for mixed-use and non-residential zones</u> permitting multi-family uses, consistent with Government Code Section 65660 - 65668.

2.9.10 Transitional/Supportive Housing

Transitional housing is designed to assist homeless individuals and families in moving beyond emergency shelter and into permanent housing by helping people develop independent living skills through the provision of supportive services. Permanent supportive housing is housing that is linked to services that assist residents in maintaining housing, improving health, and maximizing ability to live and work in the community. Examples include the Vendome, which is located near downtown and provides permanent supportive housing to 16 chronically homeless adult men and women; and the County's recent purchase and conversion of the Stone Villa Inn as a 44-unit transitional housing site.

The City is consistent with State law in that supportive housing and transitional housing are defined in the City's Zoning Code as a dwelling and subject only to those restrictions that apply to other residential uses of the same type in the same zone.

Per recent changes in State law (AB 2162), the City must also allow 100 percent affordable projects that include 25 percent, or 12 units of supportive housing, by right where multi-unit and mixed-use development is permitted. While the City has not updated its Zoning Code, the City is pro-active in ensuring that new projects meeting AB 2162 criteria are compliant. For example, the Montara affordable housing development includes 12 units for formerly homeless individuals. The Housing Element includes

an implementation program (Policy H1.15) to review and amend the City's Zoning Code to comply with this new provision of State law.

2.9.11 Housing for Farmworkers

There are no active or potential agricultural lands remaining within the City, therefore the City does not have any labor force associated with the agricultural sector. Although no agricultural activity remains within the City of San Mateo limits, the region and the County of San Mateo as a whole includes agricultural activity that attracts farmworkers and their families. The 2019 census data for employment identifies 272 out of 57,365 employed residents of the City identify as working within the "agriculture/forestry, fishing and hunting" category. It is likely that these residents and their families are permanent employees who reside in the City due to access to urban amenities and services and are commuting to agricultural lands within the County. Seasonal agricultural workers who come to San Mateo County during those times of year when crop harvesting, and processing occur often need access to group housing or temporary (non-emergency) shelters, but do not appear to be seeking housing options within the City.

The provisions of Section 17021.5(b) of the California Health and Safety Code state that employee housing for six or fewer employees must be treated like any other single-unit dwelling. The City does not regulate the occupancy of single unit dwellings and there are no provisions in the City's code to restrict employee housing for six or fewer employees, therefore, the City complies with this requirement.

California Health and Safety Code Section 17021.6, requires that farmworker housing of no more than 36 beds in a group quarters or 12 units shall be deemed an agricultural use. No conditional use permit, zoning variance, or other discretionary zoning clearance shall be required of this housing that is not required of any other agricultural activity in the same zone. Only two areas are identified within the Agricultural Zoning District (A), which allows for Agricultural use. These two sites include the San Mateo County (County) Event Center, and a parcel within the College of San Mateo. The existing zoning requirements for permitted uses does not explicitly allow for such housing, but agricultural use is listed as a permitted use. The City will evaluate and update its zoning code either as a part of miscellaneous code amendment or should the County or the College of San Mateo wish to proceed with providing farmworker housing at these sites, as identified in Policy H1.17.

2.9.12 Accessory Dwelling Units

Since 2016, California lawmakers have passed several bills to promote development of accessory dwelling units (ADUs). ADUs are defined as attached or detached residential dwelling units that provide complete with independent living facilities for one or more persons located on the same parcel as the primary residence. The City also adopted the definition of a "junior accessory dwelling unit" (JADU), which is a similar independent living unit that is constructed entirely within the walls of a proposed or legally existing single-family residence.

In 2017 and 2022, the City amended the Zoning Code (Chapter 27.19) to <u>meet, and in many cases, exceed</u> the minimum requirements of State law. ADUs are permitted by-right in any zone that allows residential use. For parcels with an existing or proposed single-family dwelling, the City allows up to one ADU and one JADU. The City defers to the provisions of Government Code Section 65852.2(e)(1) for ADUs proposed on a lot with an existing multi-family dwelling (attached duplex or more).

The City's ADU Ordinance update includes many development standards that are more permissive than those allowed under state law. These standards were developed following extensive community outreach and <u>multiple</u> public meetings. For example, the updated ordinance allows larger sized JADUs (maximum 650 square-feet); new ADUs do not have a size limit and can utilize all available floor area permitted by the site's floor area ratio; <u>ADUs can be two-stories</u>, attached ADUs can have a height of up to 24 feet to the plate line and 32 feet to the roof peak; and detached ADUs can have a height of up to 16 feet to the plate line and 24 feet to the roof peak. ADUs may also opt for a discretionary review process to exceed the development standards, including height requirements, allowed under ministerial review, which allows for a quicker and cheaper review process than a standard variance; and, for at least the first year, the discretionary review process does require an application fee. These updated standards provide more flexibility in design and are aligned with local community needs.

Under state law, ADUs are eligible for ministerial review and applications must be approved within 60 days of a complete application submittal. ADU applications may be submitted in-person or online permit and are charged a flat fee that varies by proposal. Building permit fees are currently as follows:

- ADU (New Construction): \$2,830.50
- ADU (Converted or Remodeled Space): \$2,103.00
- JADU: \$1,578.50

Additional fees are charged on an as-needed basis, such as a Heritage Tree permit, Sewer Lateral Compliance and Encroachment Permit. School District Fees are collected separately by the San Mateo Union High School District. The City also partners with Symbium to offer a free, interactive web-based mapping tool to help with preliminary site planning of ADUs. Overall, the City has been active in supporting property owners who seek to develop ADUs or JADUs by streamlining the permitting process, setting low flat fees for permits and providing expanded information and resources; and as outlined in Policy H1.4, the City will continue to actively support the production of this housing type.

2.9.13 Manufactured Homes and Mobile Home Parks

State law requires that cities and counties allow the placement of manufactured homes (also referred to as factory- built homes and modular homes) meeting Federal construction standards and manufactured home subdivisions in single-family neighborhoods. California Government Code Sections 65852.3 through

65852.5¹⁷, require that manufactured homes be permitted in single-family districts subject to the same land use regulations as conventional homes. Additionally, Government Code Section 65852.7 requires that cities and counties allow mobile home parks (including condominium and cooperative parks) in all residential zones.

In keeping with State law, the City's Zoning Code allows manufactured homes on permanent foundations in the same residential zones as single-family dwellings. The code defines manufactured homes as a dwelling, and they are subject to the same development standards. The City's Zoning Code does not permit mobile home parks in residential districts; however, there is a provision allowing the Zoning Administrator to consider "other similar uses" in residential districts. The current code language is not explicit; therefore, the Housing Element includes an implementation program (Policy H 1.16) to review and amend the Zoning Code as necessary to meet state law regarding allowing mobile home parks as special use in all residential zones.

2.9.14 Single-Room Occupancy (SRO) Housing

Government Code 65583(c)(1) requires local jurisdictions to specify the areas where Single-Room Occupancy (SRO) housing are permitted. SROs are single-room (zero bedroom) units that are typically intended for occupancy by residents, with low or minimal incomes, who share a kitchen and bathrooms with other residents in a multi-tenant building. The zoning code does not specify the zoning districts where SROs would be permitted and thus is a constraint on production of this housing type. The Housing Element includes a new program in Policy H1.7 to amend the Zoning Code to reduce or eliminate constraints to housing construction including the identification of zoning areas where SROs are permitted consistent with state law.

¹⁷ The National Manufactured Housing Construction and Safety Standards Act of 1974 (also referred to as the Manufactured Home Act of 1974).

3 NON-GOVERNMENTAL CONSTRAINTS

State law (California Government Code, Section 65583[a)[6]) requires Housing Elements to contain an analysis of nongovernmental constraints to the maintenance, improvement, or development of housing for all income levels, including the availability of financing, the price of land, and the cost of construction. Potential nongovernmental constraints are largely determined by market conditions over which local jurisdictions have little control. However, local governmental interventions that affect non-governmental constraints will be explored in more detail in Section 3.1.5 Planning Entitlement Approval to Building Permit Application.

3.1 Development Costs

3.1.1 Availability of Financing

The availability of financing is a critical factor that can influence the cost and supply of housing. There are generally two types of financing used in the housing market: (1) capital used for initial site preparation and construction; and (2) capital used to finance the purchase of units by homeowners and investors.

Interest rates substantially impact home construction, purchase, and improvement costs. A small fluctuation in rates can make a dramatic difference in the annual income needed to qualify for a loan. However, interest rates are determined by national policies and economic conditions, and there is little that local governments can do to affect interest rates.

In general, financing for new residential development for both construction and long-term mortgages is generally available in San Mateo County, subject to normal underwriting standards. However, economic fluctuations in recent years due to the pandemic have caused caution among lenders and may have lasting effects on the availability of financing through this Housing Element planning period. While interest rates remain low in 2022, during the planning period, interest rates are anticipated to increase, with multiple rate increases expected in the near term as inflation rises. The availability of financing for developers under these economic conditions may pose a constraint on development outside the City's control.

3.1.2 Cost of Land

The cost of land has also increased substantially over the past decade, and many jurisdictions are now essentially built out, with no available vacant land for development. With this limited land availability, most locations in the Bay Area are experiencing substantially higher land values than in other areas of the State because of the attractiveness of living along the coast, with its mild climate, access to high-tech jobs, and plentiful amenities.

There are multiple factors that may affect the cost of land, such as lot size, topography, site conditions, shape of the parcel, location and amenities, neighboring uses, access, proximity to public services, noise and the financing arrangement between buyer and seller. Land costs in single-family residential

neighborhoods of San Mateo are difficult to assess because of the lack of undeveloped residential properties in the city. Additionally, the available information is not comprehensive and any summaries or averages at the city level may not be valuable for reaching conclusions. The same limitation applies to the land price for properties that are suitable for multi-family development, as such, a study at the County level would likely be more informative.

On behalf of 21 Elements, Century Urban¹⁸ conducted an independent countywide study of single-family land sales and multi-family land sales in the last three years, inclusive of both rental apartment and forsale (condos/townhomes) units. For single-family land sales countywide, of parcels up to one acre in size, the land cost ranged between \$582,000 to \$8 million, with an average of \$1,030,000 per unit.

For multi-family land sales in San Mateo County, Century Urban's report shows the average land cost is \$1,000,000 for small multi-family and \$10,000,000 for large multi-family properties, respectively. In contrast, during the last Housing Element, a similar analysis found that average per-acre prices were approximately \$820,000. This means that since the last Housing Element, land prices have significantly increased.

All of these factors work together to make it so developers must charge substantial rents and sales prices to cover these costs. The Terner Center Report¹⁹ notes that, for example, a multi-family unit that costs \$800,000 to build will need to charge approximately \$4,000 in monthly rent – a price well over the typical monthly earnings in the State – to cover those costs and meet return on investment requirements for investors.

3.1.3 Constructions Costs

Construction costs, which can comprise a significant portion of the sales price of a home, are one of the major cost factors with residential development. Construction cost is determined primarily by the cost of labor and materials. The relative importance of each is a function of the complexity of the construction job and the desired quality of the finished product. The price paid for material and labor at any one time will reflect short-term considerations of supply and demand. Future costs are difficult to predict given the cyclical fluctuations in demand and supply that in large part are created by fluctuations in the state and national economies. Such policies unilaterally impact construction in a region and therefore do not deter housing construction in any specific community.

An indicator of construction costs is Building Valuation Data compiled by the International Code Council (ICC). The unit costs compiled by the ICC include structural, electrical, plumbing, and mechanical work, in

¹⁸ Century Urban's San Mateo and Santa Clara Counties Development Costs & San Mateo County Unit Mix Research, April 2022, http://21elements.com/documents-mainmenu-3/housing-elements/rhna-6-2022-2030/1380-b-d-dvpt-cost-and-unit-mix-2022-4-7-draft-updated/file

¹⁹ Hayley Raetz, Teddy Forscher, Elizabeth Kneebone and Carolina Reid, The Hard Costs of Construction: Recent Trends in Labor and Materials Costs for Apartment Buildings in California, The Terner Center for Housing Innovation, University of California Berkeley, March 2020, p. 3, http:/ternercenter.berkeley.edu/uploads/Hard_Construction_Costs_March_2020.pdf

addition to interior finish and normal site preparation. The data is national with the regional difference running generally 20 percent higher based on the most recent (2020) analysis cited from the Terner Center for Housing index for construction costs in California. The 2020 national averages for costs per square foot, excluding the cost of the land acquisition, are as follows:

- Type I or II, Multi-Family: \$129.23 to \$167.27 per sq. ft.
- Type V (Wood Frame), Multi-Family: \$112.76 to \$147.50 per sq. ft.
- Type V (Wood Frame), One- and Two-Family Dwelling: \$122.46 to \$141.72 per sq. ft.

According to data from the California Construction Cost Index, hard construction costs in California grew by 44 percent between 2014 and 2018, or an additional \$80 per square foot.²⁰ Between 2020 and 2021 alone, construction costs increased 13.4 percent. Construction costs are estimated to account for upwards of 60 percent of the production cost of a new home, especially for multi-unit residential buildings which often require the use of more expensive materials, like steel, and need additional amenities such as parking structures.²¹ Variations in the quality of materials, type of amenities, labor costs and the quality of building materials could result in higher or lower construction costs for a new home. Prefabricated factory-built housing, with variation on the quality of materials and amenities may also affect the final construction cost per square foot of a housing project.

Several additional factors have caused the increased cost of materials, including global trade patterns and federal policy decisions, such as tariffs, as well as state and local regulations, such as building codes. The COVID-19 pandemic has also influenced the cost and availability of construction materials. Supply chain disruptions have resulted in project delays and increased costs due to a shortage of construction materials and equipment.

According to a report released in March 2020 on multi-family construction costs in California from the Terner Center, many different factors layer together to affect the bottom-line costs of building new housing and whether or not a project will ultimately "pencil": the costs of acquisition (e.g., land and closing costs), hard construction costs (e.g., materials and labor), soft costs (e.g., legal and professional fees, insurance, and development fees), and the costs of conversion once a project is completed (e.g., title fees and the operating deficit reserve).²² According to its research, the largest share of a project's total cost comes from materials and labor, or hard costs.

Hard construction costs make up more than 60 percent of total development costs. The Terner Center study found that on average, construction costs were about \$222 per square foot in 2018 compared to \$177 in 2008-2009, representing a 25 percent increase. While these increases have been felt across the state, costs are highest in the Bay Area, which saw costs rising by 119 percent during the same time period,

²⁰ Lbid., Raetz et al, p.8.

²¹ Ibid., Raetz et al, p.4.

²² See the Terner Center's series on housing costs at https://ternercenter.berkeley.edu/research-and-policy/the-cost-of-building-housing-series/

to over \$380 per square foot. The reasons for this gap are complex, but the Terner Center suggests that higher labor costs to attract workers plays a part due to the higher cost of living; local regulations that require certain materials or building components to be used; lengthy review processes; and other local constraints.²³

The impact of high construction costs on affordable housing cannot be underestimated. According to a study by the Bay Area Council, in 2019 there were 23 new construction projects of below market-rate housing financed through the California Tax Credit Allocation Committee (TCAC), with a total of 1,912 units, across six counties of the nine-county Bay Area. Each project in California requested federal and/or state tax credits to finance the new construction of housing units with rents affordable to households earning 30-60 percent of area median income (AMI; this translates to very low-income households). The project costs consist of land and acquisition, construction costs, construction contingency, architectural/engineering, construction interest, permanent financing, legal fees, reserves, other costs, developer fees, and commercial costs. Project costs were analyzed to determine the reasonableness of all fees within TCAC's underwriting guidelines and TCAC limitations.

The report found that the average construction cost of new below market rate housing in the Bay Area was \$664,455 per unit, far more than lower income households can afford without subsidies. In comparison, other projects across California (excluding the Bay Area) on average cost \$385,185 per unit of below market rate housing.²⁴

3.1.4 Labor Costs

The California Labor Code applies prevailing wage rates to public works projects exceeding \$1,000 in value. Public works projects include construction, alteration, installation, demolition, or repair work performed under contract and paid for in whole or in part out of public funds. State law exempts affordable housing projects from the prevailing wage requirement if they are financially assisted exclusively with Redevelopment Agency (RDA) housing set-aside funds. However, if other public funds are involved, which is often the case, prevailing wage rates may still apply. Furthermore, if federal funds are involved, Davis-Bacon Act wages often apply. Under the Davis-Bacon Act, workers must be paid no less than the locally prevailing wages, as well as overtime payments of time and a half. While the cost differential in prevailing and standard wages varies based on the skill level of the occupation, prevailing wage requirements could effectively reduce the number of affordable units that can be achieved with public subsidies.

Statewide, labor costs have also increased in recent years, as the labor pool has not kept pace with the increase in demand. Since the recession, California has seen a severe tightening in the construction labor market, especially for workers trained in specific construction trades. The lack of an available labor force drives up the cost of labor and leads to project delays as workers are either unavailable or lost to more profitable projects.

After a Planning Entitlement for a development project has been approved by the Zoning Administrator, Planning Commission or City Council; it becomes the applicant's responsibility to initiate the steps to secure building permit approvals and begin construction in accordance with the approved plans. The length of time between a project's planning entitlement approval and building permit application is determined by the applicant.

Intervening steps include obtaining additional City clearances and paying fees as outlined in a project's conditions of approval. Other necessary actions for the applicant include:

- 1. Completing construction drawings after project approval (city does not control this timeline)
- 2. Recording with the County Clerk subdivision (final) maps (applies to ownership projects)
- 3. Retaining contractors
- 4. Obtaining utility approvals (not owned by the city), required easements, and rights of entry
- 5. Providing tenant relocation assistance

As discussed in Sections 2.7 and 2.8 above, the City has taken several steps to facilitate the review process. Once a project begins the building permit application review process, the applicant also has a shared responsibility in resubmitting materials and addressing comments in a timely manner. With responsive applicants, the following general timelines can be achieved during the building permit stage:

- 1. Single-family projects generally take 1-3 months*
- 2. Multi-family and mixed-use projects generally take 6-10 months*

(*Note: actual timeline depends on how fast an applicant can resubmit plans with corrections, complexity of project, etc.)

3.2 Requests for Housing Developments at Reduced Densities

State law requires the Housing Element to include an analysis of requests to develop housing at densities below those anticipated in the sites inventory. As demonstrated in the City's Annual Progress Reports in past years, there is a strong trend for development projects to utility density bonus law to add additional units beyond the base density. While the City anticipates the trend to continue due to the high demand for housing in the bay area region, the Housing Element includes an implementation program in Policy H1.9 to amend the Zoning Code to add minimum density requirements to ensure that future development projects meet the anticipated density in the sites inventory, or exceed it.

3.3 Physical Site Constraints

The City of San Mateo recognizes the challenges associated with building housing, especially that which is affordable, on infill sites. Many parcels in the downtown area and along El Camino Real are considered small, and the City acknowledges that parcels may need to be consolidated under one owner in order to facilitate mixed use and affordable housing development. To incentivize parcel aggregation, the City's

Zoning Code includes provisions such as a tiered allowable floor area based with higher allowable floor areas for larger on parcel sizes in districts zoned for multi-family development.

3.4 Environmental Constraints

The environmental setting affects the feasibility and cost of residential development. Environmental issues range from the suitability of land for development, the provision of adequate infrastructure and services, as well as the cost of energy. San Mateo currently encompasses about 7,744 acres of land. The majority of the parcels in the City's boundary are developed. Most of the undeveloped parcels are in the areas to the west near Sugarloaf Mountain. These areas contain environmental constraints on development, such as steep slopes, landslide hazards, fire hazards, or flood hazards, and therefore, much of the undeveloped land has been set aside as open space. The following are environmental constraints and hazards that affect, in varying degrees, existing and future residential developments.

3.4.1 Seismic Hazards

The San Andreas Fault zone is located approximately two miles west from the City of San Mateo boundary and the Hayward fault lies approximately 14 miles northeast of the City; however, there are no known active faults within the City. Major problems could result from ground shaking, which is likely to be amplified in the areas underlain by relatively unconsolidated deposits, especially in the eastern part of the City. Liquefaction is also a possibility in these areas. There is potential for landslides on all slopes; however, site-specific investigations can differentiate the degree of risk.

3.4.2 Topography/Slope

The City of San Mateo encompasses a variety of upland, hillside, valley and land forms that is defined by the Crystal Springs reservoir to the west, and the San Francisco Bay on the east. Elevations range from 0 to 631 feet above sea level. Western portions of the city are steep and susceptible to landslides, erosion, and other topographic hazards. To address these concerns, the City's Site Development Code oversees development of lands with slopes exceeding 15 percent. The Site Development Code requires technical studies that address surface grading, draining, erosion and subsurface conditions in order to minimize risks to the community and environment.

3.4.3 Flood Hazards and Sea Level Rise

The City's floodplain management ordinance requires flood proofing or elevation of structures above flood heights along portions of San Mateo Creek and east of Bayshore. The City will continue to regulate development and improvements to properties located in the designated flood hazard areas in accordance with the ordinance. Since 2001, the City has identified a series of flood control projects to remove residential properties from the Flood Hazard Zone, which include the South Bayfront Levee Improvement projects (completed in 2010) and the North Shoreview Flood Improvement Project (may be completed by 2023). The City has two remaining tidal flood protection projects at the North Levee near Coyote Pointe

and at Laurel Creek near the San Mateo Glendale Village neighborhood. Approximately 8,000 properties have been removed or have been prevented from being placed on the flood map to date.

Global climate change also poses potential impacts related to sea level rise. In 2018, the California Natural Resources Agency and California Ocean Protection Council updated the Sea-Level Rise Guidance Document²⁵, which estimates sea levels in the San Francisco Bay Area to rise 22 inches by the year 2050 and 82 inches by the year 2100. San Mateo is in a low-lying coastal area and thus is highly vulnerable to this threat. A sea level rise of 22 inches could inundate areas near Seal Point. If the level of San Francisco Bay rises 82 inches, water is projected to inundate all parts of San Mateo east of Highway 101, the area north of downtown, and large sections of the Hayward Park, Bay Meadows, and Laurie Meadows neighborhoods. To protect against sea level rise, the City participates in the San Mateo County Flood and Sea Level Rise Resiliency District's OneShoreline program to coordinate shoreline protection projects throughout the County. For more information, see the program website: www.oneshoreline.org.

3.4.4 Fire Hazards

Much of the open space, hillside area of San Mateo is located west of El Camino Real. There is higher potential for fire in these areas including grass or wildland fires as shown in the following figure from CAL FIRE (Figure 2). The risk in these areas is compounded by limited emergency access to open space areas and, in some cases, by insufficient fire hydrants/water flow to meet fire-fighting requirements. The Safety Element of the General Plan, currently under development, will set forth updated approaches to reduce this risk in developed areas and in the design and location of new development in the hillsides.

3.5 Voter Approved Requirements-Growth Limits

One of the most significant constraints to high-density housing development in the City is the voter approved ballot initiative that limits height and density of new development (capped at a maximum of 50 units per acre and 55-75 feet height). In 1991, San Mateo voters enacted Measure H that amended the City's General Plan to restrict heights and densities of new development in the City. Specifically, Measure H amended the General Plan to limit building heights to a maximum of 55 <u>feet</u> (75 feet with public benefits), residential densities to a maximum of 50 units per acre, and nonresidential building intensity as measured by the ratio of building floor area to the size of the parcel to a maximum of 3.0 based on location. Measure H also established an inclusionary housing program requiring residential developments to provide at least 10 percent of a project's units at rents or prices affordable to low- or moderate-income households.

As a voter-adopted initiative, the policies established by Measure H could not be amended by the City Council without subsequent voter approval while the measure was in effect. Measure H contained an expiration provision of December 31, 2005.

In 2004, the City Council proposed a ballot initiative, Measure P, to authorize limited modifications to the policies established by Measure H, and to extend the expiration provision until December 31, 2020; and Measure P was subsequently approved by the voters in November 2004.

In 2020, voters approved Measure Y²⁶, which extended the expiration date of the General Plan policies concerning building heights, densities, and intensities established in Measure P to December 31, 2030. In addition, Measure Y amended the provisions of Measure P concerning the inclusionary housing program to comply with AB 1505, which is codified in Government Code 65850. This law requires inclusionary housing ordinances to allow developers of rental housing projects the option to provide off-site construction of units or other alternative means of compliance with the inclusionary housing requirement. This measure <u>does</u> not permit the payment of in-lieu fees as an alternative means of compliance with the inclusionary housing requirement. The inclusionary housing program, as modified by this measure, and the policies concerning building heights, densities, and intensities established in Measure P, cannot be amended by action of the City Council without voter approval until 2030.

Measure Y does not preclude the City's ability to approve new higher density housing developments, but it does constrain the number of housing units that can be developed in any single project and increases the costs to develop new housing as it limits efficiency of scale that comes with high density developments. For a City with a population of over 100,000 people with three Cal Train stations and a high quality transit corridor (El Camino Real), new housing projects with densities at 100-200 units per acre are not only feasible but also necessary in order to meet the City's housing needs and support its economy. The City has approved a significant number of new housing units over the last five years, but

²⁶ Measure Y ballot language: <u>https://www.cityofsanmateo.org/1537/General-Plan</u>

the density cap has limited its ability to reduce the cost of housing and achieve the number of housing units needed to help alleviate local impacts from the region's housing crisis.

In addition to the cap on <u>housing density</u>, Measure Y also constrains the City's <u>ability</u> to impose a higher <u>affordable housing</u> inclusionary requirement on <u>new</u> housing development projects since <u>it could</u> <u>negatively</u> affect the per unit costs and potentially suppress overall housing production. The City currently has a 15% inclusionary requirement for both ownership and rental <u>housing projects</u> that was adopted by the City Council in 2020 after completion of a nexus study. These inclusionary requirements could be further assessed after the adoption of the City's General Plan to see if any changes in the market conditions and constraints imposed by Measure Y have been <u>reduced</u>, which could allow the City to increase the inclusionary requirement for new development, thus resulting increasing affordable housing production.

While Measure Y has created a barrier to the development of housing projects with higher densities and heights, within the last five years, many housing projects have utilized State law to receive density bonuses, concessions and waivers to exceed the height, density, and intensity limitations imposed by Measure Y. In addition, the City is in the process of updating its General Plan, with an adoption target at the end of 2023, that would allow for increased heights and densities within ten study areas identified as priority locations for additional growth and new development. The draft land use map in the General Plan Update would increase land use densities to allow for up to 21,900 additional new housing units to be developed over the next 20 years. However, since the densities in the draft land use map exceed the 50 units per acre limit set by Measure Y, an updated ballot initiative would need to be approved by the voters before these provisions could take effect. With adoption of the General Plan targeted for the end of 2023, the ballot initiative could potentially go before the voters in 2024.

Overall, Measure Y is a significant Non-Governmental Constraint to housing production, and affordable housing in particular, in the City of San Mateo. Building community consensus around a path forward with Measure Y as part of the General Plan Update process is essential to meeting the City's current and future housing needs and to reducing this significant constraint on housing production. (Policy H1.21)

1 INTRODUCTION

The housing resources of the City of San Mateo are comprised of all the funds, programs, and sites that are available to be used to create additional housing affordability. There is a myriad of ways the City can address housing concerns in the community, both from a land use and from a programmatic standpoint. The City receives and dedicates funding sources to be used in the development of affordable housing and housing related programs. These housing related programs can also be jointly managed by non-profit providers and city staff working collaboratively. The City is also responsible for ensuring that it maintains an inventory of sites that can feasibly support enough housing development to meet the goals of the Housing Element. These three areas together make up the housing resources of the City.

2 DESCRIPTION OF HOUSING FUNDING PROGRAMS

This section will discuss the funding the City utilizes in the development of housing, especially housing that is affordable, through financial and other kinds of assistance, as well as for other housing programs. Affordable housing projects in particular, due to the high costs of land and construction, typically require a combination of resources and partnerships to achieve development and affordability. There are a number of resources available to the City to implement its housing and community development objectives. Each funding source typically comes with a set of regulations that restricts the ways in which it may be used to ensure that they meet the parameters of the purpose of the program. Many of the programs identified herein are designed primarily to address affordability issues, as the cost of housing is a significant impediment to homeowners and renters alike.

2.1 Federal Programs

2.1.1 Community Development Block Grant (CDBG)

The City of San Mateo has been an active participant in the CDBG program for over 40 years. The U.S. Department of Housing and Urban Development (HUD) awards this flexible grant program to jurisdictions through a statutory formula that uses measurements of need. CDBG funds can be used to assist low- and moderate-income persons in the form of social services activities, housing rehabilitation, economic development, neighborhood revitalization, improvement of public facilities, and prevention and elimination of slums and blight. The City's entitlement grant has increased an average of about 5% over the last five years. It is anticipated that the CDBG grant will either remain the same or decrease; therefore, the City is budgeting a conservative 2% decrease annually over the next five years.

2.1.2 HOME Investment Partnerships Program (HOME)

The HOME program is a federal grant to participating jurisdictions determined by formula allocations. HOME funds are directed toward the housing programs that assist persons at or below 60% of the median income, including acquisition, rehabilitation, new construction, tenant-based assistance, homebuyer assistance, planning and supportive services. The City of San Mateo participates in the program as part of a consortium with the County of San Mateo and the City of South San Francisco.

2.1.3 Low Income Housing Tax Credits (LIHTC)

The LIHTC is an incentive for investors to provide equity to develop rental units for households at 30 - 60% of median income. The program is not a direct federal subsidy, but rather a tax incentive administered by the Internal Revenue Service. \$1,200,000 in tax credits were used to help finance the Montara project in 2020, which contained 68 affordable housing units and 12 units set-aside for formerly homeless veterans.

2.1.4 Section 8 Rental Assistance Program

This program is administered by the San Mateo County Housing Authority with multiple eligibility criteria; including a family or a single person who is 62 years or older, disabled or pregnant, with a household annual gross income equal to or below the HUD published income limits. Households who qualify for Federal Preference are considered first and are defined as persons who are involuntarily displaced, or persons who are paying more than 50% of household income towards rent. Nearly 700 San Mateo residents are assisted annually through individual vouchers and have selected housing that distributes the assistance throughout neighborhoods in the City.

2.1.5 Other Federal Programs

There are other Federal programs that may be made available to affordable housing projects located in the City, including the Section 811 Supportive Housing for Persons with Disabilities program in which HUD provides funding to develop and subsidize rental housing with the availability of supportive services for very low- and extremely low-income adults with disabilities. The Section 811 assistance comes in the form of project rental assistance alone. No funds are available for construction or rehabilitation. In addition, HUD-VASH is a collaborative program which pairs HUD's Housing Choice Voucher (HCV) rental assistance with VA case management and supportive services for homeless Veterans. These services are designed to help homeless Veterans and their families find and sustain permanent housing and access the health care, mental health treatment, substance use counseling, and other supports necessary to help them in their recovery process and with their ability to maintain housing in the community.

2.2 State Programs

2.2.1 Permanent Local Housing Allocation (PLHA)

The City of San Mateo began receiving funding through the PLHA program in 2020. HCD awards the grant to cities and counties based on a formula of the amount of funding each jurisdiction receives through the CDBG program. PLHA funds can be used for predevelopment, development, acquisition, rehabilitation of low-income housing, to match funds into housing trusts or low-income housing asset funds, accessibility modifications, homeownership opportunities, rehabilitation, and other supportive housing and homelessness services. The City's estimated 5-year award from HCD is \$2,051,364 and therefore anticipates an award of around \$400,000 annually.

2.2.2 Other State Programs

The City of San Mateo obtains funding from several State programs such as the CalHome Program, which is currently used for a home rehabilitation loan program and has a fund balance of around \$560,000 in 2022. Staff keeps a close eye on funding cycles and new funding opportunities from the State as they are released. Housing developers and housing organizations are eligible to apply for State funds, such as programs sponsored by California Housing Finance Agency (CalHFA), on a project-by-project basis. There are also State Low-Income Tax Credits available, which can be used to assist housing projects. Participants in First Time Homebuyer Programs often utilize the CalHFA mortgage and down payment assistance programs as they are available.

Projects within the City have also utilized other state funding programs, including the Infill Infrastructure Grant (IIG), which is available as gap funding for infrastructure improvements necessary for specific residential or mixed-use infill development projects or areas and the Local Housing Trust Fund (LHTF) which provides matching funds to local and regional housing trust funds. Other state programs include Affordable Housing and Sustainable Communities (AHSC) Program, which funds projects to support infill and compact development that reduce greenhouse gas (GHG) emissions, the Golden State Acquisition Fund (GSAF) which provides a flexible source of capital for the development and preservation of affordable housing properties, Project Homekey, which can be used to develop hotels, motels, hostels, single- family homes and multifamily apartments and other existing buildings to Permanent or Interim Housing, Housing for a Healthy California (HHC) which creates supportive housing for individuals who are recipients of or eligible for health care provided through the Medi-Cal program, the Multifamily Housing Program (MHP) which provides loans for new construction, rehabilitation, and preservation of permanent and transitional rental housing for lower-income households, and the Predevelopment Loan Program (PDLP) which provides short-term loans to finance affordable housing prodevelopment costs.

2.3 Other Public Funds

2.3.1 Housing Successor Agency for the Redevelopment Agency

As mandated by the state legislature, the Redevelopment Agency (RDA) of the City of San Mateo was dissolved as of February 1, 2012. As the Housing Successor Agency, the City of San Mateo is responsible for the management of properties and funds formerly belonging to the Redevelopment Agency. The City elected to retain the housing assets and housing functions previously performed by the Agency upon dissolution. A portfolio of loans previously financed by RDA funds provides some program income to support future affordable housing. At the time of dissolution, the City's RDA fund balance of approximately \$1.9M was returned to the local taxing agencies. The City elected to retain its portion of the returned funds in the amount of \$706,000 to be reserved for affordable housing. It has also set a policy to contribute 20% of the annual increase in property tax revenues to be retained for affordable housing project and the balance is expected to be at \$250,000 afterwards.

2.3.2 City Housing Fund

In 1992 an inclusionary zoning ordinance was passed that requires a portion of affordable units be provided in all complexes with 11 or more units in both rental and ownership developments. The program was amended on January 1, 2020. For rental projects, developers must provide 15% of units to be affordable to households up to 80% AMI. In ownership developments, developers must provide 15% of the units affordable to households up to 120% AMI. Additional affordable units can be provided for bonuses and concessions. When the amount of required BMR units includes a fraction above 0.5, the requirement is rounded up, but when it is between 0.1 and 0.4, an in-lieu fee is charged. This fee has become a source of funds that may be used for housing policies and programs. This fund also contains miscellaneous housing revenues collected from subordination processing and loan payoffs from the old First Time Homebuyer program.

2.3.3 Commercial Linkage Fee (CLF)

In 2016 the City adopted a new ordinance to establish a commercial linkage fee. The fee, which is collected when a building permit for a nonresidential use is issued, is to be used for the creation and preservation of affordable housing. It is calculated by using the gross floor area of net new commercial space, excluding structured parking. The fee rates are adjusted annually using the construction cost index, but the City maintains three tiers of pricing for the fee, with retail/service at the least expensive, hotel at middle pricing, and office/research at the highest rates.

2.3.4 San Mateo County Affordable Housing Fund

The County of San Mateo administers the Affordable Housing Fund. On April 8, 2013, the San Mateo County Board of Supervisors approved the allocation of approximately \$13,400,000 of unrestricted general funds for affordable housing purposes. These funds, which initiated the County's Affordable Housing Fund (AHF), were derived from a one-time distribution of Housing Trust Funds held by former redevelopment agencies in San Mateo County. There have been eight subsequent AHF competitive funding rounds, using a combination of County general funds, Measure K funds, San Mateo County Housing Authority Moving to Work Housing Assistance Program Reserves, HOME funds, CDBG funds, and funds allocated to the County from HCD. The Kiku Crossing affordable housing project received an allocation of \$5.185M from the AHF.

2.4 Private For-Profit and Nonprofit Sources

2.4.1 Community Reinvestment Act (CRA)

Several opportunities exist for partnership with local lenders via the Community Reinvestment Act. This law requires local lenders to analyze the lending needs of the community in which they do business, particularly the needs of low and moderate-income persons, and develop programs to address those needs. To date several lenders have offered favorable terms on first mortgages for the First Time Home Buyer program which has provided tremendous support to the program. Other lenders have assisted new construction projects in the form of construction loans and permanent financing. The City considers this a beneficial resource for future partnerships as well.

2.4.2 Private Developers

In any housing project the City undertakes with private developers, the City attempts to leverage its resources as much as possible. The City attempts to provide the "gap" financing that is needed to make an affordable housing project feasible. Private developers are very interested in developing housing because of the current high demand and the City continues to work with them to find ways to include affordability within their projects. With the current demand for housing, the City sees good opportunities to work with the private sector in the area of new housing construction over the next eight years.

2.4.3 Non-Profit Agencies

There are several partnership opportunities with non-profit organizations. Foundations and lender consortiums provide means of financial assistance. Community service organizations provide housing services and manage housing programs. Non-profit developers produce new affordable units. To date, the majority of new affordable units have been sponsored by non-profit developers. This trend will most likely continue since the federal programs strongly encourage the use of non-profit agencies for housing programs.

2.4.4 Housing Endowment And Regional Trust (HEART)

The Housing Endowment And Regional Trust (HEART) of San Mateo County is a regional trust fund for affordable housing in San Mateo County. It has a revolving loan fund to provide financing for affordable housing developments usually in the form of short-term gap or predevelopment financing. HEART provided financing for Kiku Crossing in 2022.

HEART's "First Time Homebuyer" Program provides below market rate second loans as down payment assistance for persons who make up to \$180,000 per year and households that make up to \$220,000 per year. The program is also structured to eliminate private mortgage insurance which results in lowering the total monthly housing payment for homebuyers.

The City is partnering with HEART to create pre-approved designs for ADUs to allow for streamlined application processing and approval and incorporating environmentally friendly design. The goal of the initiative is to increase ease of ADU production, and therefore increase affordable housing production. Four designs have been created at different unit sizes to accommodate the size constraints of different sites – studio, 1 bedroom (square), 1 bedroom (rectangular), and 2 bedrooms.

As new federal, state and local sources of funds appear, the City will integrate them into its programs and look for new solutions to meeting the affordable housing needs. It also continues to aggressively seek other potential financing sources and partnership opportunities.

3 HOUSING-RELATED PROGRAMS

3.1 Minor Home Repair

The Minor Home Repair program provides these services free of charge to low-income homeowners. Owners are entitled to free minor exterior or interior repairs. Repairs also include accessibility modifications and simple energy efficiency improvements. The overwhelming majority of participants in this program is senior citizens. An average of 35 minor home repair projects were completed annually during the previous housing element cycle.

3.2 Home Rehabilitation

The City operates a similar, but separate program for home repairs that constitute major upgrades. The program offers assistance to low-income homeowners in the form of deferred payment loans up to a maximum of \$60,000 for home rehabilitation. The program is limited to properties that have 1-4 units. Loans are for a 20-year term with a 3% interest rate. While the program has received interest from the community, there have been no rehabilitations completed through this program as of 2022.

3.3 Lead-Based Paint Hazard Reduction

The City developed and implements lead-based paint regulations in accordance with HUD Guidelines 24 CFR Part 35 and 40 CFR Part 745 last revised 2012.

3.4 First Time Home Buyers Program

This program provides first time buyers the opportunity to purchase condominiums as they become available for resale at two City sponsored complexes, which are Meadow Court and Gateway Commons, and have 70 and 93 affordable housing units respectively. This project-based approach is also augmented by new ownership units that either the City builds, or private developers build in compliance with the City's Below Market Rate Program.

3.5 Acquisition of Land

The City is always looking for opportunities to purchase land to assist the development of housing. This includes land banking for the development of owner and rental housing, senior and family housing, transit-oriented housing, and mixed-use developments. Currently, the City owns <u>two properties within</u> downtown San Mateo, <u>one of which is</u> at the intersection of 4th Ave and Railroad Ave. The sites comprise a surface parking lot for a closed toy store, referred to as the Talbot's site. The City plans to use these site for the development of affordable housing in a public/private partnership at \$1 per year lease. <u>This site is included in the Sites Inventory as there is a proposal to develop 60 units affordable at the very-low to low-income level including family housing. Details about the site characteristics and proposal are shown on the Figure 1 map and included below in Section 4.4 as the Bespoke project.</u>

3.6 Acquisition and Rehabilitation of Existing Housing

The City also partners with nonprofit organizations to purchase and rehabilitate existing housing and make it more affordable. As funds are available, the City will consider purchasing multi-family complexes and/or single-family homes to make available for rental housing. This helps preserve the existing housing stock by ensuring adequate property management standards and adds to the City's affordable housing stock. The City typically funds these types of projects with HOME and RDA Housing Successor funds. In addition, the City will consider purchase of individual condominium units in private developments, as funds are available. These units would be included in the existing First Time Homebuyer Program and sold to moderate-income households with the same loan terms and resale price restrictions.

3.7 Community Housing Development Organizations (CHDO)

The City no longer administers its own HOME programs after entering into a consortium. However, San Mateo County will coordinate with HIP Housing Development Corp. (HHDC) or any other qualified CHDO to apply the annual increment of HOME funds that are channeled directly to CHDOs. The HOME funds will be used to assist persons who make less than 60% of the area median income.

3.8 New Construction

Although the coronavirus pandemic has had significant impact on the cost of construction, the City sees the potential for more partnership opportunities to develop new housing with both for-profit and nonprofit developers, mostly due to the wide array of financing tools currently available. Developers have become far more knowledgeable about how to apply for and combine the various government program funds and available private funding to build affordable housing.

3.9 Accessory Dwelling Units (ADUs)

The City's ADU ordinance, most recently updated in 2022, allows the construction of modest units sometimes referred to as "granny units" in residentially zoned neighborhoods. These units are relatively inexpensive to rent due to their size and are often occupied by family members as a way to live together yet maintain an element of privacy.

3.10 Special Needs Housing

The City provided extensive funds for acquisition/rehabilitation of an apartment building formerly owned by private individuals with County contracts. This project, known as the Humbolt House, operates as permanent supportive housing for individuals with mental illness. The City also provided land and subsidies to construct permanent affordable housing with 10 units set aside for households with mental health issues at risk of homelessness as referred by the County for the Delaware Pacific project. Through the PLHA program, the City provides funding for staff salaries at the Montara affordable housing project, which contains a set aside of 12 units for formerly homeless veterans. These staff will manage the client services and case management needed for the tenants. The goals for this program are to aid in building long term stability in their living situations. These subsidies are in addition to assistance being granted to the project from the U. S. Department of Veterans Affairs (VA). The City provided land and subsidies to construct permanent affordable housing with 8 units set aside for individuals with development disabilities, and 16 units set aside for formerly homeless individuals at the Kiku Crossing project, which is currently under construction.

3.11 Homeless Programs

Although the City does not directly manage any homeless prevention or assistance programs, it collaborates and financially supports a variety of programs countywide. The sources of funds for homeless programs in the City of San Mateo are CDBG, PLHA, Affordable Housing Funds, and City Housing funds. County level funding that helps to benefit San Mateo residents in need include McKinney-Vento, Homeless Prevention and Rapid Re-Housing Program (HPRP), and Section 8 programs. All homeless outreach, assistance and prevention programs are conducted by local nonprofit organizations in coordination with various local government agencies. The City works with several groups to provide emergency shelters, transitional housing and support services for the homeless as described in the 2018-23 Consolidated Plan. The City collaborates with the County of San Mateo on countywide homeless counts, which occurs every two years; and follows the County's "Continuum of Care" (CofC) program to address homeless which is described in the "Regional Collaborations" section below. In coordination with other jurisdictions in the county, the following shelter operations and expansion efforts the City supports are as follows:

3.11.1 LifeMoves Shelter Network

The City has provided operational funds in the past and may continue based on available funds through the CDBG program to support LifeMoves for shelter operations within City limits. They operate in two sites located in the City: supportive housing at the Vendome (which is not a shelter), and the First Step for Families shelter. For the Vendome, the City provided 100% of acquisition/rehabilitation costs and supports their efforts to obtain HUD funds (PUSH) for operations through the Continuum of Care process. For First Step for Families, the City provided extensive capital funding to develop the property and starting in 2020, the Community Resource Commission awarded CDBG grants for operations of the shelter. Through countywide collaboration, the City also supports the efforts of other shelters run by LifeMoves throughout San Mateo County, including the Coast House, Family Crossroads, Haven Family House, Maple Street Shelter, and Redwood Family House.

3.11.2 Safe Harbor Emergency Shelter

The City provides \$15,000 annually from City Housing for the operation of Safe Harbor, the regional emergency shelter for adult individuals located in South San Francisco and operated by Samaritan House. After the basic human needs have been met and shelter clients have been stabilized, Safe Harbor provides case management for financial counseling including job search and employment services as well as budgeting to help achieve financial self-sufficiency. The program also provides housing search assistance, including assistance to find subsidized housing when possible. One example is access to the San Mateo County Housing Readiness Voucher program which includes 3 years of continuous case management and rental housing vouchers. Safe Harbor's overall goal is to ensure stabilized housing for three years.

3.11.3 Stone Villa Inn

Through the Homekey program, San Mateo County plans to perform a conversion of the hotel Stone Villa Inn into an emergency shelter, which will be located within the City. The hotel currently contains 44 guestrooms, which could be converted into use for individual shelter rooms. Additionally, the City will support these efforts as a part of the CofC and extend its network of homeless services to the future clients of the shelter.

3.12 Regional Collaborations

City staff members are active members of the following regional collaboratives to address a wide variety of issues associated with homelessness and homeless prevention.

3.12.1 Inter-Agency Council (IAC)

The IAC is a countywide consortium of housing stakeholders to develop and support the San Mateo County HOPE: 10-year Plan to End Homelessness. This plan focusses on the provision of new affordable housing opportunities rather than development of new shelters.

3.12.2 Continuum of Care

The Continuum of Care committee for San Mateo County implements its plan to serve homeless persons and families. Through this collaboration of service providers and local government agencies, efforts are coordinated for outreach, needs assessment, provision of services for the homeless. The consortium also determines the priorities and allocation of Countywide Emergency Shelter Grant funds. In 2016, the CofC released its current Strategic Plan titled "Ending Homelessness in San Mateo County". From this plan, the Coordinated Entry System (CES) was created. It is a centralized system pulls together the service providers across the county to ensure that resources are available to all clients regardless of which jurisdiction an individual enters the system from.

3.12.3 HIP Housing Self Sufficiency Program

Staff serves on the selections committee for entry into this program that provides support services and rent assistance for a one-to-two-year term for candidates with educational and/or vocational training plans to find employment at a level to reduce the need for government assistance payments. The program provides deep supportive services to the clients to move toward self-sufficiency within a 2-year time period.

3.13 Chronic Homelessness

The Housing Outreach Team (HOT) is a multi-disciplinary team, including City staff, formed through the HOPE initiative that addresses chronic homelessness by outreach and engagement. This program helps to provide housing and bring medical, mental health and substance abuse support services to those who might not otherwise seek such services. The outreach and case management of this team supports the residents of The Vendome, a permanent supportive housing SRO in Downtown San Mateo. The Vendome was acquired and renovated by the City with various housing financial resources in 2009. The Vendome will continue to serve HOT identified clients and other very low-income residents this program year.

3.14 Homeless Prevention

As detailed under the sections below, the City will provide assistance grants to help prevent further homelessness. In addition to the programs identified below, Samaritan House, as well as other local agencies, provides services for the extremely low- income residents that include homeless prevention such as Rapid Rehousing, and emergency housing vouchers. However, these other programs are funded by other jurisdictions in the County.

3.14.1 Legal Aid Society, HomeSavers Program

Legal Aid assists tenant litigants with unlawful detainers and related matters to help people stay in their homes across the Bay Area region. They conduct weekly clinics at community centers and at the County Court House advising and representing applicants as necessary in court proceedings. Their goal is to keep people in their homes and prevent homelessness through their advocacy. The City traditionally funds them annually through the CDBG program. They negotiate with landlords on tenant's behalf regarding other issues that threaten their ability to live in safe, decent, affordable housing. Their goal is to counsel 480 individuals in 160 households.

3.14.2 LifeMoves, Rapid Rehousing Program

LifeMoves operates the City's Rapid Rehousing program for individuals and families at great risk of experiencing homelessness. Clients are given direct financial assistance to resolve debt related to housing expenses as well as case management to connect them to resources to stabilize their finances and overall wellbeing. The program is funded through PLHA as has the goal of serving 5 individuals and 5 families during its first year of operations. This goal is expected to increase in later years with increased funding.

3.15 Discharge Policy

The City does not directly fund any institutions requiring discharge. These policies are requirements of health institutions to discharge patients experiencing homelessness to a safe and appropriate location, offer meals and weather-appropriate clothing, distribution of needed medicines, and providing the necessary transportation. These institutions are within the jurisdiction of the County of San Mateo. Discharge policies are a component of the County's HOPE 10-Year Plan to End Homelessness.

4 SITES INVENTORY

Government Code Section 65583(a)(3) requires local governments to prepare an inventory of land suitable for residential development, including vacant sites and sites having the potential for redevelopment, and an analysis of the relationship of zoning and public facilities and services to these sites. The inventory of land suitable for residential development shall be used to identify sites that can be developed for housing within the planning period (Section 65583.2). To create this list, City staff undertook an extensive process to review the feasibility of housing development for every site located within the key study areas that had <u>been identified by</u> the community while weighing in the expertise of staff, consultants, and developers. The draft sites list was posted to the city website in December 2021 for public comment where staff received many comments and updated the inventory as appropriate.

In 2019, City staff began a series of citizen outreach workshops where the community was asked to select target areas where they believed future housing development would be most suitable. From this process, the City was able to identify ten study areas for the 6th Housing Element Cycle's sites inventory. Then, trends were analyzed from the previous 5 years to see what the expected densities of potential redevelopment would be when weighed against the existing site constraints such as zoning, size, and neighborhood trends. Staff was able to use this process to calculate the realistic redevelopment capacity of these sites. Within these study areas, there are currently enough sites zoned to accommodate 9,934 new housing units in the City of San Mateo. The affordability breakdown of these sites is 1,894 Very Low-Income units, 1,317 Moderate-Income units, and 5,350 Above Moderate-Income units. The sites for affordable developments were spread throughout the City to avoid adding to any Racially/Ethnically Concentrated Areas of Poverty (RECAP).

4.1 On-Site Constraints Analysis

The City of San Mateo is a fully urbanized municipality serviced by PG&E, CAL Water, Estero Water District, and its own wastewater treatment plant for sewage. All sites on the inventory have access to electric, natural gas, water, sewage, road access, and other infrastructure needs for housing redevelopment. To start service at any site would not prove infeasible for installation and standard connections to the existing systems and does not present a constraint.

Air quality and noise has been acknowledged as potential environmental constraints on fifty-five identified sites due to proximity to highways and railways. However, air quality may be addressed through incorporation of mechanical filtration systems that can adequately filter air particulates for housing projects. Noise impacts can also be mitigated through enhanced construction materials such as double or triple paned windows and sound attenuating insulation. During project review, individual projects near highways and railways are evaluated with project specific technical analysis to analyze these constraints and provide appropriate mitigation measures.

Twenty-one sites in the inventory have been identified to lie within the flood zone or adjacent to creeks. The City requires that new housing development within the 100-year flood plain raise the lowest living level above base flood elevation to avoid the risks of flash flooding. Sites that contain creeks require construction to be restricted behind creek setbacks, which prohibit development within 30 feet of the center line of any creek or 20 feet of the top of a bank. The sites identified that are adjacent to creeks have existing structures outside these setbacks that can be repurposed or redeveloped within similar building footprints. Neither constraint would limit the ability of the sites to produce new housing. In the previous Housing Element Cycle, the City approved several housing projects that included lot consolidation including: The Lark, Grand Blvd Townhomes, Hacienda Mateo, 737 2nd Ave, Block 20, Nazareth Vista, Concar Passage, Hillsdale Terraces, Santa Inez Condos, and Kiku Crossing. The City has displayed a track record of approving projects that include lot consolidation. Additionally, the City's zoning code encourages lot consolidation through higher allowable densities for larger lots. Lot consolidation can be expected to continue for new housing projects throughout the next Housing Element Cycle.

4.2 Non-Vacant Site Redevelopment Analysis

The City is relying on several non-vacant sites with very high redevelopment potential for purposes of meeting its RHNA allocation. The use of these non-vacant sites is justified as can be demonstrated by a significant number of recent projects at similar sites as the development stock in the City matures; as well as several in-progress development applications as demonstrated in sections 4.3 and 4.4 below. In the previous Housing Element Cycle, the City received four projects for missing middle housing that were previously on single family home sites. These sites have been identified as: Grand Boulevard Townhomes, Hacienda Mateo, 737 2nd Ave, and the Gum Street Duplexes in Section 4.3 below. The City was able to approve these projects without rezoning and produced a total of 19 additional units. This trend is expected to continue, with an application submitted for a similar project at 4 Santa Inez, which will result in a net increase of 8 units. This demonstrates that the City's existing zoning allows for a range of housing types and sizes.

The City currently has two in-progress developments for multifamily housing that contain parcels that were previously single-family homes. The projects have been identified as Fremont Terrace and Block 20 in Section 4.4 below. Together, they will create 98 new housing units, with 11 affordable units. These projects demonstrate that with the right location, low-density housing can be redeveloped under the City's existing zoning to generate additional units that include affordable units under the City's Below Market Rate Ordinance. As the City undergoes the General Plan update, similar sites will be identified, which will continue the trend of creating new areas of appropriate housing density.

The majority of sites are nonvacant, with nonvacant sites accommodating more than 50% of the lower income units. However, this will not be an impediment to development as the type of sites used for the inventory are consistent with those that have been redeveloped into housing projects in <u>the last Housing Element Cycle</u>. The City has received several applications for projects that involved redeveloping underutilized low-density commercial property into either full housing or mixed-use housing projects. Nine key projects that fit this description are: Concar Passage, Azara, <u>The Lark (Park 20)</u>, Hillsdale Inn, Nazareth Plaza, Trag's Market (303 Baldwin), <u>Hillsdale Terraces, Peninsula Heights,</u> and 1919 O'Farrell. Combined, they will produce a total of 1,902 new housing units, with 172 affordable units. This trend can be expected to continue, with owner interest in redevelopment being expressed for many of the sites identified in the sites inventory table, such as the Hillsdale Mall, Peninsula Heights, Marriot Residence Inn, The Fish Market, Bayshore Commons, <u>Borel Square Shopping Center, Ah Sam Floral Co, The Atrium,</u> and the Olympic (Mollie Stone's) Shopping Center. <u>Rather than the existing uses discontinuing from lack of interest, market trends reveal that developers have bought out long term businesses to allow redevelopment into housing.</u> Furthermore, these sites do not require rezoning, as residential development is an allowed use on the commercial sites included in the inventory.

 3.95 acres

 039-030-400
 1.52 acres

Site Ownership: Consolidated

Max Allowable Base Density: 50 units/acre (or 197 units) Approved Density: 50 units/acre State Density Bonus: Project did not utilize density bonus.

Status: Built and Occupied in 2015 Net Increase in Units: 197

Site Conditions Prior to Redevelopment:

The site was previously a one-story office building, originally constructed in the 1960s, with a surface parking lot. For many years, it was a USPS Data Center.

Development:

The project is a four-story, 197-unit apartment building. Planning entitlements for the development were approved in 2011, a building permit for construction was issued in 2012, and the project was constructed and occupied in 2015. The 197-unit development includes 80 studios, 83 one-bedrooms, and 34 two-bedroom units, 20 of which are deed restricted affordable housing units at the very low-income level or 50% of AMI.

Site Constraints:

The site is adjacent to Highway 92, which has potential air quality impacts on residential uses that can be mitigated through development design. The developer installed an air filtration system to mechanically ventilate the building and provide a 65% reduction in concentrations of particulates.

Proximity to Transit:

Located 0.6 miles from Hayward Park Caltrain and 0.2 miles of S El Camino Real.

Address: 318-322 Grand Boulevard Zoning: Medium Density Multi-Family (R3) General Plan Designation: Medium Density Multi-Family

 0.19 acres
 0.11 acres

Max Allowable Base Density: 35 units/acre (or 11 units) Approved Density: 25 units/acre State Bonus Density: Project did not utilize density bonus

Status: Built and Occupied in 2018 Net Increase in Units: 3

Site Conditions Prior to Redevelopment:

These parcels were previously occupied by residential buildings constructed in the 1910s and 1930s. All three of these buildings were single family homes until the 1950s, when the largest of the three was converted into a duplex. It was further subdivided in 1960 to become a triplex. In total, there were 5 units on this consolidated site when the redevelopment was proposed.

Development:

The existing structures were demolished to construct 8 detached townhouse units, for a net increase of three units, totaling approximately 12,568 square feet of floor area. Planning entitlements for the project were approved in September 2007. Due to the economic conditions and real estate conditions at the time, the project was soon put on hold. A building permit for construction was issued in 2017. The project was completed in 2018.

This development is a local example of a missing middle-housing project.

Site Constraints

None.

It should be noted that while the lot size is less than 0.5 acres, this site is underutilized with capacity for additional density. While this developer did not choose to maximize density or utilize the state density bonus, other developers of similarly sized properties may choose to utilize the state density bonus to add units above the City's base density.

Proximity to Transit:

Located within 0.8 miles of San Mateo Caltrain Station and 0.8 miles to S El Camino Real.

 0.67 acres

Site Ownership: Consolidated

Max Allowable Base Density: 50 units/acre (or 34 units) Approved Density: 73 units/acre State Density Bonus: Applied (13 additional units)(or 38% density bonus)

Status:

Entitlement Approval – October 2021 Building Permit Approval – Awaiting application submission Construction – TBA

Proposed Net Increase in Units: 49

Site Conditions Prior to Redevelopment:

Medical offices with surface parking currently occupy the site.

Proposed Development:

The applicant proposes to demolish the existing structure to construct a four-story, 49-unit multifamily apartment community with underground parking. Four of those units will be dedicated to very lowincome households or 50% AMI. In 2021, the Planning Commission approved the required entitlements which include the Site Plan and Architectural Review (SPAR) for construction of a multi-family building and a Site Development Planning Application for tree removal.

The project's allowable density allows for 36 base units, and with the state density bonus, an additional 13 units (35% of the base density) is added to the project. The project is also granted a reduced parking ratio of 0.5 spaces/unit due to being within ½ miles of public transit. However, the applicant is voluntarily providing 30 additional spaces for a total of 64 parking spaces

Site Constraints:

The site is adjacent to Highway 92, which has potential air quality impacts on residential uses that can be mitigated through development design.

Proximity to Transit:

Located 0.9 miles from Hayward Park Caltrain Station and 0.4 miles away from South El Camino Real.

Site Ownership: Consolidated

Max Allowable Base Density: 50 units/acre (or 50 units) Approved Density: 68 units/acre State Bonus Density: Applied (18 additional units)(or 35% density bonus)

Status:

Entitlement Approval – February 2017 Extension Approval – February 2021 Extension Request – Currently Under Review

Proposed Net Increase in Units: 68

Site Conditions Prior to Redevelopment:

The site consists of an auto sale business occupying two stand-alone commercial buildings built in the 1950s and 1960s. Major portions of these parcels are dedicated to surface parking such that the existing FAR is less than 0.2, though zoning policies in this district allow for a FAR of 1.00 for commercial development and up to 2.00 for residential development. The remaining lot area is vacant.

Proposed Development:

In 2017, the City Council approved the proposed five-story, mixed-use development. The project provides 68 units of housing in the form of condominiums, 6 of which are designated as very low-income units. The applicant requested a state density bonus (maximum 35% at the time of application) to achieve this unit count. The developer is further providing 15,881 square feet of commercial space on the ground floor intended to serve the surrounding residential community. The condominiums will be located on the four upper floors and consist of 17 one-bedroom, 37 two-bedroom, and 14 three-bedroom units.

In September 2022, the developer filed an application for a two-year extension. They have also expressed interest in increasing the overall residential unit count through an increase in state density bonus from 35% up to the current maximum 50% within the same building envelop.

Site Constraints:

One constraint to residential development was identified through the entitlement process. A former gas station on this site requires additional clean up.

Proximity to Transit:

Located on El Camino Real, within a half mile of the Hillsdale Caltrain Station.

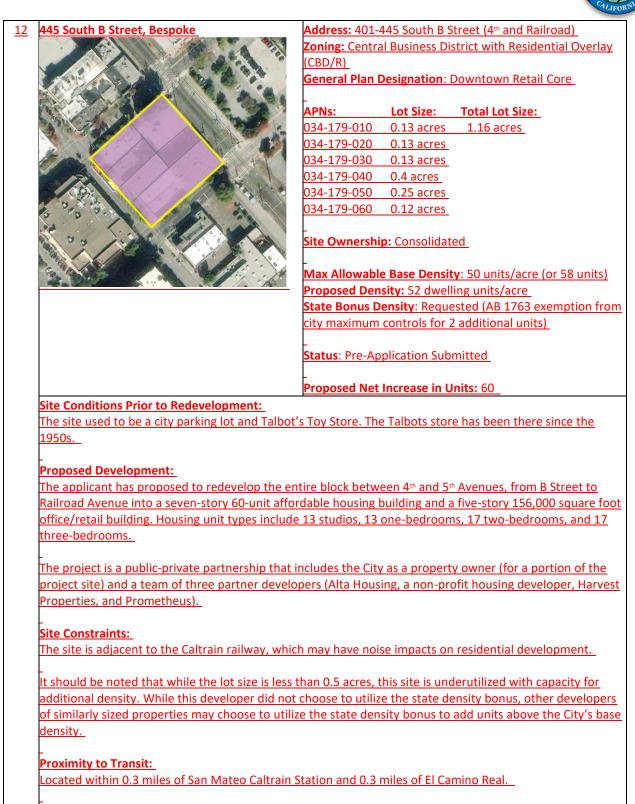

Project Website: Hillsdale Terraces

These buildings were part of Peninsula Office Park, constructed in the 1970s. **Proposed Development:** In 2020, the Planning Commission approved the proposed 290-unit residential development project. The site encompasses a total area of 15.45 acres and will devote 10% of its units to the low-income category pursuant to the inclusionary ordinance. Unit types include townhomes and single-detached and stacked <u>flats.</u> The project received the requisite planning entitlements in 2020. Building permits for site preparation on the southern portion of the site were issued in 2022, and construction has begun. Site Constraints: The parcels of this site require consolidation. Additionally, developmental design had to consider the site's natural slope. **Proximity to Transit:** Within a half-mile of SamTrans bus stop. **Project Website:** Peninsula Heights

11 4 West Santa Inez Condos Address: 4 W Santa Inez Avenue **Zoning:** High Density Multi-Family (R4) **General Plan Designation**: High Density Multi-Family APNs: Lot Size: Total Lot Size: 032-075-010 0.13 acres 0.25 acres 032-075-100 0.12 acres Site Ownership: Consolidated Max Allowable Base Density: 40 units/acre (or 10 units) **Approved Density:** 40 units/acre **State Bonus Density**: Project did not utilize density bonus Status: Entitlement Approval – February 2022 Building Permit Submitted – August 2022 Construction – TBA Net Increase in Units: 8 **Site Conditions Prior to Redevelopment:** The site parcels used to be occupied by 2 single family homes constructed around 1919. The house on the corner of W Santa Inez Ave and N El Camino Real was converted in the 1980s for use as a Residential Care Home with capacity for the 12 residents aged 18 or older. That use was discontinued many years before the current project was proposed. **Proposed Development:** The applicant proposed a four-story, 10-unit condominium on the two parcels, which will be merged into one. Planning entitlements for the project were approved in 2022 by the San Mateo City Council after initial denial in 2018. Building permits were submitted in August of 2022 and are currently awaiting approval. This development is a local example of a missing middle-housing project. Site Constraints: None. It should be noted that while the lot size is less than 0.5 acres, this site is underutilized with capacity for additional density. While this developer did not choose to utilize the state density bonus, other developers of similarly sized properties may choose to utilize the state density bonus to add units above the City's base density. **Proximity to Transit:** Located within 0.7 miles of the San Mateo Caltrain Station and within a half mile of El Camino Real. **Project Website:** 4 W Santa Inez Condos

4.5 Redevelopment Opportunity Sites

Site Constraints:

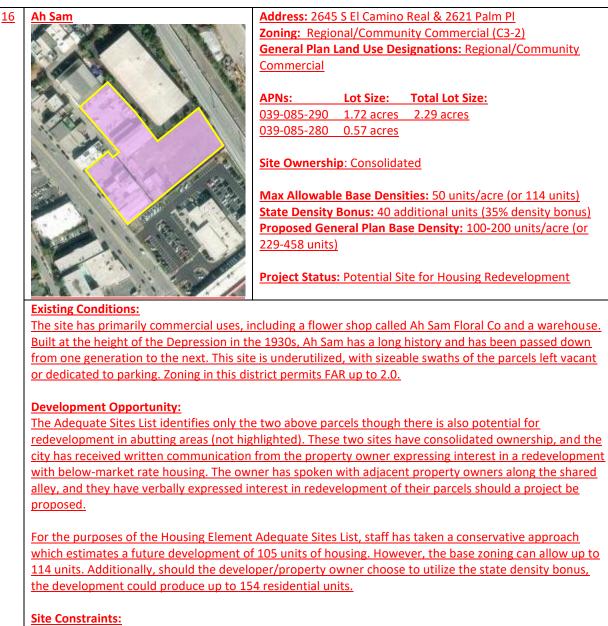

Staff has found one constraint to future redevelopment. Laurel Creek passes through some of the parcels south of W. Hillsdale Boulevard. The required creek setbacks impact total buildable area and therefore the number of units that can be constructed. Smaller sites to the southern edge of the area along El Camino require ownership consolidation.

Proximity to Transit:

Located within half-mile of Hillsdale Caltrain Station and El Camino Real

	Altrop S
15 Borel Square Shopping Center	Address: 71-77 Bovet Road

	039-011-500 0.15 acres
	039-011-510 7.74 acres
	Site Ownership: Consolidated
	Max Allowable Base Densities: 35 units/acre (or 346 units)
	State Density Bonus: 173 additional units (50% density bonus)
	Proposed General Plan Base Density: 100-200 units/acre (or
	<u>987-1,974 units)</u>
	Project Status: Potential Site for Mixed-Use Redevelopment
Existing Conditions:	
The Borel Square Shopping Center was I	puilt in 1967. The site is currently occupied by a CVS drug store,
24-Hour Fitness, the UPS store, Patel Co	Credit Union, Borel Eye Doctors, Windy City Chicago Pizza, and
Jack's (a restaurant). Approximately hal	the site is dedicated parking for the shopping center.
Development Opportunity:	
	nter has expressed interest through a written letter in a mixed-
	Housing Element Adequate Sites List purposes, a conservative
	uture development of 243 units of housing. However, the base
	onally, should the developer/property owner choose to utilize the
	ould produce up to 519 residential units.
Site Constraints:	
	that it is adjacent to Highway 92, which has potential noise and
	be mitigated through development design.
Proximity to Transit:	
	k Caltrain and 0.4 miles of El Camino Real
Located within 0.7 miles of mayward Pal	

The site is adjacent to the Caltrain railway, which may have noise impacts on residential development.

Proximity to Transit:

Located on El Camino Real and within half mile (0.3 miles) of Hillsdale Caltrain Station.

Address: 1900 S Norfolk Street Zoning: Executive Office District (E1-0.5) General Plan Land Use Designations: Executive Office

Site Ownership: Consolidated

Max Allowable Base Densities: 35 units/acre (or 411 units) State Density Bonus: 144 additional units (35% density bonus) Proposed General Plan Base Density: 40-99 units/acre (or 471-1,165 units)

Project Status: Potential Site for Mixed-Use Redevelopment

Existing Conditions:

The Atrium

<u>17</u>

Built in 1983, the Atrium is a three-story office building centered around an open-air courtyard. It is occupied by a variety of tenants, including Movoto Real Estate, Tile Inc, Home Helpers Home Care of San Mateo, Payne Financial Consulting, and several law offices. Surface parking lots surround the building.

Development Opportunity:

The owner has expressed interest in redeveloping the parcel via written communication. For the purpose of the Housing Element Adequate Sites List, a conservative approach was adopted which estimates a future development of 245 units of housing. However, the base zoning can allow up to 411 units. Additionally, should the developer/property owner choose to utilize the state density bonus, the development could produce up to 555 residential units.

Site Constraints:

The site is adjacent to Highway 92, which has potential air quality impacts on residential uses that can be mitigated through development design. Borel Creek runs along the southeastern edge of the site, where any potential development must account for required creek setbacks.

Proximity to Transit:

Located 1.4 miles away from Hayward Park Caltrain Station and 1.6 miles of South El Camino Real.

Address: 1670-1700 Amphlett Boulevard Zoning: Executive Office District (E2-1) General Plan Land Use Designation: Executive Office

 4.61 acres

Site Ownership: Consolidated

Max Allowable Density: 50 units/acres (or 723 units) State Density Bonus: 253 additional units (35% density bonus) Proposed General Plan Base Density: 100-200 units/acres (or 1,446-2,892 units)

Project Status: Potential Site for Mixed-Use Redevelopment

Existing Conditions:

The site is currently developed as an office park, consisting of 8 low-rise buildings with approximately 340,000 square feet of commercial office space. The site is surrounded by U.S. 101 to the east, San Mateo Marriott to the south, and residential development to the north and west. Many of these buildings were built between the 1970s and 1980s. The current FAR is 0.23, but the site allows a FAR of up to 1.0.

Development Opportunity:

Owners of the property have expressed interest in redevelopment via written communication. Each parcel is larger than 0.5 acres which allows developers the opportunity to build large multifamily developments. For the purposes of the Housing Element Adequate Sites List, an estimate for future development with 722 units of housing was used, which is close to the 723 units allowed by the site's base zoning. Should the developer/property owner choose to utilize the state density bonus, the development could produce up to 976 residential units.

Site Constraints:

The site is adjacent to Highway 101, which has potential air quality impacts on residential uses that can be mitigated through development design. Leslie Creek runs along the northwestern boundary of the site, and any potential development must include required creek setbacks.

Proximity to Transit:

Within one mile of Hayward Park Caltrain Station and 1.3 miles from South El Camino Real.

Address: 1500 Fashion Island Boulevard Zoning: Executive Office with Residential Overlay (E1-0.62/R) General Plan Designations: Executive Office

 APN:
 Total Lot Size:

 035-550-040
 6.08 acres

Site Ownership: Consolidated

Max Allowable Base Densities: 50 units/acre (or 304 units) State Density Bonus: 106 additional units (35% density bonus) Proposed General Plan Base Density: 100-200 units/acre (or 608-1,216 units)

Project Status: Potential Site for Housing Redevelopment

Existing Conditions:

Currently the site consists of two 3-story office buildings occupied by an employment agency, a consulting group, Reflekton Inc, Checkbook, and Wuhoover & Co. The buildings were built in 1982. Surface parking lots take up available space on the site such that the current FAR is 0.49, though zoning in this district allows up to 0.62 FAR.

Development Opportunity:

A developer has expressed interest in potentially redeveloping the site. For Housing Element Adequate Sites List purposes, a conservative approach was taken which estimates a future development with 273 units of housing. However, the base zoning can allow up to 304 units. Additionally, should the developer/property owner choose to utilize the state density bonus, the development could produce up to 410 residential units.

Site Constraints:

Staff has identified one potential constraint in that it is located adjacent to Highway 92, which has potential air quality impacts due to airborne particulates. These impacts can be mitigated through development design.

Proximity to Transit:

Located 1.5 miles of the Hayward Park Caltrain Station and 1.9 miles from South El Camino Real.

Address: 2000 Winward Way Zoning: Regional/Community Commercial (C2-0.62) General Plan Land Use Designation: Regional/Community Corridor

 APNs:
 Total Lot Size:

 035-610-030
 4.27 acres

Site Ownership: Consolidated

Max Allowable Base Density: 50 units/acre (or 213 units) State Density Bonus: 75 additional units (35% density bonus) Proposed General Plan Base Density: 100-200 units/acre (or 427-854 units)

Project Status: Potential Site for Housing Development

Existing Conditions:

This parcel is the location of the Marriott Residence Inn, constructed in 1984. The current FAR is 0.58, but the project site allows for an FAR up to 0.62 suggesting that greater building intensity and residential density could be achieved in a potential redevelopment project.

Development Opportunity:

Current owners of the site have expressed interest in potentially redeveloping their property for residential use. For the purposes of the Housing Element Adequate Sites List, a conservative approach was adopted which estimates a future development of 160 residential units. However, the base zoning can allow up to 213 units. Should the developer/property owner choose to utilize a state density bonus, the development could produce up to 288 units of housing.

Site Constraints:

<u>Staff has identified one potential constraint in that it is located adjacent to Highway 92, which has potential air quality impacts due to airborne particulates. These impacts can be mitigated through development design.</u>

Proximity to Transit:

Located 1.8 miles of the Hayward Park Caltrain Station 2.2 miles from South El Camino Real.

Site Constraints:

One constraint was found in that the parcels are non-continuous. Several smaller sites along El Camino Real and 43rd Avenue need consolidation.

Proximity to Transit:

Located within half mile of El Camino Real.

Bridgepointe Shopping Center Address: 2200-3012 Bridgepointe Parkway 23 **Zoning:** Regional/Community Commercial with Residential Overlay (C2-0.62/R) **General Plan Designations:** Regional/Community Commercial/High Density Multi-Family APNs: Lot Size: Total Lot Size: 035-466-070 3.22 acres 22.39 acres 035-466-080 1.39 acres 035-466-090 2.75 acres 035-466-100 12.07 acres 035-466-110 2.96 acres Site Ownership: Consolidated Max Allowable Base Densities: 50 units/acre (or 1,119 units) **State Density Bonus:** 391 additional units (35% density bonus) Proposed General Plan Base Density: 100-200 units/acre (or 2,405 - 4,810 units) Project Status: Potential Site for Mixed-Use Redevelopment **Existing Conditions:** Currently the site is occupied by a shopping center that includes several businesses, including several restaurants, an ice rink, and a collection of big box stores and national chains. A large surface parking lot takes up the remaining space on the site. The structures were built around the 1990s. The site is underutilized, and many of the commercial spaces are vacant. In addition, with a lot size of 22 acres of flat land (over half of which is the parking lot), the site has great potential for redevelopment. **Development Opportunity:** For Housing Element Adequate Sites List purposes, a conservative approach was adopted which estimates potential mixed-use development of 672 housing units (30 units/acre). However, the base zoning can allow up to 1,119 units (50 units/acre). Additionally, should the developer/property owner choose to utilize the state density bonus, the development could result in a maximum of 1,510 residential units. This estimate does not include the ice rink and Target sites. Site Constraints: One smaller parcel in the northern corner needs consolidation. Another possible constraint would the site's location along Highway 92, which has potential air quality impacts due to airborne particulates. These impacts can be mitigated through development design. **Proximity to Transit:** Located 2 miles away from Hayward Park Caltrain station and 2.2 miles from South El Camino Real.

Proximity to Transit: Located 1.2 miles away from Hayward Park Caltrain Station and 1.6 miles from South El Camino Real.

25	Borel Place	Address: 1650 Borel Place			
		Zoning: Executive Office (E1-2)			
		General Plan Designations: Executive Office			
		APNs: Total Lot Size:			
		039-011-400 2.51 acres			
		Site Ownership: Consolidated			
		Max Allowable Base Densities: 35 units/acre (or 88 units)			
	Carlos and	State Density Bonus: 30 additional units (35% density bonus)			
		Proposed General Plan Base Density: 100-200 units/acre (or 251-			
		502 units)			
		Project Status: Potential Site for Housing Redevelopment			
	And the second second				
	Existing Conditions:				
	nis site is underutilized; it consists of one office building constructed in the late 1960s and a surface				
	parking lot. A redevelopment could ach	king lot. A redevelopment could achieve a building intensity of 2.00 FAR.			
	Development Opportunity:				
	For Housing Element Adequate Sites List purposes, a conservative approach was adopted which estimates				
	development of 74 housing units. However, the base zoning could allow up to 88 units. Additionally,				
	should the developer/property owner choose to utilize the state density bonus, the development could				
	produce up to 118 residential units.				
	Site Constraints:				
	Staff has found a potential constraint in that it is adjacent to Highway 92, which has potential air quality				
	impacts. However, these can be mitigated through development design				
	Proximity to Transit:				

Located within 0.7 miles of the Hayward Park Caltrain Station and 0.4 miles of South El Camino Real.

Gas Station

26

Address: 350 N San Mateo Dr and 220 E Poplar Ave Zoning: Regional/Community Commercial (C2-1) General Plan Designations: Regional/Community Commercial

 APNs:
 Lot Size:
 Total Lot Size:

 032-182-120
 0.18 acres
 0.62 acres

 032-182-130
 0.44 acres

Site Ownership: Consolidated

Max Allowable Base Densities: 35 units/acre (or 21 units) State Density Bonus: 7 additional units (35% density bonus) Proposed General Plan Base Density: 40-99 units/acre (or 17-42 units)

Project Status: Potential Site for Housing Redevelopment

Existing Conditions:

The parcel on the corner of N San Mateo Drive and E Poplar used to be a gas station. It dates to the 1980s and now sits vacant and fenced off. The second parcel contains commercial buildings occupied by a liquor store and a salon, which is temporarily closed. Both parcels have significant areas that are set aside for automobile use and are therefore underdeveloped. This site's underlying zoning district allows for a FAR of 1.00.

Development Opportunity:

For purposes of the Housing Element Adequate Sites List, a conservative approach was taken which estimates development of 19 housing units. However, base zoning could allow up to 21 units. Additionally, should the developer/property owner choose to utilize the state density bonus, the development could produce up to 28 residential units.

Site Constraints:

Clean up may be required due to the site's former uses.

It should be noted that while the lot size is less than 0.5 acres, this site is underutilized with capacity for additional density. Redevelopment projects of similar size have been successfully approved. For example, the Fremont Terrace project is a 15-unit residential condominium on a site of the same size that is currently under construction at 200 S Fremont St, which is shown as Site 1 in Figure 3.

Proximity to Transit:

Located within 0.6 miles of the San Mateo Caltrain Station and 0.6 miles of El Camino Real.

1 WHAT IS AFFIRMATIVELY FURTHERING FAIR HOUSING?

The State of California's 2018 Assembly Bill (AB 686) requires that all public agencies in the state affirmatively further fair housing (AFFH) beginning January 1, 2019. Public agencies receiving funding from the U.S. Department of Housing and Urban Development (HUD) are also required to demonstrate their commitment to AFFH. The federal obligation stems from the fair housing component of the federal Civil Rights Act mandating federal fund recipients to take "meaningful actions" to address segregation and related barriers to fair housing choice.

AB 686 requires all public agencies to "administer programs and activities relating to housing and community development in a manner that affirmatively furthers fair housing, and take no action inconsistent with this obligation"¹

AB 686 also makes changes to Housing Element Law to incorporate requirements to AFFH as part of the housing element and general plan to include an analysis of fair housing outreach and capacity, integration and segregation, access to opportunity, disparate housing needs, and current fair housing practices.

Affirmatively Furthering Fair Housing

"Affirmatively furthering fair housing" means taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics. Specifically, affirmatively furthering fair housing means taking meaningful actions that, taken together, address significant disparities in housing needs and in access to opportunity, replacing segregated living patterns with truly integrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty into areas of opportunity, and fostering and maintaining compliance with civil rights and fair housing laws. The duty to affirmatively further fair housing extends to all of a public agency's activities and programs relating to housing and community development. (Gov. Code, § 8899.50, subd. (a)(1).)"

2 HISTORY OF SEGREGATION IN THE REGION

The United States' oldest cities have a history of mandating segregated living patterns—and Northern California cities are no exception. ABAG, in its recent Fair Housing Equity Assessment, attributes segregation in the Bay Area to historically discriminatory practices—highlighting redlining and discriminatory mortgage approvals—as well as "structural inequities" in society, and "self-segregation" (i.e., preferences to live near similar people).

Researcher Richard Rothstein's 2017 book *The Color of Law: A Forgotten History of How Our Government Segregated America* chronicles how the public sector contributed to the segregation that exists today. Rothstein highlights several significant developments in the Bay Area region that played a large role in where the region's non-White residents settled.

Pre-civil rights San Mateo County faced resistance to racial integration, yet it was reportedly less direct than in some Northern California communities, taking the form of "blockbusting" and "steering" or intervention by public officials. These local discriminatory practices were This history of segregation in the region is important not only to residential understand how settlement patterns came about-but, more importantly, to explain differences in housing opportunity among residents today. In sum, not all residents had the ability to build housing wealth or achieve economic opportunity. This historically unequal playing field in part determines why residents have different housing needs today.

exacerbated by actions of the Federal Housing Administration which excluded low-income neighborhoods, where the majority of people of color lived, from its mortgage loan program.

According to the San Mateo County Historical Association. San Mateo County's early African Americans worked in a variety of industries, from logging, to agriculture, to restaurants and entertainment. Expansion of jobs, particularly related to shipbuilding during and after World War II attracted many new residents into the Peninsula, including the first sizable migration of African Americans. Enforcement of racial covenants after the war forced the migration of the county's African Americans into neighborhoods where they were allowed to occupy housing—housing segregated into less desirable areas, next to highways, and concentrated in public housing and urban renewal developments.

The private sector contributed to segregation through activities that discouraged (blockbusting) or prohibited (restrictive covenants) integrated neighborhoods. In the City of San Mateo, David Bohannon, developer of the Hillsdale neighborhood following World War II, when housing was in short supply, –recorded deeds that specified that only "members of the Caucasian or White race shall be permitted" to occupy sold homes—the exception being "domestics in the employ[ment] on the premises."² This practice was the norm at the time, since the federal government refused to insure large-scale single-family developments -throughout the country, unless they specifically prohibited non-Whites from purchasing the new single-family homes. Henry Doelger in Daly City, as well as Bohannon in San Mateo, both developed large tracts of single-family homes with racially-based restrictive covenants. City staff has uncovered restrictive covenants still extant on properties being provided rehabilitation assistance, even though such covenants have long been unenforceable. From Hillsdale Boulevard to about 20th Avenue, between Alameda de las Pulgas and El Camino Real, single-family homes in the area almost exclusively had restrictive covenants. Bohannon went on to develop many race-restricted neighborhoods in the Bay Area, became president of the National Association of Home Builders (NAHB), became national

president of the Urban Land Institute (ULI), and was inducted into California's Homebuilding Foundation Hall of Fame.

The segregator effect of blockbusting activities is well-documented in East Palo Alto. In 1954, after a White family in East Palo Alto sold their home to an African American family, the then-president of the California Real Estate Association set up an office in East Palo Alto to scare White families into selling their homes ("for fear of declining property values") to agents and speculators. These agents then sold these homes at over-inflated prices to African American buyers, some of whom had trouble making their payments. Within six years, East Palo Alto—initially established with "whites only" neighborhoods—became 82% African American. The FHA prevented re-integration by refusing to insure mortgages held by White buyers residing in East Palo Alto.

Throughout the county, neighborhood associations and City leaders attempted to thwart integration of communities. Although some neighborhood residents supported integration, most did not, and it was not unusual for neighborhood associations to require acceptance of all new buyers. Builders with intentions to develop for all types of buyers (regardless of race) found that their development sites were rezoned by planning councils, required very large minimum lot sizes, and\or were denied public infrastructure to support their developments or charged prohibitively high amounts for infrastructure.

In addition to historical discriminatory practices that embedded segregation into living patterns throughout the Bay Area, it's also necessary to recognize the historical impacts of colonization and genocide on Indigenous populations and how the effects of those atrocities are still being felt today. The original inhabitants of present-day San Mateo County are the Ramaytush Ohlone, who have "…lived on the San Francisco Peninsula for thousands of years and continue to live here as respectful stewards of the land."² However, "[d]ue to the devastating policies and practices of a succession of explorers, missionaries, settlers, and various levels of government over the centuries since European expansion, the Ramaytush Ohlone lost the vast majority of their population as well as their land."³ The lasting influence of these policies and practices have contributed directly to the disparate housing and economic outcomes collectively experienced by Native populations today.⁴

The timeline of major federal Acts and court decisions related to fair housing choice and zoning and land use appeared to be on the same page as these discriminatory practices for most of the 20th century. As shown in the timeline, exclusive zoning practices were common in the early 1900s. Courts struck down only the most discriminatory practices and allowed those that would be considered today to have a "disparate impact" on classes protected by the Fair Housing Act. For example, the 1926 case *Village of Euclid v. Amber Realty Co. (272 U.S. 365)* supported the segregation of residential, business, and industrial uses, justifying separation by characterizing apartment buildings as "mere parasite(s)" with the potential to "utterly destroy" the character and desirability of neighborhoods. At that time, multifamily apartments were the only housing options for people of color, including immigrants.

The Federal Fair Housing Act was not enacted until nearly 60 years after the first racial zoning ordinances appeared in U.S. cities. This coincided with a shift away from federal control over low-income housing toward locally-tailored approaches (block grants) and market-oriented choice (Section 8 subsidies)—the latter of which is only effective when adequate affordable rental units are available.

CITY OF SAN MATEO 2040 GENERAL PLAN HOUSING ELEMENT

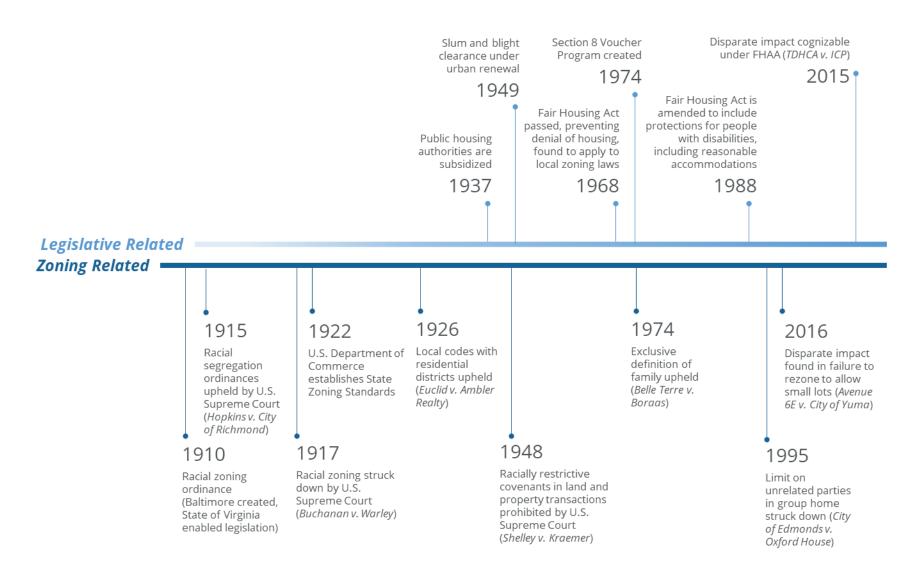

Figure 2: Major Public and Legal Actions that Influence Fair Access to Housing

Maps and data referenced in this section. Throughout this section, there are references to maps created by HCD to support the AFFH and data tables created by HCD, the Association of Bay Area Governments (ABAG), and the consultant team. Those maps and tables appear in an Attachment 2 and follow the organization of this section and the state guidance. The maps, in particular, are useful in demonstrating how the City of San Mateo compares with surrounding jurisdictions and the county overall in offering housing choices and access to opportunity.

Report content and organization. This Fair Housing Assessment follows the April 2021 State of California State Guidance for AFFH. The study was conducted as part of the 21 Elements process, which facilitates the completion of Housing Elements for all San Mateo County jurisdictions.

Primary Findings, Contributing Factors, and Fair Housing Action Plan (Appendix 1) identifies the primary factors contributing to fair housing challenges and the plan for taking meaningful actions to improve access to housing and economic opportunity.

Section I. Fair Housing Enforcement and Outreach Capacity reviews lawsuits/enforcement actions/complaints against the jurisdiction; compliance with state fair housing laws and regulations; and jurisdictional capacity to conduct fair housing outreach and education.

Section II. Integration and Segregation identifies areas of concentrated segregation, degrees of segregation, and the groups that experience the highest levels of segregation

Section III. Access to Opportunity examines differences in access to education, transportation, economic development, and healthy environments.

Section IV. Disparate Housing Needs identifies which groups have disproportionate housing needs including displacement risk.

Attachments:

- Access to Educational Opportunities (Attachment 3)—findings from a countywide analysis of access to education and educational outcomes by protected class.
- State Fair Housing Laws (Attachment 6)—summary of key State laws and regulations related to mitigating housing discrimination and expanding housing choice.

3 PRIMARY FINDINGS

This section summarizes the primary findings from the Fair Housing Assessment for the City of San Mateo including the following sections: fair housing enforcement and outreach capacity, integration and segregation, access to opportunity, disparate housing needs, and contributing factors and the City's fair housing action plan.

 16% of fair housing complaints filed in San Mateo County from 2017 to 2021 (57 total) were in the City of San Mateo (9 total), which is approximately aligned with the city share of the county's population (14%). The most common issues cited in the City were refusal to rent and discrimination in terms, conditions, privileges relating to rental. Most complaints were on the basis of disability status (6 complaints) and race (3 complaints) in the City.

Racial and ethnic minority populations are **disproportionately impacted by poverty, low household incomes, overcrowding, and homelessness** compared to the non-Hispanic White population in the City of San Mateo. Additionally, racial and ethnic minorities are more likely **to live in moderate resources areas and be denied for a home mortgage loan**.

- Racial and ethnic minority populations generally have higher rates of poverty (Figure II-5) and lower household incomes (Figure II-4) compared to the non-Hispanic White population in the City of San Mateo.
- Racial and ethnic minorities are more likely than non-Hispanic White households to experience overcrowding (Figure IV-17). Low- and moderate-income households are also more likely to be overcrowded (Figure IV-18).
- People who identify as American Indian or Alaskan Native, Black, White, and Hispanic are overrepresented in the homeless population compared to their share of the general population (Figure IV-22).
- Hispanic, Asian, and Black residents are more likely to live in moderate resource areas compared to high resource areas (Figure III-12). It is important to note there are no designated low resource areas in the City of San Mateo.
- Hispanic and American Indian or Alaska Native households have the highest denial rates for mortgage loan applications in 2018 and 2019 (Figure IV-33).

Geospatially, **the northeast area of the City** is disproportionately impacted by high poverty, low education opportunity, low economic opportunity, low environmental scores, high social vulnerability scores, concentrations of cost burdened households, overcrowding, and moderate resource scores. These areas are generally on either side of Highway 101 and stretch to the San Francisco Bay waterfront, encompassing the North Central and Shoreview neighborhoods. These areas have:

- Higher poverty rates between 10% and 20% (Figure II-28).
- Education opportunity scores between 0.25 and 0.5—meaning they have lower education scores compared to the rest of the City (Figure III-1).
- Low economic opportunity scores between zero and 0.5 (Figure III-7).

- Low environmental scores—which account for PM2.5, diesel PM, drinking water, pesticides, toxic release, traffic, cleanup sites, groundwater threats, hazardous waste, impaired water bodies, and solid waste sites (Figure III-9). The northeast area of the City of San Mateo has particularly poor environmental outcomes for traffic, impaired water, groundwater threats, hazardous waste, and asthma.
- The composite opportunity score for the City of San Mateo shows Census Tracts in the northeast area of the City fall within moderate resource areas while the rest of the City is within high or highest resource areas (Figure III-14).
- The Social Vulnerability Index (SVI) provided by the Centers for Disease Control and Prevention (CDC) ranks census tracts based on their ability to respond to a disaster and includes four themes of socioeconomic status, household composition, race or ethnicity, and housing and transportation. The northeast area of the City is most vulnerable according to the SVI (Figure III-15).
- Concentration (60% to 80% of households) of cost burdened households (Figure IV-13).
- Overcrowded households are concentrated in the same areas as cost burdened households (Figure IV-19).
- These areas are also within Special Flood Hazard Areas (Figure IV-31) and are vulnerable to displacement (Figure IV-28).

The City of San Mateo has a slight concentration of residents with a disability with 9% of the population compared to 8% in the county (Figure III-17). Residents living with a disability in the City are more likely to be unemployed and are largely concentrated in areas around Highway 101. Finally, the aging population is putting a strain on paratransit access countywide.

 Unemployment is disproportionately high among residents living with a disability at 12% compared to 3% for residents without a disability in the City of San Mateo particularly when compared to the county (Figure III-20).

Racial and ethnic minority students in the City of San Mateo—served by the San Mateo Union High School District and the San Mateo-Foster Elementary School District—**experience lower educational outcomes compared to other students**. Many high schoolers in the county met admission standards for a University of California (UC) or California State University (CSU) school. However, **Pacific Islander, Hispanic, and Black students in the San Mateo Union district were less likely to meet the admission standards**. Although San Mateo Union High School has relatively low dropout rates—4% of students—compared to other districts in the county, **dropout rates among Hispanic (7%)**, **Black (6%)**, and **Pacific Islander students** 3).

• Nearly **half of all renter households in the City of San Mateo are cost burdened**—spending more than 30% of their gross income on housing costs—and one in four are extremely cost burdened—spending more than 50% of their gross income on housing costs (Figure IV-9). There are disparities in housing cost burden in the City of San Mateo by race and ethnicity and family size (Figure IV-11 and Figure IV-12).

• 15% of respondents to the resident survey conducted for this AFFH said that schools in their neighborhood were of poor quality.

3.1 Resident Needs Collected Through Local Survey

A survey administered to capture residents' needs and support the AFFH found the following housing challenges. Nearly 150 residents completed the survey:

About 26% of residents said their house or apartment is too small for their family;

- 36% for racial and/or ethnic minority households;
- 42% for single parent households

14% of renters said they worry that if they request a repair they will experience rent increase or get evicted;

- 16% for racial and/or ethnic minority households;
- 21% for single parent households;

27% of respondents indicated they had been discriminated against when looking for housing in San Mateo County;

- 31% for racial and/or ethnic minority respondents;
- 43% for residents with a disability;

10% (14% for single parent households) of renters are often late on rent and 14% (20% for residents with a disability) can't keep up with utilities.

3.2 Contributing factors and Fair Housing Action Plan

The disparities in housing choice and access to opportunity discussed above stem from historical actions, socioeconomic factors that limit employment and income growth, the inability of the broader region to respond to housing demand, regional barriers to open housing choice, and, until recently, very limited resources to respond to needs. Specifically,

Fair housing issue: Hispanic households have disproportionate housing needs. These needs are evident in mortgage denial gaps, geographic distribution of affordable housing, cost burden, and overcrowding.

Contributing factors:

- Higher rates of mortgage denial rates among Hispanic households stems from decades of discrimination in housing markets and challenges building wealth through economic mobility and homeownership.
- Although voucher holders and affordable housing (as captured in the HCD Location Affordability Index) are not as highly concentrated in the City of San Mateo as in many surrounding jurisdictions, the northern portion of the City offers the most affordable homes. As such, residents living in these areas have lower incomes and higher rates of poverty. Preference may be at play as well: A recent article in Cityscape found that Hispanic homebuyers—when controlled for demographics, loan characteristics, and

finances—are more likely to purchase homes in neighborhoods with fewer non-Hispanic White homeowners and lower economic opportunity.⁵

- Hispanic residents are more likely than others to work low wage jobs that do not support the City's or region's housing prices, resulting in higher rates of cost burden and overcrowding. Although, it is customary for Hispanic households to live in multigenerational settings, which may account for higher rates of perceived overcrowding, overcrowding is also an indicator of lack of access to affordable and rightsized housing.
- Hispanic residents are primarily concentrated in the northeastern area of the City where residents face higher poverty and cost burden as well as poor opportunity outcomes according to TCAC's opportunity maps.

Fair housing issue: Hispanic residents and single female parent households are concentrated in census tracts with higher poverty, low economic and environmental opportunity, high cost burden, overcrowding, and flood hazards compared to the rest of the City of San Mateo.

Contributing factors:

- Concentration of naturally occurring affordable ownership and rental housing opportunities in the northeast areas of the City further concentrates poverty, cost burden, and overcrowding in areas with low economic and environmental outcomes.
- There is a relative lack of affordable housing opportunities in higher resourced areas of the City.
- Highway 101 creates a major barrier between the Shoreview neighborhood—where the geographic concentrations of these groups exist—and the rest of the City of San Mateo.

Fair housing issue: Persons with disabilities have higher housing needs due to challenges accessing employment and housing discrimination and are concentrated in areas with lower environmental and economic opportunity scores.

Contributing factors:

- The unemployment rate for the City of San Mateo's residents with a disability is four times that of persons without a disability. The exact reasons for this disparity are unclear and are likely related to limited job opportunities, access to employment, and market discrimination.
- The undersupply of accessible housing units, particularly for renters, creates a scarcity of units for residents living with a disability.
- There were six complaints—out of the nine total complaints in the City—filed with HUD in the City of San Mateo from 2017 to 2020 where the issues cited included a failure to

⁵ Sanchez-Moyano, R. (2021). Achieving spatial equity through suburban homeownership? Neighborhood attributes of Hispanic homebuyers. *Cityscape: A Journal of Policy Development and Research*. Volume 23(3).

make reasonable accommodations. Landlords and property owners are required to provide reasonable accommodations to residents living with a disability upon request.

 There are concentrations of the population living with a disability west of Highway 101 in the North Central neighborhood. This area of the City has a concentration of low and moderate income households (more than 50% per census tract) and scores low on TCAC's environmental and economic opportunity scores.

Fair housing issue: Persons with disabilities and persons of color are most likely to file complaints of housing discrimination due to discriminatory terms, conditions, privileges, or services and facilities and failure to make reasonable accommodations.

Contributing factors:

- Housing discrimination residents with disabilities and Hispanic households.
- Lack of understanding of reasonable accommodation requirements by landlords and property owners.

The prioritization of contributing factors is based on the ability of the City to make significant impacts on the concerns. They are as follows:

Fair housing issue: Hispanic households have disproportionate housing needs. These needs are evident in mortgage denial gaps, geographic distribution of affordable housing, cost burden, and overcrowding.

Contributing factors:

LOW: Higher rates of mortgage denial rates among Hispanic households stems from decades of discrimination in housing markets and challenges building wealth through economic mobility and homeownership.

LOW: Although voucher holders and affordable housing (as captured in the HCD Location Affordability Index) are not as highly concentrated in the City of San Mateo as in many surrounding jurisdictions, the northern portion of the City offers the most affordable homes. As such, residents living in these areas have lower incomes and higher rates of poverty.

MEDIUM: Hispanic residents are more likely than others to work low wage jobs that do not support the City's or region's housing prices, resulting in higher rates of cost burden and overcrowding. Although, it is customary for Hispanic households to live in multigenerational settings, which may account for higher rates of perceived overcrowding, overcrowding is also an indicator of lack of access to affordable and right-sized housing.

HIGH: Hispanic residents are primarily concentrated in the northeastern area of the City where residents face higher poverty and cost burden as well as poor opportunity outcomes according to TCAC's opportunity maps.

Fair housing issue: Hispanic residents and single female parent households are concentrated in census tracts with higher poverty, low economic and environmental opportunity, high cost burden, overcrowding, and flood hazards compared to the rest of the City of San Mateo.

Contributing factors:

HIGH: Concentration of naturally occurring affordable ownership and rental housing opportunities in the northeast areas of the City further concentrates poverty, cost burden, and overcrowding in areas with low economic and environmental outcomes.

HIGH: There is a relative lack of affordable housing opportunities in higher resourced areas of the City.

LOW: Highway 101 creates a major barrier between the Shoreview neighborhood—where the geographic concentrations of these groups exist—and the rest of the City of San Mateo.

Fair housing issue: Persons with disabilities have higher housing needs due to challenges accessing employment and housing discrimination and are concentrated in areas with lower environmental and economic opportunity scores.

Contributing factors:

LOW: The unemployment rate for the City of San Mateo's residents with a disability is four times that of persons without a disability. The exact reasons for this disparity are unclear and are likely related to limited job opportunities, access to employment, and market discrimination.

HIGH: The undersupply of accessible housing units, particularly for renters, creates a scarcity of units for residents living with a disability.

MEDIUM: There were six complaints—out of the nine total complaints in the City—filed with HUD in the City of San Mateo from 2017 to 2020 where the issues cited included a failure to make reasonable accommodations. Landlords and property owners are required to provide reasonable accommodations to residents living with a disability upon request.

HIGH: There are concentrations of the population living with a disability west of Highway 101 in the North Central neighborhood. This area of the City has a concentration of low- and moderate-income households (more than 50% per census tract) and scores low on TCAC's environmental and economic opportunity scores.

Fair housing issue: Persons with disabilities and persons of color are most likely to file complaints of housing discrimination due to discriminatory terms, conditions, privileges, or services and facilities and failure to make reasonable accommodations.

Contributing factors:

HIGH: Housing discrimination residents with disabilities and Hispanic households.

HIGH: Lack of understanding of reasonable accommodation requirements by landlords and property owners.

The Fair Housing Action Plan (FHAP) at the end of this report details how the City of San Mateo proposes to respond to the factors contributing to the fair housing challenges identified in this analysis.

4. SECTION I. FAIR HOUSING ENFORCEMENT AND OUTREACH CAPACITY

This section discusses fair housing legal cases and inquiries, fair housing protections and enforcement, and outreach capacity.

4.1 Fair Housing Legal Cases and Inquiries

California fair housing law extends beyond the protections in the Federal Fair Housing Act (FHA). In addition to the FHA protected classes—race, color, ancestry/national origin, religion, disability, sex, and familial status—California law offers protections for age, sexual orientation, gender identity or expression, genetic information, marital status, military or veteran status, and source of income (including federal housing assistance vouchers).

The California Department of Fair Employment in Housing (DFEH) was established in 1980 and is now the **largest civil rights agency in the United States**. According to their website, the DFEH's mission is, "to protect the people of California from unlawful discrimination in employment, housing and public accommodations (businesses) and from hate violence and human trafficking in accordance with the Fair Employment and Housing Act (FEHA), Unruh Civil Rights Act, Disabled Persons Act, and Ralph Civil Rights Act".⁶

DFEH receives, evaluates, and investigates fair housing complaints. DFEH plays a particularly significant role in investigating fair housing complaints against protected classes that are not included in federal legislation and therefore not investigated by HUD. DFEH's website provides detailed instructions for filing a complaint, the complaint process, appealing a decision, and other frequently asked questions.⁷ Fair housing complaints can also be submitted to HUD for investigation.

Additionally, San Mateo County has a number of **local enforcement organizations** including Project Sentinel, the Legal Aid Society of San Mateo County, and Community Legal Services of East Palo Alto. These organizations receive funding from the County and participating jurisdictions to support fair housing enforcement and outreach and education in the County.

From 2017 to 2021, 57 fair housing complaints in San Mateo County were filed with the U.S. Department of Housing and Urban Development (HUD) (Figure I-2)—16% of complaints were in the City of San Mateo (9 complaints) (Figure I-3). Most complaints submitted to HUD cited disability status as the bias (56%) followed by race (19%), and familial status (14%). In the City of San Mateo, the most common issues cited were refusal to rent and discrimination in terms, conditions, privileges relating to rental.

Countywide, no cause determination was found in 27 complaints followed by successful conciliation or settlement with 22 complaints. Fair housing inquiries in 2020 were primarily submitted to HCD from the City of San Mateo, Redwood City, Daly City, and Menlo Park (Figure I-3, Figure I-4, and Figure I-5).

Of the 146 City of San Mateo respondents to the resident survey, 95 residents have looked for housing seriously, of those, 23 (24%) indicated that a "Landlord did not return calls and/or emails asking about a

⁶ <u>https://www.dfeh.ca.gov/aboutdfeh/</u>

⁷ https://www.dfeh.ca.gov/complaintprocess/

unit", and 41 (46%) indicated they have been denied housing to rent or buy in the past 5 years. The main reason for denial (40%) was *"income too low."*

Similarly, of the 28 voucher holders responding to the survey, the majority (69%) indicated that finding an affordable unit is somewhat or very difficult. Seven of them indicated this is due to *"Landlords have policies of not renting to voucher holders."* Fair housing complaints filed with HUD by San Mateo County residents have been on a declining trend since 2018, when 18 complaints were filed. In 2019, complaints dropped to 5, increased to 11 in 2020, and had reached 6 by mid-2021.

Nationally, the National Fair Housing Alliance (NFHA) reported a "negligible" decrease in the number of complaints filed between 2019 and 2020. The primary bases for complaints nationally were nearly identical to San Mateo County's: disability (55%) and race (17%). Familial status represented 8% of complaints nationally, whereas this basis comprised 14% of cases in the county.

NFHA identifies three significant trends in 2020 that are relevant for San Mateo County:

- First, fair lending cases referred to the Department of Justice from federal banking regulators has been declining, indicating that state and local government entities may want to play a larger role in examining fair lending barriers to homeownership.
- Second, NFHA identified a significant increase in the number of complaints of harassment—1,071 complaints in 2020 compared to 761 in 2019.
- Finally, NFHA found that 73% of all fair housing complaints in 2020 were processed by private fair housing organizations, rather than state, local, and federal government agencies—reinforcing the need for local, active fair housing organizations and increased funding for such organizations.⁸

Factors that contribute to fair housing issues are grounded in the history of the City of San Mateo and the broader region. A summary of historical land use, investment practices, and resulting demographic trends are below:

Historical land use. Black residents who migrated to the City of San Mateo to escape violence in the South and as part of their military duty in the 1930s quickly found that economic capital did not guarantee homeownership in the City of San Mateo. Real estate agents guided transactions and excluded many Black and Asian residents from homeownership, regardless of their financial means and community standing. In one instance, a Black family did succeed in buying a house in the city. When news spread of the purchase, the Ku Klux Klan in San Mateo placed ads in the San Mateo Times in response to encourage membership. Family and friends of the Black family guarded their house day and night watching for Ku Klux Klan members.⁹

The Black community was also restricted from buying developments for veterans. The San Mateo Historical Society told the story of Mr. Cullen, the city's second Black employee in its history. He ran the San Mateo city dump and was excited to see that a development for veterans was being constructed across from it, as his son had served in the military. He went over to explore and was confronted by a sign

⁸ <u>https://nationalfairhousing.org/2021/07/29/annual-fair-housing-report-shows-increase-in-housing-harassment/</u> ⁹ La Peninsula, The Journal of the San Mateo County Historical Association, vol. xliv, no. 1. https://historysmc.org/wpcontent/uploads/2020/08/La-Peninsula-Migration-Spring-2016.pdf

that read "RESTRICTED." His son could not access these homes because he was Black.¹⁰ Similar restrictive covenants expanded across neighborhoods. Coupled with out of reach, equally exclusionary government loans for single family homes, people of color were effectively excluded from land zoned for such homes across the Bay Area.

Investment practices. Low rent and public housing developments were hampered in the 20th century by a California law passed in 1950 that required a referendum be held in a city to approve these developments. In *James v. Valtierra*, citizens of San Mateo County and San Jose who were eligible for public housing challenged the law as they felt they had been denied housing opportunities and thus the law violated the Equal Protection Clause. The District Court agreed with the plaintiffs and said that because the referendum applied only to public housing, it violated the Fourteenth Amendment, but the Supreme Court disagreed. They said that the referendum process "ensures that all the people in the community will have a voice in the decision, which may lead to large expenditures of local governmental funds for increased public services and to lower tax revenues."¹¹ Therefore, low-income people could not have a say in the future in housing if they were the minority of voters. Although there are now more workarounds to develop subsidized housing, such as federal and state tax credits, it is still time consuming and expensive for development in the state. California voters will decide to repeal the article or not in 2024.¹²

The accumulation of exclusionary and discriminatory practices has led to disinvestment in neighborhoods of color. According to a study by UC Berkeley, although Black and Latino neighborhoods participate in the labor force at similar rates as segregated white areas, they earn 39% less income than white neighborhoods. Houses are valued \$131,000 less, impacting wealth acquisition, generational assets, school resources, and commercial investment.

The lack of investment has caused out-migration of Black residents, particularly in the East Palo Alto and San Francisco area. East Palo Alto has lost 66% of its Black population and San Francisco has lost 43% since 1990.¹³ Overt racism, violence, displacement from eviction and foreclosure have forced many Black families out of the city and even the state. As San Mateo County loses diversity, there are still many who cannot afford to move nor do they want to leave their communities. Ensuring housing stability is one investment that aims to restore stability and counteract the many burdens white communities have placed onto Californians of color.

Demographic trends. The City of San Mateo has demographics largely in line with San Mateo County and the Bay Area. The City has a slightly higher white population compared to the County and the Bay Area (41% versus 39%). The Hispanic/ Latinx community makes up a quarter of the City, County and Bay Area population. The parity in population with the Bay Area suggests that the City of San Mateo hosts a diverse community and provides housing that attracts and retains residence from different economic and racial backgrounds. Notably, however, the Bay Area has a small percentage of Black Californians at 6%. San Mateo County and San Mateo City have less than 6%. This is emblematic of California's past housing

¹³ California's Black exodus comes with a hidden toll for transplants (calmatters.org)

policies that discriminated against Black communities that have an enduring segregative effect seen today.

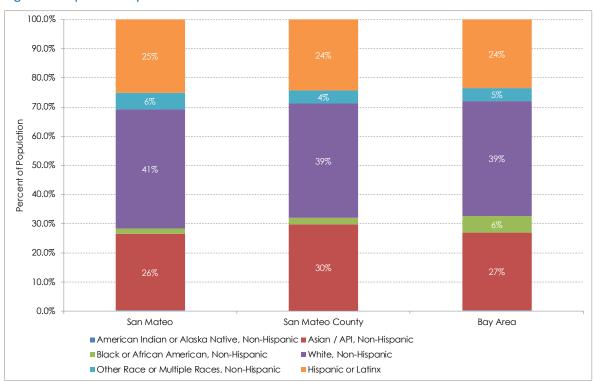

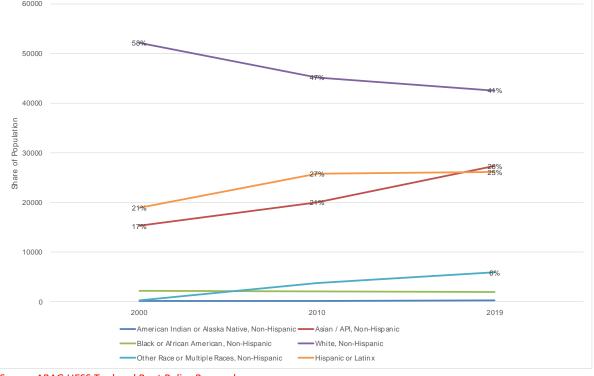

Figure 3: Population by Race

The figure below shows demographic trends by race from 2000 to 2019. Since 2000, the white population in San Mateo City has gone down as the Hispanic, Asian, and multiple race populations have increased. Native American and Black populations have remained low over time. As mentioned in the investment section, Black populations elsewhere in San Mateo County have drastically decreased. Given that San Mateo City has not seen an increase in the Black population, this further confirms that many Black families have been displaced entirely from San Mateo County and that San Mateo City does not offer affordable choices.

Figure 5: Fair Housing Complaints and Inquiries

4.2 Outreach and Capacity

The City of San Mateo could improve the accessibility of fair housing information on their website and resources for residents experiencing housing discrimination. The City's website provides a link to the Regional Assessment of Fair Housing—approved by HUD in November 2017—and AFFH goals specific to the City of San Mateo.¹⁴ Housing resources are also available on the City's website but there is not specific information or resources for residents experiencing discrimination in housing or the Fair Housing Act.¹⁵

¹⁴ <u>https://www.cityofsanmateo.org/3764/Fair-Housing-Assessment</u>

¹⁵ <u>https://www.cityofsanmateo.org/2506/Other-Resources</u>

The Draft Housing Element 2023-2031 incorporates additional measures for providing access and education efforts as a specific program H 4.3.

4.3 Compliance with State Law

The City of San Mateo is – or will be -- compliant with the following state laws that promote fair and affordable housing. <u>There is no active litigation related to fair housing against the City currently.</u> The City has not been alleged or found in violation of the following:

- State Density Bonuses and Other Incentives Law (Gov. Code. Title 7. Division 1. Chapter 4.3 Density Bonuses and Other Incentives, amended and effective January 1, 2021)(revisions are included in program H 1.3)
- Housing Accountability Act (Gov Code Section 65589.5) requiring adoption of a Housing Element and compliance with RHNA allocations;
- No Net Loss Law (Gov Code Section 65863) requiring that adequate sites be maintained to accommodate unmet RHNA allocations, including among income levels;
- Least Cost Zoning Law (Gov Code Section 65913.1);
- Excessive Subdivision Standards Law (Gov Code Section 65913.2);
- Limits on Growth Controls Law (Gov Code Section 65589.5).

4.4 Housing Specific Policies Enacted Locally

The City of San Mateo identified the following local policies that contribute to the regulatory environment for affordable housing development in the City.

Local policies in place to <u>encourage</u> housing development.	Local <u>barriers</u> to affordable housing development.
Mixed Use Zoning	Height limits on multifamily developments
Density Bonus Ordinances	
Condominium Conversion Ordinance	 Voter initiatives that restrict multifamily developments, rezoning for higher density, height limits or similar
Homeowner Rehabilitation program	measures
 General Fund Allocation Incl. former RDA "Boomerang" Funds 	 Low floor area ratios (FAR) allowed for multifamily housing
Commercial Development Impact Fee	Excessive parking requirements
 Locally Funded Homebuyer Assistance Programs 	Extensive time period/requirements to develop multi-family properties

 Development and/or permit streamlining Objective design standards Affordable housing impact/linkage fee on new commercial development Inclusionary zoning Local policies that are <u>NOT</u> in place, but have potential Council interest for further exploration. Community land trusts Acquisition of affordable units with expiring subsidies Acquisition of unsubsidized properties with affordable rents Dedicating surplus land for affordable housing Ordinance on replacement units that exceed State standards 	Local policies that are <u>NOT</u> in place but would provide the best outcomes in addressing housing shortages.	Local policies in place to mitigate or prevent displacement of low-income households.
 Local policies that are <u>INOT</u> in place, but have potential Council interest for further exploration. Community land trusts Acquisition of affordable units with expiring subsidies Acquisition of unsubsidized properties with affordable rents Dedicating surplus land for affordable housing Ordinance on replacement units that 	 Development and/or permit streamlining 	on new commercial development
	 potential Council interest for further exploration. Community land trusts Acquisition of affordable units with 	 Promoting streamlined processing of ADUs Fair housing legal services Acquisition of unsubsidized properties with affordable rents Dedicating surplus land for affordable housing Ordinance on replacement units that

According to the California Department of Housing and Community Development AFFH Data Viewer (HCD data viewer), the City of San Mateo does not have any public housing buildings. However, the City does have three census tracts with a moderate share of households using housing vouchers (5% to 15%) and most other areas of the City have some (5% or less) housing voucher utilization.

Compared to nearby Millbrae, Burlingame, and Hillsborough, the **City of San Mateo appears accommodating to renters with housing vouchers** because the City has a greater share of voucher holders compared to the surrounding communities. The presence of housing voucher users indicates available rental supply to house these residents and a lack of exclusionary behavior from landlords in the City.

5. SECTION II. INTEGRATION AND SEGREGATION

This section discusses integration and segregation of the population by protected classes including race and ethnicity, disability status, familial status, and income status. The section concludes with an analysis of racially and ethnically concentrated areas of poverty and affluence.

Integration and Segregation

"Integration generally means a condition in which there is not a high concentration of persons of a particular race, color, religion, sex, familial status, national origin, or having a disability or a particular type of disability when compared to a broader geographic area.

Segregation generally means a condition in which there is a high concentration of persons of a particular race, color, religion, sex, familial status, national origin, or having a disability or a type of disability in a particular geographic area when compared to a broader geographic area."

Figure 7: Integration and Segregation

Source: California Department of Housing and Community Development Guidance, 2021, page 31.

5.1 Race and Ethnicity

Generally, the demographic characteristics of the City of San Mateo are consistent with the overall characteristics of San Mateo County. The population **distribution by race and ethnicity is similar to the county** with the largest proportion of the population being non-Hispanic White (41%) followed by Asian (26%), Hispanic (25%), other or multiple races (6%), and Black (2%).¹⁶ **Older residents are less diverse** with 67% of the population older than 65 years identifying as White compared to only 46% of the population for children less than 18 years old.

Racial and ethnic minority populations generally have higher rates of poverty and lower household incomes compared to the non-Hispanic White population in the City of San Mateo.

Geospatially, the City of San Mateo has three White majority census tracts¹⁷ and <u>one</u> census tract (6062) that <u>has</u> a slim Hispanic majority.¹⁸

The 6062 Census tract covers the North Central neighborhood, which is located just north of Downtown, east of El Camino Real and west of Highway 101, and is identified as an equity priority neighborhood.

As shown in the table below, the most ethnically diverse Census tract in San Mateo City is 6062, where the slightly majority of residents are of Hispanic descent. This Census tract became less diverse between 2010 and 2019, however, with a decline of more than 900 residents of Hispanic descent. This was a change from trends between 2000 and 2010, when the Hispanic population increased by 400 residents.

This Census tract is also the tract with the highest proportion of low to moderate income households in the city and where the majority of renters are cost burdened (59%)—both indicators of displacement

¹⁶ The share of the population that identifies as American Indian or Alaska Native is less than 1%.

¹⁷ Majority census tracts show the predominant racial or ethnic group by tract compared to the next most populous.

¹⁸ Redlining maps, otherwise known as Home Owners' Loan Corporation (HOLC) maps, are not available for San Mateo County.

vulnerability. This Census tract abuts Highway 101 which separates the tract from higher income neighborhoods on the Bay. It is likely a refuge for residents seeking relatively affordable housing.

Other Census tracts show stable or increasing ethnic diversity, including those with the lowest Low to Moderate income proportions.

Since 2000, except for Tract 6062, all census tracts in San Mateo have seen modest increases in Hispanic population, including those with the lowest proportions of low and moderate income households (6073, 6078). This is a positive trend, indicative of integration and furthering access to opportunity.

<u>Census</u> <u>Tract</u>	<u>Characteristic</u> <u>s of Tract</u>	Low- mod <u>%</u>	2000 Hispanic populatio n and %age	2010 Hispanic populatio n and %age	<u>#</u> <u>chang</u> <u>e 2000</u> <u>to</u> <u>2010</u>	2019 Hispanic populatio n and %age	<u>#</u> <u>chang</u> <u>e</u> <u>2000-</u> <u>2019</u>	# chang e 2010- 2019

The following table shows the same information for the Asian population—the second largest racial and ethnic group in the city. Between 2010 and 2019, Asian residents increased across Census tracts, with the largest increase in tract 6075—a gain of more than 1,000 Asian residents. This is a similar level of growth to Hispanic residents.

Table 2: Asian Population, City of San Mateo, 2000, 2010, and 2019

The Black population, on the other hand, has seen a decline in population in half of the census tracts in the City of San Mateo. Although data from 2000 is only available from census tract 6062, it shows a substantial decline in just two decades from 876 Black households to 473 in 2019. Other tracts have extremely small numbers. Some have seen modest increases while others continue to see the Black population decline.

The map below shows concentration by race. Noticeably, the block groups with the largest concentration of non-white residents are east of El Camino Real. The neighborhoods east of El Camino Real include the North Central, Central, Sunnybrae, North Shoreview, Shoreview/Parkside, and San Mateo Glendale Village neighborhood areas. North Central and Central neighborhoods are two of the oldest neighborhoods in the city and are characterized by smaller lots with a range of housing types including single-family homes, duplexes, tri-plexes, quad-plexes as well as larger multi-family buildings located next to each other. It should be noted that discriminatory real estate practices excluded non-whites from many neighborhoods in the city and provided little options for minority populations to live or purchase housing with the exception of these two neighborhoods. One result is that there is higher concentration of religious institutions, ethnic markets, and multi-generational minority families in these two neighborhoods.

Many of the homes in the Sunnybrae, North Shoreview, Shoreview/Parkside, and San Mateo Glendale Village neighborhood areas were developed following World War II. The postwar housing boom saw a rapid increase in housing production to house the millions of returning war veterans. In communities across the nation, housing developers addressed the need through the advent of master plan developments which mass produced modest-size, one-story track homes on smaller lots (i.e. typically

5,000 square feet) that differed from the custom built housing on larger lots which was the norm before WWII. Multi-family apartment buildings have been built along major streets, which serve as a transition between neighborhood serving commercial uses and the single-family homes, in these neighborhoods. While the homes were more affordable, discriminatory real estate practices that excluded non-whites continued until the Fair Housing Act of 1968. Since the 1970's, homes in these neighborhoods continue to remain more affordable than custom the built homes on larger lots that are located in other parts of the city.

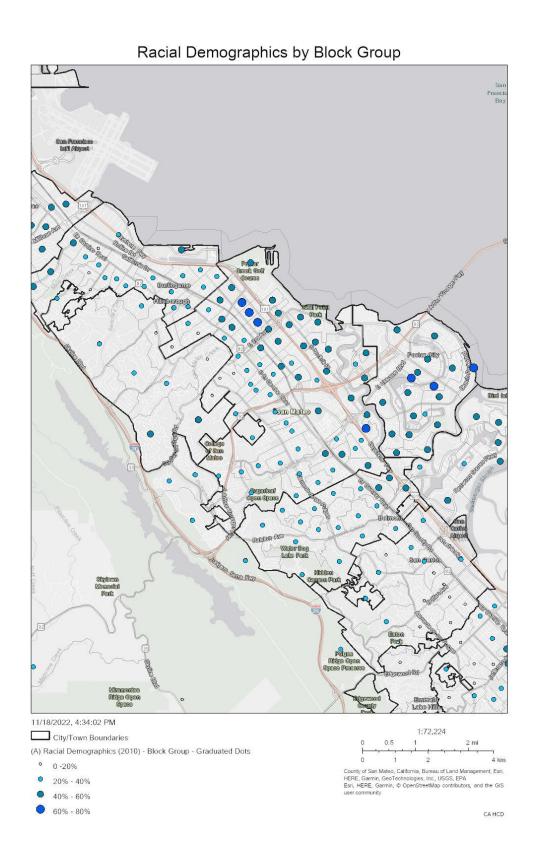

Figure 8: Racial Demographics by Block Group

CITY OF SAN MATEO 2031 HOUSING ELEMENT

5.2 Dissimilarity and Isolation Indices

The Dissimilarity Index, or DI, is a common tool that measures segregation in a community. The DI in an index that measures the degree to which two distinct groups are evenly distributed across a geographic area. The DI represents the percentage of a group's population that would have to move for each area in the county to have the same percentage of that group as the county overall.

DI values range from 0 to 100—where 0 is perfect integration and 100 is complete segregation. Dissimilarity index values between 0 and 39 generally indicate low segregation, values between 40 and 54 generally indicate moderate segregation, and values between 55 and 100 generally indicate a high level of segregation.

The isolation index is interpreted as the probability that a randomly drawn minority resident shares an area with a member of the same minority, it ranges from 0 to 100 and higher values of isolation tend to indicate higher levels of segregation. The isolation index measures the segregation of a single group, and the dissimilarity index measures segregation between two different groups. The Theil's H-Index can be used to measure segregation between all racial or income groups across the City at once.

ABAG and UC Merced completed an analysis of segregation in San Mateo. Several indices were used to assess segregation in the City and determine how the City differs from patterns of segregation and integration in the region overall. The following is the summary from the UC Merced report (Attachment 4):

- As of 2020, white residents are the most segregated compared to other racial groups in San Mateo, as measured by the isolation index. White residents live in neighborhoods where they are less likely to come into contact with other racial groups.
- Among all racial groups, the white population's isolation index value has changed the most over time, becoming less segregated from other racial groups between 2000 and 2020.
- According to the dissimilarity index, the highest level of racial segregation is between Latinx and white residents within San Mateo.¹⁹
- According to the Theil's H-Index, neighborhood racial segregation in San Mateo declined between 2010 and 2020.
- Neighborhood income segregation stayed about the same between 2010 and 2015.
- Above Moderate-income residents are the most segregated compared to other income groups in San Mateo. Above Moderate-income residents live in neighborhoods where they are less likely to encounter residents of other income groups.

¹⁹ The analysis conducted for this report suggests that dissimilarity index values are unreliable for a population group if that group represents approximately less than 5% of the jurisdiction's total population. ABAG/MTC recommends that when cities have population groups that are less than 5% of the jurisdiction's population (see Table **Error! Reference source not found.** in Appendix 2), jurisdiction staff could focus on the isolation index or Thiel's H-Index to gain a more accurate understanding of neighborhood-level racial segregation in their jurisdiction.

- Among all income groups, the Very Low-income population's segregation measure has changed the most over time, becoming more segregated from other income groups between 2010 and 2015.
- According to the dissimilarity index, segregation between lower-income residents and residents who are not lower-income has not substantively changed between 2010 and 2015. In 2015, the income segregation in San Mateo between lower-income residents and other residents was higher than the average value for Bay Area jurisdictions.

5.3 Segregation Between City of San Mateo and Other Jurisdictions in the Bay

5.3.1 Area Region

- San Mateo has a higher share of white residents than other jurisdictions in the Bay Area as a whole, a higher share of Latinx residents, a lower share of Black residents, and a lower share of Asian/Pacific Islander residents.
- Regarding income groups, San Mateo has a higher share of very low-income residents than other jurisdictions in the Bay Area as a whole, a higher share of low-income residents, a higher share of moderate-income residents, and a lower share of above moderate-income residents.

These findings illustrate the need to provide housing, especially affordable housing, throughout the community, rather than in any single area. The inventory of opportunity sites demonstrates that the City has assumed affordable housing in areas where there are not existing concentrations of lower-income households, but rather in locations rich in service, transit, and other resources to ensure availability to these households. As such, the City does not anticipate the new housing to increase segregation within the City.

Further, the City anticipates that planning for approximately 3,616 units of housing affordable to low and very low-income households, as shown in the site inventory (Appendix C), will provide housing for resident groups who are more racially and ethnically diverse than the City overall due to their disproportionate needs. The City is prepared to pair the construction of new affordable housing with affirmative marketing and other programs to ensure that residents with disproportionate needs in the region benefit from the housing.

5.3.2 Disability Status

The share of the population living with at least one disability is 9% in the City of San Mateo compared to 8% in San Mateo County (Figure II-13).

Concentrated disability status. The map below shows the concentration of those with disabilities using 2019 ACS 5-year data. San Mateo City has a low concentration with less than 10 percent, however, areas nearby have concentrations of 10 to 20 percent. These areas of concentration push up against El Camino Real and Bayshore Freeway.

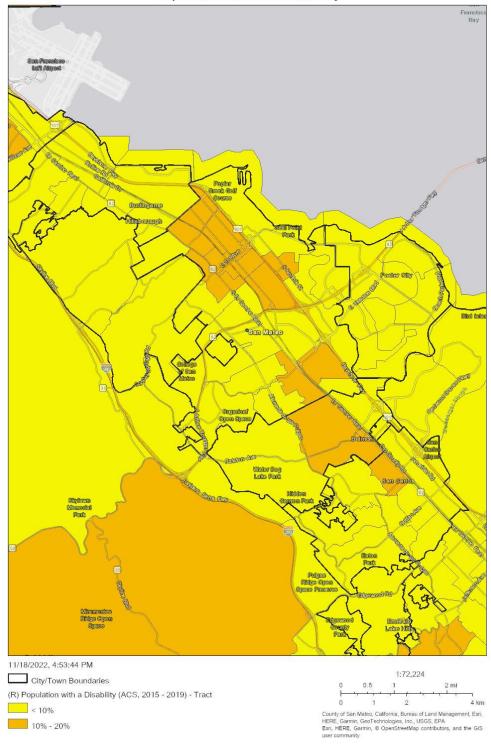

Over time, the number of those with disabilities has stayed relatively stagnant. In 2012, 8.4% of San Mateo City identified a disability and in 2020, 9% did. The low percentage over time of those with disabilities suggests that San Mateo City lacks affordable, accessible units to accommodate more than 9% of their population. Trends in disability are largely in line with the Bay Area and County, where, respectively, 10% and 8% of the population has a disability.

As the population ages and is more likely to have a disability, there are increased concerns of displacement over time. Those who have a disability have a higher unemployment rate of 12% compared to those without a disability at 3%. Those who use fixed income due to a disability or retirement are more susceptible to displacement when housing costs rise. Populations over 65 are more likely to report having a disability in the City of San Mateo. This cohort has also gone up 13% from 92,482 in 2000 to 104,333 in 2019. The growth is a reminder that affordable and accessible housing are a growing need in the region.

There are a handful of census tracts in the City that have a 10% to 20% share of the population living with a disability (Figure II-14). Geographic concentrations of people living with a disability may indicate the area has ample access to services, amenities, and transportation that support this population. The concentration of disability largely is in line with concentration of non-white racial groups and low-to-moderate income census tracts around Bayshore freeway.

CA HCD

Figure 9: Population with a Disability

5.3.3 Familial Status

The City of San Mateo is home to more single-person households than the county, with 28% of households compared to only 22% in the County (Figure II-16). Additionally, there are fewer married-couple families and families with children in the City (Figure II-17 and Figure II-18).

Familial status can indicate specific housing needs and preferences. A larger number of nonfamily or single person households indicates a higher share of seniors living alone, young adults living alone or with roommates, and unmarried partners. Higher shares of nonfamily households indicate an increased need for one- and two-bedroom units.

The majority of married couple households and slim majority of residents living alone live-in owneroccupied housing (Figure II-19). The number of housing units available by number of bedrooms and tenure is consistent with the familial status of the households that live in the City of San Mateo (Figure II-16 and Figure II-20). Compared to the county, the City of San Mateo has a smaller proportion of family households and greater proportion of single person households—which is reflected in the number of bedrooms and tenure of the housing stock in the City (Figure II-19 and Figure II-20). The distribution of households by family type are mapped at the census tract level in Figures 21, 22, 23, and 24.

Female-headed households with children are more likely to be below the poverty level. In the City of San Mateo, 76 female-headed households with no children are below the poverty level compared to 309 female-headed households with children. Single-mother households are also less likely to be homeowners in the City. Concentrations of female-headed households with children and no partner are shown in the map below. Most of San Mateo has census tracts less than 20% female-headed households with the exception of four census tracts next to Bayshore Freeway.

race/ethnic				
<u>distribution</u>				

The table above details the changes in female-headed households from 2000 to 2019. Most of these households are in tract 6062, an area that, as previously shown, has the highest proportion of those with low to moderate income. 311 female-headed households have been added to the census tract from 2000 to 2019. Other tracts have seen decreases in female-headed households. This suggests that more married couples are moving to the area, who generally have higher incomes, and that unaffordability has pushed female-headed households elsewhere in the City or County.

5.3.4 Household Income

The household income distribution by percent of area median income (AMI) in the City of San Mateo is similar to the county (Figure II-25). There are several census block groups in the City that have median incomes below the 2020 state median income of \$87,100 for a family of four, but the majority of block groups have median incomes well above that (Figure II-26 and Figure II-27). **Poverty rates are highest in the City of San Mateo—between 10% and 20%—in census tracts along the San Francisco Bay and Highway 101** (Figure II-28). The map below shows median household income by census tract. Blue represents income less than the state median income (\$87,100), bright green represents income less than \$125,000 and dark green represents more than \$125,000. A majority of census tracts in the San Mateo City area have an income more than \$125,000. Incomes less than \$125,000 are along El Camino Real, Railroad Avenue, and Bayshore Freeway. Lower incomes are in similar areas as previous maps showing disability and female headed households.

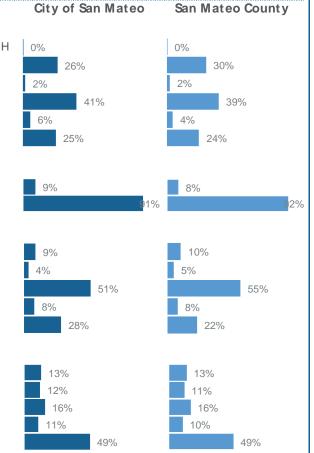

Figure 12: Segregation and Integration

5.4 Racially or Ethnically Concentrated Areas of Poverty and Affluence

Racially Concentrated Area of Poverty or an Ethnically Concentrated Area of Poverty (R/ECAP) and Racially Concentrated Areas of Affluence (RCAAs) represent opposing ends of the segregation spectrum from racially or ethnically segregated areas with high poverty rates to affluent, predominantly White, neighborhoods. Historically, HUD has paid particular attention to R/ECAPs as a focus of policy and obligations to AFFH. Recent research out of the University of Minnesota Humphrey School of Public Affairs argues for the inclusion of RCAAs to acknowledge current and past policies that created and perpetuate these areas of high opportunity and exclusion.²⁰

It is important to note that R/ECAPs and RCAAs are not areas of focus because of racial and ethnic concentrations alone. This study recognizes that racial and ethnic clusters can be a part of fair housing choice if they occur in a non-discriminatory market. Rather, R/ECAPs are meant to identify areas where residents may have historically faced discrimination and continue to be challenged by limited economic opportunity, and conversely, RCAAs are meant to identify areas of particular advantage and exclusion.

R/ECAPs

HCD and HUD's definition of a Racially/Ethnically Concentrated Area of Poverty is:

A census tract that has a non-White population of 50 percent or more (majority-minority) or, for non-urban areas, 20 percent, AND a poverty rate of 40 percent or more; OR

A census tract that has a non-white population of 50 percent or more (majority-minority) AND the poverty rate is three times the average tract poverty rate for the County, whichever is lower.

Figure 13: R/ECAP definition

Source: California Department of Housing and Community Development Guidance, 2021.

For this study, the poverty threshold used to qualify a tract as an R/ECAP was three times the average census tract poverty rate countywide—or 19.1%. In 2010 there were three census tracts that qualify as R/ECAPs (19.4% poverty rate) in the county. None of the R/ECAPs were located in the City of San Mateo in 2010 (Figure II-29).

In 2019 there were two census tracts that qualify as R/ECAPs (19.1% poverty rate) in the county<u>with</u> one in the North County and one in the South County. <u>Those R/ECAPs are located in Daly City and</u> <u>Redwood City</u>. None were located in the City of San Mateo (Figure II-30).

No R/ECAPs were located in San Mateo City in 2010. In 2010, there were three R/ECAPs, all located in the South County in Redwood City, and East Palo Alto.

The small number of R/ECAPs reveals that poverty is either more equally distributed across neighborhoods in the City of San Mateo or that there are not enough racial or ethnic communities that can access the City. The displacement and subsequent decline of Black residents in San Mateo County is indicative of this trend, however, the rising Hispanic and Asian populations in the City of San Mateo suggests that poverty is not ethnically concentrated. The lack of R/ECAPs in the City over time is driven

²⁰ Goetz, E. G., Damiano, A., & Williams, R. A. (2019). Racially Concentrated Areas of Affluence: A Preliminary Investigation. Cityscape: A Journal of Policy Development and Research, 21(1), 99–124

by economic factors and lack of deeply affordable housing. Persons living in poverty encounter barriers to accessing the majority of cities within San Mateo County because of the lack of deeply subsidized housing. The county has no public housing, and Housing Choice Voucher utilization is low due to the extremely limited rental stock available to both voucher and non-voucher holders.

Figure 14: R/ECAPs, 2010

Note: R/ECAPs are census tracts that have a non-white population of 50 percent or more (majority-minority) AND the poverty rate is three times the average tract poverty rate for the County (19.4% in 2010).

Source: 2010 and 2019 5-year ACS and Root Policy Research

Racially Concentrated Areas of Affluence. The map below shows the locations of RCAAs. RCAAs are census tracts where the white population more than 80% and median income exceeds \$125,000.²¹ Analysis of RCAAs force cities to confront how concentrations of wealthy, white communities were established. As discussed previously, racial covenants, discriminatory lending, and reactionary intimidation of non-white homeowners effectively excluded other races from accessing neighborhoods which today are largely still majority white and affluent. The story of concentrated poverty in neighborhoods of color cannot be told without the knowledge of active exclusion from those with more political, social and economic power.

The map below shows the white-majority tracts in the City of San Mateo. Almost all tracts have a majority white population. In some areas, there is a gap of more than 50% between the white population and the second most populous race.

²¹ Goets, Edward, Damiano and Williams (2019). Racially Concentrated Areas of Affluence: A Preliminary Investigation. University of Minnesota.

CITY OF SAN MATEO 2040 GENERAL PLAN HOUSING ELEMENT

White Majority Tracts

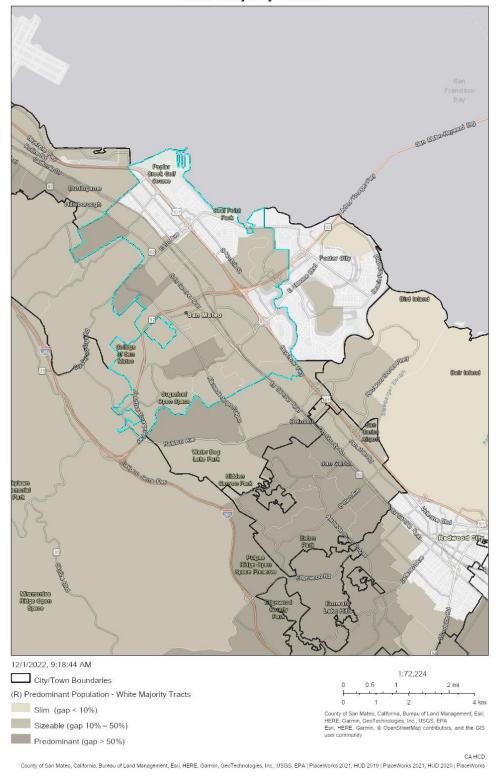

Figure 16: White Majority Tracts

Page H-D-46

The western portion of the City of San Mateo is identified as an RCAA and marks the beginning of a stretch of RCAAs all the way to the Pacific Ocean. There is noticeable overlap between the white-majority tracts and RCAAs given that its measurement includes white populations over 80%. RCAAs further distinguish these areas as both white and affluent. The table below shows median income by race and the population distribution in the City of San Mateo and San Mateo County. White households have slightly higher incomes than households overall. Black and Hispanic households have significantly less income than households overall. In the City of San Mateo, there is a \$43,115 gap between Hispanic households and households overall. This is concerning from a housing affordability standpoint. There must be a broad spectrum of housing prices to sustain diversity in both the City and County of San Mateo.

Table 5: Race, Population, and Median Income

	City of San	Mateo	San Mateo County			
Race/ Ethnicity	Median Income	Population	Median Income	Population		
White	\$125,086	41%	\$127,921	39%		
Hispanic	\$81,427	25%	\$79,761	24%		
Asian	\$142,083	26%	\$141,341	27%		
Black	\$86,818	2%	\$70,519	6%		
Two or more races	\$139,937	6%	\$119,801	5%		
All Households	\$124,842	100%	\$122,641	100%		

Source: ACS 2019 5-year data in 2019 inflation adjusted dollars.

On the census tract level, RCAAs have less households in poverty than non-RCAAs. The tables below compare the white population, income, and number of households below poverty. The maximum number of those under poverty level is 207 in census tracts near the City. The maximum number in non-RCAAs is 1,426 in census tract 6062 in the City of San Mateo. It is likely that those below poverty level cannot access housing in RCAA tracts and therefore congregate in the tracts with the most affordable housing.

6. SECTION III. ACCESS TO OPPORTUNITY

This section discusses disparities in access to opportunity among protected classes including access to quality education, employment, transportation, and environment.

Access to Opportunity

"Access to opportunity is a concept to approximate place-based characteristics linked to critical life outcomes. Access to opportunity oftentimes means both improving the quality of life for residents of low-income communities, as well as supporting mobility and access to 'high resource' neighborhoods. This encompasses education, employment, economic development, safe and decent housing, low rates of violent crime, transportation, and other opportunities, including recreation, food and healthy environment (air, water, safe neighborhood, safety from environmental hazards, social services, and cultural institutions)."

Figure 18: Access to Opportunity Definition

Source: California Department of Housing and Community Development Guidance, 2021, page 34.

Local knowledge: resident survey questions about access to opportunity. Residents were asked about several resources that would improve their living situation in the survey conducted to support this AFFH. When asked what type of help they need to **improve their housing security**, top answers where:

Help me with a down payment/purchase (35%);

Help me with the housing search (26%); and

Help me get a loan to buy a house (24%).

When asked what type of help they need to improve their neighborhood, top answers where:

Better lighting (34%);

Improve street crossings (29%); and

Reduce crime (27%).

When asked what type of help they need to improve their health, top answers where:

Make it easier to exercise (40%);

More healthy food (37%); and

Better/access to mental health care (23%).

When asked what type of help they need to improve their job situation, top answers where:

Increase wages (46%);

Find a job near my apartment/house (26%); and

Help paying for college (20%).

When asked what type of help they need to improve children's education, top answers where:

Stop bullying/crime/drug use at school (26%);

Make school more challenging (25%); and

Have more activities afterschool (24%).

The California Tax Credit Allocation Committee (TCAC) in collaboration with HCD developed a series of opportunity maps that help to identify areas of the community with good or poor access to opportunity for residents. These maps were developed to align funding allocations with the goal of improving outcomes for low-income residents—particularly children.

The opportunity maps highlight areas of highest resource, high resource, moderate resource, moderate resource (rapidly changing), low resource and high segregation and poverty. TCAC provides opportunity maps for access to opportunity in quality education, employment, transportation, and environment. Opportunity scores are presented on a scale from zero to one and the higher the number, the more positive the outcomes.

6.1 Education

TCAC's education score is based on math proficiency, reading proficiency, high school graduation rates, and the student poverty rate. According to TCAC's educational opportunity map, most Census Tracts in the City of San Mateo score between 0.5 and 0.75—opportunity scores are presented on a scale from zero to one and the higher the number, the more positive the outcomes. However, there are a handful of Census Tracts **along Highway 101 and the San Francisco Bay** that score between 0.25 and 0.5—meaning they **have lower education scores compared to the rest of the City**. This area also has higher poverty rates, lower economic opportunity scores, and a greater share of minority households compared to the rest of the City.

The attached "Access to Education" (Attachment 4) includes findings from a countywide analysis of access to education and educational outcomes by protected class. Preliminary findings from this analysis are shared below.

According to the Disparate Access to Educational Opportunities Appendix, the City of San Mateo is served by the San Mateo Union High School District and the San Mateo-Foster City Elementary School District. San Mateo Union increased enrollment by 16% from 2010 to 2020 and the elementary district enrollment increased by 1% over the same time. However, **both districts lost students during the COVID pandemic.**

San Mateo Union enrollment by race and ethnicity is similar to the countywide distribution. However, there is a higher proportion of Asian students in San Mateo Union (23% compared to 17% countywide), a smaller proportion of Filipino students (5% compared to 8% countywide) and Hispanic students (32% compared to 38% countywide).

The San Mateo-Foster City Elementary District has the second highest share of homeless students, with 2% of students experiencing homelessness. The district also has a high share of English learners compared to the countywide proportion (26% compared to 20% countywide). Overall, **the elementary district is more diverse than the countywide average.**

Many high schoolers in the county met admission standards for a University of California (UC) or California State University (CSU) school. Of the high school districts in San Mateo County, Sequoia Union had the highest rate of graduates who met such admission standards at 69% followed by San Mateo Union High with 68%. Pacific Islander, Hispanic, and Black students in the San Mateo Union district were less likely to meet the admission standards, with rates of 29%, 46%, and 46% respectively.

Although San Mateo Union High School has relatively low dropout rates—4% of students—compared to other districts in the county, **dropout rates among Hispanic (7%)**, **Black (6%)**, and **Pacific Islander students are higher**.

6.2 Employment

The top three industries by number of jobs in the City of San Mateo include **professional and managerial services, health and educational services, and arts and recreation services** (Figure III-2 and Figure III-3). The City of San Mateo has a lower job-to-household ratio when compared to the county at 1.45 and 1.59 respectively—which means there are fewer employment opportunities per household in the City of San Mateo (Figure III-4 and Figure III-5). The City also has a slightly lower unemployment rate of 5.2% compared to the county at 5.9% (Figure III-6).

TCAC's economic opportunity score is comprised of poverty, adult educational attainment, employment, job proximity, and median home value. The western portions of the City of San Mateo, adjacent to the City of Hillsborough and Belmont, score more than 0.75 for economic opportunity, whereas tracts in the central City score between 0.5 and 0.75 (Figure III-7). Finally, the **lowest economic opportunity scores** in the City are within tracts **along the waterfront in the northeast area of the City of San Mateo**.

HUD's job proximity index shows the **City of San Mateo is in relatively close proximity to jobs** (Figure III-8). On a scale from zero to 100 where 100 is the closest proximity to jobs the majority of the City scores above 60.

6.3 Transportation

[TCAC's transportation opportunity score and maps were not available at the time of this draft report] This section provides a summary of the transportation system that serves the City of San Mateo and the broader region including emerging trends and data relevant to transportation access in the City. The San Mateo County Transit District acts as the administrative body for transit and transportation programs in the county including SamTrans and the Caltrain commuter rail. SamTrans provides bus services in San Mateo County, including Redi-Wheels paratransit service.

In 2018, the Metropolitan Transportation Commission (MTC), which covers the entire Bay Area, adopted a coordinated public transit and human services transportation plan. While developing the coordinated plan, the MTC conducted extensive community outreach about transportation within the area. That plan—which was developed by assessing the effectiveness of how well seniors, persons with disabilities, veterans, and people with low incomes are served—was reviewed to determine gaps in services in San Mateo and the county overall. Below is a summary of comments relevant to the City of San Mateo and San Mateo County.

"San Mateo's [Paratransit Coordinating Council] PCC and County Health System, as well as the Peninsula Family Service Agency provided feedback. The most common themes expressed had to do with pedestrian and bicycle needs at specific locations throughout the county, though some covered more general comments such as parked cars blocking sidewalk right-of-way and a desire for bike lanes to accommodate motorized scooters and wheelchairs. Transportation information, emerging mobility providers, and transit fares were other common themes.

While some comments related to the use of car share, transportation network companies (TNCs), or autonomous vehicles as potential solutions, other comments called for the increased accessibility and affordability of these services in the meantime."²²

Transit improvements recommended for the City of San Mateo include:

- "More access to the College of San Mateo is needed. There is no direct service to Canada College [from the College of San Mateo] and other local colleges from the Coastside.
- Many sidewalks in the county are uneven and inaccessible to individuals using mobility devices.
- Some people with disabilities need personalized assistance (escort service) that is not available.
- Transfers into San Mateo County [from transit services outside of the county] continue to be very difficult. SFMTA and SamTrans need a cost sharing agreement."

A partnership between the World Institute on Disability and the MTC created the research and community engagement project TRACS (Transportation Resilience, Accessibility & Climate Sustainability). The project's overall goal is to, "stimulate connection and communication between the community of seniors and people with disabilities together with the transportation system– the agencies in the region local to the San Francisco bay, served by MTC."²³

As part of the TRACS outreach process, respondents were asked to share their compliments or good experiences with MTC transit. One respondent who had used multiple services said, **"it is my sense that SamTrans is the best Bay Area transit provider in terms of overall disability accommodation."**

The San Mateo County Transit District updated their Mobility Plan for Older Adults and People with Disabilities in 2018. According to the district, the **county's senior population is expected to grow more than 70% over the next 20 years and the district is experiencing unprecedented increases in paratransit ridership**. The plan is targeted at developing effective mobility programs for residents with disabilities and older adults including viable alternatives to paratransit, partnerships, and leveraging funding sources.²⁴

MTC also launched Clipper START—an 18-month pilot project— in 2020 which provides fare discounts on single transit rides for riders whose household income is no more than double the federal poverty level.²⁵

6.4 Environment

TCAC's opportunity areas environmental scores are based on the CalEnviroScreen 3.0 indicators, which identify areas disproportionately vulnerable to pollution sources such as ozone, PM2.5, diesel PM, , pesticides, toxic release, traffic, cleanup sites, groundwater threats, hazardous waste, impaired water bodies, and solid waste sites.

Generally, all census tracts in the City of San Mateo **score moderate to poorly on environmental outcomes**. Census tracts surrounding Highway 101 and 92 have the lowest environmental scores in the

²² <u>https://mtc.ca.gov/sites/default/files/MTC_Coordinated_Plan.pdf</u>

²³ <u>https://wid.org/transportation-accessibility/</u>

²⁴

https://www.samtrans.com/Planning/Planning and Research/Mobility Plan for Older Adults and People with Disabilities. html

²⁵ <u>https://mtc.ca.gov/planning/transportation/access-equity-mobility/clipperr-startsm</u>

City—primarily due to traffic on the highways, groundwater threats, and impaired water bodies (Figure III-9 and Figure III-10). However, the City scores relatively high compared to other areas of San Mateo County on the California Healthy Places Index (HPI) developed by the Public Health Alliance of Southern California (PHASC) (Figure III-11).

The HPI includes 25 community characteristics in eight categories including economic, social, education, transportation, neighborhood, housing, clean environment, and healthcare.²⁶ The northeast area of the City of San Mateo score the lowest on the HPI (Figure III-11).

6.5 Disparities in access to opportunity

Data show that racial and ethnic minorities are more likely to live in moderate resource areas compared to non-Hispanic White residents (Figure III-12). Nearly half (47%) of the population living in high resource areas are non-Hispanic White, compared to one in three (33%) in moderate resource areas.

Conversely, **Hispanic**, **Asian**, **and Black residents are more likely to live in moderate resource areas**. It is important to note that the City of San Mateo does not include any census tracts that are designated as low resource areas. The share of the population with Limited English Proficiency (LEP) is 8% compared to 7% in the county (Figure III-13).

TCAC's composite opportunity score for the City of San Mateo shows census tracts in the northeast area of the City fall within moderate resource areas while the rest of the City is within high or highest resource areas (Figure III-14). The Social Vulnerability Index (SVI) provided by the Center for Disease Control (CDC)—ranks census tracts based on their ability to respond to a disaster—includes four themes of socioeconomic status, household composition, race or ethnicity, and housing and transportation. Again, the northeast area of the City—encompassing the neighborhoods North Central, Shoreview, and North Shoreview—is most vulnerable according to the SVI (Figure III-15).

The City of San Mateo does not have any disadvantaged communities as defined under SB 535 as, "the top 25% scoring areas from CalEnviroScreen along with other areas with high amounts of pollution and low populations."²⁷ (Figure III-16)

6.6 Disparities specific to the population living with a disability

Nine percent of the population in the City of San Mateo are living with at least one disability, compared to 8% in the county (Figure III-17). The most common disabilities in the City are ambulatory (4.2%), independent living (3.6%), and cognitive (3.5%) (Figure III-18).

Of residents with a disability responding to the residents' survey, 30% said that their home does not meet the needs of their household member.

²⁶ <u>https://healthyplacesindex.org/about/</u>

²⁷ https://oehha.ca.gov/calenviroscreen/sb535

Disability

"Disability types include hearing difficulty, vision difficulty, cognitive difficulty, ambulatory difficulty, self-care difficulty, and independent living difficulty."

Figure 19: Disability

Source: California Department of Housing and Community Development Guidance, 2021, page 36.

For the population 65 and over, the share of the population with an ambulatory or independent living difficulty increases (Figure III-19). As mentioned above under access to transportation, San Mateo County is rapidly aging; therefore, this population with a disability is likely to increase.

Unemployment is disproportionately high among residents living with a disability with an unemployment rate of 12%, compared with 3% for residents without a disability in the City of San Mateo—particularly when compared to the county where the disparity is not as high. Countywide, the unemployment rate for residents with a disability is 4%, compared to 3% for residents without a disability (Figure III-20). High unemployment rates among this population points to a need for increased services and resources to connect this population with employment opportunities.

Residents living with a disability are primarily concentrated geographically along the Highway 101 corridor (Figure III-21).

7. SECTION IV. DISPROPORTIONATE HOUSING NEEDS

This section discusses disparate housing needs for protected classes including cost burden and severe cost burden, overcrowding, substandard housing conditions, homelessness, displacement, and other considerations.

Disproportionate Housing Needs

"Disproportionate housing needs generally refers to a condition in which there are significant disparities in the proportion of members of a protected class experiencing a category of housing need when compared to the proportion of members of any other relevant groups, or the total population experiencing that category of housing need in the applicable geographic area. For purposes of this definition, categories of housing need are based on such factors as cost burden and severe cost burden, overcrowding, homelessness, and substandard housing conditions."

Figure 21: Disproportionate Housing Needs definition

Source: California Department of Housing and Community Development Guidance, 2021, page 39.

7.1 Housing Needs

Population growth in the City of San Mateo has generally kept up with the pace of growth countywide, except the City did not lose population during the great recession whereas the county did (Figure IV-1). Population growth slowed again from 2019 to 2020, likely due to the emergence of the COVID-19 pandemic in the Spring of 2020.

Since 2015, the housing that has received permits to accommodate growth has largely been priced for above moderate-income households, with 1,545 units permitted for above moderate-income households compared to 94 permits for moderate income households; 59 permits for low-income households; and 126 permitted for very low-income households (Figure IV-2). The Housing Needs Data Report for the City of San Mateo indicates new construction has not kept pace with demand throughout the Bay Area, "resulting in longer commutes, increasing prices, and exacerbating issues of displacement and homelessness." ²⁸

The variety of housing types available in the City in 2020 are predominately single family (44%) and medium to large scale multifamily (39%). From 2010 to 2020, the multifamily inventory increased more than single family, and the City has a greater share of multifamily housing compared to other communities in the region.²⁹

The majority of the housing inventory in the City of San Mateo was constructed from 1940 to 1980 (Figure IV-3). As such, the City's units are older, lack energy efficiency, could be costly to adapt for disability accessibility, and may have deferred maintenance if households cannot afford to make improvements.

Compared to San Mateo County, the City's owner-occupied housing market has a greater share of units priced between \$1 and \$1.5 million—29% of units in the City fall within this price range compared to 23%

²⁸ Housing Needs Data Report: San Mateo, ABAG/MTC Staff and Baird + Driskell Community Planning, 2021.

²⁹ Housing Needs Data Report: San Mateo, ABAG/MTC Staff and Baird + Driskell Community Planning, 2021.

in the county (Figure IV-4). Conversely, units priced above \$2 million make up a smaller proportion of the City's housing stock compared to the county with 14% and 19% respectively. According to the Zillow home value index, home prices have experienced remarkable growth in the City and county (Figure IV-5).

Rents have increased at a slower pace compared to the for-sale market—however, median rents increased more rapidly from 2017 to 2019 (Figure IV-7). Rent increases have likely been dampened by the COVID-19 pandemic. Compared to the county, the **City of San Mateo has more luxury rental units**—27% of units rent for more than \$3,000 in the City compared to 22% in the county (Figure IV-6).

7.2 Cost Burden and Severe Cost Burden

Nearly half of all renter households in the City of San Mateo are cost burdened—spending more than 30% of their gross income on housing costs—and one in four are extremely cost burdened—spending more than 50% of their gross income on housing costs (Figure IV-9). Cost burdened households have less money to spend on other essentials like groceries, transportation, education, healthcare, and childcare. Extremely cost burdened households are considered at risk for homelessness.

A greater portion of households in the City of San Mateo (39%) struggle with cost burden compared to the county (37%) (Figure IV-8). Lower income households are more likely to experience housing cost burden. Nearly three out of every four households earning less than 30% AMI—considered extremely low-income households—are severely cost burdened, compared to only 1% of households earning more than 100% of AMI Even in the second highest income category, almost one-third of households are cost burdened.

Figure 22: Cost Burden by Income Level

Source: ABAG HESS Tool and Root Policy Research.

There are **disparities in housing cost burden in the City of San Mateo by race and ethnicity and family size**. Black or African American (59%) and Hispanic households (55%) experience the highest rates of cost burden in the City. Non-Hispanic households of other races (28% cost burdened), Asian households (33%), and non-Hispanic White households (34%) experience the lowest cost burden (Figure IV-11).

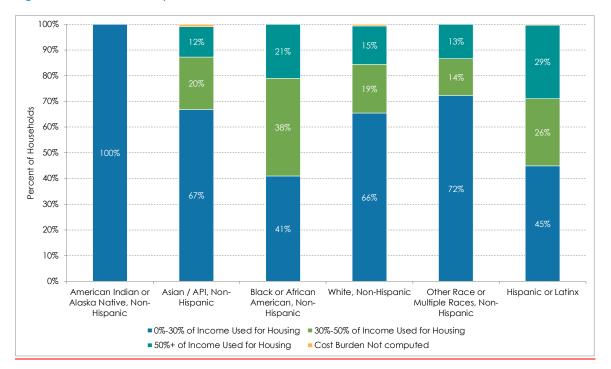

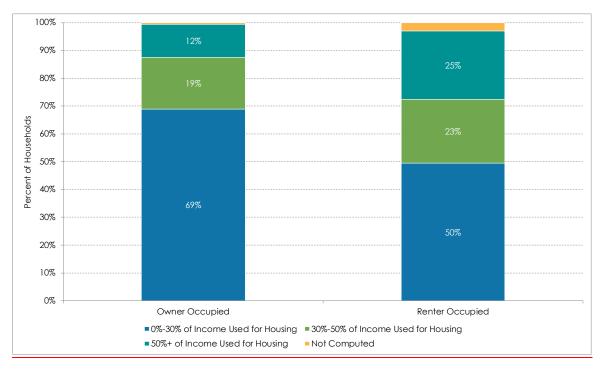

Figure 23: Cost Burden by Race

Source: ABAG HESS Tool and Root Policy Research.

Large family households—considered households with five or more persons—experience cost burden at a rate of 46% compared to all other households at 37% (Figure IV-12). Cost burdened households are primarily concentrated along the waterfront and Highway 101 (Figure IV-13 and Figure IV-14).

Renter occupied households are more likely to be cost burdened compared with owner occupiers. 48% of renters are cost burdened compared with 31% of owner occupiers. Owners tend to have more income, and as previously established, those in high AMI categories pay less housing costs as a proportion of income. As revealed in discussion regarding RCAAs, Hispanic and Black households have substantially less income than white households and therefore are more likely to be cost-burdened.

Figure 24: Cost Burden by Tenure

Source: ABAG HESS Tool and Root Policy Research.

<u>Cost burden is concentrated geographically in the City of San Mateo. Census tracts with higher rates of cost burden also align with previous maps that show concentration of disability and female-household head status. Cost burden for renters is more severe, with more census tracts showing 60-80% renters in the Northeast tracts facing housing cost burden. There are no tracts showing 60-80% of homeowners are rent burdened.</u>

Cost Burdened Homeowners

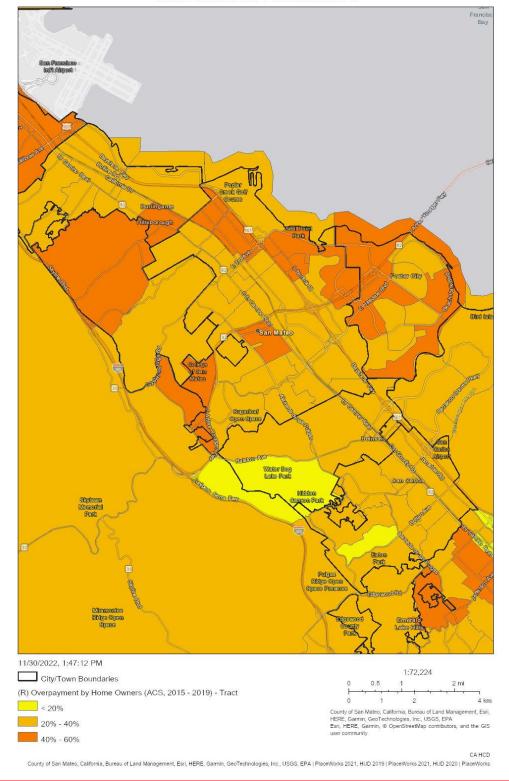

Figure 25: Cost Burdened Homeowners

CITY OF SAN MATEO 2040 GENERAL PLAN HOUSING ELEMENT

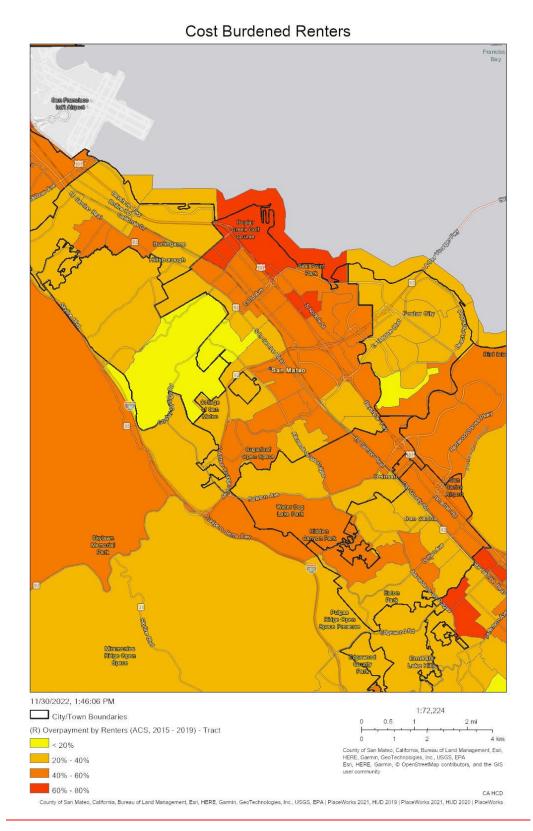

Figure 26: Cost Burdened Renters

7.3 Overcrowding

The vast majority of households (93%) in the City of San Mateo are not overcrowded—indicated by more than one occupant per room (Figure IV-15). However, renter households are more likely to be overcrowded with 13% of households with more than one occupant per room compared to 2% of owner households (Figure IV-16).

The resident survey shows higher needs: 26% of respondents said that their house or apartment isn't big enough for their family members.

Racial and ethnic minorities are more likely than non-Hispanic White households to experience overcrowding. Other races (27% of households), Hispanic households (26%), and American Indian or Alaskan Native households (12%) experience the highest rates of overcrowding (Figure IV-17). Low- and moderate-income households are also more likely to be overcrowded (Figure IV-18).

Geographically, overcrowded households are concentrated in the same areas as cost burdened households, along the waterfront and Highway 101 (Figure IV-19). <u>This could indicate that people are attempting to save on housing by splitting costs with more roommates or family members.</u>

7.4 Substandard Housing

Data on housing condition are very limited, with the most consistent data available across jurisdictions found in the American Community Survey (ACS)—which captures units in substandard condition as self-reported in Census surveys. In the City of San Mateo, renter households are also more likely to have substandard kitchen and plumbing facilities compared to owner households. Generally, a low share of households are lacking kitchen or plumbing. For renters, 1.3% are lacking kitchen facilities while less than one percent are lacking plumbing. For owners, less than one percent are lacking either kitchen or plumbing facilities (Figure IV-20).

In the City, 20 to 40% of all households that suffer from severe overcrowding, severe cost burden, or an incomplete kitchen or plumbing. Any of the four severe housing problems place households at risk of displacement and adverse physical and mental health. Regionally, the City of San Mateo is surrounded by municipalities with less than 20% of households with substandard housing issues. It is plausible that the high Hispanic population relative to other surrounding census tracts is behind the concentration. This population is more likely to rent and live in multigenerational homes. Both can be factors that indicate substandard and overcrowding conditions. While some tracts in the City of San Mateo likely offers refuge for low-income renters who cannot afford other areas of the County, it is important to note that substandard housing conditions place residents at risk of displacement from the City, as discussed in the following section.

CITY OF SAN MATEO 2040 GENERAL PLAN HOUSING ELEMENT

Substandard Housing

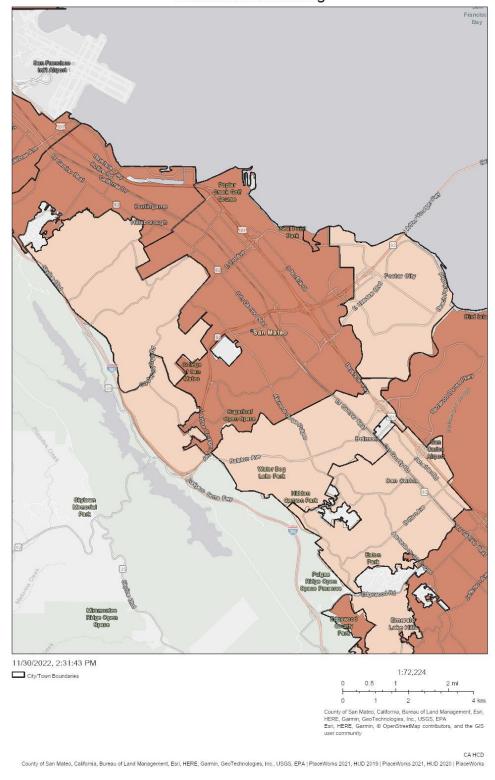

Figure 28: Substandard Housing

Page H-D-66

7.5 Homelessness

In 2019, 1,512 people were experiencing homelessness in the county (74 people in the City of San Mateo) during the One-Day Count, with 40% of people in emergency or transitional shelter while the remaining 60% were unsheltered. The majority of unsheltered people experiencing homelessness were in households without children. The majority of people in transitional housing were in households with children (Figure IV-21).

People who identify as American Indian or Alaskan Native (6% of the homeless population compared to less than 1% of the total population), Black (13%, 2%), White (67%, 51%), and Hispanic (38%, 28%) are overrepresented in the homeless population compared to their share of the general population (Figure IV-22 and Figure IV-23). People struggling with chronic substance abuse (112 people), severe mental illness (305), and domestic violence (127) represented a substantial share of the homeless population in 2019 (Figure IV-24).

7.6 Displacement

Owner households generally experience a greater amount of housing stability whereas renter households are more mobile (i.e., move more frequently). Households in the City were more likely to have moved in the past year compared to the households in the county (14% compared to 12% in the county) (Figure IV-25 and Figure IV-26).

In the City of San Mateo **10% of income assisted rental units are at high or very high risk for displacement**, a total of 72 out of 702 total units in the City. In San Mateo County, 417 units are at risk— 8% of the total assisted housing units in the county (Figure IV-27).

Displacement Sensitive Communities

"According to the Urban Displacement Project, communities were designated sensitive if they met the following criteria:

They currently have populations vulnerable to displacement in the event of increased redevelopment and drastic shifts in housing cost. Vulnerability is defined as:

- Share of very low-income residents is above 20%, 2017
- AND
- The tract meets two of the following criteria:
 - Share of renters is above 40%, 2017
 - Share of people of color is above 50%, 2017
 - Share of very low-income households (50% AMI or below) that are severely rent burdened households is above the county median, 2017
 - They or areas in close proximity have been experiencing displacement pressures.
 Displacement pressure is defined as:
 - Percent change in rent above county median for rent increases, 2012-2017

OR

Difference between tract median rent and median rent for surrounding tracts above median for all tracts in county (rent gap), 2017"

Figure 29: Displacement Sensitive Communities

Source: https://www.sensitivecommunities.org/.

The resident survey conducted for this study found that 31% of residents in the City of San Mateo have been displaced in the past 5 years. The top reason for displacement was "*Rent increased more than I could pay*" (42%).Sixteen census tracts in the City are currently vulnerable to displacement—these same Tracts have high shares of renter households (Figure IV-28). The map below shows the concentration of sensitive communities. To the west of the City of San Mateo, there are few communities at risk of displacement. This does not indicate that there are adequate resources for those of all income groups, but rather that these communities are not obtainable to those with less resources.

Analysis of the factors contributing to displacement. As the resident survey indicated, wages have not kept pace with housing costs in the City. The COVID-19 pandemic highlighted how quickly employment and income status can change; those who are not able to save because of housing cost burden are far more likely to be involuntarily displaced from their homes. Those who live in substandard housing also likely live in properties with low appraised value. This puts them at risk of displacement as developers look for cheap land to build profitable, expensive housing.

<u>A</u>reas of the City with the highest cost burden and overcrowding—along the waterfront—are included in the Special Flood Hazard Areas determined by the Federal Emergency Management Agency (FEMA) as having a 1% chance of flooding annually (Figure IV-29, IV-30, and IV-31). ³⁰ <u>As such, displacement</u> caused by flooding is a very unlikely event. Increased rent is a much more significant factor.

Instead, future displacement is more likely a factor of rents rising faster than incomes and a very limited supply of affordable units. Developing additional affordable and income-targeted units in displacement sensitive areas is the surest method of mitigating continued displacement pressure.

³⁰The analysis in this section is based on displacement data provided by ABAG, which includes only current and future displacement risk, rather than a historical analysis of changes in these populations by Census tract. Therefore, it is presumed that there has been displacement of lower income and minority populations over time in the past. For example, according to Census data, one particular tract in North Central was 18% African American in 1990, but by 2017 that tract's African American population was reduced to just 4%.

Sensitive Communities

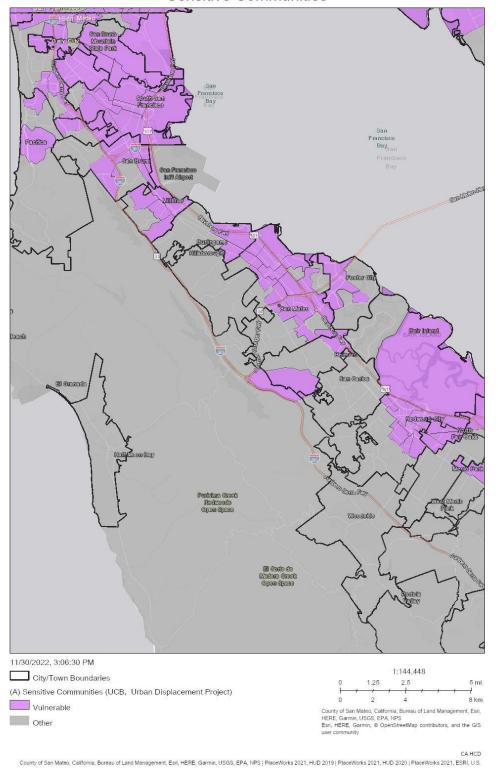

Figure 30: Sensitive Communities

Access to mortgage loans. Disparities by race and ethnicity are also prevalent for home mortgage applications, particularly in denial rates (Figure IV-32). Hispanic (32% denial rate) and American Indian or Alaska Native households (27%) had the highest denial rates for mortgage loan applications in 2018 and 2019. Conversely, non-Hispanic Asian (17%), Black (18%), and White households (19%) have the lowest denial rates during the same time (Figure IV-33).

8. SITE INVENTORY ANALYSIS

AB 686 requires an analysis of sites identified to meet RHNA obligations for their ability to affirmatively further fair housing.

This supplement provides a summary of the data available through ABAG's HESS mapping tool for evaluating the fair housing impacts of the RHNA sites chosen.

8.1 Segregation and Integration

This section summarizes the distribution of RHNA units in the City of San Mateo by income target in relation to four factors of segregation including household income, people of color, households with a disability, and households with children. The following figures show the share of units by income within areas that have a concentration of household types compared to the Citywide rate.

- Table 1 shows how many units are allocated to areas of the City (census tracts) with a share of Low-Moderate Income (LMI) households (earning less than 80% AMI) greater than or less than the Citywide rate of 41% of households. Generally, proposed units are split between areas with a greater than average share of LMI households with 45% of units compared to areas with a lower than average share with 47% of proposed units. <u>The equal share of units across above and below</u> LMI areas does *not* exacerbate concentrations of low income units in low income areas.
- 2) Table 2 shows how many units are estimated in areas of the City with a percent of the population that identified as a Person of Color (non-White population) greater than and less than the Citywide share of 59% of the population. Again, units are roughly split between 48% of units in areas with a concentration of People of Color and 44% of proposed units in areas with a lower share of People of Color. Units are equally distributed among areas where people of color are located which should mitigate exacerbating concentrations. Low income units are more likely to be located in areas with a greater than citywide rate of people of color, although the difference is low. Although the types of households who will occupy units is speculative, the City will work with developers to embrace best practices in affirmative marketing to facilitate occupancy in locations that are preferred by people of color including areas with established historical cultural histories and affinities.
- 3) Table 3 shows the share of the proposed units that are located in areas with a concentration of population with a disability compared to the Citywide rate of 9% of the population living with a disability. Most units (71%) are located in areas of the City with a concentration of residents living with a disability.
- 4) Table 4 shows how many units are allocated to areas of the City with a greater share of households with children compared to the Citywide rate of 30% of households. Most units (61%) are not within areas with a concentration of households that have children. Only 31% of proposed units are located in areas with a concentration of families with children.

8.2 Disparities in Access to Opportunity

This section summarizes the distribution of RHNA units in the City of San Mateo by income target by TCAC defined resource areas.

5) Table 5 shows the proposed units by TCAC resource areas including moderate, high, and highest resource areas in the City of San Mateo. The vast majority of units (87%) are in moderate resources areas compared to high (5%) or highest (<1%) resource areas. There are no low resource areas in the City of San Mateo.

8.3 Disproportionate Housing Needs

This section summarizes the distribution of RHNA units in the City of San Mateo by income target based on three indicators of disproportionate housing needs including housing cost burden, overcrowding, and displacement risk.

- 6) Figure 6 shows the estimated share of units in areas of the City with a higher rate of cost burden among households compared to the Citywide rate of 39%. Almost all of the units (90%) are proposed in areas of the City with a lower than average rate of housing cost burden.
- 7) Figure 7 shows the proposed share of units in areas of the City with a higher or lower rate of overcrowding compared to the Citywide rate of 7%. Again, almost all of the proposed units (92%) are in areas that have lower than average rates of overcrowding.
- 8) Figure 8 shows the estimated share of units by displacement risk. Most units (60%) are within areas that are at risk of becoming exclusive or already exclusive. The remaining units (32%) are in

moderate or mixed stable neighborhoods and less than 1% are in stable or advanced exclusive neighborhoods.

9. CONTRIBUTING FACTORS AND FAIR HOUSING ACTION PLAN

Based on the research and analysis above, Attachment 1 – Fair Housing Action Plan contains the specific actions the City will take to address AFFH concerns throughout the community.

APPENDIX D | Attachment 1 – Fair Housing Action Plan

APPENDIX D	Attachment 1 – Fair Housin	ig Action Plan							
Actions	Fair Housing Issues	Contributing Factors	Fair Housing Category	Action	Type of Action	Responsible Party	Objectives	Quantified Objectives	Timeline
Action Area 1. Enhancing housing mobility strategies: control of the state of th	Hispanic and single female parent households are concentrated in low opportunity census tracts.	of opportunity and strategically enhan Lack of affordable housing in high opportunity areas; Lack of accessible affordable units	Disparities in access to	Assist in development of housing for low income households and households with special needs	Land use resources	City of San Mateo	Expand the variety of housing units produced under the inclusionary housing program. Currently developments of 11 or more units require 15% affordable to moderate income families for ownership and 15% for low income families for renters	Perform a feasibility analysis to redesign the program to allow a menu of options. Ensure analysis includes review housing for households with disproportionate housing needs, along with income levels. This item is connected to Policy H 1.3, Policy H 1.5., Policy H 1.14, and Policy H 1.15.	Complete feasibility analys by Fall 2023; Implement redesigned program by Sp 2024.
Action 1.2: Participate in a regional downpayment assistance program with affirmative marketing to households with disproportionate housing needs including persons with disabilities, single parents, and Hispanic households (e.g., Spanish and English, targeted to northeast neighborhoods).	Hispanic households have disproportionate housing needs.	Historic discrimination and continued mortgage denials; Concentration in low opportunity census tracts; High housing costs and low wages	Disparities in access to opportunities	Promote equal housing opportunity	Financial resources	Regional Partnership with HEART (San Mateo County has program with them)	Improve accessibility to home mortgage s loans for Hispanic households who have the highest loan denial rates. Provide wealth building through homeownership for moderate income households.	20 Hispanic households; Provide down payment assistance to 30 total households; Provide homebuyer education to 200 households. In addition, the City will work with other jurisdictions	Meet quantified objectives the end of the Housing Element period in 2031; Conduct homebuyer/outrea and education quarterly in partnership with HEART
Action 1.3: Support the design a regional forgivable loan program for homeowners to construct an ADU that is held affordable for extremely low income households for 15 years.	Hispanic and single female parent households are concentrated in low opportunity census tracts.	Lack of affordable housing in high opportunity areas; Lack of accessible affordable units	Disparities in access to opportunities	Incentivize accessory dwelling units (ADUs)	Land use resources	21 Elements/HEART	Increase opportunities for lower-income households to find housing that is affordable.	Design a regional loan forgiveness program. Ensure that programs target/affirmatively market to households in impacted neighborhoods, including North Central and North Shoreview, among others. Target those with disproportionate housing needs, with a goal to reach 5 households annually. This item is connected to Policy H 1.4.	Begin design in Summer 20; and complete by winter 202
Action Area 2. Encouraging new housing choices and affor Action 2.1: Add more city supported housing with affordability restrictions in moderate and high resource areas. Affirmatively market the housing to households with disproportionate housing needs including persons with disabilities, single parents, and Hispanic households ie.g., Spanish and English, targeted to northeast neighborhoods).	rdability in high resource areas: promoting h Hispanic and single female parent households are concentrated in low opportunity census tracts.	ousing supply, choices and affordabilit Lack of affordable housing in high opportunity areas; Lack of accessible affordable units; Concentration of NOAH in low opportunity census tracts.	Disproportionate housing	and outside of areas of concentr Assist in development of housing for low income households and households with special needs	ated poverty. Financial resources	City of San Mateo	Affirmatively market the housing to households with disproportionate housing needs including persons with disabilities, single parents, and Hispanic households (e.g., Spanish and English, targeted identified neighborhoods).		2031 (Annually); as development projects come for approvals/financing
Action 2.2: Incentivize developers through direct subsidies, fee waivers, and/or density bonuses, to increase accessibility requirements beyond the federal requirement of 5% for subsidized developments.	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts.	Disproportionate housing need for low income households and protected classes	Promote equal housing opportunity	Financial resources	City of San Mateo	Increase development of accessible units beyond minimum requirements	 b. Update the City's Inclusionary Housing Policy to require projects that receive City subsidies to 	2023 - 2031 (ongoing) as development opportunities come available. Review developer agreements as projects come in (annually); 2025 - 2026 Draft Update Inclusionary Housing Policy
Action 2.3: Prioritize city funding proposals for city funded affordable housing that are committed to serving hard to serve residents (e.g., extremely low income, special needs, on site services) Action Area 3. Improving place-based strategies to encou	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts.	Disparities in access to opportunity	Promote equal housing opportunity	Financial resources	City of San Mateo	Create more housing for hard to serve households.	program to prioritize City funding for housing projects.	2027 - 2028 Conduct a revie of best practices; and devel a draft program for City Council adoption

Actions	Fair Housing Issues	Contributing Factors	Fair Housing Category	Action	Type of Action	Responsible Party	Objectives	Quantified Objectives	Timeline
Action 3.1: As part of the General Plan, conduct an area plan for the North Shoreview and North Central neighborhoods and prioritize land use and design around Highway 101 to improve access and reduce the division of the urban form produced by the highway.		Lack of affordable housing in high opportunity areas; Lack of accessible affordable units; Concentration of NOAH in low opportunity census tracts.	to opportunities	Conserve and improve the existing affordable housing stock	Land use resources	City of San Mateo	Reduce overcrowding, improve health and safety, and improve mobility and access to services in impacted neighborhoods.	Prepare an area plan for North Shoreview and North Central neighborhoods.	Create plan through the General Plan Update implementation process
Action 3.2: Continue to fund minor home repairs and implement a preference for projects in low opportunity census tracts identified in the analysis.	Hispanic and single female parent households are concentrated in low opportunity census tracts.	Lack of affordable housing in high opportunity areas; Lack of accessible affordable units	Disparities in access to opportunity	Conserve and improve the existing affordable housing stock	Financial resources	City of San Mateo	Fund minor home repairs and accessibility improvements. Provide opportunity for home rehabilitation loans for low income residents. Allow accessibility improvements on rental properties with owner permission.	Complete annual goals of 10 minor home repairs and 14 accessibility modifications through grants for low-income residents. Provide home rehabilitation loans for low- income residents. Affirmatively market to Hispanic and single female heads of household biannually; ensure that programs target/affirmatively market to households in impacted neighborhoods, including North Central and North Shoreview, among others. This item is connected to Policy H2.1 and Policy H2.3.	2023-2031 (Fund Annually; consistent with Policy H2.1; outreach biannually in target neighborhoods)
Action 3.3: Monitor affordable housing projects that are at risk of conversion to market rate. Support regional and local efforts to examine displacement of affordable housing and lower income households. Assist with the retention of special needs housing that is at risk of expiring affordability requirements.	Hispanic households have disproportionate housing needs.	Historic discrimination and continued mortgage denials; Concentration in low opportunity census tracts; High housing costs and low wages		Conserve and improve the existing affordable housing stock	Human resources	City of San Mateo	Monitor affordable units whose subsidies are set to expire within the planning period develop a plan for preservation of the units to keep them affordable long term.	Bridgepointe Condominiums affordability requirements for 59 affordable units expire in 2027, out of which 24 are very low- income units (35 are at 120% AMI). Belmont Building affordability requirements for 6 units expire in 2032. The rental property is owned by a for-profit entity, potential for loss of units is high. Proactively coordinate with owners to preserve the 24 very low- income units as affordable, including identifying potential funding sources, advertise conversion units to non-profits, provide conduct tenant outreach and education, add a displacement preference for new affordable housing for people displaced, including those displaced as a result of conversion. Provide noticing to tenants and affected public entities in accordance with Gov. Code, § 65863.10, 65863.11, and 65863.13 Outreach and negotiate with owners for affordability extensions beginning at least two years prior to the affordability expiration date. This item is connected to Policy H2.2	
Action Area 4. Protecting existing residents from displace	ment: strategies that protects residents in ar	eas of lower or moderate opportunity	and concentrated poverty and	preserves housing choices and	affordability				
Action Atea 4: Frotecting existing residents in local ordinance to extend measures of AB1482 related to relocation, documentation, and right to return policy in eviction cases.	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD. AND Hispanic households have disproportionate housing needs.	Lack of accessible affordable units; Lack of accessible affordable units; opportunity; Concentration in low income and low opportunity census tracts; Historic discrimination and continued mortgage denials; High housing costs and low wages	Disparities in access to	Address governmental and non-governmental constraints	Human resources	City of San Mateo	Increase tenant protections to prevent dislpacement of those with disproportionate housing needs.	 a) Extend AB1482 provisions to require tenant relocation payments for No Fault evictions for those with tenure less than one year. b) Make recommendations to the City Council for establishing tenant protection policies that include the requirement of documentation from landlords who use the substantial remodel exemption to evici tenants and a Right to Return policy for tenants displaced from homes due to demolition or substantial remodels. c) Amend the Code to strengthen enforcement penalty structure to aid in protecting tenants from unsafe or substandard units. This item is connected to Policy H 3.4. 	c) 2023 – 2024; consistent with Policy #H 3.4
Action 4.2: Partner with Project Sentinel to perform fair housing training for landlords and tenants. Focus enforcement efforts on race based discrimination and reasonable accommodations.	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts; Lack of understanding of reasonable accommodation requirements by landlords and property owners.	Outreach capacity and enforcement	Promote equal housing opportunity	Human resources	Project Sentinel	Increase awareness of fair housing laws and tenants' rights to reduce unlawful discrimination and displacement.	Provide annual funding to Project Sentinel to provide training every two years in the Spring, targeting 200 landlords each training. Awareness will be increased through outreach to landlords.	Annually as part of CDBG allocation in the spring

Actions	Fair Housing Issues	Contributing Factors	Fair Housing Category	Action	Type of Action	Responsible Party	Objectives	Quantified Objectives	Timeline
Action 4.3: Create a webpage specific to fair housing including resources for residents who feel they have experienced discrimination, information about filing fair housing complaints with HCD or HUD, and information about protected classes under the Fair Housing Act.	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD.	· · · · · · · · · · · · · · · · · · ·	Outreach capacity and enforcement	Promote equal housing opportunity	Human resources	City of San Mateo	Increase awareness of fair housing laws and tenants' rights to reduce unlawful discrimination and displacement.	Provide information on the City's website about housing discrimination, laws, and protections. Update the webpage every two years, along with other transparency updates.	2024 and bi-annually thereafter; consistent with general Policy# H3.4
Action 4.4: Ensure that all multifamily residential developments contain signage to explain the right to request reasonable accommodations for persons with disabilities. Make this information available and clearly transparent on the city's website and fund landlord training and outreach on reasonable accommodations.	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts; Lack of understanding of reasonable accommodation requirements by landlords and property owners.	Outreach capacity and enforcement	Promote equal housing opportunity	Human resources	City of San Mateo	Increase awareness of fair housing laws and tenants' rights to reduce unlawful discrimination and displacement.	Initially, create ongoing condition of approval to ensure both BMR and all-affordable developments contain this information. Explore options for recording against the property and/or including in the affordable housing agreement.	Create ongoing conditions of approval by fall 2024; conduct best practices review on options to record reasonable accommodation language by January 2025, and implement a program by January 2026
Action 4.5: Ensure that future improvements in disadvantaged communities will not produce a net loss of affordable housing or the displacement of residents and seek to increase the amount of affordable housing in disadvantaged communities. (NOTE: New action to address Environmental Justice)		Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts; Lack of investment in older housing stock.	Disparities in access to opportunity	Promote equal housing opportunity	Human resources	City of San Mateo	Ensure that lower-income and protected class households are not displaced becaise of community improvements	In collaboration with nonprofit and for-profit housing developers, study the feasibility of collaborating with the Northern California Land Trust, or establishing a new community land trust, that will support long-term community ownership and housing affordability in disadvantaged communities. Implement findings as part of the General Plan Update.	To be completed as part of the larger General Plan Update, with the expected date of completion by 20217

ABAG tracked thirty housing policy and program types that represent the most prevalent and important strategies for fostering development of both market rate and affordable housing units. ABAG Staff compiled a summary of policies adopted by each jurisdiction based on the jurisdiction's certified 2007-2014 housing element, and sent the summary to local staff for verification. We have indicated instances in which we were not able to verify or obtain information.

Legend: W: The policy or program is ournerfly in effect in the jurisdiction N: The policy or program is not in effect in the jurisdiction VG: The policy or program is currently under consideration by the jurisdiction NA: Indicates information was unwalked for jurisdiction

APPENDIX D | Attachment 3 – Access to Educational Opportunities

This section examines the extent to which members of protected classes and those in poverty experience disparities in access to opportunity as measured by access to education. This section draws from data provided by the San Mateo Office of Education, the California Department of Education, and U.S. Census American Community Surveys (ACS). This section discusses the following topics:

- Changes in school enrollment during COVID-19 by race and ethnicity, and by groups with extenuating circumstances;¹
- Achievement gaps by race and ethnicity and for groups with extenuating circumstances as measured by test scores, California State University or University of California admissions standards, and college-going rates;
- Barriers to success measured by chronic absenteeism, dropout rates, and suspension rates.

After describing this section's primary findings, we describe the county's school districts before launching into data measuring achievement gaps and barriers to success.

Primary Findings

Student racial and ethnic diversity is modestly increasing. Student bodies in San Mateo County have become increasingly racially and ethnically diverse.

- Hispanic students make up the largest ethnic group in the county's schools, representing 38% of students in the 2020-2021 academic school year. This a slight increase from the 2010-2011 school year, where Hispanic students made up 37% of the population.
- There has been a large increase in Asian students, with 17% identifying as such in 2020-2021, an increase of 5 percentage points from 2010-2011.
- Students identifying as White (26%) have decreased by 3 percentage points since 2010-2011.

Free and reduced lunch-qualifying students and English language learners are concentrated in a handful of schools. Overall, 29% of public school students in San Mateo County qualify for reduced or free lunch.

- The rate of reduced lunch qualification was highest in Ravenswood City Elementary School District, where 83% of students qualify for reduced lunch. Also in Ravenswood City Elementary, 30% of students are experiencing homelessness. This is a large outlier in the county, where overall just 2% are experiencing homelessness.
- Countywide, 20% of public school students are English learners. Again, this rate is highest at Ravenswood City Elementary, where 53% of students are English learners. La Honda-Pescadero

¹ The term "extenuating circumstances" is used in this section to capture students whose socioeconomic situations and/or disability may make standard educational environments challenging.

Unified School District, Jefferson Union High School, and Redwood City Elementary also have high rates of English learners, representing more than a third of students.

Enrollment is dropping. Public school enrollment reduced substantially in some areas during the pandemic. Total enrollment decreased by 3% between 2019-2020 and 2020-2021 in San Mateo County, which was the largest decrease of the decade.

- Portola Valley and La Honda-Pescadero school districts had the largest enrollment decreases during COVID-19, with a 11% and 10% decline in enrollments, respectively.
- Decreased enrollment was especially common among Pacific Islander students. Between 2019-2021, enrollment among Pacific Islander students decreased by 6% (from 1,581 students in 2019-20 to 1,484 students in 2020-21), substantially higher than the 3% countywide average.
- Enrollment among migrant students decreased drastically by 16% over the same period (from 332 students to 279 students).

Learning proficiency is improving yet disparities exist. Across all racial and ethnic groups, the rate at which students met or exceeded English and mathematics testing standards has increased since the 2014-2015 school year. Students with extenuating circumstances (i.e., disability, facing homelessness, learning English) tend to score lower on English and mathematics tests than the overall student body.

- Proficiency gaps are especially pronounced among English learning students in Portola Valley Elementary, Woodside Elementary, Menlo Park City Elementary, and Brisbane Elementary, where students with extenuating circumstances met or exceeded mathematics test standards at a rate at least 50 percentage points below the overall test rate in each district.
- Students with disabilities in San Carlos Elementary and Las Lomitas Elementary school districts scored far below the overall student body: In these districts, students with disabilities met or exceeded mathematics test standards at 54 percentage points below the overall test rate.

Many students meet admissions standards for CSU or UC schools.

- Among the high school districts in San Mateo County, Sequoia Union had the highest rate of graduates who met such admission standards, at 69%. On the other end of the spectrum, Cabrillo Unified and South San Francisco Unified had the lowest rates at 41%.
- Jefferson Union High School District had the most drastic increase in the share of graduates meeting CSU or UC standards: just 21% of students met these standards in 2016-2017 compared to 48% of students in 2019-2020. La Honda-Pescadero Unified School District experienced a 10 percentage point increase in this success rate over the same period.

Most school districts in the county have a college-going rate at 70% or higher—yet there are wide gaps by race and ethnicity.

In every district, White students have a higher college-going rate than Hispanic students, but the largest gaps are in South San Francisco United, where 91% of White students go to college compared to just 68% of Hispanic students—a 23 percentage point gap.

Students with extenuating circumstances are highly concentrated in a few schools and move schools often due to housing instability.

- Students with extenuating circumstances may need additional resources—e.g., onsite health care, free meals, tutoring—to be successful in school. When these students are concentrated into a few schools, the schools bear an unequal responsibility for providing needed resources. K-12 school funding in California has long been inadequate, and, although policymakers have recently allocated additional resources to schools with high proportions of low income children under a "concentration grant" system, funding gaps remain.
- The highest concentration of high needs students is found in Ravenswood City Elementary, where 30% of all students are experiencing homelessness and 83% qualify for free and reduced lunch.
- Currently, students whose families have been evicted do not have protections allowing them to remain in their current school district. This can result in frequent changes in schools for low income children, raising their vulnerability to falling behind in school.

Absenteeism, dropout rates, and discipline rates are highest for students of color, students with disabilities, and students with other extenuating circumstances. While 10% of students were chronically absent during the 2018-2019 school year, chronic absenteeism rates were higher in districts with a large number of students experiencing economic and housing precarity.

- For instance, Ravenswood Elementary, which has a 30% rate of homelessness among students, had one of the higher rates of chronic absenteeism at 16%.
- Pacific Islander students (26%), Black/African American students (18%), and Hispanic students (15%) had notably higher rates of chronic absenteeism than the overall student population (10%).
- In most districts, chronic absenteeism is higher among students with disabilities. In fact, only Bayshore Elementary's students with disabilities had a lower rate of chronic absenteeism than the overall student body.

Dropout rates vary across the county:

- Dropout rates were highest in Sequoia Union High School District (10%) and South San Francisco Unified (9%).
- In all school districts in the county, dropout rates are higher for boys than for girls.
- Pacific Islander, Black/African American, and Hispanic students in the county often had higher dropout rates than those in other racial and ethnic groups
- Students with disabilities, students experiencing homelessness, foster youth, and students learning English had higher dropout rates than the overall population.

Discipline rates also vary by area and race and ethnicity.

- In many school districts across San Mateo County, Hispanic students are disciplined at disproportionately higher rates compared to their peers.
- In most districts, Black/African American and Pacific Islander students are also overrepresented in terms of suspension rates, but these rates are slight compared to those of Hispanic students.
- Asian and Filipino students were underrepresented in terms of suspension rates. White students were also underrepresented in discipline rates in most districts except for La Honda-Pescadero.

The demographics of faculty and staff are fairly similar to that of students.

- There is a slightly larger share of White and Black/African American staff than students, meaning that Black/African American and White student groups are more likely to interact with same-race staff and faculty than other racial groups.
- Asian students are less likely to interact with a same-race staff of faculty member: 17% of the student body is Asian compared to just 8% of staff and faculty.

Background

This section describes the school districts in San Mateo County, including their geographic boundaries and a brief history of the school districts' formation. This section also includes details on how districts' enrollments and student demographic have changed over time.

San Mateo County School Districts. There are three unified school districts in San Mateo County which include both elementary and high schools. These are Cabrillo Unified School District, La Honda-Pescadero Unified School District, and South San Francisco Unified School District.

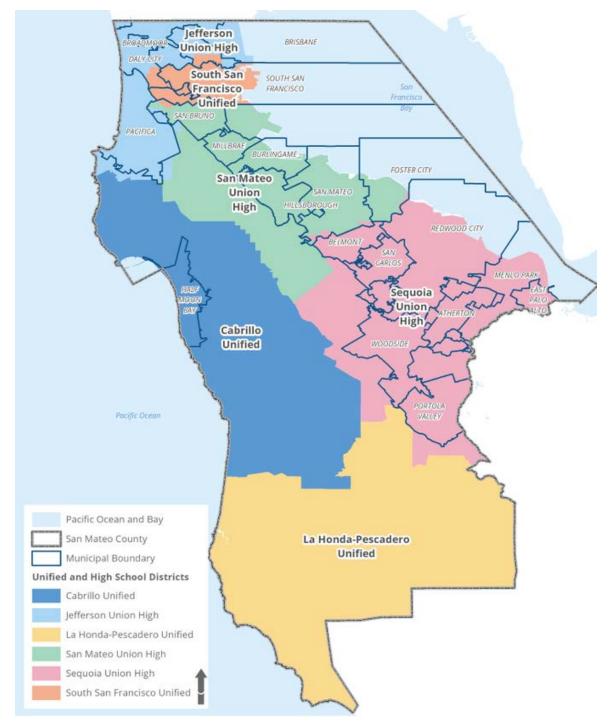

In addition to the unified school districts, there are three high school districts, which include: Jefferson Union High School District, San Mateo Union High School District, and Sequoia Union High School District. The elementary schools covering these high schools' district boundaries areas are described below:

- In the Jefferson Union High School District geographic boundary, elementary school districts are the Bayshore Elementary School District, Brisbane School District, Jefferson Elementary School District, and Pacifica School District.
- Within the San Mateo Union High School District geographic boundary, elementary school districts include San Mateo-Foster City School District, Hillsborough City School District, Burlingame School District, San Bruno Park School District, and Millbrae School District.
- Within the Sequoia Union High School District geographic boundary, the elementary schools include Belmont-Redwood Shores School District, San Carlos School District, Redwood City School District, Ravenswood City School District, Menlo Park City School District, Woodside Elementary School District, Las Lomitas Elementary School District, and Portola Valley School District.

Geographic boundaries of school districts. Figure V-1 illustrates the geographic boundaries of the unified school districts as well as the three high school districts. Municipal boundaries are overlayed on the map.

Figure V-1.

Unified School Districts and High School Districts in San Mateo County

Source: San Mateo County Office of Education.

As illustrated in the map, Cabrillo Unified School District covers Half Moon Bay and some unincorporated areas of San Mateo County. South San Francisco Unified covers South San Francisco and a small portion of Daly City. La Honda-Pescadero Unified School District covers unincorporated areas of San Mateo County.

The other high school districts, Jefferson Union, San Mateo Union, and Sequoia Union, cover the remaining jurisdictions. Jefferson Union covers Brisbane, Colma, Daly City, and Pacifica. San Mateo Union covers Burlingame, Hillsborough, Millbrae, San Bruno, San Mateo City, and Foster City. Sequoia Union covers Atherton, Belmont, Redwood City, East Palo Alto, Menlo Park, San Carlos, Portola Valley, and Woodside.

The county's elementary school districts cover the same areas as the three high school districts. Their geographic boundaries are illustrated in the map below.

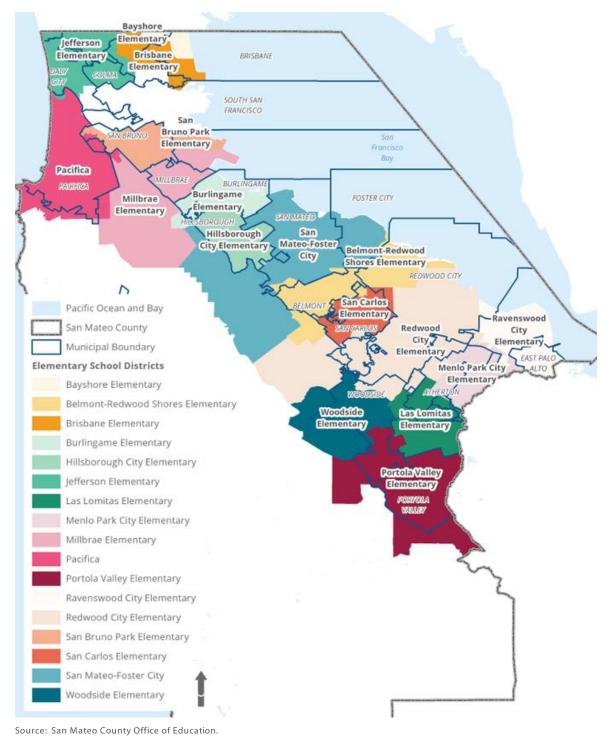

Figure V-2. Elementary School Districts in San Mateo County

Because the elementary school districts are much smaller, many jurisdictions have several elementary schools. The table blow shows each jurisdiction and their associated elementary school.

Jurisdiction	Unified or High School District	Elementary School District(s)
Atherton	Sequoia Union	Menlo Park City ; Las Lomitas Elementary; Redwood City
Belmont	Sequoia Union	Belmont-Redwood Shores
Brisbane	Jefferson Union	Brisbane; Bayshore Elementary
Burlingame	San Mateo Union	Burlingame
Colma	Jefferson Union	Jefferson Elementary
Daly City	Jefferson Union; South San Francisco Unif	e Jefferson Elementary
East Palo Alto	Sequoia Union	Ravenswood City
Foster City	San Mateo Union	San Mateo-Foster City
Half Moon Bay	Cabrillo Unified	(none, included in Cabrillo Unified)
Hillsborough	San Mateo Union	Hillsborough City
Menlo Park	Sequoia Union	Menlo Park City; Las Lomitas Elementary; Ravenswood City
Millbrae	San Mateo Union	Millbrae
Pacifica	Jefferson Union	Pacifica
Portola Valley	Sequoia Union	Portola Valley
Redwood City	Sequoia Union	Redwood City
San Bruno	San Mateo Union	San Bruno Park
San Carlos	Sequoia Union	San Carlos; Redwood City
San Mateo	San Mateo Union	San Mateo-Foster City
South San Francisco	South San Francisco Unified	(none, included in South San Francisco Unified)
Woodside	Sequoia Union	Woodside Elementary; Portola Valley; Las Lomitas; Redwood City

Figure V-3.

School Districts in San Mateo County's Jurisdictions

Source: San Mateo County Office of Education.

A brief history of district formation. San Mateo County's numerous school districts were formed over a century ago, when the county was more rural and scattered: communities needed elementary schools close to home, and only a few students were attending high school. As young people began going to high school, individual districts often found they had too few students and resources to support their own high schools, so separate high school districts,

covering the territories of two or more elementary districts, were established to meet the communities' needs.²

Once California's population grew and San Mateo County became more urbanized, "a jigsaw puzzle of overlapping districts evolved haphazardly." Since 1920, the state has been pushing elementary districts to unify with the high school districts that serve their communities, citing improved educational quality and equity of opportunity. However, there has been limited success and local voters in San Mateo County have consistently resisted unification.³

Early efforts at unification were more successful in the rural communities along the coast—for example, voters approved the new Cabrillo Unified district for the area around Half Moon Bay and the La Honda-Pescadero Unified district in a 1964 election. Unification was not supported by many suburban communities edging the Bay. The county's school district committee proposed to split each of the three high school districts and feeder schools into two or three smaller unified districts, but the State Board of Education rejected variations of those plans three times. The Board argued that the county committee's proposals would create districts with widely varying property tax bases and could contribute to racial segregation. The State Board instead devised a plan that would create a single unified district within each of the existing high school district boundaries. Voters turned down the state plans in all three districts in June 1966, and rejected a similar proposal again in 1972. In 1973, the Mid-Peninsula Task Force for Integrated Education petitioned the county committees to unify the elementary districts of Menlo Park, Las Lomitas, Portola Valley, Ravenswood and a portion of Sequoia Union High School District across county lines with Palo Alto Unified. Their goal was racial integration, but the county committee did not support the effort.⁴

Efforts against unification have persisted, leaving the county with several elementary school districts which feed into a high school, rather than a unified district. As a result, some elementary school districts have faced waning budgets and administrative hurtles. For instance, Brisbane and Bayshore elementary school districts, at the northern end of the county, serve a little more than 1,000 students and long have struggled with tight budgets. To rectify their budgetary concerns, the districts now share both a superintendent and a chief business officer. They also participate in a special education collaborative with the Jefferson elementary and high school districts.

According to the county's superintendent of schools Anne Campbell, other districts may find themselves pooling their resources in the future: local identification may be strong, she says, but

³ Ibid.

⁴ Ibid.

financial reality is hard to ignore: "As we move forward in time, I think it's going to be interesting to see what school districts are going to do, especially as budgets get more bleak."⁵

Enrollment changes. Total public school enrollment in the county has decreased slightly, by just 1%, from the 2010-2011 academic year to 2020-2021. Figure V-4 illustrates enrollment changes by district.

Bayshore Elementary, Ravenswood City, and Portola Valley school districts experienced the largest enrollment decreases (by at least 30%) between 2010-11 and 2020-21. School districts with the largest increases in enrollments were Burlingame (22%) and Belmont-Redwood Shores (30%).

⁵ Ibid.

Figure V-4. Enrollment changes by district, 2010-11 to 2020-2021

School District	2010-2011 Enrollment	2020-2021 Enrollment	Percent Change

Total Enrollment	91,345	90,067	-1%

Source: California Department of Education and Root Policy Research

However, it is important to note that many of these enrollment decreases were driven by the pandemic. In fact, total enrollment in these public schools decreased by 3% between 2019-2020

and 2020-2021 in San Mateo County: the largest decrease of the decade. As shown in Figure V-5, enrollments actually increased steadily from 2010-2011 to 2017-2018, then began decreasing afterwards.

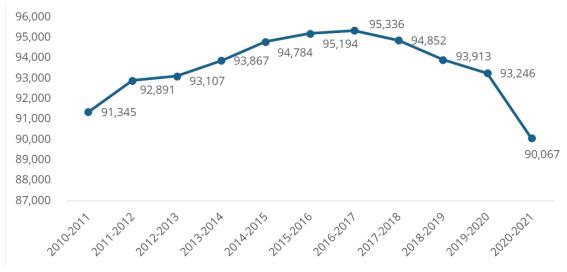

Figure V-5. Public School Enrollment Changes, 2010-2011 to 2020-2021

Note: These data exclude enrollments in SBE Everest Public High School District, which in 2015 combined with the Sequoia Union High School District.

Source: California Department of Education and Root Policy Research

Portola Valley and La Honda-Pescadero school districts had the largest enrollment decreases during COVID-19, with a 11% and 10% decline in enrollments, respectively. The only school district with increasing enrollments between the 2019-2020 to 2020-2021 school years was Sequoia Union High School District, with a modest 1% increase in enrollments.

Figure V-6.

Enrollment changes by district during COVID-19, 2019-20 to 2020-21

Source: California Department of Education and Root Policy Research.

Declining enrollments in public schools have been common across the state and country during the COVID-19 pandemic, and enrollment declines in San Mateo County are on par with those

across the state. According to a study conducted by the Public Policy Institute of California, public K–12 enrollment declined by 3% in California from the 2019-2020 school year to the 2020-2021 school year.⁶

As funding is tied directly to the number of enrolled pupils, schools in San Mateo County could suffer fiscal consequences with continued declines. By law, districts are "held harmless" for declines for one year—that is, school budgets for 2020–2021 were unaffected, but continued enrollment declines could mean cuts in future years.⁷ Reductions in enrollments, and consequently funding, could also worsen economic inequality in the long-term by reducing students' resources and access to opportunities.

Demographics: race & ethnicity. Over the last decade, San Mateo County's school districts have diversified in terms of students' race and ethnicity. Hispanic students make up the largest ethnic group in the county's schools: 38% of students identified as Hispanic in the 2020-2021 academic school year. This is just a one percentage point increase from 2010-2011. Many other students are White (26%), though this has decreased by 3 percentage points since 2010-2011, The largest increase was in Asian students, with 17% identifying as such in 2020-2021, an increase of 5 percentage points from 2010-2011. Other students identify as Filipino (8%), or bior multi-racial (8%). A small and decreasing percentage of students identify as Black/African American (1%) and Pacific Islander (2%).

⁶ Lafortune, Julien & Prunty, Emmanuel. "Digging into Enrollment Drops at California Public Schools." Public Policy Institute of California. May 14, 2021. https://www.ppic.org/blog/digging-into-enrollment-drops-at-california-public-schools/

⁷ Ibid.

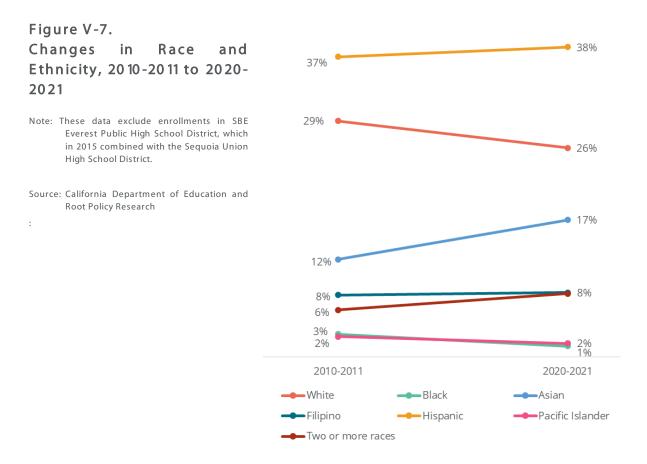

Figure V-8 shows the racial and ethnic distribution of students enrolled in public schools by jurisdiction in 2020-2021.

- Portola Valley Elementary School District (66%) and Woodside Elementary School District (64%) had the highest share of White students, making them among the least racially and ethnically diverse districts in the county.
- Ravenswood City Elementary School District and Redwood City Elementary School District had the highest share of Hispanic students, at 84% and 70%, respectively.
- Ravenswood City also had the highest proportion of Pacific Islander students (7%) and Black/African American students (5%) compared to other districts.
- Millbrae Elementary (46%), Hillsborough Elementary (32%), and Belmont-Redwood Shores Elementary (32%) had the highest share of Asian students.
- Jefferson Elementary School District and Jefferson Union High School District had the highest portion of Filipino students, at 25% and 29% respectively.

Figure V-8. Student body by Race and Ethnicity, 2020-2021

Total	17%	1%	8%	38%	2%	26%	8%

Note: In almost all school districts, less than 1% of students were Native American, so they are not included in this table. Source: California Department of Education and Root Policy Research

Enrollment changes due to COVID-19 varied by race and ethnicity. For instance, between 2019-2021, enrollment among Pacific Islander students decreased by 6% (from 1,581 students in 2019-20 to 1,484 students in 2020-21). This is substantially higher than the 3% countywide average. Enrollments among Filipino and Hispanic students decreased by 4% while enrollment among Black/African American students decreased by 2%. On the other end of the spectrum, there was

a 3% increase in enrollment among White students (from 22,308 students to 23,055 students) between 2019-20 and 2020-21. Similarly, there was a 1% increase in enrollment among Asian students and a 4% increase among students of two or more races.

Source: California Department of Education and Root Policy Research

While many of their families may have simply moved out of San Mateo County during the pandemic, it is possible that Black/African American, Filipino, Hispanic, and Pacific Islander students are otherwise slipping through the cracks of the education system during this period.

Demographics: students with extenuating circumstances. Several students in the county's public schools are facing additional hurtles to educational ease. Many are English learners, qualify for reduced lunch, are foster children, are experiencing homelessness, have a disability, or are migrants. Students in these groups often have hindrances to excelling in school because of detrimental circumstances beyond their control. These include financial and social hardships as well as problems within students' families.

Qualification for free and reduced lunch is often used as a proxy for extenuating circumstances. Qualifications are determined based on household size and income. For instance, in the 2020-2021 academic year, students from a household of three making less than \$40,182 annually qualified for reduced price meals, and those making less than \$28,236 in a household of three qualified for free meals.⁸

⁸ "Income Eligibility Scales for School Year 2020-2021." California Department of Education.

Free and reduced lunch disparities. Overall, 29% of public school students in San Mateo County qualify for reduced or free lunch. This rate was substantially lower in districts like Hillsborough Elementary, San Carlos Elementary, Portola Valley Elementary, Las Lomitas Elementary, Belmont-Redwood Shores, and Menlo Park City Elementary, where each had less than 10% of students qualify for free or reduced lunch.

The rate of reduced lunch qualification was far higher in Ravenswood City Elementary School District, where 83% of students qualify for reduced lunch.

Disparities in homelessness. In Ravenswood City Elementary, 30% of students are experiencing homelessness. This is an outlier in the county, where overall just 2% are experiencing homelessness. The school district has received media attention due to its astronomically high rate of students experiencing homelessness. Some have noted that rates of homelessness have increased due to escalating costs of living in an area surrounded by affluence.⁹ Others have highlighted that "Having a roof over your head, having a safe place to sleep and study, is fundamental to absolutely everything," and have noted that students who experience homelessness have higher dropout rates and are more likely to experience homelessness as adults.¹⁰

School moves related to evictions. Currently, students whose families have been evicted do not have protections allowing them to remain in their current school district. This means that precarious housing also means precarious schooling for many of the county's students. Frequent moves by students are closely related to lower educational proficiency.

In the City of San Francisco, a 2010 ordinance protects some students from being evicted during the school year; however, it only relates to owner/relative move-in evictions.¹¹ Children in families who are evicted for other reasons may need to move schools or districts when their housing is lost.

English language learners. Countywide, 20% of public school students are English learners. Again, this rate is highest at Ravenswood City Elementary, where 53% of students are English learners. La Honda-Pescadero Unified School District, Jefferson Union High School, and Redwood City Elementary also have high rates of English learners, representing more than a third of students.

¹¹ https://sfrb.org/new-amendment-prohibiting-owner-move-evictions-minor-children-during-school-year

Less than one percent of students in San Mateo County public school districts are foster youth or migrants. Cabrillo Unified School District had the highest rate of migrant students at 3%. La Honda-Pescadero had the highest rate of foster children at 2%.

School districts without large low income populations also tend to serve very few English language learners. For instance, in Hillsborough Elementary where 0% of students qualify for reduced lunch, only 1% of students are English language learners.

The overall share of students in these groups has not changed drastically over time. As shown in Figure V-11, there have been slight decreases in the share of students who are English learners and the share of students who qualify for reduced lunch from 2016-2017 to 2020-2021. Around

2% of students in the county are homeless and this has not changed between 2016-2017 and 2020-2021. Foster youth and migrant students are not shown in the figure, as both have hovered at less than 1% from year to year.

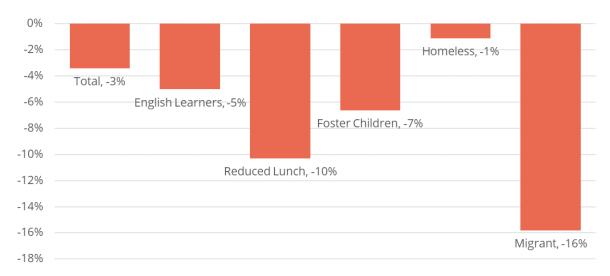

During COVID-19, enrollments decreased by 3% between 2019-2020 and 2020-2021 school years, as families withdrew or did not reenroll their children from public schools. Enrollment among migrant students decreased much more drastically, by 16% (from 332 students to 279 students). Similarly, enrollment among students who qualify for reduced lunch declined at a higher rate (10%) than the overall student population. Foster children and English learners also experienced enrollment decreases at a rate higher than the total population, with 7% and 10% decreases in enrollment, respectively.

Achievement Gaps

This section details achievement gaps within school districts. Gaps are measured by test scores, meeting California State University or University of California admissions standards, and college-going rates.

Test scores. Figure V-13 indicates the percent of students who met or exceeded English and mathematics testing standards set by the California State Assessment of Student Performance and Progress. Overall, 62% of students in the county met or exceeded English testing standards and 52% met or exceeded mathematics testing standards.

Of all the districts with high schools, San Mateo Union High School District had the highest student pass rates: 70% of their students met or exceeded standards in English testing and 50% met or exceeded standards in mathematics testing.

Among elementary school districts, Portola Valley Elementary School District and Woodside Elementary School District had the highest rates of success in English, with 87% and 88% of students meeting or exceeding English testing standards, respectively. Woodside Elementary School District and Hillsborough Elementary School District had the highest rates of success in mathematics, with 84% and 85% meeting math testing standards, respectively.

In every school district, girls scored higher on English tests than boys. Overall, girls met or exceeded English testing at a rate of 67% while boys met or exceeded English testing at a rate of 57%. The largest gender gap was in Brisbane Elementary School District, where 72% of girls met or exceeded English testing standards and just 56% of boys did: a gap of 16 percentage points.

Gender gaps in mathematics were less pronounced, but largest gender gaps were in Cabrillo Unified School District and in La Honda Pescadero Unified School District. In Cabrillo Unified, girls passed mathematics at a rate 7% higher than boys, while in La Honda-Pescadero, boys passed at a rate 6% higher than girls.

The gender gap in test scores has started to close in recent years, as indicated in Figure V-15. In 2014-2015 there was a 11 percentage point gap in girls' and boys' English testing pass rates, and by 2018-2019 this was just a 10 percentage point gap. The figure also indicates that there have been steady gains in the share of students meeting or exceeding testing standards in the county.

Figure V-15. Students who Met or Exceeded Testing Standards, by Gender, 2014-2015 to 2018-2019

Source: California Department of Education, California Assessment of Student Performance and Progress, and Root Policy Research

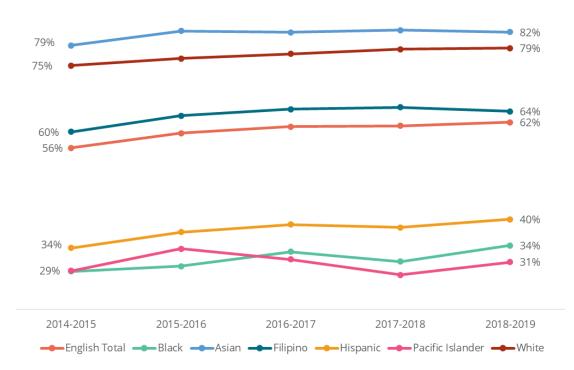

Very large gaps in test scores by race and ethnicity exist among students in some areas. Figure V-16 illustrates the rate at which students of various racial and ethnic groups met or exceeded English testing standards.

For the past five years in San Mateo County, Asian, White, and Filipino students have met or exceeded English testing standards at rates higher than the overall student population. Hispanic, Black/African American, and Pacific Islander students, on the other hand, have been underserved in this realm and have consistently scored lower than the overall student body.

However, across all groups, the rate at which students met or exceed English testing standards has increased since the 2014-2015 school year. Hispanic students have made the largest percentage point gain: 34% met standards in 2014-2015 and 40% met standards in 2019-19, an increase of six percentage points.

Figure V-16.

Students who Met or Exceeded English Testing Standards, by Race and Ethnicity, 2014-2015 to 2018-2019

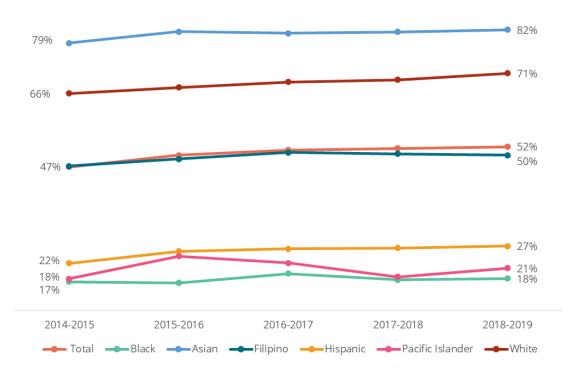

Source: California Department of Education, California Assessment of Student Performance and Progress, and Root Policy Research

A similar narrative holds in Math testing standards, where scores have improved among each racial and ethnic group from 2014-2015 to 2018-2019. Again, White and Asian students meet or exceed math testing standards at rates higher than the overall population while Hispanic, Pacific Islander, and Black/African American students scored lower.

White and Hispanic students have seen the biggest increases in rates of mathematics success: both have experienced a five percentage point increase in the percent of students who met or exceeded math testing standards.

Figure V-17.

Students who Met or Exceeded mathematics testing standards, by Race and Ethnicity, 2014-2015 to 2018-2019

Source: California Department of Education, California Assessment of Student Performance and Progress, and Root Policy Research

Figure V-18 illustrates the rates at which students of various racial and ethnic groups met or exceeded mathematics testing standards by district.

There were several districts in which the gaps between the overall test pass rates and a specific racial groups' pass rates were especially wide. For instance, in San Carlos Elementary School District, 75% of the total student body met or exceeded math testing standards, but only 11% of Black/African American students met or exceeded math testing standards— a gap of 64 percentage points.

Other school districts with wide gaps between Black/African American and overall math testing success were Las Lomitas Elementary (46 percentage point gap), Menlo Park City Elementary (43 percentage point gap), and Belmont-Redwood Shores (42 percentage point gap).

Some school districts also had similar gaps in Pacific Islander students' math passing rates and overall passing rates. For instance, in Menlo Park City Elementary School District, 83% of the student body met or exceeded mathematics testing standards but just 35% of Pacific Islander students passed or exceeded mathematics testing standards—a gap of 48 percentage points. Millbrae Elementary School District also had a 47 percentage point gap between Pacific Islander students' and total students' math test rates.

Although racial gaps in English testing were less pronounced, San Carlos Elementary School District also had a wide gap between the total student body and Black/African American students. Namely, 80% of the student body met or exceeded English testing standards, but only 19% of Black/African American students met or exceeded testing standards—a 61 percentage point gap.

Las Lomitas Elementary had a 41 percentage point gap between overall English testing success and Black/African American English testing success.

Other districts had large gaps between the total student body's English test scores and Pacific Islander students' test scores. Namely, in Menlo Park City Elementary School District 84% of students met or exceeded English testing standards, but only 40% of Pacific Islander students— a 44 percentage point gap.

Students with extenuating circumstances across all districts met or exceeded testing standards at lower rates. However, some districts had especially wide disparities between overall test scores and test scores of students with extenuating circumstances.

For example, English learning students in Portola Valley Elementary, Woodside Elementary, Menlo Park City Elementary, and Brisbane Elementary each met or exceeded mathematics test standards at a rate at least 50 percentage points below the overall test rate in each district. English learning students in Las Lomitas Elementary (54%) had the highest mathematics pass rates, followed by those in Belmont-Redwood Shores (42%) and Burlingame Elementary (40%).

Students with disabilities scored especially high on mathematics tests in Hillsborough Elementary, where 48% met or exceeded standards. Others in Belmont-Redwood Shores (43%) and Woodside Elementary (41%) had high pass rates as well. Students with disabilities in San Carlos Elementary and Las Lomitas Elementary school districts scored far below the overall student body: in these districts, students with disabilities met or exceeded mathematics test standards at 54 percentage points below the overall test rate.

In Jefferson Elementary and Ravenswood Elementary students experiencing homelessness passed math tests at a rate similar to their housed peers. In other districts, however, students experiencing homelessness often scored substantially lower. School districts with the widest math testing gaps between the overall student body and students experiencing homelessness were San Mateo-Foster City and Millbrae Elementary, with a 41 percentage point gap and 42 percentage point gap, respectively.

Students with extenuating circumstances also consistently scored lower in English testing than the overall student body.

For instance, English learning students in San Mateo Union High School District, Hillsborough Elementary School District, Sequoia Union High School District, Menlo Park City Elementary School District, and Portola Valley Elementary School District met or exceeded English test standards at a rate at least 60 percentage points below the overall test rate in each district. Hillsborough Elementary had the largest gap at 85 percentage points. Las Lomitas Elementary had the highest success rate among English learners, where 50% met or exceeded English testing standards.

However, students with disabilities in Las Lomitas Elementary and San Carlos Elementary school districts met or exceeded English test standards at rate 55 and 51 percentage points below the overall test rate, respectively. These were the largest gaps in the county. Students with disabilities at Woodside Elementary did the best on English testing, where 56% passed or exceeded standards.

Among students experiencing homelessness, those at Sequoia Union High School were most likely to meet English testing standards, with 42% meeting or exceeding standards. The school district with the widest gap between overall English test scores and scores among students experiencing homelessness was Cabrillo Unified with a 34 percentage point gap.

Just three districts reported English testing scores among migrant students. Redwood City Elementary had the highest pass rate at 34% and Cabrillo Unified had the lowest at 16%.

Students who met university requirements. Many high schoolers in the county met admission standards for a University of California (UC) or California State University (CSU) school. Figure V-22 illustrates the percentage of cohort graduates who met admission requirements for a CSU or UC school according to California Department of Education data.

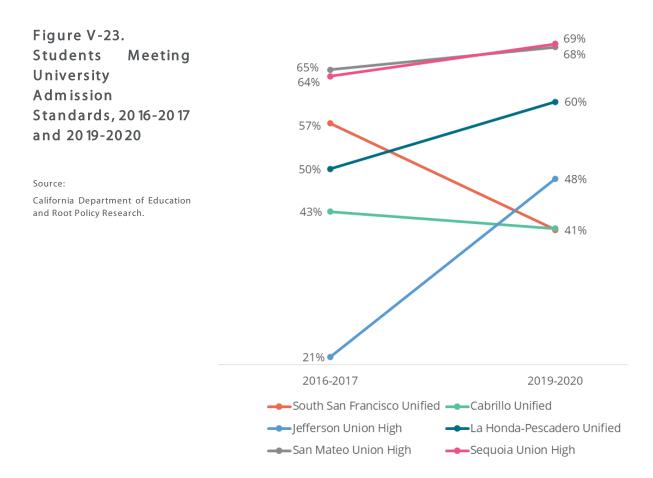

Of the high school districts in San Mateo County, Sequoia Union had the highest rate of graduates who met such admission standards, at 69%. On the other end of the spectrum, Cabrillo Unified and South San Francisco Unified had the lowest rates at 41%.

Cabrillo Unified and South San Francisco Unified have experienced a decrease in the share of graduates meeting CSU or UC admission standards in recent years. For instance, in 2016-2017, 57% of South San Francisco Unified graduates met these standards, but this decreased by 16 percentage points by 2019-2020. Cabrillo Unified experienced a less drastic decrease over the same period, but the rate still shrunk by two percentage points.

Jefferson Union High School District had the most drastic increase in the share of graduates meeting CSU or UC standards: just 21% of students met these standards in 2016-2017 compared to 48% of students in 2019-2020. La Honda-Pescadero Unified School District experienced a 10 percentage point increase in this success rate over the same period.

Sequoia Union and San Mateo Union experienced more modest increases, but remain the districts with the highest rates of students meeting CSU and UC standards.

Rates at which students met CSU or UC admissions standards varied substantially by race and ethnicity in 2019-2020. In all high school districts in San Mateo County, White and Asian students meet CSU and UC admissions standards at higher rates than the overall student population.

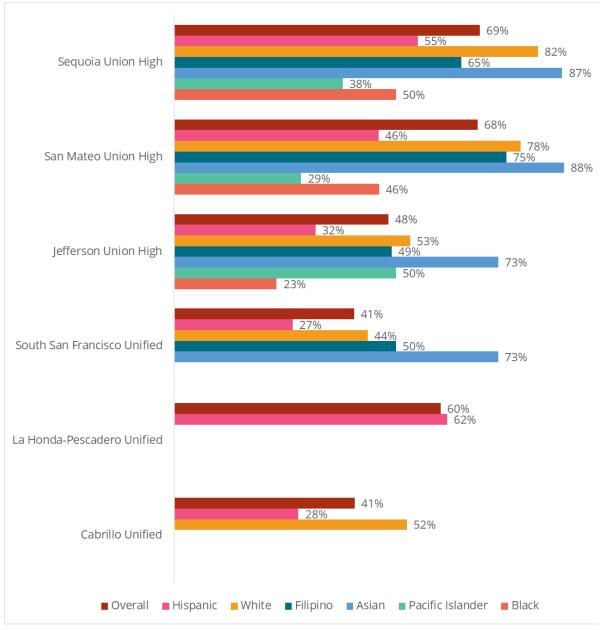

The largest gap is in South San Francisco Unified, where just 41% of students meet CSU or UC admissions standards, but 73% of Asian students meet those standards—a 32 percentage point gap.

On the other end of the spectrum, Black/African American students typically met CSU or UC admissions standards at lower-than-average rates. The largest gap was in San Mateo Union, where just 29% of Black/African American students met CSU or UC standards compared to 68% of students in the district overall.

Filipino students typically met admissions standards at rates similar to the overall student body. For instance, in Jefferson Union, San Mateo Union, and South San Francisco Unified, Filipino students are slightly more likely to have meet CSU and UC standards than the overall student population. In Sequoia Union, they are slightly less likely to have met admission standards than the overall student population. In La Honda-Pescadero, Hispanic students are slightly more likely to have met CSU or UC standards than the overall student body. However, in all other school districts, Hispanic students are less likely to have met CSU and UC standards than the overall student body. The largest disparity is in San Mateo Union, where just 46% of Hispanic students meet the university admissions standards compared to 68% of students overall.

Finally, Pacific Islander students in Jefferson Union were slightly more likely to have met California university admissions standards compared to the overall student body, but in Sequoia Union and San Mateo Union they were substantially less likely.

Figure V-24. Students Meeting University Admission Standards, by Race and Ethnicity, 2019-2020

Source: California Department of Education and Root Policy Research

As expected, students with extenuating circumstances were less likely to meet CSU or UC admissions standards than students in the county overall. In all school districts where data are available, students with disabilities, students experiencing homelessness, English learners, foster youth, and migrant students met CSU or UC admission standards at lower rates than the overall student population.

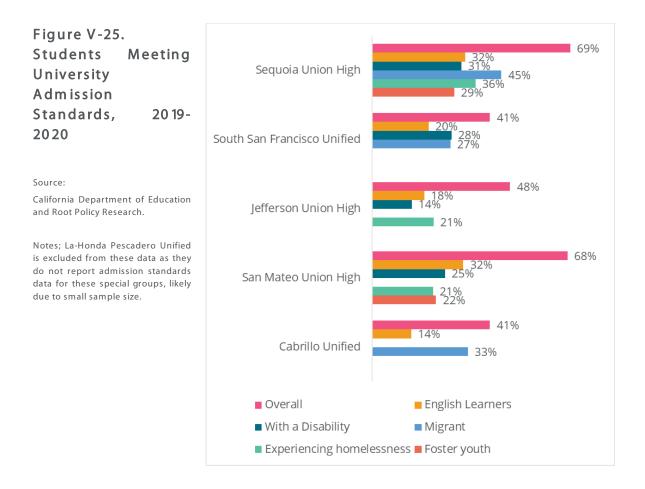

English learners in Sequoia Union and San Mateo Regional met CSU or UC admission standards at higher rates than their peers in other school districts. However, compared to the overall student body within their own school districts, they had a larger gap than other districts. Namely, in Sequoia Union, 69% of students met admissions standards compared to just 32% of students learning English— a 37 percentage point gap.

Similarly, students with disabilities in Sequoia Union had the highest rate of meeting admissions standards (31%) compared to peers with disabilities in other districts, but also had the largest gap (38 percentage points) compared to the district's overall student body.

Migrant students met admission standards at the lowest rate in South San Francisco Unified (27%) and at the highest rate in Sequoia Union (45%). However, in Cabrillo Unified, their rates were only eight percentage points lower than that of the overall student body, the smallest gap in the county.

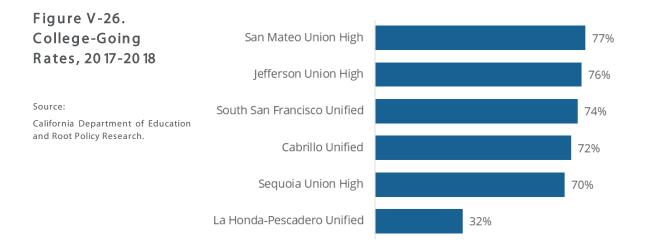

Approximately 36% of students experiencing homelessness in Sequoia Union met CSU or UC admission standards, which was higher than rates in San Mateo Union (21%) and Jefferson Union (21%).

Just San Mateo Union and Sequoia Union had enough foster youth to report their rate of meeting CSU or UC admission standards. In Sequoia Union, 29% met admissions standards and 22% in San Mateo Union met admissions standards.

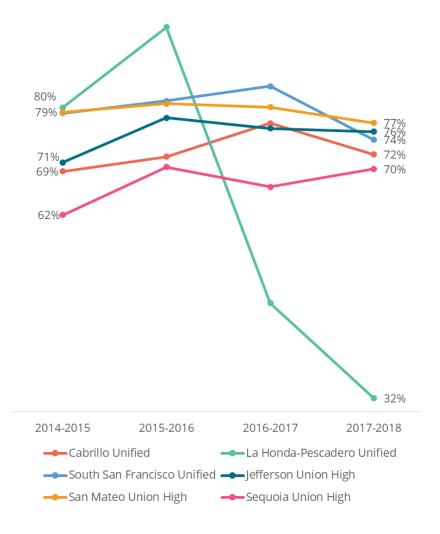

College-going rates. The college-going rate is defined as the percentage of public high school students who completed high school in a given year and subsequently enrolled in any public or private postsecondary institution (in-state or out-of-state) in the United States within 12 or 16 months of completing high school.

Most school districts in the county have a college-going rate at 70% or higher. San Mateo Union had the highest college-going rate at 77%. La Honda-Pescadero School District is the notable exception, with just 32% of graduates attending college within 12 or 16 months.

As shown in Figure V-27, La Honda-Pescadero School District previously had the highest collegegoing rate of all the county's high school districts, with an 80% college-going rate in 2014-2015 and a 93% college-going rate in 2015-2016. The district experienced a rapid decline in collegegoing rates, starting in 2016-2017. However, La Honda-Pescadero has especially small sample sizes. For instance, the district had just 26 twelfth-graders in the 2017-2018 school year, meaning that just a couple students going to college (or not) drastically alters the college-going rate in La Honda-Pescadero. All other high school districts in the county have maintained relatively consistent college-going rates. Figure V-27. College-Going Rates, 2014-2015 to 2017-2018

California Department of Education and Root Policy Research.

Source:

Within each of the high school districts, college-going rates vary by race and ethnicity.

- In every district, White students have a higher college-going rate than Hispanic students, but the largest gaps are in South San Francisco United, where 91% of White students go to college compared to just 68% of Hispanic students, a 23 percentage point gap. Jefferson Union has the smallest gap between the two groups: 77% of White students go to college compared to 71% of Hispanic students.
- Among Black/African American students, those at San Mateo Union have the highest college-going rate at 82%. Those at Jefferson Union have the lowest at just 53%, which is 24 percentage points lower than that of White students and 34 percentage points lower than that of Asian students.
- Overall, Asian students have among the highest college-going-rates in the county. The rate is especially high in South San Francisco Unified, where 92% go to college. The rate is lowest in Sequoia Union High School District, where 84% go to college.

- Filipino students also have generally high rates of college-going. The highest college-going rate among Filipino students is in Sequoia Union (86%) and the lowest is in South San Francisco Unified (73%).
- College-going rates for Pacific Islander students vary substantially by district. For instance, in Sequoia Union 54% go to college, but in South San Francisco Unified 92% go to college.

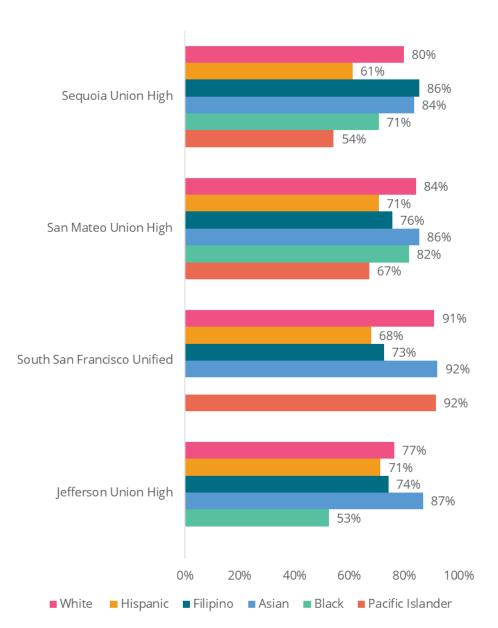

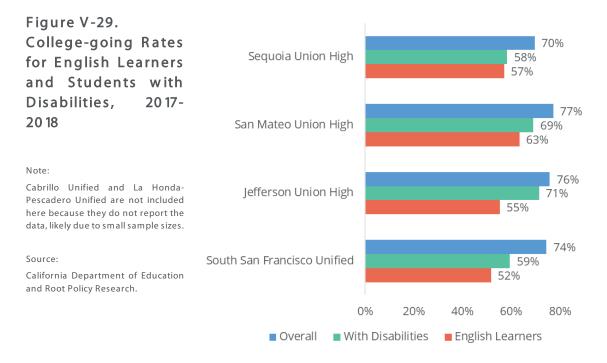

Figure V-28. College-going Rates by Race and Ethnicity, 2017-18

Note: Cabrillo Unified and La Honda- Pescadero Unified are not included here because they do not report the data, likely due to small sample sizes.

Source: California Department of Education and Root Policy Research

College-going rates are lower for students with disabilities and those learning English compared to the overall student population across the county.

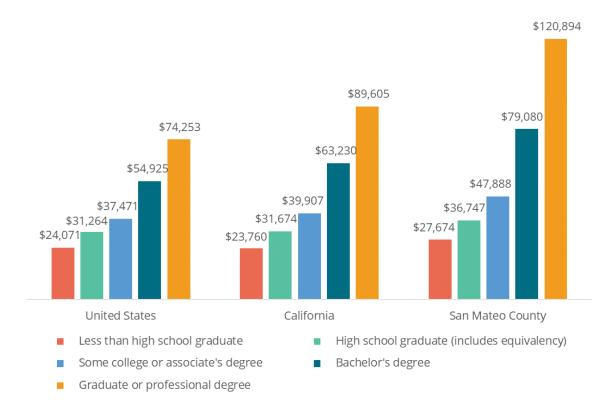

- For instance, the largest gap between overall college-going rates and English learners' college-going rates is in South San Francisco Unified, where just 52% of English learning students go to college as opposed to 74% of the overall student population— a 22 percentage point gap. Among English learners, San Mateo Union High School District had the highest college-going rate, where 63% of English learners go to college.
- Among students with disabilities, South San Francisco Unified also had the largest gap, where 59% of students with disabilities went to college compared to 74% of the overall student population a 15 percentage point gap. Jefferson Union, on the other hand, had a relatively high college-going rate among students with disabilities that was not very different from the district's overall college-going rate: 71% went to college which is just five percentage points lower than the district's overall student population.

Gaps in college enrollment by race, ethnicity, disability status, or English learning have stark financial consequences for students in the long-term. Figure V-30 illustrates median annual earnings by educational attainment. College degrees are especially important in San Mateo County: those with a bachelor's degree in the county earn 115% more than those with a high school diploma. This gap is wider in San Mateo County than in other parts of California and nationwide. The differences between high-school graduate earnings and bachelor's degree earnings are around 100% in California and 76% in the US overall.

Figure V-30.

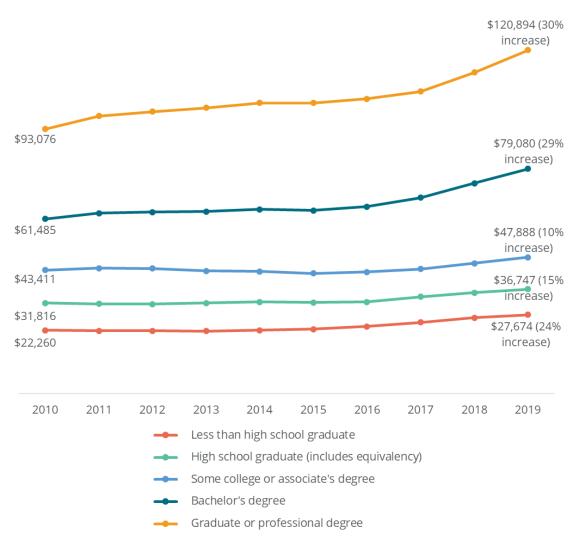

Median Annual Earnings by Educational Attainment, 2019

Source: 5-year 2019 American Community Surveys Data.

Unfortunately, the gap between high school graduates' and college graduates' earnings have been increasing in San Mateo County. As illustrated in Figure V-31, median earnings for high school graduates increased by just 15% over the last decade (from \$31,816 to \$36,747) while earnings for college graduates increased by 29% over the same period (from \$61,485 to \$79,080).

Figure V-31. Median Annual Earnings by Educational Attainment in San Mateo County, 2010 to 2019

Source: 5-year American Community Surveys Data.

Because income disparities between college graduates and high school graduates have been increasing, it is increasingly important that school districts in San Mateo County address differences in college-going rates stratified by race, ethnicity, and extenuating circumstances.

Barriers to Success

Many students are unable to achieve academic success because of barriers in home and school. This section explores the available indicators of barriers to success, including chronic absenteeism and dropout rates. It also describes inequities in discipline rates by race and ethnicity, which has been linked both to discrimination by education professionals as well as a major barrier to students' future success.

Chronic absenteeism. Academic studies have found that if a student is chronically absent, it reduces their math and reading achievement outcomes, educational engagement, and social engagement.¹² Chronic absenteeism also has spillover effects and negatively impacts students who themselves are not chronically absent. For instance, one study found that students suffer academically from having chronically absent classmates—as exhibited across both reading and math testing outcomes.¹³

Students are considered chronically absent if they were absent for 10% or more of the days during a school year. Note, however, students are exempt from chronic absenteeism calculations if they receive instruction through a home or hospital instructional setting, are attending community college full-time, or were not expected to attend more than 31 days.

In the county overall, 10% of students were chronically absent during the 2018-2019 school year.¹⁴ This is a slight increase from the 2016-2017 school year, where just 9% of students overall were chronically absent.

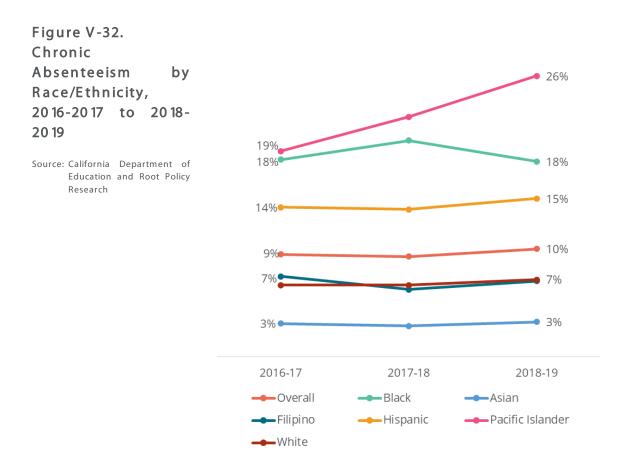

Chronic absenteeism rates were higher in districts with a large number of students experiencing economic and housing precarity. For instance, Ravenswood Elementary, which has a 30% rate of homelessness among students, had one of the higher rates of chronic absenteeism at 16%. La Honda-Pescadero and Sequoia Union high school districts also had high rates of chronically absent students at 16% and 17%, respectively.

When disaggregating by race and ethnicity, just 3% of Asian students were chronically absent, and 7% of White and Filipino students were chronically absent. On the other end of the spectrum, Pacific Islander students (26%), Black/African American students (18%), and Hispanic students (15%) had notably higher rates of chronic absenteeism than the overall student population (10%). Chronic absenteeism among Pacific Islander students has increased in recent years, as illustrated in Figure V-32.

¹² Gottfried, Michael A. "Chronic absenteeism and its effects on students' academic and socioemotional outcomes." Journal of Education for Students Placed at Risk (JESPAR) 19.2 (2014): 53-75.

¹³ Gottfried, Michael A. "Chronic absenteeism in the classroom context: Effects on achievement." Urban Education 54.1 (2019): 3-34.

¹⁴ Because of the physical school closures during the COVID-19 pandemic, the California Department of Education determined that 2019–2020 absenteeism data are not valid, therefore, we present data from the 2018-2019 school year.

Chronic absenteeism among Pacific Islander students was especially pronounced in San Mateo-Foster City school district where there was a 26 percentage point gap between chronic absenteeism rates for Pacific Islander students (32%) and the overall student body (6%). Other districts had similarly large gaps, including San Bruno Park Elementary (20 percentage points) and South San Francisco Unified (18 percentage points).

Some districts had larger gaps in absenteeism rates between Black/African American students and the overall population. For instance, in San Carlos Elementary, 4% of the overall student body is chronically absent compared to 27% of Black/African American students— a 23 percentage point gap. Jefferson Elementary school district had a 17 percentage point gap between their overall chronic absenteeism rate (12%) and their chronic absenteeism rate among Black/African American students (28%).

Among White students, Bayshore Elementary School District was a major outlier, where 46% of White students were chronically absent compared to just 12% of the total student population. However, it is important to note that this represents a very small sample of White students: just 3% of students at Bayshore Elementary are White, one of lowest in the county.

Figure V-33. Chronic Absenteeism by District and Race/Ethnicity, 2018-2019

Source: California Department of Education and Root Policy Research

In most districts, chronic absenteeism is higher among students with disabilities. In fact, only Bayshore Elementary's students with disabilities had a lower rate of chronic absenteeism than the overall student body. In all other districts, students with disabilities were more likely to be chronically absent than the overall student population. This was particularly true in Sequoia Union High School District, Jefferson Union High School District, and San Mateo Union High School District, which had gaps between the overall absenteeism rate and the absenteeism rate among students with disabilities of 13, 12, and 11 percentage points, respectively.

Rates of chronic absenteeism were also higher among English learners than the general population in most districts (with the exception of Ravenswood City Elementary and Jefferson Elementary). Woodside Elementary and Sequoia Union High School districts both had 14 percentage point gaps between absenteeism rates of English learners and the overall student body.

In every school district where the data are available, foster youth had higher rates of chronic absenteeism than the overall population. This was especially true in Sequoia Union High School District, where 63% of foster youth were chronically absent compared to just 17% of the overall student body.

Similarly, in almost all districts with available data, students experiencing homelessness had higher rates of chronic absenteeism than the overall student body. The chronic absenteeism rate among students experiencing homelessness was highest in Burlingame Elementary at 64%.

Migrant students were chronically absent at rates similar to or lower than the total student body in all districts with reported data.

Dropout rates. As previously indicated, workers without a high school degree have the lowest annual earnings compared to others at higher levels of educational attainment. In addition to the economic and housing precarity associated with low earnings, low earnings also often lead to increased incentives to participate in criminal activity. In fact, one study suggest that

high school dropouts are 3.5 times more likely than high school graduates to be imprisoned at some point during their lifetime.¹⁵ Another study found that raising the high school completion rate by one percent for all men ages 20 through 60 would save the US \$1.4 billion annually in crime related costs.¹⁶ Dropping out of high school also has adverse health costs: for instance, research has shown that high school dropouts are more likely to smoke and have a marijuana disorder in adulthood.¹⁷ For these reasons, reducing high school dropout rates in San Mateo County is pivotal to the health and economic prosperity of the community.

In this report, dropout rates shown for high school districts with available data and are defined as the percentage of cohort students who did not graduate with a regular high school diploma, did not complete high school, and are not still enrolled as a "fifth year senior".

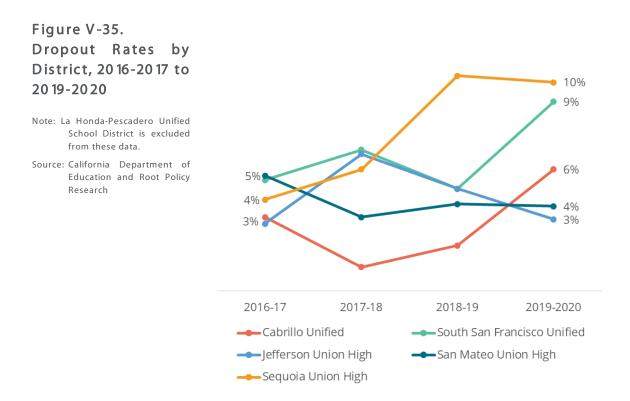

In the 2019-2020 academic year, dropout rates were highest in Sequoia Union High School District, where 10% of students dropped out. This is similar to South San Francisco Unified, where 9% of students dropped out. In both these districts, and in Cabrillo Unified, dropout rates have increased since 2016-2017.

Dropout rates have decreased by one percentage point over the same period in San Mateo Union High School District, from 5% to 4%. Jefferson Union had the lowest dropout rate in the county at just 3%, which after slightly higher rates in 2017-18 and 2018-19, is the same as its 2016-2017 rate.

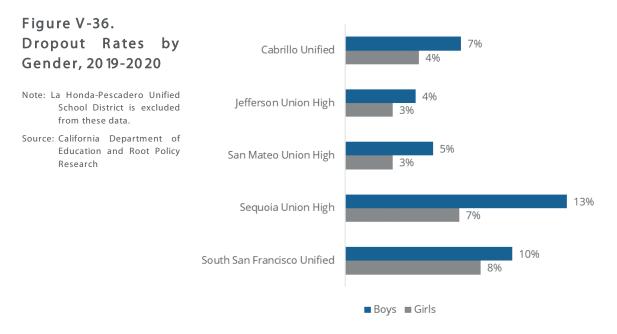

¹⁵ Monrad, Maggie. "High School Dropout: A Quick Stats Fact Sheet." National High School Center (2007).

¹⁶ U.S. Department of Justice, Bureau of Justice Statistics. (2002). Correctional populations in the United States, 1998 (NCJ-192929). Washington: U.S. Government Printing Office.

¹⁷ Gonzalez, Jennifer M. Reingle, et al. "The long-term effects of school dropout and GED attainment on substance use disorders." Drug and alcohol dependence 158 (2016): 60-66.

In all school districts in the county, dropout rates are higher for boys than for girls. Jefferson Union had the smallest gender gap, where 3% of girls dropped out and 4% of boys dropped out. Sequoia Union had the widest gender gap, where 13% of boys dropped out compared to just 7% of girls.

Pacific Islander, Black/African American, and Hispanic students in the county often had higher dropout rates than those in other racial and ethnic groups.

- In Sequoia Union High School District, dropout rates were highest among Pacific Islander students, where 20% dropped out in the 2019-2020 academic year. Dropout rates were also especially high among Hispanic and Black/African American students in Sequoia Union, at 16% and 12% respectively.
- In districts with lower dropout rates, for instance, Jefferson Union, the highest dropout rates still found among Black/African American (7%) and Hispanic students (6%).
- Notably, however, in South San Francisco Unified, White students were more likely to drop out than any other racial or ethnic group. In fact, 12% of White students dropped out compared to 11% of Hispanic students, 5% of Filipino students, and 3% of Asian students. Data for Black/African American and Pacific Islander students were not available for South San Francisco Unified due to small sample sizes.

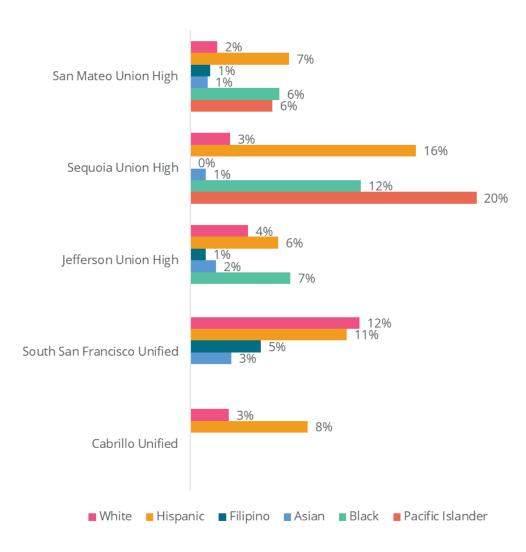

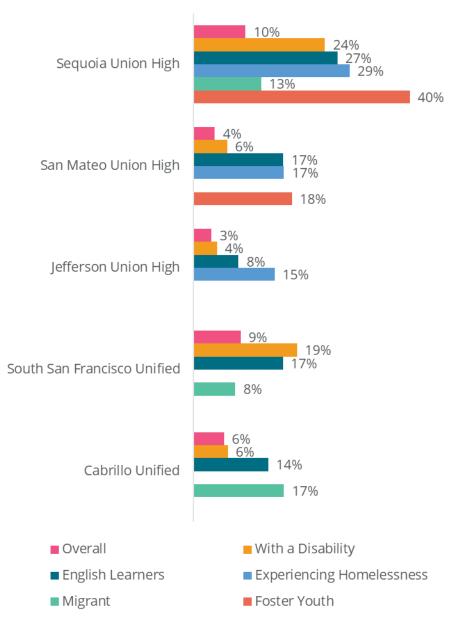

Figure V-37. Dropout Rates by Race, 2019-2020

In all school districts in the county, students with disabilities, students experiencing homelessness, foster youth, and students learning English had higher dropout rates than the overall population.

- Among students with disabilities, the highest dropout rate was in Sequoia Union, where 24% dropped out. The gap between overall dropout rates and dropout rates among students with disabilities was wide in Sequoia Union at 14 percentage points.
- Cabrillo Unified, on the other hand, had less than a one percentage point gap between the dropout rate of overall students (6%) and students with disabilities (6%).
- Among students learning English, Sequoia Union had the highest dropout rate at 27%, while Jefferson Union had the lowest dropout rate at 8%.
- Sequoia Union also had the highest rate of dropout among students experiencing homelessness at 29% while Jefferson Union, again, had the lowest at 15%.
- Foster Youth in Sequoia Union had an exceptionally high dropout rate at 40%. San Mateo Union is the only other district in the county which reported these data in 2019-2020, and found only 18% of foster youth dropped out.
- Migrant students at South San Francisco Unified actually dropped out at a rate slightly lower than the general student body: just 8% of migrant students dropped out compared to 9% of the overall student body. However, those in Cabrillo Unified were 11 percentage points more likely than the total student body to dropout.

Figure V-38. Dropout Rates by Extenuating Circumstance, 2019-2020

Source: California Department of Education and Root Policy Research

Disproportionate discipline rates. Strict discipline policies may stigmatize suspended students and expose them to the criminal justice system at a young age, setting them up for limited economic and social success down the line. Research has found that suspensions not only negatively affect the suspended students, but also their peers. Students in schools with higher

suspension rates are more likely to drop out or school and less likely to attend a four-year college.¹⁸

Other academic studies have found that students from African American and Latino families are more likely than their White peers to receive expulsion or out of school suspension as consequences for the same or similar problem behavior.¹⁹ This means that Black/African American and Hispanic students suffer more of the economic and social consequences than their White peers for the same behaviors.

Luckily, in every high school district in San Mateo County, suspension rates have decreased since 2011-2012. La Honda-Pescadero School District experienced the largest decrease: it was the district with the highest suspension rate in 2011-2012 at 10%, but now has the lowest suspension rate at just 1% in 2019-2020. San Mateo Union also experienced a rapid decrease in suspension rates over the same period, with a rate of 9% in 2011-2012 to a rate of 3% in 2019-2020.

Figure V-39. Suspension Rates, 2011-2012 to 2019-2020

Source: California Department of Education and Root Policy Research

In many school districts across San Mateo County, Hispanic students are disciplined at disproportionately higher rates compared to their peers. Figure V-40 compares each racial/ethnic group's share of suspensions to their share of the overall student population.

- In all districts except for La Honda-Pescadero, Hispanic students make up a larger share of suspensions than their overall share of the student body. For instance, in San Mateo Union, 34% of students are Hispanic, but 66% of suspended students are Hispanic, making a 32 percentage point overrepresentation gap.
- In most districts, Black and Pacific Islander students are also overrepresented in terms of suspension rates, but these rates are slight compared to those of Hispanic students. For instance, in Sequoia Union, just 2% of the student body identified as Pacific Islander but 8% of suspended students were Pacific Islander.
- Asian and Filipino students were *underrepresented* in terms of suspension rates. For example, in Jefferson Union High School District, 31% of students identified as Filipino but just 10% of suspended students were Filipino, a 21 percentage point gap. In San Mateo

Union High School, 22% of students identified as Asian but just 5% of suspended students were Asian, a 17 percentage point gap.

 White students were also underrepresented in discipline rates in most districts except for La Honda-Pescadero, where they were overrepresented by 30 percentage points. They were substantially underrepresented in Cabrillo Unified (with a gap of 21 percentage points) and Sequoia Union (18 percentage points).

Figure V-40. Suspension Rates by Race and Ethnicity, 2019-2020

School District	Cabrillo Unified	Jefferson Union High	La Honda- Pescadero	San Mateo Union High	Sequoia Union High	South San Francisco Unified

Notes: the percentage of suspensions and shares of racial groups do not sum to 100% because we exclude students with no reported race, with more than one reported race, where districts did not report racial/ethnic data due to small sample sizes. Gaps of 15 percentage points or more are highlighted.

Source: California Department of Education and Root Policy Research

Staff demographics. Diversity of school staff has been shown to improve outcomes for students of color. For instance, one recent study found that students are less likely to be removed from school as punishment when they and their teachers are the same race. This effect is driven almost entirely by black students, especially black boys, who are markedly less likely to be subjected to exclusionary discipline when taught by black teachers. There is little evidence of any benefit for white students of being matched with white teachers.²⁰ Other research in California has found that, when students have a teacher of their race, they are more likely to attend class, therefore reducing chronic absenteeism.²¹ Even more studies have found that having a teacher of a student's own race substantially improves their math and reading achievement.²²

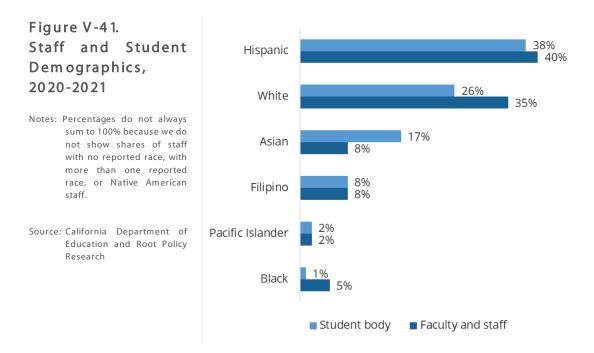

In San Mateo County, the demographics of faculty and staff are fairly similar to that of its students. Figure V-41 illustrates the share of the county's faculty and staff who are Asian, Black/African American, Hispanic, Filipino, Pacific Islander, and White, and compares those shares to the racial/ethnic breakdown of the county's student body.

There is a slightly larger share of White and Black/African American staff than students, meaning that Black/African American and White student groups are more likely to interact with same-race staff and faculty than other racial groups. Asian students are less likely to interact with a same-race staff of faculty member: 17% of the student body is Asian compared to just 8% of staff and faculty.

²⁰ Lindsay, Constance A., and Cassandra MD Hart. "Teacher race and school discipline: Are students suspended less often when they have a teacher of the same race?." Education Next 17.1 (2017): 72-79.

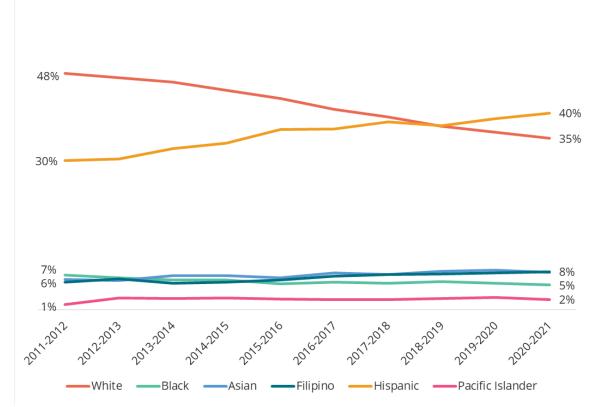

²¹ Gottfried, Michael, J. Jacob Kirksey, and Tina L. Fletcher. "Do High School Students With a Same-Race Teacher Attend Class More Often?." Educational Evaluation and Policy Analysis (2021): 01623737211032241.

²² Dee, T. S. (2004). Teachers, race, and student achievement in a randomized experiment. Review of economics and statistics, 86(1), 195-210.

Since 2011-2012, the county's school districts have diversified in that there has been a 13 percentage point decrease in the share of White faculty and staff and a 10 percentage point increase in Hispanic faculty and staff. However, there has been a slight decrease (by two percentage points) in the share of faculty and staff who identify as Black/African American. There has been a two percentage point increase in the share of Asian and Filipino faculty and staff, and a one percent increase in the share of Pacific Islander faculty and staff.

Figure V-42. Faculty and Staff Demographics, 2011-2012 to 2020-2021

Notes: Percentages do not always sum to 100% because we do not show shares of staff with no reported race, with more than one reported race, or Native American staff.

Source: California Department of Education and Root Policy Research

Figure V-43 illustrates faculty and staff racial and ethnic diversity for the 2020-2021 school year by district.

- Portola Valley has the least diverse faculty and staff in the county, with 59% identifying as White.
- Ravenswood Elementary has the most diverse faculty and staff: the district has the highest share of Pacific Islander (5%), Black/African American (12%) and Hispanic (72%) faculty and staff.
- South San Francisco Unified School District has the highest share of Asian faculty and staff at 14%.
- Brisbane Elementary and Jefferson Elementary have the highest shares of Filipino faculty and staff at 28%.

Notes: Percentages do not always sum to 100% because we do not show shares of staff with no reported race, with more than one reported race, or Native American staff.

Source: California Department of Education and Root Policy Research

Figure V-44 illustrates the gap between faculty/staff representation and the student body. For instance, at San Bruno Park Elementary, 15% of the students are White while 48% of the faculty/staff are White, leaving a 33 percentage point gap.

If schools are striving for a distribution of faculty/staff that reflects the racial and ethnic distribution of their student body, the closer to a 0 percentage point gap, the better. Schools like San Bruno Park Elementary fall short of meeting this goal, in that there is a large overrepresentation of White faculty/staff compared to the student body. Many other districts have a large overrepresentation of White faculty/staff, including Millbrae Elementary (32 percentage point gap), Jefferson Union High School District (29 percentage point gap), and South San Francisco Unified School District (22 percentage points). There are just a few school districts where the share of White students is higher than the share of White faculty, particularly Woodside Elementary and Menlo Park City Elementary, both with a 15 percentage point gap.

Across most school districts, the share of Asian students is larger than the share of Asian faculty/staff. This suggests that Asian students are less likely than their peers to interact with a same-race teacher or staff member. The largest disparity is in Millbrae Elementary, where just 13% of the faculty identify as Asian compared to 46% of the student body, a 33 percentage point gap.

In many school districts, there is a dearth of Hispanic faculty and staff. For instance, in La Honda-Pescadero, 63% of students are Hispanic compared to 39% of faculty, a 24 percentage point gap. In other districts, however, there is a larger share of Hispanic faculty/staff than students. In Las Lomitas Elementary, for instance, 13% of students are Hispanic and 42% of faculty/staff are Hispanic. Recall that Las Lomitas Elementary commonly has high-performing English language learnings students. This may be partly due to the district's large portion of Hispanic faculty/staff.

Though district wide there are approximately the same portions of Filipino students as there are faculty/staff, Jefferson Union High School stands out as a district where Filipino students are less likely to interact with a same-race teacher or staff member. In Jefferson Union, 29% of students are Filipino compared to just 13% of faculty/staff.

In all districts, there only very small gaps in the share of students that identify as Pacific Islander and the share of faculty/staff that identify as Pacific Islander. All in all, they are represented in approximately equal proportions.

Figure V-44. Difference Between Staff and Student Populations, by District, 2020-2021

1 INTRODUCTION

The requirement to Affirmatively Further Fair Housing (AFFH) is derived from The Fair Housing Act of 1968, which prohibited discrimination concerning the sale, rental, and financing of housing based on race, color, religion, national origin, or sex—and was later amended to include familial status and disability.¹ The 2015 U.S. Department of Housing and Urban Development (HUD) Rule to Affirmatively Further Fair Housing and California Assembly Bill 686 (2018) mandate that each jurisdiction takes meaningful action to address significant disparities in housing needs and access to opportunity.²³ AB 686 requires that jurisdictions incorporate AFFH into their Housing Elements, which includes inclusive community participation, an assessment of fair housing, a site inventory reflective of AFFH, and the development of goals, policies, and programs to meaningfully address local fair housing issues. ABAG and UC Merced have prepared this report to assist Bay Area jurisdictions with the Assessment of Fair Housing section of the Housing Element.

Assessment of Fair Housing Components
The Assessment of Fair Housing includes five components, which are discussed in detail on pages 22-43 of <u>HCD's AFFH Guidance Memo</u> :
A: Summary of fair housing enforcement and outreach capacity
B: Integration and segregation patterns, and trends related to people with protected characteristics
C: Racially or ethnically concentrated areas of poverty
D: Disparities in access to opportunity
E: Disproportionate housing needs, including displacement risk

1.1 Purpose of this Report

This report describes racial and income segregation in Bay Area jurisdictions. Local jurisdiction staff can use the information in this report to help fulfill a portion of the second component of the Assessment of Fair Housing, which requires analysis of integration and segregation patterns and trends related to people with protected characteristics and lower incomes. Jurisdictions will still need to perform a similar analysis for familial status and populations with disability.

This report provides segregation measures for both the local jurisdiction and the region using several indices. For segregation between neighborhoods within a city (intra-city segregation), this report includes isolation indices, dissimilarity indices, and Theil's-H index. The isolation index measures

³ The 2015 HUD rule was reversed in 2020 and partially reinstated in 2021.

¹ <u>https://www.justice.gov/crt/fair-housing-act-2</u>

² HCD AFFH Guidance Memo

segregation for a single group, while the dissimilarity index measures segregation between two groups. The Theil's H-Index can be used to measure segregation between all racial or income groups across the city at once. HCD's AFFH guidelines require local jurisdictions to include isolation indices and dissimilarity indices in the Housing Element. Theil's H index is provided in addition to these required measures. For segregation between cities within the Bay Area (inter-city segregation), this report includes dissimilarity indices at the regional level as required by HCD's AFFH guidelines. HCD's AFFH guidelines to compare conditions at the local level to the rest of the region; and this report presents the difference in the racial and income composition of a jurisdiction relative to the region as a whole to satisfy the comparison requirement.

1.2 Defining Segregation

Segregation is the separation of different demographic groups into different geographic locations or communities, meaning that groups are unevenly distributed across geographic space. This report examines two spatial forms of segregation: neighborhood level segregation *within* a local jurisdiction and city level segregation *between* jurisdictions in the Bay Area.

Neighborhood level segregation (*within* a jurisdiction, or *intra-city***):** Segregation of race and income groups can occur from neighborhood to neighborhood *within* a city. For example, if a local jurisdiction has a population that is 20% Latinx, but some neighborhoods are 80% Latinx while others have nearly no Latinx residents, that jurisdiction would have segregated neighborhoods.

City level segregation (*between jurisdictions in a region, or inter-city***):** Race and income divides also occur *between jurisdictions in a region.* A region could be very diverse with equal numbers of white, Asian, Black, and Latinx residents, but the region could also be highly segregated with each city comprised solely of one racial group.

There are many factors that have contributed to the generation and maintenance of segregation. Historically, racial segregation stemmed from explicit discrimination against people of color, such as restrictive covenants, redlining, and discrimination in mortgage lending. This history includes many overtly discriminatory policies made by federal, state, and local governments (Rothstein 2017). Segregation patterns are also affected by policies that appear race-neutral, such as land use decisions and the regulation of housing development.

Segregation has resulted in vastly unequal access to public goods such as quality schools, neighborhood services and amenities, parks and playgrounds, clean air and water, and public safety (Trounstine 2015). This generational lack of access for many communities, particularly people of color and lower income residents, has often resulted in poor life outcomes, including lower educational attainment, higher morbidity rates, and higher mortality rates (Chetty and Hendren 2018, Ananat 2011, Burch 2014, Cutler and Glaeser 1997, Sampson 2012, Sharkey 2013).

1.3 Segregation Patterns in the Bay Area

Across the San Francisco Bay Area, white residents and above moderate-income residents are significantly more segregated from other racial and income groups (see Appendix 2). The highest levels of racial segregation occur between the Black and white populations. The analysis completed for this report indicates that the amount of racial segregation both *within* Bay Area cities and *across* jurisdictions in the region has decreased since the year 2000. This finding is consistent with recent research from the Othering and Belonging Institute at UC Berkeley, which concluded that "[a]lthough 7

of the 9 Bay Area counties were more segregated in 2020 than they were in either 1980 or 1990, racial residential segregation in the region appears to have peaked around the year 2000 and has generally declined since."⁴ However, compared to cities in other parts of California, Bay Area jurisdictions have more neighborhood level segregation between residents from different racial groups. Additionally, there is also more racial segregation *between* Bay Area cities compared to other regions in the state.

1.4 Segregation and Land Use

It is difficult to address segregation patterns without an analysis of both historical and existing land use policies that impact segregation patterns. Land use regulations influence what kind of housing is built in a city or neighborhood (Lens and Monkkonen 2016, Pendall 2000). These land use regulations in turn impact demographics: they can be used to affect the number of houses in a community, the number of people who live in the community, the wealth of the people who live in the community, and where within the community they reside (Trounstine 2018). Given disparities in wealth by race and ethnicity, the ability to afford housing in different neighborhoods, as influenced by land use regulations, is highly differentiated across racial and ethnic groups (Bayer, McMillan, and Reuben 2004).⁵ ABAG/MTC plans to issue a separate report detailing the existing land use policies that influence segregation patterns in the Bay Area.

⁵ Using a household-weighted median of Bay Area county median household incomes, regional values were \$61,050 for Black residents, \$122,174 for Asian/Pacific Islander residents, \$121,794 for white residents, and \$76,306 for Latinx residents. For the source data, see U.S. Census Bureau, American Community Survey 5-Year Data (2015-2019), Table B19013B, Table B19013D, B19013H, and B19013I.

⁴ For more information, see <u>https://belonging.berkeley.edu/most-segregated-cities-bay-area-2020</u>.

Definition of Terms - Geographies

Neighborhood: In this report, "neighborhoods" are approximated by tracts.⁶ Tracts are statistical geographic units defined by the U.S. Census Bureau for the purposes of disseminating data. In the Bay Area, tracts contain on average 4,500 residents. Nearly all Bay Area jurisdictions contain at least two census tracts, with larger jurisdictions containing dozens of tracts.

Jurisdiction: Jurisdiction is used to refer to the 109 cities, towns, and unincorporated county areas that are members of ABAG. Though not all ABAG jurisdictions are cities, this report also uses the term "city" interchangeably with "jurisdiction" in some places.

Region: The region is the nine-county San Francisco Bay Area, which is comprised of Alameda County, Contra Costa County, Marin County, Napa County, San Francisco County, San Mateo County, Santa Clara County, Solano County, and Sonoma County.

⁶ Throughout this report, neighborhood level segregation measures are calculated using census tract data. However, the racial dot maps in Figure 1 and Figure 5 use data from census blocks, while the income group dot maps in Figure 8 and Figure 12 use data from census block groups. These maps use data derived from a smaller geographic scale to better show spatial differences in where different groups live. Census block groups are subdivisions of census tracts, and census blocks are subdivisions of block groups. In the Bay Area, block groups contain on average 1,500 people, while census blocks contain on average 95 people.

2 RACIAL SEGREGATION IN CITY OF SAN MATEO

Definition of Terms - Racial/Ethnic Groups

The U.S. Census Bureau classifies racial groups (e.g. white or Black/African American) separately from Hispanic/Latino ethnicity.⁷ This report combines U.S. Census Bureau definitions for race and ethnicity into the following racial groups:

White: Non-Hispanic white

Latinx: Hispanic or Latino of any race⁸

Black: Non-Hispanic Black/African American

Asian/Pacific Islander: Non-Hispanic Asian or Non-Hispanic Pacific Islander

People of Color: All who are not non-Hispanic white (including people who identify as "some other race" or "two or more races")⁹

2.1 Neighborhood Level Racial Segregation (within City of San Mateo)

Racial dot maps are useful for visualizing how multiple racial groups are distributed within a specific geography. The racial dot map of San Mateo in Figure 1 below offers a visual representation of the spatial distribution of racial groups within the jurisdiction. Generally, when the distribution of dots does not suggest patterns or clustering, segregation measures tend to be lower. Conversely, when clusters of certain groups are apparent on a racial dot map, segregation measures may be higher.

⁹ Given the uncertainty in the data for population size estimates for racial and ethnic groups not included in the Latinx, Black, or Asian/Pacific Islander categories, this report only analyzes these racial groups in the aggregate People of Color category.

⁷ More information about the Census Bureau's definitions of racial groups is available here: <u>https://www.census.gov/topics/population/race/about.html</u>.

⁸ The term Hispanic has historically been used to describe people from numerous Central American, South American, and Caribbean countries. In recent years, the term Latino or Latinx has become preferred. This report generally uses Latinx to refer to this racial/ethnic group.

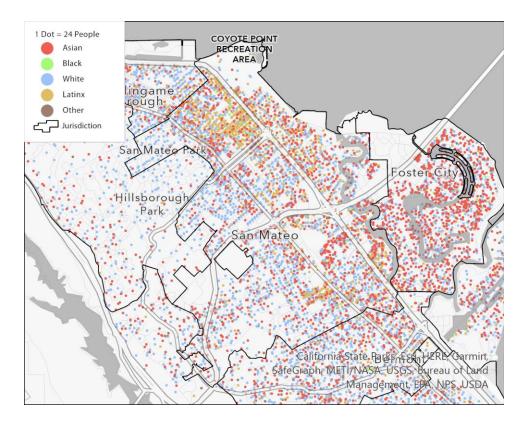

Figure 1: Racial Dot Map of San Mateo (2020)

Universe: Population. Source: U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002.

Note: The plot shows the racial distribution at the census block level for City of San Mateo and vicinity. Dots in each census block are randomly placed and should not be construed as actual placement of people.

There are many ways to quantitatively measure segregation. Each measure captures a different aspect of the ways in which groups are divided within a community. One way to measure segregation is by using an **isolation index**:

- The isolation index compares each neighborhood's composition to the jurisdiction's demographics as a whole.
- This index ranges from 0 to 1. Higher values indicate that a particular group is more isolated from other groups.
- Isolation indices indicate the potential for contact between different groups. The index can be interpreted as the experience of the average member of that group. For example, if the isolation index is .65 for Latinx residents in a city, then the average Latinx resident in that city lives in a neighborhood that is 65% Latinx.

Within City of San Mateo the most isolated racial group is white residents. San Mateo's isolation index of 0.428 for white residents means that the average white resident lives in a neighborhood that is 42.8% white. Other racial groups are less isolated, meaning they may be more likely to encounter other racial groups in their neighborhoods. The isolation index values for all racial groups in San Mateo for the years 2000, 2010, and 2020 can be found in Table 1 below. Among all racial groups in this jurisdiction, the white population's isolation index has changed the most over time, becoming less segregated from other racial groups between 2000 and 2020.

The "Bay Area Average" column in this table provides the average isolation index value across Bay Area jurisdictions for different racial groups in 2020.¹⁰ The data in this column can be used as a comparison to provide context for the levels of segregation experienced by racial groups in this jurisdiction. For example, Table 1 indicates the average isolation index value for white residents across all Bay Area jurisdictions is 0.491, meaning that in the average Bay Area jurisdiction a white resident lives in a neighborhood that is 49.1% white.

	San M	ateo	Bay Area Average	
Race	2000	2010	2020	2020
Asian/Pacific Islander	0.180	0.220	0.293	0.245
Black/African American	0.050	0.031	0.021	0.053
Latinx	0.313	0.354	0.333	0.251
White	0.627	0.527	0.428	0.491

Table 1: Racial Isolation Index Values for Segregation within San Mateo

Universe: Population.

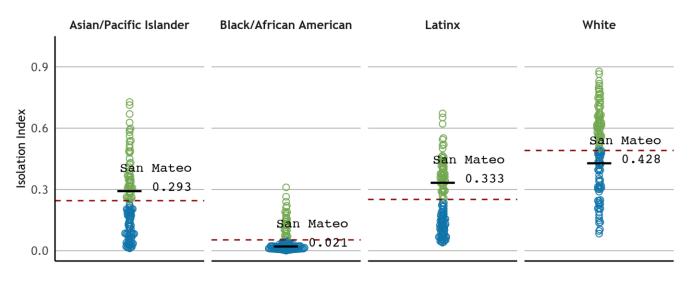

Source: IPUMS National Historical Geographic Information System (NHGIS). U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002. Data from 2010 is from U.S. Census Bureau, Census 2010, Table P4. Data for 2000 is standardized to 2010 census tract geographies and is from U.S. Census Bureau, Census 2000, Table P004.

Figure 2 below shows how racial isolation index values in San Mateo compare to values in other Bay Area jurisdictions. In this chart, each dot represents a Bay Area jurisdiction. For each racial group, the spread of dots represents the range of isolation index values among Bay Area jurisdictions. Additionally, the black line within each racial group notes the isolation index value for that group in City of San Mateo, and each dashed red line represents the Bay Area average for the isolation index for that group. Local staff can use this chart to contextualize how segregation levels for racial groups in their jurisdiction compare to other jurisdictions in the region.

¹⁰ This average only includes the 104 jurisdictions that have more than one census tract, which is true for all comparisons of Bay Area jurisdictions' segregation measures in this report. The segregation measures in this report are calculated by comparing the demographics of a jurisdiction's census tracts to the jurisdiction's demographics, and such calculations cannot be made for the five jurisdictions with only one census tract (Brisbane, Calistoga, Portola Valley, Rio Vista, and Yountville).

- - Average of Other Jurisdictions Jurisdictions with Index Value: O Below Average O Above Average

Figure 2: Racial Isolation Index Values for San Mateo Compared to Other Bay Area Jurisdictions (2020)

Universe: Bay Area Jurisdictions.

Source: IPUMS National Historical Geographic Information System (NHGIS). U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002.

Another way to measure segregation is by using a dissimilarity index:

- This index measures how evenly any two groups are distributed across neighborhoods relative to their representation in a city overall. The dissimilarity index at the jurisdiction level can be interpreted as the share of one group that would have to move neighborhoods to create perfect integration for these two groups.
- The dissimilarity index ranges from 0 to 1. Higher values indicate that groups are more unevenly distributed (e.g. they tend to live in different neighborhoods).

Dissimilarity Index Guidance for Cities with Small Racial Group Populations

The analysis conducted for this report suggests that dissimilarity index values are unreliable for a population group if that group represents approximately less than 5% of the jurisdiction's total population.

HCD's AFFH guidance requires the Housing Element to include the dissimilarity index values for racial groups, but also offers flexibility in emphasizing the importance of various measures. ABAG/MTC recommends that when cities have population groups that are less than 5% of the jurisdiction's population (see Table 4), jurisdiction staff use the isolation index or Thiel's H-Index to gain a more accurate understanding of their jurisdiction's neighborhood-level segregation patterns (*intra*-city segregation).

If a jurisdiction has a very small population of a racial group, this indicates that segregation between the jurisdiction and the region (*inter*-city segregation) is likely to be an important feature of the jurisdiction's segregation patterns.

In City of San Mateo, the Black/African American group is 1.6 percent of the population - so staff should be aware of this small population size when evaluating dissimilarity index values involving this group.

Table 2 below provides the dissimilarity index values indicating the level of segregation in San Mateo between white residents and residents who are Black, Latinx, or Asian/Pacific Islander. The table also provides the dissimilarity index between white residents and all residents of color in the jurisdiction, and all dissimilarity index values are shown across three time periods (2000, 2010, and 2020).

In San Mateo the highest segregation is between Latinx and white residents (see Table 2). San Mateo's Latinx /white dissimilarity index of 0.345 means that 34.5% of Latinx (or white) residents would need to move to a different neighborhood to create perfect integration between Latinx residents and white residents.

The "Bay Area Average" column in this table provides the average dissimilarity index values for these racial group pairings across Bay Area jurisdictions in 2020. The data in this column can be used as a comparison to provide context for the levels of segregation between communities of color are from white residents in this jurisdiction.

For example, Table 2 indicates that the average Latinx/white dissimilarity index for a Bay Area jurisdiction is 0.207, so on average 20.7% of Latinx (or white residents) in a Bay Area jurisdiction would need to move to a different neighborhood within the jurisdiction to create perfect integration between Latinx and white residents in that jurisdiction.

	San Ma	Bay Area Average		
Race	2000	2010	2020	2020
Asian/Pacific Islander vs. White	0.218	0.202	0.168	0.185
Black/African American vs. White	0.417*	0.350*	0.307*	0.244
Latinx vs. White	0.389	0.363	0.345	0.207
People of Color vs. White	0.288	0.267	0.228	0.168

Table 2: Racial Dissimilarity Index Values for Segregation within San Mateo

Universe: Population.

Source: IPUMS National Historical Geographic Information System (NHGIS). U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002. Data from 2010 is from U.S. Census Bureau, Census 2010, Table P4. Data for 2000 is standardized to 2010 census tract geographies and is from U.S. Census Bureau, Census 2000, Table P004.

Note: If a number is marked with an asterisk (*), it indicates that the index is based on a racial group making up less than 5 percent of the jurisdiction population, leading to unreliable numbers.

Figure 3 below shows how dissimilarity index values in City of San Mateo compare to values in other Bay Area jurisdictions. In this chart, each dot represents a Bay Area jurisdiction. For each racial group pairing, the spread of dots represents the range of dissimilarity index values among Bay Area jurisdictions. Additionally, the black line within each racial group pairing notes the dissimilarity index value in San Mateo, and each dashed red line represents the Bay Area average for the dissimilarity index for that pairing. Similar to Figure 2, local staff can use this chart to contextualize how segregation levels between white residents and communities of color in their jurisdiction compare to the rest of the region. However, staff should be mindful of whether a racial group in their jurisdiction has a small population (approximately less than 5% of the jurisdiction's population), as the dissimilarity index value is less reliable for small populations.

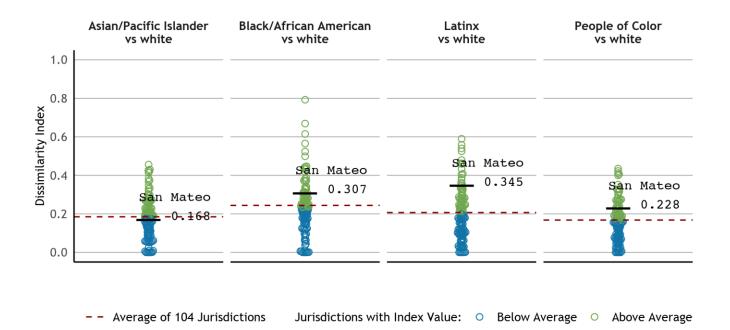

Figure 3: Racial Dissimilarity Index Values for San Mateo Compared to Other Bay Area Jurisdictions (2020)

Universe: Bay Area Jurisdictions.

Source: IPUMS National Historical Geographic Information System (NHGIS). U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002. Note: The analysis conducted for this report suggests that dissimilarity index values are unreliable for a population group if that group represents approximately less than 5% of the jurisdiction's total population. ABAG/MTC recommends that when cities have population groups that are less than 5% of the jurisdiction's population (see Table 4), jurisdiction staff could focus on the isolation index or Thiel's H-Index to gain a more accurate understanding of neighborhood-level racial segregation in their jurisdiction.

The Theil's H Index can be used to measure segregation between all groups within a jurisdiction:

- This index measures how diverse each neighborhood is compared to the diversity of the whole city. Neighborhoods are weighted by their size, so that larger neighborhoods play a more significant role in determining the total measure of segregation.
- The index ranges from 0 to 1. A Theil's H Index value of 0 would mean all neighborhoods within a city have the same demographics as the whole city. A value of 1 would mean each group lives exclusively in their own, separate neighborhood.
- For jurisdictions with a high degree of diversity (multiple racial groups comprise more than 10% of the population), Theil's H offers the clearest summary of overall segregation.

The Theil's H Index values for neighborhood racial segregation in San Mateo for the years 2000, 2010, and 2020 can be found in Table 3 below. The "Bay Area Average" column in the table provides the average Theil's H Index across Bay Area jurisdictions in 2020. Between 2010 and 2020, the Theil's H Index for racial segregation in San Mateo declined, suggesting that there is now less neighborhood level racial segregation within the jurisdiction. In 2020, the Theil's H Index for racial segregation in San

Mateo was higher than the average value for Bay Area jurisdictions, indicating that neighborhood level racial segregation in San Mateo is more than in the average Bay Area city.

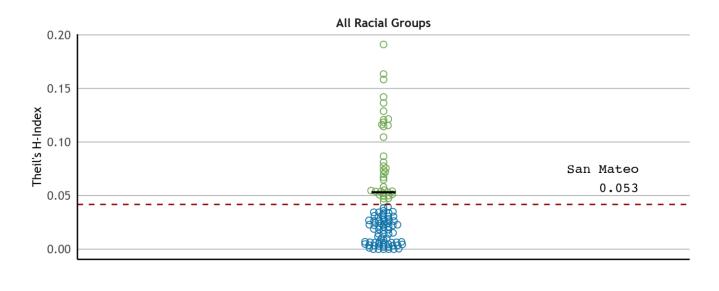

Table 3: Theil's H Index Values for Racial Segregation within San Mateo

	San M	ateo	Bay Area Average	
Index	2000	2010 2020		2020
Theil's H Multi-racial	0.089	0.071	0.053	0.042

2.2 Regional Racial Segregation (*between* San Mateo and other jurisdictions)

At the regional level, segregation is measured between *cities* instead of between *neighborhoods*. Racial dot maps are not only useful for examining neighborhood racial segregation within a jurisdiction, but these maps can also be used to explore the racial demographic differences between different jurisdictions in the region. Figure 5 below presents a racial dot map showing the spatial distribution of racial groups in San Mateo as well as in nearby Bay Area cities.

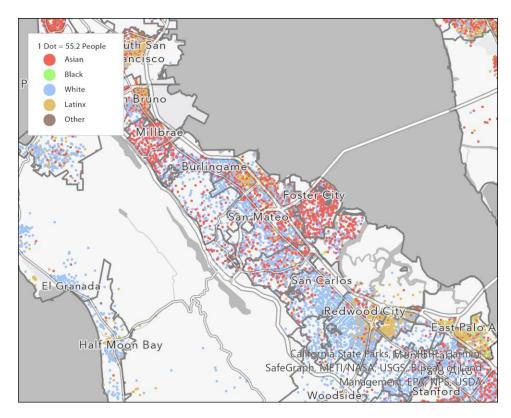

Figure 5: Racial Dot Map of San Mateo and Surrounding Areas (2020)

Universe: Population.

Source: U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002.

Note: The plot shows the racial distribution at the census block level for City of San Mateo and vicinity. Dots in each census block are randomly placed and should not be construed as actual placement of people.

To understand how each city contributes to the total segregation of the Bay Area, one can look at the difference in the racial composition of a jurisdiction compared to the racial composition of the region as a whole. The racial demographics in San Mateo for the years 2000, 2010, and 2020 can be found in Table 4 below. The table also provides the racial composition of the nine-county Bay Area. As of 2020, San Mateo has a higher share of white residents than the Bay Area as a whole, a higher share of Latinx residents, a lower share of Black residents, and a lower share of Asian/Pacific Islander residents.

Table 4: Population by Racial Group, San Mateo and the Region

	San Ma	Bay Area		
Race	2000	2010	2020	2020
Asian/Pacific Islander	14.9%	20.7%	27.8%	28.2%
Black/African American	2.5%	2.2%	1.6%	5.6%
Latinx	20.5%	26.6%	25.7%	24.4%
Other or Multiple Races	5.6%	4.1%	6.5%	5.9%
White	56.5%	46.5%	38.3%	35.8%

Universe: Population.

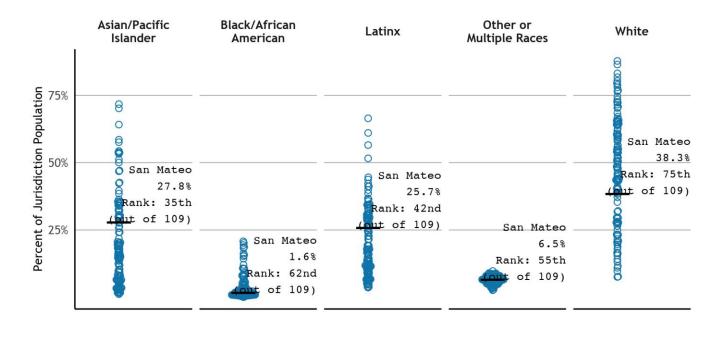

Source: IPUMS National Historical Geographic Information System (NHGIS). U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002. Data from 2010 is from U.S. Census Bureau, Census 2010, Table P4. Data for 2000 is standardized to 2010 census tract geographies and is from U.S. Census Bureau, Census 2000, Table P004.

Figure 6 below compares the racial demographics in San Mateo to those of all 109 Bay Area jurisdictions.¹¹ In this chart, each dot represents a Bay Area jurisdiction. For each racial group, the spread of dots represents the range of that group's representation among Bay Area jurisdictions. Additionally, the black line within each racial group notes the percentage of the population of City of San Mateo represented by that group and how that percentage ranks among all 109 jurisdictions. Local staff can use this chart to compare the representation of different racial groups in their jurisdiction to those groups' representation in other jurisdictions in the region, which can indicate the extent of segregation between this jurisdiction and the region.

¹¹ While comparisons of segregation measures are made only using the 104 jurisdictions with more than one census tract, this comparison of jurisdiction level demographic data can be made using all 109 jurisdictions.

0 Jurisdiction

Figure 6: Racial Demographics of San Mateo Compared to All Bay Area Jurisdictions (2020)

Universe: Bay Area Jurisdictions.

Source U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002.

The map in Figure 7 below also illustrates regional racial segregation between San Mateo and other jurisdictions. This map demonstrates how the percentage of people of color in San Mateo and surrounding jurisdictions compares to the Bay Area as a whole:

- Jurisdictions shaded orange have a share of people of color that is less than the Bay Area as a ٠ whole, and the degree of difference is greater than five percentage points.
- Jurisdictions shaded white have a share of people of color comparable to the regional percentage of people of color (within five percentage points).
- Jurisdictions shaded grey have a share of people of color that is more than five percentage points greater than the regional percentage of people of color.

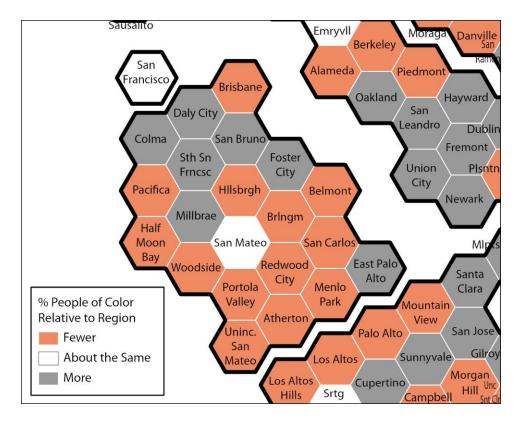

Figure 7: Comparing the Share of People of Color in San Mateo and Vicinity to the Bay Area (2020)

Universe: Population.

Source: U.S. Census Bureau, 2020 Census State Redistricting Data (Public Law 94-171) Summary File, 2020 Census of Population and Housing, Table P002.

Note: People of color refer to persons not identifying as non-Hispanic white. The nine-county Bay Area is the reference region for this map.

Segregation between jurisdictions in the region can also be analyzed by calculating regional values for the segregation indices discussed previously. Table 5 presents dissimilarity index, isolation index, and Theil's H index values for racial segregation for the entire nine-county Bay Area in 2010 and 2020. In the previous section of this report focused on neighborhood level racial segregation, these indices were calculated by comparing the racial demographics of the census tracts within a jurisdiction to the demographics of the jurisdiction as a whole. In Table 5, these measures are calculated by comparing the racial demographics to the region's racial makeup. For example, looking at the 2020 data, Table 5 shows the white isolation index value for the region is 0.429, meaning that on average white Bay Area residents live in a jurisdiction that is 42.9% white in 2020. An example of regional dissimilarity index values in Table 5 is the Black/white dissimilarity index value of 0.459, which means that across the region 45.9% of Black (or white) residents would need to move to a different jurisdiction to evenly distribute Black and white residents across Bay Area jurisdictions. The dissimilarity index values in Table 5 reflect recommendations made in HCD's AFFH guidance for calculating dissimilarity at the region level.¹² The regional value for the Theil's H index measures how

¹² For more information on HCD's recommendations regarding data considerations for analyzing integration and segregation patterns, see page 31 of the AFFH Guidance Memo.

diverse each Bay Area jurisdiction is compared to the racial diversity of the whole region. A Theil's H Index value of 0 would mean all *jurisdictions* within the Bay Area have the same racial demographics as the entire region, while a value of 1 would mean each racial group lives exclusively in their own separate jurisdiction. The regional Theil's H index value for racial segregation decreased slightly between 2010 and 2020, meaning that racial groups in the Bay Area are now slightly less separated by the borders between jurisdictions.

Index	Group	2010	2020
Isolation Index Regional Level	Asian/Pacific Islander	0.317	0.378
	Black/African American	0.144	0.118
	Latinx	0.283	0.291
	White	0.496	0.429
	People of Color	0.629	0.682
	Asian/Pacific Islander vs. White	0.384	0.369
Dissingilarity lades. Designed Laged	Black/African American vs. White	0.475	0.459
Dissimilarity Index Regional Level	Latinx vs. White	0.301	0.297
	People of Color vs. White	0.296	0.293
Theil's H Multi-racial	All Racial Groups	0.103	0.097

Data from 2010 is from U.S. Census Bureau, 2010 Census of Population and Housing, Table P4.

3 INCOME SEGREGATION IN CITY OF SAN MATEO

Definition of Terms - Income Groups

When analyzing segregation by income, this report uses income group designations consistent with the Regional Housing Needs Allocation and the Housing Element:

Very low-income: individuals earning less than 50% of Area Median Income (AMI)

Low-income: individuals earning 50%-80% of AMI

Moderate-income: individuals earning 80%-120% of AMI

Above moderate-income: individuals earning 120% or more of AMI

Additionally, this report uses the term "lower-income" to refer to all people who earn less than 80% of AMI, which includes both low-income and very low-income individuals.

The income groups described above are based on U.S. Department of Housing and Urban Development (HUD) calculations for AMI. HUD calculates the AMI for different metropolitan areas, and the nine county Bay Area includes the following metropolitan areas: Napa Metro Area (Napa County), Oakland-Fremont Metro Area (Alameda and Contra Costa Counties), San Francisco Metro Area (Marin, San Francisco, and San Mateo Counties), San Jose-Sunnyvale-Santa Clara Metro Area (Santa Clara County), Santa Rosa Metro Area (Sonoma County), and Vallejo-Fairfield Metro Area (Solano County).

The income categories used in this report are based on the AMI for the HUD metro area where this jurisdiction is located.

3.1 Neighborhood Level Income Segregation (within San Mateo)

Income segregation can be measured using similar indices as racial segregation. Income dot maps, similar to the racial dot maps shown in Figures 1 and 5, are useful for visualizing segregation between multiple income groups at the same time. The income dot map of San Mateo in Figure 8 below offers a visual representation of the spatial distribution of income groups within the jurisdiction. As with the racial dot maps, when the dots show lack of a pattern or clustering, income segregation measures tend to be lower, and conversely, when clusters are apparent, the segregation measures may be higher as well.

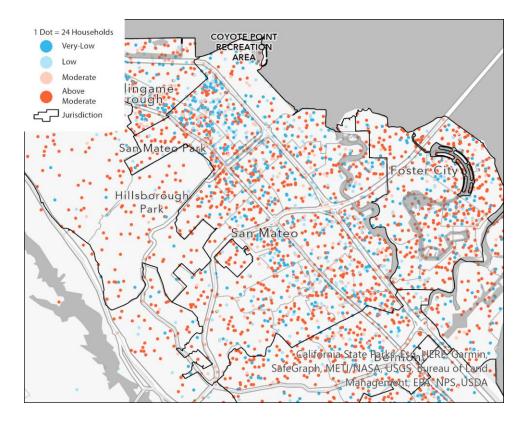

Figure 8: Income Dot Map of San Mateo (2015)

Universe: Population.

Source: U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data.

Note: The plot shows the income group distribution at the census block group level for City of San Mateo and vicinity. Dots in each block group are randomly placed and should not be construed as actual placement of individuals.

The isolation index values for all income groups in San Mateo for the years 2010 and 2015 can be found in Table 6 below.¹³ Above Moderate-income residents are the most isolated income group in San Mateo. San Mateo's isolation index of 0.420 for these residents means that the average Above Moderate-income resident in San Mateo lives in a neighborhood that is 42.0% Above Moderate-income. Among all income groups, the Very Low-income population's isolation index has changed the most over time, becoming more segregated from other income groups between 2010 and 2015.

Similar to the tables presented earlier for neighborhood racial segregation, the "Bay Area Average" column in Table 6 provides the average isolation index value across Bay Area jurisdictions for different income groups in 2015. The data in this column can be used as a comparison to provide context for the levels of segregation experienced by income groups in this jurisdiction. For example, Table 6 indicates the average isolation index value for very low-income residents across Bay Area jurisdictions is 0.269,

¹³ This report presents data for income segregation for the years 2010 and 2015, which is different than the time periods used for racial segregation. This deviation stems from the <u>data source recommended for income</u> <u>segregation calculations</u> in HCD's AFFH Guidelines. This data source most recently updated with data from the 2011-2015 American Community Survey 5-year estimates. For more information on HCD's recommendations for calculating income segregation, see <u>page 32 of HCD's AFFH Guidelines</u>.

meaning that in the average Bay Area jurisdiction a very low-income resident lives in a neighborhood that is 26.9% very low-income.

Table 6: Income Group Isolation Index Values for Segregation within San Mateo

	San Mateo		Bay Area Average
Income Group	2010	2015	2015
Very Low-Income (<50% AMI)	0.263	0.361	0.269
Low-Income (50%-80% AMI)	0.203	0.179	0.145
Moderate-Income (80%-120% AMI)	0.228	0.212	0.183
Above Moderate-Income (>120% AMI)	0.465	0.420	0.507

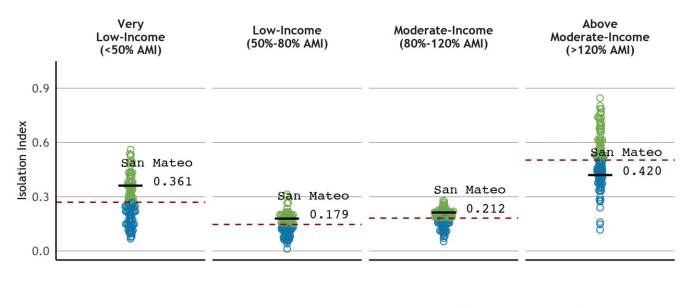

Universe: Population.

Source: Data for 2015 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data. Data for 2010 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2006-2010 Low- and Moderate-Income Summary Data.

Figure 9 below shows how income group isolation index values in San Mateo compare to values in other Bay Area jurisdictions. In this chart, each dot represents a Bay Area jurisdiction. For each income group, the spread of dots represents the range of isolation index values among Bay Area jurisdictions. Additionally, the black line within each income group notes the isolation index value for that group in San Mateo, and each dashed red line represents the Bay Area average for the isolation index for that group. Local staff can use this chart to contextualize how segregation levels for income groups in their jurisdiction compare to the rest of the region.

- - Average of Other Jurisdictions Jurisdictions with Index Value: O Below Average O Above Average

Figure 9: Income Group Isolation Index Values for San Mateo Compared to Other Bay Area Jurisdictions (2015)

Universe: Bay Area Jurisdictions.

Source: U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data.

Table 7 below provides the dissimilarity index values indicating the level of segregation in San Mateo between residents who are lower-income (earning less than 80% of AMI) and those who are not lower-income (earning above 80% of AMI). This data aligns with the requirements described in HCD's AFFH Guidance Memo for identifying dissimilarity for lower-income households.¹⁴ Segregation in San Mateo between lower-income residents and residents who are not lower-income has not substantively changed between 2010 and 2015. Additionally, Table 7 shows dissimilarity index values for the level of segregation in Albany between residents who are very low-income (earning less than 50% of AMI) and those who are above moderate-income (earning above 120% of AMI). This supplementary data point provides additional nuance to an analysis of income segregation, as this index value indicates the extent to which a jurisdiction's lowest and highest income residents live in separate neighborhoods.

Similar to other tables in this report, the "Bay Area Average" column shows the average dissimilarity index values for these income group pairings across Bay Area jurisdictions in 2015. For example, Table 7 indicates that the average dissimilarity index between lower-income residents and other residents in a Bay Area jurisdiction is 0.198, so on average 19.8% of lower-income residents in a Bay Area jurisdiction would need to move to a different neighborhood within the jurisdiction to create perfect income group integration in that jurisdiction.

¹⁴ For more information, see page 32 of HCD's AFFH Guidance Memo.

In 2015, the income segregation in San Mateo between lower-income residents and other residents was higher than the average value for Bay Area jurisdictions (See Table 7). This means that the lower-income residents are more segregated from other residents within San Mateo compared to other Jurisdictions in the region.

Table 7: Income Group Dissimilarity Index Values for Segregation within San Mateo

	San Mateo		Bay Area Average
Income Group	2010	2015	2015
Below 80% AMI vs. Above 80% AMI	0.241	0.247	0.198
Below 50% AMI vs. Above 120% AMI	0.325	0.378	0.253

Universe: Population.

Source: Data for 2015 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data. Data for 2010 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2006-2010 Low- and Moderate-Income Summary Data.

Figure 10 below shows how dissimilarity index values for income segregation in San Mateo compare to values in other Bay Area jurisdictions. In this chart, each dot represents a Bay Area jurisdiction. For each income group pairing, the spread of dots represents the range of dissimilarity index values among Bay Area jurisdictions. Additionally, the black line within each income group pairing notes the dissimilarity index value in San Mateo, and each dashed red line represents the Bay Area average for the dissimilarity index for that pairing. Local staff can use this chart to contextualize how segregation levels between lower-income residents and wealthier residents in their jurisdiction compared to the rest of the region.

25

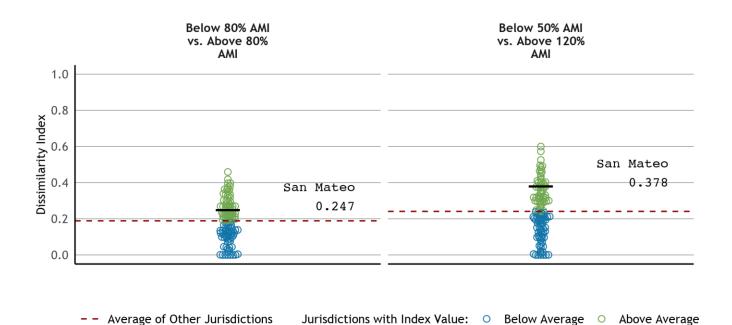

Figure 10: Income Group Dissimilarity Index Values for San Mateo Compared to Other Bay Area Jurisdictions (2015)

Universe: Bay Area Jurisdictions.

Source: U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data.

The Theil's H Index values for neighborhood income group segregation in San Mateo for the years 2010 and 2015 can be found in Table 8 below. The "Bay Area Average" column in this table provides the average Theil's H Index value across Bay Area jurisdictions for different income groups in 2015. By 2015, the Theil's H Index value for income segregation in San Mateo was about the same amount as it had been in 2010. In 2015, the Theil's H Index value for income group segregation in San Mateo was higher than the average value for Bay Area jurisdictions, indicating there is more neighborhood level income segregation in San Mateo than in the average Bay Area city.

Table 8: Theil's H Index Values for Income Segregation within San Mateo

3.2 Regional Income Segregation (*between* San Mateo and other jurisdictions)

At the regional level, segregation is measured between jurisdictions instead of between neighborhoods. Income dot maps are not only useful for examining neighborhood income segregation within a jurisdiction, but these maps can also be used to explore income demographic differences between jurisdictions in the region. Figure 12 below presents an income dot map showing the spatial distribution of income groups in San Mateo as well as in nearby Bay Area jurisdictions.

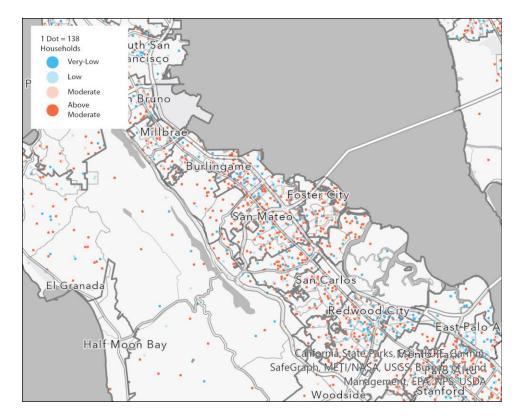

Figure 12: Income Dot Map of San Mateo and Surrounding Areas (2015)

Universe: Population.

Source: U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data.

Note: The plot shows the income group distribution at the census block group level for City of San Mateo and vicinity. Dots in each block group are randomly placed and should not be construed as actual placement of individuals.

When looking at income segregation between jurisdictions in the Bay Area, one can examine how San Mateo differs from the region. The income demographics in San Mateo for the years 2010 and 2015 can be found in Table 9 below. The table also provides the income composition of the nine-county Bay Area in 2015. As of that year, San Mateo had a higher share of very low-income residents than the Bay Area as a whole, a higher share of low-income residents, a higher share of moderate-income residents, and a lower share of above moderate-income residents.

Table 9: Population by Income Group, San Mateo and the Region

	San Mateo		Bay Area	
Income Group	2010	2015	2015	
Very Low-Income (<50% AMI)	21.73%	30.26%	28.7%	
Low-Income (50%-80% AMI)	18.48%	16.78%	14.3%	
Moderate-Income (80%-120% AMI)	19.77%	19.51%	17.6%	
Above Moderate-Income (>120% AMI)	40.01%	33.45%	39.4%	

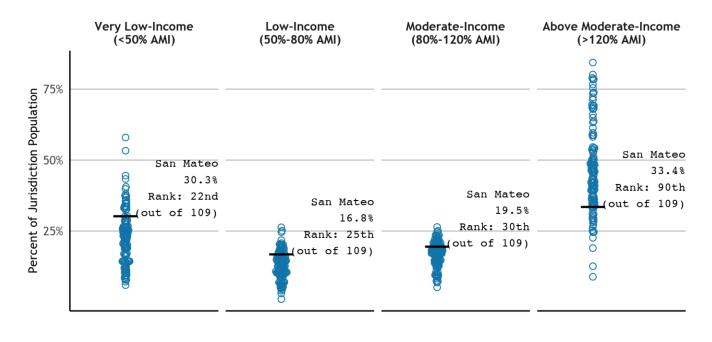

Universe: Population.

Source: Data for 2015 is from Housing U.S. Department of and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data. Data for 2010 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2006-2010 Low- and Moderate-Income Summary Data.

Figure 13 below compares the income demographics in San Mateo to other Bay Area jurisdictions.¹⁵ Like the chart in Figure 3, each dot represents a Bay Area jurisdiction. For each income group, the spread of dots represents the range of that group's representation among Bay Area jurisdictions. The smallest range is among jurisdictions' moderate-income populations, while Bay Area jurisdictions vary the most in the share of their population that is above moderate-income. Additionally, the black lines within each income group note the percentage of San Mateo population represented by that group and how that percentage ranks among other jurisdictions. Local staff can use this chart to compare the representation of different income groups in their jurisdiction to those groups' representation in other jurisdictions in the region, which can indicate the extent of segregation between this jurisdiction and the region.

Jurisdiction

Figure 13: Income Demographics of San Mateo Compared to Other Bay Area Jurisdictions (2015)

Universe: Bay Area Jurisdictions. Source: U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data.

¹⁵ While comparisons of segregation measures are made only using the 104 jurisdictions with more than one census tract, this comparison of jurisdiction level demographic data can be made using all 109 jurisdictions.

Income segregation between jurisdictions in the region can also be analyzed by calculating regional values for the segregation indices discussed previously. Similar to the regional racial segregation measures shown in Table 5, Table 10 presents dissimilarity index, isolation index, and Theil's H index values for income segregation for the entire nine-county Bay Area in 2010 and 2015. In the previous section of this report focused on neighborhood level income segregation, segregation indices were calculated by comparing the income demographics of the census tracts within a jurisdiction to the demographics of the jurisdiction as a whole. In Table 10, these measures are calculated by comparing the income demographics of local jurisdictions to the region's income group makeup. For example, looking at 2015 data, Table 10 shows the regional isolation index value for very low-income residents is 0.315 for 2015, meaning that on average very low-income Bay Area residents live in a jurisdiction that is 31.5% very low-income. The regional dissimilarity index for lower-income residents and other residents is 0.194 in 2015, which means that across the region 19.4% of lower-income residents would need to move to a different jurisdiction to create perfect income group integration in the Bay Area as a whole. The regional value for the Theil's H index measures how diverse each Bay Area jurisdiction is compared to the income group diversity of the whole region. A Theil's H Index value of 0 would mean all jurisdictions within the Bay Area have the same income demographics as the entire region, while a value of 1 would mean each income group lives exclusively in their own separate jurisdiction. The regional Theil's H index value for income segregation decreased slightly between 2010 and 2015, meaning that income groups in the Bay Area are now slightly less separated by the borders between jurisdictions.

Index	Group	2010	2015
Isolation Index Regional Level	Very Low-Income (<50% AMI)	0.277	0.315
	Low-Income (50%-80% AMI)	0.157	0.154
	Moderate-Income (80%-120% AMI)	0.185	0.180
	Above Moderate-Income (>120% AMI)	0.467	0.435
	Below 80% AMI vs. Above 80% AMI	0.186	0.194

Universe: Population.

Source: Data for 2015 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2011-2015 Low- and Moderate-Income Summary Data. Data for 2010 is from U.S. Department of Housing and Urban Development, American Community Survey 5-Year 2006-2010 Low- and Moderate-Income Summary Data.

4 APPENDIX 1: SUMMARY OF FINDINGS

4.1 Segregation in City of San Mateo

- The isolation index measures the segregation of a single group, and the dissimilarity index measures segregation between two different groups. The Theil's H-Index can be used to measure segregation between all racial or income groups across the city at once.
- As of 2020, white residents are the most segregated compared to other racial groups in San Mateo, as measured by the isolation index. White residents live in neighborhoods where they are less likely to come into contact with other racial groups.
- Among all racial groups, the white population's isolation index value has changed the most over time, becoming less segregated from other racial groups between 2000 and 2020.
- According to the dissimilarity index, within San Mateo the highest level of racial segregation is between Latinx and white residents.¹⁶
- According to the Theil's H-Index, neighborhood racial segregation in San Mateo declined between 2010 and 2020. Neighborhood income segregation stayed about the same between 2010 and 2015.
- Above Moderate-income residents are the most segregated compared to other income groups in San Mateo. Above Moderate-income residents live in neighborhoods where they are less likely to encounter residents of other income groups.
- Among all income groups, the Very Low-income population's segregation measure has changed the most over time, becoming more segregated from other income groups between 2010 and 2015.
- According to the dissimilarity index, segregation between lower-income residents and residents who are not lower-income has not substantively changed between 2010 and 2015. In 2015, the income segregation in San Mateo between lower-income residents and other residents was higher than the average value for Bay Area jurisdictions.

4.2 Segregation Between City of San Mateo and Other jurisdictions in the Bay Area Region

• San Mateo has a higher share of white residents than other jurisdictions in the Bay Area as a whole, a higher share of Latinx residents, a lower share of Black residents, and a lower share of Asian/Pacific Islander residents.

¹⁶ The analysis conducted for this report suggests that dissimilarity index values are unreliable for a population group if that group represents approximately less than 5% of the jurisdiction's total population. ABAG/MTC recommends that when cities have population groups that are less than 5% of the jurisdiction's population (see Table 15 in Appendix 2), jurisdiction staff could focus on the isolation index or Thiel's H-Index to gain a more accurate understanding of neighborhood-level racial segregation in their jurisdiction.

• Regarding income groups, San Mateo has a higher share of very low-income residents than other jurisdictions in the Bay Area as a whole, a higher share of low-income residents, a higher share of moderate-income residents, and a lower share of above moderate-income residents.

5 APPENDIX 2: SEGREGATION DATA

Appendix 2 combines tabular data presented throughout this report into a more condensed format. This data compilation is intended to enable local jurisdiction staff and their consultants to easily reference this data and re-use the data in the Housing Element or other relevant documents/analyses.

Table 11 in this appendix combines data from Table 1, Table 2, and Table 3 in the body of the report. Table 12 in this appendix combines data from Table 6, Table 7, and Table 8 in the body of the report. Table 13 represents a duplication of Table 5 in the body of the report; Table 14 represents a duplication of Table 10 in the body of the report; Table 15 in this appendix represents a duplication of Table 4 in the body of the report, while Table 16 represents a duplication of Table 9 in the body of the report.

APPENDIX D | Attachment 5 – Quotes and Narrative from Outreach

Value of Diversity:

- "We love that we have many kinds of neighbors, socio-economically. We hope that can continue"
- "We should all have housing"

Race:

• "San Mateo... has a regrettable history wrt equity and racial discrimination... it needs to acknowledge that history and make amends."

Children/families:

• "The cost of housing is a primary reason I haven't chosen to start a family here. Even buying a one-bedroom apartment is out of reach for dual-income couple with no kids."

Intergenerational connections (there are lots of comments about people's children or retired parents not being able to afford to stay in area):

- "My children want to be able to stay in San Mateo. They are college age but don't make lots of money. Housing in this area is too expensive for them to stay."
- "I am retired and I am going to have to move to Rosedale because I cannot afford to pay rent after 60 years of living in San Mateo."

Accessibility:

- "City needs more single level 2-3 BR condos targeted to active senior downsize market"
- "2 stories [second floor walkup apartments] are bad because my legs are hurt."

Geographic Segregation:

• "We need to distribute additional housing throughout the city to avoid ghettoization."

Anti-Renter Policy Environment:

- "I'm a renter and have come to peace knowing I can never afford to buy a house here in San Mateo. But I love the area so much. I cannot afford another rent hike. The next one will probably force me to move away. I want to stay but the high cost of living will eventually push me out. Please in your planning process, keep renters in mind."
- "Current home owners act as a rent seeking cartel, discouraging any change despite the negative externalities this imposes on everyone else. This is ethically dubious and should be discouraged or penalized."

Disparate Impact (extreme cost of market rate, and relatively high cost of affordable housing itself has discriminatory results):

- "It is too expensive to live here"
- "All of the new building projects thus far are ridiculously expensive and [does] nothing to help anyone except tech employees. Who else can afford\$3000+ for a studio or one bedroom? Because the new places are so expensive, even the "affordable housing" is simply out of reach for the average person."

• "I have to move b/c its getting too expensive I will move away from county to an in law unit with relatives in Marin."

Othering of housing/urban/density

- "Single family home type zoning laws are a huge issue, especially for large lot sizes. Everyone who already owns a home thinks that a new neighbors home is a "development" (negative connotation), but not his/her existing home. We need to educate existing home owners about how the homelessness crisis is related to decrease in affordable housing which is caused by scarcity of housing in the area."
- "The jobs housing imbalance is due to bay area cities allowing lots of new office space to be built but rejecting new housing. High cost housing is fundamentally a supply problem. Nimby-ism has to stop. The Peninsula is now an urban area"
- "Some kind of legislation should be passed to limit landowners greed. These are people who inherited property they are lucky"

Not exactly Fair Housing, but a handful of responses for allowing pets in housing:

"[There is a] great need for 1–2-person small residences with allowed pets"

Other quotes not AFH:

• "I know there has been a log of pushback about duplexes/ADUs/multiple-unit housing in singlefamily zoned neighborhoods. I happen to think that this would be a helpful solution and would welcome it in my neighborhood."

Additional Communications:

- From: chad Sent: Friday, October 22, 2021 4:52 PM
 - Linda; thank you for your reply. i appreciate the clarification. since the project meets ordinances, i think this is probably irrelevant, but just want to note that i'm not sure that this is enough off-site parking for projects in this neighborhood. i'm aware of several rental units on this block that have 4-6 adults in a 2 bedroom unit each with their own vehicles. i dont blame them, i cant afford rent anymore than them. but every time there is another project in our neighborhood that converts a single house to a multi-dwelling unit, it only exacerbates the difficult parking situation here. thats not so much a concern related to this particular project vs. questioning whether the ordinances/zoning for north central overall need to be updated/rethought; but at least wanted to make sure it got communicated.
- 10/9/21, Dia de los Muertos LL, can reach out for quotes
 - Met a San Mateo resident born and raised near the King Community Center. She is now a proud homeowner in North Central but shared that it was a challenging process. She would like to see improvements in her community (North Central) for pedestrian safety, traffic and more housing resources.
- 10/27/21, Storytime in Central Park LL & NV

- A participant shared that her mother received a 60-day notice in south city. She is looking for more affordable housing options such as senior housing to move her mother into. She plans to attend the 11/2 workshop.
- 11/8/2021, Phone Call
 - A landlord in San Mateo called into comment his frustration regarding the Housing Element process. He stated that he dislikes density and wants the City to push back on RHNA numbers as well as SB 9. He loves living single family neighborhood and wants there to be less ADUs. He believes that housing affordability is an impossible goal to ever fully attain and wants the city to consider lowering it as priority in order to preserve space for other uses such as the golf course.
- Todd
 - Hello Housing Division, I am a seven-year resident of San Mateo, and my wife was born and raised here. We have three kids in the public schools. We live in a single family home at XXX Drive. Your recent housing flyer says that the city "must ... prepare for future growth," but Bay Area growth has been happening for several years already and San Mateo is behind on the production of housing. We need new housing to support prior growth, not just future growth. I strongly support any and all forms of new housing, including apartment buildings. To preserve what little open spaces remain, it seems to me that building up and building densely is the way to go. The Bay Meadows development is a good start, and I appreciate its "smart growth" walkable layout and proximity to public transport (though I wish some of the new office buildings over there had been housing instead). San Mateo's approach to housing is a lot better than that of the smaller cities and towns on the Peninsula. Nevertheless, many people who work here cannot afford to live here, such as the vast majority of our children's teachers. Keep building!
- Laureen
 - Dear Committee, I am a property owner and have lived in the San Mateo area for over 45 0 years and have run a business for over 35 years. I have fond memories of my life here and I love this area. It has timely beauty, thus I too, am concerned about affordable housing. I am all for helping people find a place to live affordably and I am concerned with the well-being of all San Mateo residents. My question is this: along with other neighbors in close proximity to us from So. San Francisco to Redwood City who face the same dilemma, what do you do about the traffic, the noise, the parking and the pollution that severely impact an overcrowded small town? I am a native of San Francisco and have watched such a beautiful city become overbuilt and esthetically destroyed. No one wants to go there on a vacation or for example, downtown Market Street, because of the crime. You simply can't blame it all on COVID! Now the peninsula is being destroyed as well. Who is really benefiting from this but big league Contractors who bid on these projects. San Francisco esthetically looks atrocious. What a shame! Now they want to ruin San Mateo to line their pockets. How does that better serve the needs of our community and improve housing by destroying our lifestyle? It's a proven fact that overcrowded towns and cities experience more crime, unemployment, poor sanitation and the spread of disease. May I ask how these issues and concerns are being addressed?

APPENDIX D | Attachment 6 – State Fair Housing Laws

This appendix summarizes key State laws and regulations related to mitigating housing discrimination and expanding housing choice.

California Fair Employment and Housing Act (FEHA) (Part 2.8 (commencing with Section 12900) of Division 3 of Title 2) is the State fair housing law that prohibits those engaged in the housing business—landlords, real estate agents, home sellers, builders, mortgage lenders, and others—from discriminating against tenants or homeowners.

California law protects individuals from illegal discrimination by housing providers based on:

- ➢ Race, color
- Ancestry, national origin
- Citizenship, immigration status
- Primary language
- > Age
- > Religion
- Disability, mental or physical
- Sex, gender
- Gender identity, gender expression
- Marital status
- Familial status
- Source of income
- Military or veteran status

Government Code section 65008. Covers actions of a city, county, city and county, or other local government agency, and makes those actions null and void if the action denies an individual or group of individuals the enjoyment of residence, landownership, tenancy, or other land use in the State because of membership in a protected class, the method of financing, and/or the intended occupancy.

- For example, a violation under Government Code section 65008 may occur if a jurisdiction applied more scrutiny to reviewing and approving an affordable development as compared to market-rate developments, or multifamily housing as compared to single family homes.
- Government Code section 65008, subdivision (e), authorizes preferential treatment of affordable housing

Government Code section 8899.50 requires all public agencies to administer programs and activities relating to housing and community development in a manner to affirmatively further fair housing and avoid any action that is materially inconsistent with its obligation to affirmatively further fair housing.

Government Code section 11135 et seq. requires full and equal access to all programs and activities operated, administered, or funded with financial assistance from the State, regardless of one's membership or perceived membership in a protected class.

ROOT POLICY RESEARCH

 $[\]mathsf{CA}$ fair housing laws, $\mathsf{Page}\,1$

Density Bonus Law (Gov. Code, section 65915) requires California jurisdictions to adopt ordinances that specify how density bonuses will be offered to incentivize affordable housing. The State law contains the minimum specifications for density bonuses.

Housing Accountability Act (Gov. Code, section 65589.5) prohibits local agencies from disapproving housing developments, including farmworker housing and emergency shelters, or requiring conditions that make such housing infeasible except under certain conditions specified in the law.

No-Net-Loss Law (Gov. Code, section 65863) is meant to ensure that development opportunities remain available throughout a jurisdiction's regional housing need allocation (RHNA) period, especially for low-and moderate-income households. It prohibits jurisdictions from lowering residential densities without substantial evidence.

Least Cost Zoning Law (Gov. Code, section 65913.1) requires jurisdictions to designate and zone sufficient vacant land for residential use with sufficient standards in relation to growth projections.

Excessive subdivision standards (Gov. Code, section 65913.2) prohibits jurisdictions from imposing design criteria that make residential development infeasible.

Limits on growth controls (Gov. Code, section 65302.8) describes how flood plains are used in comprehensive planning and zoning.

Housing Element Law (Gov. Code, section 65583, esp. subds. (c) (5), (c) (10) governs State-required Housing Elements.

Table A – Prior Housing Element Evaluation

1 INTRODUCTION

The update of the Housing Element provides an opportunity to reflect on past achievements and challenges, identifying what is working, and what are the impediments in meeting the City of San Mateo's housing needs.

The following summary highlights key accomplishments and challenges from the previous Housing Element's planning period (2015 to 2023). This information will help ensure that the updated element for 2023 to 2031 builds on success, responds to lessons learned, and positions the City to better achieve the community's housing priorities.

A more detailed program-by-program review of progress and performance is in Table A.

2 ACHIEVEMENTS

Implementation of San Mateo's Housing Element over the past eight years has resulted in a number of achievements:

2.1 Progress Towards Meeting Affordable Housing Goals

Through a combination of policy changes, planning, investment and use of city land, the City is making progress towards meeting its affordable housing goals—both for creating new units and rehabilitating existing units. This is a big accomplishment, and the result of a lot of hard work and support from the City Council. The City's specific plans have played a key role in laying the groundwork along with city-owned land assets and affordable housing funds. Key projects included:

- **Kiku Crossing,** which includes 225 affordable units on city-owned land adjacent to the Caltrain tracks in addition to a parking structure that serves both residents of these units and the downtown. The project broke ground in 2022, but the certificate of occupancy will be granted during the 6th cycle of the Housing Element.
- Montara, in which the City has negotiated an acre of land for affordable housing as part of the overall master plan for this significant new area of redevelopment in close proximity to the Caltrain station and other amenities. The development has 68 affordable units with a set aside of 12 units for formerly homeless veterans.
- Station Park Green, a multi-phased transit-oriented housing development which will place hundreds of new housing units near the Hayward Park Caltrain station. As of 2022, three phases have been completed, creating 492 new units with 49 of them being available at 50% AMI due to the City's Below Market Rate inclusionary ordinance.
- **Rehab Housing:** As of the end of 2021, 246 rehabilitation projects were completed on homes owned by low-income households through City of San Mateo programs. As a result, low-income families were able to stay in their homes which were naturally affordable.

2.2 New Policies to Generate Affordable Housing Funds

In 2016 the City adopted a new ordinance to establish a commercial linkage fee, which has generated over \$7 million. There are three tiers of pricing for the fee, with retail/service at \$5.40 per square foot, hotel at \$10.79 per square foot, and office/research at \$26.99 per square foot. In addition to this, the City increased its Inclusionary Housing requirement, which is now at 15% for rental housing at 80% Area Median Income (AMI) and 15% for ownership housing at 120% AMI. Additional affordable units can be provided for bonuses and concessions.

2.3 Market Rate Housing Goals Were Met

Developers built 1,784 new units of "above moderate income" housing between 2015 and 2022, exceeding our housing need target (RHNA) for this income category by 44% percent. The reasons for success in this income bracket are because the demand for housing is high while rents and sales prices for these units make the projects comparatively more economically viable.

2.4 Increased Production of Accessory Dwelling Units

Accessory dwelling units, or ADUs (often referred to as second units or in-law units) have become increasingly popular after the City adopted a new ADU ordinance in response to changes in State law. Since these changes were enacted, interested homeowners are able to add ADUs to their property with ease, which helps to create new rental housing in existing neighborhoods. Prior to these changes, the City averaged completing between 2 and 5 ADUs each year. The City is now receiving between 40 and 60 applications a year as a result, and continues to work to provide better information and other resources to help homeowners interested in creating ADUs, including updating its zoning code requirements to provide additional flexibility on size and height requirements beyond state minimums.

2.5 Accessing New Funding Sources from Non-local Sources

In 2020, the City began receiving the Permanent Local Housing Allocation (PLHA) grant from HCD. One portion of the grant is being utilized for subsidizing tenant services in special needs affordable housing while the remainder of the funds were used to develop and fund a new rapid rehousing program. The City anticipates continuing to receive this funding as an annual formula grant and plans to use it to increase housing affordability within the City.

2.6 Increasing efficiency in the Housing Development Process

One of the local responses to the emerging COVID-19 pandemic included streamlining the development process, which has now switched to an all-electronic plan submittal and review process. The City will continue this progress to provide clear, measurable guidance for multifamily developments using modern technology.

2.7 Interventions to Preserve Affordable Housing

In the previous Housing Element cycle, two affordable housing projects that had expiring agreements on their BMR units were identified. Through collaborative efforts between staff and housing managers, new agreements on both Lesley Park Towers and Humboldt House were able to extend their affordability through a new rehabilitation HOME loan and contract extensions respectively.

2.8 Addressing Special Needs Populations

The City of San Mateo took several actions to address the unique housing challenges faced by special needs populations. The Community Development Block Grant (CDBG) program provided funding for a non-profit organization which provides legal advocacy for individuals living in long-term care to address the needs of the elderly. The City's reasonable accommodation policy and residential accessibility rehabilitation programs were supported to aid persons with disabilities. The PLHA program provided funding for a rapid rehousing program and assisted in the creation of a resident services program for affordable housing units which are occupied by formerly homeless individuals. Both programs were created to assist persons experiencing homelessness. In the upcoming housing element cycle, opportunities to create new policies to address the needs of large households, female headed households and farmworkers willcan be explored.

3 CHALLENGES

The City was unable to meet all of the goals set forth by the previous Housing Element. The following challenges were experienced:

3.1 A Divided and Polarized Vision for the Future of the City

While there has been strong support for the new programs and policies implemented to increase housing affordability, some members of the community fear the impact that height and density could have on their neighborhoods. They are also concerned about increased traffic, despite the City's focus on Transit Oriented Development (TOD). This has resulted in voter initiatives to limit new development. The City has had to strike a balance that is fair for all members of the community while responding to housing responsibilities.

3.2 High Land and Construction Costs

With the exception of building housing for the upper end of the market, it is difficult to build more affordable housing without some form of incentive and subsidy. The barrier of land cost causes the City to struggle to find new sites for all types of development.

3.3 Outdated Housing Programs and Policies

In the previous Housing Element, some items under the Goals, Policies, and Programs, such as those focused on protections for design of single family neighborhoods, were either misplaced and would have been better located in the Urban Design element or were potentially undermining other housing goals through not incentivizing or furthering affordable housing development. This list has been updated in the current cycle to ensure the City has the tools available in the form of goals, policies and programs that can best respond to the current and emerging housing challenges.

In addition, prior programs generally did not specifically address the needs to special needs groups, including people with disabilities, farmworkers, seniors and others. The new Housing Element includes more targeted programs to reach various special needs group, including but not limited to the Fair Housing Action Plan.

3.4 Falling Short of Quantified Objectives

In the previous Housing Element Cycle, the City estimated that a grand total of 3,164 housing units would be made through both construction and preservation. The combination of all the above challenges led the City to struggle to meet this goal, with a total of 2,573 units by 2022. See the tables below:

Table 1: Quantified Objectives, 2015-2022

*Information is current as of January 2022, unit counts are expected to increase.

4 **OPPORTUNITIES**

Through the existing work efforts and trends, the City has taken lessons learned to incorporate in the updated Housing Element:

4.1 Rewrite the Zoning Code

Several items have been identified in the current zoning code that will require revisions to facilitate affordable housing development to meet a diverse set of housing challenges. The City plans to adopt objective design standards, minimum density, by-right designation, single family revisions, and to amend the housing overlay. City staff plan to research what practices can best encourage missing middle housing, special needs housing, supportive housing, farmworker housing, and many others.

4.2 The General Plan Update

While COVID-19 has delayed the update process, the City has met with a team to coordinate land use and zoning changes with housing needs. The General Plan update will help address many of the community's development-related concerns, for example by complementing extra height and density with community benefits. The City aims to add an additional consultant to help craft a package of measurable community benefits, that can be used in conjunction with density bonus requirements above state minimums, to provide developer with options.

4.3 New Opportunities for Transit Oriented Development

In 2021, the City welcomed the opening of the new Hillsdale Caltrain station and throughout 2020 – 2022, parts of the Master Bike Plan began to be implemented around the North Central Neighborhood. These changes reflect developments being made in non-auto dependent modes of transportation, may lead to more non-auto centric housing choices. Opportunities for increased diversity in housing forms may soon follow.

4.4 Creative Solutions to Site Limitations

This may include finding new types of feasible sites for development, such as repurposing retail, strip shopping centers, older low-rise office buildings and more. As demonstrated by recent projects and developer interest, this solution is viable to max out development potential in underutilized areas in order to meet requirements set by the Regional Housing Needs Allocation (RHNA).

4.5 More Uses for Technology to Increase Efficiency of Housing Programs

The City has begun the process of improving the webpage to make housing programs more accessible to the typical applicant. With new collaboration, the changes can also make service providers more connected to their prospective clients. In addition, the City has joined other jurisdictions in putting support behind a County-wide effort to establish a centralized electronic BMR unit portal to match people to units more efficiently than ever before.

4.6 New Affordable Housing Opportunities Identified

The "Talbots Toy's" site is currently a City-owned site within the downtown area within 0.5 miles of transit and many other amenities such as parks and grocery. The City has received a pre-application from a private developer for future development of affordable housing and has leased the site to them for \$1 per year. Additionally, the City has acquired another site located a block away called the Ravioli site, which the City anticipates highlighting for future redevelopment.

APPENDIX E | TABLE A – Prior Housing Element Evaluation

Program No./Name	Description and Objective	Timeframe and Achievements	Recommendation			
Goal 1: Protecting and Conserving Existing Housing						
H 1.1 Residential Protection	Consider policy during the Special Use Permit process with respect to the intrusion of incompatible uses and overconcentration of non-residential uses; during the Site Plan and Architectural Review process with respect to adequate buffers; and during design review of developments, on the design character of neighborhoods.	The City has adopted zoning code amendments which limit the over- concentration of non-residential uses in residential zoning districts while at the same time allowing for provision of Special Use Permit request to provide for case-by-case review of facilities which meet identified community needs. Case-by-case evaluation of the impact of non-residential land uses has occurred with all Special Use Permits. Adequate buffers between residential and non-residential uses are reviewed during the initial plan check. Zoning code provisions require quantitative setbacks and buffers to ensure that both the residential and non- residential uses are protected. <i>Timeline: Ongoing</i>	Move to Land Use Element, amend as appropriate			
H 1.2 Single Family Preservation	Consider potential impacts on intact single- family neighborhoods during the review of land use changes and special use permits for proposed development other than single family dwellings; also consider buffering provisions during the design review process.	Review of Special Use Permits for development near single-family neighborhoods are reviewed for land use compatibility including findings that the granting of such permit would not adversely affect the general health, safety, or welfare of the community. Multi-family Dwelling Design Guidelines and Zoning Code	Remove			

			requirements include provisions to ensure new multi-family developments are designed to transition to nearby single-family residences through tiered building heights and massing. In multi-family zoned properties that abut single-family zones, there are increased setbacks and buffers to ensure that the impact to single family neighborhoods is reduced. Additional buffering above and beyond the quantitative requirements outlined in the Zoning Code is considered during the design review process. <i>Timeline: Ongoing</i>	
H 1.3	Housing Rehabilitation	Continue funding for a free minor home repair program with a goal of 125 minor home repairs for Low-Income Households. Encourage energy and water retrofits in existing housing stock through this program.	2015: Rehabs = 38 2016: Rehabs = 53 2017: Rehabs = 38 2018: Rehabs = 30 2019: Rehabs = 36 2020: Rehabs = 23 2021: Rehabs = 28 <i>Running Total: Rehabs = 246</i> <i>Timeline: Ongoing, current goal 16/year.</i>	Retain, amend as appropriate
H 1.4	Code Enforcement	Continue code enforcement efforts and provide staff as needed to improve residential areas. Continue use of administrative citations and fees, civil penalties, and civil and criminal litigation to bring about compliance.	The City continues its enforcement efforts and provides staff to improve residential areas through abatement, administrative citations and fees, civil penalties, and civil litigation to bring about compliance. The City also uses court ordered inspection and abatement warrants to enter, inspect, and clean up hoarders and residential junkyards that present immediate health and safety	Move to Land Use Element, amend as appropriate

		violations. <i>Timeline: Ongoing</i>	
H 1.5 Building Bulk	Through plan check review of single-family dwellings and duplex buildings, ensure compliance with both the single family and duplex regulations and design guidelines that control the bulk of and height of buildings.	Plan checking of single-family dwellings is ongoing. Second-story additions to single- family dwellings, new single-family dwellings, and duplexes require design review. Adopted Single Family Design guidelines to help control the bulk and height of second- story additions and new single-family dwellings. These guidelines help protect against over-sized additions and new construction in R-2 zoning districts. <i>Timeline: Ongoing</i>	Move to Urban Design Element, as appropriate
H 1.6 Variances and Lot Divisions	Consider existing neighborhood character during variance and subdivision review.	Existing neighborhood character continues to be considered in the review of all variance and lot split applications. Property and building characteristics of properties in the vicinity of any variance or lot split application become the basis of findings and recommendations for these types of applications. <i>Timeline: Ongoing</i>	Remove
H 1.7 Retention of Existing Lower Income Units	 Monitor Lesly Park Towers to ensure refinance, guaranteeing affordability upon the expiration of existing covenants. Coordinate extension of existing City Loan terms and affordability requirements for Humboldt House. Support regional and local efforts to address renter displacement. Examine issues 	Accomplishments: 1) Lesley Towers was able to secure a loan from HUD to complete full upgrades of the building and to preserve the building as senior affordable housing for an additional 40 years. 2) Affordability extension for Humboldt House for 2021-2041 approved.	Completed - update and retain

	for City Council review and establish strategies as warranted.	3) The City continues communications with the County Housing Authority and Department of Housing for ongoing opportunities. During Spring 2016 the City's Housing Task Force finalized its report to Council. The task force was not able to agree on recommending any specific renter displacement policies to Council. During November 2016, City voters rejected Measure Q, a rent stabilization and just- cause for eviction measure on the ballot. In November 2017, the City adopted its Assessment of Fair Housing. In 2019 the City adopted Relocation Assistance Ordinance for tenants displaced due to unsafe conditions, as determined by Code Enforcement. The City also budgeted funds to front relocation assistance in urgent situations. <i>Timeline: 1) 2015; 2) 2020; 3) 2016</i>	
H 1.8 Condominium Conversion	Continue the existing policy of protecting existing residents by offering purchase opportunities, long-term leases, and relocation assistance.	There were zero (0) condo conversions in 2018. There were two (2) condo conversions in 2019. There were zero (0) condo conversions in 2020 and 2021. <i>Timeline: Ongoing</i>	Retain, amend as appropriate
H 1.9 Demolitions	Prohibit the demolition of existing residences until a building permit for new construction has been issued unless health and safety problems are present. Prevent housing stock from becoming health and safety hazards through code enforcement.	Demolition ordinance will continue to be implemented. Code enforcement will continue to be implemented. <i>Timeline: Ongoing</i>	Retain and revise

Goal 2: Encouraging New	w Housing Construction		
H 2.1 Fair Share Housing	Monitor housing production against ABAG Fair Share Allocation. (Regional Housing Need Allocation: RHNA)	See Table B and LEAP of the San Mateo Annual Progress Report for detail. <i>Timeline: Ongoing (Annual)</i>	Retain
H 2.2 Jobs/Housing Balance	Monitor housing production against new job creation.	The City continues to work toward addressing the jobs-housing balance. The jobs-housing ratio is based upon number of jobs per employed resident and is considered balanced the closer the ratio is to 1.00. <i>Timeline: Ongoing (Annual)</i>	Move to land use element, amend as appropriate
H 2.3 Public Funding of Low/Moderate Income Housing	Set aside 20% of general fund property tax revenues from former RDA areas, aka "boomerang funds" Assist: 1) 50 Extremely Low units 2) Assist 85 Very Low units 3) 10 Low Income units 4) 60 Moderate income units	City set aside "boomerang funds" for housing from 2015-19, but not in 2020 due to fiscal constraints of the General fund. 1) The lease-up of 60 units designated as moderate income was completed at the 2000 S. Delaware project in 2015. 2) City executed Development Agreement with BRIDGE Housing to construct 68 family rental units targeted to households 30-60% AMI. Planning approvals were obtained January 2018, project completed in August 2020, and move-ins began September 2020. 3) City has also entered into development agreement with MidPen for 225 units of AH in downtown San Mateo. Entitlements were granted in 2020 with construction estimated to start in December 2021, and construction commenced in Jan 2022. <i>Timeline Targets:</i> 1) 60 units, July 2015; 2) 60 units, July 2017;	Completed - retain

		3) 60 Units, July 2019; 4) 25 Units, July 2022	
H 2.4 Private Development of Affordable Housing	 Maintain Inclusionary Housing Requirements on ownership and rental residential developments. Implement Commercial Linkage Fee. 	 City increased the minimum inclusionary requirement from 10% to 15% for its BMR program in February 2020. The City participated in a County-wide Nexus study that was completed September 2015, and City Council adopted Commercial Linkage Fee ordinance in 2016. All non- housing projects with net-new construction of 5,000SF or greater are required to pay the fee. So far, the linkage fee has generated \$6- 7m. <i>Timeline: Ongoing</i> 	Completed - revise
H 2.5 Distribution of Low/Moderate Income Housing	Consider distribution of income level during the review of applications for the funding of affordable housing projects.	The City's current Below Market Rate program ensures that affordable housing is developed throughout the City rather than in specific areas, since it is applied on all new housing projects that contain 11 or more units. Additionally, staff tries to avoid concentration of new affordable housing in any given neighborhood. <i>Timeline: Ongoing</i>	Retain and revise
H 2.6 Rental Housing	Consider during review of applications for multi-family housing.	The decision to develop rental vs. for-sale units in multi-family projects varies with the market. Some developers do not decide whether to sell or rent units until the units are under construction and the market is evaluated at that time. <i>Timeline: Ongoing</i>	Complete - remove

H 2.7 Secondary Units	Ensure compliance with regulations, architectural standards, and design guidelines that promote design compatibility with both the principal residence and the neighborhood, provide required parking on- site, and minimize privacy impacts on adjoining properties.	Consistent with 2016 state housing legislation, the City Council adopted a new Accessory Dwelling Unit ordinance in March 2017, which allows for one Accessory Dwelling Unit as of right within residential zoning districts. Prior to the 2017 ordinance, an average of 2-3 permits were issued each year. Between April and December 2017, a total of 16 applications for ADU permits were submitted, of which seven projects were issued building permits. By 2019 numbers had increased substantially, with 45 permits issued. In 2020, 52 were issued permits and 35 were completed. The city is working on another revision of the ADU Ordinance to further streamline production in 2020. A One-stop webpage was designed to provide a user-friendly resource regarding	Retain and update
		development standards. The City developed a flat fee for ADU planning applications to limit costs. In 2021, 68 were issued building permits and 51 were completed. <i>Timeline: Ongoing</i>	
H 2.8 Single Room Occupancy	Adopt a Single Room Occupancy ordinance to allow the development of new SRO projects.	The City does not have a Single Room Occupancy (SRO) ordinance. There were no applications for SRO developments during this reporting period. An SRO ordinance will be developed in conjunction with any request for development of an SRO project. <i>Timeline: 2018</i> .	Remove

H 2.9 Multi-Family Location	Maintain multi-family zoning on specified sites consistent with the Land Use Map or Land Use Element policies.	The locations designated in this policy have been designated as multi-family residential on the Land Use Map and have been reclassified to a multi-family zoning designation. The City has maintained existing land zoned for multi-family use. Multi-family projects have been developed at Bay Meadows and throughout the Rail Corridor Plan area. <i>Timeline: Ongoing</i>	Complete - remove
H 2.10 Housing Densities	Consider density policy during the development review process.	Regulations to provide for greater density upon provision of public benefits and comprehensive multi-family guidelines have not yet been developed. Measure H (1991), Measure P (2004) and Measure Y (2020) voter initiatives established density ranges in the City. Project-specific amenities are analyzed on a case-by-case basis during the public review process. <i>Timeline: Ongoing</i>	Retain and revise
H 2.11 Senior Project Location	Consider during review of reclassification applications to the Senior Citizen Overlay district and Residential Care Facility Special Use Permits.	The City allows Senior Projects within multi- family and commercially zoned properties. The City continues to promote the development of senior housing through its use of the Senior Citizen Overlay District. The Kimochi Senior Care Facility, approved in 2013, was completed during 2016. The City will continue to identify sites which meet appropriate criteria for Senior housing, especially with a focus on proximity to transit	Complete - remove

		routes and commercial services. Timeline: Ongoing	
H 2.12 Mixed Use	Permit the construction of housing or mixed- use projects in commercial areas. Encourage mixed use in specific area plans, the El Camino Real Master Plan, and the San Mateo Rail Corridor Transit-Oriented Development Plan. Consider designation in the future plans for 42 Avenue.	Construction of mixed-use buildings are permitted in all commercial zoning districts. Applicants developing in specific areas such as the El Camino Real Master Plan and San Mateo Corridor Plan areas are encouraged to develop mixed-use buildings. <i>Timeline: Ongoing</i>	Retain and revise
H 2.13 Transportation Oriented Development (TOD)	Encourage TOD in locations near transit nodes. Ensure that proposals conform to the TOD and the San Mateo Rail Corridor TOD Plan.	The San Mateo Rail Corridor TOD Plan, and a subsequent TOD ordinance, was adopted by the City Council in 2005. This document and the subsequent specific plan and design guidelines have regulated development in rezoned properties. As of 2021, Bay Meadows has completed 927 units with 67 units approved for MU 2 & MU3, Station Park Green has built 492 units with 107 units under construction (Certificate of Occupancy anticipated in 2022). <i>Timeline: Ongoing</i>	Retain and revise
H 2.14 The Homeless	 Continue support where feasible for programs and facilities to prevent homelessness. Allow shelters a permitted use designation in Regional/Community Commercial zones. Review Buffer zones and amend code if necessary. Support home-sharing as alternative to homelessness. 	1) The City provides continuous representation and participation on the County Continuum of Care focusing on programs for prevention of homelessness and services to homeless families & individuals. The City actively participated in development of HOPE San Mateo County, the 10-year plan to end homelessness. The HOT Program (Housing Outreach Team)	Retain, amend as appropriate

started as a first-year pilot project in 2006 focused on developing a Housing First model for chronically homeless persons in Downtown San Mateo, now replicated throughout the county. The Vendome, located downtown, provides 16 units of permanent supportive housing for formerly chronically homeless individuals. First Step for Families provide 39 units for emergency and transitional shelter for families with children. Starting in 2021, The City began providing assistance for client services for formerly homeless individuals living at the Montara Affordable Housing Development as well as starting a rapid-rehousing program for individuals and families at risk of homelessness.

2) Zoning Code was amended in 2009 to allow emergency shelters in C2 and C3 Districts as a permitted use. Emergency shelters were also made a permitted use for religious institutions located in residentially zoned areas. The City's Zoning Code designates a 300ft buffer from parks and schools which will be removed during this Housing Element, in coordination with the next update to the City's Zoning Code. 3) The City supports home sharing, through funding Human Investment Project (HIP) Housing, a local non-profit whose main service is matching home-seekers with those offering space for home-sharing. Timeline: Ongoing

H 2.15	Open Choice	Continue implementation of the Fair Housing Resolution, affirmative marketing of city- subsidized housing projects, and provision of available funding for private non-profit organizations that monitor and aid those experiencing discrimination in housing choice.	The City contracts with Project Sentinel to provide Fair Housing services, monitoring, and investigation. All housing related projects or services funded by the City include affirmative marketing guidelines and are monitored on a regular basis. The City began the Assessment of Fair Housing process alongside San Mateo County and other entitlement Cities within the county in 2016. The report was completed and approved in 2017. <i>Timeline: Ongoing</i>	Retain/Update
H 2.16	Special Need Groups	1) Continue to support programs particularly designed to accommodate special needs groups. 2) Consider requests for Reasonable Accommodations to City zoning code in accordance with appropriate ordinance.	 2015: The City provided financial assistance to three non-profit organizations that provided housing, rental assistance and/or housing-related services to variety of special needs populations. Reasonable Accommodation Ordinance was adopted on 6/16/14. <i>Timeline: Ongoing</i> 	Retain/Update
Goal 3	: Incorporate Sus	tainability into Housing Development		
l	Sustainable Housing Development	Ensure future housing developed in sustainable manner.	The City has had a Green Building Ordinance since 2009 and adopted the latest state Cal- Green code effective January 2020, as well as new reach codes effective January 2021 that go beyond state building codes. In 2020, the City updated its 10-year Climate Action Plan to implement programs to increase energy and water efficiency, and to decrease auto	Retain/Update

		use, lowering greenhouse gas emissions. <i>Timeline: Ongoing</i>	
Goal 4: Increase Energy o	and Water Efficiency in Existing Residential Un	its	
H 4.1 Energy and Water Efficiency	Coordinate countywide marketing efforts to promote Property Assessed Clean Energy (PACE) financing programs to residents.	The City joined 5 PACE programs including California First, HERO, Figtree, Ygrene, and Open PACE to provide financing options to homeowners. Information about the PACE programs is being promoted through local contractors. <i>Timeline: July 2015</i>	Retain/Update

TRUE NORTH SURVEY RESULTS (EXCERPTS) - FEBRUARY 21, 2022

COMMUNITY OPINION SURVEY SUMMARY REPORT

PREPARED FOR THE CITY OF SAN MATEO

FEBRUARY 21, 2022

I N T R O D U C T I O N

Incorporated in 1894, the City of San Mateo encompasses 15.9 square miles in the San Francisco Bay Area and is currently home to an estimated 105,661 residents.¹ One of only two charter cities in San Mateo County, the City is governed by a five-member City Council, while the City's daily operations are managed by a dedicated team of employees that provide a full suite of services to residents and the local business community.

To monitor its progress in meeting residents' needs, the City engages residents on a daily basis and receives periodic *subjective* feedback regarding its performance and policies. Although these informal feedback mechanisms are a valuable source of information for the City in that they provide timely and accurate information about the opinions of specific residents, it is important to recognize that they do not necessarily provide an accurate picture of the community as a whole. For the most part, informal feedback mechanisms rely on the resident to initiate feedback, which creates a self-selection bias. The City receives feedback only from those residents who are motivated enough to initiate the feedback process. Because these residents tend to be those who are either very pleased or very displeased with a particular service or policy, their collective opinions are not necessarily representative of the City's resident population as a whole.

PURPOSE OF STUDY The motivation for the current study was to design and employ a methodology that would avoid the self-selection bias noted above and thereby provide the City with a *statistically reliable* understanding of its residents' satisfaction, priorities, opinions, and concerns as they relate to city services, facilities, and policies. Ultimately, the survey results and analyses presented in this report will provide Council and staff with information that can be used to make sound, strategic decisions in a variety of areas including service improvements and enhancements, measuring and tracking internal performance, budgeting, and community outreach.

In addition to gathering performance-related feedback, the survey was also designed to help inform the City's General Plan update. Like most California cities, the City of San Mateo relies on its General Plan to guide decisions with respect to land use, development, mobility, sustainability, and related policy matters. Although the City Council, staff, and consultants have played an important role in gathering data and organizing the update process, it was the desire of the City that the citizens of San Mateo be the true inspiration for the Plan. Accordingly, a portion of the survey was dedicated to understanding San Mateo residents' needs and opinions as they relate to issues that will be addressed in the General Plan, with a focus on mobility and how best to plan for future housing as required by State law.

To assist in this effort, the City selected True North Research to design the research plan and conduct the survey. Broadly defined, the survey was designed to:

• Identify key issues of importance for residents, as well as their perceptions of the quality of life in San Mateo;

^{1.} US Census estimate, April 2020.

- Measure residents' overall satisfaction with the City's efforts to provide municipal services, and their satisfaction with a variety of specific services;
- Gather opinions on General Plan topics with a focus on mobility and housing;
- Determine satisfaction with (and perceived effectiveness of) the City's communication with residents; *and*
- Collect additional background and demographic data that are relevant to understanding residents' perceptions, needs, and interests.

OVERVIEW OF METHODOLOGY A full description of the methodology used for this study is included later in this report (see *Methodology* on page 47). In brief, the survey was administered to a random sample of 775 adults who reside in the City of San Mateo. The survey followed a mixed-method design that employed multiple recruiting methods (mailed letters, email, text, and telephone) and multiple data collection methods (telephone and online). Administered in English and Spanish between January 21 and February 2, 2022, the average interview lasted 18 minutes.

STATISTICAL SIGNIFICANCE This is not the first statistically reliable community survey conducted for the City of San Mateo. A similar study was conducted by True North for the City in 2020, and many of the questions included in the 2022 survey were purposely tracked from the prior survey. Because there is a natural interest in tracking the City's performance in meeting the evolving needs of its residents, where appropriate the results of the current study are compared with the results of identical questions included in the 2020 survey. In such cases, True North conducted the appropriate tests of statistical significance to identify changes that likely reflect actual changes in public opinion between the prior survey (2020) and the current (2022), as opposed to being due to chance associated with selecting two samples independently and at random. Differences between the two studies are identified as *statistically significant* if we can be 95% confident that the differences reflect an actual change in public opinion between the two studies. Statistically significant differences within response categories over time are denoted by the † symbol which appears in the figure next to the appropriate response value for 2022.

ORGANIZATION OF REPORT This report is designed to meet the needs of readers who prefer a summary of the findings as well as those who are interested in the details of the results. For those who seek an overview of the findings, the sections titled *Just the Facts* and *Conclusions* are for you. They provide a summary of the most important factual findings of the survey in bullet-point format and a discussion of their implications. For the interested reader, this section is followed by a more detailed question-by-question discussion of the results from the survey by topic area (see *Table of Contents*), as well as a description of the methodology employed for collecting and analyzing the data. And, for the truly ambitious reader, the questionnaire used for the interviews is contained at the back of this report (see *Questionnaire & Toplines* on page 50), and a complete set of crosstabulations for the survey results is contained in Appendix A.

ACKNOWLEDGEMENTS True North thanks the City of San Mateo for the opportunity to conduct the study and for contributing valuable input during the design stage of this study. The collective experience, insight, and local knowledge provided by city representatives and staff improved the overall quality of the research presented here.

DISCLAIMER The statements and conclusions in this report are those of the authors (Dr. Timothy McLarney and Richard Sarles) at True North Research, Inc. and not necessarily those of the City of San Mateo. Any errors and omissions are the responsibility of the authors.

ABOUT TRUE NORTH True North is a full-service survey research firm that is dedicated to providing public agencies with a clear understanding of the values, perceptions, priorities, and concerns of their residents and customers. Through designing and implementing scientific surveys, focus groups, and one-on-one interviews, as well as expert interpretation of the findings, True North helps its clients to move with confidence when making strategic decisions in a variety of areas—such as planning, policy evaluation, performance management, establishing fiscal priorities, passing revenue measures, and developing effective public information campaigns.

During their careers, Dr. McLarney (President) and Mr. Sarles (Principal Researcher) have designed and conducted over 1,200 survey research studies for public agencies—including more than 400 studies for California municipalities and special districts.

JUST THE FACTS

The following is an outline of the main factual findings from the survey. For the reader's convenience, we have organized the findings according to the section titles used in the body of this report. Thus, to learn more about a particular finding, simply turn to the appropriate report section.

QUALITY OF LIFE

- San Mateo residents provided the most positive ratings for the overall quality of life in the City (85% excellent or good), San Mateo as a place to shop and dine (77%), and as a place to raise a family (68%).
- Although still rated favorably by over half of respondents, residents provided somewhat softer ratings for San Mateo as a place to work (62%) and as a place to recreate (59%).
- Just over one-third of residents provided a favorable rating for San Mateo as a place to retire (37%), although approximately 13% held no opinion or did not provide a rating.
- When asked what they like most about living in the City of San Mateo that city government should make sure to *preserve* in the future, residents were most apt to cite parks and recreation facilities and opportunities (24%), followed by shopping and dining opportunities (16%), proximity to surrounding cities/areas (12%), and the open/green spaces and mountains (12%). Other specific attributes that were mentioned by at least 5% of respondents included San Mateo's diversity of business, cultures, and activities (9%), small town atmosphere (8%), low crime rate/public safety (7%), downtown area (7%), and friendly people/ neighbors (6%).
- When residents were asked to indicate the one thing city government could *change* to make San Mateo a better place to live, now and in the future, providing more affordable housing was the most common (19%), followed by limiting growth and preserving open space (13%), improving public safety/more police presence (8%), and improving and maintaining infrastructure, streets and roads (7%).

CITY SERVICES

- Close to three-quarters (74%) of San Mateo residents indicated they were either very (25%) or somewhat (49%) satisfied with the City's efforts to provide municipal services. Approximately 16% were very or somewhat dissatisfied, whereas 10% were unsure or unwilling to share their opinion.
- Residents were asked to rate their satisfaction with 18 specific services provided by the City of San Mateo. Although the majority of residents surveyed were satisfied with 13 of the 16 services tested, they were most satisfied with the City's efforts to provide fire protection, prevention, and emergency medical services (94% very or somewhat satisfied), followed by maintain public buildings and facilities like City Hall, libraries, and parking garages (91%), provide parks, sports fields, and recreation facilities (87%), provide paths and trails for walking, jogging, and running (82%), and provide a variety of recreation programs for all ages (81%).
- At the other end of the spectrum, respondents were less satisfied with the City's efforts to facilitate the creation of affordable housing (33%), address homelessness (42%), manage traffic congestion (48%), and maintain local streets and roads (54%).

HOUSING & LAND USE

- Approximately two-thirds of residents indicated that there is currently too little housing that is affordable for middle-income (67%) and low-income families (64%) in the City of San Mateo.
- When asked to prioritize among a list of factors the City could consider as it plans for additional housing units as required by state law, ensuring adequate water supplies (98% at least somewhat important) was viewed as the most important factor, followed by preserving open space and creating new park lands (97%), minimizing vehicle trips and traffic congestion (95%), creating pedestrian-friendly areas that encourage people to walk rather than drive (94%), and minimizing pollution and greenhouse gas emissions (93%).
- When compared to the other items tested, respondents indicated that keeping building heights low (68%) and minimizing the number of new units added to single-family neighborhoods (68%) were the least important when planning for future housing in the City.
- When presented with the opportunity to reserve more land for parks, recreation areas, and community amenities *and* minimize change to existing neighborhoods, 63% of San Mateo residents indicated they would support concentrating new housing in higher-density buildings downtown and near transit up to 12 stories. A higher percentage (68%) indicated they would support buildings up to eight stories.

MOBILITY

- The vast majority of residents (87%) indicated they use a personal vehicle on a weekly basis when traveling within the City of San Mateo, while 45% reported that they walk from their home to a local store or restaurant at least once per week. Less than one-in-five respondents indicated that they ride a bicycle or scooter (19%), use public transit such as a bus or train (8%), or use Uber, Lyft, or a taxi (4%) at least once per week when traveling within the City of San Mateo.
- Among strategies the City could consider to reduce vehicle trips and mitigate growthinduced congestion in the future, improving safe routes to school to encourage more kids to walk and bike to school (84% high or medium priority) and improving sidewalks, crosswalks, pedestrian safety, signs and infrastructure to encourage more walking (84%) were widely viewed as the top priorities, followed by improving bus and shuttle services with more routes and more frequent service within San Mateo and to neighboring areas (71%), providing financial incentives to encourage greater use of transit use (64%), and expanding the network of dedicated bike lanes and shared lanes to encourage more bicycling (63%).
- Sixty-four percent (64%) of respondents indicated they generally support adding bike lanes and widening sidewalks in San Mateo, even if it requires removing a vehicle lane or parking spaces in certain locations.

COMMUNICATIONS

- Overall, 62% of respondents indicated they were satisfied with the City's efforts to communicate with residents through newsletters, the Internet, social media, and other means in 2022. The remaining respondents were either dissatisfied with the City's efforts in this respect (25%) or unsure of their opinion (13%).
- Thirty percent (30%) of respondents indicated the were interested in receiving more information from the City.

- The most commonly mentioned topics of interest were information about the City's future commercial and residential development plans (31%), affordable housing (13%), street/road and infrastructure maintenance (13%), environmental issues (8%), public transportation (7%), public safety/crime statistics (7%), and recreation programs (7%).
- When asked to identify the information sources they *currently* use most often for news, information, and programming in San Mateo, the most frequently cited sources were the San Mateo Daily Journal and email notifications from the City, both mentioned by 30% of respondents. These sources were followed by letters, postcards, flyers, or brochures mailed to the home from the City (24%), Nextdoor (23%), the Internet not including the City's site (18%), the City's website (15%), and friends/family/associates/word of mouth (15%).
- Respondents indicated that email was the most effective method for the City to communicate with them (84% very or somewhat effective), followed by postcards, letters, and newsletters mailed to the home (i.e., direct mail, 78%), social media like Facebook, Twitter, and Nextdoor (78%), and the City's website (72%).
- Townhall meetings (52%), television programs (41%), and advertisements in local papers (40%) were generally viewed by residents as less effective ways for the City to communicate with them.

CONCLUSIONS

As noted in the *Introduction*, this study was designed to provide the City of San Mateo with a statistically reliable understanding of its residents' satisfaction, opinions, and priorities as they relate to city services, facilities and policies, as well as topics pertinent to the General Plan update. Whereas subsequent sections of this report are devoted to conveying the detailed results of the survey, in this section we attempt to 'see the forest through the trees' and note how the collective results of the survey answer some of the key questions that motivated the research.

How well is the City performing in meeting the needs of San Mateo residents? The two years leading up to the 2022 Community Opinion Survey were punctuated by difficult and dramatic events in San Mateo. The coronavirus pandemic that arrived in early 2020 has taken lives, threatened livelihoods, and forced dramatic changes in the way residents live, work, socialize, and play. Non-essential businesses were shuttered for weeks or months at a time to curb the spread of COVID-19, and the City's operations were also adjusted to protect public health and adhere to State and County guidelines. Services that could be effectively moved to an online format were able to continue in that form, whereas other programs and services were modified, curtailed, or canceled to protect the safety of the public and City employees. Many city facilities were also closed periodically to prevent the spread of COVID-19, including City Hall.

Against this turbulent backdrop, residents' opinions of their community and city government remained positive. Approximately three-quarters of residents (74%) indicated they were satisfied with the City's overall efforts to provide municipal services, whereas just 16% were dissatisfied and the remaining 10% were unsure or did not provide a response. The percentage of respondents who indicated they were very satisfied with the City's overall performance also increased significantly between 2020 and 2022, and satisfaction was widespread across resident subgroups (see *Overall Satisfaction* on page 15).

The high level of satisfaction expressed with the City's performance *in general* was also mirrored in residents' assessments of the City's performance in providing specific services, with the highest satisfaction scores assigned to the City's efforts to provide fire protection, prevention, and emergency medical services, maintain public buildings and facilities like City Hall, libraries, and parking garages, provide parks, sports fields, and recreation facilities, provide paths and trails for walking, jogging, and running, and provide a variety of recreation programs for all ages (see *Specific Services* on page 17).

The City's performance in providing municipal services has contributed to a high quality of life for residents. Indeed, the vast majority of residents surveyed in 2022 (85%) rated the quality of life in the City of San Mateo as excellent or good, a statistically significant increase of 4% when compared to 2020. This sentiment was also widespread, with the percentage who rated the quality of life as excellent or good exceeding 75% across *every* identified resident subgroup (see *Overall Quality of Life* on page 10). When asked in an open-ended manner to describe the things they value most about living in San Mateo that they would like to preserve in the future, parks and recreation facilities and opportunities topped the list, followed by shopping and dining opportunities, proximity to surrounding cities/areas, and the open/green spaces and mountains (see *What do You Like Most About Living in San Mateo?* on page 11).

Where should the City focus its efforts in the future? In addition to measuring the City's current performance, a key goal of this study is to look forward and identify opportunities to adjust services, improve facilities, and/or refine communications strategies to best meet the community's evolving needs and expectations. Although resident satisfaction in San Mateo is generally high (see above), there is always room for improvement. Below we note some of the areas that present the best opportunities in this regard.

> Considering respondents' verbatim answers regarding what they feel city government could do to make San Mateo a better place to live (see *What Should Be Changed*? on page 13) and the levels of satisfaction found in specific service areas (see *Specific Services* on page 17), the top priorities are: facilitating the creation of more affordable housing, limiting growth/preserving open space, addressing homelessness, managing traffic congestion, maintaining local streets and roads, improving public safety, and improving city-resident communication.

> With the recommendation that the City focus on these areas, it is equally important to stress that when it comes to improving satisfaction in service areas, the appropriate strategy is often a combination of better communication and actual service improvements. It may be, for example, that many residents are simply not aware of the City's ongoing infrastructure improvement efforts, or the limits of what a city can do to address homelessness. Choosing the appropriate balance of actual service improvements and efforts to raise awareness on these matters will be a key to maintaining and improving the community's overall satisfaction in the short- and long-term.

What criteria do residents want the City to prioritize when planning for future housing?

Affordable housing (or lack thereof) has become a hot topic in many communities, increasing in saliency during the past few years along with rising rents and home prices. When asked directly, most respondents felt there was too little affordable housing (of any type) in San Mateo, and increasing the availability of affordable housing was the most frequently mentioned change that residents indicated would make San Mateo a better place to live, now and in the future. When asked to rate various criteria the City could consider as it explores different ways that it could accommodate future housing, factors related to environmental sustainability tended to rise to the top of the list among survey respondents. Of the 18 factors tested, ensuring adequate water supplies was viewed as the most important factor, followed by preserving open space and creating new park lands, minimizing vehicle trips and traffic congestion, creating pedestrian-friendly areas that encourage people to walk rather than drive, and minimizing pollution and greenhouse gas emissions. When compared to the other factors tested, respondents indicated that keeping building heights low and minimizing the number of new units added to single-family neighborhoods were the *least* important when planning for future housing in the City (see *Factors to Prioritize when Planning Housing* on page 21).

The desire to preserve land for parks and community spaces was also evident in residents' willingness to accept taller, high-density housing up to 12 stories (64%) or eight stories (68%) downtown and near transit if it would reserve more land for parks, recreation areas, and community amenities while also minimizing the impacts of new housing in existing neighborhoods (see *Building Height & Density Trade-offs* on page 26).

What actions do residents prioritize for minimizing vehicle trips and congestion in the future? One of the key challenges when planning for population growth and future housing is the issue of mobility. Put simply, adding housing and people to a community will naturally lead to more congestion and decreased mobility unless improvements are made to the transportation system to accommodate the additional demand and/or vehicle demand is mitigated through use of alternative modes. Accordingly, the survey explored the types of actions and strategies residents would prioritize for minimizing growth-induced congestion in the future.

Improving safe routes to school to encourage more kids to walk and bike to school (84% high or medium priority) and improving sidewalks, crosswalks, pedestrian safety, signs and infrastructure to encourage more walking (84%) were widely viewed as the top priorities among the actions tested, followed by improving bus and shuttle services with more routes and more frequent service within San Mateo and to neighboring areas (71%), providing financial incentives to encourage greater use of transit use (64%), and expanding the network of dedicated bike lanes and shared lanes to encourage more bicycling (63%). It is worth noting, moreover, that 64% of respondents indicated they generally support adding bike lanes and widening sidewalks in San Mateo, even if it requires removing a vehicle lane or parking spaces in certain locations (see *Mobility* on page 29).

True North Research, Inc. © 2022

QUALITY OF LIFE

The opening series of questions in the survey was designed to assess residents' top of mind perceptions about the quality of life in San Mateo, what they would most like to preserve about the City, as well as ways to improve the quality of life in San Mateo.

OVERALL QUALITY OF LIFE At the outset of the interview, respondents were asked to rate the City of San Mateo on a number of key dimensions—including overall quality of life, as a place to raise a family, and as a place to work—using a five-point scale of excellent, good, fair, poor, or very poor. As shown in Figure 1 below, the majority of residents shared favorable opinions of San Mateo on five of the six aspects tested, with the most positive ratings provided for the overall quality of life in the City (85% excellent or good), San Mateo as a place to shop and dine (77%), and as a place to raise a family (68%). Although still rated favorably by over half of respondents, residents provided somewhat softer ratings for San Mateo as a place to work (62%) and as a place to retire (37%), although approximately 13% held no opinion or did not provide a rating. It is worth noting that the percentage of residents who were unsure or unwilling to share their opinion ranged from a low of 0% for the overall quality of life to a high of 18% for San Mateo as a place to work.

Question 2 How would you rate: ____? Would you say it is excellent, good, fair, poor or very poor?

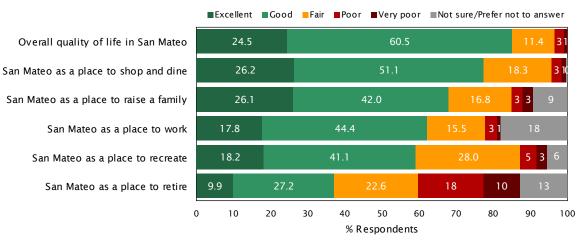

FIGURE 1 RATING CITY OF SAN MATEO

As shown in Table 1 on the next page, when compared to 2020, the percentage of respondents in 2022 who offered ratings of excellent or good increased significantly for San Mateo as a place to retire (+7%), as a place to shop and dine (+6%), as a place to work (+5%), and the overall quality of life in the City (+4%). Tables 2 through 5, meanwhile, show how the ratings for each dimension tested in Question 2 varied by length of residence, gender, age, presence of a child in the home, presence of a senior in the home, ethnicity, and home ownership. For ease of comparison, the top three ratings within each subgroup are highlighted green.

TABLE 1 RATING CITY OF SAN MATEO BY STUDY YEAR

	Study Year		Change in Excellent + Good
	2022	2020	2020 to 2022
San Mateo as a place to retire	37.0	30.3	+6.7†
San Mateo as a place to shop and dine	77.4	71.6	+5.8†
San Mateo as a place to work	62.2	57.6	+4.6†

WHAT DO YOU LIKE MOST ABOUT LIVING IN SAN MATEO? The next question in this series asked residents to identify what they like most about living in the City of San Mateo that city government should make sure to preserve in the future. Question 3 was posed in an open-ended manner, thereby allowing residents to mention any aspect or attribute that came to

mind without being prompted by—or restricted to—a particular list of options. True North later reviewed the verbatim responses and grouped them into the categories shown in Figure 2.

San Mateo residents were most apt to cite parks and recreation facilities and opportunities (24%) as what they like most about living in the City of San Mateo and would like to preserve, followed by shopping and dining opportunities (16%), proximity to surrounding cities/areas (12%), and the open/green spaces and mountains (12%). Other specific attributes that were mentioned by at least 5% of respondents included San Mateo's diversity of business, cultures, and activities (9%), small town atmosphere (8%), low crime rate/public safety (7%), downtown area (7%), and friendly people/neighbors (6%). For the interested reader, Table 6 on the next page lists the top five responses to Question 3 in 2020 and 2022.

Question 3 What do you like most about the City of San Mateo that should be preserved in the future?

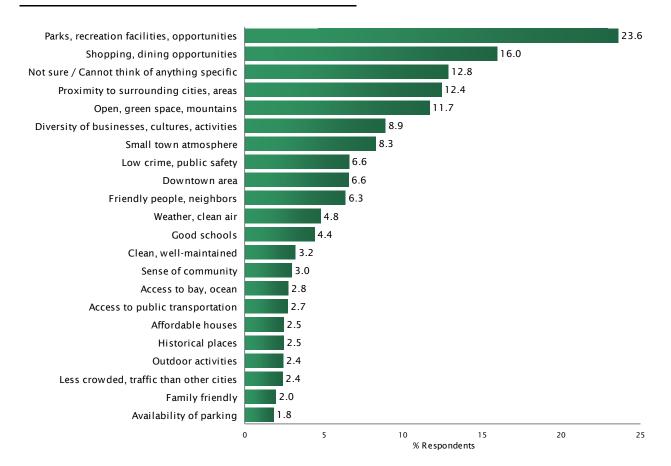

FIGURE 2 LIKE MOST ABOUT SAN MATEO

City of San Mateo

TABLE 6 LIKE MOST ABOUT SAN MATEO BY STUDY YEAR

Study Year							
2022	2020						
Parks, recreation facilities, opportunities	Parks, recreation facilities, opportunities						
Shopping, dining opportunities	Not sure / Cannot think of anything specific						
Not sure / Cannot think of anything specific	Shopping, dining opportunities						
Proximity to surrounding cities, areas	Small town atmosphere						
Open, green space, mountains	Proximity to surrounding cities, areas						

WHAT SHOULD BE CHANGED? In an open-ended manner similar to that described for Question 3, all respondents were also asked to indicate the one thing that city government could *change* to make San Mateo a better place to live. True North reviewed the verbatim responses to Question 4 and grouped them into the categories shown in Figure 3. Among the specific changes desired, providing more affordable housing was the most common (19%), followed by limiting growth and preserving open space (13%), improving public safety/more police presence (8%), and improving and maintaining infrastructure, streets and roads (7%). Approximately 14% could not think of a desired change (10%) or reported that no changes are needed (4%). Table 7 shows the top 5 responses to Question 4 in 2020 and 2022.

Question 4 If the city government could change one thing to make San Mateo a better place to live now and in the future, what change would you like to see?

CITY SERVICES

After measuring respondents' perceptions of the quality of life in San Mateo, the survey next turned to assessing their opinions about the City's performance in providing various municipal services.

OVERALL SATISFACTION The first question in this series asked respondents to indicate if, overall, they were satisfied or dissatisfied with the job the City of San Mateo is doing to provide city services. Because this question does not reference a specific program, facility, or service and requested that the respondent consider the City's performance in general, the findings of this question may be regarded as an *overall performance rating* for the City.

As shown in Figure 4, close to three-quarters (74%) of San Mateo residents indicated they were either very (25%) or somewhat (49%) satisfied with the City's efforts to provide municipal services. Approximately 16% were very or somewhat dissatisfied, whereas 10% were unsure or unwilling to share their opinion. When compared to 2020, its worth noting that the percentage of respondents indicating they were *very* satisfied with the City's performance increased significantly.

Question 5 Generally speaking, are you satisfied or dissatisfied with the job the City of San Mateo is doing to provide city services?

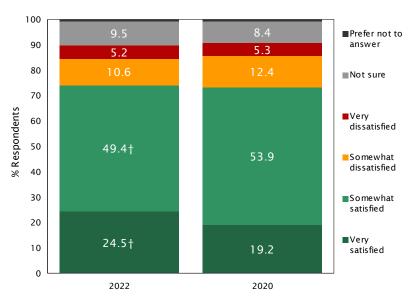

FIGURE 4 OVERALL SATISFACTION BY STUDY YEAR

 \dagger Statistically significant change (p < 0.05) between the 2020 and 2022 studies.

The next three figures display how residents' opinions about the City's overall performance in providing municipal services varied by years in San Mateo, children in the household, survey language, age of the respondent, gender, ethnicity, home ownership status, and presence of an adult 65 years and older in the household. The most striking pattern in the figures is that the solid levels of satisfaction exhibited by respondents as a whole (see Figure 4 above) were generally echoed across resident subgroups, with satisfaction ranging from a low of 62% to a high of 90%.

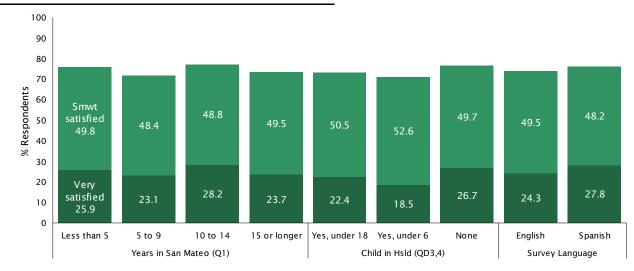

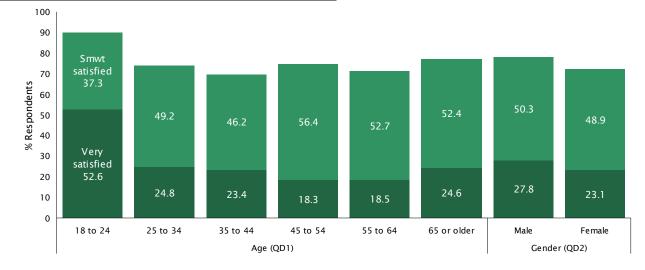

FIGURE 5 OVERALL SATISFACTION BY YEARS IN SAN MATEO, CHILD IN HSLD & SURVEY LANGUAGE

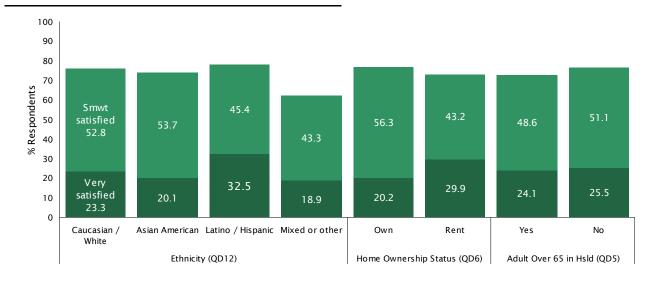

FIGURE 7 OVERALL SATISFACTION BY ETHNICITY, HOME OWNERSHIP STATUS & ADULT OVER 65 IN HSLD

SPECIFIC SERVICES Whereas Question 5 addressed the City's *overall* performance, Question 6 asked residents to rate their level of satisfaction with each of the 18 specific service areas shown in Figure 8. The order in which the service areas were presented was randomized for each respondent to avoid a systematic position bias, although they have been sorted from high to low in Figure 8 according to the percentage of respondents who indicated they were satisfied with the City's performance in providing the service. For comparison purposes between the services, only respondents who held an opinion (satisfied or dissatisfied) are included in the figure. Those who did not have an opinion were removed from this analysis.²

At the top of the list, respondents were most satisfied with the City's efforts to provide fire protection, prevention, and emergency medical services (94% very or somewhat satisfied), followed by maintain public buildings and facilities like City Hall, libraries, and parking garages (91%), provide parks, sports fields, and recreation facilities (87%), provide paths and trails for walking, jogging, and running (82%), and provide a variety of recreation programs for all ages (81%). At the other end of the spectrum, respondents were less satisfied with the City's efforts to facilitate the creation of affordable housing (33%), address homelessness (42%), manage traffic congestion (48%), and maintain local streets and roads (54%).

Question 6 For each of the services I read next, I'd like you to tell me how satisfied you are with the job the city is doing to provide the service. Are you satisfied or dissatisfied with the city's efforts to: _____, or do you not have an opinion?

	■Very sa	tisfied	Somew	hat satisfied	Somewh	at dissatisf	ìed ∎V	ery diss	atisfied
Provide fire protection, prevention and emergency medical services [85%]		4	5.3		48.6				<mark>4.3</mark> 2
Maintain public buildings and facilities like City Hall, libraries, parking garages [91%]	39.1			52.2			6.8

FIGURE 8 SATISFACTION WITH CITY SERVICES

2. The percentage who held an opinion for each service is shown to the right of the service label in brackets.

City of San Mateo

CI

Table 8 displays the percentage of respondents who were satisfied with each service by study year, and the difference between 2020 and 2022. When compared with the 2020 survey, satisfaction with the City's efforts to manage traffic congestion increasing significantly (+18%), while satisfaction with the City's efforts to provide a variety of recreation programs for all ages (-4%), police and crime prevention services (-5%), special events like community festivals and holiday celebrations (-8%), and address homelessness (-9%) decreased significantly.

	Study	y Year	Change in Satisfaction
	2022	2020	2020 to 2022
Manage traffic congestion	47.9	30.3	+17.6†
Enforce codes to address issues like abandoned vehicles, non-permitted construction	65.8	62.0	+3.7
Prepare the city for emergencies and natural disasters	75.3	73.8	+1.4
Promote economic development to attract new businesses, good-paying jobs to community	66.1	65.5	+0.6
Maintain storm drains, sewers and creeks	75.3	75.1	+0.2
Maintain public buildings and facilities like City Hall, libraries, parking garages	91.3	91.5	-0.1
Maintain local streets and roads	54.0	54.3	-0.3
Provide parks, sports fields and recreation facilities	86.9	88.6	-1.7
Provide fire protection, prevention and emergency medical services	93.9	95.9	-1.9
Provide a variety of recreation programs for all ages	80.7	84.6	-3.9†
Provide police and crime prevention services	77.3	82.7	-5.3†
Provide special events like community festivals and holiday celebrations	74.2	82.5	-8.3†
Address homelessness	41.8	51.0	-9.1†
Protect the environment	75.2	N/A	N/A
Provide paths and trails for walking, jogging, and running	81.6	N/A	N/A
Provide bicycle lanes and paths	69.5	N/A	N/A
Cleaning up litter, trash that people dump along streets, sidewalks, in public areas	61.8	N/A	N/A
Facilitate the creation of affordable housing	32.9	N/A	N/A

 \dagger Statistically significant change (p < 0.05) between the 2020 and 2022 studies.

DIFFERENTIATORS OF OPINION For the interested reader, Table 9 on the next page shows how the level of satisfaction with each specific service tested in Question 6 varied according to residents' overall performance ratings for the City (see *Overall Satisfaction* on page 15). The table divides residents who were satisfied with the City's *overall performance* into one group and those dissatisfied into a second group. Also displayed is the difference between the two groups in terms of the percentage who indicated they were satisfied with the City's efforts to provide each service tested in Question 6 (far right column). For convenience, the services are sorted by that difference, with the greatest differentiators of opinion near the top of the table.

When compared to their counterparts, those who were satisfied with the City's *overall* performance in providing city services were also more likely to express satisfaction with the City's efforts to provide each of the services tested in Question 6. That said, the greatest specific differentiators of opinion between satisfied and dissatisfied residents were found with respect to the City's efforts to maintain local streets and roads, promote economic development to attract new businesses and good-paying jobs to the community, maintain storm drains, sewers and creeks, provide police and crime prevention services, and enforce code violations to address issues like abandoned vehicles, non-permitted construction, and yards not being properly maintained.

At the other end of the spectrum, there was much less difference between the two resident groups regarding their satisfaction with the City's efforts to provide fire protection, prevention, and emergency medical services, and provide paths and trails for walking, jogging, and running.

HOUSING & LAND USE

The General Plan will help shape the nature of San Mateo's future development and redevelopment—including the size, type, character, and location of new housing projects—as well as the pace at which these changes occur. To help inform the City's General Plan update, the survey included a series of questions related to housing and density, as well as the factors that residents feel the City should prioritize when planning new housing.

AFFORDABLE HOUSING The first question in this series simply asked respondents to indicate whether there is currently too much, about the right amount, or too little affordable housing in the City of San Mateo for middle-income and low-income families, respectively. Residents expressed similar opinions for both types of affordable housing, with approximately two-thirds of residents indicating that there is currently too little housing that is affordable for middle-income (67%) and low-income families (64%). Approximately three-in-ten residents felt the amount of affordable housing was about right or were unsure (middle income: 29%, low income: 28%), while just 5% felt there was too much housing that is affordable for middle-income families and 8% shared the same sentiment for housing that is affordable for low-income families.

Question 7 As I read the following housing types, please tell me whether you feel there is currently too much, about the right amount, or too little of this type of housing in the City of San Mateo.

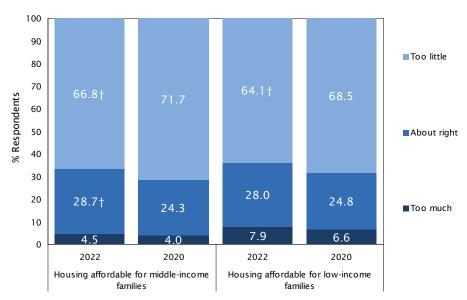

FIGURE 9 AMOUNT OF AFFORDABLE HOUSING IN SAN MATEO BY STUDY YEAR

† Statistically significant change (p < 0.05) between the 2020 and 2022 studies.

Tables 10-12 on the next page display the percentage of residents who felt there is currently *too little* of each affordable housing type in the City by key demographic traits. When compared to their respective counterparts, younger residents (under 35), renters, and those who had lived in the City between 10 and 14 years were the most likely to perceive there is not enough affordable housing for low-income families in San Mateo, while those who completed the survey in Spanish, renters, those between 35 and 44 years of age, and those who had lived in the City between 10

and 14 years were the most likely to indicate there is not enough affordable housing for middleincome families.

FACTORS TO PRIORITIZE WHEN PLANNING HOUSING California State law requires that all cities plan for additional housing. With a general shortage of housing in California, the state is requiring that the City of San Mateo plan for thousands of new housing units. After providing this background information, Question 8 presented respondents with each of the factors shown in Figure 10 on the next page and asked them how important they feel the item should be as the City plans for future housing over the next 20 years. To ensure that respondents prioritized among the items, they were instructed to keep in mind that not all of the items can be extremely important.

Although all of the factors tested in Question 8 were viewed as important by at least two-thirds of respondents, factors that relate to environmental sustainability tended to rise to the top of the list when it comes to planning future housing. Overall, ensuring adequate water supplies (98% at least somewhat important) was viewed as the most important factor, followed by preserving open space and creating new park lands (97%), minimizing vehicle trips and traffic congestion (95%), creating pedestrian-friendly areas that encourage people to walk rather than drive (94%), and minimizing pollution and greenhouse gas emissions (93%).

When compared to the other items tested, respondents indicated that keeping building heights low (68%) and minimizing the number of new units added to single-family neighborhoods (68%) were the least important when planning for future housing in the City.

Question 8 California State law requires that all cities plan for additional housing. With a general shortage of housing in California, the state is requiring that the City of San Mateo plan for thousands of new housing units. There are a variety of factors the City can consider when deciding where new housing may be located and the types of housing that may be built. As I read the following list of items, I'd like to know how important you feel the item should be as the City plans for future housing over the next 20 years. Please keep in mind that not all of the items can be extremely important.

	Extremely important		Very	ry important		Somewhat import		ant

FIGURE 10 IMPORTANCE OF ISSUES OF CITY DEVELOPMENT

Tables 13-16 show the percentage of respondents in each respondent subgroup that identified a factor as *extremely* important when the City plans for future housing. For the reader's convenience, the top five factors in each subgroup are highlighted in green. When considering just those who indicated a factor was *extremely* important, three factors were consistently among the top five across subgroups: ensuring adequate water supplies, creating homes that are affordable for low- and middle-income residents, and minimizing pollution and greenhouse gas emissions.

TABLE 13 IMPORTANCE OF ISSUES OF CITY DEVELOPMENT BY YEARS IN SAN MATEO & OVERALL SATISFACTION (SHOWING % EXTREMELY IMPORTANT)

BUILDING HEIGHT & DENSITY TRADE-OFFS Concentrating new housing in taller, higher-density buildings downtown and near transit would allow more land in the City to be reserved for parks, recreation areas, and community amenities, and will minimize change to existing residential neighborhoods. Once apprised of this trade-off, respondents were simply asked whether they would support or oppose concentrating future housing in higher-density buildings up to 12 stories. Those who did not support buildings up to 12 stories were subsequently asked if they would support buildings up to eight stories. The answers to both questions are combined in Figure 11 on the next page.

When presented with the opportunity to reserve more land for parks, recreation areas, and community amenities *and* minimize change to existing neighborhoods, 63% of San Mateo residents indicated they would support concentrating new housing in higher-density buildings downtown and near transit up to 12 stories. A higher percentage (68%) indicated they would support buildings up to eight stories. In general, newer residents (less than 10 years), younger residents (under 35), those who anticipated living in the City 5 to 10 more years, those without a senior in the home, Caucasians, Asians, and those who completed the survey in English were the most supportive of concentrating new housing in higher-density buildings up to eight stories downtown and near transit (see figures 12-14).

Question 9 Concentrating new housing in taller, higher-density buildings downtown and near transit would allow more land to be reserved for parks, recreation areas, and community amenities, and will minimize change to existing residential neighborhoods. Knowing this, would you support or oppose concentrating future housing in higher-density buildings up to 12 stories.

Question 10 Would you support or oppose concentrating future housing in higher-density buildings up to 8 stories.

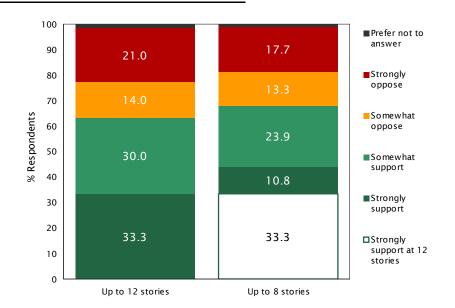

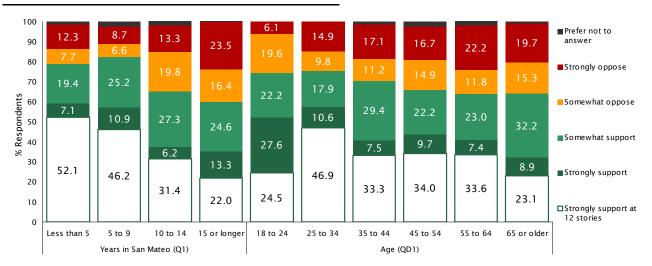

FIGURE 12 SUPPORT CONCENTRATING FUTURE HOUSING IN HIGHER DENSITY BUILDINGS UP TO 8 STORIES BY YEARS IN SAN MATEO & AGE

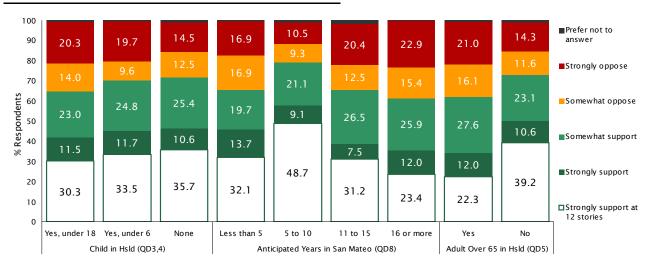

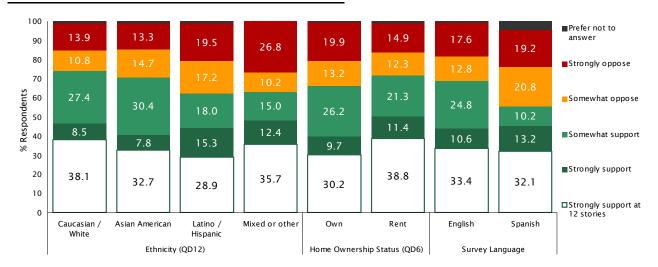

FIGURE 14 SUPPORT CONCENTRATING FUTURE HOUSING IN HIGHER DENSITY BUILDINGS UP TO 8 STORIES BY ETHNICITY, HOME OWNERSHIP STATUS & SURVEY LANGUAGE

Table 25 presents the key demographic information collected during the survey. In additional to providing insights into how the results of the survey vary across demographic subgroups, the information is also used to ensure that the survey sample matches the profile of San Mateo's adult population on key characteristics based on the latest Census figures.

METHODOLOGY

The following sections outline the methodology used in the study, as well as the motivation for using certain techniques.

QUESTIONNAIRE DEVELOPMENT Dr. McLarney of True North Research worked closely with the City of San Mateo to develop a questionnaire that covered the topics of interest and avoided many possible sources of systematic measurement error, including position-order effects, wording effects, response-category effects, scaling effects, and priming. Several questions included multiple individual items. Because asking items in a set order can lead to a systematic position bias in responses, the items were asked in a random order for each respondent.

Some questions asked in this study were presented only to a subset of respondents. For example, only respondents who indicated they were interested in additional information from the City (Question 15) were subsequently asked to briefly describe their topics of interest (Question 16). The questionnaire included with this report (see *Questionnaire & Toplines* on page 50) identifies the skip patterns used during the interview to ensure that each respondent received the appropriate questions.

PROGRAMMING, PRE-TEST & TRANSLATION Prior to fielding the survey, the questionnaire was CATI (Computer Assisted Telephone Interviewing) programmed to assist interviewers when conducting the telephone interviews. The CATI program automatically navigates the skip patterns, randomizes the appropriate question items, and alerts interviewers to certain types of keypunching mistakes should they happen during the interview. The survey was also programmed into a passcode-protected online survey application to allow online participation for sampled households. The integrity of the questionnaire was pre-tested internally by True North and by dialing into random homes in the City prior to formally beginning the survey. The final questionnaire was also professionally translated into Spanish to allow for data collection in English and Spanish according to the preference of the respondent.

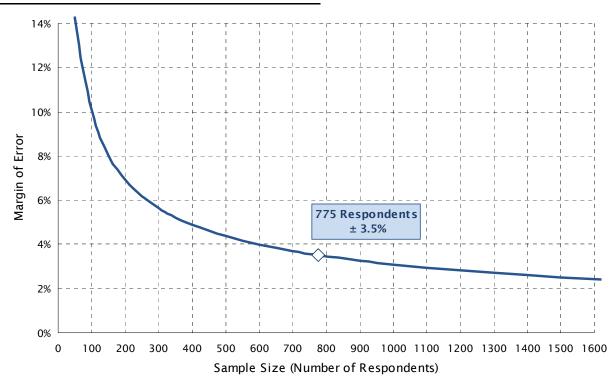

SAMPLE, RECRUITING & DATA COLLECTION A comprehensive database of households in the City of San Mateo was utilized for this study, ensuring that all households in San Mateo had the opportunity to be selected for the survey. After random selection, households were recruited to participate in the survey using a combination of mailed letters, email invitations, text invitations, and telephone calls to both land lines and mobile lines, as appropriate. The mail, email, and text invitations contained a unique passcode so that only those invited could access the secure survey site, and they could complete the survey one-time only. Following a period of online data collection, True North recruited by telephone to households that had yet to participate in the online survey in response to the mail, email, and/or text invitations, or for which only telephone contact information was available.

Telephone interviews averaged 18 minutes in length and were conducted during weekday evenings (5:30PM to 9PM) and on weekends (10AM to 5PM). It is standard practice not to call during the day on weekdays because most working adults are unavailable and thus calling during those hours would bias the sample. A total of 775 completed surveys were gathered online and by telephone between January 21 and February 2, 2022.

1ethodology

MARGIN OF ERROR DUE TO SAMPLING The results of the survey can be used to estimate the opinions of all adult residents of the City. Because not every adult resident of the City participated in the survey, however, the results have what is known as a statistical margin of error due to sampling. The margin of error refers to the difference between what was found in the survey of 775 adult residents for a particular question and what would have been found if all of the estimated 83,578 adult residents³ had been interviewed.

Figure 39 provides a plot of the *maximum* margin of error in this study. The maximum margin of error for a dichotomous percentage result occurs when the answers are evenly split such that 50% provide one response and 50% provide the alternative response. For this survey, the maximum margin of error is \pm 3.5% for questions answered by all 775 respondents.

Within this report, figures and tables show how responses to certain questions varied by demographic characteristics such as length of residence and age of the respondent. Figure 39 is thus useful for understanding how the maximum margin of error for a percentage estimate will grow as the number of individuals asked a question (or in a particular subgroup) shrinks. Because the margin of error grows exponentially as the sample size decreases, the reader should use caution when generalizing and interpreting the results for small subgroups.

DATA PROCESSING & WEIGHTING Data processing consisted of checking the data for errors or inconsistencies, coding and recoding responses, categorizing verbatim responses, and preparing frequency analyses and cross-tabulations. The final data were weighted to balance the sample by age and ethnicity according to Census estimates.

^{3.} US Census Bureau estimate, April 2020.

ROUNDING Numbers that end in 0.5 or higher are rounded up to the nearest whole number, whereas numbers that end in 0.4 or lower are rounded down to the nearest whole number. These same rounding rules are also applied, when needed, to arrive at numbers that include a decimal place in constructing figures and tables. Occasionally, these rounding rules lead to small discrepancies in the first decimal place when comparing tables and charts for a given question. Due to rounding, some figures and narrative include numbers that add to more than or less than 100%.

COMMUNITY ENGAGEMENT, POP UPS AND INTERCEPTS – PUBLIC FEEDBACK RECEIVED

The results of an "Housing Element Update Intercept Survey" conducted by City of San Mateo staff and they City's consultants and community partners during the Fall of 2021 are presented here. 156 surveys were completed in person by community members. Intercept locations were selected in consultation with community outreach partners at Peninsula Conflict Resolution Center, following City Council direction to proactively reach out to communities not traditionally well represented in online surveys. These included:

- Harvest Festival at King Park, Saturday, October 16: 93 Responses
- Central Park Storytime in the park, Wednesday, October 27: 4 Responses
- Mi Rancho Market in North Central, Friday, October 29: 26 Responses
- Chavez Market in Shoreview, Thursday, November 18: 25 Responses
- Macedonia Food Distribution, Various Tuesdays October to December: 8 Responses

Please note that multiple choice subject-related questions (questions 5 and 7) are present first, followed by open ended questions (questions 6 and 8), and demographic responses (questions 1-4) are included at the end of this document. 39 email addresses were collected in response to Question 8 and were added to the City's project mailing list. The individual email addresses have been removed from these published survey results.

Question 5: Given that there is limited land available, what do you think are best strategies to manage production of new housing? (Please select up to three)

Summary: To manage the production of housing overall, there was notable interest in in redeveloping existing properties that have potential for more housing (45%), creating accessory units on existing single-family properties (22%), and encouraging mixed-use projects that have both commercial and residential uses (21%). The twelve individual responses are included below. They ranged from "redevelop around 280" to "create jobs outside of Bay Area."

Redeveloping existing properties that have potential for more housing.	70	45%
	25	220/
Create accessory units on existing single-family properties.	35	22%
Convert existing single-family houses into duplexes.	25	16%
Increase the allowable density in areas that are close to transit	27	17%
Encourage mixed-use projects that have both commercial and residential uses	33	21%
Allow taller developments if they include open space	25	16%
Other	13	8%

Individual Responses for other:

- ADU Building Plan
- More Golf Courses
- create housing for people who don't have a place to live (cuear vivienda para personas que no tienen donde vivier)
- access to parking lower rents
- redevelop around 280
- create jobs outside of Bay Area)
- fair price (precio justo)
- stop building
- infrastructure development
- rent control
- more construction, more people, San Mateo could be a new SF (mas construccion mas gente San Mateo podra ser un nuevo SF)
- more housing means more traffic, more garbage, less parking (mas vivienda es mas traffico mas basura menos estacionamiento)

Question 7: What do you think are the best ways to address housing affordability? (Please select up to three)

Summary: To address housing affordability, there was substantial interest in financial assistance programs for people who cannot afford housing, such as subsidized rent and down payment loans (47%), and public funding to construct new housing (26%). The eleven individual responses are included below. Some comments included: "Include up-scale neighborhoods in zoning changes" and "Always include preferences for people w/ developmental disabilities + others."

Financial assistance programs for people who cannot afford housing,		
such as subsidized rent and down payment loans	73	47%
	-	
Public funding to construct new housing	41	26%
Incentives for developers to build more affordable housing	28	18%
Encourage conversion of single-family units to duplexes in single-family		
neighborhoods	17	11%
Financial assistance to homeowners to add accessory dwelling units	28	18%
Streamline residential approval process	14	9%
Locate affordable housing near transit and jobs	29	19%
Develop programs that help people experiencing homelessness find		
permanent housing	33	21%
Other	15	10%

Individual Responses for other:

- More Golf Courses
- Remove Height Limit
- Always include preferences for people w/ developmental disabilities + others
- Include up-scale neighborhoods in zoning changes
- no more big companies
- reduce interest rates for housing
- address prop owner gouging. Its shear greed. Its inherently wrong
- find another solution for companies to grow in central valley

- October 16, 2021 December 21, 2021
 - they really need them (que en realidad las necesiten)
 - federal level should help
 - increase wages and control rents (aumentar los sueldos y controlar la renta)

Question 6: how does the current housing situation in San Mateo affect you or people you know?

Summary: 104 community members shared how the current housing situation in San Mateo is affecting them or people they know. A number of recurring themes could be extracted from these responses, including: high cost of housing in general, the cost of housing's impact on types of individuals (child care workers, adult children, older adults), inability to purchase a home due to cost, self or others moving away due to price, traffic, and difficulty commuting. Select responses include: "I have to move b/c its getting too expensive, I will move away from County to an in-law unit with relatives in Marin" and "I'm homeless, I sleep on street behind the gas station. I can't afford rent, I can hardly get food."

- Middle class families are being priced out. Our working class commutes too far
- People are losing homes because of rates going up
- Traffic is out of control on Hillsdale. Infrastructure needs to keep up with any housing increases
- Less parking, getting crowded
- Price is too high
- Impact to commute/loss of productivity
- I have family in need
- price
- the price so high
- Rent is expensive for ppl who aren't low income, but not high income
- Hard to buy their first home
- Housing is too expensive
- we are homeowners worried about traffic
- expensive
- I have friends who find it difficult to commute to school from where they live
- we live in the densest neighborhood. We don't mind the density but there are too many cars
- traffic + parking in dense areas are painful
- too expensive
- too expensive to live
- my sisters left
- feels like I will never be able to afford to own a house
- discourages people from moving here

October 16, 2021 - December 21, 2021

- not enough housing available leads to high prices
- rent increase, tough to buy a home
- childcare providers had to move away sad for our family
- I live in a BMR
- it affects my ability to buy a home
- more affordable rent
- high rent constant increases for friends who rent
- more el Camino traffic
- limited housing options and affordability
- rent
- young adults can't afford to live here. Limited housing for people w/ developmental and other disabilities. Housing need for extremely low income + homeless
- our friends keep moving away because of the cost of living here
- lack of local housing increases commute traffic. Homelessness is a real problem
- things are too expensive
- hard to buy or upgrade homes as it is too expensive
- multiple adults in households near me have more cars than fit in their own space
- traffic so much traffic
- crowded street parking
- we just bought a home. Many neighbors would not be able to afford living where they do if they had to buy now. I fear a progressive gentrification of the area over the years
- A friend of mine living in North Central slept on the couch for years due to lack of housing/high rents prompting overcrowding. I personal can't afford living here.
- many of our neighbors will not be able to keep their houses at their age. People who do not work for apple, google, etc cannot buy or pay taxes on property (our family works for big tech)
- people have to move away
- no space makes it hard for parking at times
- it inflates my home value artificially
- there is no affordable housing (no hay vivienda accesible)
- housing has become very expensive in San Mateo pushing families to more out of the area even out of state - working in making more affordable
- we can not afford to rent or think about buying. Way too expensive
- Getting evicted after 16 years of living here in South City
- Cost is too high (costo mul alto)

October 16, 2021 - December 21, 2021

- Housing price is too high, I had to move to Alameda (el precio de vivienda es demasido alto tuve que movendo a Alameda)
- housing is too expensive (vivienda muy cara)
- high cost of housing (alto de vivienda)
- high cost of housing (alto costo de vivienda)
- we had to leave San Mateo because of the high cost of housing (tuvimos que irnos de San Mateo por el alto costo de vivienda)
- paying rent (pagando renta)
- high cost of housing (alto costo de vivienda)
- having two jobs to make ends meet, sometimes you struggle to pay rent (tener dos trabajos para poder sobrevivier a veces se batalla para pagar renta)
- it's hard when one's rent is too expensive (es dificil si uno renta es muy caro)
- high cost alone (alto costo solomente)
- financially (economicamente)
- high cost of housing (alto costo de vivienda)
- paying rent (pagando renta)
- housing is too expensive (vivienda muy cara)
- had to leave San Mateo because it is too expensive (tuvo que irse de San Mateo pq muy caro)
- it's hard to get a place to live (es dificil para conseguir un luger donde vivir)
- it's very expensive and difficult to afford an apartment (es muy caro y dificil para poder tene un apart)
- the apartment is affordable (es accisble el apartamento)
- very expensive housing, if there were affordable housing (muy cra la vivienda hubiera viviendos economicas)
- I know my children don't want to come back to live because they can't afford it
- parking no Humbolt no parking on the street please don't remove it (estacianamient no hay Humbolt quiten esta cianamento en la calle por favor no lo quiten)
- expensive rent had to move to another place, used to live here but not now (cara la renta se tuvo que mundar a otro lugar antes vivia aqui pero anora no)
- prices are going way too high wants to buy a house someday
- parking
- I'm homeless but I'm a Veteran & I have a Homeless Vet Voucher getting it on Nov 10th. \$2,350/mo & my portion < 200/mo
- its getting overcrowded
- personally I need housing, especially for seniors (personalmente necesito vivienda, especialmente para mayores de edad)

- October 16, 2021 December 21, 2021
 - its expensive
 - no one can afford it here our child can't live here w/o 2 jobs. Its too expensive takes too long to make a down payment
 - leave to move (mover a mudo)
 - expensive high rent (caro alta la renta)
 - too many people, no new roads. Stop packing more people into san mateo
 - yards dirty, not kept clean, smoking, people smoking and leaving trash everywhere, no clean up services (yards dirty, no mantienen limpios, fumar, people smoking and leaving trash everywhere, no services for cleaning up)
 - difficulty in affordability
 - very expensive houses, everything very expensive, and it's getting more and more expensive (muy caras las casas todo muy caro y cada vez mas caro)
 - too crowded
 - high property prices/living expenses
 - everything expensive, 1 room \$1,200 \$1,500 per month. They do not accept more than 1-2 people in the apartment. I have had to move several times. Immigrants have responsibilities in other countries it's very hard to make ends meet. (todo caro, 1 cuarto 1200-1500 por mes. No aceptetan tener mas de 1-2 personas en el departamento. Me he tenido que mudar varias vecez. Personas immigrantes tienen responsabilidades en orthos paises es muy dificil "making ends meet".)
 - I'm homeless, I sleep on street behind the gas station. I can't afford rent, I can hardly get food.
 - too expensive no matter what
 - house value has gone up. Homeowner. has not had any negative affects related to housing
 - make houses cheaper, paying is difficult, if I don't work one day, then I can't pay the rent. (hacer mas baratas las casas pagar es dificil si no trabajo un dia, entonces no puedo pagar la renta)
 - the rent is too much (la renta es mucho)
 - I am retired and I am going to have to move to Rosedale because I cannot afford to pay rent after 60 years of living in San Mateo. I would prefer to stay here if I could. Building more and more condos does not actually solve the ousing problem for people that live here. building more condos only helps the City collect more property taxes and makes San Mateo crowded
 - I have to move b/c its getting too expensive, I will move away from County to an in-law unit with relatives in Marin. My rent went from 2600 to 2956 despite covid. The cost of housing is taking all of my savings.
 - it doesn't affect me because I earn good money and my rent is comfortable (no afeta porque gono bien y elquile bien)
 - very high rents (rentas muy altas)

October 16, 2021 - December 21, 2021

- friends and family have moved out of San Mateo because they can't afford to pay rent (amigos y familiares se han movido fuera de San Mateo por ne poder pugar la renta)
- hard to pay rent because it is so high (dificil pagar renta por es alta)
- families are leaving to live further away and coming back to work here, very big economic impact (families se estan saliendo a vivir mas lejos y regresan a trabajar aqui impacto economico muy grande)
- can't afford it, not enough "low income" housing if so no pets allowed
- the high cost has affected my whole family, in addition to the job loss due to COVID, it is terrible not being able to live in this city. (el alto costa ha afectado a toda mi familia, ademas de la perdida de trabajo por COVID, es terrible no poder vivir en esta ciudad)
- I moved out of my neighborhood due to high cost of housing, it impacted my family's emotional and financial well being. (me movi de vencindario por alto costo de vivienda, impacto el benestar emocional y economico de mi familia)

Question 7: Are there any other thoughts about housing you would like to share?

Summary: 44 community members shared additional comments. Several recurring themes could be extracted from these responses, including: the high cost of housing in general, an interest in additional development to house more people, rental housing assistance, and traffic concerns. Select responses include: "We love that we have many kinds of neighbors, socio-economically. We hope that can continue," "we should all have housing (que todos teugamos vivienda)," and "allow higher buildings (permitendo edificios mas altos)."

- improve traffic flow through dense areas
- more golf courses
- taller buildings mean more housing without compromising single fmaily neighborhoods
- build more
- more affordable BMRS
- build awareness about housing how to navigate services. Its confusing. Integrate behavioral developmental services w/ housing services
- more affordable housing
- housing needs to be more affordable for first time buyers + middle class families
- do not assume residents will use transit only to justify reducing requirements for parking spaces on site
- so expensive so many people in dwellings. Makes parking difficult
- affordable housing should be a priority for anything new
- we need to up-zone all neighborhoods and create a citywide affordable housing overlay
- we love that we have many kinds of neighbors, socio-economically. We hope that can continue

- October 16, 2021 December 21, 2021
 - bigger = better
 - more affordable housing opportunities (renters)
 - thank you for helping the people who need this
 - building more means more parking problems (edificando mas es mal problema de estaonamiente)
 - we should all have housing (que todos teugamos vivienda)
 - low income families don't have housing and others don't, and there are families that don't need it, they
 have affordable housing (familias de bajos recursos no tenea vivienda y otros no y hay familias que no
 lo necesitan tiuenen vivienda asequible)
 - the population is growing, there should be more housing for everyone. (la poblacion esta creciendo, debe de haber vivienda mas para todos)
 - more affordable rent (renta mas accesible)
 - rental housing assistance is needed (se necesita ayuda para alquilar vivienda)
 - too many requirements to access housing programs, not a good experience. (demasiodos requisitos para access programas de vivienda no bueno experiencia)
 - it needs to early childcare so kids don't grow up poor. I don't want property values to go down
 - parking biggest issue. No parking in neighborhoods
 - Nothing (nada)
 - some kind of legislation should be passed to limit landowners greed. These are people who inherited property they are lucky
 - no use of protective lands
 - lots of construction but very expensive. Living only on retirement money and I have no affordable housing. (much construccion pero muy cura. Vivir solo con el dinero del retiro y no tengo vivienda accesible)
 - my 20 year old w/a degree can't buy a house here. Traffic is crazy its too expensive
 - lower the rental prices (bajer los precios de elquiler)
 - offer a chance to [find?] a house and buy it. (que den una oportunidad para ogoura una casa y comprale)
 - stop the building. Theres no more room.
 - increase salaries, don't increase the costs (aumentar el salario, no aumenter los costos)
 - more affordable housing I have two daughters who can't buy houses
 - wish we can make it more affordable. Lower rent please
 - make it easier for people like me to get housing
 - stop building in our neighborhood where we cannot afford to pay rent need rent control
 - allow higher buildings (permitendo edificios mas altos)

- October 16, 2021 December 21, 2021
 - 2 stories are bad b/c leggs are hurt. I only need a place that is safe, close, and affordable. More density lowers price & increases safety
 - increase wages and not allow landlords to charge more than the minimum wage. (aumentando los sueldos y que los propietarios no puedan cobrar mas que el salario munimo)
 - maybe a way where younger generaltion can afford houses/apartments
 - please help us stay in this city. (por favor, ayudamos a permaneer en esta ciudad)

ONLINE HOUSING ELEMENT SURVEY RESULTS

This is a summary report of the results of the "Housing Needs in San Mateo – Housing Element 2023-31" online survey conducted by the City between October 11, 2021 and January 16, 2022. A total of 594 surveys were completed online by community members.

Survey outreach and promotion methods included:

- Direct emails by city to Housing Element interest list
- City-wide eblasts
- Facebook promotion
- Announcements at public meetings
- Print mailer sent citywide

One of the major impacts of the COVID pandemic has been the barriers for community members to meet inperson and share viewpoints. This survey is one of many tools that was used to solicit opinions from the community since summer of 2021. Other forms of community engagement were conducted and information about these efforts will be made available on the Housing Element website. This survey was not designed to meet the standards to be considered scientifically significant, but rather to be a convenient way to gather comments since it is short and easily accessible to people with access to the internet. It has limitations in that there is little background information to provide context to complex issues, and short responses may not fully provide the perspectives intended by the participants, and it is not as accessible for those who do not have access to a computer or who are not comfortable using this technology.

The information in this report should be considered with a similar weight as other qualitative forms of feedback that have always been part of the city's decision-making process, such as comments made at City Council meeting or emails sent to the city expressing an opinion. Generally speaking, the respondents were more represented by older, white, and homeowners as compared to the City's population at large.

This report includes three sections:

- Section I Results for survey responses (Questions 1-7)
- Section II Demographic breakdown of those who completed the survey
- Section III All open-ended responses provided by those who completed the survey (296 responses for Question 7, and 450 responses for those completing the "Other" option for Questions 2-6)

SECTION I

OVERALL RESULTS FOR SURVEY RESPONSES (QUESTIONS 1-7)

Question 1: How important do you think these housing-related challenges are in San Mateo?

When asked to rank how important various housing-related challenges were, two options received the most support: "Service workers' salaries cannot support existing rents in San Mateo" and "Service workers, teachers, first responders, and small business owners are moving out of San Mateo." Seven responses were ranked in the middle tier of importance relative to the other options. Challenges in the middle tier included concerns about lack of variety of housing types, overcrowding, difficulty retaining employees, not enough transit options, options for seniors, concerns about traffic, and young people who cannot afford to live here. Responses that were ranked with the least amount of importance relative to other options included: "The move-in costs are too high to rent a unit in San Mateo," "Growing families can't afford larger homes," and "Concerns about environmental impacts of new housing."

Question 2: As the economy and population grow and change, more housing must be produced to accommodate this growth. Where are the best locations to place more housing? (Pick your top three)

Key priorities from multiple choice options

Regarding the best location to place additional housing, community members identified two ideas more than others. About 53-54% of community members identified "New housing should be walkable/bikeable to shops and services," and "New housing should be concentrated near public transit" as one of their top three choices. Three ideas received the next-highest level of support. About 33-38% identified "New housing should be located where it will have the least impact on traffic," "New housing should be spread evenly across all parts of the city," and "New housing should be located where it will have the environment overall" as one of their top three choices.

Open-ended responses for "Other"

Open-ended responses for "Other" were analyzed for common themes. All 73 responses are included in Section III.

October 11, 2021 – January 16, 2022

The most common response themes included:

- New housing should be located in high opportunity areas
- New housing is not needed or not desired

Common responses:

- Locate new housing to create mixed-use
- Locate new housing in Transit Oriented Developments (TOD)/increase density most in transit-rich areas
- Increase density throughout the city
- Establish city-wide mandatory inclusionary zoning/set a minimum percentage of affordable housing for all developments
- Infrastructure improvements should happen before housing is built
- Prioritize single family housing

Some responses:

- Create new public housing authority-developed units
- Regional solutions: new office developments should be built outside of San Mateo to change the jobshousing balance
- Regional solutions: new housing should be built outside of San Mateo or that people should leave San Mateo

Others noted:

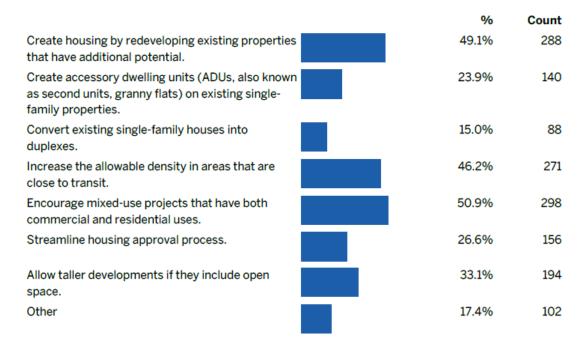

• Vacant lots should be incentivized for (re)development

Select responses:

- "New housing should be located in all parts of the city. It does not need to be evenly spread. But we should plan for all parts to contribute."
- "There shouldn't be more housing until the infrastructure can support it"
- "Locate along the Caltrain corridor, like redeveloping the Caltrain parking lots for the downtown train station"

Question 3: Given that there is limited land available, what do you think are the best strategies to manage production of new housing? (Pick your top three)

Key priorities from multiple choice options

Regarding the best strategies to manage production of new housing, three ideas received the highest level of support. About 46-51% of community members identified "Encourage mixed-use projects that have both commercial and residential uses" (51%), "Create housing by redeveloping existing properties that have additional potential" (49%), and "Increase allowable density in areas that are close to transit" (46%) as one of their top three choices. One idea received the next-highest level of support. About 33% identified "Allow taller developments if they include open space" as one of their top three choices.

Open-ended responses for "Other"

Open-ended responses for "Other" were analyzed for common themes. All 102 responses are included in Section III.

The most common response themes included:

• Increase density throughout the city

- New housing is not needed or not desired
- Prioritize single family housing

Common responses:

- Locate new housing in Transit Oriented Developments (TOD)/increase density most in transit-rich areas Create mixed use areas
- Infrastructure improvements should happen before housing is built
- Establish city-wide mandatory inclusionary zoning/set a minimum percentage of affordable housing for all developments

Some responses:

- Regional solutions: new office developments should be built outside of San Mateo to change the jobshousing balance
- Rezone older commercial and retail to housing or mixed-use
- Regional solutions: new housing should be built outside of San Mateo or that people should leave San Mateo

Others noted:

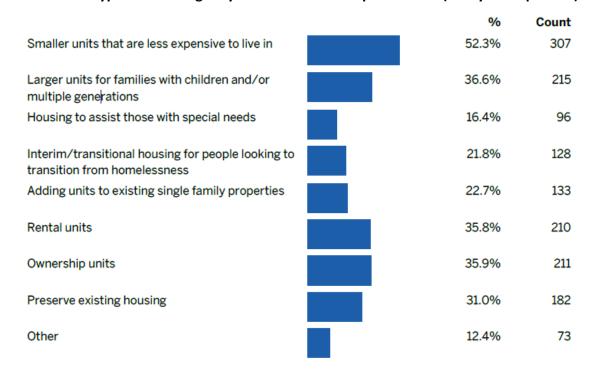

- Create new public housing authority-developed units
- Vacant lots should be incentivized for (re)development

Select responses:

- "The best place to locate more housing depends on the housing. Inclusionary housing should be located near transit, shops, parks etc. [Market] rate [housing] can be located anywhere"
- "Increase density in all areas. but also increase transportation options. Increase parks and open space."
- "Stop building more housing; lower rents; raise min. Wage"

Question 4: What types of housing do you think should be prioritized? (Pick your top three)

Key priorities from multiple choice options

Regarding what types of housing should be prioritized, one response received the more support than the others. About 52% of community members identified "Smaller units that are less expensive to live in" as one of their top three choices. A group of three ideas received the next-highest level of support. About 36-37% identified "Larger units for families with children and/or multiple generations," "Rental units," and "Ownership units" as one of their top three choices.

Open-ended responses for "Other"

Open-ended responses for "Other" were analyzed for common themes. All 73 responses are included in Section III.

The most common response themes included:

- Support for building housing in general
- Prioritize affordable housing, require affordable housing, or establish mandatory inclusionary zoning

- October 11, 2021 January 16, 2022
 - Prioritize senior housing

Common responses:

- Strengthen rent regulations
- Establish rent control
- Desire for environmentally sustainable buildings
- Increase density throughout the city
- Prioritize single family housing
- New housing is not needed or not desired
- Prioritize "missing middle" housing

Some responses:

• Create mixed-use areas

Others noted:

• Establish linkage fees: new office developments should pay for new housing or new office developments should build housing onsite/nearby

Select responses:

- "Residential units above commercial property near El Camino"
- "Preserve single family neighborhoods"
- "Truly affordable housing. Much of affordable housing is not affordable"

Question 5: What do you think are the best ways to address housing affordability? (Pick your top three)

	%	Count
Financial assistance programs for people who cannot afford housing, such as subsidized rent and down payment loans	39.7%	232
Public funding to construct new housing	30.6%	179
Incentives for private developers to build more affordable housing	44.3%	259
Encourage conversion of single-family units to duplexes in single-family neighborhoods	19.1%	112
Financial assistance to homeowners to add accessory dwelling units	14.9%	87
Streamline residential approval process.	29.6%	173
Locate affordable housing near transit and jobs.	41.7%	244
Develop programs that help people experiencing	24.3%	142
homelessness find permanent housing. Other	19.3%	113

Key priorities from multiple choice options

Regarding the best ways to address housing affordability, three responses received the most support. About 40-44% of community members identified "Incentives for private developers to build more affordable housing" (44%), "Locate affordable housing near transit and jobs" (42%), and "Financial assistance for people who cannot afford housing, such as subsidized rent and down payment loans" (40%) as one of their top three choices. Two ideas received the next-highest level of support. About 30-31% identified "Public funding to construct new housing" and "Streamline residential construction" as one of their top three choices.

Open-ended responses for "Other"

Open-ended responses for "Other" were analyzed for common themes. All 113 responses are included in Section III.

October 11, 2021 – January 16, 2022

The most common response themes included:

- Strengthen rent regulations or establish rent control
- Streamline regulations: reduce height, density, parking, or other regulations

Common responses:

- Establish city-wide mandatory inclusionary zoning/set a minimum percentage of affordable housing for all developments
- Increase density generally and increase density most in transit-rich areas (TOD)
- The city should not take steps to address affordability
- Let the market decide or less regulation would be better
- New housing is not needed or not desired

Some responses:

- Regional solutions: new housing should be built outside of San Mateo or that people should leave San Mateo
- Build for diverse incomes
- Create new public housing authority-developed units
- Linkage: New office developments should pay for new housing or new office developments should build housing onsite/nearby

Others noted:

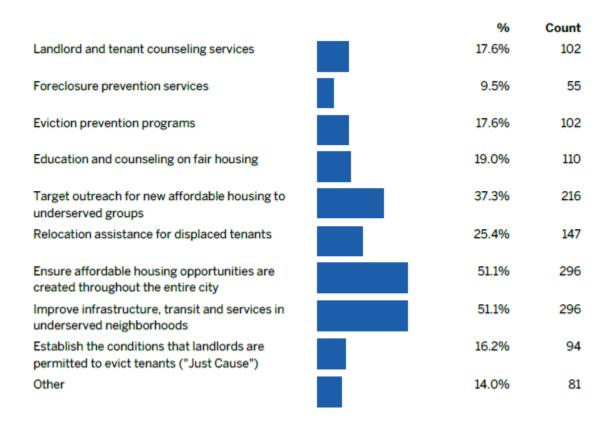

• Financial literacy training for low-income households

Select responses:

- "Repeal Prop 13"
- "Continue building single family homes so the existing SFH don't keep raising in price. Not everyone wants to live in a box without a yard/privacy."
- "Remove the barriers to building housing of any kind. Height limits, too much emphasis on wants of existing property owners."

Question 6: What do you think are the most important ways to ensure housing opportunities are available to all members of San Mateo, especially those who have not had fair access to housing in the past? (Pick up to three)

Key priorities from multiple choice options

Regarding the most important ways to ensure housing opportunities are available to all members of San Mateo, especially those who have not had fair access to housing in the past, two responses received the most support. About 51% of community members identified "Ensure affordable housing opportunities are created throughout the entire city" and "Improve infrastructure, transit and services in underserved neighborhoods" as one of their top three choices. One idea received the next-highest level of support. About 37% identified "Target outreach for new affordable housing to underserved groups" as one of their top three choices.

Open-ended responses for "Other"

Open-ended responses for "Other" were analyzed for common themes. All 81 responses are included in Section III.

The most common response themes included:

• More housing equals more opportunity, focus on expanding supply

Common responses:

- Let the market decide, less regulation would be better
- Strengthen rent regulations or establish rent control

Some responses:

- Special programs for educators, first responders, or service workers
- Establish city-wide mandatory inclusionary zoning/set a minimum percentage of affordable housing for all developments
- Prioritize housing for people with disabilities
- Increasing wages should be a priority way to expand fair access
- Investing in transit expands fair access

Others noted:

- Concern about overcrowding
- Pay people to move away
- Rent to own opportunities
- Loan and remodel support
- Existing residents or workers should be prioritized
- Strengthen enforcement of Fair Housing policies
- End single family zoning
- Prioritize more starter homes

Select responses:

- "We need a reality check, it should NOT require dual income to rent an apartment. I work in tech but if I didn't have reasonable rent even I can't afford to live in San Mateo"
- "Allow duplexes, triplexes and fourplexes in single family neighborhoods"

Question 7: Is there anything else you'd like to tell us about housing needs in San Mateo?

Open-ended responses for "Other" were analyzed for common themes. All 296 responses are included in Section III.

The most common response themes included:

- Housing is a priority issue: use whatever means are available to substantially increase supply
- Improve public transportation and make walking and biking safer, this is also better for the environment
- Infrastructure improvements should happen before housing is built, with particular emphasis on traffic congestion, roads, parking, and water
- Locate new housing in Transit Oriented Developments (TOD)/increase density most in transit-rich areas
- New housing is not needed or not desired

Common responses:

- Concern for the needs of seniors and senior housing
- Housing is a crisis-level issue and requires the highest level of response
- Increase density throughout many parts of the city
- Increase density in single family housing areas
- Prioritize single family housing
- Establish city-wide mandatory inclusionary zoning/set a minimum percentage of affordable housing for all developments
- First time buyer supports
- Let the market decide, less regulation would be better
- Linkage: New office developments should pay for new housing or new office developments should build housing onsite/nearby
- Prioritize affordability
- Prioritize deeply affordable housing
- Prioritize renters
- Special programs for educators, first responders, or service workers, or long-term residents
- Streamline regulations: reduce height, density, parking, or other regulations
- Strengthen rent regulations in general and establish rent control and a rental registry

October 11, 2021 – January 16, 2022

Some responses:

- Integrate neighborhoods, address existing segregation
- Concern for school funding
- Coordinate regionally
- Create an affordable loan for single family homeowners to build additional units on their property
- Ensure sufficient open space for more dense housing
- Find ways to limit developer profits
- Prioritize sustainability
- Vacant lots should be incentivized for (re)development

Others noted:

- Fight Sacramento housing mandates
- Prop 13 is the problem
- Retain beauty and historical character
- Support for ADUs and "Missing Middle"
- Dislike of ADUs

Select responses:

- "San Mateo is a beautiful, beautiful place, I would like to buy a small house and grow old here to see the sunsets"
- "Forcing residents to live in more crowded conditions by increasing density throughout the city and converting homes to multiple housing units or converting single-family zoning to multi-unit zoning might get more people into the city, but it won't be a place I want to live."
- "Rent is now 150% more expensive than when I first moved to San Mateo, and the cost of housing is a primary reason I haven't chosen to start a family here. Even buying a one-bedroom apartment is out of reach for dual-income couple with no kids."
- "Current home owners act as a rent seeking cartel, discouraging any change despite the negative externalities this imposes on everyone else. This is ethically dubious and should be discouraged or penalized."
- "Single family home type zoning laws are a huge issue, especially for large lot sizes. Everyone who
 already owns a home thinks that a new neighbors home is a 'development' (negative connotation), but
 not his/her existing home. We need to educate existing home owners about how the homelessness
 crisis is related to decrease in affordable housing which is caused by scarcity of housing in the area."

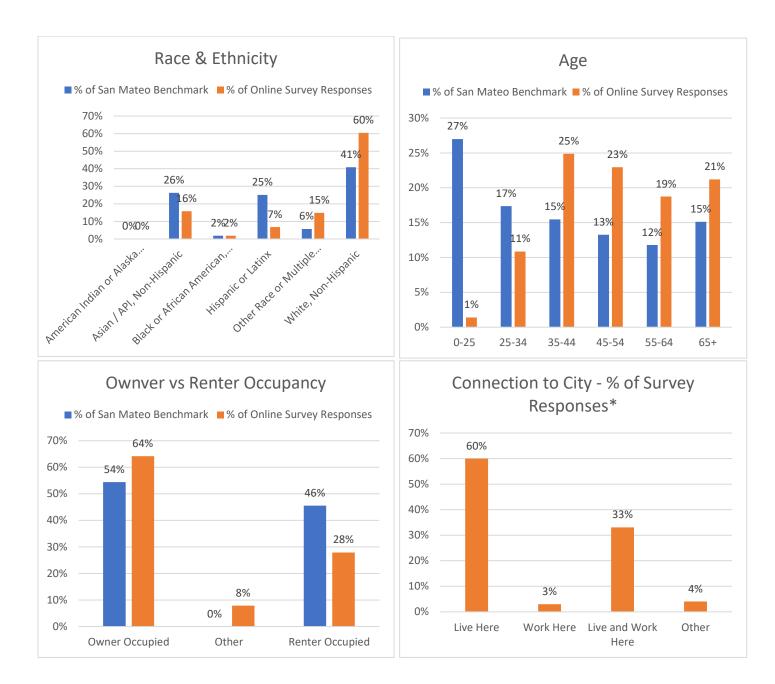

- October 11, 2021 January 16, 2022
 - "Please do not create another Bay Meadows-type situation, where their community is built to further house and serve privilege... Stop prioritizing non-affordable 'luxury' rental housing for high-wage tech workers."
 - "As someone who has lived in San Mateo since 1963 and in my single-family home since 1966, I want my neighborhood to stay the same until I die."
 - "Apply the UN's Sustainable Development Goals, by evaluating the respective underlying targets and their applicability to San Mateo's development."

SECTION II

DEMOGRAPHIC DATA (QUESTIONS 8-15)

October 11, 2021 – January 16, 2022

SECTION III

ALL OPEN-ENDED RESPONSES FROM QUESTION 7, AND THOSE COMPLETING THE "OTHER" OPTION FOR QUESTIONS 2-6

Question 2: As the economy and population grow and change, more housing must be produced to accommodate this growth. Where are the best locations to place more housing? Other (81 Responses):

- TOD high rise
- affordable housing should be concentrated near public transit. market housing doesn't have to be and we need both
- New housing should FIRST be supported by infrastructure! And laws about tearing down single-family dwellings to crowd multi-family units on property are GARBAGE.
- only downtown, not in established neighborhoods
- More housing is not a must, new housing is not needed.
- There is plenty of housing already and not enough infrastructure to maintain what we currently have. As a native of the area, it is hard to see how additional housing can benefit the area. Parking and traffic are horrendous already. Stop building!
- Too much dense housing and not enough schools, parks and grocery stores!
- New housing SHOULD BE AFFORDABLE, above all.
- new housing should be built after there is enough water and electricity to support them
- NOT in single family neighborhoods
- use of public lands to lower cost of site development
- As a 20yr resident who was force out by dramatic rent increase, please don't restrict affordable housing to only specific areas. All people regardless of low income need to decide where they would prefer to live
- NO MORE F*&\$! HOUSING SM infrastructure cannot support it
- New housing should be built in on vacant land
- Infrastructure should support any growth (roads, water, power grid, etc)
- The best place to locate more housing depends on the housing. Inclusionary housing should be located near transit, shops, parks etc. Mkt rate hsng can be located anywhere
- SAN MATEO DOES NOT NEED OR WAN T MORE HOUSING!!WE ARE TOO CROWDED AS IT IS!! THE PEOPLE OF SAN MATEO DO NOT WANT MORE APARTMENT CONDOS. GO TO OAKLAND AND BUILD IT THEREIF YOU MUST. NO MORE BUILDING HOUSING IN SAN MATEO!!THE PEOPLE SPEAK!!
- The forgotten poor under \$40,000 income need housing more than any other group

- October 11, 2021 January 16, 2022
 - We have NO Water!
 - NO MORE MARKET RATE APPROVALS. NONE OF WHICH HAS LOWERED HOUSING PRICES IN THE BAY AREA. THE FACT IS THERE IS PLENTY OF FOR SALE/RENT MARKET RATE HOUSING AVAILABLE IN THE CITY OF SAN MATEO AND THE PENINSULA. APPROVALS ONLY FOR AFFORDABLE HOUSING PROJECTS.
 - Minimize population growth to minimize new housing.
 - locate along the Caltrain corridor, like redeveloping the Caltrain parking lots for the downtown train station
 - Don't impact existing neighborhoods!
 - Infrastructure needs to be addressed before housing. Your building bigger at any cost is stripping San Mateo of those characteristics which made it such an appealing place to live.
 - Preferably No New Housing!!! Getting too crowded.
 - The affordable housing push simply perpetuates the problem of unaffordable housing. We have a demand problem. Housing costs prevent people from moving here which flattens demand which starts leveling out the market. Not what people want to hear
 - New housing must not diminish access to resources of existing citizens (ie, water, transportation, worsening traffic, public safety, etc.)
 - some new housing everywhere but more dense & focused around transit & walkable areas
 - Corner blocks should be converted to 6-8 unit 2 story apt bldg
 - New housing should be everywhere...transit and shops and services can follow. Just get housing built.
 - No matter where new housing is located it will impact traffic and resources we are running out of.
 - Spread out. It's been a terrible assumption that more housing on the train line is good. Less and less people are taking Caltrain. Spread out!!
 - New housing cannot happen without a serious investment in public transit options.
 - Minimize new housing, especially low income housing
 - Downtown
 - New housing located under a stable Infrastructure (water/trash/power/gas/emergency services/air quality/ green zones/pedestrian paths/bike lanes/traffic/disaster plans) before development begins.
 - It is a proven fact that too many rats in the cage causes death, disease and damage. California is a large state, with plenty of area for growth. San Mateo is already too crowded. These numbers are dangerous already.
 - New housing should be developed based on the best profit from it to get the country back to the capitalism, where everything was great.
 - No more housing
 - Not in San Mateo

October 11, 2021 – January 16, 2022

- Rezoned retail parcels should have the bulk of the new housing units. Retail will shrink permanently and there will be surplus.
- There really shouldn't be any "new" housing. Convert existing housing to low cost housing.
- Zoning should allow retail and grocery and other walkable services in current residential only neighborhoods
- Since the development of the race track area that us located near Whole Foods and the train, there are still too many cars. Infrastructures first as well as transportation. 101 is a nightmare and people don't move in without cars. Train only goes N/S.
- With limited land, companies should move out of cities and build housing for their employees
- [Nice] housing should be available to individuals who add to the local economy
- I don't agree with the premise. This is not a fact but a viewpoint. Most economist wouldn't agree
- It should NOT be in misc. small vacant lots that add more traffic and block the coming/goings of existing neighborhoods. What about schools? Will there be new schools to accommodate more population???
- Occupy old business centers
- These choices are too either/or. Assumes there is adequate public transit. Explain who determines level of growth & who benefits from it.
- New housing should serve the people that will live in the housing.
- Stop allowing commercial development without the proponent thereof adding housing for the new jobs created.
- New housing should be limited. San Mateo is suburban community and appears to be mostly built out.
- new housing should be located in all parts of the city. It does not need to be evenly spread. But we should plan for all parts to contribute.
- If you can not afford San Mateo there are plenty of other places to live. NO NEW OR LOW INCOME HOUSONG!
- New housing should consider infrastructure issues like water, sewage, utility usage to not strain our current levels.
- Stop building more housing; lower rents; raise min. wage
- New housing might be built by non-Profit entities to make them affordable
- Build public transit necessary so all housing locations are accessible to public transit
- New housing has not solved the affordability issues so far in spite of thousands of units added over the past decade. How will this be different?
- Away from existing homes, unwanted land, no new housing, no new growth

- New housing should be repurpose duplex to 5 units into more dense housing (Affordable housing % = City Affordable% + retaining existing affordable units)
- it depends :)
- More market rate housing is unnecessary. Stop the madness. You can't have it both ways with tech AND affordable housing. Let's get real and stop ruining our region in a game we can't win.
- housing should NOT upset current seniors
- The mad dash in the past 10 years, Bay Area-wide, to create jobs, has contributed *greatly* to lack of housing and high costs. The equally mad dash to build a million more housing units as a result is equally crazy. Put the brakes on both -- please!!!
- New housing should replace older, low-use commercial buildings.
- This is a flawed question--we DO NOT have to accommodate growth, just tell people we are full, go live some place else
- not in San Mateo
- New housing should not impact present residents of San Mateo negatively. It is known that overpopulation is detrimental to the health and safety of all its residents
- we don't need more here / move to areas of less density
- AFFORDABLE HOUSING not just market rate
- I don't want new housing, I want to make the housing that is available more accessible.
- New housing should be located in areas that already have low density residential development.
- There shouldn't be more housing until the infrastructure can support it
- With all these apartment complexes sprouting up, there should be 15 percent of them designated for "working family" incomes, and 10% small studios that can house very low wage workers. It is better to mix income levels in communities.
- Only in business and commercial areas
- New housing should be spread evenly across the city North-South in transit corridors
- New housing should be concentrated in low density neighborhoods
- New housing doesn't need to be evenly spread, but all parts of the city need new housing
- New housing should include duplexes and quadplexes in residential neighborhoods and support distributed access to school sites across the city

Question 3: Given that there is limited land available, what do you think are the best strategies to manage production of new housing? Other (102 Responses):

• Allow very high density for sale housing (tall buildings) downtown, near transit

- People live where they live for a reason. Turning single family homes into multi-family dwellings ruins the character of a neighborhood. And I mean that NO MATTER THE NEIGHBORHOOD.
- If there is no available land, then maybe we are at capacity and should look to stop landlords from charging so much for rent.
- It's not given, no new housing needed
- I don't agree there needs to be new/additional housing.
- How about updating original parts of San Mateo with parks, fix buckled roads and clean the disgusting sidewalks. Too much focus on building new, when the existing needs maintenance.
- Preserve single family neighborhoods
- Allow for a higher percentage of units at one complex to be below market rate.
- No More high Density projects
- Increasing better 24 hour public transit to SFO The airport runs 24 hours but SM transit doesn't, also with more housing there needs to be equal amounts of public park space cause most apartments do not provide any outdoor space
- NO MORE F*&\$! HOUSING SM infrastructure cannot support it
- Most of these option may are horrible for current home owners. #1 talk about issues are traffic, parking, and congestion.
- Build in any remote parts of the county/peninsula
- The options presented are false choices. State law already allows most of them
- NO MORE HOUSING BUILT IN SAN MATEO!! WE ARE DENSE ENOUGH!! THE PEOPLE OF SAN MATEO DO NOT WANT MORE 5 STORY HOUSING AND WE DO NOT WANT OUR TAX DOLLARS GOING TO SUPPORT IT!! WE HATE THE 5 STORY APARTMENTS THE CITY IS THROWING UP!!
- residential over retail, or residential along train corridor. DO NOT impact existing family neighborhoods!!
- No more building here. There are too many people. My brother moved to Marin county because we are too populated here. He has more land and it is more affordable.
- We already have plenty of market rate housing in San Mateo... Some 70% of San Mateo County is in restricted or permanent open space...FACT. Convert hotels on the eastside of 101 into affordable housing.
- Again, limit population growth to reduce need for more housing.
- Buy existing apartments and convert them to affordable housing
- Streamline remodeling for all houses, not just ADU's
- single family housing properties with large lots/acreage should sell off lots for additional housing
- Don't ruin neighborhoods

- If I had wanted to live in a city I would have chosen to live somewhere else; the smaller town aspect of San Mateo is what drew me back here.
- Build "on top" of existing commercial offices (i.e. the office buildings near the Hillsdale Caltrain Station)
 "Below Ground" level (instead of building tall build below)
- Allow taller developments and forget the open space or the other extreme by allowing nothing which will drive up prices and cause people to look for more affordable cities. The idea that San Mateo can be everything to everyone is absurd.
- Choose not to develop if infrastructure can not be developed at the same rate of speed.
- reduce rents to match local income
- The school district has many empty parcels they should participate with city to create affordable housing for their teachers using their vacant land.
- I feel that before you expand the housing availability you should figure where the water and power will come from.
- Tell Sacramento NO, NO, NO
- Allow apartments to offer income based pricing
- Only downtown
- City/County to pay for additional story and/or additional unit (turn a 4-plex into a 6-plex) and in return, get to rent one of the two new additional units, giving the landlord the other unit as a thank you for participating and donating their property.
- enable faster transit systems, initiate business incentives to hiring local employees.
- Encourage large properties in the wealthy areas to subdivide or build ADUs there to take on their share of the density
- Stop the madness
- New housing should be developed based on the best profit from it to get the country back to the capitalism, where everything was great.
- Already too crowded, no more construction
- Increase allowable density everywhere how is that not a choice??!!!
- To not do it. All of these would make the city worse.
- Stop building offices which create population increases! Encourage regional shifts of commercial activities. It seems that only city officials think it's "cool" to have and brag about this influx of business.
- Do Not Build Higher Than 5 Stories High! I Never Want San Mateo Co To Be/Look Like S.F., Los Angeles of New York City!!!

- Rezone disused retail with higher density zoning. I would greatly prefer having a 10 story building replace a strip mall than having 4 story apartments next to single family homes in neighborhoods where this is currently not allowed.
- build affordable housing. Our kids who grew up in SM can't afford to live here.
- Again, there should not be any additional housing. Any new development has to consider biodiversity and land conservation.
- Set a percentage and numerical target for truly affordable housing to close the existing gap over a five year period
- Change zoning and tax policy to allow mutually beneficial ways for people to split ownership of existing real parcels.
- Let's see if remote work reduces housing impact.
- Companies should move out of cities and build housing for the employees
- Allow taller developments where taller developments already exist
- Convert shopping malls to housing over retail units
- The other option is to allow the market to prevail
- DO NOT lose single-family homes and neighborhoods. This is a town, not a Metro City!!!
- ADUs only on large lots that also allow for parking
- strongly against ADUs on single family properties
- Rezone vacant office buildings and other underutilized areas to residential and stop construction of more office buildings
- Again, these choices are incredibly biased.
- Prioritize public and quasi publicly owned sites for deeply affordable homes
- increase public transit at affordable rates from areas where housing costs are lower. Like the buses that google/apple/facebook etc run
- No further expansion necessary.
- Increase density in all areas. but also increase transportation options. Increase parks and open space.
- Strongly oppose SFR conversion to duplexes. It should be prohibited to convert a garage into an ADU.
- NO NEW HOUSING! Plenty of housing in the east bay
- We don't have enough water to support the existing population. Stop building new housing.
- Keep San Mateo Beautiful! No more added housing! Redevelop what we already have.
- I see none of these as viable options, but the third one is heinous.
- Provide transit option so new houses can be built all over the city

- October 11, 2021 January 16, 2022
 - San Mateo should not build anything unless they can provide adequate parking space. We are too crowded already. People who are low income, cannot afford to rent or but a home so who are you building more housing for?
 - Publicly financed housing, directed by a community oversight board, tasked with approving sites and designs
 - there are too many people here already. don't build any more multi unit complexes
 - Stop building more housing; lower rents; raise min. wage
 - none, none
 - Allow more BMR Below Market Rate Rental availability on new apartment developments
 - Convert empty shopping centers into housing
 - Buy/Build Beautiful, Mixed Income, Social Housing! As long as housing is treated as a commodity instead of a right, working class people won't be able to afford to live here. See Vienna, Austria: https://youtu.be/LVuCZMLeWko
 - Build it in San Mateo Park! Or , better yet, Hillsborough. We are already overcrowded. Infrastructure not keeping up. Can't even get the kids across town to a Cub Scout meeting without sitting in traffic. This overdevelopment ruins quality of life.
 - No new housing, tell the elected to abide by what residents voted on or they get voted out
 - Increase the affordable housing Percentage/ density bonus and give developer say in who rent the additional units.
 - Stop building offices & then allowing new workers in these offices to move into housing that should be going to existing residents & workforce that have gone unprioritized. Existing workforces & residents first!
 - No ADUs west of The Alameda; any conversion to duplexes also east of El Camino
 - Convert commercial areas for housing
 - Build buildings with 3 and more floors and underground parking not just 1 floor
 - Utilize current open lots that exist throughout the city for new housing
 - Declare some open land available for construction
 - Best strategy is NO NEW HOUSING, but the city council never listens to this
 - Create public transit that will enable greater mobility and lessen demand for existing housing.
 - All these options add to more cars and more congestion
 - Only where parking is available, to be sure not to add to existing congested areas.
 - Build affordable housing not market rate

October 11, 2021 – January 16, 2022

- without infrastructure improvement, I don't believe any of these options work. San Mateo is becoming unbearable to live and work in due to the traffic congestion and lack of resources (Police & fire and water). These things need to be addressed first.
- We should do all of these
- Single family neighborhoods should remain single family no ADU or duplexes if the parcel can not support the additional vehicles
- There shouldn't, that is the problem.
- Create more lower/moderate income housing options that are dependent on a certain income brackets. Stop the ridiculous outbidding process.
- No new housing, we are built out
- Affordable Tiny houses on parcels.
- Create greened rooftops, living walls, and streets that can better manage storm water runoff and improve climate. Smart metering should be included in any new housing. Choose sites of already built but inadequately used areas.
- My 3rd is a combo of applying SB9 laws recently enacted w/inclusionary zoning & offering other incentives to property owners/developers
- No contracts to greedy developers who have council members in their pockets.
- Cities should joint venture to build in the entire housing market area
- Encourage conversion of less-used office space into apartments

Question 4: What types of housing do you think should be prioritized? Other (73 Responses):

- Please stop trying to overbuild in areas that are already maxed out. Go into outskirts of county to build new.
- Preserve and maintain affordability in existing multi family housing
- Do not approve new office buildings
- prevent investors from buying new housing units
- Preserve single family neighborhoods
- all of it
- inter institutional development...with schools/hospitals/govt. entities
- My experience has shown that greedy landlord's extreme rent increases have forced a huge exodus from SM People's mortgage do not increase at the rates my rent was increasing Please help assist in building units for affordable ownership to prevent gouging
- NO MORE F*&\$! HOUSING SM infrastructure cannot support it

- October 11, 2021 January 16, 2022
 - NONE!! WE DO NOT WANT MORE HOUSING!!DO NOT SPEND ONE MORE TAX DOLLAR SUPPORTING THESE CROOKED DEVELOPERS!! WE DO NOT WANT ANY MORE HOUSING BUILT, ESPECIALLY USING PUBLIC FUNDS!!IF YOU HAVE TOO MUCH MONEY, LOWER OUR TAXES!!!!
 - Build in less expensive areas like Chico, Ca or Vallejo. Someplace where starter homes are more affordable.
 - Residential units above commercial property near El Camino
 - AFFORDABLE HOUSING
 - No flag lots, no ADUs.
 - Subsidize new and existing housing
 - Just build housing of any kind. New development has been too limited for decades
 - We should support a wide variety of options
 - "Interim/transitional" homeless individuals/families who lost their current home (thru unforeseen circumstances to no fault of their own) to transition to a new home that they will afford on their own.
 - MORE
 - All housing, there's no need to prioritize
 - Mixed used tower with more units
 - If you make housing so dense, it will impact the city. Our close neighborhoods will be lost. this is crazy
 - Loans for families to buy homes
 - Old people housing
 - Build only spacious, beautiful homes. Stop making hideous concrete and steel apartments that will someday become ghettos.
 - What ever type of housing with maximize the number of families that can keep living in San Mateo.
 - Single family houses
 - Capsule inns by businesses and transit areas
 - Maintain the current population and limit growth.
 - Larger units for families with children for rent and for ownership. Limited stock of 3BR units for rent and ownership.
 - Whatever our service workers, first responders, and teachers need so they don't have to spend their whole non-working lives commuting
 - When converting public land the project should be low income or affordable for a teacher
 - Truly affordable housing. Much of affordable housing is not affordable.
 - Make sustainability conscious, case by case decisions about what to do with available properties.
 - Affordable housing prioritized over greed of owners and developers

- Ex. When we create affordable communities to live in, we seem to eventually want to remove them (i.e. Dock Town).
- Building type should be considered in overall development of the city. Piece meals will be
- Adding housing above existing commercial properties in downtown areas (3,4th ave, 25th ave, 37th)
- Senior housing
- Housing in the Downtown area
- Single Family Homes with yards/privacy.
- Again, biased, leading questions.
- housing that is affordable for lower income people.
- Live where you can afford. If you can't afford it here, live where you can
- Affordable senior housing
- Mixed use properties in transit areas.
- Do not change the character of SM by making every neighborhood multi unit. Build more AFFORDABLE housing and less market rate
- Publicly owned and subsidized housing, including direct municipal ownership as well as other options like publicly subsidized coop ownership.
- Stop building more housing; lower rents; raise min. wage
- Allow Easy application process for BMR Below Market Rate Rental
- Affordable housing, whether created through new construction or through preservation of existing units with their affordability deeded going forward
- Social Housing. South San Francisco has started: https://www.smdailyjournal.com/news/local/southsan-francisco-eyes-public-housing/article_00a19af8-3eb2-11ec-a4cf-4fdd622236d7.html
- Stop overbuilding. Stop kowtowing to developers.
- Housing for seniors
- Affordable housing but PLEASE don't make them small, it's a torture living in tiny apartments. Build taller buildings please
- single unit houses
- Multiplex units (e.g. duplexes, triplexes, quadplexes)
- seniors living
- Build affordable housing on city land.
- LEED certified and otherwise sustainable housing
- high density, multi stories, multi tenets
- no adding units to lots under 6,000 sf

- October 11, 2021 January 16, 2022
 - Stop building unsustainable housing
 - Include access to real storage units nearby at reasonable rental prices so families with kids can consider living in a smaller unit. They can access seasonal stuff w/o filling all the living space. Green spaces make living in smaller units enjoyable.
 - Housing options based on income brackets.
 - Affordable housing
 - Reduce rent in existing rental units
 - No increase in density in residential areas
 - Rent control, rent needs to be based on what owner owes, not capitalize off renters. Raising property owners' taxes tolls back to the proletarians.
 - Green, LEED-certified existing buildings and new green units for underused, renovated structures.
 - Housing for senior citizens who have been long time residents of the county
 - Multi-residential rentals, condos, & ADUs (yes, correct, multi-residential ADUs is 'thing')
 - Options that go beyond the current "studio" arrangement for seniors and people with special needs who may need a live-in aide and for whom a studio will not be viable. Also prioritize workers who support them in adult day services, whose wages are low

Question 5: What do you think are the best ways to address housing affordability? Other (113 Responses):

- Cut developer profits
- Change policies (like tax relief) that make it cheaper for older folks to stay in large homes instead of moving to free up housing stock for new families
- Add supply of new, high density housing, rental and for sale
- I've seen plans to tear down homes along W Hillsdale (in residential areas) and turn them into apartments. What garbage. Benefits developers and turns neighborhoods into traffic nightmares. But maybe that's your dream. Seems like it.
- Rent control.
- Increased wealth of individuals and families
- Again, build in the outer parts of county please leave over-impacted areas alone. It's already too crowded and there are not enough schools, grocery stores to support current residents.
- Allow increase supply.
- Penalize frivolous use of CEQA
- who are your other institutional partners goals

- Put public funds into building more affordable housing units, houses, duplexes, fourplexes, and help those making low income with down payments for buying their own homes if you are vested with where you live you will take better care & gain equity for self
- Build for diverse income
- NO MORE F*&\$! HOUSING SM infrastructure cannot support it
- Cap on "~expensive' housing
- DO NOT SPEND MY TAX DOLLARS FOR SOME ILLEGAL ALIENS THAT CROSS OUR BORDER ILLEGALY!! I HAD TO WORK AND SWEAT AND SAVE FOR YEARS AND MY HOUSE IS STILL NOT PAID OFF!! HELP OUT YOUR OWN PEOPLE FIRST BEFORE YOU GIVE MY MONEY AWAY TO HOUSE ILLEGALS!!
- Choose a more affordable community. I love Atherton and Hillsborough, but I don't think I can ever afford those towns, so I chose San Mateo. Now I wish I chose a town with less people, congestion and growth!
- Build more of all types of housing by increasing density
- Encourage multiple dwelling units near transit corridors and train station
- OPEN UP SOME OF THE 70% RESTRICTED OPEN SPACE IN SAN MATEO COUNTY FOR DEVELOPMENT, SPECIFICALLY AFFORDABLE HOUSING.
- Lower population growth requires less new housing.
- Remove the barriers to building housing of any kind. Height limits, too much emphasis on wants of existing property owners.
- Change single family home zoning laws
- Eliminate height and density restrictions, especially in downtown.
- Increase density and height downtown through mixed use development
- 1) Publicly owned housing (2) repeal prop 13
- Eliminate height/density restrictions
- Improve the frequency and reach of public transit so dense housing is feasible without the added cost of allocating space for so many cars.
- Don't ruin existing neighborhoods
- Incentives for private funding. If someone want's housing, that person/group etc. should pay a majority share for their housing. Don't use tax dollars.
- Reduce restrictive zoning and allow tons of market-rate housing.
- reduce over paying rent back to 10 yrs ago
- The State of California should have a fund for very important assistance and encourage developers with Incentives to create more affordable housing
- MORE

- Figure out where all of the automobiles are going to park.
- Demand (not encourage) developers build greater % affordable
- Moratorium on new office construction. Trying to make housing more affordable by increasing stock is futile if you keep expanding the population and driving prices up -- nothing will ever change.
- Build majority affordable housing. Google and Facebook engineers don't need help finding another million dollar home, teachers and service sector people need \$200k homes.
- Convince the federal government to restore the 20th-Century tax rates for high-income earners, so they have less money with which to buy up property and drive up prices.
- Tell landlords they must lower rents. None of the above is really going to work well.
- Make commute easier and faster, say from east bay to San Mateo
- Subsidies for families
- Build only beautiful homes no more ugly glass and steel apartment buildings and let the market decide housing costs and wages that support cost of living.
- Require all new development to be at least 50% affordable
- lower property taxes
- Create more jobs and increase pay enough to afford housing on their own like everyone else.
- Remove developers from being key decision makers. Create Business incentives for hiring local residents
- These are all terrible ideas.
- This is a systemic issue beyond the score of the city of San Mateo.
- Encourage people to work harder to make more money to afford what they need.
- Move someplace else
- Get large employers contributing to housing subsidies and construction as a benefit
- It doesn't need to be addressed.
- Increase the allotment of affordable housing for all new development
- Do Not Turn San Mateo Co into New York City, NY!! Long term residents of San Mateo Co Have/Are Moving Away Due To 'Over Population' Of San Mateo & The Bay Area!
- don't incentivize developers, make it mandatory to build affordable housing for approval of their projects
- I know someone who runs homes for homeless. Every summer they leave but if their checks come in, they hold their spot for winter. Homelessness are we talking about working poor? Good thing but needs to be separated from mental illness.
- Incentive for companies to move out to remote areas

- October 11, 2021 January 16, 2022
 - Senior housing
 - large numbers of housing prices will not come down till there's a glut. You can barely move the needle without building in remote, low cost areas. not San Mateo.
 - None of these. Let the market prevail
 - Continue building single family homes so the existing SFH don't keep raising in price. Not everyone wants to live in a box without a yard/privacy.
 - Limit corporate take over of housing. Stop allowing real estate investors to out bid local families for houses.
 - Incentives for developers to build housing instead of offices
 - Give essential workers purchasing priority over investors not living in the housing
 - Reduce taxes
 - Increase zoning in R2, R3s. R1s are now essentially supporting duplexes given State law.
 - affordable housing by developers should actually be affordable. not just a small percentage off their 'luxury' units
 - Not the city's purview to subsidize expanded housing and paying residents' rent.
 - Move where you can afford.
 - We can't pay taxes to cover incentives for residents and developers. We shouldn't rezone existing neighborhoods and cover all of every property with dwelling units
 - Look at the need for less office buildings more townhomes for families and less higher buildings
 - Reduce bureaucracy and cost for all sorts of building fees
 - Consider dormitory living for homeless and must do work at site to "repay" for having a place to stay. Will help to create dignity while staying is such a transitional site.
 - The Peninsula is too overcrowded now. Stop adding to the problem.
 - Again, I am highly opposed to being forced to turn my single dwelling home into a duplex.
 - cap rent increases
 - Don't build luxury units. Focus on affordable housing for everyone, and build lots of them
 - Public financing and management of housing as a basic human right
 - Stop building more housing; lower rents; raise min. wage
 - Easier application process for BMR Rentals for Senior Housing programs
 - Ferry stops into San Mateo county from SF and east bay
 - The City must retain ownership of the housing when using public funds to construct new housing/buy existing housing stock. Start the path to de-commodify housing. Rent control + vacancy control until we get there.

- October 11, 2021 January 16, 2022
 - Stop ruining the character of our small city! The City should demonstrate how effective past strategies have been in addressing this problem. Building more units will not resolve it. NO INCENTIVES FOR BUILDERS. THEY ARE ALREADY PROFITTING NICELY..
 - Don't use MY money for any of these options
 - Revise building codes to make housing competitive to commercial
 - Massively increase allowed density around transit stops
 - A light version of rent control, something not fixed for life but a couple of years
 - Relax parking minimums near public transit, so it takes less land to build apartments
 - What about young people who are not homeless but can't start families? Not everyone is a coder but we all should have good housing. There should be rent and unit quality control. Ventilation is important
 - not in San Mateo
 - Limit development that adds to existing over-crowded areas.
 - have them move to affordable areas
 - Encourage homeless to move to affordable states (Texas, etc)
 - Build affordable housing not just market rate
 - Please, see the reality people are unable to pay your "affordable housing of half million or more with the squalid salaries that we have in the Bay area or in the entire USA. It is a shame in how allow crowded rent units families living in a bedroom
 - Zoning changes allow taller buildings to be built, which naturally incentivizes developers to buy old, short buildings and convert them into high rises
 - Eliminate or reduce property taxes on affordable housing and ADU's.
 - public funding for established affordable housing developers
 - Allow the free market to work. Manipulation made things worse.
 - Whatever happened to double depreciation incentives that were used to encourage apartment construction in the 1980s?
 - Research based approaches/proven strategies
 - Allow dense/tall residential/mixed around transit/job/commercial centers
 - Have people live where they can afford to
 - Independent housing for middle class seniors who rent!
 - Improve public transit so people can efficiently get to this area from further away. Have businesses have varied start times to reduce traffic.

October 11, 2021 – January 16, 2022

- Having a rent cap. Not allowing home owners to be charging first, last and security. Maybe only 1st and security deposit.
- Support Affordable housing organizations such as MidPen and Bridge housing that develops workforce, senior and family housing
- Work more closely with local Non-Profits, Faith Leaders/Institutions to donate resources, & Housing Authority to expand programs such as Section 8 housing, subsidizing rents/security deposits (or movein fees), & educating/incentivizing property owners.
- Does zoning new office jobs increase people wanting to live here? (see below)
- Create a city run non-profit public housing department. Compete with developers. Rents would not increase simply because housing prices increased. Also, encourage cooperative housing. Residents would own the building collectively.
- No contracts to greedy developers who have council members in their pockets.
- Require new commercial development to contribute to housing funds for public non-profit housing.
- Enlist additional support from large companies to help offset housing demand by donating land, \$, or converting office space to living space for employees/others

Question 6: What do you think are the most important ways to ensure housing opportunities are available to all members of San Mateo, especially those who have not had fair access to housing in the past? Other (81 Responses):

- impact fees on new construction for affordable units
- Rent control
- Priority to existing San Mateo residents, not new populations looking to move into San Mateo
- Assist those that need quality housing to outlying areas that are available to them.
- Build more supply, put downward pricing pressure
- rent control
- Decrease the poor of the home owning majority
- The max rent increase currently is approximately 9% a year. This is not sustainable. Home owners do not see their mortgages increase at this rate. Provide affordable units are made available that don't allow Landlord ability to price gouge
- NO MORE F*&\$! HOUSING SM infrastructure cannot support it
- City can allow access to public work kind of jobs for homeless people who struggle to find employment. Replace liberal arts academic units with math, STEM, and financial education. Disincentivize street camping.

- None of the above. These options result in govt regulation of housing where there was none previously and a restriction of property rights.
- I HAVE NOT HAD FAIR ACCESS TO HOUSING IN THE PAST BUT I WENT TO SCHOOL WHILE ON GENERAL ASSISTANCE WHILE LIVING IN THE TENDERLOIN IN SAN FRANCISCO AND WOEKED THE SAME JOB FOR 21 YEARS! EVERYBODY HAS THE SAME ACCESS!
- I tell everyone to leave San Mateo. There are too many people, it is too expensive, I encourage people to leave or move. I wish I could. I work at Aragon High School. We are BUSTING at the seams. There is no more room, parking, water, etc.
- Rent Control
- Affordable units near El Camino, 101 and transit corridors. aow
- MAKE DEVELOPERS OF MARKET RATE STACK AND PACK HOUSING PROVIDE MORE AFFORDABLE HOUSING. SUPPORT BRIDGE HOUSING. THERE HAS BEEN MORE YEAR ON YEAR BUILDING PROFITS FOR MARKET RATE DEVELOPERS FOR THE LAST 10 YEARS IN THE CITY.
- Your definition of "fair access" may not be shared by many other residents. What is it anyway?
- Just. Build. More.
- Change single family home zoning laws
- fair access to housing? discrimination or no money? Discrimination is illegal. No money is another matter and short term shelters need to be available. We all have access if we have money.
- Fund robust auditing of bias behavior (whether intended or unconscious) of landlords and real estate agents.
- None of the above
- Assistance for educators and first responders
- disallow landlords to continue to raise rents, simple rules, no rent increase till after the second year.
- Again, stop trying to increase population by building new office buildings we don't need more.
- Enact empty property taxes on homes that stay empty the majority half the year plus one day, and tax owners with more than one property.
- Prioritize housing for service workers (who work full time but cannot afford housing in San Mateo)
- Infrastructure needs significant attention before moving forward with any changes to our population.
- What about water issues, parking, traffic, quality of SM life, etc.? Do I get to move into Hillsborough if I can't afford it? There should be no incentives to build new housing, especially dreary apartment buildings & low-cost (i.e., crappy) housing.
- More loan opportunities; More remodel opportunities; Partnership with landlords to improve/increase their number of units if they use part of the increase to house the underserved.

- I do not agree with this! We are not guaranteed housing in the locations people want. Public transit and infrastructure needs to improve.
- good employees create good communities; create business incentive plan to hire locals and generate housing solutions (residential/work sites or company assist housing solutions)
- We are currently paying people not to work and giving them free rent. The first step is to put all welfare under 1 roof. Everyone is entitled to housing. It's our system that causes the problem. Working class people have become the chumps of society.
- Require large employers to engage subsidize worker housing close to work or otherwise support proximate housing supply
- Stop The Condos After Condos After Condos Construction! San Mateo Never Need The Smog & Filthiness & Mass Population of Los Angeles!! No!!
- I don't understand the effects of most of these on housing availability. I.e., how significant of a factor each might be.
- Add more housing units at market rates
- Increase affordable housing limits to include middle class wage earners.
- Stop restricting businesses with covid mandates so that they can make more money and hire more people.
- Seems like you've already made up your mind. Are you trying to be housing experts or social workers? Are you trying to build a community or a welfare city.
- First time homebuyer programs, require financial institutions to increase lending options, increase salaries for low wage workers, discourage housing ownership by Wall Street REITs and other investment properties and international ownership.
- Require minimum training for property managers and property management, access to lawyers for renters
- Any policies that place limits on housing providers will be counter-productive as the owners of such will convert their properties to owner occupied housing
- work with 'underserved' groups on how to obtain and hold onto housing
- allow duplexes, triplexes and fourplexes in single family neighborhoods
- Who is a member of San Mateo? Strict Federal & State laws are already in place regarding fair housing.
- What do you mean by "have not had fair access". If you have the money you get the house. It's that simple
- I don't see anything here to check
- Rents are too high. We need to dramatically increase supply to offset the out of control housing costs
- Provide education & job training to help people get better jobs.

- Enforcement of more BMR in each rental developments.
- Build more housing, faster
- Rent control + vacancy control, build/buy social housing.
- It's just possible that not everyone will be able to afford living here-and this includes my own childrenbut possibly that's the reality of living in a place with limited land.
- Programs to educate people on how to be responsible, contributing members of society.
- Financial literacy and budgeting
- Stop allowing new office workers to move into housing until there is enough housing for the residents & workforce who are already living & working here & are in need of housing.
- Everyone has the ability to live in San Mateo if they make enough money. The cost of living in San Mateo is dependent on location, location, location. Remove illegal immigrants and that will solve some of the housing problems.
- Make it easier for landlords to kick out deadbeats. If they can't afford to live here they should move!
- not in San Mateo
- Establish give and take for both existing and new residents. Do not over crowd any area of San Mateo.
- Support residents who can't afford living in SM to move away
- Prevent landlords from continually raising the rents even year. People's salaries do not go up hundreds of dollars each year.
- First build affordable. The City has approved thousands of stack and pack market rate housing that has done nothing to help with the affordability of housing
- Provide rent to own and similar opportunities to provide more equitable opportunity and a path to property ownership
- Examine the people salaries and then see what kind of housing you are going to rent/sale. Stop developers that are a cancer hurting our communities and the environment and favoriting
- Just build more housing! Increase the supply
- Don't. It sounds harsh but delaying the market is bad
- If land is limited BUILD TALLER. More DENSITY close to mass transit. Build PROTECTED bike lanes to get people out of CARS.
- Significantly increase housing supply. If we want people of all means to live here, we need to build enough for those who can currently afford AND those with less. Otherwise, we have to outspend the increasingly smaller and richer pool of who can afford.
- Raise minimum wage. Significantly.
- We need a reality check, it should NOT require dual income to rent an apartment I work in tech but if I didn't have reasonable rent even I can't afford to live in San Mateo

- October 11, 2021 January 16, 2022
 - None of the above. The people are responsible for their own housing needs
 - Give priority to public transit, bikes, and pedestrians over individual cars. Create dedicated bike and bus routes that are straight shots and intersect across the city. Create parking structures with solar panel shading at the ends of these lanes.
 - Rent Control & increase the percentage of affordable housing in new housing development. Ask business to support affordable housing for workforce and senior citizens
 - See answer in "Other" in response to most recent prior question above.
 - Use rent control to provide rent stabilization. Do not allow landlords to abruptly raise the rent simply because housing prices shot up.
 - No contracts to greedy developers who have council members in their pockets.
 - Aggressively enforce fair housing laws
 - Streamline permitting. Resist NIMBY and embellished negative impact of proposed projects. Maximize available space. Minimize # of single family homes on large lots. Incentive building of affordable rental and starter home units for would-be buyers.
 - Work collaboratively with the Golden Gate Regional Center and its clients to meet critical housing needs, so that clients can remain in their community--not be sent to far-flung parts of CA away from familiar supports on account of local housing costs

Question 7: Is there anything else you'd like to tell us about housing needs in San Mateo? (296 Responses)

- Build taller buildings, TOD with bike/pedestrian infrastructure so citizens don't have to drive everywhere.
- Housing affordability is complex and most of the suggested solutions thus far have been simplistic. Housing affordability is not by and large the City's fault as many developers and some legislators tend to make it out to be.
- Need to have quality dense developments. So many proposals could, at low cost, have much better design and public spaces. We are just doing up or down votes instead of insisting on good design. Design defines the character of a community. It makes dense housing more acceptable to existing residents. And it says that we, as a city, care about all residents. I feel like city leaders don't care about the quality of life for people less fortunate, same as decades ago when we built ugly boxes for homes instead of nice developments. Good example = below market rate housing on El Camino near Michaels. Bad example = Station Park Green (had paint instead of good design and a fence between it and the train station!)

- If we can't convince developers to do affordable housing, then San Mateo needs to do it themselves
- housing needs parking. condo and apartment units created should have a minimum of 1 parking space onsite per 1 bedroom unit. housing near public transit will help those who can not afford to have a car still travel to work. park space/open space must be preserved as humans need to be able to be outside safely. bike lanes, safe walking corridors are essential
- San Mateo has some highly segregated neighborhoods that have experienced profound disparities in their historical level of investment and maintenance, housing needs (like severe overcrowding), and access to local neighborhood-serving schools with a balanced and integrated student body. We need to make significant strides in rectifying this segregated living pattern, investing in neighborhoods that need it, and working to prevent displacement through tenant protections and the production of new, integrated housing that serves both rich and poor.
- The jobs housing imbalance is due to bay area cities allowing lots of new office space to be built but rejecting new housing. High cost housing is fundamentally a supply problem. Nimby-ism has to stop. The Peninsula is now an urban area.
- All of the new building projects thus far are ridiculously expensive and go nothing to help anyone except tech employees. Who else can afford \$3000+ for a studio or one bedroom? Because the new places are so expensive, even the "affordable housing" is simply out of reach for the average person. The same rent controls in place in SF, need to be added to San Mateo (both city and county) to stop the greed. I recently tried to assist a friend find an affordable apartment (\$2200 budget) which were mostly crappy places without even a kitchen. It's appalling what has happened to housing in San Mateo.
- Your priorities seem to be developers and environmentalists, as well as activists from SF and the East Bay (plus SM officials who don't even live here). I've grown weary of attending your meetings because you all seem wholly disinterested in actual residents who pay property taxes.
- "The term affordable unit in a construction project is misleading as the unit is usually unaffordable to the middle and lower income people. Developers should be encouraged to use less expensive/ fancy items in the units to keep the price affordable.
- Also there should be more rules regarding first and last deposits when renting a unit. The deposits are too high and difficult to get back at end of a lease."
- We continue to hear that there is no affordable housing here, but every place you turn there are new housing units going up, so how can we be so low on housing? Maybe the answer is not new housing, but better management of the housing we currently have. Big real estate companies come in here and build new housing, then charge an arm and leg for it then everyone cries that we don't have affordable housing. Control rent prices for these companies and we might be in a better position. How much of

the new housing is filled? Would love to see actuate information and not those from big real estate companies.

- We need to distribute additional housing throughout the city to avoid ghettoization. Mixed-use midrise (~5 floors think the buildings of Haussmann's Paris rebuild, although perhaps with more variation) redevelopment along El Camino and the Caltrain line seems promising. This would require walk and bikeability improvements. Protected connections for pedestrians and bicycles ought to be added across 101 and 92. Open and green space should be added, microparks and street trees help too. Vertical growth to two floors for single family properties should be made easier to preserve green space and permeable surface. This will add housing for ADUs or multigenerational households, reduce the load on storm sewers and runoff, and preserve green space in yards. Native re-plantings for yards should be encouraged/subsidized.
- This survey questions are heavily biased in the way they are asked.
- Building more housing is not always the answer. It may provide more tax income to the city but it doesn't do a lot to preserve the value of the area. Filling in every empty piece of open space makes for more crowding, adds to current traffic issues that are bad enough already and limits the joy current and future homeowners experience already in this lovely city. Why not work on the current infrastructure first to make sure those who currently live here have access to all that they need before adding more people and cars. More is not always better.
- As mentioned in bulk of my survey the City I have lived in for over 22 years (and pay taxes) is run down and over crowded. Please start investing in infrastructure green space, clean sidewalks on 25th Ave, fix dilapidated streets. Traffic is unbearable and stop building housing on top of housing on top of housing! There are too many people living on top of one another. Sometimes we don't get what we want. If you can't afford to live here, there are other cities to enjoy life in. I would love to live in Hillsborough, but just can't afford it. So that is life. Funny how Hillsborough is exempt from having to deal with city officials who want to build compacted dense housing and homeless shelters 500 feet from their home.
- Rent is now 150% more expensive than when I first moved to San Mateo, and the cost of housing is a primary reason I haven't chosen to start a family here. Even buying a one-bedroom apartment is out of reach for dual-income couple with no kids.
- I love San Mateo but it has to become more dense. I support many of the proposed state laws to overrule cities that are artificially restricting residential construction.
- It is important to have affordable housing for people to live and work Area.

- Great need for 1-2 person small residences with allowed pets and pet area at affordable rates/rents.
 My children want to be able to stay in San Mateo. They are college age but don't make lots of money.
 Housing in this area is too expensive for them to stay. More places also need to allow pets.
- Developers must pay their fair share of the additional resources needed for the resulting increased residency in any location throughout San Mateo.
- I wish our elected leaders would realize that in the Bay area with our geographical issues that limit building, that an area can only support some number of people/jobs and trying to cram more into that area just leads to a poorer quality of life for everyone. People come for jobs, if large developments that have many jobs were limited then the need for more housing would also be reduced. Don't approve more Apple "flying saucers" or Salesforce towers. Just look at the "stack and pack" massive drab apartment complexes of the former Soviet Union countries or today's China and you see what our country is heading for. Unchecked population growth is the greatest evil the world faces today. Since there is very little the US can legally do to assist with population control via foreign aid, looking to control our own population is the best we can do.
- "Preserve single family neighborhoods.
- We don't need high rise apartment buildings -- we have vacant office spaces, and most new apartments aren't affordable anyway.
- Traffic and parking are a problem already in downtown San Mateo and highways 92 and 101 and have been for years. We don't have the infrastructure to support mass new housing builds."
- Over all the years I have lived in San Mateo, I have noticed more new market rate units being allowed than affordable housing units. The percentage rate to build here should increase for affordable units. Maybe even at a rate of 50/50, to be totally fair.
- Current home owners act as a rent seeking cartel, discouraging any change despite the negative externalities this imposes on everyone else. This is ethically dubious and should be discouraged or penalized.
- We should compare with other Peninsula cities' approaches' ¦ there may be good ideas and opportunities to align
- Where is the leadership? Stop kicking the can down the road to housing needs...The county is buying hotels and shovel ready opportunities...The city of San Mateo and Educational organizations (surplus study of owned real estate) has controlling interest in owned real estate (former Delaware street SM Police station/ fire station sites)...what are the plans for those properties?
- I'm a renter and have come to peace knowing I can never afford to buy a house here in San Mateo. But I love the area so much. I cannot afford another rent hike. The next one will probably force me to move

away. I want to stay but the high cost of living will eventually push me out. Please in your planning process, keep renters in mind.

- Need to increase density and services throughout the city, not just along Caltrain/El Camino. Ease the process for small, more dense develop and not just focus on a few large new projects.
- San Mateo broke my heart! I lived in San Mateo for over 20 years and was forced to leave due to
 dramatic rent increases (134% in 10yrs) I still work in San Mateo but can not afford to live there. I want
 to help be part of the solution and that is why I'm taking so much time to fill out this questionnaire. I
 sent a heartfelt detailed email to the Mayor of San Mateo after his state of the Union address. His
 response was a one line curt form response with typos that only said thanks for feedback very
 upsetting! His state of the Union address only spent a few mins addressing the housing crisis. The
 housing crisis is a CRISIS! and the city of San Mateo is not treating it like one.
- Incentivize home selling by reducing capital gains tax. There is not enough inventory for any income level.
- "NO MORE F*&\$! HOUSING SM infrastructure cannot support it.
- Thank God I'm moving away from here."
- Stop building. Go outside and see that business are leaving, vacancies everywhere. Most people would agree to chip in to help homeless, but not by spending millions to build in the middle of already overdeveloped city with failing infrastructure.
- San Mateo's infrastructure is in need of upgrades and there is a drought, most likely for the long term. Any growth creates more problems and there seems to be no solution for them.
- Restricting private property rights as a tool to make housing more affordable results in housing even less affordable than previously. Don't believe me, check San Francisco & NYC with their rental housing restrictions.
- I strongly believe the voting public was misled or at least purposely misinformed when the 2 ballot propositions were voted on and passed limiting height in buildings already 6 stories...those measures should be repealed or replaced allowing developers downtown and along the rail corridor and other transportation roads to build up...doing so would ultimately preserve the best of San Mateo's historic character while allowing thousands of housing solutions
- More dense housing needs to be partnered with more community services, parks, community centers, retail options, and realistic parking space. Also, if you increase density, you must increase security with more cops on the beat, more and better traffic patterns.
- "THIS IS A BIASED PREJUDICED DISCRIMINITORY SURVEY. YOU ASK THE WRON G QUESTIONS AND THERE IS NOT AN OPTION TO SAY,

- 'HELL NO! I DON'T WANT ANY MORE HOUSING!"" LISTEN TO THE PEOPLE WHO HAVE BEEN HERE FOR YEARS!! THEY DO NOT WANT ANY MORE HOUSING!!"
- I know there has been a log of pushback about duplexes/ADUs/multiple-unit housing in single-family zoned neighborhoods. I happen to think that this would be a helpful solution and would welcome it in my neighborhood.
- "Improve building code enforcement to discourage absentee landlord neglect of shoddy house conversions to multi-family dwellings. I fear the house next door will burn down from electrical and cable service overloads.
- Find homes for the forgotten poor
- ADU permission needs to be easier I have spent 3 years and over \$50,000. On consultations with all manner of city requirements. I still have no permit issued and am going to give up. When it takes years and costs thousands no wonder no one is able to build affordable housing or ADUs in San Mateo.
- "Please be aware that many policies will push out the 'Mom and Pop"" landlords. We are the ones servicing long term tenants and providing fair value housing. We should be encouraged not penalized.
- "1. There is NO SUCH THING AS AFFORDABLE HOUSING here.
- 2. There is not enough water to sustain all these people.
- 3. What good are good schools when we are so overworked and overwhelmed with so many students.
- 4. We should be encouraging people to live within their means.
- We severely need more density and more high rise projects in and around downtown! This helps the supply of housing and local businesses with foot traffic while keeping cars off the road with walkability!
- Que los precios de alquiler estÃin muy altos
- Plenty of apartments and townhouse style units are already in the pipeline. City needs more single level 2-3 BR condos targeted to active senior downsize market around Central Park, Hillsdale and San Mateo Drive. That should provide opportunities in established neighborhoods for families.
- There needs to be more options. The lack of supply is the problem. Too few available units for rent or ownership drives up prices.
- Developers should not be able to get out of building sufficient parking. Maybe offer incentives for individuals who do not have cars. Some of us can't live without cars unfortunately since schools are located so far away from homes. The density/building height limit in San Mateo is a joke. There is no reason measure y should have passed. The NIMBYs won (by like 10 votes! seriously get out and vote people) and it's sad.
- Stop adding so many units. We are taking a huge burden created by other neighboring cities. Let them take care of their housing issues. We've done our fair share.

- October 11, 2021 January 16, 2022
 - I object to the ADU units created on the hills behind houses. There is not enough parking. Access to the dwelling I have seen is incredibly difficult such as a narrow wooden staircase, and lacking access for emergencies. This is objectionable and unsafe building on these steep hills behind houses. Not enough foresight, and over sight.
 - Lots of good ideas in here. But ultimately we just need to build more housing. Less red tape, more density, more roofs over heads.
 - "NO MORE MARKET RATE APPROVALS... NONE OF WHICH HAS OR WILL EVER LOWER HOUSING PRICES IN THE BAY AREA. THE NUMBERS ARE JUST NOT THERE.
 - BESIDES, THE FACT IS THAT THERE IS PLENTY OF FOR SALE/RENT MARKET RATE HOUSING AVAILABLE IN THE CITY OF SAN MATEO AND UP AND DOWN THE PENINSULA. TAKE MINUTE TO CHECK ZILLOW OR REALTOR.COM.
 - SO....APPROVALS ONLY FOR AFFORDABLE HOUSING PROJECTS...... PERIOD.
 - FINALLY, WHY IS THIS SURVEY AND IT'S QUESTIONS BIASED, WITHOUT REAL CLARIFICATION OR DIFFERIENTATION BETWEEN THE NEED FOR HOUSING AND THE FACT THAT THERE A VERY REAL DIFFERENCE BETWEEN MARKET RATE HOUSING AND AFFORDABLE HOUSING.
 - THE COUNCIL, STARTING WITH BAY MEADOWS, HAS APPROVED THOUSANDS OF STACK AND PACK, MARKET RATE HOUSING THAT HAS DONE NOTHING TO LOWER THE PRICE OF HOUSING OR ADDRESS AFFORDABILITY ISSUES IN SAN MATEO."
 - Apparently, your division wishes growth to continue and plans accommodations or what many residents consider excessive population growth.
 - We are living with the impact of too restrictive building policies, over decades. Height limits, too much concern for supposed impacts (not based on facts) on traffic, the environment, water, etc. We need to approve more housing anywhere it can be built. Much of the single family housing stock is old and in disrepair. Modern, multifamily housing is preferable to old, small houses packed with people.
 - Develop new options but keep single family neighborhoods in tact. We need to support many types of families/people and their choices.
 - Not sure how we can ever go back to affordable housing for all. But I appreciate any efforts to try.
 - I'm a third generation San Mateoan and I'm saddened by what this town has become. There's too
 much traffic on the road, people are angry all the time, car accidents have increased. The solution is
 not to cram more people into small spaces. Honestly, this is an unsolvable problem and I will likely
 move in the next few years so I don't have to deal with it anymore. Good luck!
 - Create some kind of incentive for current property owners since we will be paying for all these programs, in part with property taxes. Possibly charging "property taxes" to the renters or have them

pay some kind of tax for this new housing initiative instead of current property owners paying for these things and the renters don't have to because they "rent", not own.

- Single family home type zoning laws are a huge issue, especially for large lot sizes. Everyone who
 already owns a home thinks that a new neighbors home is a "development" (negative connotation),
 but not his/her existing home. We need to educate existing home owners about how the
 homelessness crisis is related to decrease in affordable housing which is caused by scarcity of housing
 in the area.
- The real estate market like all markets must remain free with government interference minimized. If you cannot afford San Mateo, then consider Hayward. We do need to create effective and efficient mass transit to help those who work on the peninsula.
- I believe adding more housing units is not going to satisfy the ever growing need and the infrastructure of San Mateo cannot take anymore housing without major improvements. What you really need to be asking the citizens of San Mateo is how are your roads, congestion, water resources, response time for medical, police and fire? Has your quality of life improved over the last 5, 10, 15 years or declined in San Mateo? I can say as a long time resident, none of these issues are being addressed. Traffic and congestion is horrible and no matter how many times it comes up at a city council or planning commission meeting from neighbors and citizens who already live there, the new development continues and the congestion increases. How are you go address these issues? I know that there has not been an increase in police and fire personnel to accommodate the past and future growth of this city, and our roads are horrible. I cannot drive down El Camino without hitting huge potholes. I'm really tired of new development and the cost to infrastructure bared on the backs of long time residents. Enough is enough. Building more housing does not solve any of these issues and creates more congestion, collapsing infrastructure and stressed emergency services not to mention the water shortage we are currently in.
- Allow density in TOD'S. Streamline approvals. Let the private sector work.
- "We need to streamline the housing approval process, and eliminate the restrictions that prevent housing from getting built, such as onerous zoning laws, and height and density limits.
- We also need to focus on building sustainable, walkable neighborhoods, where a variety of goods and services are a short distance away. This cuts down on traffic, and emissions. "
- We have a highly developed downtown with a train station and access to buses along El Camino. This is a great opportunity to develop green, car-free, condos in mixed- use buildings. Removing or increasing height limits between 2nd-5th and Delaware to El Camino for these sorts of buildings would encourage development. Increased density in this area would also support the local businesses.

- 1) San Mateo has traditionally done a great job of creating a mix of housing types/opportunities. (2) however, like many towns, it has a regrettable history wrt equity and racial discrimination. (3) it needs to acknowledge that history and make amends.
- The only true solution for the housing crisis is more housing. Given that the largest threat facing us as a community and a civilization is climate change, more housing that provides walkable living is the best solution.
- There's far too little of it. We need to streamline development, eliminate height and density restrictions around transit, do away with parking minimums, and just generally make it as easy to build new housing as possible.
- It is difficult to believe that the city takes our current housing crisis seriously when it spends 4 years and over \$450,000 dollars trying to block 10 units along El Camino. The scale of the city's proposed solutions is deeply inadequate compared to the size of the problem and even them we've historically failed to deliver on planned housing under RHNA requirements.
- I don't hear anyone talking about the "water shortage" or general quality of life for existing residents. Who is paying for this housing and why?
- There should also be more housing developed along the El Camino Real corridor
- "We don't need more new luxury apartments. My understanding is that developers have all the incentive to keep making luxury apartments/condos, so the city should be more involved either in funding the building itself or fixing the incentive structure.
- As a resident with high enough income to live here comfortably, but not enough income to have more than a 1BR, I would be happy to pay more in taxes if the money is going toward more equity in housing and services."
- There is a reason for why San Mateo is unique. It's the lack of mass housing units that create more traffic which creates a bigger load on the environment. Station Park Green and the proposed Rite Aid redevelop ruin the quality of life that has been the hallmark of why San Mateo is special. Don't do more!
- Plan before building. And I don't mean plan the building. Get the infrastructure in place before any thoughts of adding new building begins.
- "Improve infrastructure before adding any more housing and stop pretending that people are going to give up their cars. In my neighborhood every household has 2 to 3 cars and there is not enough parking.
- Traffic is horrible and adding more housing makes it more of a nightmare. Replacing grocery stores and other shops with housing means we have further to drive For everything. "

- October 11, 2021 January 16, 2022
 - "If at all possible, don't use ""tax dollars"" for such projects. Privatize it as much as possible. If tax dollars are being used, there should be ""transparency"" to disclose groups/individuals etc who utilize public ""tax dollars"".
 - We DO NOT want to have living conditions like ""San Francisco"". After worked/lived (and even heard the residents complaints) in that city for the past 20+ years, that city got way out of hand with ""affordable housing"". Best to travel up to SF to see first hand in the areas where ""affordable housing"" is located imagine that in San Mateo. Please avoid their ways of managing ""affordable housing""
 - Make good use of existing empty lots. We need housing more than we need Christmas Tree and Pumpkin lots.
 - I have lived here over 40 years. The traffic is a serious issue for me. I work in Woodside and it is about 9 miles away. Pre-pandemic it took me one hour on a good day to get home. How will the traffic change with more housing? At what point does the commute force me to leave my job and the city I love? Also there is a severe water shortage. How is there enough water for all the new housing?
 - "In my opinion, added affordable housing will work best if it is near transit & services so people with limited resources can walk to work, services, etc. More cars on 101 and on El Camino Real should be avoided. The housing problem is somewhat caused by the offices that have been built in the past 10 years in & around San Mateo. Office space should NOT be added. Fewer people are working in offices - accelerated by COVID. Same with storefront retail - which has been decreasing for the past 5 years.
 - My first sentence states that housing should be near transit, services, and where people work so
 there is less reliance on cars and fewer cars on 101 & ECR. However, there is currently a plan to
 demolish Draegers & replace it with more offices (not needed), more retail (not needed), a parklet (it is
 next to Central Park), and housing (needed). Draegers is the only full service grocery store in
 downtown San Mateo. So if someone with limited resources moves into an affordable place
 downtown where they can walk to work, services, etc they can't buy groceries in downtown San
 Mateo and they'll have to DRIVE elsewhere. This defeats the purpose of a live/work environment. "
 - We do not need more housing in San Mateo. Just drive around the streets and you will see hundreds of for rent and for lease signs for both residential and commercial property. Many of the huge housing projects that have been built recently are vacant. The rents are so high people cannot afford them. It is a joke that these properties are providing "affordable" housing.
 - Give priority affordable housing to teachers and other service workers. They deserve to afford to live where they work. The fallout of that lack is detrimental.
 - Building large apartment houses and condos do not serve the poor, but serve to make developers rich on the backs of these people.

- Given that we're paying rents/mortgages comparable to Manhattan, it's absolutely crazy that there
 isn't a lot more vertical development. Put it near transit and without much parking to make it greener
 and avoid ticking off neighbors. The Belmont Condominiums are an example of how attractive such
 developments can be. As long as there's only a trickle of new building, developers are going to make
 sure that every unit is as luxurious as possible. We need a FLOOD of new housing so that it's not just
 the richest who get it. Also put new apartment buildings in the fancy rich neighborhoods with good
 schools and parks, so that middle-class and working-class folks can benefit from these schools and
 parks. And don't let the loudest complainers derail projects that will benefit many more people.
 Thanks!
- Housing growth should be paired with infrastructure development. If infrastructure can not be developed or added to (including resources such as water supply and sanitation) then housing expansion should be slowed.
- It's not fair to build so many new units all in one location. It completely changes the neighborhood to the detriment of those already here. Why make less lanes on the road and build more housing in that area?
- We need a variety of housing types, sizes and locations. Mixed use buildings work well.
- Few newly built apartment complexes rents too high, non-affordable, allow less than 50% of private and public ownership to not rent over a certain dollar amount.
- The housing needs are critical. I am concerned we do not have the critical infrastructure to support the huge amount of housing given to us via RHNA numbers. Water, Sewer, Roads should be taken into consideration and communicated via our legislators to Sacramento. They should be providing \$\$ to support this growth. Otherwise it's just higher taxes which low to moderate income families can't afford either.
- We need to immediately move forward with proven initiatives for increasing supply around public transit.
- If the choice is to become a tenants society, then make tenants rights a priority. Social housing where the city enters into long term leases with the builders and allow for ownership with capped appreciation (Singapore model) is important next step.
- When I purchased my home the cost was a lot less but my salary was much less also. I had to have help from my parents for my down payment, but I paid it back.
- It is almost impossible to drive or park in this city most of the day. I don't understand how you plan to add housing and increase the congestion. The quality of life here keeps going down and the cost of living keeps going up. Time to rebalance, not make one problem worse for the sake of the other.

- "A good case for greater density is being made. if done right it can be nice. https://www.strongtowns.org/about
- https://www.bluezones.com/services/blue-zones-project/#section-1"
- collect data on renter rates, rent increases and study evictions and outcomes
- We need to stop building new housing because we don't have enough water. People should not feel a right to live here. Move somewhere cheaper that actually has water.
- Teachers need priority for housing in SM
- Let's stop building more housing unless it is "affordable." Our area is already behind past commitments for affordable housing. We should demand developers build higher % of affordable units. If developers refuse, find other developers. Why do we allow developers to get away with so few affordable units? Our local politicians are all bought off? Given our changing climate, uncertain water futures, our politicians need to show some courage and quit placating developers.
- I think we need to find ways to provide needed housing in open spaces, on the transit corridor, etc., while maintaining the quality of life of current SM residents; more specifically, I believe adding large numbers of ADUs and multi-family dwellings in established single-family home neighborhoods is likely to increase traffic, reduce parking, and generally negatively impact life in the city of San Mateo.
- There are not enough options for seniors that want to downsize, yet can't afford the luxury high rise apartments that require a buy-in. Nor not all seniors want to be in an apartment. Some just want a smaller 1-level house/condo with a yard. Seems as though newer construction involves stairs. Not suitable for seniors. We can't/won't downsize if there are no options. Or if the options are more expensive than just staying put.
- Forcing residents to live in more crowded conditions by increasing density throughout the city and converting homes to multiple housing units or converting single-family zoning to multi-unit zoning might get more people into the city, but it won't be a place I want to live.
- The identity of San Mateo is changing as the population grows. The city council needs to live in reality, not with its head in the clouds about what it used to be or some other ideal scenario. There needs to be a mix of population demographics in order for the city to thrive and prosper. No one is safe if more and more people are forced to live in the street.
- Build more of everything. And each project that is targeted to be built should go for maximum capacity of housing units. Every pre-existing lot with an apartment building should be allowed to rebuild as tall as possible. Streamline the ADU process. Allow duplexes.
- Please have more density around public transit like the train! Make mixed use developments so more shops and stores are walkable!

- As a business owner, we have to pay insane taxes, our employees are demanding outrageous hourly
 rates while our customers aren't willing to pay more for the services we offer. Employees need more
 income to live here" | so the service rates must go up to our clients
- Allowing duplexes in single family neighborhoods is not the way to solve the problem. It only creates new problems and changes the character of neighborhoods. Those houses will still be high priced at least in the near term. If enough of them are built, you've now just replaced the character of a neighborhood and likely driven out and down homeowners for a mix of owners and renters in a more crowded neighborhood that our schools won't be able to accommodate.
- We need a lot more housing. The 'prioritize / top three' structure of this survey feels wrong to me, like it implies we can focus on a few types/places and that'll be sufficient.
- "Streamline housing approval process so that homes can get built.
- Build near transit and job centers.
- Allow duplex on single family zoning.
- We need to hit our housing goals.
- Educate and influence people that are on the fence or overly defensive.
- Listen to the young and under represented."
- Yes, we need housing that out senior can afford. With most senior receiving about 1,200 a month they can't afford nothing out here in San Mateo they end up in the streets.
- The affordable housing crisis is just that a crisis. We absolutely need to do everything we can to welcome in new neighbors and build more homes. Given San Mateo's location as a job center and also its temperate climate, any new homes we build here will also be very good for addressing climate change.
- "The huge problem is that the city's population is already beyond its infrastructure capacity. For the existing population, there isn't enough water (due to drought), electricity for really hot days, or highway capacity. So, no housing plan should be developed without sections that address those issues.
- Also, please be realistic about the percentage of new residents who will commute by rapid transit. Yes, the K-Mart development is right next to the Hayward Park CalTrain station, but it is also right next to the onramps to Hwy. 92, making driving an attractive option for commuting."
- Build more housing. Build more housing. Any kind of housing. Rich housing, affordable housing, duplexes, apartment complexes, tall buildings, short buildings, all the housing. Build more and denser housing. The housing crisis is 98% a supply crisis made far, far worse by opposition to all new construction. BUILD MORE HOUSING.
- "Prioritize people that have a history of Residing and working in the county or Bay area, and would like to live in San Mateo due to family ties (many diverse communities are in this category)

- Then, prioritize full time service workers (teachers, doctors, nurses, small business owners including independent workers like plumbers, gardeners, cooks, etc).
- People and households that have a history of working full time and paying taxes should have priority in affordable housing, and fear rate housing and rent. Once SM workers are secured in their housing, then we can then help other populations that have not been able to hold steady jobs or income. "
- We need to build more housing, allow duplexes in single family neighborhoods, and fund more multimodal transit throughout the city (especially buses).
- I appreciate the time and thought going into creating a plan for housing growth in San Mateo.
- I understand you think building, building, building is great. I think all of the scheduled building right now does little if anything to assist those who cannot afford to live here now. I do not see how or when that could happen things being what they are currently. Tell Sacramento NO!
- There is an important opportunity for the city to launch a PR campaign helping illuminate the reality that our growing population of folks over 65 (heck, over 70 and 80) NEEDS affordable housing nearby for our important service providers: 1) in-home care folks!!!; 2) out-patient and in-patient healthcare providers, especially all the CNAs who are trying to provide sufficient care to folks in our nursing homes and other care facilities; 3) delivery folks for pharmacies, groceries, packages. Even the younger well-paid residents of San Mateo are impacted by the lack of affordable housing there is a reason why our restaurants, cleaners, grocery stores and SCHOOLS are struggling to provide pre-pandemic levels of service. Finally, the lack of affordable rents for our non-profits and their employees (Edgewood Center for Families and Children, CA Clubhouse, StarVista, Caminar, etc.) means the county is losing great provider staff regularly because they can't justify the cost and personal impact of commuting an hour or more in each direction to provide support for mental health, domestic violence, substance abuse, etc. It does me no good to have enough retirement savings to afford great in-home care if there is nobody to provide it in San Mateo!
- Schools and community parks also need to be prioritized. Housing needs to be spread out in the city so
 the schools also get a fair spread of new students. Currently with everything getting built along El
 Camino/Caltrain only a handful of school get the burden of the increase in population. Developers
 need to find ways to provide money back to SMFCSD to improve conditions.
- Stop giving in to the developers who say they can't make low income/middle income house development work.
- Turning the El Camino corridor into a mixed use commercial/residential area with affordable housing and transitional housing included would be an ideal solution!
- Improve pedestrian and bicycle access, make it easier for people to walk or bike to places up to a mile away. Match higher density housing relatively close to parks and shopping with easy and safe access

without requiring a car. Balance open space to housing; include parks, green space, and plazas so that people can get outdoors without crowding. Allow for higher density housing (i.e. taller buildings) near downtown or along ECR. We need both smaller spaces for individuals or roommates and larger spaces for families.

- Please make sure that development of additional housing includes money to the school districts to account for increased enrollment.
- San Mateo is a beautiful, beautiful place, I would like to buy a small house and grow old here to see the sunsets
- For families with children., having a place (park) to play outside would be nice like community park.
- There is no 'need' for housing in SM; the need is for employers to expand elsewhere, off the Peninsula! Growth is no longer a good thing in California, especially on the Peninsula. Stop promoting it under the false pretense of humanitarianism, when really it is all about tax revenues, as quality of life deteriorates. Let's not allow SM to become a 'low income' dumping ground, but instead a haven for the most productive and creative. If housing is too expensive, let wages catch up, and not by minimum wage mandates, but by natural forces, as we are now actually witnessing with the labor shortage that is indeed tied to high cost of living.
- No more building of Offices, we are a built out city and should convert empty office building to residential as in the empty hi- rise on El Camino also all new development with no parking should require tenants not to own cars
- San Mateo is overdue for creating neighborhoods that are more diverse in terms of housing so that young people, families, and seniors can all live together as a community. Increasing duplexes and triplexes in traditionally single family neighborhoods would improve everyone's quality of life and bring vitality to our neighborhoods by making them more dynamic, fresh and interesting.
- Housing issues are very nuanced and there is not one answer for all. Any government run program should not create more layers of bureaucracy, which only stifles innovation and costs more in the long run. Think outside the box. Try pilot programs or look to other countries and communities to see how they have addressed housing and homelessness. Don't create unnecessary obstacles that create barriers for the people who need assistance today, not tomorrow.
- Do something at the same time or before that addresses parking. Do something at the same time or before that addresses the increased traffic that is now present. Thank you.
- STOP! Before anyone anywhere builds more housing, see how things shake out after the pandemic. If businesses continue to close and people continue to move away to work from homes outside of San Mateo, there need to be an adjustment in all sorts of housing and businesses that cannot be answered at this time. The fact that the state mandates every city build a certain amount of housing is ludicrous.

Besides that, the concept of "affordable" housing is a misnomer, for lack of a better more descriptive word. Affordable to whom? What is considered affordable now, won't be by the time it is built and made available. Also, make sure there is adequate infrastructure to support any additional housing. That includes water availability, what with drought and climate change. We should all be under water restrictions now regardless if more housing is built or not. Anyone have the courage in San Mateo or state government to approach that topic?

- Do not over crowd San Mateo with housing. Boom and bust will hit hard. Spend the money on
 infrastructure first so we can get the people that already live here the appropriate living conditions
 that they have paid taxes for over the years. That infrastructure will last longer than the housing and
 help out people that visit San Mateo and live here as well. Build for long term sustainability not right
 now!
- New housing requires stable Infrastructure (water/trash/power/gas/emergency services/air quality/ green zones/pedestrian paths/bike lanes/traffic/disaster plans) before development begins.
 Developers must be removed from the decision process. Support business that hire locals and provide housing assistance (good employees create good communities)
- Increased public transit is key to being able to expand housing without negatively impacting traffic and other things. If we run more routes more frequently the city will be easier to access. New developments should have walkable or safely bikeable access to regular stores like groceries.
- We have ruined our city by overpopulating without a traffic plan. Our downtown is an embarrassment of a traffic and parking mess!
- Stop building luxury apartments on the train tracks and start building family homes in residential areas.
- San Mateo should have enough housing projects that allow low to median income to buy/rent at an affordable price.
- Get a job first!
- Retain the beauty and historical character of San Mateo's homes and commercial areas as the Council takes action to address our housing needs.
- I recently moved at the beginning of the month. While looking for new housing I noticed there are a lot of vacant apartments but the asking rent is way too overpriced. Landlords rather have a vacant property than reduce rent. San Mateo does not need to build more, they need the developers/owners to come down in price. A family of four simply cannot afford a \$5,000/month 2 bed apartment.
- We need parking solutions. If parking was easier, we could have denser housing. Build a parking garage. Only allow people with resident permits to park there. Then we could have more ADUs, more duplexes. Until the bus system is more robust, working people cannot use public transit; it's not

reliable enough and it's not frequent enough. If you miss your bus, it could be an hour until the next

- We hopefully can become more creative than ugly multiunit unit structures (i.e. Delaware Street) with retail shops underneath. If a senior wants to downsize it is not affordable or desirable to live in San Mateo any longer. San Mateo is losing its charm.
- With housing should come a plan to make sure our roads can support new housing.
- Too many people

one.

- We need housing assistance for those of us whose incomes look high but who are spending enormous amounts for things like childcare. We have very little opportunity to save for a home given the cost of living here (and truly insane home prices even for "starter" homes). Incentives like very low interest rates for mortgages or low to no down payment programs could go a long way.
- I have been a long-time renter in San Mateo and my young growing family would like to purchase a home here, but it's proving to be impossible because of the limited stock of 3BR homes and homes that are affordable. This is not a new narrative at all. Does the City have an idea as to how many single-family homes (3BR+) are owned and occupied by a single individual or couple? With single family home prices what they are right now, I understand that it would be financially prohibitive for seniors to downsize and also challenging to move from the neighborhood that they've called home for so long, but could there be a way for those, who do want to downsize, to more easily do so such that these homes could be available for young growing families?
- Don't know how you are going to evaluate the data from the first question. I had to force myself not to put 5 for each response so you'd have some variation in importance.
- Build more! Get employers involved. They should have a responsibility to take care of their employees and ensure their quality of life isn't terrible.
- High-density cities are worse to live in. Adding more housing makes San Mateo worse. Yes, housing
 prices have risen, but why is that a problem? Would a business with a rising stock price start programs
 to drive it down? While it could be a problem if some underpaid professions can't afford to live in the
 area, for example teachers, the solution is not to drive housing prices down so we can continue to
 underpay our teachers, it is to pay teachers more. I've lived in San Mateo all my life, and every time
 new housing is built, the neighborhood gets worse.
- I think the state mandates are unreasonable and should be challenged as many city in the area are doing. We should fight for local control. Additional housing does not lower prices, we have added 1000 of units, and COVID lowered rent more than all the housing built. We need to reevaluate post COVID as where people are working has changed. I doubt a new office building will be built in the next 10 years.

- Stop building offices which create population increases! Encourage regional shifts of commercial activities. It seems that only city officials think it's "cool" to have and brag about this influx of business.
- Partner with other cities and counties
- San Mateo is losing its character. I feel like Bay Meadows, while I do like it, feels like I could be in any city, not to mention it is crazy expensive. Hillsdale Avenue is the main artery to Foster City and pre-pandemic levels of traffic were at gridlock from 4 6 pm. Incredibly frustrating to go from the top of 92 to the east side of San Mateo. The city of San Mateo should be working with Foster City as well...they keep adding more units with what seems little regard for traffic implications. The units that are being built on Norfolk at Bridgepoint is, I feel, not well thought out with traffic implications. Norfolk can't handle that traffic. And forget about having your kids ride their bikes along there to get to Bayside/Parkside etc. That intersection will be terrible. I do understand the complicated nature of housing/population/traffic, but San Mateo is just becoming a cookie cutter city with box stores, plenty of traffic and rent/housing prices that are forcing out so many generations that grew up here.
- "Due to proposition 13 we will always have a problem. I'd you build workforce housing you should be prepared that those who love there must leave when the retire of leave that job.
- The area has always been expensive so please realize even if you do all of this we will never have enough housing and many who struggle financially will need to move. It is unfair to out this on the backs of landlords."
- It's a challenging issue that requires study. I personally don't know enough to feel qualified to give a lot
 of input on how to achieve more housing in a city that already feels crowded. We have to be very
 careful as we add more housing/cars that we don't destroy our quality of life. It's tragic that most
 young adults who grew up here and still have family/parents here have to move to the east bay!
- I have applied for housing for over 25 years, and so far the City of San Mateo has not done anything for me. I've lived and worked here for 40 years, pay my taxes in a timely manner. Staff has me on a list for 25 years for first time home buyer program . so far nothing has happened. Staff tells me I'm not on her waiting list. I am very disappointed with the city of San Mateo. I'm hoping someone will contact me. I am a good citizen. Hoping to hear from someone back. Thank you!.
- I have lived and worked with a car-free, bike-heavy lifestyle in San Mateo for the last five years, renting various single family units alongside other adult roommates. While I think San Mateo has a high quality of life, it is very clear from transport, zoning, and city services that San Mateo is not intended for people with my lifestyle. I want to voice my full support for increasing density, walk ability, and safety for those outside of vehicles. I think this will be essential for the affordability and minimization of the city's environmental impact.

City of San Mateo Housing Element Online Survey Results October 11, 2021 – January 16, 2022

- I think many of the above questions were poorly designed they seem to me like they were fishing for opinions, but they don't provide actual choices, and don't inform people of trade-offs. Overall, the needs are huge, so large that no individual city or county can really produce enough housing to make up for laggards in the greater region. And logically, if a city has a large underutilized piece of land, like, say, an outmoded office park on the Eastern side of San Mateo, or a shopping mall, you could add a significant number of units if you built tall. But you'd probably run into opposition to anything over 4 stories, which is ridiculous. So some think you can distribute production more widely. But recent decisions to allow 2-story ADUs in single-family neighborhoods like mine, without setbacks and directly on property lines bother me greatly - and I support ADU's in general. However, they are a nice lifestyle addition for homeowners; they will never be produced in large enough numbers to make a difference. Duplexes will never generate much production in San Mateo either; land and construction costs are way too high. It's a somewhat-better solution for lower cost cities. The only way to add real volume of housing units is through height. Utilize retail parcels. Utilize parts of the event center. Utilize the area near the juvenile detention center. Utilize parcels on El Camino - many are huge, e.g. Ah Sam. Utilize Hillsdale Mall - I live nearby. I would be happy with a mini-city of 10 story buildings - if designed well. Utilize the area near Molly Stone, on the SM side. There is plenty of land to add tall housing. If it's not going to be tall, then it winds up having minimal impact.
- New housing units need to be developed at every income level.
- While I agree with the premise of more affordable housing and appreciate all the creative options listed here, it seems we're putting the cart before the horse. Building all this housing requires infrastructure to support the increase in population. Where will these kids go to school? What park will they play in? Is there enough parking? Love the idea of people living near public transportation and/or their jobs, but that does not mean they won't drive on the streets, or need parking. We can't even get El Camino re-paved! It seems like we need to present the vision for the city first and then figure out how to get there.
- Frustrating when young adults who grew up in San Mateo cannot afford to live here and are forced to move away. Much of housing in SM which is considered "affordable", is still not to many and there is not enough of it.
- Yes, there is a need for more affordable housing, but there is no need and no space for more housing overall. The population is dense enough, the infrastructure can hardly support the people that are already living here. In my mind we need to discourage further growth. Any growth that needs to happen needs to be sustainable and consider its effect on biodiversity. Apply the UN's Sustainable Development Goals, by evaluating the respective underlying targets and their applicability to San Mateo's development.

- October 11, 2021 January 16, 2022
 - Making affordable housing a top priority; connecting it to social justice and equity work
 - "San Mateo needs to add more housing units to make it more affordable. We should spend less time adding rules and restrictions (such as zoning that limits to single family, requirements to include affordable units, etc) and instead be open to all alternatives that will add more housing units.
 - All of the following is welcome:- converting single family unit to duplexes and triplexes
 - - converting single family unit to duplexes and triplexes
 - affordable units
 - - taller building with units at market rates
 - - units near mass transit and far from mass transit "
 - please don't neglect parking and traffic impacts. I heard about a new proposed development in San Bruno with over 100 apartments and something like 20 parking spots. THAT IS NOT REALISTIC. Even if people use transit for jobs and other basic elements of living, most people need a car sometimes and therefore need a spot to park it.
 - Please do not create another Bay Meadows-type situation, where there community is built to further house and serve privilege. Prioritize community, not developer's financial outlook. Put a "build by" stipulation into agreements, removing the power of developer Is to delay infrastructure development to times when it best serves their individual interests. Stop prioritizing non-affordable "luxury" rental housing for high-wage tech workers.
 - Address transportation. I am a SF native and have not see any new bridges ir roads that have dealt with the increase in bay area population. I have a clipper card. I am concerned about traffic, air quality, lack of infrastructure improvements (roads etc.) And yet we want to keep adding more homes.
 - Money should be used wisely. Many of the above solutions are short sighted. Housing should have blended in overall city development plans. Piece meals will be disaster for any city. It is the big tech created these housing problems. They should be hold responsible for solving it. They have the money to build new communities and cities in mountains. Policies should be made to encourage them to move out.
 - None of my children who are now young adults can afford decent housing here. The airspace above our three downtown areas is wasted space. We should allow and encourage those property owners to build apartments over the existing businesses.
 - Single family neighborhoods should remain as they are. Use unused/undeveloped space to create affordable housing.
 - Do not allow taller buildings in R1 neighborhoods and keep taller developments located in areas with existing taller developments.

October 11, 2021 – January 16, 2022

- Improving transit in the community, and co-locating housing with such transit, would be a huge benefit!
- Housing near public transportation is a must. Low income residents often do not have access to cars.
- I think the covid restrictions have really hurt businesses in San Mateo, especially restaurants. These restrictions mean less profit which means higher prices for goods sold. This impacts everyone and trickles down to those trying to save for a house in San Mateo.
- What is the vacancy rate in San Mateo with all the new housing that have been built in the past few years.
- Spend some money along with the other interested peninsula cities to fight the Sacramento Mandates that no one seems to want. You never asked the question would you like to preserve the community as it is? This survey gives the flavor of confirming the biases of the survey writers.
- Inflated RHNA numbers exaggerate the need. Basic resource limitations, such as water and electricity, are not available to support the growth targets. Basic policies to over develop the peninsula while avoiding other parts of California should be re-evaluated. Housing to commercial ratios should be determined and enforced.
- Let's have owners rent places at a reasonable price and owners being responsible for paying water and trash. As well for properties who are in charge of apartments or houses need to be more considerate when asking for rent because you still have to pay water and trash and if they would like that every apartment should have its own meter for the water.
- I love what the city has done in the Bay Meadows development. I'd love to see more developments like this in strategic areas.
- We should have Rent Control Policy to limit the rent increase % to make sure the market rental is affordable to low income population
- Schools and roads need to be considered and improved with add'l housing. Traffic is already a mess, how are we to enjoy living here with 1000s more added?? More family-centered places need to me considered too. There is no roller skating, arcades, mini-golf, etc anymore. Is the plan for San Mateo to become a metro downtown that's not intended to raise children? The quality of life here is not being considered in the forced addition of housing. Big tech companies should included housing on their large properties rather than squeezing more units in already small single family lots.
- Over building will ruin this city.
- I have been a renter in San Mateo county for about 25 years and city of San Mateo for almost 15 years.
 I work at SFO as an essential worker where I have been since first moving here. I dream of being able to afford to buy a house near my job, but on my salary I cannot compete against wealthy investors,

who only want an investment, not a place to live. It is unfortunate, and will likely never change until essential services are more severely impacted from lack of workers.

- The housing (both selling and rent) is ridiculous. Due to the high prices, people like me who are young
 and grew up in the Bay Area are forced to live in sketchy areas since they are cheaper, or move out.
 The problem is if you have a job here and have to live in San Mateo, but it is so right because the rent is
 taking up so much of our income.
- Yes. Please explain why high levels of job/population growth in the already most populated state are being encouraged without environmental impacts being resolved. Please identify the so-called benefits of "growth" to the existing residents and the environment. How will water be provided for all the projected population growth and how can we keep increasing housing/population without knowing this. Who benefits; who pays for the externalities of growth? Link the big money development interests to their environmental damage. Will the construction unions, whose salaries have boomed, decrease their labor costs for affordable housing projects? Ten years ago, pre-tech boom, SM was much more balanced, diverse and sustainable. We need a development "time-out" to improve the social and environmental equity of the current population and environment. And also, to start restoring trust in government.
- The last question is more about preserving existing housing than it is access to housing. Both are important but they are not the same. We need to increase access to opportunity by creating new housing and keep existing residents housed by providing rental assistance, creating a rental registry, and enforcing just cause eviction.
- Rent control and eviction moratoriums will do more harm than good in the long run. The voters spoke to these policies in 2015. Let's move on and not go down that rat hole again.
- I think in order to get buy-in for denser housing, you need address people's traffic concerns. I'd like to see more multistory flats, like what you find in the Richmond and Eureka Valley districts in SF.
- We need more housing of all types, especially housing for middle and low income people. I live in a single family home and would be delighted to add a small rental unit but I would need two things an affordable loan and assistance overseeing the project. I would like to see a city program helping people to add second or third units to their properties. There are environmental impacts to new housing but there are far greater environmental costs to Not building new housing in places like San Mateo that have jobs, transit, and quite a bit of land area that has low exposure to natural hazards. Without housing in places like San Mateo, people end up on the streets where, through no fault of their own, they leave trash and human waste on streets and in streams. Other people live far from their jobs and do super-commutes. We need more housing that is designed in such a way that it preserves public green spaces, reduces or is traffic-neutral, and increases the diversity of neighborhoods.

- October 11, 2021 January 16, 2022
 - While I do think that adding ADUs and in-law units will be helpful, that process depends on homeowners having the desire and funds and energy to push things forward one parcel/unit at a time. We need faster progress than that, so I also support larger projects, particularly city- or countysponsored housing that looks similar to Lesley Towers (close to downtown and amenities, large building with lots of units).
 - "Establish rental registry.
 - Look for ways to prevent homelessness through preventing evictions."
 - "when private developers set aside 'affordable' housing, it should really be affordable. 10% off the normal price in this area isn't affordable either. make it a deeper discount and make the developer pay for it.
 - "
 - San Mateo does not need expanded housing policies. The city is becoming urbanized and losing its suburban qualities.
 - We need specific plans with measurable results to address the past housing discrimination and it's resulting impacts on those discriminated against. We need to try and address the housing inequality that is the result of past unfair actions.
 - I think this survey is "slanted". The City's priority should be to existing property owners.
 - L
 - Stop assuming we have to provide housing for everyone. There are PLENTY of places to live. If you want to live in San Mateo, there is a cost.
 - "This survey is very biased with circular reasoning and biased towards high density housing questions coming up as options in every question.
 - Work with existing land and property owners to improve their land and building to accommodate more housing units by offering cost reductions and cost sharing for construction and modifications. "
 - Affordable housing for independent seniors
 - "Please do not ruin our great neighborhoods like San Mateo Park by allowing unrestricted building of multiplex units.
 - "
 - We can't add housing until we fix the traffic problems that continue to escalate in this area. You
 mention building smaller housing units which only will increase density in this city. This only adds to
 the problems we have on the road. Traffic is a concern on the major highways but also is a concern on
 the smaller city streets. San Mateo was built as a residential suburb, with mostly single-family home
 neighborhoods. Don't take that away from us who pay the property taxes.

- October 11, 2021 January 16, 2022
 - The price and availability of housing in San Mateo is greatly affected by the amount of disposable income from the high tech, bio tech, and finance professionals in this area. The values are continually driven up by sales that are hundreds of thousands over asking. You can't make up for this by ruining the character of San Mateo neighborhoods and taxing the residents to pay for developer and underserved community services. The middle class is being wiped out here and it's starting to look like San Jose.
 - The push to develop downtown San Mateo with multiple high rise buildings is not giving the community what is needed. Housing with space for families, and is affordable housing really affordable? Increasing density comes with increased traffic and this affects existing residents and does not offer a better quality of life. I am looking to leave San Mateo county because of the lack of planning and vision for the Peninsula. People don't want to be forced into small "chicken coops" which are still very expensive. My children have no desire to return to where they grew up, focus on ADU's to add space for both young and old in life transitions.
 - It may not be necessary to build any new housing. San Mateo may have maxed out in that regard. We don't need to feel compelled to build on every square foot of undeveloped land. We certainly do not want tall or high rise or high density apartments or housing. That would be ugly and an eyesore. Some things are just better left alone. There are many other small cities, towns and suburbs with abundant undeveloped land where housing can be built.
 - We must ensure that our infrastructure can support additional housing wherever built. Water, utilities and services need to be met and can support new developments before permitting projects can be done.
 - See above under other.
 - I highly oppose the idea of turning single family homes into duplexes, as well as adding ADUs. While I understand the need for more housing, overcrowding could become an issue. It feels like the City is Justin's trying to "warehouse" bodies.
 - Right now, lots of people live in RV parks. There are no protections for those who rent space in such parks. They can raise the rent \$500 in one year if they want. Renters of RV space need protection. Cap rent increases across the board at .5% or 1% per year.
 - "- Convert 1960s style subdivisions into walkable, mixed use, and denser zoned communities.
 - - Stop the building of luxury studio apartments. Incentivize for accommodating blue collar families. We need 1000s more units quickly.
 - - Implement road diets & replace with bike paths & mass transit"
 - Build new houses outside of the main transit area to avoid traffic congestion. Also developers should stop building small rental units with high rent that only benefiting young high-income groups.

- October 11, 2021 January 16, 2022
 - There is continued building of high density rental units while there is still a high vacancy rate because the rents are too high for these new units. Even the so called 10% affordable units are not affordable. The new building of multiple unit buildings is removing neighborhood businesses ie: independent grocery stores, pharmacies and neighborhood restaurants. The roads cannot support the traffic the building is causing along with the lack of infrastructure.
 - No new housing should be created until the city has the infer structural to support it. The city so far in my opinion is careless and not disciplined in its housing policy. The city is willing to build housing at the expense of small businesses. The city appears to allow housing without regard to business and open space. The city is willing to sacrifice quality housing just for the building fees.
 - Pre-fabricated housing can lower the cost of housing and has been an available technology for 50 years. Union opposition is a big hurdle but pre-fab can be built with union workers. It is more efficient and therefore there will be fewer jobs but there has to be a trade off to get costs down. The only "model" we have is "trailer park" type units. But any type of housing can be build off site.
 - Housing is a human right, and the fact that we cannot house our own community's teachers, nurses, plumbers, carpenters, janitors, grocers, and service workers ""the people who keep our society functioning"" is nothing less than shameful. People simply should not be stuck choosing between commuting 2.5 hours from Tracy or living in old broken down housing to work the jobs required to make this city livable. We need a robust social housing program, and I believe the Vienna model has a lot to offer. This video from The Gravel Institute is a nice introduction: https://youtu.be/LVuCZMLeWko
 - Freeways are already congested. Even though some apartment buildings are built near train stations, people still drive. Building more apartment complex with hundreds of families will only make it worse. All we need is a good public transportation system, so people can commute easily to peninsula from less densely populated area. For ex, train from Hayward to San Mateo, Palo Alto, etc.
 - More housing is more pollution, more cars with no place to park or to drive.
 - Please build inside each Independent (but not disabled) Senior Housing apartments to include a washer and dryer inside each unit.
 - Maintain open space, consider traffic and noise.
 - There's no silver bullet in solving our housing crisis. We need to work together to encourage the development of new units in the form of multi-family and mixed use buildings as well as in ADUs and lot splitting of SFH => duplexes. All of these tools must utilized to ease costs. The state and possibly federal government also have a role to play in regional planning and the creation of funding streams or tax credits to make it all happen.
 - I feel the peninsula is busting at the seams. I feel ferry service stops with connecting buses, either corp shuttles or SamTrans would help tremendously

October 11, 2021 – January 16, 2022

- San Mateo needs to create a rental database to collect valuable and otherwise unavailable information about the rental market. This could also help to ensure that landlords are complying with laws that have been created to protect tenants from abuse.
- I think a rent stabilization mechanism is needed here and state wide to prevent rent gouging and profiteering..
- We also need a rental data registry to provide valuable and otherwise unavailable data about the rental market, and to track whether landlords are adhering to laws intended to protect tenants from abuse.
- More density, higher construction especially in and around downtown
- Allow Caltrain to own residential property around the stations and rent it out (Transit-oriented development) like in Arlington, VA and Hong Kong. Upzone all of San Mateo.
- Important to ensure affordable housing opportunities throughout entire city. Provide rental data registry.
- San Mateo should be a leader in housing production in terms of diversity and affordability.
- The Permit needs to be more efficient.
- More opportunities to purchase homes through programs like via Housekeys
- Market-based solutions will never solve the housing affordability crisis because the market treats
 housing as a commodity instead of a human need / human right. We must start to de-commodify
 housing through public/social ownership. Until we reach that point, use all available means to keep
 current residents protected and prices down: rent control + vacancy control, and impose a vacancy tax
 to incentivize landlords to rent all units / discourage speculators from buying units and keeping them
 empty because it's simply an investment / place to park their money.
- "A decade of TOD, what's basically a whole new city within San Mateo, thousands of housing units added over that time and we still have a problem? Not a big surprise. Building more units will not only NOT solve the problem but will continue making the city unlivable and ruining it's character and degrading the quality of life. The only winners are the developers who are making millions. Already, there are certain times of day when it's impossible to get from one side of town to the other by auto. All this development is ruining our city.
- San Mateo is and always has been expensive. Trying to out build the law of supply and demand is not working."
- No new housing, no more growth. This survey is all about your personal ultra liberal views. Stop catering to the lazy people that want to work the system. Recognize that "underprivileged" are mostly people who want it all for free. People can move to where they can afford to live. I want to live in

Beverly Hills, but I don't expect to get to live there, because I can't afford to. I work hard for what I have, I've seen the "underprivileged" they are "under motivated." The elected officials best be careful and remember who they work for.

- Since renters account for half of San Mateo's population, it's critical to do more to ensure affordable
 rental units in the city and that policies are in place to protect renters from unjust evictions. Yet, we
 lack even the most basic data about rental units in San Mateo. I think the city should establish a rental
 registry to help gather key data about rental rates, evictions, and track landlord compliance with state
 and local laws. These data will be critical for the city to develop effective policies to address the city's
 housing needs moving forward.
- "- 100+ Units project should be broken up into smaller parts so there is a phased approach versus needing to wait 2+ years for planning then 2+ years for construction. (Creating supply constraint).
- - Since 2008 most new housing has been for rent, need more private ownership. (Creating supply constraint).
- - Need sticks for project that are approved the go undeveloped Essex Central Park and 28th & El Camino (Creating supply constraint).
- - Densities should mirror ADU policy, use and density should be proportional to lot size versus a one size fits all policy (makes land costs too expensive and encourages hold outs)."
- Less offices & housing built exclusively for the employees of the offices. Priority should be given to working class residents who serve the community.
- "cap private owners from raising rents, not allowed to increase over 5%; fine owners who raise rents over 5% each year.
- Landlord incentives to keep rents down."
- Stop the current Bohannan survey asking same questions.
- As someone who has lived in San Mateo since 1963 and in my single-family home since 1966, I want my neighborhood to stay the same until I die.
- San Mateo drastically needs better mass transit to service a growing population. Increasing housing without improving mass transit should be avoided at all costs. Make it possible for more people to CONVENIENTLY leave their cars at home.
- "(1) To make housing more affordable, there must be more housing which equates to higher density. Higher density puts a strain on public infrastructure: parks, traffic, schools. In lieu payments do not create more roads, more classrooms or more parkland. Incremental additional housing does not address these problems.
- (2) Housing is a regional issue. Additional development in San Mateo will not change regional trends. Housing costs are increasing region wide. San Mateo alone cannot adequately address the problem.

October 11, 2021 – January 16, 2022

What San Mateo does must be compared and coordinated with Hillsborough, Foster City, Belmont, etc. Changing San Mateo alone will not ""fix it all"".

- (3) Traffic is a major issue. Transit-orientated or near-amenities-housing will still create additional traffic.
- (4) Those that currently own homes in San Mateo, are thrilled with the rise in property values and are
 not impacted by a housing shortage. Those that currently rent in San Mateo, will not see any relief
 from rental prices from incremental additions of housing units. Asking current residents to formulate
 long term housing plans may be unproductive, because the current residents 9including myself) may
 be naive and under informed. The different communities on the peninsula are geographically similar
 but substantially different flavors (compare Atherton to Redwood City). Perhaps a better question is
 what does San Mateo want to be? More like Foster City or more like Palo Alto or more like San Carlos?
- (5) Not addressed in this survey is what housing options are the most sustainable and address climate change? Envision where San Mateo needs to be 100 years from now. Okay, now with that vision adopt policies and plans to move in that direction. "
- There really needs to be a rent control limit for the county, these landlords are going way too high in rent and their units are so small
- "Again (see 3rd answer to first question), we're paying the price for San Francisco especially, along with other high-job-growth cities in Silicon Valley, adding hundreds of thousands of new jobs (mostly very high-paying) in the last decade, with almost zero regard for the impact on housing and surrounding local communities. Now most rank-and-file workers and families are priced out of the market.
- But while we *do* need to provide more affordable housing, we have to resist the urge to build so urgently and imprudently that we destroy existing neighborhoods and communities -- and the things that make those communities attractive and livable -- in the process.
- Finally, the mindset that even recent high school and college grads MUST be provided with affordable, \$1K-a-month rental units with ocean or bay views, before they've even toiled at a job for awhile (seemingly a prevalent viewpoint among the oh-so-enlightened in SF or Sacramento), and that thousands of such units must be built immediately, regardless of cost or impact on communities, seems a bit idiotic.
- On the flip side, those that have toiled and saved and worked in and served our local communities and/or have children in our communities and schools DO indeed have a just expectation that they should have at least a fighting chance to afford some place, any place, to live in our communities.
- -- Good luck to you, city officials, in this quest !!!"

- October 11, 2021 January 16, 2022
 - Rent is high. Houses to purchase are unaffordable. I would like to see programs for first-time home buyers. More single housing developments with 3 plus bedrooms to accommodate families, which San Mateo is comprised of. Thank you.
 - Desperately need more units.
 - I think the City has done a good job thus far with adding more units, and hopefully they will continue on this path. Public transportation is a big issue and could be improved upon. Adding the additional railroad crossings has also been very helpful.
 - An increase in housing capacity, and particularly of high-density housing, is necessary and unavoidable. Subjective standards about "look and feel" should not be used as a veil for what is opposition against higher density housing.
 - The city council keeps approving more and more buildings which increases the traffic jams. But the council doesn't care about this. Then we're told to conserve water. So how does the council conserve water? They allow more buildings that have more showers and toilets that need more water! The redevelopment at the site near the main post office is a good example. How many toilets were flushing back then? 10-20? Now how many toilets are flushing with all those apartments? 100's! How is that conserving water? We need to stand up to the state politicians and say NO MORE BUILDING!
 - "Please have a rent control in San Mateo. Apartment is so expensive. I have no money left for saving.
 - Please open more housing for low income and first time buyer program in San Mateo I, so that we have an opportunity to own a house."
 - More affordable housing is great however the impact is limited to a small group of beneficiaries. Improving access to San Mateo via public transit benefits both a larger portion of the population by reducing demand for existing units.
 - Improve program similar to that found with "Housekeys" programs for area such as Menlo Park, Hayward, Campbell.
 - Do not bring BART into city of San Mateo to keep crime down. Give more of a voice for opposing view points that are concerned about the negative impact that over building the town of San Mateo can bring and never be undone. The survey is biased.
 - quit trying to solve everyone problem education is the key to income and affordability
 - "This survey is a bit disingenuous. It drives the person answering the survey to a predetermined set of conclusions. It would have been nice to choose 3 options I did not want like lot splits or inappropriate multi family developments in single family neighborhoods.
 - "

- October 11, 2021 January 16, 2022
 - "My family has lived in San Mateo for generations and we're getting pushed out because of the cost. Houses are ridiculously over priced, land lords are gouging people for rent money and the bay area is just plain over populated.
 - If houses and apartments were affordable that would alleviate a lot of the problem. Also cramming people in high density apartments is not the solution.
 - I've seen families who have lived here for generations pack and leave. So sad. All I know is I wish with all my heart I could afford a house. A home should be for everyone not just the wealthy."
 - "The elephant in the room...approve affordable housing...not just market rate.
 - Use affordable housing developers, like Mid-Peninsula to build 1000's of affordable units, not just a couple of hundred of them.
 - Look around there is plenty of market rate housing available, both rental and for sale, right now up and down the Peninsula. Thousand of units...why approve more, when clearly that is not the solution to affordability. We can't build the millions of market rate units that it would take to lower the cost of California real estate.
 - This whole process seems to be some kind of game, in which the only stated alternatives have a clear pro-market rate development bias. Why is the section about designating affordable housing?
 - The same kind of game pushed by the Bohannon Companies in their recent, losing campaign.
 - Running out first responders and essential workers as the target market has been used for over 40 years now as a front for market rate developers...it's getting old.
 - This is a critical issue for our city and appreciate you seeking freed back and working to solve a very complex and challenging issue.
 - As an educator in San Mateo, and a middle-age woman living on a single income, I have a great deal of trouble finding appropriate housing in San Mateo. I currently rent a duplex, and must live with my two adult children (it only has two bedrooms), and need to work a side job to afford my rent. I don't have a bedroom, I live in the living room. I would really like to finish my career and enter retirement in a more comfortable housing situation, but fear none exists for me on my income on the Peninsula. If I move out of the area, I will pay more commuting. It is a catch 22.
 - the question at the beginning of this survey suggests that San Mateo can continue to add more housing
 and still be a great place to live. I feel that San Mateo is already over-built and the infrastructure
 needed for more development is not there and San Mateo has slowly deteriorated from a place that
 was great to live to a place that I no longer identify with and the quality of life has diminished. Over the
 past 15 years I have seen an rise in the population of San Mateo yet we have less emergency services
 and overall infrastructure. What is being done about that? There is basically no protection for residents

October 11, 2021 – January 16, 2022

when things are stolen because we have no police force. You can read it all over NextDoor, property is stolen everyday and as citizens, there is no protection anymore.

- Jobs need to pay more!! If wages kept up with inflation and the housing market, we wouldn't be in this mess. The minimum wage should be increased even more! This is one of the most expensive places to live in the country and minimum wage is woefully behind.
- Of course, Please review your policies and your commitments about serving communities. Want to solve the housing problem? So, build houses or rent houses with prices that are not abusive and that help people to have decent housing. No for free but paying decent prices according how our county pay our salaries.
- smaller homes on small lots but restrict vehicles to 2 per parcel
- Duplexes please
- We need to improve and increase public transportation so people could get around without cars
 thereby freeing up space for more apartments and reducing the need for more parking and reducing
 congestion on the streets. I hear so often that we shouldn't build any more housing because it will
 bring more cars to the neighborhood and tie up traffic. If we had efficient, safe, and clean public
 transportation maybe that wouldn't necessarily be the case.
- Build infrastructure (roads, power, transit) and stop trying to manipulate the housing market and it will improve.
- Glad to see San Mateo taking steps to increase supply of housing/reduce cost of housing. I feel that
 new housing/denser housing needs to go hand-in-hand with improved transit options. A denser San
 Mateo can also be a greener San Mateo if we improve the range of non-car-based options for getting
 people to work, school, etc.
- "Build more, lots more!
- Especially west of El Camino Real."
- We need more housing urgently. Any measures that can lead to more housing have my support!
- It is a near suicide wish to try to bicycle anywhere without the kind of BICYCLE only infrastructure that
 makes the safety threshold enough that the masses, including old people, and people with small
 children, feel safe. Paint on streets doesn't prevent cars from going into bike lanes! You MUST have
 separation with planters (which also add beautifying foliage). Allocating space to park cars, in a system
 where each person owns their own car is NOT sustainable. Cars need to be LESS needed in our system.
 We should have them on a shared basis similar to the public library system where each of us doesn't
 have to own a copy of Charles Dickens but it is the occasional access that needs to be met...most of the
 time most peoples cars sit parked! And here we are talking about parking being a problem? Decrease
 dependence on cars by creating housing density (building UP), near meaning walkable or bikeable to

shops, parks and places to eat and stop allocating space for giant metal boxes on wheels that take up so much space, add to pollution and we then have the trouble to having to allocate parking space for.

- "We were homeowners for 30+ years in Burlingame, but in 2009 with the depression 2.0, we lost a teaching job and graphic arts job. So we had to sell our home and lost all our equity since this whole depression was caused by housing speculation. The home values were back up to their "real Burlingame" values 2 years later, but we couldn't wait that long since the panic caused the closure of the business I had worked for went bankrupt and the state of California cut back many night school teaching jobs, including my husband's. We are now making it work by having a large storage rental space for legacy and current business items. The rent takes up 25% of our income and we are continuing our day-jobs so we can currently afford it. I don't see many opportunities to downsize from here. I do see an effect in our rent from the new rental units built along the Rail Road tracks. More units would help everyone in that respect, because there are many lower paying jobs WAITING for employees that can't afford to live here any more.
- Full-on public housing for low income workers is not the answer (Bedford-Stivason in NYC proves that) but making new apartment units have to include 20% of smaller units for regular low wage workers with some kind of double depreciation for those units could help them be built. Living in mixed income housing brings it back to the "village" idea where low income folks can watch and learn how better income folks live, as well as having better income folks seeing that low income folks are working just as hard as they are, but at jobs they wouldn't want to do anyway."
- Hope there's special Loan program for those medium-income families to purchase house in San Mateo County.
- Improve educational system, lower commercial rates so business can stay open to promote jobs and increase seasonal entertainment and leisure programs
- Reduce the amount of investment properties. Such as an HOA with CC&R's restricting a certain percentage of rental properties within that area. Safely and affordably build up.
- "I don't think homeowners should be able to own more than 1 property in the city, or the state.
- •
- Is there anyway to create temporary units with shipping containers?
- •
- Or perhaps to continue to buy empty hotel rooms for the homeless?
- •
- Public transportation should be more frequent so it encourages more ridership. More commuter shuttles to popular industrial parks would be useful."

- Make project parking requirements pragmatic and on-site. DO NOT rely on neighborhood street parking to "absorb" the overflow! (BTW, that is the opposite of good bike lane land use policy also.) Stop the expectation that if a project has insufficient parking, residents will forego car ownership and use public transport instead that is SO unrealistic! Studios must get 1.0 parking spaces, 1 & 2 bedroom units get 2.0 parking places, etc. Most low income residents work 2 jobs to make sufficient income to pay rent of "affordable" units. Mass transit will never work for getting to /from 2 jobs/day.
- It has reached criminal levels. It should NOT cost \$5000 to rent a one bedroom, nor should it take duel income. Read the fine print, they are expecting 4 to 6 time monthly rent at \$5000 to even apply. I work in tech and can't afford the \$5000 a month rent so have been stuck in my apartment for over 25 years because there is NOTHING I can afford to move to either in rental or to purchase. If I do move it will be out of the area due to the lack of options.
- We are a built out city, no more room density is bad, it spreads Covid and increases crime and is not healthy. People are leaving California, because of plans like this to destroy our cities and neighborhood.
- Affordable housing for middle class folks who make ok salary & not high salaries of those in tech industry.
- "1. Cost of property tax.
- 2. Cost of homeowners insurance.
- 3. Cost of flood insurance.
- 4. Cost of upkeep (maintenance and repair).
- 5. Limited parking and transportation costs (eg. toll lanes are a parasitic cost).
- 6. Maintain/establish neighborhood quality of life (careless housing growth).
- 7. Deteriorating quality of life that drives people out of the city.
- 8. Livable/stagnant salaries (housing cost is at the mercy of inflation).
- 9. Understand/education of the total and escalating cost of housing.
- 10. Assure rental property is worthwhile to own or just a losing proposition."
- There is not enough affordable senior housing in San Mateo. If you earn \$40,000/year and are retired, where can you live?
- Frankly, matter how much additional housing is built, it will have little benefit to current residents as long as new people/new businesses from outside the area continue to move into San Mateo. Perhaps preference can be given to long term residents and their children. Exactly how that could be accomplished would be the question.
- I don't understand why buildings aren't taller here. We're pretty far from SFO flight paths. For example, I live in a 4 story apartment building. I often wonder why it wasn't 6 stories. That could have been 50

percent more units on the same footprint. I think downtown San Mateo can support and should have taller developments. There's one 15 story apartment building, but there could be more.

- "Educate retiree's in low income and subsidized relocation. I was a Kaiser Secretary, fell down, several surgeries later forced to retire. Could not move on disability. I looked for years to relocate and did not know that subsidized rent was available. Went through entire inheritance after partner died, covid sheltered me in place and basically I'm homeless, all I own is in storage, I care for a elder after my battling cancer. What is needed is a consultant who knows properties and relocates me into affordable housing.
- Looking online for months, years at I thought was unaffordable rentals I tired from chemo, older age and exhaustion. I asked San Mateo Housing if there was a class or training, I would love helping place those having a hardship. Us seniors do not wish to move out of state, away from our doctors, friends, family. We are not a throw away generation of retirees. "
- Higher buildings downtown, transforming some of the old unattractive single story commercial ٠ buildings along el Camino into taller, more attractive buildings but with assistance for small businesses who may be impacted, turn Hillsdale mall into mixed use commercial and residential. Include small studio units, perhaps like those in Asia, and larger units that are multigenerational or can accommodate families, build housing for teachers and their families on school grounds and perhaps for other civil servants as well, turn the old OSH property into housing- so convenient to restaurants and shopping. If feasible, convert vacant commercial buildings into apartments- even just some floors if allowed could be a win win, esp given more remote work for certain sectors. How about the set of low buildings near the Marriott and 19th Ave neighborhood- they are on a big piece of land. Could those be knocked down and turned into mixed commercial/retail and housing. People don't get on Caltrain to go to target, build close to shopping so it is in walking distance. Please do not mix apartment buildings in with single family homes. If I wanted to live in high density housing I would not have chosen a single family neighborhood. Ensure adequate water, Etc are available for people, build green buildings. While I sympathize with homeless folks, providing more resources may draw more homeless people to the area- need to work with neighboring cities to ensure they are offering the same. For example, what does Hillsborough plan to do to address homelessness in the county? Any open land in unincorporated San Mateo that is available? I worry about creating hotels for homeless folks along el Camino. While I could be wrong, it is my understanding that the rates of meth use is quite high, esp among people living in encampments. People screaming, agitated, etc are not going to do well living in high density housing, those around them will expect neighborly behaviors. If some of the hotels purchased by the city are for homeless populations, there also needs to be access to appropriate mental health and

substance abuse treatment, job assistance, etc along with it. LifeMoves for homeless families is a good example.

- Please consider that the infrastructure for this city will not support too many more people. The infrastructure for electricity, water, plumbing, trash/recycling should all have enough capacity to support more housing before the housing is put in. Also, there should be enough parks and open spaces in every neighborhood of the city before additional construction is considered. We won't be doing current residence any service if adding more residence reduces the quality of life for all.
- Not allowing tech companies to take over multiple units for employees. Each occupant should be able to find their own without tech companies stepping in.
- Government and community leadership needs to collect data related to the number of jobs and income of the population. How many jobs in the city or county are full-time? How many are part-time. How many single income jobs can afford a studio or one bedroom dwelling?
- The highest-resource neighborhoods should allow more types of housing: plexes, townhomes, smallto-midsize apartment and condo buildings, cottage courts, and more.
- Is zoning additional *office* jobs relevant to housing price? Based on Economics 101, the price of anything is a balance of supply and demand. I presume we do need more office jobs, but would that also generate more demand for people (understandably) wanting to live in San Mateo? How does San Mateo find the optimal balance?
- It is time to do something, rather than just talk about what to do.
- Don't allow tall buildings to be constructed in areas that have single family homes.
- San Mateo has a history of developers who live away from San Mateo and develop in their own self interest. They have supported racism, segregation, and "old boys" ways of doing business. San Mateo needs to find some new developers with ethics and a sense of community. Business as usual will not support affordability or fair housing. Some Council members need to think about who they should be serving.
- I wasn't able to write in above, but I would love to see office spaces (especially of large tech sector offices) be purchased and repurposed for housing now that nearly two years have passed where most large companies have allowed employees to work from home. I understand there is significant rezoning that would need to be done to convert these spaces to housing but I really think it would be a valuable opportunity to make use of the desirable land we have in San Mateo County which is currently being vastly underutilized.
- Unlimited growth is not sustainable. Public education regarding environmental limits to growth should be on-going and at the fore front. Affordable housing is only achievable by public no-profit housing.

The private sector has not and will not build sufficient affordable housing as there is no profit in it. Water is a very limited resource and existing supplies are not sufficient to sustain long-term growth.

- Outdated ordnances, unfavorable permitting requirements and obstructionist NIMBYism has
 exacerbated housing affordability in San Mateo for decades. It is now a crisis for the middle and lower
 classes. New homes for rent and purchase must be built, despite opposition from existing residents
 who benefited from and exacerbated supply limits. Action to ameliorate this dire issue is crucial or the
 economy and body politic of the area will lead to greater heights of crisis.
- We need more housing everywhere, especially in existing single family neighborhoods. To avoid increased traffic, we need to prioritize better options for waking, biking and transit.
- "San Mateo, many other cities the County and the State have tended to approach affordable housing by focusing on building new buildings and then worrying about everything else later. Affordable housing that is sustainable and attractive must be a holistic effort. Preserving existing affordable housing is key. If new buildings are created, however, there must be a holistic plan at the same time that shows how there will be sufficient public transit (both east/west as well as north/south), open space, parking, traffic safety, retail/grocery/etc shops and services around the housing. This will make the new/preserved housing more attractive to the purchasers/renters, as well as to their neighbors. Everyone wants quality of life. Just building a building doesn't do it.
- We also need to encourage more affordable rentals and purchases. Helping with downpayment loans/subsidies for both rentals and subsidies removes a huge obstacle. More innovative public/private partnerships can speed up creation/preservation of affordable housing rather than putting impact fees in bank accounts where they sit for a very long time doing no good for the community.
- We need more focus on specifically preserving/creating affordable housing, not just building lots more market rate housing in the hopes that that will put pressure on less new housing units to lower their rents/prices. While this is a strategy, we have leaned on it far too much for our city's needs.
- Finally, while there are greater financial incentives for our City to keep approving more commercial buildings, this only continues to throw our housing/jobs imbalance further out of wack and makes residents cynical about our City's commitment to affordable housing. If the State is serious about addressing affordable housing, State/local and private developer collaborations should focus on encouraging more mixed use housing (and not just luxury housing units). This is not just about \$\$\$. It is about regulations and short and long term incentives.
- Thanks for putting this survey out. Everyone in San Mateo wants more affordable housing. There may be several reasons for this, but there is a common goal. I look forward to how our General Plan 2040 presents a holistic and actionable approach to affordable housing that we all can get behind."

- October 11, 2021 January 16, 2022
 - Housing needs easy transit public or bike connections for new housing is necessary
 - In my opinion we need higher density housing near transit and we need to invest in a high quality transit network and a high quality bike network.
 - We are not meeting the critical needs of extremely low income people who grew up in this community and who are either elderly or challenged by a disability. A studio apt is not adequate for those who need live-in personal assistance in order to remain in their home community. The federal incentive/reimbursement formula for developers based on number of units should not be allowed to preclude/disincentivize options for those whose needs require more square footage than a studio. Exploration of duplex/quadplex arrangements, in addition to 1-2 bedroom apts, would be very helpful in meeting some of these needs. We also need to address housing needs of direct support persons who make it possible for individuals with disabilities to access and participate in the life of this city.

BUILDERS FOCUS GROUP – NOVEMBER 15, 2021

The following comments were collected as part of a workshop with housing developers, builders, and architects on policies and programs for the City of San Mateo's Housing Element on November 15th, 2021 via Zoom Webinar. Seven external participants and ten City of San Mateo Housing Element team members joined the event and results from the discussion are presented below.

Discussion Topic 1: Zoning and Building Regulations

Summary: There was general interest in relaxing height restrictions, particularly as they can conflict with minimum height requirements for ground floor uses. There was support for relaxing parking requirements in general and for excluding above grade parking from FAR calculations. There was also interest in establishing a local density bonus program to complement the State Density Bonus law.

- "The height calculation is too rigid; the City should regulate height by story rather than by feet."
- "For modular construction, the minimum heights go up within same number of floors, an extra 14-15" per floor. As modular becomes more popular, the City could consider allowing additional height to accommodate modular construction."
- "To have FAR and density (e.g. FAR of 2) at the same time is at conflict. State Density Bonus language on FAR appears to be mutually exclusive of unit per acre density. I would like greater flexibility here." (comment supported by multiple participants).
- "For sites with limited frontage, requiring a fire control room on ground floor and frontage can create a conflict with density and height criteria."
- "We need more ground floor height if we want to allow mechanical parking options or active commercial."
- "For an all-residential wood frame construction, five stories within 55' is ok, but not for taller ground floor, parking or modular construction, it's difficult or not possible to get five stories within 55'."
- "Above ground parking shouldn't be counted as FAR area, and below grade parking is very expensive and drives up unit cost."
- "I support increasing height and density limits"
- "I support creating a local density bonus program. HOME SF is a program that allows for increases in height for increases of affordability. In one recent project I saw an increase in density of 225% (much more than State Density Bonus) with an increase from 21% to 30% affordable units (ended up with same number at low end, but got more middle-income units). An increase in density led to only a slight cost increase moving from type 5A to type 1 with 3A above."
- "I support the idea that density of 50 du/acre is too low with a 55' height limit."
- "Open space and lot coverage requirements are also constraints, so the 50 units/acre isn't always the controlling requirement. In South SF at 100 du/acre, the project was aided greatly by reduced parking and open space requirements."

- "Height limits should have more flexibility. In a recent project a stair bulkhead was counted as an additional floor causing a series of conflicts (including with setbacks). I request additional and broader carve outs or exceptions."
- "FAR of 1.0 limits density to ~25-30 du/acre, should be addressed."
- "I request above grade parking not to count as FAR to bring City's regulations in line with other cities, or include a carve out for housing and mixed-use projects in how FAR is calculated."
- "Any relaxation for mixed-use projects helps with the cost of housing development."
- "Density and height limits are inhibiting smaller unit creation and should be relaxed: I had a project with ~700 sf units and bumping against 3.0 FAR and height limits."
- "State Density Bonus law is sometimes invoked to get the state financing available for affordable housing development. Because state has prioritized cost efficiency, in a high-cost area like San Mateo the only way to demonstrate efficiency is to go for scale with as tall and dense and large as possible. Lowering parking requirements also helps with this. So does lowering other development standards (e.g. small three bedroom units, and 1.5 baths in a 2 or three bedroom unit)."
- "Consider eliminating single-family zoning and/or establishing minimum units per development."
- "I support all of the tenant supports being considered."
- "I support the highest heights and densities possible to get more units."
- "Eliminating parking requirements could get projects to 75+ du/acre within height limit."

Discussion Topic 2: Development Review and Entitlement Process

Summary: Participants suggested that departmental and review agency expectations for level of detail required during the Planning Application (PA) phase should be further clarified and streamlined. There was also a common sentiment that some development standards (e.g. height limits and guest parking requirements) were increasingly out of step with contemporary trends on the Peninsula.

- "We need to calibrate the expectations of departments, e.g. Public Works expects Design Development-level design during early entitlements phase."
- "Many development standards are based on more of a suburban community, it takes a lot of effort and work to satisfy those standards that other cities don't have (e.g. guest parking), height limits are too rigid, all of which adds costs to housing development."
- "The application requirements are concise but followed by more robust list of comments that are hard to accommodate, this bogs down resources on both sides. It would be better to have clarity up front on submittal requirements at both pre-app and application phases to limit total number of reviews e.g. streetlight design doesn't need to be done during PA phase."
- "Eliminate the early study session with PC."

- "Develop a clearer submission checklist to clarify the right element of the appropriate code to be satisfied."
- "Additional fee clarification would be helpful."
- "We need to confirm the definition of substantial conformance."
- "Height limits are onerous and inhibit housing development."

Discussion Topic #3: Affordable Housing Alternatives

Summary: There was general interest in seeing an expansion of available incentive programs to bring additional affordable units online in general, and particular interest in creating a strong local density bonus program to extend incentives beyond those in the State Density Bonus.

- "Deed restricting is a significant way to address this, greater clarity on what the requirements and thresholds are would be helpful."
- "Acquisition and upgrading of existing housing units is a worthy concept."
- "All of these programs (inclusionary requirements, including units onsite and offsite, in lieu fees, deed restrictions, land dedication) are good. They should be mutually available."
- "The more options: a bigger toolkit will give developers more opportunities to bring projects online."
- "Be very cautious when setting the relative cost of participation in one program vs another (e.g. if you make offsite 3x more expensive present a clear rationale for the policy that is furthering)."
- "Make community benefits a clear formula anyone could calculate."
- "With a base density of 50du/acre, it's hard to get much of value."
- "Create a local density program: its ok if State doesn't cross match local 1:1, as long as local is extending the tool."

Discussion Topic #4: Housing in Mixed-Use Developments

Summary: The City should set a minimum density if it wants a higher percentage of housing in mixed-use projects, height limit, FAR and parking a constraint on developing mixed-use, be sensitive to economic thresholds and constraints; consider adopting codes that are more form based.

- "The 55' height limit makes it difficult to have an active ground floor. State Density Bonus is almost always needed to achieve optimal heights. Consider an overlay zone to make this easier to achieve without using State Density Bonus."
- "For mixed-use with a 15' ground floor ceiling, and 12'-13' on 2nd/3rd floors, then five stories cannot be achieved within 55' height limit and constraints created for installing mechanical and HVAC. Allow for greater ground floor flexibility."

- "Consider more flexible ways to achieve an active ground floor without a traditionally leased commercial space. E.g. amenities for housing, a coffee cart vendor in the lobby, etc."
- "Consider defining number of floors instead of linear feet for height limit."
- "Use Redwood City's Form Based Code downtown as a model, the city can dictate the form for the sites you want to develop, that can be the roadmap and the applicant can come in and take pieces out of it."
- "Building systems are more expensive in mixed-use, so a critical mass (minimum size) is necessary to make investment worthwhile; otherwise, mixed-use can be cost prohibitive."
- "I suggest eliminating above ground parking from FAR."
- "We should consider ways to count the inverted parking demand inherent in much mixed-use to lower the total required parking; have shared parking allowed under the code and offer clarity around how shared parking is counted."

Discussion Topic #5: Parking

Summary: There was significant interest in relaxing parking requirements, particularly in walkable areas close to transit, but there was also an understanding that the market demand supports providing a certain amount of secure on-site parking for residents. There was general agreement that guest parking was unnecessary, but that electric vehicle charging requires more area than traditional parking, and on-site bike parking requirements are high.

- "I would prefer to build to a parking ratio of 1.15 spaces/unit in general but less in more challenging sites and in very-walkable sites. Or we can consider lower ratios."
- "Access to secure parking is a big deal. We put garages into a multi-family because didn't have enough parking."
- "There are mixed views on mechanical lifts, some developers avoid them while others have had success using them. We have concerns over user error, reliability and unknown maintenance costs. "
- "Mechanical parking allows you to better future proof the floor for other uses going forward if paradigm changes. They can also be cost-efficient (parking can be 1/3 or more of overall budget)."
- "Guest parking is less market driven than resident parking."
- "Electric vehicle charging equipment can be challenging to squeeze into a typical 30' column grid."
- "For affordable housing projects, I would prefer a parking ratio around 0.7, or even lower in TOD areas.
 Demand can be lowered effectively through transit passes, car share packages, and that guest parking isn't well utilized or needed."
- "I suggest eliminating the covered parking requirement for lower density residential projects."
- "Given Reach code and EV demands, larger transformers are needed. Also, PG&E doesn't want transformers underground, and transformers occupy a lot of ground floor space."

- "City's on-site bike parking requirement is very high."
- "Projects should be given more latitude on parking requirements, and that parking studies should be a method to support alternative solutions to parking/mobility requirements on a site-specific basis."
- "We need to make clear and have more grades of flexibility in parking requirements: one set of requirements for greater than ½ mile to transit, one for ¼ to ½, yet more flexibility for less than ¼ mile to transit."
- "Policy driver should be walkability and proximity to transit, not bike use or size of bike room."
- "Locating housing near schools and strengthening safe routes to schools will eliminate the need for many cars from the origin point."

Discussion Topic #6: Amenities

Summary: There was agreement that open space and roof decks are attractive amenities supported by market demand, however, physical location and climate can reduce usability, being located in a walkable downtown is an amenity in itself and can lessen the need for onsite open space.

- "Because densities are so low compared to rest of Peninsula, open space requirements are relatively easy to meet."
- "When located near high-sound areas (freeway and train) and near very walkable areas (e.g. downtown) open space isn't as well utilized and shouldn't be required as strongly as it might be elsewhere."
- "Roof decks are an attractive amenity, and the market supports their existence, however privacy conflicts should be managed sensitively and can be done by guardrails being strategically set back from edge to manage sightline privacy, etc."
- "Climate conditions of a site can impact usability of a roof deck (e.g. windy location)."
- "Many projects require every inch of roof for solar, for common area electricity load, so there can be tension there if roof decks are effectively required by open space minimums."
- "We need to allow for flexibility in code re: elevator override, what can be counted as a shade structure in roof (what counts as temporary vs permeant, ability to bolt down objects, etc."
- "Downtown is an amenity in and of itself, so other amenity requirements can be flexible in the downtown."

FAIR HOUSING WORKSHOP – JANUARY 13, 2022 – DISCUSSION AND POLL SUMMARY

The following comments were collected as part of a community workshop on the topic of Fair Housing as it relates to the City of San Mateo's Housing Element on January 13, 2022 via Zoom Webinar. Twenty-nine community members participated in the workshop and results from each three breakout room discussions is presented below. Reponses to an optional demographic poll conducted during the event can be found at the end this document.

Each breakout room conducted two discussion sessions. Following a presentation of background information, each discussion group considered these questions: "Share housing opportunity challenges you have experienced or know about? What do you think are the highest equity priorities for SM to focus on? Do you have ideas to address these needs?" After a second presentation on existing demographic patterns across city neighborhoods, each discussion group responded to the following questions: "Do you think that the segregation patterns in SM create any housing equity issues? Can you think of ways to address? Should the City prioritize improving lower resourced neighborhoods? If so, how?"

Breakout discussion group #1

Share housing opportunity challenges you have experienced or know about?

- "I've been a resident for 40 years. We need solutions for supportive homes. Approx. 1000 people need extremely low income housing in the City."
- "I moved here with family and became renter because I had difficult time finding somewhere affordable to live. Having an affordable place for a single person to live has been a challenge"
- "I work in housing for people with special needs, it's difficult for people with disabilities to navigate the application process"
- "I've been on the BMR home buying list for 20+ years and am having a difficult time purchasing a house. There's no communication where people are on the list and any properties that were coming up for BMR. I want to know the queue for the list and status for BMR housing"
- "I'm a part of the One San Mateo group. There is no place in San Mateo for people who make extremely low income"
- "It's a daily occurrence to see people who are overcrowding multiple households in a single household. This hurts children doing schooling outside of class because there's not enough room.
- "I'm a practicing architect that used to have a firm in DT that was priced out"

What do you think are the highest equity priorities for SM to focus on? Do you have ideas to address these needs?

- "We need to look at the income of people and make it affordable at all income levels"
- "We have to prevent evictions, particularly for communities of color who are more threatened for eviction more than others. We have to avoid the abuse of evicting tenants without just cause and provide better benefits if eviction is necessary"
- "The City should require developers to have more affordable units"
- "Can we revamp low to mod income to include the extremely low income and protected class? The real low income is not shown and missing because the "real" low income are people with \$1000 or less income per month."
- "There are no programs that support or help people that are potentially going to be homeless. No vouchers or anything.
- "It's hard to find landlords who are willing to rent to people who have been homeless"
- "We need education for people on how to apply and how to get into low income housing. More skills
 and programs to educate like the <u>Life moves</u> homeless program. We should provide vouchers/funding
 for people who face homelessness.
- "Let's add more links and resources on the City webpage make prominent the organizations that support these programs."
- "We need a minimum wage in City of SM, particularly an increase of minimum wage/accelerate min. wage"
- "Provide resources that could assist people who are facing homelessness"
- "We need to find more people who are willing to rent to people who were homeless. Perhaps create a program which promotes this with tax credit incentives?"
- "Promote ADUs as a way to increase housing available"
- "Create a rent registry for rent units in the City of SM that tracks compliance with rent and ordinances since many of these items are violated by landlords. If landlords are forced to record, it would lead to more accountability."
- "It's possible for homeowners to rent out a bedroom through home sharing."
- "We should continue to provide further guidance and rental assistance"

Do you think that the segregation patterns in SM create any housing equity issues? Can you think of ways to address? Should the City prioritize improving lower resourced neighborhoods? If so, how?

- "Fixing existing patterns of segregations can result in extremely different outcomes for children. More segregated areas have less opportunities and more challenges."
- "There is an issue with single family zoning and isolating lower income housing away from those areas. We must rezone some of these R1 districts along with adding ADUs which may help with opening more opportunities to move into these R1 districts"
- "There is a huge disparity between east and west side in the equity and resources"
- "We should increase access to opportunity through transportation"
- "The City of San Mateo has exclusionary zoning. The majority of the City is covered in R1 zoning and we need to explore how to make these areas more accessible to others."
- "We should create a bike path in North Central. Biking is a means of transportation and livelihood in this neighborhood."
- "It's time to invest in getting affordable housing built City-wide by creating an affordable housing overlay."
- "Central neighborhood needs improvements in infrastructure. Sidewalks are in disrepair, lighting could be improved for safety, we need more traffic calming measures, and better bike lanes.
- "We should increase preservation of these neighborhoods. Provide nonprofits or programs that support low income housing a priority when it comes to purchasing low-income properties."
- "Investment is a double-edged sword where investing will lead to more unaffordability/gentrification.
 Finding a good way to balance both of those is difficult."

Breakout discussion group #2

Share housing opportunity challenges you have experienced or know about?

- "My child has autism, has trouble finding affordable housing, and is looking for resources. Rent has been increasing (from \$2,700 to now \$3,100) and I'm not sure how to deal with rent increases."
- "I live in San Mateo. I know many people who are getting rent increases and also evicted, despite the moratorium against doing so. Theoretically with state law they should still have protections because they have rent relief, but they are being evicted, so that is a big concern. There are no low-income or affordable units for them to move into. "
- "I work for organization called Housing Choices where I help people and families with members who have developmental or intellectual disabilities. I was formerly was a housing coordinator who worked

with clients to help them find housing where I saw many issues with Section 8 – landlords who don't know or don't care about rules, especially with raising rents illegally or refusing to accept Section 8 vouchers although they are required to. There are source of income discrimination laws now, yet I still see these issues quite often. Many clients depend on social security incomes which is less than \$1,000 per month (might have increased recently to \$1,400 – still very low for this area). A lot of clients are at risk of homelessness because they are burdened with high housing cost. Example: worked with single black mother with a disability who lived in San Mateo County who rented an ADU for \$1,200/month. Had a total income of \$1,600/month, so majority of income went towards rent. Landlord did not take care of maintenance issues, so she called Code Enforcement out, who red tagged the unit as unpermitted and so she was forced to leave the unit, which was unfortunate. It's difficult for her to relocate; she has family and other circumstances in this region, so was homeless for several months after. So there are many people who are at extremely low income category that are at risk of homeless or homeless already. This is a huge priority that should be addressed."

- "I have a question: what kind of relationship does City of San Mateo have with housing authority? I do
 a lot of investments out of state, especially Section 8 housing in Chicago Section 8 is very engaged
 there. I don't see that here. I've been lifelong San Mateo resident since 1975, and often engaged in
 General Plan, am an ADU provider, am real estate broker. We need to change ADU laws right now too
 many discretionary items that need to be clarified. Non-discretionary, ministerial items are fine, but
 discretionary items need to be clarified because that prevents homeowners from providing ADUs.
 What can we do to make it easier for property owners to build ADUs?"
- "I have a question about interest numbers, and how that would impact me. Interest has been too high

 Every time I try to put a down payment for house, interest goes up, but my salary does not go up. I would like the opportunity to be able to purchase a house. I live in Millbrae, and wanted a unit in new residential project, but was limited to buying."

What do you think are the highest equity priorities for SM to focus on? Do you have ideas to address these needs?

 "It appears the rate increase described previously was probably illegal – seems higher than what state law 1482 allows. The rent went up \$400 which is 15% when it is supposed to cap out at 8 or 10%. Unfortunately, City does not have ability to track activities of certain landlords and how contracts are or are not being upheld. There is discussion about getting some program in place so that incidents similar to what was described can be addressed through the courts; we don't have those mechanisms in place now, yet we know there are issues out there, and that is one of the solutions I think that a wide variety of people with numerous different conditions could be addressed by the courts. We need

to figure out the extent of the abuses that may or may not be occurring. Can the City consider a renter registry?"

- "It's good to remind or educate people these resources are available. We have a diverse group; we need to pay more attention to outreach to Latin groups."
- "We need education on what rights people currently have pertaining to renter's rights."
- "Education is key, the City can partner with Housing Authority to have workshops regarding source of income discrimination. We should make sure tenants understand what their rights are so that they're in these situations where they're taken advantage of by landlords. We need to create more Extremely Low-Income Housing. The State Density Bonus law focuses on very-low income and low-income housing, and the City can go further by providing concessions/waivers for Extremely Low Income or Acutely Low Income as well as creating a menu of options of affordable housing. Another suggestion: an inclusionary housing ordinance that allows for more units to be below market rate if the higher income levels are less units to be below market rate if they're lower income levels."
- "I have seen the housing crisis across own personal family experiences, teachers at kids' schools, doctor moving away, etc. This is an important issue for community. I am here to move the needle as much and as quickly as we can."

Do you think that the segregation patterns in SM create any housing equity issues? Can you think of ways to address? Should the City prioritize improving lower resourced neighborhoods? If so, how?

- "How can we desegregate in order to create housing equity? How do we answer this tough question? We need to make housing more affordable to make it more equitable."
- "This has been a problem for a long time; there are deep historic reasons why we have segregation and unequal opportunities across the city. I would like to have a deeper conversation about this as we try to address this issue. Zoning is a big problem – my neighborhood is lower resourced, it's multi-family zoning. Other parts of city doesn't have multi family zoning which keeps costs very high. We should create opportunities for more multi-family and affordable housing, in high-resource areas as well."
- "I'm a 12 year resident of San Mateo, still a renter, probably always will be. The low resource areas are in the flats closer to the shore, which is bad land, and led to certain patterns in development."
- "Zoning is an issue. Compare high resource areas to SFD zonings. Creating more SFDs is an inefficient use of space, when we need to get more people into a smaller area. Down payments are one of the greatest barrier to home ownership – loan/funding programs available for down payment assistance would be helpful. For prioritizing improvement in lower resource areas, this is tricky because you want to help improve people's quality of life but you also don't want to displace people or gentrify the area.

Are we doing what's best for the people who live here, or are we creating an environment that is going to be as unaffordable in the future as other areas in the city?"

- "Our R1 neighborhoods have negative impacts. R1 neighborhoods are currently excluded from housing element upgrades... we can't build anything in R1 neighborhood. We can now start to change R1 neighborhoods with duplexes, etc. We need to change zoning, density, and height requirements. We need to look at our site inventory and understand what realistically can be built where, and make sure it's not concentrated at lower resourced areas."
- "SB9 was only became effective recently, but how are we incentivizing property owners of lower resource areas (R1) to provide more ADUs, duplexes, or lot splits?"
- "I have a question about SB 10. Is the City exploring this, which is optional compared to SB 9?"
- "I agree with what many have said. Legacy of segregation is still very present in our communities, and is still contributing to housing inequities. One opportunity I would like to focus on: housing preservation, specifically support to renters. We need to be pro-housing, both production and development, affordable and market rate, but without coupled with preservation strategy, I worry we will continue contributing to the displacement of our existing communities."

Breakout discussion group #3

Share housing opportunity challenges you have experienced or know about?

- "I'm a renter in 19th Ave Park. I know someone who recently moved due to unlivable conditions. Renters must go rent-to-rent after initial one-year lease."
- "I know several people served with eviction cost or moved away due to housing costs."
- "I'm an owner in Hayward Park for 25 years. I've lived in neighborhoods with high crime rate before moving to San Mateo."
- "I live with my parents, I hope to afford the ability to move out someday."
- "I work in special education. There is a lack of federal funding for people with learning disabilities. The disabled have less access to education and income and thus housing."
- "We need to build affordable housing"
- "I'm an owner in North Central neighborhood. There are lots of young families with children, seeing diversity change."

What do you think are the highest equity priorities for SM to focus on? Do you have ideas to address these needs?

- "We need more tenant protections. Rents in older buildings may be affordable, but rent increases may drive the renter out. Nearly 48% of City are renters. To increase protections we should increase renter/eviction protections, consider rent stabilization to avoid rent fluctuation, establish a renter registry to promote access to data, and increase access to open space when designing projects.
- "Home prices in San Mateo are make ownership inaccessible we need to make affordable housing construction more feasible. We should eliminate Zoning restrictions placed on certain zones that prevent affordable housing production by allowing 100% affordable housing production in all zones. We could establish an overlay zone to open opportunities for affordable housing developers and establish an expedited review process to allow certain projects to move through the process faster.
- "There is a lack of federal funding/assistance to those with learning disabilities"
- "To preserve Neighborhood Diversity we must allow more types of housing to promote diversity to allow those who cannot afford a single family home to be within neighborhoods they otherwise could not afford."

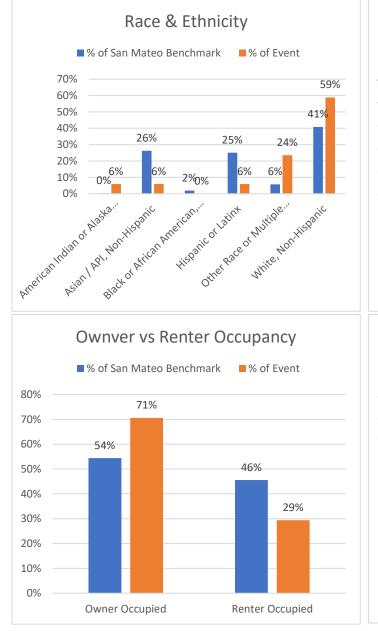

Do you think that the segregation patterns in SM create any housing equity issues? Can you think of ways to address? Should the City prioritize improving lower resourced neighborhoods? If so, how?

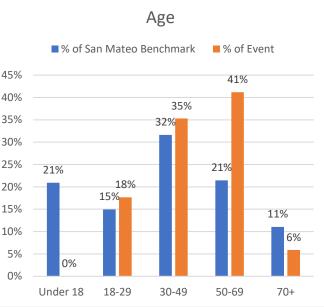

- "Absolutely yes, as evidenced by racial and economic disparities among neighborhoods"
- "Higher resourced neighborhoods tend to be single family"
- "We need to invest, through development impact fees for example, in the infrastructure of lower resourced neighborhoods, which are often found in higher resourced neighborhoods. Investment in bike and pedestrian level improvements, which increases access to sustainable transportation, should focus on proper implementation of bike improvements in consideration of the existing neighborhood infrastructure and housing stock and should avoid parking impacts. We need to provide residential parking solutions via residential parking permit programs
- "We also need to invest in parks and open space"
- "It's important to engage residents of lower resourced neighborhoods in a robust manner to find what they need and want rather than have others decide."
- "We need to increase investment to reduce parking issues and increasing access to sustainable transportation"
- "Affordable housing should be available throughout the City, but we have to emphasize housing production in our transit corridor around our three Caltrain stations"

City of San Mateo Housing Element Fair Housing Workshop Results January 13, 2022

City of San Mateo Housing Element Fair Housing Workshop Results January 13, 2022

HOUSING POLICY WORKSHOP - NOVEMBER 2, 2021 - DISCUSSION AND POLL SUMMARY

The following comments were collected as part of a community workshop on policies and programs for the City of San Mateo's Housing Element on November 2, 2021 via Zoom Webinar. 35 participants joined the event and results from each five breakout room discussions is presented below. Each breakout room conducted their discussions following a presentation of background information and an overview of existing programs and policies and potential new strategies. 23 of the participants completed a poll during the event, results can be found at the end this document.

Across all five groups, community members expressed a preference for strengthening housing production and affordable housing programs and policies. Specifically, San Mateo community members in all five discussion groups expressed interest in expanding the City's commercial linkage fee. Expanding the production of missing middle housing was proposed in four of the discussion groups. Supporting the creation of Accessory Dwelling Units (ADUs), establishing an affordable housing overlay, and increasing support for housing for people with physical and intellectual disabilities were supported in three of the discussion groups.

Each discussion group considered the following questions: "What do you think about the existing programs? Are there revisions to them that you think would be helpful to explore? As the City moves forward with planning efforts, which options would best match San Mateo's needs and community character? What questions, concerns, and ideas do you have?"

Group One Discussion:

Summary: San Mateo community members in group one expressed interest in strengthening Accessory Dwelling Unit (ADU) and "missing middle housing" production as effective strategies to improve the supply and affordability of housing, while addressing historical discrimination by locating new lower-cost units in communities they have historically been excluded from. Specifically, community members would like the City: increase commercial linkage fees to pay for housing and TOD programs, relaxing height limits, especially for missing middle developments; and establish an ADU program for the City to incentivize nonprofits and smaller employers to develop ADUs. Community members also expressed interest in building more units to reduce the problem of overcrowding and traffic congestion and including small commercial pockets in residential neighborhoods.

 "I like the housing programs and I like what they're doing, but I want to know the potential negatives and concerns that come with increases in population relative to existing people within San Mateo area. How crowded does it make San Mateo? How many more people do they allow to live in the City? I have concerns about parking requirements for ADUs. There is existing crowding within neighborhoods but extra concern for parking requirements."

- "We need programs that increase people in proximity to where they work. The current commercial linkage fee is too low. When you create jobs, you create demand for housing. Many jobs, specifically office jobs, can be well paying, but that creates demand for lower income jobs as well (clerks, daycare, retail, etc). Funding should come from higher commercial linkage fees and office developments in order to offset impact from office projects and create a good jobs-housing balance."
- "Other cities in area have similar struggles to San Mateo. As industries expand, office space demand . increases. I think there will be a large move back towards office space as opposed to staying with remote work. If we don't build more housing then traffic problems will only get worse. Even in offices with high paid workers, there are low paying jobs that are essential to servicing them. Commercial linkage fees are critical with the amount of people coming and going for work. More people living in the City will make it more livable. The population might rise, but people will contribute more in San Mateo rather than if they were on the road all the time. One existing program that we should put more thought into is ADUs. As people have problems about putting too many housing units in single family areas, this is a way to increase units in a way that is a compromise for people who don't want higher density buildings in lower density areas. A local church has built an ADU with minimal impact to the surrounding area, we can use it as a case study for how it can be effective programs. Smaller employers and nonprofits could provide partnership possibilities for homeowners to relieve staffing or other issues related to housing. It may be a useful strategy to help need at the individual level rather than through larger projects. People's 1-on-1 needs could be enhanced by use and City sponsorship of ADU program."
- "Missing middle housing is especially important (duplexes, triplexes, etc). San Mateo, like most cities, has a long history of housing discrimination. The solution to that is not to let things sit as they are but to look at how to fill diversity across the City. Missing middle is good place to start, where you can infill to put lower income people in areas where they have otherwise been excluded while being best for the long term health of the City. Transportation is also key; the City needs to think about how to expand transportation options when there are areas outside of immediate routes like train stations. One example being an office development that had shuttle programs. These types of programs with high frequency, convenience, and reliability could help prevent people from using single occupancy vehicles and reduce cars. We should dovetail housing plans with transportation plans outside of El Camino Real and the train stations. More data is necessary we need to take into account: diversity, renters vs owners, and where do we have housing that is underutilized. We need to encourage people to use properties that are not currently used. For neighborhoods to be walkable, there needs to be commercial or other areas than residential within walking distance. Opening up areas that are currently residential, but could have small commercial spaces in them, could make for increased walkability. When rethinking the Housing Element we could make the City have smaller pockets where

people could walk to rather than using vehicles. This will increase sustainability for the existing uses while reducing the need for cars."

"We should enact vacant property taxes like Oakland does. I support missing middle – there are small sites around the City that are not utilized in a variety of areas, especially along El Camino Real, that may be too small for larger projects but are perfect for smaller units in the missing middle scale – duplexes, etc. Utilizing those sites could add a good number of units in an easier way to facilitate affordable housing. There was a habitat for humanity project in a former firehouse where height bonuses where applicable. We should pursue allowing density bonuses plus height bonuses. Taking height limitations off would help make projects more economically feasible for developer incentives. Larger projects could continue under current programs – but missing middle and underutilized parcels could help fill gaps. Redevelopment agencies previously facilitated these types of projects perhaps would should start up something similar."

Group Two Discussion:

Group two also identified increasing commercial linkage fees and strengthening missing middle production as strategies to address housing affordability. Community members in this group also called for: an affordable housing overlay with clear regulations for community benefits; a City density bonus in addition to the State's; a policy for nonprofit developers to have first dibs on the purchase of older apartment buildings to avoid displacement; and utilization of SB10 to create missing middle housing. There was also support for Transit-Oriented Development (TOD) and marketing of apartments for people with physical disabilities.

- "I think its important that we maintain a wide variety of programs"
- "We see that there is a lack of "deeply" affordable housing for very impoverished people that needs to be addressed"
- "I think housing affordability is always going to be behind the 8 ball if developers/ landlords are always chasing profits"
- "It feels as though we're never going to catch up to meet all the housing needs"
- "Its hard for young people to find housing once they graduate from college, so they end up having to move far away."
- "There is lots of difficulty for disabled people to find the right housing. They need to live here to be close to their doctors"
- "Its very hard to find housing in San Mateo on limited income"
- "It feels like profit is the main driver that makes development in San Mateo"
- "The Commercial linkage fee should be higher"

- "All programs for new housing development should allow increased height and density. There is a project called 1458 San Bruno Ave providing 200 units/ acre with 50% affordable units. We need developments like that."
- "We need to also look at increasing medical facilities, entertainment, and other things that keep up the quality of life in San Mateo"
- "We need an affordable housing overlay with clear regulations for community benefits as well as a City density bonus in addition to the State Density Bonus."
- "We should pursue adding more Transit Oriented Development wherever possible"
- "I think transit needs to be expanded since it is only available for those who live next to it"
- "I think existing residents are excluded from transit. The new development/higher density surrounding transit makes it more difficult for people farther away to access. This leads to more congestion/traffic and less parking"
- "We should explore having shuttles that take residents of large developments to the train station. Then we could increase the area where increased density can be added while still connecting the development with transit."
- "We need to establish competitive financing for City land acquisition when it is for affordable housing"
- "I believe basic services need to be met before we expand housing"
- "I think union workers should lower their fees when building affordable housing"
- "We need more affirmative marketing of apartments for the physically disabled"
- "We should explore more housing in missing middle options."
- "We need more options for people to travel around the City in different forms of micromobility"
- "A new policy could be enacted where nonprofit developers can have first dibs to purchase when an older apartment building goes up for sale so that all the residents aren't displaced"
- "I like the form of garden court apartments to allow higher density"
- "Missing middle would allow us to build smaller"
- "It seems that studio apartments are no different than dorms. Why don't big companies provide these for their employees on their campuses so there is more room for families to settle in the City?"
- "I think company towns haven't gone too well in the past. I wouldn't want to have my employer as my landlord."
- "We should use SB10 to create missing middle housing."

Group Three Discussion:

Group three identified increasing commercial linkage and other fees to pay for affordable housing, as well as expanding missing middle housing, and establishing an affordable housing overlay. Transit Oriented

Development and locating housing and jobs near transit to reduce commutes and congestion was also emphasized. Some community members noted concerns over service and infrastructure to accommodate growth and concerns that the programs being discussed did not enhance the City.

- "We should explore increasing commercial linkage fees and similar developer in-lieu/impact fees that would directly support affordable housing. The current fees are too low."
- "The City needs to develop in a sustainable manner by locating housing and jobs near transit."
- "Housing development also needs to accommodate for families (with unit sizes of 2+ bedrooms)"
- "How will we accommodate all this future growth (e.g. services, infrastructure)?"
- "We must ensure that the inclusionary BMR percentage of housing does not make affordable housing projects infeasible"
- "We need to increase housing to reduce the job/housing imbalance and reduce commutes; especially for low-income community members"
- "The Bay Meadows planned unit development is a successful example of good Transit Oriented Development."
- "We need to explore expanding middle housing (especially in townhomes)"
- "The City should approach a strategy of land acquisition for affordable housing development"
- "Zoning/Planning should include an affordable housing overlay"
- "We need more adaptive reuse policies for existing buildings (e.g. office to residential)"
- "We can ensure preservation or creative adaptative reuse of existing housing stock with affordability deed restrictions"
- The HIP housing home-sharing program would be a good method to get more use out of existing housing"
- "We need to spread fair housing throughout the City and encourage diversity"
- "In my view, none of these programs enhance the City"
- "The main issue of affordability is the imbalance of housing vs jobs (there is one unit for every 11 jobs created)"
- "I'm concerned that the existing housing stock benefits long-time residents, but we need to consider the needs of the future/younger generation"

Group Four Discussion:

Community members in group four would like the City to: set clearer standards to streamline the production of ADUs and missing middle housing options in the City; strengthen renter protections; increase below-market-rate housing requirements from 15% to at least 20%; and increase the supply of 3-bedroom below-

market-rate rental units. Group members also were concerned about the City overly relying on ADU production to meet housing projections and would like to retain developers building affordable units onsite rather than a move toward offsite fees. While some voiced support for expanding commercial linkage fees, others noted setting these fees too high may drive employers away.

- "I'm excited the City is intentional about building affordable housing, because the market by itself will keep driving the cost up. It's important to have a diverse community that we live in. For environmental reasons, it is important to live near work. Not just tech workers in Silicon Valley; service sector, government employees, and teachers also need to be able to live nearby."
- "One of my biggest concerns is that commercial linkage fees are not high enough, and the timing of commercial projects which can take a decade to plan and build. It doesn't actually get occupied by employees and affects RHNA numbers. The impact of job building won't be felt until well into RHNA cycle; which means we are not seeing real numbers. I'm worried about ADU production: how much is reasonable to expect from ADU production? There might be a surge in the beginning, but I'm unsure how sustainable that is over time."
- "The ADU program is kind of in disarray. I'm an ADU provider and do a lot of advertising in SMDJ, but I don't see demand for ADUs. If there are applications for ADUs, they tend to be for conversions of garages into ADUs. It seems there are a lot of discretionary items that still need clarification by City Council such as height requirements and other factors. Council needs to provide tools to the Planning Dept to educate public about ADUs and raise awareness. In San Mateo, they have point of sale matters or ordinance where if you do an addition or improvements of \$90k or more, you have to do a sewer lateral inspection... what that means is that they have all these requirements (impact fees, etc.) that make it harder for property owners to want to do ADUs. Also, below-market-rate housing requirements for new development (15%?) should be a lot higher for developers. It should be 20% or more because 15% is not enough, and I believe City Council would agree. I think there's an oligarchy that's been established in the City for so long, which is a reflection of all the initiatives (with Measure H that turned into Measure Y, and so forth.) The Housing Element needs to address this."
- "The existing programs are excellent as far as they go, but will continue to be insufficient for two reasons. (1) The graph shown in the original presentation which shows out of control job growth from 2010 to 2015. Until we can get a handle on job growth and tamp it down a little, we will continue to have this problem. (2) The market continues to push prices up, and affordability down. Until we get a handle on the job growth and turn things around, the great programs we have will be insufficient. In a sense, the private sector pushes the cost of housing onto the public."
- "A more sustainable form of construction is to reuse an existing building. I like efforts where organizations and their partners purchase existing buildings, renovate, and provide to people who

need lower cost housing. I'm concerned about the revision to policy where developers can contribute to a fund instead of actually building housing."

- "I'm concerned with the idea of tamping down job growth.... The only reason that people have equity and extreme value in their homes is the phenomenal job situation. Once those jobs and the companies leave, they are gone forever."
- "Having continued job growth will continue to make housing unaffordable. We take the good with the bad, and there's nothing we can do about it."
- "SB9, dubbed the duplex initiative, is starting at 2022. I would like to see workshops that addresses SB9, which would open up housing."
- "Are there any renter protection measures that the City has in place, besides the County and the State, now that eviction protections (from COVID-19) have sunsetted? Is the City doing anything now to help renters who may no longer be able to pay their rent?"
- "We need to examine what size units developers are proposing; because we need variety. There is a need for 3-bedroom below-market-rate units in San Mateo, which is rare to see here. Developer incentives are not clearly defined. I'm constantly asking: what would be an appropriate public benefit? We need variety of units and at least some should be accessible to those with mobility challenges or mental disabilities. I live in North Central and see the effect of too many people living in one housing unit parking and trash impacts."
- "We need to address Missing Middle, which might be a good solution for people trying to purchase a home. Not everyone needs a single-family residence, which was the gold standard a while ago, but folks now are open to more dense options that provide housing. The appetite in the City of San Mateo might be more amendable to the missing middle densities. We need all types of housing: which means densifying Transit Oriented Districts and certain parts of the City that make sense. There will be some neighbors who are against higher density, so maybe the missing middle and SB 9 is the appropriate baby step. My perspective is that of a former real estate developer. Developers are incentivized by fee reductions. We should consider perhaps if more affordable units are provided, then the more some impact fees can be reduced. The City can push on market rate developers, who are making so much money right now in this time. Do not be afraid; no reason to not push envelope on affordable units. We need renter protection: there is so much displacement at all levels of the income spectrum in San Mateo. How do we help people stay, especially people who have been born and raised here, but can no longer can? Oftentimes it is children of families who grew up here. How do we help with displacement?"
- "Getting foot into home buying is difficult; we need education on how for our community. There is RHNA pressure. If you build 3-bedroom unit, do you get credit for 3 units? Current housing production

does not support trades people who need space. We need to provide housing that supports these types of jobs. More and more people are going to work out of home."

- "I'm interested in Missing Middle. We need more focus on quality, not just quantity. Need high quality design in order to put Missing Middle housing in single-family neighborhoods or any neighborhoods.
 We need high quality design that is contextual and matches the neighborhood."
- "The Missing Middle is is the element that is needed to blend everything that has been discussed: including keeping trades workers close to where people work, Transit Oriented Development, and firsttime home buyers. Its important to include faith leaders in community, which can be accomplished by adding residential to churches. The same concept can work with schools. Many doors can be opened up with the Missing Middle concept, which can allow people to live near where they work."

Group Five Discussion:

Community members in group five would like the City to: expand the first-time homebuyer program; invest more in upgrading existing buildings, increase density and mixed uses around transit hubs, increase the commercial linkage fee, strengthen tenant protections. There was also interest in expanding the 15% below-market-rate program and to target it toward deeper affordability levels. There was also a suggestion to develop a program to require rental site managers to take an online housing regulations class/test.

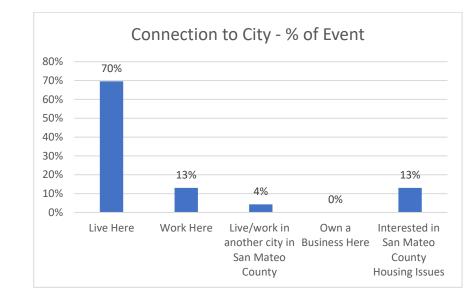

- "I'm proud of redevelopment commitment that exists in San Mateo. The inclusionary program is pretty good and the commercial linkage fee is a great start. The City is also very good about identifying publicly owned sites and prioritizing them for affordable housing development/redevelopment."
- "I'm happy that the Kiku crossing affordable housing development has come to fruition. We are seeing multi generations living in small quarters originally designed for a small number of people. We would like for older first-time homeowner properties to be upgraded for today's environments and add to more affordable housing on properties. Additionally, we need an expansion of the first-time homebuyer program. The Gateway housing development has a park behind us, and it is not built or utilized to its full potential and not usable by the neighborhood, unlike King's park. This is an area the City can invest more money to rebuild and upgrade existing buildings and enhance existing facilities. I would prefer for more first-time homeowner properties rather than rentals. More common spaces in multi-unit developments is desired."
- "I like mixed use zoning and building around transit hubs. Affordable housing is important: personally I am a household of 4 on the cusp of lower income. When we had to move out of the home we were renting, we took a look at affordable housing and we were still priced out. Affordable housing doesn't feel affordable. This is why there are multiple generations in small units contributes to parking issues/impacts. We are always going to be renters and will eventually have to move out because

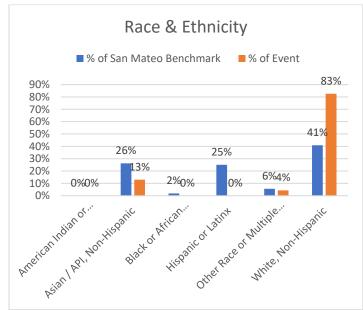

ownership will never be an option for us. Affordable housing is a major challenge for the City to address."

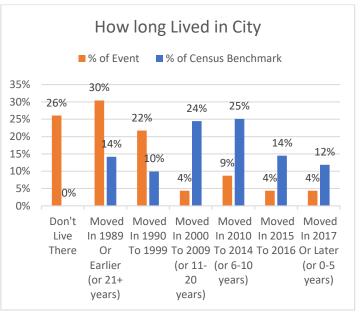

- "It feels like 15% BMR rate is an arbitrary number that does not actually meet the needs of the people to retain our young families and seniors. We need to study what the actual percentage of affordable units we need and explore revisiting this percentage."
- "I'd like to see more events on B Street. There was a past event where City Council came before COVID.
 Seeing the street activated and people participate was great. I would like more events like that...
 maybe a farmers' market? We need different types of events that brings the community together. I
 would also like to see more European flat style houses instead of (or rather than just) townhomes."
- "I'd want to increase the commercial linkage fee. We need better regulations for rental properties to include better restrictions on why and when people have to move out. With more renter protection/safety nets, we can reduce homelessness."
- "I like the idea about looking out and building for special needs populations. We need to be very specific and deliberative about sites. How much does the City use overlay zones for family/special needs affordable housing/something with services? Is it appropriate to use housing overlay sites for El Camino Real? It would be great if properties along El Camino Real being redeveloped are required to have affordable housing and not market rate units (or a larger percentage of BMR units over the 15%) through an overlay. One thing that Sonoma County does is that they require a site manager for rentals take and pass an online test for verification and so that they are aware of housing rules/regulations. This has cut down their legal claims by 80%. Let's all know the basic rules so we can be fairer to each other. Looking at these programs in addition to zoning/landuse will be helpful/effective for tenants."
- "I've observed regarding the option for missing middle...From a practical standpoint that's already
 what is occurring in North Central. There are quite a bit of duplexes and three unit townhomes being
 added to the area. One thing that I would note especially for our neighborhood is that I agree with
 ideal of getting more cars off of the road. However, I work at a part of the county where transit is not
 an option. Most of my neighbors are service workers with their livelihoods tied to their vehicles. We
 are in an in-between state where we still have to provide for parking while we are trying to transition
 away for that. It's a hard place to be."
- "Fair housing is really important for San Mateo to address. We tried to address tenant protection through the voting process which did not pass. Tenant protections and accessibility are essential issues. I would like for the City to reduce auto use through programs and incentives. During the pandemic I could cross El Camino Real against the light because there was so little traffic. That is all gone now. We need incentives to reduce auto use and get back closer to nature. I would also really want to know if the 15% BMR is going to get us where we need to be for people who are living in the City and would like to stay."

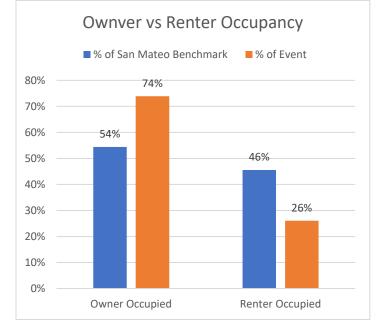

Results of a poll conducted during the workshop:

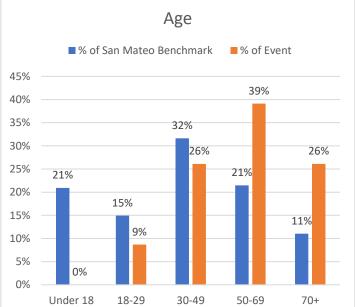

City of San Mateo Housing Policies Workshop November 2nd, 2021

COMMUNITY RELATIONS COMMISSION – SEPTEMBER 29, 2021 – COMMUNITY NEEDS AND HOUSING NEEDS WORKSHOP SPEAKER NOTES

CRC 9/29/2021 - meeting notes

Speaker notes (in order of speaker):

1. A staff representative from HIP Housing, a Home sharing program: HIP Housing is celebrating their 50th Anniversary and their archives show housing challenges from 20-30 years ago that are still relevant today. It takes a variety of housing choices to address housing needs, which the Home Sharing program provides. About 30% of Home Share matches in their program are in San Mateo. About 50% of home share seekers state that their reason for using the program was that the client needed a place to stay near family or caregivers. The coronavirus pandemic posed additional challenges due to loss of income and home owners used Home Sharing as a way to keep their housing costs below 30% of their monthly income. Most of Home Share owners were in the older age group (90 yrs +). They hope home sharing can remain a housing program of San Mateo.

2. A staff representative from Mid-Pen Housing, an affordable housing developer: Mid Pen is breaking ground soon on Downtown affordable housing project (Kiku Crossing) which has 225 affordable housing units. Mid-Pen operates three properties in the city and there are approximately 18,000 people on the wait list in the County. There are approximately 25,000 low-income people in the County who do not have access to housing. Studies have shown that the high housing costs have disproportionately affected people of color. Historically, resources have not been shared equally; affordable housing can and should be in San Mateo's future.

3. A staff representative from Housing Choice: There are 817 residents in San Mateo with developmental disabilities and many live with their parents due to lack of housing. The best way to address this need is to use CDBG funds to incentivize developers to include units for people with severe disabilities. Cities can grant additional points for housing or services in developments for people with developmental disabilities.

4. A regional center client of Housing Choice: Speaking as a representative of someone with developmental disabilities, the city has a hammer to make developers build affordable housing and should use it wisely and firmly. Cities need to ask the following questions: 1) If there are \$5,000/month units, why not have 1-2 units for \$1,000-2,000/month? 2) Where are people supposed to park? His place has a fire hydrant in front of the building, so there is no ability for handicapped parking or loading zone for residents/people with disabilities.

SAN MATEO COUNTYWIDE HOUSING ELEMENTS LISTENING SESSIONS - SUMMARY NOTES

MEETING SUMMARY

Countywide Stakeholder Listening Session #1: Fair Housing

9/27/2021, 1-2:30 pm on Zoom

Overview

On September 27, 2021, 21 Elements hosted the first of four housing element stakeholder listening session with several organizations focused on fair housing issues. Presenters, resources and details on what we heard follow.

Key themes included:

- Concern about the upcoming end of the eviction moratorium
- The importance of transit-oriented affordable housing and stronger anti-displacement policies
- The need for more education around accessibility regulations and reasonable accommodation
- The ability of jurisdictions to use their platform (including jurisdiction websites) to promote education and resources for tenants and landlords.

Policies & Programs to consider:

- More funding for subsidized affordable housing near transit or good access to transit
- Stronger just cause protections
- Rent stabilization and rent registries as a tool
- Tenant and community first right of purchase or right of first refusal (TOPA and COPA)
- Creation of more ADUs and program to increase access for lower-income people

Stakeholder Presenters & Additional Resources

Jurisdictions in Attendance

Millbrae	San Mateo (County)
Pacifica	South San Francisco
Portola Valley	Woodside
Redwood City	
San Bruno	California Department of
San Carlos	Housing and Community
San Mateo (City)	Development (HCD)
	Pacifica Portola Valley Redwood City San Bruno San Carlos

Key Themes and Actions

- Eviction Moratorium: There was widespread concern about what will happen when the California eviction moratorium ends on October 1, 2021. Just Cause eviction ordinances and Covid rent relief (especially for back rent) have been important to keep people in their homes. CLSEPA shared a flyer after the session with a summary of renters' rights and resources.
- **Vulnerable Populations:** The stakeholder groups shared several details about the housing needs of the most vulnerable populations.
 - People with disabilities experience the most housing discrimination. Legal assistance organizations get the most calls regarding discrimination against people with and find it is the most misunderstood category.
 - Displacement disproportionately affects Latinx, African American/Black households and families with children.
 - Many or most evictions are no-fault evictions, *not* resulting from a failure to pay rent.
- Anti-Displacement Policies: Jurisdictions were curious about which anti-displacement policies were favored by the stakeholder groups.
 - Affordable housing: More subsidized affordable housing is needed. Stakeholders noted that it is key to locate affordable housing in places located on transit or with good access to transit.
 - Just Cause protections, rent stabilization: While there are some baseline protections at the state level, they need to be strengthened. The rent gauging gap does not go far enough to protect lower-income households.
 - **TOPA and COPA**: Currently, there is significant interest in Tenant and Community Opportunity to Purchase Act policies that give tenants and nonprofits a first right to purchase or a right of first refusal when a property goes on the market.

- **Rent registries**: Stakeholders noted that a rental registry is important in order to obtain data that can be used to inform anti-displacement policies, but it is not an anti-displacement policy on its own.
- Section 8 vouchers: Stakeholders noted that while vouchers can provide opportunities for lower-income households to live or remain in the county, there are not enough vouchers to meet the need. In addition, vouchers have resulted in some concentration of low-income households in areas with less economic and educational opportunity.
- Accessory dwelling units: ADUs are a great housing solution in the suburbs, as they
 provide suburb-appropriate density along with a good quality of life and provide more
 affordable options without requiring subsidy.
- Accessibility: Cities' housing elements typically only have the minimum standard/generic language for accessibility. Some of the participating jurisdictions indicated an interest in doing more and are looking for examples of cities going beyond what is required.
 - Cities should be prominently promoting organizations working with tenants. City websites get the most visibility out of any form of advertisement/media
 - Jurisdictions were very interested in data that quantifies the existing supply of accessible housing and the demand for accessible housing.
 - Stakeholders suggested that affordability and accessibility must be considered together.
 - Transit-friendly locations are key for people with disabilities.
 - Stakeholders noted that "visitability" policies making sure homes allow for access to those who are visiting – are less common today and should be considered. Consider requiring some degree of accessibility and visitability in new homes.
 - Lack of accessibility requirements for new townhomes were a point of concern.
- **Reasonable Accommodation:** The speakers indicated that there is widespread confusion about the meaning of reasonable accommodation. They shared ideas that could help educate residents and landlords.
 - Building departments should be posting reasonable accommodations policies.
 - Education for and outreach to apartment managers, property owners and homeowner associations is needed.

• Ideas for Action:

- Perform an audit of each jurisdiction website for reasonable accommodation policies.
- Improve jurisdiction websites to give a more prominent platform to organizations that work with tenants on fair housing issues.
- Create a program to rent ADUs to people who need housing (run by HIP Housing?).
- Look at SB 9 and how it may increase the # of duplexes (will they be accessible?).
- Identify cities that go beyond the standard accessibility language in housing elements.
- Find data that quantifies the need for accessible housing (and the existing supply).

Appendix: Raw Notes

Room 1 (Josh) Notes:

Ben McMullan – CIID

- 1. Areas that can use work
- 2. Inaccessible new house Many are built in town homes. There is a lack of visibility. No ground floor restroom. One bedroom on ground floor.
 - a. Restroom on ground floor
 - b. Access to kitchen
- 3. All new construction be accessible and visitable
- 4. Encourage more ADUs
- 5. Funding for home repairs for people with disability
- 6. Affordability
- 7. Mary to circle back with best practices for policies
 - a. Report on where there are systemic violations
- 8. Education on reasonable accommodation for cities and apartment managers
 - a. Require they take localized training

Ann Marquart – Project Sentinel

- 1. Tenant landlord
- 2. Mediation
- 3. Special emphasis
- 4. More visibility for fair housing
- 5. Make it clear how to make it more visible
- 6. Post reasonable accommodation
- 7. Most complaints about discrimination of disability
- 8. Reforms coming to service/companion animals rules
- 9. Companion animals have same civil rights protections
- 10. Many property owners do not understand laws
- 11. The lack of affordable housing
- 12. People are very worried about Oct 1 and after emergency rental restrictions end
- 13. Biggest issue with reasonable accommodation landlords

Shirley – Legal Aid

- 1. Eviction data from Legal Aid and EPA Legal Aid are based on that data
- 2. Black, Hispanic and families with children are the most hard-hit
- 3. It's not a crisis of nonpayment, it is many no-fault evictions
 - a. Even more disproportionately hitting black, Hispanic and children
- 4. Had the benefit of expanded just cause for 18 months. Been helpful.

- 5. Goals strengthen no fault protections
- 6. "We don't need data to figure out if there is a problem. We know there is a problem"
- 7. Rent registry does not prevent displacement, but data is useful, and as part of that lets get data about displacement
- 8. Covid rules did not cause the sky to fall
- 9. There are hotspots about how to use vouchers, there has been limited areas where vouchers getting used
 - a. But many of these are not in areas of opportunities
- 10. Time limited vouchers less useful
- 11. Make sure there are not group home discrimination
- 12. Post reasonable accommodation clearly

Michele – CLESPA

- 1. Just cause protections. They help tenants and inform tenants
- 2. Better rent stabilization
- 3. COPA/TOPA Help displacement

Room 2 (Kristy) Notes:

- Ben McMullan Center for Independence of Individuals with Disabilities
 - Advocate with housing, also look at transportation and health care issues
 - o Biggest issues: Lack of affordable, accessible housing
 - Like to encourage affordable housing
 - o On transit lines, near transit
 - Q from Nancy with more power shutoffs, fire evacuation, etc. happening these days, for units not on the 1st floor, how is that being addressed?
 - PSPS (Public Safety Power Shutoff) program where help distribute backup power packs for people dependent on power
- Ann Marquart Project Sentinel
 - More affordable housing
 - Disability is the protected category that they get the most calls about, and is the most misunderstood
 - Want housing next to transportation
 - Protected categories
 - Race
 - National origin
 - Gender
 - Families
 - Section 8 (NEW)
 - There is now fair housing protection for Section 8
 - But concern is that there are not enough certificates to go around, years of waiting lists, etc.

- Criminal history (is a little different)
- Q from Jennifer Rose: would be beneficial to all of the cities if you came up with collective wish-list of actions! Funding, help with promotion, policies, etc.
 - Ann: Promote fair housing groups in big letters on a lot of city websites, give agencies a bigger platform
 - For example, for first-time homebuyer training in San Jose, the only promotion was a notice on the city's website, and it became clear that people go to city websites for information! Distributing flyers, holding zoom workshops - can only go so far, reach some people.
 - Suggestion: "How can we promote project sentinel"
 - HIP housing helped write language in last housing element (?)
- Mary Prem Housing Equality Law Project
 - Full service
 - Focused on unserved or underserved areas
 - Investigate complaints
 - Counsel tenants
 - Accessible housing
 - Not just accessibility but visitability
 - New construction (townhomes)
 - Housing solutions for people seeking reentry
 - Worked with SF city and human rights commission on "unchecking the box"
 - Add more ADUs
 - housing is such a scarcity
 - More affordable solution
 - Greater life experience for people living in suburbs, not as dense
 - o Really important that accessible housing is located near transit
- MIchelle Trejo-Saldivar Community Legal Services of East Palo Alto (CLSEPA)
 - San Mateo County, plus Mountain View
 - Especially serve low income, very low income, LatinX
 - Housing needs: stronger rent stabilization policies, just cause protections
 - There is a state just cause and rent control, but there is a need for stronger policies
 - TOPA and COPA policies, other anti-displacement policies
 - Low income populations know where they will find affordable housing and where they will not: Recommendation jurisdictions take a look at where LI and VLI people live - they should only be paying 30% of income - where should we be pushing more affordable housing development
- Shirley Glbson Legal Aid of San Mateo County
 - Similar mission and population served as CLSEPA
 - But only San Mateo County
 - The 2 organizations share information across 2 organizations (Tableau), lots of data at fingertips

- Why are these policies necessary from fair housing standpoint
 - Displacement falls squarely and disproportionately on Black and Latinx households, households with children
 - Disproportionality is even bigger when you look at no-fault termination evictions (*not* failure to pay rent)
- Biggest barriers to housing choice?
 - We heavily rely on housing choice vouchers unfortunately have managed to isolate and concentrate those tenants in areas of low economic and educational opportunity
 - We must take take areality check: time-limited vouchers that transition people from homelessness to permanent opportunity are not working. It's a revolving door because there isn't enough time to stabilize households
 - Look at how housing vouchers are administered and distributed
- Note that while a rent registry is an interesting source of data, and it is great to have more info, it is NOT a anti-displacement policy in itself. Can use the data (which is better if you require data from landlords) to inform and structure more robust antidisplacement policies: looking at turnover, tenancy, how often, why

Room 3 (Vu-Bang) Notes:

- Mary Prem, Housing Equality Law Project
 - Visitable housing units with accessibility on the ground floor unless there's an elevator to other floors
 - Serve areas that are deemed unserved, areas not covered by fair housing
 - Investigate fair housing complaints
 - Training housing providers for more affordable housing
 - Collaborate with UC Berkeley race studies in high school
 - City of SF- unchecking the box re-entry housing programs, previously incardinated
 - Reasonable accommodations denial and other accessibility issues are most common work
 - New construction, esp around transportation hub housing that's in townhome and not "visitable" (no toilet in common area, no elevators)
 - Affordability and availability biggest concern ADU units encouraged
 - Topic brought up with jurisdictions but haven't seen adopted
 - Affordability and availability for housing
 - Congestion on highways and accessibility in hubs
- Michelle Trejo-Salvidar
 - \circ Just Cause protections provide tenants with their rights when tenant gets notice
- Shirley Gibson
 - Be wary of full scale models of Just Cause can pick and choose from model ordinances to shore up the weak Just Cause ordinances
- Ann Marquart, Project Sentinel

- Disability and familial status got the most complaints reasonable modifications, can go to CID to pay for modifications, VA will pay for some of those repairs. Reasonable Accommodations - companion/service animals (anyone giving the certificate now has to note how many hours of therapy), different parking space, reminder to pay the rent,
- Policies: wishlist something to project tenants after the moratoriums and now focused on back rents
- Something (not rent control) new housing near transportation
- Education getting word out to housing providers, raise Project Sentinel to larger visibility so people can find them
- What cities have the best visibility to Project Sentinel will follow up.
- Section 8 renters no discrimination
- Landlord should not evict everyone in the household after domestic disturbances
- Ben Mcmullan
 - Systems change for Center for Independence of Individuals with Disabilities
 - San Bruno, SSF, County offices
 - Visitability wheelchair and mobility devices can adequately visit. Not many obstacles on different levels - Home Modification Program that people can take advantage of. Having new housing be accessible from the get-go
 - Plug for transit oriented housing people with disabilities face needing housing and transit.
 - Explore transit oriented housing vastly great step forward
 - Paratransit coordinating chair on SamTrans and CalTrain accessibility advisory committee
 - Biggest barriers to housing for vulnerable households affordable and accessible housing. If it's affordable and not accessible, it only goes so far, and vice versa.
- Burlingame has standard language on accessibility want to know what language to use to go above and beyond. Townhouse units esp have concerns with. Set up well for TOD, but linking TOD + Accessibility + Affordability . SB9 - two flats or 2 townhouses preferred when it comes to accessibility.
- Hillsborough language is generic, actual implementation only on ADUs, but predominantly single family housing. Transportation corridor only on El Camino Real and ½ mile from Burlingame Caltrain station.
- Jan (HCC): Physical accessibility is not the only type of accessibility barrier--I am thinking of people with cognitive disabilities--they shouldn't be left out of the discussion.

MEETING SUMMARY

Countywide Stakeholder Listening Session #2: Housing Advocates

10/18/2021, 1-2:30 pm on Zoom

Overview

On October 18, 2021, 21 Elements hosted the second of four housing element stakeholder listening sessions with housing advocacy organizations. A majority of 21 E jurisdictions attended the listening session. Five stakeholder advocate groups introduced themselves and spoke about their group's interest in the Housing Element process. Detailed information about speakers and attending jurisdictions is below and in the appendix.

Key themes included:

- Ongoing outreach needed to underserved and diverse communities
- Production of new housing is critical to the SMC workforce
 - Greatest need for deeply affordable housing, dense, infill
- Connecting labor, environment and equity to housing
- Rent increases are a primary concern
- Protecting vulnerable renting populations with assistance from the governments

Policies & Programs to consider:

- Additional funding for affordable housing through commercial linkage fees, inclusionary zoning, vacancy tax, sales tax, etc.
- Protections: eviction assistance, anti-harassment measures, stronger just cause, tenant right-to return, relocation assistance, improvements to the building inspection process, rental registries as a tool
- Production: Increase density within existing communities in non-high fire severity zones, eliminating harmful restrictions on density, eliminating parking minimums, streamlining housing building process, fair and inclusive zoning policies
- Prioritize BIPOC families in housing policies, outreach and practice (all stages of the practices)
- Manage the threat of climate risk by adding green infrastructure.

Learn more about Greenbelt Alliance's Resilience Playbook: <u>https://www.greenbelt.org/resilience-playbook/</u>

Full list of Greenbelt Climate Policies can be found in the draft housing element playbook (under policies tab) <u>https://coda.io/@gazoe-siegel/housing-element-toolkit</u>

For those who wish to learn more about the focus groups in Redwood City that Trinidad from Faith in Action mentioned,, you can read the report here (posted on the City of Redwood City website): https://www.redwoodcity.org/home/showpublisheddocument/23755/637623096709130000

Faith in Action supported with two other reports (tenant protections and preservation), found here: <u>https://www.redwoodcity.org/departments/city-manager/housing-services/housing-policies/anti-displacement-strategic-plan</u>

Note Faith in Action works mostly with renter leaders in Daly City, San Mateo and Redwood City, but they have a presence in several other cities in the county as well.

Jurisdictions in Attendance:

Atherton Brisbane Burlingame Daly City East Palo Alto Foster City Half Moon Bay Menlo Park Millbrae Pacifica Redwood City San Bruno San Mateo (City) San Mateo (County) South San Francisco Woodside

+HCD

Key Themes and Actions:

Themes

- Ongoing outreach needed to underserved and diverse communities
- Production of new housing is critical to the SMC workforce
 - Greatest need for deeply affordable housing, dense, infill
- Connecting labor, environment and equity to housing
- Rent increases is a primary concern
- Protecting vulnerable renting populations with assistance from the governments
 - Rental registries, eviction assistance, section 8 availability, anti-harassment measures.

Questions/Discussion

- How do you best balance providing adequate living wages for construction workers with keeping housing units affordable?
 - Fair labor is critical to the building process
- Who should operate rental registries (city, county, nonprofit?)
 - Administered by RWC city staff
- Potential policies prioritizing BIPOC
 - o Understand needs of BIPOC communities throughout the process
 - o Understand displacement policies
 - More housing in transit rich corridors
- Section 8 Vouchers
 - How to increase the availability
- Housing as a benefit to the community/not extracting from it

Appendix: Additional Stakeholder Information & Input

- Housing Leadership Council: Angela Solis
 - Network of organizers to support affordable housing
 - Advocating for and preserving affordable housing
 - Greatest need:
 - Deeply affordable homes
 - Focused on funding for affordable homes with example policies:
 - Commercial linkage fees
 - IZ, vacancy tax, sales tax, etc.
 - Seeking greater outreach from jxs for Housing Element process- window into populations

• Faith in Action Bay Area: Trinidad Villagomez

- Focus in Redwood City
- Community organizers, leaders working in congregations schools, neighborhoods and apartments across SMC to uphold dignity of all people
- Listening to community experiences with housing (phone calls, door knocking, church involvement, people at food distribution sites)
- What the group heard from the community:
 - Poor building conditions, harassment, discimination, rent increases, fear to speak to authorities, difficulty relocated, evictions for renovations and owner move in, unclear how to enforce existing rental rights, pandemic insecurity, rental debt, financial hardship, credit limitations, application fees
- From focus groups:
 - Rent increase is the majority primary issue
- Vision:
 - Regulations on eviction due to renovations
 - Preventing harassment of tenants
 - Partnership with city to work with tenants and landlords as a mediator
 - City to inspect buildings
 - Rental assistance
 - Process relocation assistance
 - Report rent increases, eviction notices, their business license and taxes
 - Education for tenant about rights
- Policies:
 - Stronger just cause policy (define substantial renovation) and give tenants right to return (right of first refusal)
 - Stronger relocation assistance administered by the city
 - Improvements to the building inspection process, with greater confidentiality with the tenant
 - Rental registry program by city-tenant/landlord office
 - Anti-harassment policy

More information:

https://www.redwoodcity.org/home/showpublisheddocument/23755/6376230 96709130000

• Greenbelt Alliance: Zoe Siegel

- Inclusive, climate resilient communities for all to thrive
- Housing and climate are linked
- Advocating for climate smart development
 - SMART: Sustainable, Mixed, Affordable, Resilient, Transit-Oriented development
 - Resilience Playbook
 - Resources for local decision-makers and community leaders with policies, model ordinances, etc.
- Ensure fair and inclusive zoning policies that makes housing accessible to everyone
 - Prioritize BIPOC families in housing policies, outreach and practice (all stages of the practices)
 - Advance racial and social equity in process
- Increase density within existing communities in non-high fire severity zones
- Manage the threat of climate risk by adding green infrastructure.
 - Prepare for climate impacts, require nature-based solutions for climate resilience

• San Mateo County Labor Council: Richard Hedges

- Advocate for increased outreach
- Increases for min. wage, building of housing for all workers (safe and affordable)
- Builders: getting the work/pay required to live in San Mateo County (can afford to rent/own home)
 - Service workers are struggling to live in SMC (especially retail pay)
- Advocated for housing built at Bay Meadows, advocated for 10% inclusive
- State law to allow for more density for affordable housing
- Qualified workforce is critical
- Removing barriers for Section 8 voucher holders

• Peninsula for Everyone: Jordan Grimes

- Frustration with lack of dense infill housing in SMC
- Member engage in local project advocacy, and planning meetings and are politically active at the local and state level
- Huge housing shortage in the county, decades of underbuilding
- Focus on as much being built as quickly as possible
- 3 Ps of housing policy, preservation, production, protection (interested in rental registries, want more rent data)
 - Protection: Rent control, right to counsel with the eviction process
 - Production: eliminating harmful restriction on density, parking min, streamlining housing building process

MEETING SUMMARY

Countywide Stakeholder Listening Session #3: Builders/Developers

11/1/2021, 1-2:30 pm on Zoom

Overview

On September 27, 2021, 21 Elements hosted the third of four housing element stakeholder listening sessions with housing developers and builders, including both affordable housing developers and market-rate housing developers. Detailed information about speakers and attending jurisdictions is below.

Key themes for affordable housing development included:

- Primary constraints to affordable housing include: the limits of local funding, tax credit availability (the county's pool is small, limiting the size of a development that could get an award), appropriate sites
- Key policies and programs: sufficient and flexible local funding; either public land or land that is eligible for SB 35; streamlined process and alignment across city departments
- Local governments should be aware of state and tax credit policies/requirements; be cognizant of the cumulative impacts of multiple layers of funding requirements; be prepared for community pushback now that high-resource areas are being targeted

Key themes for market-rate housing development included:

- Primary constraints include competition for sites (with other uses) which drives up land costs; construction costs; city process and zoning; all the "easy" sites have already been developed, leaving sites with environmental or political (close to single-family homes) or other sensitivities
- Key policies and programs: Specific plans and master plans and form-based zoning have been successful; removing CEQA from the equation is helpful; seek a balance of flexibility and predictability
- Localities should exercise caution with parking and ground-floor commercial requirements
- Property tax exemption is likely best tool for encouraging moderate/middle income housing created by the market

Roundtable Discussion Questions/Answers

Affordable Housing Developers

- 1. What do you perceive are the primary constraints on affordable housing development?
 - \circ $\;$ Local funding esp since state housing laws have helped on the land use side
 - Having funding programs that actually match the supply side/building of the homes
 - Local Funding and Operating Subsidy
 - Current cap in the 9% tax credit round (in last several rounds, not many projects going in because not enough credits in the region) – only projects with fewer than 60 units, plus high costs
 - On preservation side have to be agile and fast, if cities want to do this, they need to have systems to deal with tight escrow periods
 - Appropriate sites
- 2. Are long lead (escrow) times possible in the property market today?
 - Sellers are amenable to longer lead times than pre-covid, though Peninsula is still tight
 - \circ $\;$ What's key is having a good read on public partners' funding commitment
 - For every site where factors line up, you lose a site because other things don't line up
 - You can tie it up to close upon entitlements, but carrying cost adds up, so if public commitment can come in earlier that helps reduce cost
- 3. What are new policies or improved policies that you think would go farthest to making it easier to develop affordable housing?
 - Local Funding and Operating Subsidy, esp flexible funding
 - o 20% setaside dedicated to homeownership programs-
 - Fee waivers
 - o Streamlined project timelines on the city's side
 - Consistent, regular NOFA timelines
 - Having all departments aligned on goals
 - Not having extra requirements/costs for affordable housing developments
 - Affordable housing should not bear burden for infrastructure costs
 - Remove restrictive racial covenants
 - More policies like SB 9 and 10
 - Update zoning of sites that were zoned in the 1960s
 - Resources for site analysis, more points awarded when possible to incentivize and also help with by right potentially
- 4. What would you say are the 3 most important things that jurisdictions can provide in order to facilitate affordable housing development in their jurisdiction?
 - Local Funding and Operating Subsidy
 - Shift unused resources (downpayment assistance for example) to production allocation for more housing or land purchases
 - Nimble funding sources
 - Affordable homeownership
 - Land with appropriate zoning

- Public land, esp in high resource areas (<u>https://belonging.berkeley.edu/2021-</u> tcac-opportunity-map)
- Making more land available with by right zoning or SB35
- Or priority zoning for affordable San Jose allowing affordable housing to convert industrially zoned land
- o Process
 - Streamlining and alignment across city Departments
 - Dedicated planner to shepherd affordable housing projects
- I'd like to encourage jurisdictions to think outside the box and find ways to encourage partnerships between for and nonprofit developers. HIP Housing has had several great experience on projects using diverted impact fees and limited partnerships.
- 5. What should jurisdictions be aware of as they designate sites for affordable housing?
 - Think about how state funding sources/developers are looking at sites. "Vanilla" Aff family is gone unless in high resource areas so need operating subsidy. Sites need to be in amenity rich area (put site through amenity scoring lens)
 - Operating subsidies needed to support the deeper affordability that is sought today
 - Layering of requirements and compatibility of different populations
 - Think about not just # of units but also # of people being served
 - A comprehensive view of constraints, impacts of delays on developers
 - Be prepared for pushback in high resource areas
 - We need more ownership, multifamily sites should be funded and counted by # of people served, not just # of doors; make residential "only" or limit commercial so can residential compete
- 6. Most of the Cities I consult for are small and do not have the capacity or expertise to shepherd affordable projects. What can you recommend otherwise?
 - Important who the city chooses to partner with. Experienced developers can do some education on that. Hire a consultant or someone who can help to navigate the process
 - Small cities are sometimes great because they don't have as much bureaucracy and can get things done more quickly
 - Smaller cities could look to partner with Developers who build under 20 units (like Habitat and others on this call) and we welcome the opportunity to learn together. P.S. It's hard to make it work financially if there are under 6 units however:)
- 7. What is your experience with rolling NOFAs (no deadline) versus NOFAs that have a fixed deadline for responses? Are there particular advantages or disadvantages to either one of these?
 - Affordable developers rely on consistent, regular process
 - Don't create a land rush and have affordable developers bid up land
 - \circ Like rolling deadlines, since in the preservation world, can't wait until a NOFA
 - No deadlines better align with development
 - Rolling NOFA's are good, allow for flexibility to be responsive
 - If you really need to schedule it, make sure NOFA schedules coincide with other funding sources

- 8. Would you have advice for jurisdictions with a lot of environmental constraints that can make housing expensive--faults, steep slopes, limited sewer, fire hazard, etc.?
 - Often they aren't as bad as you might initially think. A second look can make something workable
 - All the easy land has been developed on already! So don't hold back, this is the norm, not the exception
 - There are sometimes sources for brownfield funding
- 9. What is the densities that are working best for 100% affordable projects that cities should be planning for in the Housing Element process?
 - Anything over 20 duac but 30-50 is better, gives more flexibility
- 10. What site criteria make a site feasible for securing tax credits?
 - High resource area (amenity rich)
 - Site logistics (e.g. flat site, sufficient size)
 - No need to build out infrastructure
- 11. Do you have a "rule of thumb" for how much local subsidy you are looking for in order to make an affordable housing development "pencil"? Do you typically need to secure County funds for the project as well as city funds and/ or land?
 - o 100-300K per home
 - 30% local subsidy. Typically need county, city funding and land but depends on project specifics
- 12. Do you have any advice as jurisdictions release NOFAs/prioritize their affordable housing trust funds?
 - Put more money in production! Support ownership programs, modify program to accommodate and understand their impacts
 - Family housing that can compete (e.g. high resource area)
 - Senior housing at lower AMI's
 - Operating Subsidies that aren't a COSR (e.g. LOSP) to serve homeless/ELI
- 13. From your experience in responding to site-specific RFPs, what would you say makes for a good RFP that you would be super excited to respond to?
 - Large sites
 - Sites with good logistics
 - Consider RFQ's instead of RFP's

Market-Rate Housing Developers

- 1. What do you perceive are the primary constraints on market-rate housing development?
 - Competing with other land uses in acquisitions life science and industrial and certain commercial driving more value
 - City constraints
 - Construction costs
 - All the easy sites are gone. Now they're politically sensitive, closer to single-family neighborhoods

- 2. What are new policies or improved policies that you think would go farthest to making it easier to develop infill housing?
 - Clear paths to entitlements would help
 - o Specific plans and master plans are great, CEQA document, design standards
 - o Other paths that remove CEQA from the equation
 - Would be a mistake to only think about high density residential, need to think about housing of all shapes and sizes (SB 9, ADUs, duplexes)
- 3. Which jurisdictions are doing a good job? (Answers were mostly about specific plans)
 - Redwood City
 - o Milpitas
 - Santa Clara County
 - City of Santa Clara
 - Oakland 4 specific plans
 - Burlingame's general plan
 - Caution that specific plan does take time, often falls behind schedule
 - San Mateo County's transit has a lot of potential
- 4. Conversely, what are some cities that took approaches you think didn't work out well and why?
 - A city that got very detailed in a specific plan, and it wasn't relevant to the market, so it sat for a very long time before the city realized they needed to adjust the specific plan
- 5. What would you say are the 3 most important things that jurisdictions can provide to facilitate more housing development in their jurisdiction?
 - Flexibility is key, but balance with predictability and consistent standards
 - Form-based zoning allows for evolution of details we talk in terms of density, but form-based zoning images make more sense to people
 - Resources
 - Streamlined processes
 - Restrictions on other competing uses
 - Partnerships with city departments that streamline and adhere to code standards and other standards
- 6. What should jurisdictions be aware of as they designate sites for multifamily housing?
 - Anticipate objections and set up ways to mitigate them
- 7. Is there a range of project densities or size that is your sweet spot?
 - $\circ \quad \text{Depends on location} \quad$
 - Depends on rents
 - Summerhill Type III over Type I garage, (5 stories wood over 2 stories concrete), 20-22 units to the acre – 3 story residential density
 - Densities are going down, because unit mix is changing, putting bigger units in them.
 Used to have a lot of studios and 1BRs, now making 2BRs and larger 1BRs
- 8. Questions on parking. Are you finding car stackers practical for your developments?
 - Yes starting to do this in the right locations (Core, Summerhill)
 - Not necessarily cheaper but allows you to use land more efficiently and not go underground

- Hard parking minimums can be problematic when it comes to site planning, so some flexibility on parking is key
- 1:1 parking ratio works near transit
- 9. Does this group see a lot of potential in SB 10? -- urban infill for up to 10 unit multi-family projects -- exempt from CEQA
 - Fan, there are possibilities, but we'll see how much it actually gets implemented
 - What's missing is the small scale developer (they've been zoned out), if SB 9 and 10 can spawn that ecosystem, it can make a difference. Right now the pool isn't deep enough, not enough to sustain a business. If a community wants them, they will need to cultivate these types of development and developers
- 10. How does developing mixed use developments affect housing? How does it affect competing land uses?
 - Summerhill has mixed-use projects with ground floor commercial that is not leased
 - What makes good retail is sometimes at direct odds with what makes for good unit plans above. Depth of retail etc. It is a challenge
 - Amount of retail, needs foot traffic, really depends on location. Only so much retail to go around
- 11. What are ways that you think jurisdictions could facilitate the development of moderate and middle income housing?
 - Projects with JPA programs
 - Property tax relief for moderate-income units
 - Once upon a time, market-rate housing delivered housing for middle income households, we just don't have a lot of housing opportunities. Restricting supply doesn't restrict demand. Allow more housing generally
 - Access to specialized loan products and property tax incentives would help with middle income housing

MEETING SUMMARY

Countywide Stakeholder Listening Session #4: Service Providers

11/15/2021, 1-2:30 pm on Zoom

Overview

On November 15, 2021, 21 Elements hosted the fourth of four housing element stakeholder listening sessions with San Mateo County service providers. Detailed information about speakers (see appendix for organizational information) and attending jurisdictions is below.

Key themes included:

- Key location characteristics were similar for most groups: access to transit, groceries, medical services, pharmacy, schools/parks/community centers/senior centers, jobs and job training.
- Most of these stakeholder groups serve people with a range of incomes focused primarily at the low end of the income spectrum but also into moderate levels.
- Need affordable housing (or access to vouchers/subsidies that help with access to market-rate housing) of all shapes and sizes: mostly smaller units (studios to 2BR) but there is a need for larger units. It is hard for larger families (5-8 people) to find appropriately sized housing. Space, closets and storage, design for people with disabilities. *See below for details.*
- Some people need onsite supportive services; others just need to be able to easily access services, whether by transit or if it can come to them.
- Work with service providers and people experiencing issues firsthand before creating programs.
- Use your networks and power to encourage business/tech/philanthropy to support service providers

Policies & Programs to consider:

- Actively partner with affordable housing developers to streamline and facilitate development
- Stabilize market rents
- Use public land for affordable housing
- Create more workforce housing.
- Increase inclusionary housing
- Encourage and facilitate more homesharing
- Educate landlords on their rights so they are more willing to partner with Housing First service providers

Roundtable Discussion Questions/Answers

- 1. We assume that transit-oriented or transit accessible housing is important. Are there any other location characteristics that you would highlight are important for the people you serve?
 - Mental Health Association access to transit, medical care, grocery stores, pharmacy
 - Daly City Partnership in Daly city all services are sited in the govt center by design, so housing should either be close to it or have direct transit access
 - Youth Leadership Institute parks within or near housing developments are important to young people, new community centers or access to existing ones, high walkability
 - HIP Housing agree with all mentioned, near schools for family housing, senior centers for senior housing
 - National Alliance on Mental Illness justice-informed community (people who have experience with law enforcement, ranging from a 5150 call or involuntary hold to being incarcerated in jail or prison system) need access to services

- Abode varies. Have some unique programs, sometimes relocate people out of the county. Medical, schools, childcare, transportation. Access to jobs/job training
- 2. What is the range of income levels of the population you serve?
 - Mental Health Association 0 to 15%
 - LifeMoves range from 0 to 100%
 - Daly City Partnership weighted to the lower end 0 to 30, 0 to 50%, a lot at 80% too but not as many
 - National Alliance on Mental Illness lower end, but mental illness spans people across the whole income spectrum
 - Abode serve the lowest incomes
- 3. What role does market-rate housing play for the people you serve? Are vouchers helping?
 - Mental Health Association for most clients, market-rate housing is out of reach, even affordable is also often out of reach (since it serves 40% to 120% AMI)
 - Ombudsman her clients in assisted living get a \$1500 check, rent is \$5000+, sometimes families or retirement funds make it work. Now facing a number of families who cannot help anymore because of lost jobs during the pandemic. 15 people on evictions list right now, many are 85+ years. If they are evicted they will end up on the streets. Looking for solutions for them. They don't take transportation, they can't
 - HIP Housing 95% of clients in homesharing program are at or below 80% of AMI, sometimes not low enough to access affordable housing. And some are on fixed income and don't qualify for affordable housing and don't make enough to access homesharing program. Waiting lists are way too long
 - Daly City Partnership see a lot of same types of people that Ombudsman sees, just a few years earlier, before they need assisted living. It's a tough spot to be aging in San Mateo County, unless you're healthy or living with your adult children. Think about dignity for our older folks. We need to care for our elders.
 - Abode do master leases, use vouchers, so existing and new market-rate housing plays an important role. Develop relationships with landlords that accept vouchers (provide case mgt/contact for landlords, help to avoid evictions). Important to educate landlords around their rights, not a lot of legal services available to them. Work with a range of landlord and building types.
- 4. Do affordable units need to be designed in a certain way or certain size to meet the needs of the people you serve?
 - Mental Health Association definitely need more units that are available for people with physical disabilities. Serve people with serious mental illness, HIV/AIDS debilitating conditions, etc. It used to be that they would die far younger than most, but now people are now living into 60s-70s-80s. This is great but long-term effects of medications have impact on their bodies, put them at greater risk for falls, etc. Mostly studios and 1BRs (preferred), closets and storage in the unit are critical
 - Youth Leadership Institute serve young people in Half Moon Bay they are seeing 3 HH living in one unit, looking to advocate for pathway to homeownership, also single family housing (3BR/2BA). Want as much space as possible, spacious living areas.

During pandemic school from home was incredibly challenging esp when community centers weren't open or limited. Also like ADA accessible, parking spaces, access to community parks, trails, since there are not a lot of things for young people to do; storage units and closets, public bathrooms in developments

- HIP Housing serve single individuals, families and seniors. Larger families get missed, families of 5-8 or larger can't find any affordable housing options. Some seniors would benefit from onsite services, during pandemic especially suffered from isolation
- LifeMoves serving more seniors every year, medically fragile folks in terms of families serve primarily smaller households of 2-3, but do have a few large HH too
- National Alliance on Mental Illness agree with many things mentioned above, add better noise insulation since clients may have experienced trauma and loud levels of noise can trigger them to the next episode
- Abode need all types of units
- 5. For the population you serve, if the cities were able to encourage a set-aside within affordable housing for special needs, who needs onsite supportive services? Who can live in general affordable housing (assuming deeper levels of affordability)?
 - Mental Health Association only 30% of people we serve need to have site-based services onsite, but 100% of clients need access to support services. Deep affordability/subsidies/vouchers can work as long as there are services that can be brought in to work with them
 - National Alliance on Mental Illness some of our clients may lose custody of their children or have shared custody. Studio will suffice for most but for some who are working to get their life back in order, helps to have a little bit more space when they have their children visit
 - Daly City Partnership Was able to tour Sweeney Lane (MidPen Housing) in Daly City wonderful onsite services. Was moved, this is what our people need, it's a shame that it is so small. Excellent example of good practice of surveying residents about their needs and evolved services as needed. Many clients don't need that level though. Echo importance of evolving services over time. Midway Village in Daly City for several years there weren't onsite services, people there for generations, underserved population historically. Some of the seniors today moved there when they were young we need to think about aging in place, be thoughtful over the long term about evolving resident needs. There is a need for large units (4 children) in the market even though the smaller households are most common. # of kids is a limiting factor on affordable applications
 - Ombudsman there is no affordable assisted living. Pipe dream is that some people might be able to live in affordable housing with their families if they had some onsite services. Some need their medications to be given to them. Physical therapy is provided in nursing homes. Cheapest assisted living is \$4500, ranges up to \$10K/mo. Seniors need the same basic services no matter their income. Also serve mentally and physically disabled in residential homes. Nobody wants them, which is very sad.
- 6. Aside from more money, what can jurisdictions do to be helpful? Future programs and policies not just about the direct allocation of money

- Daly City Partnership Sweeney Lane is an example of the city getting behind a development and working collaboratively to get everything together – zoning, permitting, convincing adjoining land owner with lot to sell the lot. Worked to move things as quickly as possible. It takes such a long time to make these projects happen, which is a problem when people are homeless *today*
- HIP Housing one of the things jurisdictions can do is encourage and support affordable and accessible prices in the overall housing market. More supportive services for mental health issues, esp at earlier stages. More supportive services to people on fixed income, make sure they don't lose fixed income if they get access to new resources. Jurisdictions may not recognize homesharing as a solution, but they should consider it, it is readily available, no cost, can help fill in the gaps
- Mental Health Association agree with everything that has been said. Use city and county owned property for low income housing. Support developers that include extremely low income units, that provide support services onsite or accessible. There's a lot of talk about teacher housing – nonprofit staff need affordable housing too. Would help to recruit and retain employees, who we are losing every day. If we can't hire staff, we will not be able to serve
- Ombudsman all the market-rate developers who are building these beautiful residential buildings, but only put 3 low income units in 25 unit building. We should incentivize them to add more low-income units. Give the developer a tax credit to incentivize them to increase the # of low income units. Get more people off the streets and into nice apartments.
- National Alliance on Mental Illness incentives to builders is great. Also think about how to halt the exchange of ownership on property. Every time land is sold and changes hands, it becomes more expensive. Think more creatively about ownership of land
- Abode Besides more money, we need more vouchers, more staff. More project-based housing. Education for landlords on their rights will help more landlords be willing to take vouchers, sign master leases. Rapid rehousing is needed but it doesn't work for everyone; we need more permanent supportive housing. Jurisdictions should reach out to people at ground level for input before creating programs.
- 7. Are there options for people that have animals?
 - Mental Health Association Most of our clients can have an animal as long as we work with them to request a reasonable accommodation. 100% of our units can and will make the accommodation.
 - National Alliance on Mental Illness pets are huge thing for our clients, not only with soothing them but also creating a sense of responsibility, gives them second thoughts when they are thinking of ending their lives
 - HIP Housing it is still a big barrier in affordable housing when their pet is not a service or supportive animal. Many people have more than one pet which is also a barrier.

- 8. How much have the large companies--Apple, Facebook, YouTube, etc--stepped up to help provide money for these services and housing units?
 - Mental Health Association To our knowledge, not much.
 - Ombudsman got turned down for grants from FB, Google, Genentech
 - Samaritan House they do fund some things, some of the folks here do have funding, depends on the focus, housing, food, youth has been big. Need to understand what is it that they really want to fund and tailor what you're doing to what they're asking for
 - Daly City Partnership CZI is funding all of the Core Agencies in SMC, doing a lot of work around free, high-quality training for their grantees and others. They are at the forefront. Key to support for Core Agencies: someone at County advocated for the Core Agencies. Jurisdictions, use your network and political power to help orgs
 - HIP Housing has benefited from CZI as well
- 9. Additional comments
 - Samaritan House article came out today about most expensive zip codes in the country. For the 5th year in a row: Atherton. In the Bay Area we have 47 out of 100 zip codes that are among the highest in the country. In SMC, 10 of the 47. Somehow, some way we need to figure out how to solve this with partners, with developers (who have codes to follow, does tax credit offset how much they can make, when it's more about the money and those who can afford it vs. police, firemen, nonprofit workers). We are fast approaching that cliff where we're not only pricing out our clients but also the middle class. We need to do something, not sure what it is. We've got a fire. Where are the hoses, where is the water, where are the fire trucks? Tech companies should be a part of this process. We need the people with the money at the table. The tech companies are contracting with people so they don't have to pay benefits. People are working from other parts of the state/country because their money doesn't go as far in the Bay Area. \$140K income for a family of 4 only covers the basics. I know the people who are here know that. But who else do we need at the table to know it too.
 - Daly City Partnership One of my favorite quotes, "Tell the rich of the midnight sighing of the poor." We need to educate the upper-class and business folks - appeal to their conscience. But that is my own personal view. LaTrice (Samaritan House) is so right.
 - National Alliance on Mental Illness Need to look at transportation, exploring localities that are hubs. In a few years (or even now) we are facing the challenges of our own existence. NAMI San Mateo had to give up its permanent site and move offsite. Current location is not ideal, not close to any public transportation system. El Camino is going to look like two walls of buildings with homes. Is that what we want or do we want to add transit to allow people access to services. Jurisdictions should start thinking about transportation hubs. Think about housing density and building up because limited land, is precious. Need to think about it now since it takes time to build infrastructure

Appendix: Additional Stakeholder Information

Human Investment Project (HIP Housing)

- Mission: HIP Housing's Mission is to invest in human potential by improving the housing and lives of people in our community. HIP Housing enables people with special needs, either from income or circumstance, to live independent, self-sufficient lives in decent, safe, low-cost homes. To achieve our mission, HIP Housing provides Home Sharing, Self-Sufficiency, and Property Development.
- Where you operate: All cities in San Mateo County
- Whom you serve: Families and Individuals who live, work, go to school or have a housing voucher in San Mateo County.

LifeMoves

- Mission: To provide interim housing and supportive services for homeless families, couples and individuals to rapidly return to stable housing and achieve long-term self-sufficiency.
- Where you operate: Countywide, Daly City to East Palo Alto and Half Moon Bay on the coast
- Whom you serve: families, couples and individuals experiencing homelessness

Mental Health Association of San Mateo County

- Mission: Mental Health Association of San Mateo County is dedicated to improving and enriching the quality of life for individuals in our community who have a mental illness, HIV or AIDS or a co-occuring disorder by providing stable housing and supportive services.
- Where you operate: San Mateo County
- Whom you serve: Individual adults, transition age youth, and families.

Samaritan House

- Mission: Fighting Poverty, Lifting Lives
- Where we operate:
 - San Mateo Office: Belmont, Burlingame, Foster City, Hillsborough, Millbrae, San Carlos, San Mateo
 - E. Palo Alto Office: E. Palo Alto, Menlo Park
- Whom we serve: residents in need, including families with children, seniors, persons living with disabilities, veterans, and unhoused individuals

Daly City Partnership

- Mission: Working together to enrich life in our community
- Where you operate: Daly City, Colma, Broadmoor residents primarily. San Mateo County residents.

• Whom you serve: Residents in need, including families with children, seniors, persons living with disabilities, veterans, and unhoused individuals and families. Services for all ages and stages.

Youth Leadership Institute

- Mission: yli builds communities where young people and their adult allies come together to create positive social change. We achieve this in two key ways: providing training, tools and resources for effective youth advocacy, and by leveraging the experience and savvy of adult allies.
- Where you operate: Half Moon Bay, Daly City, & greater San Mateo County
- Whom you serve: Low income and BIPOC youth

Ombudsman Services of San Mateo County

- Mission: The residents of Long Term care Facilities are often the most vulnerable in society. OSSMC works to ensure the protection of these residents through advocacy, direct intervention and collaboration with service providers.
- Where you operate: OSSMC provides services to all licensed LTC facilities in San Mateo County.
- Whom you serve: We service all residents in licensed LTC facilities in SMC. We presently serve 442 facilities with a total of 9278 residents

El Concilio of San Mateo County

- Mission: ECSMC is committed to increasing education, employment and access to quality of life services to underserved communities in San Mateo County
- Where you operate: County wide, East Palo Alto, Menlo Park, North Fair Oaks/Redwood City
- Whom you serve: Low Income, non/limited English speaking and non/limited literacy residents

Abode Services

- Mission: Abode Services' mission is to end homelessness by assisting low-income, un-housed people, including those with special needs, to secure stable, supportive housing; and to be advocates for the removal of the causes of homelessness.
- Where you operate: Alameda, Santa Clara, San Francisco, Santa Cruz, San Mateo, and Napa counties.
- Whom you serve: People identified as homeless or at risk of becoming homeless

ROOT POLICY FAIR HOUSING SURVEY SUMMARY – SUMMARY OF PUBLIC FEEDBACK

City of San Mateo Resident Fair Housing Survey Preliminary Results

As of January 20, 2022, the San Mateo County Fair Housing Survey has gathered 108 responses from residents in the City of San Mateo. Main findings are listed below.

Top challenges in housing situation.

- I would like to move but I can't afford anything that is available/My income is too low for me to find anywhere else to rent (30%);
- My house or apartment isn't big enough for my family members (28%);
- I worry that if I request a repair it will result in a rent increase or eviction (17%).

Top challenges in paying for housing:

- I can't keep up with my utilities (15%);
- I can't keep up with my property taxes (12%).

Top challenges in neighborhood:

- There are not enough job opportunities in the area (22%),
- I can't get to public transit/bus/light rail easily or safely (18%),
- Schools in my neighborhood are poor quality (17%).

Displacement. Twenty-eight percent of respondents indicated having been displaced in the past five years. The top reason for displacement was "*Rent increased more than I could pay*" (40%).

Availability of housing. Seventy-three respondents have looked for housing seriously in the past five years of those, 17 (24%) indicated that a "*Landlord did not return calls and/or emails asking about a unit*", and 31 (44%) indicated they have been denied housing to rent or buy in San Mateo County in the past 5 years. The main reason for denial (37%) was "*income too low.*"

Voucher holders. The survey gathered responses from 25 voucher holders. The majority (77%) indicated that finding an affordable unit is somewhat or very difficult. Six of them indicated this is due to "*Landlords have policies of not renting to voucher holders.*"

Residents with a disability. Twenty-seven percent of respondents indicated having a disability or having a member of their household with a disability. Seventy-five percent indicated their home does not meet the needs of their household member with a disability.

Improving quality of life. Residents were also asked about several resources that would improve their living situation.

When asked what type of help they need to **improve their housing security**, top answers were:

- Help me with a down payment/purchase (39%);
- Help me get a loan to buy a house (27%); and
- Help me with the housing search (23%).

When asked what type of help they need to **improve their neighborhood**, top answers were:

- Better lighting (38%);
- Improve street crossings (30%); and
- Reduce crime (27%).

When asked what type of help they need to **improve their health**, top answers were:

- Make it easier to exercise (41%);
- More healthy food (37%); and
- Better/access to mental health care (26%).

When asked what type of help they need to **improve their job situation**, top answers were:

- Increase wages (49%);
- Find a job near my apartment/house (28%); and
- Help paying for college (24%).

When asked what type of help they need to **improve children's education**, top answers were:

- Stop bullying/crime/drug use at school (29%);
- Make school more challenging (28%); and

Have more activities afterschool (26%).

COMMUNITY CORRESPONDENCE RECEIVED BY THE CITY PRIOR TO APRIL 6, 2022, AND BETWEEN MAY 7, 2022 AND DECEMBER 20, 2022

Sandra Council

From: Sent: To: Subject: Sandra Belluomini Tuesday, October 26, 2021 5:31 PM Sandra Council; Nicholas "Nicky" Vu FW: Housing and global warming

To: Housing <housing@cityofsanmateo.org> Subject: Housing and global warming

From: George Hackman

Sent: Tuesday, October 26, 2021 11:18 AM

Hello,

One of my biggest concerns is global warming. As Bill Gates and others have pointed out, concrete and building materials are enormous contributors to global warming. By some estimations, if concrete were a country it would be the third-largest emitter of greenhouse gasses after the US and China.

https://www.theguardian.com/cities/2019/feb/25/concrete-the-most-destructive-material-on-earth

https://www.nytimes.com/2020/08/11/business/concrete-cement-manufacturing-green-emissions.html

The great news is that green concrete is available and is being USED RIGHT NOW in new buildings like LinkedIn headquarters (one brand is carboncure referenced in NYT article). https://www.carboncure.com/

With the new development, we have an opportunity to build right. What is being done to ...

1. Ensure new development is being done with green concrete such as CarbonCure?

2. What are plans for requiring solar or other sustainable energy uses as part of construction?

3. What building requirements are in place to ensure uptake of carbon zero heating, hot water and cooking in these new buildings?

Thanks for your time,

George Hackman

Long-term San Mateo resident.

Sandra Council

Sandra Belluomini Administrative Tech| Housing 330 W. 20th Ave., San Mateo, CA 94403 650-522-7239| belluomini@cityofsanmateo.org

From: Todd Keithley Sent: Tuesday, November 2, 2021 10:31 AM To: Housing <housing@cityofsanmateo.org> Subject: Housing input

Hello Housing Division,

I am a seven-year resident of San Mateo, and my wife was born and raised here. We have three kids in the public schools. We live in a single family home at 139 Spuraway Drive.

Your recent housing flyer says that the city "must ... prepare for future growth," but Bay Area growth has been happening for several years already and San Mateo is behind on the production of housing. We need new housing to support prior growth, not just future growth.

I strongly support any and all forms of new housing, including apartment buildings. To preserve what little open spaces remain, it seems to me that building up and building densely is the way to go. The Bay Meadows development is a good start, and I appreciate its "smart growth" walkable layout and proximity to public transport (though I wish some of the new office buildings over there had been housing instead).

San Mateo's approach to housing is a lot better than that of the smaller cities and towns on the Peninsula. Nevertheless, many people who work here cannot afford to live here, such as the vast majority of our children's teachers.

Keep building!

Best, Todd Keithley

From: Sent: To: Subject:

Mary Way Tuesday, October 12, 2021 11:46 AM Sandra Council; Julia Klein FW: Letter to the Planning Commission

Hi Sandy & Julia,

Received this public comment received for tonight's item. Already sent to Planning Commissioners.

Mary

From: AlanTalansky Sent: Tuesday, October 12, 2021 11:43 AM To: Planning Commission <PlanningCommission@cityofsanmateo.org> Subject: Letter to the Planning Commission

Today housing demands new approaches to finance, ownership, management, design, construction and scope of entitlement.

The challenge of creating affordable and livable public workforce housing that provides a sustainable return on investment, for the developer and and a successful result for the people of San Mateo is a difficult balance.

One of the most most significant barriers to creating a favorable balance is a restrictive density per acre limitation. Today the most desirable development sites are restricted to 50 units per acre (before any density bonus benefits). Since the limitation to 50 units per acre represents 1/3rd of what would create a project with a reasonable density for a 1 acre site. This current limitation reduces the addition of units necessary for a project to make a sustainable return on investment and creates less necessary housing for the community.

Let's raise the unit per acre restriction to a more realistic less restrictive number.

Thank You

Alan Talansky Executive Vice President of Development EBL&S Development LLC 334 Sonora Dr San Mateo CA 94402

Re: Housing Element 2023-2031 and the General Plan

Mayor Rodriguez

I want to write to all five members of the city council of San Mateo to share my thoughts on the process of our General Plan and our Housing Element numbers. I have been attending all the workshops and follow the weekly council meetings on Zoom. I consider myself a concerned, informed, longtime resident.

My first thought is that the process is a complete joke. The workshop that was offered May 18th was so poorly done, the viewer was forced to go into break out rooms and discuss 9 different zones in a matter of minutes. How in the world do you expect anyone to grasp the changes of zoning and the implications of these changes in less than a minute per zone? If you are looking for an informed electorate, the way the process is going is far less than ideal.

2nd, the complete disdain for Measure Y by the entirety of our city council is very evident in the three alternatives given. The council needs to respect Measure Y and stop putting buildings taller than 7 stories in our General Plan. In 2030, San Mateans can extend these building limitations and the council needs to respect what their constituents just voted for. Two of the three alternatives given do not reflect the city council got the message of Measure Y and what city voters want for San Mateo. They clearly include buildings 8 stories and higher.

3rd, you really need to cool it on the racial talk. The bemoaning of white, older people who are a big part of this community for actually attending these workshops is insulting. The faces on Zoom clearly show the frustration from city staffers about the demographic of people attending these workshops. Your constant drive and frustration with the inability to get people who you want to participate is becoming comical. How hard are you going to try to make sure a community is being involved and not just those older, white constituents whose opinions you can care less about? If I hear the term old, white homeowner again in derogatory terms, I am going to have to consider filing a formal complaint about this process and the derogatory remarks by participants in these workshops and comments in Chat. This would not be tolerated if the roles were reversed and you know it. So, let's let people know that the old white homeowner label is offensive to many in this community and let's get away from this race baiting that is clearly part of some people's agenda. Grouping and dismissing a segment of your city is a mistake on your part. For the record, I have Native American lineage, decedent of Chief Pontiac of the Ottawa tribe near current day Ontario-Detroit Area. So technically my personal input is of a multi-racial person and should be reflected as such. I want to be properly identified and not considered strictly white. I am a rainbow of colors and cultures.

4th, many of your constituents want controlled growth and demand local control. For many in our city who think like I do, we do not want a regional authority or state control over what has to be built in our city. It is my view that the five city council members want to give up their influence on housing in San

Mateo and just surrender to these regional and state players. RHNA numbers and ABAG need to be pushed back on like so many other cities in California are doing. The process of coming up with these numbers is arbitrary and the people making these decisions are unelected. If you believe in a representative government like I do, it is time to start representing all the people of San Mateo, not just the ones who share your agenda. The deadline to appeal RHNA numbers to the ABAG is this summer 2021. FYI.

If not, you need to be clear and honest with the people of San Mateo who you serve on what your personal goals are in both the General Plan and the Housing Element. It is important that voters know exactly where you stand on this very critical issue when it is time to vote for council members in the future.

My grandfather and his development company, Conway and Culligan, has built more single-family homes in the city of San Mateo than any other builder. He is responsible for the homes built in Elmwood, College Park, Howard Park, Sunnybrae, Polo Club Subdivision, San Mateo Village and Fiesta Gardens to name a few. My family has a long deep connection to San Mateo and the building of singlefamily residences. Zoning and character of neighborhoods is very important to my family as my grandfather is one of the men who designed and built many our neighborhoods. I know I don't share the same values and ideas about San Mateo as you. I know we have completely different agenda's, different views on our city's history and our political affiliations could not be further apart; however, even though the people listening to you may not be the ones you want, we would at least like to be respected for showing up and caring about our city and participating in the process.

Sincerely,

Christopher P. Conway / Resident of San Mateo since 1964

Housing Survey

To: Mayor, San Mateo Subject: General Plan Housing Survey January 12, 2022

I mailed these comments instead of participating in the online General Plan Housing Survey. Please forward them to the person in charge of the survey and route them to the remainder of the city council members. Thank you. I've chosen to be anonymous.

Public Housing

I concur with the following suggestion that was printed as a letter to the editor a while ago.

"I suggest using city run non-profit public housing. Issue long term bonds. Use the proceeds to buy or build small site rental buildings across the entire city. Operate them at cost. Set the rents just high enough to: 1) pay for management, maintenance, repairs, etc.; 2) pay interest on the bonds; and 3) re-pay the bonds at maturity. There would be no investor expecting a profit based on market value. Rents would not go up simply because the property value appreciated.

"Vienna, Austria has had this sort of housing for many years and it has worked quite well. Search the web for "Vienna public housing".

"Promoting cooperative housing is another option. Buildings are owned by the residents. Instead of just owning the air rights to a unit each occupant owns a portion of the building and the land. Again, there is no investor expecting rents to go up as the property value appreciates. Search the web for "cooperative housing"."

Rent Stabilization

Housing prices sometimes increase suddenly by a large amount. When this happens some landlords raise the rent by a significant amount in order to increase their profit. For many tenants this is an eviction notice, not a rent increase. Rent control should be imposed to prohibit such sudden increases.

Long Term Vacancies

One factor that I have not heard mentioned is that some of the demand for housing is coming from wealthy individuals who are looking for part time residences in the bay area. Such residences are often vacant much of the time. What can be done to contend with this? Consider charging a tax on vacant units as a source of revenue for public housing.

Comments on Section 3 of the Survey

Create housing by redeveloping existing properties that have additional potential. - Rather vague. Does this refer to remodeling an existing retail store or office building into a residential building? If so, it might be appropriate if there are enough families nearby to create a neighborhood. Where will the children play?

Create accessory dwelling units (ADUs, also known as second units, granny flats) on existing single-family properties. - These tend to be small, probably suitable for retirees. Young couples would likely move out as their family grows, the children get older, and three or more bedrooms are required. They also tend to congest areas that are currently single family homes.

Housing Survey

Convert existing single-family houses into duplexes. - Most houses are too small to subdivide. Does this actually mean building an addition on an existing single family house? If so, that tends to congest neighborhoods that are currently R-1. Street parking is congested, traffic increases.

Increase the allowable density in areas that are close to transit. - Many people are reluctant to increase density in any part of San Mateo. They are concerned about traffic congestion, such as on Delaware Street between downtown and SR 92 prior to the Covid-19 outbreak.

They are also concerned about exceeding the capacity of the water supply system and the sewer system. These issues should be addressed directly. Are they genuine problems? How would they be resolved? I have not seen any city official address them in detail.

As for being close to transit, most houses are close to a bus stop, so this could be anywhere in the city. If it refers to Caltrain, that simply concentrates the congestion near the three train stations.

Encourage mixed-use projects that have both commercial and residential uses. - This sounds like an old idea, stores on the ground floor, apartments above. There are some older buildings of this sort on B Street. They seem to appeal to some folks, but the idea seems to be out of favor now. Lack of parking could be one of the reasons. However, the building under construction on the Trag's site is somewhat like this. If a developer wants to build one in a neighborhood of similar buildings let him try it.

Streamline housing approval process. - There is a practical limit. What is the minimum time required to do the process thoroughly?

Allow taller developments if they include open space. - Recent legislation allows multifamily buildings to be built on lots that are currently R-1. I don't like mixing multi-story housing units with existing single family homes. I live in a neighborhood of single family homes. I don't want a two or three story building on an adjacent lot. I'd have no privacy in my back yard, looking up at the windows or balconies of the apartments. There would be noisy neighbors. Zoning ordinances should provide for consistent types of buildings in a neighborhood.

Survey Process

This survey should have been much more comprehensive. It is quite superficial. The questions are quite general. It only looks good in the history books. You folks can check off the box that says "A public survey was conducted". It doesn't mean very much.

 $255\ {\rm characters}$ is not enough for additional comments. That's less than two tweets.

There should have been a period for written public comments. Caltrans does this routinely for projects such as the proposed changes to the interchange at Highway 101 and Peninsula Avenue.

There should have been a person appointed to contact for questions or additional information or to receive comments.

Housing Survey

City Council Bias

A review of recent history shows the five council members have been biased and uncommunicative on the subject of housing. I am refering to members Rick Bonilla, Joe Goethals, Amourence Lee, Diane Papan, and Eric Rodriguez.

In 2018 a citizen group gathered enough petition signatures to put what became the Measure Y height limit proposition on a ballot. The council postponed doing so until 2020, just before the expiration of the existing height limit legislation. Prior to that election city attorney Shawn Mason attempted unsuccessfully to invalidate the proposition. Before reluctantly putting Measure Y on the November 2020 ballot all five council members recommended that citizens vote against it but did not present a convincing argument for doing so or a compelling alternative.

In 2020 another group began circulating a petition for a competing height limit proposition that became Measure R. It was favorable to developers. Due to Covid 19 this group had to cease their effort without obtaining enough signatures. The council added Measure R to the ballot anyway, stating that it certainly would have garnered sufficient signatures had the virus not occurred. This was unethical and possibly illegal. Council members recommended that citizens vote for it. Measure Y passed, Measure R was defeated.

After the election some members of the council attended a meeting regarding why Measure R failed and how to circumvent Measure Y.

I have no objection to council members taking a stand but I am highly critical of their devious and underhanded tactics. They should have expressed their opinions more directly. Clearly they opposed height limits. If I could have offered advice I would have suggested that they present their argument in an adult to adult, citizen to citizen manner.

During 2020 they could have taken the lead and made speeches explaining what they were proposing to do and why they felt the way they did. They could also have done this by writing press releases or guest editorials for the local Daily Journal newspaper or sending letters to citizens. In short, a clear explanation of their preferred course of action would have been much more mature and persuasive.

Ironically, in June of 2020 Joe Goethals as mayor actually did write a guest editorial on the subject of Father's Day. A similar, "Dear citizen, this is what I propose to do and why I propose it ..." letter on the subjects of height limits and housing would have been highly appropriate and a demonstration of mature leadership instead of all the silliness that went on prior to the 2020 election. I greatly prefer straight talk and plain dealing rather than political manipulation.

I offer these comments without animosity in the hope that council members will take a more direct and mature form of leadership in the future.

San Mateo Planning Commission City of San Mateo 330 W. 20th Ave., San Mateo, CA 94403

Re: Housing Element Update Process

Dear Chair Maldonado and City of San Mateo Planning Commissioners,

On behalf of Prometheus Real Estate Group, I am writing today regarding the Housing Element Update Process. As a company long based in San Mateo and an employer and investor throughout San Mateo and it's Downtown, Prometheus Real Estate Group supports the City's efforts to address 'its RHNA allocation within the existing land use and zoning designations without the need to rezone or increase densities as stated in the Staff Report. While Prometheus and our project partners continue to follow and support the General Plan Update process, which will provide a plan for growth throughout the City for the years ahead, we believe that the City's current zoning and land use guidelines do provide a framework for addressing the City's 7,015-unit RHNA allocation. However, we would propose greater focus on ways to better streamline and achieve greater certainty throughout the development process.

Towards that end, below are several suggestions that we believe would better facilitate the development process and help towards attaining the RHNA housing numbers needed.

- 1. State Density Bonus and Measure Y
 - a. There have been recent discussions within the City regarding the Density Bonus Law and its ability to allow a project to go beyond a local voter initiative-based height limit. We would recommend clarifying the details of how this would work so that a project applicant could plan accordingly. Having certainty in such an interpretation can allow for a more creative approach to defining a specific project and potentially incorporating some or more housing if possible. Along with additional height, this would also include greater FAR and densities.
 - b. Having these guidelines and interpretations formally confirmed at the start of a project will greatly facilitate the initial underwriting and City review process which will benefit all parties involved.
- 2. Community Benefits
 - a. Some zoning districts in the City of San Mateo have underlying residential uses allowed. Within those allowed residential use guidelines can be language regarding gaining additional densities through Community Benefits. By more clearly defining the Community Benefit process, higher residential densities can potentially be achieved and RHNA targets realized.
 - b. While the recent "interim program" from 2020 provided a proposed framework for an economic land-use consultant to value the community benefits on a project-by-project basis, we believe further refinement of this process is warranted, in an effort to provide morer certainty in community benefit requirements, resulting in higher densities and greater ability to attain the necessary RHNA numbers.

Thank you for your time on this matter,

Jonathan Stone Senior Director of Development Prometheus Real Estate Group, Inc. 1900 South Norfolk Street, Suite 150, San Mateo, CA 94403 650.931.3448

DEVELOPMENTAL DISABILITIES SUBMISSION FOR

CITY OF SAN MATEO HOUSING ELEMENT

Introduction to Developmental Disabilities

People with developmental disabilities have a disability that emerged before age 18, is expected to be lifelong, and is of sufficient severity to require a coordinated program of services and support in order to live successfully in the community. Developmental disabilities include intellectual disability, autism, Down syndrome, epilepsy, cerebral palsy, and other disabling conditions similar in their functional impact to an intellectual disability. Under California's Developmental Disabilities Services Act and the U.S. Supreme Court's 1999 decision in *Olmstead v. L.C.*, people with developmental disabilities are entitled to receive community-based services that allow them to live in the least restrictive community setting. This shift to de-institutionalization has led to the closure of the most restrictive segregated settings and to the requirement that local jurisdictions in their Housing Elements assess and plan specifically for the housing needs of people with developmental disabilities who receive services from the Regional Center in order to live in their home community.

Demographic and Other Trends Affecting the Housing Needs of People with Developmental Disabilities

The City of San Mateo Population with Developmental Disabilities Grew by 12% Since the Last Housing Element and Accounts for 21% of the County's Total Population with Developmental Disabilities. The City of San Mateo is home to 835 people with developmental disabilities (Table ___). This represents an increase of 12% over the 2013 population of 746 reported in the City's 2015 Housing Element and reflects a much higher growth rate than the general population. In addition, the City's population with developmental disabilities accounts for 21% of the total County population with developmental disabilities, although the city's total population is only 14% of the County's total population.

Age	City of San Mateo	County of San Mateo	City of San Mateo as % of County
Under age 18	304	1169	26%
18 and older	531	2764	19%
Total	835	3933	21%

Table	Comparison of the 202	21 City and County Population	ns with Developmental Disabilities
		, , ,	

Source: The City of San Mateo data is based on zip code level data for zip codes 94401, 94402, and 94403 published by the California Department of Developmental Services as of September 30, 2021. County level data is published by the Department of Developmental Services as of June 30, 2021. Both sources exclude children from birth to the third birthday because approximately 75% of this age group is found not eligible for continuing lifelong services on their third birthday.

Decline in Living Arrangements for Adults with Developmental Disabilities Outside the Family Home. Of the City's total population with developmental disabilities, 531 (64%) are adults and 304 (36%) are under age 18 (Table ___). Assessing the housing needs of adults with developmental disabilities is of particular importance because as they age the adults will require a residential option outside the family home, whereas the family home is the preferred living option for children with developmental disabilities. In 2021, 505 City of San Mateo residents with developmental disabilities lived in the family home compared to 389 in 2013 as reported in the 2015 to 2023 Housing Element. This 30% increase in reliance on the family home is 2.5 times greater than the City's 12% increase in the developmental disabilities population during that same period. Increased reliance on the family home is primarily explained by overall growth in the population with developmental disabilities to live either in licensed care facilities (11% decline) or in affordable housing with supportive services (11% decline). (Table ___.) As adults with developmental disabilities age, they need opportunities to live outside the family home both because of the aging of their family caregivers and also because many adults with developmental disabilities would like to live in their own apartment with supportive services.

Living Arrangements	2013 Number	2021 Number	2021 Percent of Total Adults	% Change Since 2013
Total (children & adults) in the Family Home	389	505		30%
Adults In the family home	Not reported see note	201	38%	
Own apartment with supportive services	64	52	10%	-11%
Licensed Facilities	294	265	50%	-11%
Other (including homeless)	7	13	2%	.8%
Total Adults	Not reportedsee note	531	100%	

Table Changes in Living Arrangements of Adults with Developmental Disabilitie	Table
---	-------

Note: The 2013 data are reported in the 2015 Housing Element, which failed to separately count those under 18 and those 18 and older, making it difficult to estimate changes in the significance of the family home as a residential setting specifically for adults. The 2021 data are published at the zip code level by the California Department of Developmental Services as of September 30, 2021. These data assume that occupants of licensed facilities are 18 and older which is generally true, but if incorrect this assumption would tend to understate, not overstate, the need for other housing options for adults with developmental disabilities.

Increase of Autism Diagnosis Reflected in Increase in Adults in their 20s and 30s. Growth in the City of San Mateo's population with developmental disabilities since the 2015 Housing Element correlates with a significant annual increase in the diagnosis of autism that began in the mid-1980s and did not level out until after 2015. The cumulative impact of this trend is already seen in the growth in the San Mateo County population age 18 to 41 with developmental disabilities and will continue into the future. This trend has significant implications for housing needs among City of San Mateo adults with developmental disabilities during the period of the 2023 to 2031 Housing Element.

Age	2015 Number	2021 Number	% Change
18 to 31	1023	1189	16%
32 to 41	397	457	15%
41 to 52	382	335	-12%
52 to 61	385	348	-10%
62 plus	327	435	33%
Total adults	2514	2764	10%

Table __ Changes in Age Distribution of Adult Population in San Mateo County

Source: County level data is published by the Department of Developmental Services as of June 30, 2021 and as of September 30, 2015.

Longer Life Spans. Between September 2015 and June 2021, the California Department of Developmental Services reports that the number of San Mateo County residents with developmental disabilities age 62 and older grew by 33% (Table ___). This is not due to migration of senior citizens with developmental disabilities to San Mateo County, but rather to well-documented gains in life span among people with developmental disabilities. With longer life expectancy, more adults with developmental disabilities will outlive their parents and family members with whom a growing number of City of San Mateo adults with developmental disabilities now live because of the lack of other residential options. Longer life spans will also slow the pace of resident turnover in the county's limited supply of licensed care facilities, which will further reduce opportunities for the growing population of people with developmental disabilities to secure housing outside the family home.

Decline in Licensed Care Facilities. The California Department of Developmental Services reports that between September 2015 and June 2021, San Mateo County lost 5% of its supply of licensed care facilities for people with developmental disabilities (including Community Care Facilities, Intermediate Care Facilities, and Skilled Nursing Facilities), thereby increasing the need for affordable housing options coordinated with supportive services funded by the Regional Center. This trend is mirrored in the 11% decline in the number of City of San Mateo adults able to live in licensed care homes between 2013 and 2021 (Table ___). The reduced role of licensed care facilities demonstrates the need for the City's Housing Element to plan for affordable housing that includes people with developmental disabilities so that adults with developmental disabilities are not forced out of the county when they lose the security of their parent's home.

Displacement. The California Department of Developmental Services has documented a 12% decline in the age group 42 to 51 and a 10% decline in the age group 52 to 61 in San Mateo County between September 2015 and June 2021. (Table ___). In light of gains in life expectancy, this loss can reasonably be attributed to homelessness or displacement from the county because of the lack of residential living options (either licensed facilities or affordable housing) when an elderly parent caregiver passes away or becomes unable to house and care for the adult. Displacement takes a particular toll on adults with

developmental disabilities who depend on familiarity with transit routes and shopping and services, as well as support from community-based services and informal networks built up over years in living in the City of San Mateo.

Higher Rates of Physical Disabilities. People with developmental disabilities are more likely than the general population to have an accompanying physical disability. Twenty-seven percent (27%) of San Mateo County residents with developmental disabilities have limited mobility, and 13% have a vision or hearing impairment. The need for an accessible unit coupled with the need for coordinated supportive services compounds the housing barriers faced by those with co-occurring intellectual and physical disabilities.

Ineligibility for Many Affordable Rental Units. Some adults with developmental disabilities depend on monthly income of under \$1,000 from the Supplemental Security Income (SSI) program, pricing them out of even the limited number of Extremely Low Income affordable housing units in the City of San Mateo. Those with employment tend to work part-time in the lowest paid jobs and also struggle to income-qualify for many of the affordable housing units for rent in the City of San Mateo.

Transit-Dependent. Most adults with developmental disabilities do not drive or own a car and rely on public transit as a means to integration in the larger community.

Best Practices for Inclusion of People with Developmental Disabilities in Typical Affordable Housing

As demonstrated by a growing number of inclusive affordable housing developments in neighboring jurisdictions, the City of San Mateo can meet the housing needs of people with developmental disabilities by adopting policies and programs to promote their inclusion with coordinated services in typical affordable housing. The following considerations should guide the City of San Mateo in this pursuit:

- Integration in typical affordable housing is a priority in order to affirmatively further fair housing for a group that has historically experienced no alternatives to segregated living and also to counter the displacement of adults with developmental disabilities out of San Mateo County.
- **Coordination of housing with onsite supportive services** funded by the Golden Gate Regional Center should be encouraged. These fully funded coordinated services provide a supported pathway for people with developmental disabilities to apply for and retain an affordable apartment and are often as essential to a person with a developmental disability as a physically modified unit is to a person with a mobility, vision, or hearing impairment.
- A mix of unit sizes at inclusive housing properties would address the needs of those who require live-in aides, want to live with roommates or partners, or have children.
- Location near public transit would accommodate the transit-dependency of most adults with developmental disabilities.
- **Deeply affordable housing is needed,** targeting incomes not more than 30% of Area Median Income and taking advantage of Housing Authority Project Based Vouchers or HUD 811 Project

Rental Assistance when available to create housing opportunities for those who cannot meet minimum income requirements for units priced at 30% of Area Median Income.

Policy and Program Recommendations

The City of San Mateo has a responsibility not simply to assess the housing needs of people with developmental disabilities but also to create policy, zoning, program and other changes that make it more feasible for affordable housing developers to include people with developmental disabilities in their housing in coordination with the supportive services available from the Golden Gate Regional Center. The City's 2015 Housing Element identified a need for housing for an additional 30 to 87 people with developmental disabilities, but the number of adults with developmental disabilities living in their own apartment actually declined by 11% since the last Housing Element, even as the population grew by 12%. The City's lack of progress in meeting the housing needs of people with developmental disabilities since the last Housing Element demonstrates the need for policies and programs that specifically incentivize inclusion of people with developmental disabilities in affordable housing with coordinated services provided by the Golden Gate Regional Center.

• Establish and monitor a quantitative goal. Tracking the City's success in housing people with developmental disabilities is essential to determine whether policies and programs are having an effect in overcoming historic patterns of discrimination and exclusion of people with developmental disabilities from affordable housing. A goal of 150 new Extremely Low-Income housing units for City of San Mateo residents with developmental disabilities over the period of the 2023 Housing Element would represent meaningful progress towards the total unmet housing need of this special needs population.

Sample Language: The City of San Mateo shall monitor progress towards a quantitative goal of 150 new Extremely Low Income housing units that are subject to a preference for people with developmental disabilities needing the coordinated services provided by Golden Gate Regional Center to live inclusively in affordable housing.

• Target City-Owned Land, Land Dedicated to Affordable Housing under the Inclusionary Ordinance and City Housing Funds to Meet City-Specific Priorities. City-owned land, land dedicated to affordable housing in lieu of providing affordable units under the inclusionary ordinance, and city housing funds are often essential to the development of affordable housing that is financially feasible in high-cost City of San Mateo. In creating guidelines for the scoring of any competitive requests for proposals for these scarce resources, the City should grant additional points to affordable housing projects that address the housing needs of City of San Mateo residents who are most difficult to house under existing state and federal housing finance programs--for example, by prioritizing proposals with a higher number of extremely low income units or that make a percentage of units subject to a preference for identified categories of special needs people who would benefit from coordinated onsite services, including but not limited to people with developmental disabilities who benefit from services of the Golden Gate Regional Center. Sample Language: In publishing requests for competitive proposals for any city-owned land, land dedicated to affordable housing under the city's inclusionary ordinance or city housing funds, the City of San Mateo shall grant additional points to proposals that address the city's most difficult to achieve housing priorities, by, for example, providing a greater number of extremely low-income units or committing to make a percentage of the units subject to a preference for people with special needs who will benefit from coordinated onsite services, such as people with developmental disabilities who receive services from the Golden Gate Regional Center.

Offer Developers a Range of Affordability Options Under the Inclusionary Ordinance. Most adults with developmental disabilities have incomes too low to satisfy minimum income requirements for the Low Income units currently offered under the city's inclusionary ordinance and are effectively excluded from this housing option. California law (AB 1505, the "Palmer Fix") explicitly allows cities to adopt inclusionary housing ordinances that address a range of income levels from moderate-income to extremely low-income. The City should take advantage of this authority to make its ordinance more responsive to local needs by offering developers of market rate housing a menu of options for including affordable units, for example, by setting a higher percentage of units priced at moderate income and a lower percentage of units set at extremely low income. Such a menu would address a broader range of City of San Mateo housing needs, while giving developers more options for meeting the inclusionary requirement.

Sample Language: The City of San Mateo shall revise its inclusionary housing ordinance to offer developers a menu of options for achieving affordability, adjusting the percentage of units required to be affordable depending on the degree of affordability achieved (moderate-income, low income, very low income, and extremely low income).

• Reduce Parking Requirements for People with Developmental and Other Disabilities. Adults with developmental disabilities have reduced parking needs because they rarely have a driver's license or own a car. This may also be true of other categories of people with disabilities. The City should revise its ordinances to limit parking required for affordable units for people with developmental disabilities to .5 space for each affordable studio or 1 bedroom unit and 1 space for an affordable 2 bedroom unit or larger. A similar reduction should be considered for physically accessible units required to be included in affordable housing.

Sample Language: The City shall encourage the inclusion of people with developmental and other disabilities in affordable housing by recognizing their transit dependence and establishing lower parking ratios for units targeted to people with developmental and other disabilities than would otherwise be required for affordable housing.

• Local Density Bonus Concessions. The state density bonus law currently provides additional density for housing projects that include at least 10% of the units for disabled veterans, transition-age foster youth, and homeless persons at the very low income level. Above and beyond the density bonus guidelines mandated by state law, the City should add the same incentives when at least 10% of the units are subject to preference for people with

developmental disabilities who will benefit from coordinated onsite services provided by the Golden Gate Regional Center.

Sample Language: In implementing the California density bonus statute, the City shall provide for the same density bonus, incentives, or concessions for housing projects that include at least 10% of the units for people with developmental disabilities at the very low-income level as are available to projects that include at least 10% of the units for disabled veterans, transition-age foster youth, and homeless persons at the very low-income level.

Affirmative Marketing of Physically Accessible Units: Developers are allowed to affirmatively market accessible units to disability-serving organizations in San Mateo County (i.e. Golden Gate Regional Center, Housing Choices Coalition for Person with Developmental Disabilities, Center for Independence of Individuals with Disabilities and others) but rarely take this step. Affirmative marketing is particularly needed by people with developmental disabilities who, because of cognitive, communication and social impairment, may rely on housing navigation services funded by the Golden Gate Regional Center to learn about and apply for affordable housing.

Sample Language: As a condition of the disposition of any city-owned land, land dedicated to affordable housing under the city's inclusionary ordinance, the award of city financing, any density bonus concessions, or land use exceptions or waivers for any affordable housing project, the City shall require that the housing developer implement an affirmative marketing plan for physically accessible units which, among other measures, provides disability-serving organizations adequate prior notice of the availability of the accessible units and a process for supporting people with qualifying disabilities to apply.

• Extremely Low-Income Accessory Dwelling Units. As part of a larger plan to increase the supply of Accessory Dwelling Units (ADUs), the City should consider creating a forgivable loan program for homeowners who build ADUs and rent them for at least 15 years at Extremely Low Income rent levels to people with developmental disabilities.

Sample Language: Subject to funding availability, the City shall devise a program of financing for Accessory Dwelling Units subject to rent restrictions for at least 15 years at Extremely Low-Income rent levels to people with developmental disabilities who would benefit from coordinated housing support and other services provided by the Golden Gate Regional Center.

• Affirmatively Further Fair Housing. Not only is disability the highest-ranked source of Fair Housing complaints, a growing body of San Mateo County data indicates that Black, Indigenous and other People of Color (BIPOC) with disabilities experience higher rates of housing discrimination and severe rent burden than either BIPOC without disabilities or whites with disabilities. Currently the City of San Mateo offers its residents exceptional employment, educational and social opportunities but the severe shortfall of Extremely Low Income units means that BIPOC--particularly those with disabilities--are too often excluded from enjoying those community assets. Multiple barriers including high land and construction costs and limited funding make it difficult for developers to produce Extremely Low Income units that will overcome such disparities. Policies that lead to increased production of Extremely Low Income units, as well as city staff dedicated to implementing and overseeing those policies, will Affirmatively Further Fair Housing in the City of San Mateo and decrease displacement and homelessnessness for the most at-risk City of San Mateo residents.

Sample Language: The City of San Mateo's plans to Affirmatively Further Fair Housing for Black, Indigenous and other People of Color, particularly those with disabilities, shall include policies designed to increase the production of Extremely Low Income units, as well as adequate staff capacity to implement and monitor the impact of these policies.

TENANT-PROTECTION POLICY OPTIONS FOR SAN MATEO

Proposed by ONE SAN MATEO | For more information: <u>onesanmateo@onesanmateo.org</u>

March 3, 2021

According to many sources, nearly 47 percent of San Mateo households are renters. On average, these renter households have significantly lower incomes than homeowner households. According to the Affordable Housing Task Force's 2016 final report, median household income for renters at the time was \$64,445, whereas the median household income for owners was \$117,700. Faced with constrained incomes and high rents, many renters in San Mateo pay a disproportionately high percentage of their income on housing, and many renter households are badly overcrowded. Latinos and African Americans are affected in especially large numbers by these adverse conditions.

Due to the nature of renting (as opposed to owning), renter households are vulnerable to disruptions completely outside their control. Chief among these is the possibility of rent hikes and eviction, both of which can have far-reaching impacts that easily lead to family trauma.

The passage of AB 1482 created minimal protections for renters against the threat of disruption. But these protections are minimal. Renters in San Mateo need and deserve more.

One San Mateo proposes the following policies for their potential to bring positive change to renters' lives.

CLOSING GAPS AND LOOPHOLIES IN AB 1482

1. Create "just cause" protection from Day One.

Since AB 1482 stipulates that just cause protections apply to tenants who have been in place 12 months or more, the ordinance deprives compliant tenants of the security they would have if the protections were to go into effect on Day One. The most effective way to address this shortcoming is to pass an ordinance requiring that the just cause provisions under AB 1482 go into effect on Day One. Many local city councils have adopted just cause policies that go into effect on Day One, among them San Jose, Hayward, Oakland, and Alameda. Most just cause policies exist in combination with rent stabilization, but not all.

Resources on just cause policies adopted by local city councils:

• Information about Hayward's just cause ordinance:

https://www.hayward-ca.gov/discover/news/mar19/just-cause-evictionprotections-extended-more-hayward-tenants

• Article on Alameda's just cause ordinance:

A less effective approach to the problem is to pass a minimum lease requirement requiring that landlords provide tenants with the option of a one-year lease. This would provide tenants with security for the first year of tenancy but leave them vulnerable to eviction at the end of the first year before the just cause protections under AB 1482 go into effect.

2. Prevent renovictions by closing the "substantial remodel" loophole.

Under the terms of AB 1482, a landlord can evict a tenant if s/he intends to demolish or "substantially remodel" the property. The law says that the landlord has to be doing substantial modification that requires a permit from a governmental agency, that cannot be reasonably accomplished with the tenant in place, and that requires the tenant to vacate the property for at least 30 days. Now that there are fewer acceptable rationales for evicting tenants, landlords have manipulated the substantial remodel clause to their advantage. Shirley Gibson, attorney for Legal Aid of San Mateo County, said that in the months before COVID, "substantial remodel" was the most frequently chosen reason for

60-day termination notices. She further said that when landlords were challenged about their intentions in the unlawful detainer process, it would often turn out that the plans were mostly cosmetic or possibly could be done within 30 days. In response to landlord abuses under the "substantial remodel" provision, several cities have passed an ordinance requiring that landlords obtain permits before serving tenants an eviction notice. Among these are Long Beach, Los Angeles and South Pasadena. The Long Beach and South Pasadena ordinances were passed by a unanimous vote. While One San Mateo has not yet confirmed the vote on the Los Angeles ordinance, we are aware that it was adopted as an urgency ordinance, which requires approval by at least three-fourths of the 15-member council.

3. Create a data registry to track compliance.

While AB 1482 created a set of renter protections, there currently is no way to track whether the requirements of the law are being adhered to. A data registry would provide a mechanism for monitoring whether landlords were raising rents within the prescribed limits and eviting tenants only for just cause.

A data registry could provide other valuable information as well. During the course of San Mateo's affordable housing task force in 2015/16, the absence of accurate data on rents was a complaint expressed by all parties. It was a strong impediment to understanding the realities of the rental environment that the group was charged with addressing.

The value of data cannot be overstated. It is the cornerstone to assessing current realities and responding with the creation of appropriate policies, whether in housing or any other area of human endeavor. As Matthew Desmond, author of the Pulitzer prize-winning book *Evicted*, wrote, "Imagine if we didn't know how many Americans were incarcerated each year or how many dropped out of high school, got divorced, or lost their job. If we don't know how big a problem something is, where it is happening, or how many families are touched by it, then how can we begin the critical work of finding solutions?"

The City of El Cerrito created a data registry in 2019, and the City Council of Concord voted on December 1, 2020 to launch one.

Subject: San Mateo's Draft Sixth Cycle Housing Element

February 1, 2022

To whom it may concern:

The Campaign for Fair Housing Elements is a coalition dedicated to ensuring that every city in California produces a Housing Element which complies with the California Department of Housing and Community Development's requirements. We have reviewed San Mateo's Housing Element process and Draft Adequate Sites List as of January 14¹.

We have the following concerns. The city's estimates of ADU production are too optimistic. The expected density of sites is unrealistic. There's no evidence that sites will be developed in the first place. The site inventory is not informed by AB 686's requirements to Affirmatively Further Fair Housing.

ADU Estimates

The city's ADU estimates are incorrect. According to HCD's Site Inventory Guidebook² (page 31), there are two "safe harbor" options for ADU construction estimates. These are (1) five times the average annual construction before 2018, or (2) the average annual construction since 2018. According to San Mateo's Annual Progress Reports and the city's claims, data is available as follows:

2015	2016	2017	2018	2019	2020	2021
2	3	16	8	45	52	67

The safe harbor options are then as follows:

Option (1) (2015-2017)	$\frac{2+3+16}{3}$ × 5 = 35 per year, 280 over eight years.
Option (2) (2018-)	$\frac{8+45+52+67}{4} = 43 \text{ per year, 344 over eight years.}$

The City's estimate of 480 ADUs is not supported by these calculations. If the City doesn't use a Safe Harbor option, it must provide additional evidence. If the City doesn't provide evidence it must reduce its ADU projections.

¹ <u>https://cityofsanmateo.org/DocumentCenter/View/86766/Draft-Adequate-Sites-List-and-Methodology</u>

² <u>https://www.hcd.ca.gov/community-development/housing-element/housing-element-memos/docs/sites_i</u> <u>nventory_memo_final06102020.pdf</u>

Realistic Capacity

The City states on page 2: "When establishing realistic unit capacity calculations, the jurisdiction must consider existing development trends of existing or approved residential developments at a similar affordability level in that jurisdiction". The city must not only consider previous development trends, but also whether a site will be developed *at all*. HCD requires cities to account for the difference between a site's *nominal capacity* (the number of units it can theoretically support) and its *realistic capacity* (the number of units likely to be developed there over the next RHNA cycle).³ The City assumes that its entire site inventory will be developed--an unwarranted and unsupportable assumption.

Specifically, at least half of the city's lower-income inventory is assigned to non-vacant sites. Cities are to presume that they will not be developed, in the absence of "substantial evidence" to the contrary.⁴ The City states on page 1: "The analysis does not include the economic feasibility of specific sites, nor does it take into consideration the owner's intended use of the land now or in the future." As substantial evidence of development has not been provided, the city should use the probability of development of these sites over the previous cycle³.

Results from the last RHNA cycle shed light on the sites' realistic capacity. An acceptable Site Inventory would take into account San Mateo's historic rate of development. Only one in twelve sites were developed during the Fifth Cycle.⁵

Sites listed in 5th HE	Sites developed during 5% of 5th Cycle	n Cycle Percentage (Projected)	
94	5	8.5%	

Fifth Cycle Development History

The City has not provided evidence of future development for each site. Therefore, the City is *required* to use this percentage to compute the realistic capacity of its sites.⁶ San Mateo has a **total allocation of 7,081 units**. Given this likelihood of development, a site capacity of 10,898 units will produce only **908 units** over the planning period. Counting expected development of

⁶ See note 3, above.

³ Housing Element Site Inventory Guidebook, pp. 20-21, "Local or regional track records, past production trends, or net unit increases/yields for redeveloping sites or site intensification. This estimate may be based on the rate at which similar parcels were developed during the previous planning period, with adjustments as appropriate to reflect new market conditions or changes in the regulatory environment. If no information about the rate of development of similar parcels is available, report the proportion of parcels in the previous housing element's site inventory that were developed during the previous planning period." [Emphasis mine.]

⁴ Housing Element Site Inventory Guidebook, p. 27, "If a housing element relies on nonvacant sites to accommodate 50 percent or more of its RHNA for lower income households, the nonvacant site's existing use is presumed to impede additional residential development, unless the housing element describes findings based on substantial evidence that the use will likely be discontinued during the planning period." [Emphasis mine.]

⁵ Kapur, S., Damerdji, S., Elmendorf, C. S, & Monkkonen, P. (2021). What Gets Built on Sites That Cities "Make Available" for Housing? UCLA: The Ralph and Goldy Lewis Center for Regional Policy Studies. Retrieved from <u>https://escholarship.org/uc/item/6786z5j9</u>. Maps available at <u>https://lewis.ucla.edu/RHNAmaps/</u>

1,721 units on non-inventory sites and **344 ADUs**, this means that the Site Inventory has a **shortfall of 4,108 units**. In order to produce this many units at a one-twelfth probability, sites must be identified for **49,824 units**. (See Appendix A for details.)

These numbers are high, but they underscore that if San Mateo continues to proceed as it has over the previous planning cycle, it is planning to fail. The city can either produce roughly fifty thousand more units of planned capacity, or justify these favorable assumptions by identifying and changing the factors that made development so unlikely. Unless that happens, the Draft Housing Element is not in compliance with HCD's guidance and should be rejected.

Expected Density

On page 3, an attempt is made to calculate the average built density of large residential projects. But this is overly optimistic in two ways. First, the Kiku Crossing project is a clear outlier. Will one in fourteen future projects be a 100% below market rate project within a half-mile of a Caltrain station using AB 1763 to develop at nearly four times base density? Calculating a median would have been better here. Secondly, the "average" was calculated by averaging all of the per-acre numbers, rather than dividing the total number of units by the total acreage, which yields 40 du/ac (without Kiku Crossing) and 43 du/ac (with). The method used by the city does not reflect the typical yield of an acre of housing, and the city should not use it.

Furthermore, the City refers to "proposed and/or approved" projects, then uses them to "demonstrate that **as-built** densities are consistently above zoned density" so the City may assume more realistic capacity for the sites. Six of the 14 projects included on this list also appear on the Cycle 6 Draft Adequate Sites List. Projects that are being counted towards Cycle 6 should not be used to calculate "as built" densities over Cycle 5. Eliminating these six projects yields 38 du/ac. Thus, the assumption of 100% zoned density production for R3, R4, R4D and R5 parcels (base density 35-50 du/ac), which the City applies to 31 sites with one of these designations, is wrong.

The City performs a similar analysis on the average built density of commercial & mixed use projects with residential development by averaging all of the per-acre numbers, which yields 48 du/ac, rather than dividing the total number of units by the total acreage, which yields 40 du/ac. The city then notes that only 75% of commercial & mixed use projects included residential development and multiplies their calculated "average dwelling unit per acre **for projects with residential**" by 0.75 to get an expected dwelling unit per acre for **all** commercial & mixed use projects. This is overly optimistic as the city has eliminated commercial & mixed use projects with no residential from their calculation, which is then applied (after a 25% discount) to **all** commercial & mixed use projects. It would be more accurate to simply calculate and apply the built residential density of all commercial & mixed use projects, which is 29 du/ac.

However, seven of the 20 projects included on the list of commercial & mixed use projects also appear on the Cycle 6 Draft Adequate Sites List. Eliminating these seven projects yields 1.7 du/ac. Thus, the City's "conservative" assumption of 30 du/ac for commercial & mixed use projects does not reflect the typical yield and the City should not use it.

Additionally, the City states on page 8, "For those sites less than 0.5 acres, in general it was assumed that the realistic capacity would be approximately 50% of zoned capacity, given the difficulty of maximizing use of those sites." However, of the 82 sites less than 0.5 acres and zoned for commercial & mixed use, only one has a realistic capacity of less than or equal to 50% zoned capacity. Sixty-three have a realistic capacity of 60%-80% of zoned capacity and 18 have a realistic capacity of 100% of zoned capacity.

Specific Issues

We've looked at some of the factors which have caused actual development to fall short of expectations in the past, and these errors continue to be reflected in the current inventory.

Forty-two of the 212 sites identified on the City's Adequate Sites List were also included on the site inventories for Cycle 4 and Cycle 5. Three of these sites are rated 4 (out of 5) on development potential and 26 of these sites are rated 5. The city does not identify any constraints to development of these sites over the past fifteen years, nor note any new incentives to development, beyond the rezoning required by AB 1397.

Site Address	Assessor Parcel Number (APN)	Very Low	Low	Moderate	Above Moderate	Total
4060 EL CAMINO REAL	042-241-180	13	8	8	22	51
4060 El Camino Real	042-241-180	10	6	7	17	40

One site appears on the City's Sites List twice, with different unit allocations:

For each site, the City notes the "Max Density Allowed (units / acre)", "Realistic Max Density (units/acre)", and "Parcel Size (gross acres)". The City also notes the "Realistic Density times size", which is presumably calculated by multiplying the Realistic Max Density by the Parcel Size. The "Total" number of units on each site is equivalent to the number reported for the "Realistic Max Density times size", except for sites that already have an approved number of units.

However, 35 sites have a "Realistic Max Density times size" / "Total" that is larger than the Realistic Max Density multiplied by the Parcel Size. For 9 of these sites, it appears Max Density Allowed was used instead of Realistic Max Density in the calculation (highlighted orange below). For 9 of these sites, a number larger than Max Density Allowed was used (highlighted red below), and for 17 sites, a number between Realistic Max Density and Max Density Allowed was used (highlighted yellow below). Between the duplicate APN and the overestimation of Realistic Density, the Sites List overestimates capacity by 616 units.

Assessor Parcel Number (APN)	Max Density Allowed (units / acre)	Realistic Max Density (units / acre)	Parcel Size (gross acres)	Realistic Density times size [<i>reported</i>]	Total	Realistic Density times size [actual]
035-466-010	50	30	1.66	83	83	50

042-245-120	50	40	0.30			
042-245-130	50	40	0.36			
042-263-010	50	40	0.73			
032-122-210	35	35	0.14	7	7	5

Additionally, on page 8, the city states that "For this inventory, no individual site less than 0.5 acres is allocated toward lower income units; however, as per State guidance, such small sites can be considered either moderate income, above moderate income, or both." However, the following sites are allocated toward lower-income units and are below a half-acre in size.

Site Address	Assessor Parcel Number (APN)	Parcel Size (gross acres)	Allocation
117 N San Mateo Dr	032-292-080	0.41	3 VLI, 2 LI

Affirmatively Furthering Fair Housing (AB 686)

Per HCD's Guidance Memo on Affirmatively Furthering Fair Housing, "AB 686 now requires that a jurisdiction identify sites throughout the community in a manner that is consistent with its duty to affirmatively further fair housing (AFFH) and the findings of its assessment of fair housing, pursuant to Government Code section 65583, subdivision (c)(10)(A)." While the City has

⁷ California Department of Housing and Community Development, Affirmatively Furthering Fair Housing, Guidance for All Public Entities and for Housing Elements, April 2021, pg 12

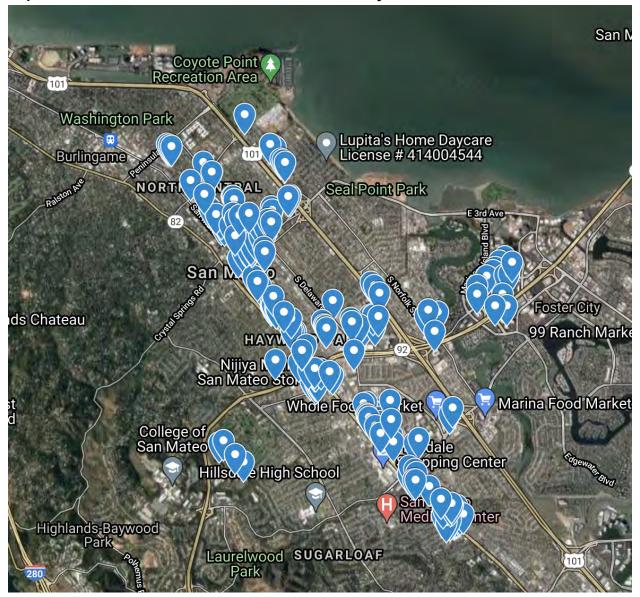

released excerpts from their Housing Needs Data Report⁸ it is unclear how the data assessments presented in the report informed the selection of sites.

For example, no sites fall into the "Highest Resource" TCAC Opportunity Area designation and it appears that the sites predominantly fall into areas where three or four racial groups mix.

Map of Neighborhood Segregation by Census Tract, 2019

⁸ Excerpts from Draft Housing Needs Data Report: San Mateo, December 2021

Map of Sites listed on San Mateo's Draft Site Inventory

Please identify enough sites and commit to an appropriate program of rezoning and constraint removal in a manner that is consistent with your duty to affirmatively further fair housing and such that the actual capacity of the Sites Inventory over the next eight years meets or exceeds your RHNA.

The housing crisis is a regional problem, and our cities must work together to solve it. Thank you for your time and consideration,

Adam Buchbinder Campaign for Fair Housing Elements

Peninsula for Everyone

Appendix A

Of the sites listed in the City's Site Inventory in the Fifth Housing Element, only about 8.5%, or one-twelfth, have been developed. (Data is available for five years of the cycle, so the math is $\frac{5}{94} \times \frac{8}{5} = 0.085$.) The Draft Housing Element must include this information and use it to adjust its Sixth Cycle estimates of realistic capacity.

Credit is also given for development on non-inventory sites, minus ADUs, as follows. Take the total production over the 2015-2020 timeframe. Subtract development on inventory sites, as reported on HCD's dashboard⁹ for 2018-2020 and by the City before that¹⁰. Because AMI projects are not reported by address, assume that none were in the site inventory. Because site names were not identified by address or APN, manual matching was necessarily fuzzy. Finally, scale the remainder by 8/6 to get the expected development over the entire Fifth Cycle.

	VLI	LI	МІ	AMI
Production 2015-2020	126	52	94	1545
ADUs (2015-2017)	0	0	0	21
ADUs (2018-2020)	0	0	0	105
Development on Inventory Sites (2015-2017)	0	19	15	293
Development on Inventory Sites (2018-2020)	0	6	0	67

Subject: OSM remarks on housing element programs

Dear Mayor Bonilla and Members of the San Mateo City Council,

In response to the staff report dated February 7, 2022, whose subject is "Housing Element Goals, Policies and Programs", One San Mateo would like to offer the following remarks on a few items that are of special interest to us.

FRAMING. First, we would like to support the utilization of the Three P's in the framing of the Housing Element goals. This reflects current thinking about the high-level categories of actions that need to be included in a comprehensive plan to promote inclusion and provide for a jurisdiction's future housing needs. It is a crisp and effective way to organize thinking about the myriad strategies that can be used to address our affordability problem and ensure a suitable living environment for all San Mateans. We encourage adoption of the Three P's framework and support the addition of a sustainability goal as well. In the interest of consistency, this fourth goal might begin with the word "Pursuit."

DISPLACEMENT. Under the "Fair Housing" heading on Attachment 3, we encourage the inclusion of a number of strategies that have been upheld by community members in the context of surveys and forums and whose importance was acknowledged at the council's blue skies event on January 29. These strategies are intended to reduce displacement by preventing people from being forced from their homes. The specific entries that address this are as follows:

- Require documentation from landlords who use remodel exemption to evict tenants (AB 1482)
- Require tenant relocation payments for No Fault evictions for those with tenure less than one year (extend 1482)
- Establish a rental registry to track rents and evictions citywide

POPULATION PRIORITIES. The individuals most underserved by the market, whose very survival is threatened by our spectacular housing costs, are those with the lowest incomes and those with special needs. Therefore, under the "Fair Housing" heading, we also encourage the prioritization of ELI and VLI units, along with units to serve people with special needs, in city-assisted affordable housing projects.

SITES. We are aware of the letter that has been forwarded to council from the Campaign For Fair Housing Elements and are sympathetic to the concerns that prompted the writing of this letter. Recent changes to the sites identification process have been made in the interest of increasing its authenticity and ensuring that it serves equity goals. If the current sites inventory for San Mateo fails to fulfill the newly imposed requirements, we encourage the city to remedy this in the interest of creating a Housing Element that both succeeds in its intended purpose and receives approval by HCD.

R-1 ZONING. Finally, we feel compelled to mention that we continue to take exception to the strenuous efforts that have been made during this Housing Element update to avoid making changes to R-1 neighborhoods. R-1 zoning was originally introduced as a workaround to racially explicit zoning, and its status as a progenitor of white privilege was cemented during the decades when government-imposed policies excluded all but whites from owning homes in these neighborhoods. When Richard Rothstein addressed the SAMCAR community in October of 2020, he was asked what should be done to reverse the injustices of the past, and the first approach he mentioned was the modest densification of R-1 neighborhoods, i.e. allowing both plexes and modest-scale garden apartments to be built in neighborhoods currently zoned R-1. We concur with his thinking on this and regret that San Mateo has resisted moving in this direction, which would serve significantly to advance the goal of Affirmatively Furthering Fair Housing.

Thank you in advance for your consideration to our thoughts and for the opportunity to share them with you.

Sincerely,

Karyl Eldridge Vice Chair of One San Mateo

Subject:	FW: Joint Meeting on Housing Element
Hi Joan,	
Here is another Public Comment	for tonight's meeting.
Mary	

Subject: Joint Meeting on Housing Element

Hello Mayor, members of the city council, and planning commission:

HLC is very interested in tonight's joint Planning Commission and Council meeting to discuss policies for the housing element and I would like to share our perspective and our policy priorities. Housing Element policies are usually designed and formed to both meet the needs identified in the needs assessment and to overcome barriers identified under constraints. Additionally this year, the city must complete a fair housing analysis that would also present opportunities for solutions.

While this could hurt the city's ability to get a certified housing element on the first try, if the city changes task order, it will make it easier to engage with the local community and to, make a better plan, and shorten the review process.

That said, we have some specific policies that we would like you to consider:

Funding:

- 1. Increase the commercial linkage fee and design it to preference partnerships between affordable housing providers and commercial developers.
- 2. Increase the transfer tax on real estate sales over 1 million dollars.
- 3. Make affordable homes exempt from some fees (like park fees) to decrease the cost and make the city's limited resources stretch further.

On sites:

1. Beyond following state guidelines on the process for developing a sites list, look at publicly owned sites, including areas that are owned by other agencies, for the opportunity to provide affordable homes.

2. Also look at quasi public sites (churches, nonprofits). If an institution is interested in developing affordable homes, what steps (including rezoning) does the city need to take to enable that development.

Overcoming Constraints:

- 1. Again, complying with state law and identifying constraints before you make decisions on policies is critical.
- 2. Strategies for parcel assembly
- 3. Lower your parking requirements, where appropriate
- 4. Review the neighborhood associations practices for electing leaders, hosting meetings, and providing opportunities for everyone in the neighborhood to participate.

In addition, the city needs specific policies and programs to create ELI housing and housing for special needs populations, and to help prevent displacement and homelessness.

The process for developing a housing element has changed significantly since the last cycle. It is challenging to keep up with the changes and meet the deadlines. But San Mateo has some of the strongest housing leaders on both the Planning Commission and City Council. It is HLC's hope that the City will create a model Housing Element - one of the best in the state that will serve a an example to other communities in our county and follow the process as outlined by HCD. We look forward to the continued conversation about policies and programs after other work has been completed.

Thank you for your time and leadership.

Evelyn Stivers Executive Director Housing Leadership Council of San Mateo County 2905 S El Camino Real San Mateo, CA 94403

Regarding: San Mateo DRAFT Adequate Sites List, December 2021

Dear City Of San Mateo Officials,

It has come to our attention that the City Of San Mateo has listed as 'moderate' the chance that property which is owned by the IBEW on Leslie Street may change its current use to housing during the RHNA cycle six which runs from 2023 through 2031.

I am writing to inform you that the IBEW has absolutely no intention of changing its use during that time period. We are viewing the current use as a long-term investment.

Respectfully, Deil Manno

Dàvid M. Mauro Business Manager/Financial Secretary IBEW Local Union 617

Housing Element Best Practices: Lessons from Previous Cycles

874 of 1252anuary 2022

HOUSING ELEMENT BEST PRACTICES: Lessons from Previous Cycles

MidPen Housing has compiled a set of case studies to illustrate high-impact policies advanced in the last Housing Element cycle and suggest strategies based on successful implementation. This current cycle presents an important opportunity to build and expand upon what worked previously to plan for equitable growth.

At the time of the last Housing Element cycle, many of the tools profiled were designed to exceed Statelevel policies established by the State Density Bonus Law (SDBL) for projects with affordable housing. In recent years, the State's policies, through the more powerful SDBL and SB-35 procedural incentives, have evolved considerably, accelerating change. This creates an opportunity with this next cycle to again look at the State-level landscape as a base to respond to, build from, and exceed with local policies tailored to local specifics and needs.

As with the most recent cycle, jurisdictions can look at today's tools and find ways to make them most effective by making more sites eligible, or set policies that go beyond them with the goals of delivering more housing more quickly. Jurisdictions able to maximize land opportunities and reduce development costs can help spread limited public resources further. Given the vastly changed State landscape, jurisdictions have a much different starting point than the last Housing Element cycle to evaluate opportunities that generate the most impact from their policies.

The Housing Element is a key step to advance the infrastructure needed to support inclusive development through planning and building tools. The most effective jurisdictions had site inventories and policies that were complementary. As jurisdictions work on their policy tools with this cycle, it is critical to take a tactical approach to site selection to realize feasible implementation. We hope these examples are useful to city partners and other community stakeholders.

POLICY: Master-planned sites with opportunities to maximize housing density and share infrastructure; senior housing overlay

RATIONALE: Increases feasibility of affordable housing by spreading density and other planning calculations across a larger development site

CITY EXAMPLE: Foster City

Foster City identified an undeveloped 15-acre City-owned property adjacent to City Hall as a housing opportunity site with a vision for a master-planned, mixed-use, mixed-income senior community. In 2011, the City began negotiations with the master developer and pursued a project that consisted of 66 affordable homes along with 355 market-rate and assisted living units. In addition to including the site in their housing element, another enabling policy was utilization of a senior housing overlay zone to facilitate affordable senior housing (reduced parking needs, reduced unit sizes, increased density, fee waivers, priority processing). This form-based/Floor Area Ratio (FAR)-based approach to density makes sense for projects with smaller unit types like senior or supportive housing. Structuring the development's high-level approvals as a larger master plan instead of breaking into three to four separate projects enabled cost savings for the affordable residential component, increasing feasibility.

PROJECT IMPACT EXAMPLE:

Alma Point at Foster Square - completed

- Units: 66 (127 units/acre, 78 units/acre including shared surface parking)
- Impact: The City's senior housing overlay enabled the project to achieve a much higher density level while fitting within an appropriate built form for the site. Given that the site is senior housing with smaller units, the site can support much higher units/acre within the same building footprint. Foster City's code has a minimum square footage for rental units of 750 sq. ft., while senior housing units are typically below 550 sq. ft. for studios/1-bedrooms. The ability to leverage non-residential components of the project (public space and commercial space) reduced costs for elements like parking and infrastructure. Senior parking requirements of .5/unit for residents and .5/unit for guest would have resulted in a required 1:1 ratio. With shared parking, the project was able to move forward with a .59:1 ratio
 - Cost savings of \$1.6M, including \$1.27M in shared infrastructure and \$202K in saved costs via the parking reduction
- Increased density from 35 units/acre to 127 units/acre

POLICY: Fee exemptions for affordable housing

RATIONALE: Increases feasibility of affordable housing by decreasing costs **CITY EXAMPLE:** Sunnyvale exemption for park in-lieu fees

- Park dedication in-lieu fee: \$69 per square foot
- This is the biggest lever in Sunnyvale's fee schedule
- The City waives park fees for affordable rental projects and for affordable units in mixed-income rental projects, such as affordable units in density bonus projects

PROJECT IMPACT EXAMPLE: Edwina Benner Plaza - completed

- Units: 66 (50 units/acre)
- Park impact fee: \$2.4M (\$37.6K per unit)
- Impact: This exemption reduced the total development budget by about 5%. These waived fees are also advantageous to the project's ability to secure financing as they count towards the local leverage calculation utilized by competitive financing sources like the Low-Income Housing Tax Credit program (LIHTC)

PROJECT IMPACT EXAMPLE:

1178 Sonora Court - in development

- Units: 176 (140 units/acre)
- Park Impact Fee: Approximately \$7.8M (\$44K per unit)
- Impact: This exemption reduced the total development budget by about 6%. These waived fees are also advantageous to the project's ability to secure financing as they count towards the local leverage calculation utilized by competitive financing sources like the Low-Income Housing Tax Credit program (LIHTC)

POLICY: Reduced parking standards for affordable housing

RATIONALE: Increases feasibility of affordable housing by decreasing costs Saves one of the typical waivers in the State Density Bonus Law (SDBL) so developers can use it for another feasibility-improving modification

CITY EXAMPLE: Sunnyvale parking reductions

Reduced parking requirements for affordable housing developments and housing for seniors or persons with disabilities were adopted in 2011. The modified parking ratio that MidPen Housing was allowed to use for the 124-unit Fair Oaks Senior Housing project served as the basis for the adopted parking standard for affordable housing for seniors or persons with disabilities. The City also adopted provisions to allow development applications for senior housing, housing for persons with disabilities or housing affordable to lower income households to include requests for further reductions in the parking requirements. The request can be granted if the approving body finds that the applicant's proposed parking standard is adequate through a combination of any of the following considerations: location or proximity to transportation, variety or forms of transportation available, accessibility, services and programs offered, or population served by the proposed housing development. Many jurisdictions have adopted lower parking requirements for affordable housing based on robust data showing lower rates of car ownership and utilization at affordable housing properties given income, as well as locations that are often proximate to high-quality transit given financing-program criteria.

PROJECT IMPACT EXAMPLE: Onizuka Crossing - completed

- Units: 58 (46 units/acre)
- Parking spaces required without restrictions: 122
- Parking spaces provided with reductions: 93
- Cost per space: \$22.5K
- Parking savings: \$653K
- Impact: This policy reduced the total development budget by about 2% and enabled the project to utilize its SDBL concessions for other items impacting feasibility

POLICY: Exceptions to development standards for affordable housing

RATIONALE: Increases feasibility of affordable housing through exemptions that go above and beyond what would be enabled through SDBL

CITY EXAMPLE: Half Moon Bay

Section 18.06.050(H) of the zoning code states that development standards for residential uses may be waived or relaxed for an affordable housing project. This provision allows developers much flexibility in designing affordable housing projects. Minimum lot sizes, widths, setbacks, parking, and other requirements can be reduced or waived, as long as the resulting development conforms to the certified Local Coastal Program (LCP) and other applicable provisions of the zoning code outside of chapter 18.06. This was applied in MidPen's Half Moon Village project, which was enabled through partnership with the San Mateo County Housing Authority and City of Half Moon Bay.

PROJECT IMPACT EXAMPLE:

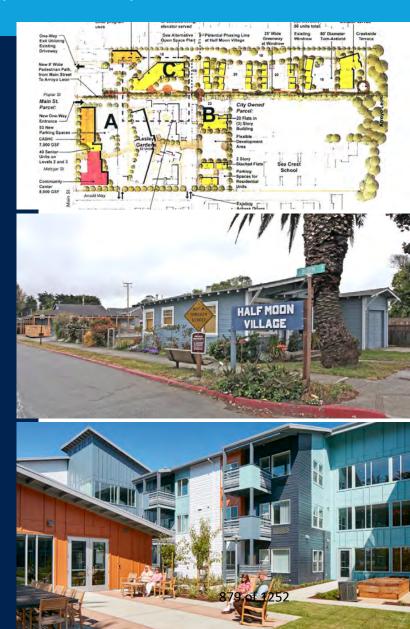

Half Moon Village - completed

- Units: 160 (27 units/acre)
- Exceptions: maximum height (from 28 to 40 ft) and parking (2.25 to .75)

Performed density calculations looking at the larger campus area, which arrived at a density that met LCP requirements

 Impact: With reduced parking and increased height, this policy enabled redevelopment to increase the number of homes from 60 existing units to 160 new units

Cost savings of \$1.8M for reduced parking, 3.7% of the total development budget

POLICY: Affordable Housing Overlay zone

RATIONALE: Increases feasibility of affordable housing through targeted incentives that exceed the SDBL

Upzoning tied to community benefit

CITY EXAMPLE: Menlo Park Affordable Housing Overlay (AHO)

Through Menlo Park's Housing Element process and site inventory analysis, they arrived at the policy tool of an AHO zone with incentives that go beyond the SDBL. The rezoning applied the overlay to affordable housing opportunity sites as well as a targeted specific plan area. Overlays like this create a win-win for site owners and developers that want to provide affordable housing, as the overlay increases site value for those who can execute on the development vision being incentivized. Menlo Park's Gateway Apartments, an affordable housing property acquired by MidPen in the 1980s, presented an opportunity for adding units. The City worked to identify properties that could be a fit for both planning and implementation, looking at ownership and alignment.

PROJECT IMPACT EXAMPLE:

Sequoia Belle Haven - completed

- Units: 90 (31 units/acre)
- Units permitted under R-4-S zoning without AHO: 30 units/acre
- Units permitted under R-4-S zoning with the AHO: 48 units/acre vs 40 units/acre under max SDBL
- Units permitted under prior site zoning (R-3) with the SDBL: 18 units/acre max plus 35% SDBL for 25 units/ acre
- Other AHO incentives utilized:
 - fee waiver
 - reduced parking
 - setbacks
 - building height
- Impact: This policy enabled additional units on the site (from 48 existing to 90 with the redevelopment) through the rezoning pursued during the City's Housing Element process and increased project feasibility through the AHO alternative to the SDBL

880 of 1252

POLICY: Use of surplus land and City-led rezoning

RATIONALE: Increases feasible development opportunities and removes zoning risk

CITY EXAMPLE: Fremont

The City of Fremont reviewed their properties and identified surplus opportunities, including actions to enhance feasibility of development through its General Plan Amendment (GPA) and rezoning. They identified a 2.3 acre vacant site, which became Stevenson Terrace, as land to sell or lease to local public entities proposing the development of low- and moderate-income housing per the State's Surplus Land Act requirement. The City also issued a Notice of Funding Availability (NOFA) to provide financing for affordable housing development which accelerated the process so that Stevenson Terrace could be entitled, positioned to secure additional needed financing, and constructed to provide affordable housing to families quickly. Additionally, the use of the SDBL permitted a higher density and concessions to support a cost-effective design, supporting the City's vision for more affordable housing.

PROJECT IMPACT EXAMPLE:

Stevenson Terrace - completed

- Units: 80 (35 units/acre)
- Rezoning: City rezoned from open space to medium density residential prior to disposition
- Impact: This policy enabled high density housing development and accelerated delivery of housing units

POLICY: Identifying housing opportunity sites owned by mission-aligned organizations

RATIONALE: Increases likelihood of near-term progress on housing goals

CITY EXAMPLE: Santa Cruz County

St. Stephens Senior Housing is a 40-unit senior affordable housing community in the Live Oak community of unincorporated Santa Cruz County. Long considered a "priority development area" by the former County Redevelopment Agency, it was through a partnership with regional non-profit Communities Organized for Relational Power in Action (COPA) that a local member organization expressed a willingness to support the provision of more affordable housing by utilizing a vacant portion of their property. The County of Santa Cruz subsequently approved the subdivision and rezoning of ~1.8 acres of the existing St. Stephens Church property from public facilities to multifamily residential to enable St. Stephens Senior Housing to be built. Beyond the utilization of the SDBL to achieve higher density, the County's code also provided a 75% parking reduction for senior housing, as well as allowed a shared parking arrangement with the Church, which significantly reduced development costs. These policies enabled the Church to enact their vision of aligning surplus real estate to meet their core mission through advancing affordable housing.

PROJECT IMPACT EXAMPLE:

St. Stephens Senior Housing - completed

- Units: 40 (22 units/acre)
- Parking savings: \$457.5K
- Impact: Rezoning and SDBL enabled additional units on the site, and the reduced parking allowance increased project feasibility and lowered development costs (standard requirements)

POLICY: Public sector led rezoning for affordable housing

RATIONALE: Increases feasible development opportunities and removes zoning risk

CITY EXAMPLE: Santa Cruz County

As part of the 2007 Housing Element effort, the County rezoned 6 sites totaling approximately 29 acres to a density of 20 units/acre, creating potential for nearly 600 units. They also completed the environmental review process.

PROJECT IMPACT EXAMPLE:

To date, MidPen has developed 3 of the 6 sites including Schapiro Knolls, Pippin Orchards Apartments and Aptos Blue, and is in the process of developing Pippin Phase II. These projects were zoned by-right per the County's Planned Unit Development (PUD). Design review is the only remaining discretionary approval required to develop the property. This removes substantial business risk for incoming development partners and decreases the time and money needed to obtain entitlements. MidPen estimates this saved \$2M between the 4 projects and also shortened each timeline by at least 12 months.

Santa Cruz County Housing Element Sites Developed / In Development

- Project and Units: 4 communities totaling 254 homes
- Impact: This policy enabled 242 additional units beyond what would have been feasible under the previous zoning.

POLICY: Identifying public and privately-owned sites with existing housing stock for total redevelopment to increase density

RATIONALE: Potential to both improve and expand stock of housing Increases likelihood of near-term progress on housing goals

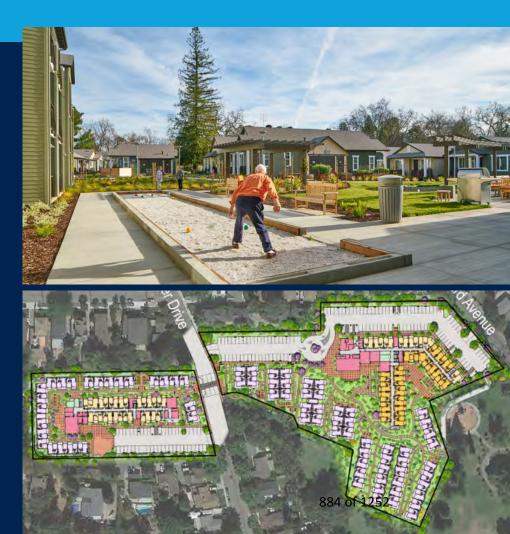

CITY EXAMPLE: Pleasanton

Kottinger Gardens is the redevelopment of Kottinger Place and Pleasanton Gardens, two existing senior communities in the City of Pleasanton, into one integrated senior affordable housing community with 185 new units, doubling the original count. Kottinger Place was owned by the City's Housing Authority and Pleasanton Gardens was privately owned by a nonprofit originally founded with representatives from three local churches. The two properties were located across the street from each other, but operated independently for 40 years. Bringing them together was the result of thoughtful planning and community outreach on the part of The Kottinger Place Redevelopment Task Force formed by the City of Pleasanton to address several long-term challenges at both properties, including increasing maintenance requirements, and the lack of accessibility and energy-efficient features in the homes. The redevelopment was financed and constructed in two phases.

PROJECT IMPACT EXAMPLE:

Kottinger Gardens - completed

- Units: 185 (28 units/acre)
- Impact: Redevelopment of 90 functionally obsolete public housing units and privately-owned affordable homes for seniors into a high-quality new senior affordable development of 185 units

February 28, 2022

Policy Recommendations for 6th Cycle Housing Element

Dear Planning staff:

YIMBY Law submits this letter to share our policy goals and recommendations for the Policies and Programs section of your Housing Element. We appreciate the opportunity to participate in the Housing Element process.

The Policies and Programs section of the city's Housing Element must respond to data, analysis and findings presented in the Housing Needs section. We repeatedly see findings that housing prices are high, segregation exists, and there is a lack of housing for special populations, but the Policies and Programs don't respond to these findings or try to change outcomes. The overview of the city's housing environment should set the scene, and the policies and programs should explain what the city is going to do to fix it.

Our policy goals are as follows:

Affirmatively Furthering Fair Housing

1. Prioritize rezoning in high resource, historically exclusionary neighborhoods. Many of the highest resource neighborhoods with the best access to jobs, good schools, and other amenities have histories of exclusion which are still reflected in their zoning. Cities should rezone to allow more housing opportunities in those neighborhoods, particularly those with low Vehicle Miles Traveled, as part of their Housing Elements.

- 2. Establish a strong tenant protection ordinance so that new housing benefits everyone. Development should not permanently displace current residents. Housing replacement programs, temporary housing vouchers, right of return, and demolition controls will create stability for renters while allowing new homes to be built for new households and to accommodate the growth associated with RHNA. In your sites inventory and rezoning programs, you should prioritize development on sites with owner-occupied housing & commercial uses over those with existing rent-controlled apartments or other rental housing with lower income residents.
- 3. Support homeownership opportunities for historically excluded groups. Homeownership continues to be a path to building financial security and inter-generational wealth, which has been systematically denied to many Americans. As a society, we need to make this right by intentionally offering opportunities to communities who have been excluded. The housing element should identify opportunities to create a variety of for-sale housing types and create programs to facilitate property ownership among excluded groups.

Site Capacity

- 4. Adequately plan for density. Ensure that a site's density will accommodate the number of homes that are projected to be built. In addition, make sure height limits, setback requirements, FAR, and other controls allow for adequate density and the ability to achieve a site's realistic capacity. Housing will not be feasible if you have a high density paired with low height limits. This density should be emphasized around jobs and transit and should go beyond the Mullin density in those areas.
- 5. Provide sufficient zoned capacity to accommodate all income levels, including a minimum No Net Loss buffer of 30%. Not every site will be developed at maximum density during the eight-year planning period. Identify an ample amount of opportunity sites and zone the sites to accommodate lower-income housing types (usually a statutory minimum of 30 dwelling units per acre) to give the city the best chance at meeting its RHNA.

6. Use data from the 5th Cycle to calculate the likelihood of development for your 6th Cycle site inventory. Likelihood of development is a measure of the probability of an inventory site being developed during the planning period. The median likelihood of development across the state is 25%, meaning only one of every four sites will likely be developed during the planning period for the median city. Incorporating the likelihood of development into the zoned capacity will set the city up to successfully achieve their RHNA, making the housing element less of a paper exercise and more of an actionable, functional document.

Accessory Dwelling Units

- 7. Commit to an automatic mid-cycle adjustment if ADU permitting activity is lower than estimated in the housing element. We highly recommend complying with HCD's standards of using one of its "safe harbor" methodologies to anticipate future ADU production. However, if the city is optimistic about ADU growth, then creating an automatic mid-cycle adjustment will automatically facilitate alternative housing options (i.e., a rezoning program, removing development constraints, ADU incentives, etc.) if the city falls behind the estimated ADU production.
- 8. Incentivize new ADUs, including those that are rent-restricted for moderateor lower-income households or that are prioritized for households with housing choice vouchers. Consider offering low- or no-interest loans, forgivable loans, impact fee waivers for ADUs that are 750 square feet or larger, allowances to facilitate two-story and second-story ADU construction, etc.

Zoning

- 9. Allow residential to be built in areas that are zoned for commercial use. There are a myriad of ways to do this, but a housing overlay is one common policy. Additionally, consider eliminating new commercial space in mixed-use developments where there is not a strong demand or there is otherwise a glut of commercial space that is unused or frequently vacant.
- **10. Allow flexibility in inclusionary zoning.** Cities should require different percentages for different AMI levels. Additionally, we urge cities to incentivize land

dedication to affordable developers in order for market-rate developers to meet their inclusionary requirements. Avoid getting trapped into thinking that the affordable units must be "sprinkled throughout" the market-rate units, or require the market-rate units to look exactly the same as the affordable ones. This should be balanced against not locating all of the affordable units in one place and ghettoizing neighborhoods by creating or perpetuating racially concentrated areas of poverty.

Better Entitlement Process & Reducing Barriers to Development

- 11. Ensure that the city has a ministerial process for housing permitting, especially multi-family housing, and remove impact fees for deed-restricted housing. A discretionary process for housing development creates uncertainty and adds to the cost of construction. For example, multi-family housing should not require a conditional use permit or city council approval unless the builder is asking for unique and extraordinary concessions. Right-sizing governmental constraints, entitlement processes, and impact fees will help the city successfully meet its RHNA.
- **12. Reduce parking standards and eliminate parking minimums.** Minimum parking requirements are a major constraint on housing, especially for lower cost housing types. They can cost in excess of \$30,000 per spot and can raise rents by as much as 17%, and eliminating them is particularly important for smaller & other spatially constrained sites. Consider adopting a parking maximum.
- **13. Cap fees on all new housing.** Most construction costs are outside the City's control, but reducing impact fees can demonstrate that a city is serious about building new housing. At a minimum, cities should delay the collection of impact fees until the issuance of the certificate of occupancy to reduce financial impacts on new housing and make the units cheaper by not asking the developer to carry impact fee charges or debt throughout the construction phase.
- **14. Provide local funding.** One of the largest barriers to building new affordable homes is the lack of city/county funds available to assemble sites, provide gap funding, and to pay for dedicated staff. Without new funding, especially at the local level, we will not be able to build more affordable homes. There are three

new revenue streams that should be considered: 1) **Transfer tax**, a one-time payment levied by a jurisdiction on the sale of a home, may be utilized to raise much needed revenue to fund affordable homes; 2) **Vacancy tax** may be collected on vacant land to convince landowners to sell their underutilized properties and be used to fund the construction of affordable homes; 3) **Commercial linkage** fees should be adopted or revisited for increases on new commercial developments.

We urge you to include these policies in your 6th cycle Housing Element.

Best regards,

Sonja Trauss Executive Director YIMBY Law sonja@yimbylaw.org

Members of the Planning Commission City of San Mateo 330 West 20th Avenue San Mateo, CA 94403

RE: Bayshore Corporate Commons—1720 South Amphlett Boulevard

Dear Members of the Planning Commission:

We are writing on behalf of PS Business Parks ("PSBP"), the owner of property located at 1720 South Amphlett Boulevard in San Mateo, CA ("City"), known as Bayshore Corporate Commons (the "Site"). In anticipation of the Planning Commission's meeting on March 22, 2022, we would like to provide the attached letter to the General Plan Subcommittee that conveys what we believe would be the most appropriate land use designation for the Site as you consider the current Land Use Alternatives.

At its March 7, 2022 meeting, the General Plan Subcommittee generally favored our proposed Mixed Use Medium designation over the current residential scenarios and we hope the Planning Commission will do the same.

We appreciate all of the hard work that the City is putting into this General Plan Update effort. As stakeholders in the process, we look forward to a collaborative partnership with the City as important decisions are being made for the City's long-term economic health.

Thank you for your consideration.

Sincerely,

Bradley Karvasek

Bradley Karvasek Vice President Senior Development Executive

Zachary Dahl Deputy Director of Community Development City of San Mateo 330 West 20th Avenue San Mateo, CA 94403

RE: Bayshore Corporate Commons—1720 South Amphlett Boulevard

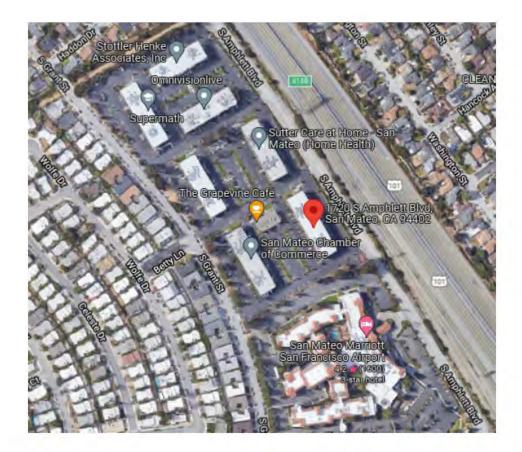

Dear Zach:

We are writing on behalf of PS Business Parks ("PSBP"), the owner of property located at 1720 South Amphlett Boulevard in San Mateo, CA ("City"), known as Bayshore Corporate Commons (the "Site"). In anticipation of the General Plan Subcommittee's meeting on February 17, 2022, related to the Preferred Scenario Selection Process, we would like to weigh in on what we believe would be the most appropriate land use designation for the Site as the Subcommittee considers the current Land Use Alternatives.

By way of background, the Site is approximately 14.5 acres and is located at 1720 South Amphlett Boulevard, which is northwest of the U.S. 101/State Route 92 junction and just north of the San Mateo Marriott (see aerial below). The Site is currently developed as an office park, consisting of eight low-rise buildings with approximately 340,000 square feet of commercial office space, surrounded by U.S. 101 to the east, the San Mateo Marriott to the South, and residential development to the north and west.

PSBUSINESSPARKS.

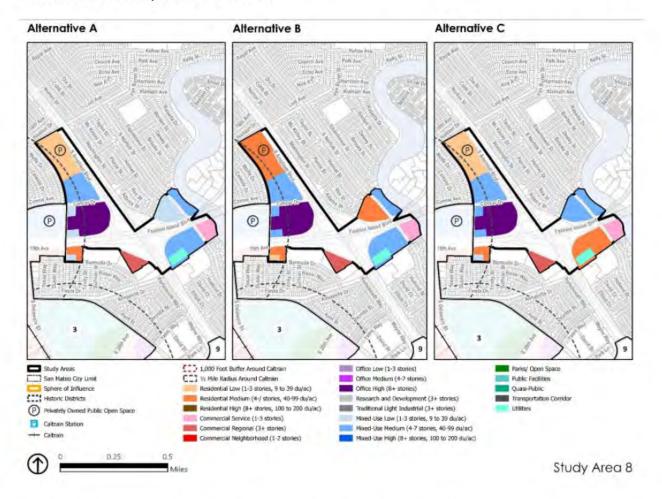

We have reviewed the Land Use and Circulation Alternatives Evaluation dated January 14, 2022 and have some observations about the designations chosen for the Site in the three Land Use Alternatives—A, B, and C (shown below)—in Study Area 8. Alternatives A and C both show the Site designated as Residential Low, which allows for 1-3 stories and 9-39 dwelling units per acre. Alternative B shows the Site designated as Residential Medium, which allows for 4+ stories and 40-99 dwelling units per acre. Notably, all three Alternatives show the neighboring parcel to the immediate south with a Mixed-Use Medium designation. This Mixed-Use Medium designation contemplates 4-7 story buildings with a mix of commercial, office, and/or residential integrated within the same site or same building. It also provides for a residential density of 40-99 dwelling units per acre, 0.25 FAR for retail, and 3.0 FAR for office.

Given the long-term historical use of the Site as office, its location next to U.S. 101, and the immediate adjacency to commercial, office and residential, we believe that a Mixed-Use Medium designation for the Site would be more fitting than the current proposed Residential designations. The allowance for more mixed-use density in an existing commercial zone proximate to the Hayward Park Caltrain Station makes good planning sense and maximizes the opportunities for the Site's ultimate highest and best

use. The City already has recognized that the Mixed-Use Medium designation is appropriate for the adjacent Marriott site; therefore, we respectfully request that the City consider extending that designation north to include the Site. The uses and densities would align in this surrounding context and the City would create the flexibility needed for viable redevelopment of the Site.

We appreciate all of the hard work that the City is putting into this General Plan Update effort. As stakeholders in the process, we look forward to a collaborative partnership with the City as important decisions are being made for the City's long-term economic health.

Thank you for your consideration.

Sincerely,

//SIGNED//

Planning Commission City of San Mateo 330 West 20th Avenue San Mateo, CA 94403-1388

Re: 2040 General Plan Site Recommendation 1885 S. Norfolk Street, San Mateo

Dear Planning Commission,

Windy Hill is a committed partner with the City of San Mateo toward achieving the City's 2040 General Plan vision for a vibrant, livable, diverse and healthy community. In line with the City's values, Windy Hill seeks to develop well-designed projects that help provide a full spectrum of housing choices for the community. Windy Hill is interested in working with the City to redevelop the property located at 1885 S. Norfolk Street (the Fish Market site) with residential housing adjacent to the library.

The Fish Market site is currently zoned Neighborhood Commercial (C1) which permits commercial uses, but also allows residential units with a special use permit. The current General Plan provides "If San Mateo is to meet its housing needs, it will need to encourage multi-family housing on vacant sites and through redevelopment." The Fish Market site presents just such an opportunity site.

As part of the 2040 General Plan visioning, the City is considering a medium density residential designation that would allow four to seven story residential buildings and 40 to 99 units per acre. Windy Hill and the property owner encourage the City to apply this medium density residential designation to the Fish Market site to allow it to redevelop with a fully residential project. If, however, the City wishes to retain flexibility and consistency with the current zoning that allows both commercial and residential, Windy Hill and the owner of the Fish Market site would also support rezoning the property to mixed-use medium, provided that an all residential project was possible. The proposed mixed-use medium designation would allow four to seven story buildings, with 40 to 99 units per acre and a floor area ratio of 0.25 for retail and 3.0 for office.

Windy Hill is excited for the opportunity to provide a residential product on the Fish Market site that would provide for the City's housing needs, both market rate and affordable. Thus, Windy Hill and the property owner encourage the City to designate

the site as medium density residential or mixed-use medium in the 2040 General Plan update.

Sincerely,

Michael Field Windy Hill Property Ventures

Thomas Wilson, President Fish Market Property Owner

From

Sent: Thursday, May 12, 2022 10:27 AM To: General Plan <generalplan@cityofsanmateo.org>; Housing <housing@cityofsanmateo.org> Subject: Re: City Council Draft Housing Element Meeting

Good morning.

Please consider the density of housing in San Mateo.

- Then consider that we are in a drought. Where will the water come from to provide adequate plumbing in all of these new homes you wish to build?
- Will there be newly built, quality schools to provide state-of-the-art learning, or will our classrooms be overcrowded?
- As of now, Mills-Peninsula finds it challenging to accommodate the amount of patients going to the lab and doctors' appointments everyday. What will San Mateo provide to alleviate the amount of lab techs that are needed, availability of medical appointments, the ability to treat ER patients, and to provide the time slots needed for operations?
- The pandemic demonstrated how quickly food and home goods disappear off shelves. Will San Mateo provide more grocery stores for the amount of people that would move into ALL of the new housing?
- With this increase of population, our neighborhood streets as well as freeways are already congested to the point of slowing down to 20 mph at given times during the day and week. What are the considerations and possibly cautions in regard to this clearly present situation throughout San Mateo?

Needless to say, the general plan of housing in San Mateo neglects to look at the big picture. Instead, sadly, it is myopic in regard to filling quotas rather than providing for the needs of its community.

With deep concerns, Maureen Zane

City Council Meeting

NOTICE OF PUBLIC HEARING

NOTICE IS HEREBY GIVEN that the City of San Mateo City Council will hold a public hearing regarding the City's 2023-2031 Draft Housing Element.

MEETING DATE: Monday, May 23, 2022 at 5:30 p.m.

MEETING LOCATION: City Council Chamber, City Hall, 330 W. 20th Avenue, San Mateo, CA 94403; and Remotely via zoom, please visit <u>www.cityofsanmateo.org/publicmeetings</u> for meeting information and access.

PROJECT NAME: 2023-2031 Housing Element Update

PROJECT LOCATION: Citywide

PROJECT DESCRIPTION: Based on community, Planning Commission, and City Council input, the City has developed a Draft 2023-2031 Housing Element that identifies how the City

can accommodate 7,015 housing units over the next 8 years and establishes goals, policies and programs to help address the current and future housing needs within the City while affirmatively further fair housing policies. It is an important document that will guide future decisions about housing and sets forth an action plan to implement housing goals in the next eight years. The City Council will hold a public hearing to receive community input and consider the Draft Housing Element. The Draft Housing Element is available for public review at City Hall and online at https://www.cityofsanmateo.org/4478/Housing-Element-2023-2031.

STAFF CONTACT: Manira Sandhir, Planning Manager,

housing@cityofsanmateo.org;

City of San Mateo, Planning Division, 330 West 20th Avenue, San Mateo, CA 94403

The City Council public hearing has been set for the above date which is open to the public in person or remotely. You may send written comments to the City Staff Contact listed above, and please reference "Housing Element" in the subject line.

If any person challenges this item in court, that person may be limited to raising only those issues the person or someone else raised at the public meeting described in this notice, or in written correspondence delivered at, or prior to, the public meeting.

AMERICANS WITH DISABILITIES ACT — In compliance with the Americans with Disabilities Act, those requiring accommodations for this meeting should notify the city staff, 48 hours prior to the meeting, at <u>clerk@cityofsanmateo.org</u> or (650) 522-7040.

For additional project information please refer to <u>https://www.cityofsanmateo.org/4478/Housing-Element-2023-2031</u>.

THANK YOU!

City of San Mateo **Planning Manager** 330 West 20th Ave. San Mateo, CA 94403 Via Email: housing@cityofsanmateo.org

Re: San Mateo Housing Element

Please accept these comments on the above referenced Housing Element Update on behalf of the members of Carpenters Local 217, which represents working men and women in San Mateo. We appreciate the opportunity and look forward to working together on this important endeavor.

To meet the urgent need for housing units outlined in the State's Regional Housing Needs Allocation (RHNA), as well as the policy goals outlined in the San Mateo Housing Element and larger General Plan, it is vital that San Mateo support efforts to build the local construction workforce. We commend the Housing Element's identifying of sites with the capacity to develop 156% of the City's RHNA, as the members of Local 217 who reside in San Mateo are intimately familiar with the region's housing crisis. Local 217 has long been at the forefront of training the next generation of construction workers, opening pathways to the industry for diverse and traditionally underserved populations, and embracing new technologies and delivery methods to expedite the construction of much needed housing.

The San Mateo Housing Element noted in its required constraints analysis that the lack of a local construction labor force "leads to project delays as workers are either unavailable or lost to more profitable projects." If anything, this undersells the severity of the labor shortage in residential construction. Neither the county nor the city of San Mateo have enough skilled, highly productive residential construction workers to build the 47,000+ units that all of the cities in San Mateo County are supposed to produce over an 8 year time period. The City of San Mateo alone is aiming to build nearly 10,000 of these units. Fewer than 500 San Mateo residents are employed building housing. Five hundred construction workers cannot build 10,000 units of housing in eight years.

To support the policy goals of the Housing Element and overcome identified constraints, Local 217 is requesting that the City add local hire and apprenticeship requirements to the General Plan and Housing Element for all residential construction projects larger than 10 units. The standards Local 217 is proposing in this comment letter would help to ensure greater benefits for the broader community, help ensure that construction labor needs are met, and guarantee that new residential development projects within the City are making needed investments in the region's skilled construction industry workforce,

The City Should Bar Issuance of Building Permits Unless Each Future Residential Development of 10 units or Above has a Viable Apprenticeship Program and Local Hiring **Requirements**

The Carpenters propose the following additions to the Municipal Code of San Mateo for any residential project larger than 10 units

Permitting requirements in the Municipal Code of San Mateo

A person, firm, corporation, or other entity applying for a building permit under the relevant section of the Municipal Code of San Mateo, California shall be required to comply with the apprenticeship, healthcare, and local hire requirements of the Housing Element and General Plan. Failure to comply with the requirements set forth in this section shall be deemed a violation of this article.

Apprenticeship:

For every apprenticeable craft, each general contractor and each subcontractor (at every tier for the project) will sign a certified statement under penalty of perjury that it participates in a Joint Apprenticeship Program Approved by the State of California, Division of Apprenticeship Standards **OR** in an apprenticeship program approved by the State of California Division of Apprenticeship Standards that has a graduation rate of 50% or higher and has graduated at least thirty (30) apprentices each consecutive year for the five (5) years immediately preceding submission of the prequalification documents. The contractor or subcontractor will also maintain at least the ratio of apprentices required by California Labor Code section 1777.5.

Local Hire Policy:

Contractor will be required to provide documentation that the contractor will hire a minimum of twenty-five percent (25%) of staff for any job classification with more than four (4) employees employed whose primary residence, which is not a post office box, is, and has been, within the Counties of San Mateo or Santa Clara within 180 days of the expected date of issuance of the Notice to Proceed for the project.

While there has been a remarkable economic expansion in San Mateo since 2010, rising inequality and displacement adds to the City's affordability crisis and threatens to undermine the region's strong economy. The San Mateo Housing Element calls for a greenhouse gas reduction program and sustainable development, and notes that the City's jobs/housing imbalance continues to grow. Policies that require the utilization of apprentices and a local construction workforce, in tandem with programs currently operational by Local 217 outlined below, will help right that imbalance and ensure that this project helps the City meet the goals of the San Mateo General Plan.

Local 217 has implemented many programs that will enable the City to meet the General Plan and Housing Element goals. These programs include a robust Joint Apprenticeship Training Committee, vigorous utilization of apprentices in San Mateo, healthcare coverage for all members and their families, and innovation within the construction industry.

Joint Apprenticeship Training Committees (JATC's), such as the Carpenters Training Committee for Northern California (CTCNC), are a proven method of career training built around a strong

partnership between employers, training programs and the government. This tripartite system is financially beneficial not only for the apprentice, but is a major benefit for the employer and the overall economy of San Mateo. The CTCNC monitors current market conditions and adjusts the workflow of apprentices to meet the needs of the community, heading off any shortage of skilled workers. History has demonstrated that strong utilization of apprentices throughout the private sector helped California builders produce millions of units of housing.

CTCNC recruitment strategies include robust diversity and inclusionary outreach programs, such as pre-apprenticeship, with proven results in representative workplaces and strong local economies. It is imperative that our underserved populations have supportive and effective pathways to viable construction careers, while ensuring that employers are able to find and develop the best and brightest talent needed to thrive in a competitive economy.

Employer-paid health insurance plans for our members and their families provides preventative services to stay healthy and prevent serious illness. Timely care reduces the fiscal burden for our members and their families, and significantly reduces the utilization of safety-net programs administered by San Mateo and San Mateo County.

Embracing new technologies and delivery systems will have a significant impact on the construction industry, particularly the residential sector. Increasing housing delivery methods reduces project durations and provides San Mateo residents housing sooner. Local 217 is at the forefront of ensuring that new construction technologies deliver those benefits while also creating work opportunities for those already in the trades as well as those looking to begin a construction career. These technologies could help the City meet its jobs/housing linkage goals within the San Mateo General Plan and Housing Element.

Local 217 is in a unique position to address many of the key ideas outline in the San Mateo Housing Element Update. By investing in the training and utilization of apprentices, performing outreach to ensure that the workforce closely mirrors the demographics of our local community, providing employer-paid healthcare for our members and their families, and promoting innovation in the residential construction sector, Local 217 is prepared to assist in closing the affordability gap in San Mateo and the Bay Area. We look forward to engaging City staff and elected leaders as the Housing Element moves forward and working cooperatively to bridge the needs of the City with the skills and tools of Local 217.

Thank you for your time and consideration of these comments.

Sincerely,

Ihn

Ed Evans Senior Field Representative Carpenters Local 217

From: Natalie Spievack Sent: Thursday, May 12, 2022 9:10 PM To: Housing <housing@cityofsanmateo.org> Subject: Housing Element

Hello,

I hope this email finds you well. My name is Natalie Spievack, and I am a Master of City Planning student studying housing and community development at UC Berkeley. I was also raised in San Mateo and am a 2014 graduate of Hillsdale High School.

I appreciate the thought and effort that have gone into the draft housing element. Attached, please see my public comment on how San Mateo can prioritize educational equity and school integration in its housing element.

If you are interested, I am happy to discuss this further with you and your colleagues. Thank you for your consideration.

Best, Natalie

Christina Horrisberger

Re: Prioritizing Educational Equity and School Integration in San Mateo's Housing Element 2022 Update

Dear Ms. Horrisberger,

I am writing to provide recommendations for the City of San Mateo's Planning Division to prioritize educational equity and school integration in the City's 2023-2031 Housing Element. As a San Mateo resident until age 18 and a Class of 2014 graduate of Hillsdale High School, I enthusiastically support the Planning Division's focus on equity in the draft Housing Element. However, the draft Housing Element does not adequately consider the links between housing and educational opportunity.

I urge the City to expand attention to the schools-housing nexus in the final 2023-2031 Housing Element. In doing so, the Housing Element will meet the state requirement to address educational opportunity in the Assessment of Fair Housing. Addressing the schools-housing nexus will also allow San Mateo to better plan for its families and be a leader among California cities. This letter describes how connecting housing policy with education goals can advance equity in both spaces and offers three sets of strategies to bring this goal to fruition.

The persistent link between where students live and where they go to school means that housing and educational inequities cannot be solved in siloes. Like most school districts across the country, the San Mateo-Foster City School District (SMFCSD) largely assigns students to schools by drawing school assignment boundaries around surrounding neighborhoods (Appendix, Figure 1).¹ This means that school demographics largely reflect underlying neighborhood demographics. As a result of policies and practices that have limited access to high-opportunity neighborhoods, Latinx students² and low-income students are concentrated in areas zoned for lower-performing schools.³ These areas include the Shoreview, North Central, and Fiesta Gardens neighborhoods (Figures 2 and 3).⁴

Local housing policy perpetuates housing and school segregation in San Mateo. During the planning period for the 5th Cycle Housing Element (2015-2023), the bulk of affordable multi-family housing that

² Black, Native Hawaiian and Pacific Islander, and Native American students, who are also marginalized, are not included in this analysis because they represent very small shares of the San Mateo population (<3%).

¹ This analysis focuses on SMFCSD, the local elementary school district, because segregation levels are higher in elementary school than in middle or high school. That is because the larger number of elementary school attendance zones means the racial composition of neighborhoods and schools is more closely linked.

³ Rothstein, Richard, "The Black Lives Next Door," *The New York Times*, August 14, 2020, https://www.nytimes.com/2020/08/14/opinion/sunday/blm-residential-segregation.html.

⁴ There are some notable exceptions. George Hall, College Park Mandarin Immersion, and North Shoreview Montessori are a highly rated public schools located in lower-income areas. However, College Park and North Shoreview are magnet schools, meaning they have no residential boundaries and are accessible by transfer request only. While siting high-performing magnet schools in low-income areas can help increase access to opportunity, research has shown that low-income families are less likely to apply due to a lack of time and information to navigate the school application process.

was approved or built was located in areas that are zoned for lower-performing schools (Figure 4). Additionally, according to the draft Sites Inventory for the 6th Cycle Housing Element (2023-2031), most sites identified for potential development are located in areas zoned for lower-performing schools (Figure 5). While the City may be concerned about building affordable housing in areas near highperforming schools due to a relative lack of public transportation, it is important to note that many lowincome families have vehicles and do not rely on public transportation. Patterns of Housing Choice Voucher utilization also perpetuate housing and school segregation. Voucher holders are more concentrated in areas zoned for lower-performing schools, likely because those areas remain more affordable or accessible (Figure 6).

Affordable housing strategies that increase access to high-performing schools can simultaneously address housing and educational equity. Housing is made more equitable because high-performing schools tend to be located in high-opportunity neighborhoods with other amenities like good jobs, safe public spaces, and clean air that facilitate positive long-term outcomes. Education is made more equitable because increasing access to high performing schools promotes school integration, which has long-term educational and economic benefits for low-income students and students of color, and social and civic benefits for all students.⁵ Furthermore, the benefits of school and housing integration extend across generations – children who attend integrated schools are more likely to live in integrated neighborhoods and send their children to integrated schools as adults.⁶

The current moment offers a unique opportunity for the City of San Mateo to meet its goals of housing affordability and equity while promoting school integration. The City has made achieving housing equity and access for all residents a priority of its 2023-2031 Housing Element. SMFCSD has demonstrated a similar commitment to equity through the recent creation of its Equity Task Force. Additionally, the federal Affirmatively Furthering Fair Housing (AFFH) rule and the State of California's AFFH law have introduced stronger requirements and accountability for cities to address segregation through their housing policies.

The following strategies are recommended for incorporation into the 2023-2031 Housing Element:

- 1. Increase affordable housing, especially multi-family housing that can accommodate families with school-aged children, in areas near high-performing schools.
 - a. Purchase existing multi-family rental properties near high-performing schools and support developers to remove them from the market and restrict them as permanently affordable housing.
 - b. Acquire land near high-performing schools and facilitate development of affordable housing on those sites.

 ⁵ Johnson, Rucker C. 2019. *Children of the Dream: Why School Integration Works*. New York: Basic Books; Turner, Margery Austin, Matthew M. Chingos, and Natalie Spievack. (2021). *White People's Choices Perpetuate School and Neighborhood Segregation: What Would It Take to Change Them?* Washington, DC: Urban Institute.
 ⁶ Braddock, Jomills H., II, and Amaryllis Del Carmen Gonzalez. (2010). "Social Isolation and Social Cohesion: The Effects of K-12 Neighborhood and School Segregation on Intergroup Orientations." Teachers College Record 112 (6): 1631–53; Goldsmith, Pat Rubio. 2010. "Learning Apart, Living Apart: How the Racial and Ethnic Segregation of Schools and Colleges Perpetuates Residential Segregation." Teachers College Record 112 (6): 1602–30.

- c. Target areas near high-performing schools for upzoning to enable denser construction.
- d. Increase inclusionary zoning requirements in areas near high-performing schools to generate additional affordable units.
- 2. Work with the County of San Mateo to strengthen housing policies and supports that help low-income families live in areas near high-performing schools.
 - a. Pair new housing units built in areas near high-performing schools with project-based vouchers (PBVs) to ensure their long-term affordability.
 - b. Provide voucher holders with information about units near high-performing schools through mobility counseling.
 - c. Increase voucher exception payment standards for areas near high-performing schools to the highest level possible to ensure that the level of assistance is sufficient to afford rent in expensive areas.
 - d. Remove barriers to moving to neighborhoods with high-performing schools by providing families with grants for security deposits and moving expenses.
 - e. Incorporate voucher waitlist preference for families with young children to maximize the effects of moving to high-opportunity neighborhoods and enrolling in high-performing schools.
 - f. Increase the value of the cash payments offered to landlords through San Mateo County's Landlord Incentive Programs to landlords who rent properties near high-performing schools to voucher holders.
 - g. Increase the level of first-time homeowner downpayment assistance offered to families buying homes near high-performing schools in order to increase the feasibility of moving into more expensive neighborhoods.
- **3.** Increase coordination between the Planning Division, SMFCSD, and SamTrans to pursue strategies that increase access to high-performing schools for marginalized students.
 - a. Collaborate with SMFCSD to identify priority for students who live in subsidized housing or underserved areas in the school assignment policy.
 - b. Collaborate with SMFCSD and SamTrans to ensure the provision of efficient transportation options for students who want to attend high-performing schools outside their neighborhood.

While these strategies have the potential to substantially improve both housing and educational equity, they should not take the place of investment in housing and schools in low-income and Latinx communities in San Mateo. These investments have opportunity-enhancing effects on the surrounding area and are critical for meeting the needs of people who cannot or do not want to move.⁷ Simultaneous pursuit of the coordinated housing and school integration strategies outlined in this letter and investment in historically disinvested neighborhoods is the most promising path to equity. Additionally, the City must couple these policies with strong anti-displacement protections to ensure that

⁷ Diamond, R., & McQuade, T. (2019). Who Wants Affordable Housing in Their Backyard? An Equilibrium Analysis of Low-Income Property Development. *Journal of Political Economy*, 127(3), 1063-1117.

gentrification pressures do not reduce school diversity by pushing Latinx and low-income students out of schools.

Again, I applaud the prioritization of equity in San Mateo's draft 2023-2031 Housing Element. I welcome the opportunity to further discuss the recommendations in this letter with you and your colleagues. Thank you for your consideration.

Sincerely,

Natalie Spievack

Re: Item 1: San Mateo Housing Element

Mayor Bonilla, Deputy Mayor Papan, Honorable Councilmembers:

Please accept these comments on the above referenced Housing Element Update on behalf of the members of Carpenters Local 217, which represents working men and women in San Mateo. We appreciate the opportunity and look forward to working together on this important endeavor.

To meet the urgent need for housing units outlined in the State's Regional Housing Needs Allocation (RHNA), as well as the policy goals outlined in the San Mateo Housing Element and larger General Plan, it is vital that San Mateo support efforts to build the local construction workforce. We commend the Housing Element's identifying of sites with the capacity to develop 156% of the City's RHNA, as the members of Local 217 who reside in San Mateo are intimately familiar with the region's housing crisis. Local 217 has long been at the forefront of training the next generation of construction workers, opening pathways to the industry for diverse and traditionally underserved populations, and embracing new technologies and delivery methods to expedite the construction of much needed housing.

The San Mateo Housing Element noted in its required constraints analysis that the lack of a local construction labor force "leads to project delays as workers are either unavailable or lost to more profitable projects." If anything, this undersells the severity of the labor shortage in residential construction. Neither the county nor the city of San Mateo have enough skilled, highly productive residential construction workers to build the 47,000+ units that all of the cities in San Mateo County are supposed to produce over an 8 year time period. The City of San Mateo alone is aiming to build nearly 10,000 of these units. Fewer than 500 San Mateo residents are employed building housing. Five hundred construction workers cannot build 10,000 units of housing in eight years.

To support the policy goals of the Housing Element and overcome identified constraints, Local 217 is requesting that the City add local hire and apprenticeship requirements to the General Plan and Housing Element for all residential construction projects larger than 10 units. The standards Local 217 is proposing in this comment letter would help to ensure greater benefits for the broader community, help ensure that construction labor needs are met, and guarantee that new residential development projects within the City are making needed investments in the region's skilled construction industry workforce.

The City Should Bar Issuance of Building Permits Unless Each Future Residential Development of 10 units or Above has a Viable Apprenticeship Program and Local Hiring Requirements

The Carpenters propose the following additions to the Municipal Code of San Mateo for any residential project larger than 10 units

Permitting requirements in the Municipal Code of San Mateo

A person, firm, corporation, or other entity applying for a building permit under the relevant section of the Municipal Code of San Mateo, California shall be required to comply with the apprenticeship, healthcare, and local hire requirements of the Housing Element and General Plan. Failure to comply with the requirements set forth in this section shall be deemed a violation of this article.

Apprenticeship:

For every apprenticeable craft, each general contractor and each subcontractor (at every tier for the project) will sign a certified statement under penalty of perjury that it participates in a Joint Apprenticeship Program Approved by the State of California, Division of Apprenticeship Standards **OR** in an apprenticeship program approved by the State of California Division of Apprenticeship Standards that has a graduation rate of 50% or higher and has graduated at least thirty (30) apprentices each consecutive year for the five (5) years immediately preceding submission of the prequalification documents. The contractor or subcontractor will also maintain at least the ratio of apprentices required by California Labor Code section 1777.5.

Local Hire Policy:

Contractor will be required to provide documentation that the contractor will hire a minimum of twenty-five percent (25%) of staff for any job classification with more than four (4) employees employed whose primary residence, which is not a post office box, is, and has been, within the Counties of San Mateo or Santa Clara within 180 days of the expected date of issuance of the Notice to Proceed for the project.

While there has been a remarkable economic expansion in San Mateo since 2010, rising inequality and displacement adds to the City's affordability crisis and threatens to undermine the region's strong economy. The San Mateo Housing Element calls for a greenhouse gas reduction program and sustainable development, and notes that the City's jobs/housing imbalance continues to grow. Policies that require the utilization of apprentices and a local construction workforce, in tandem with programs currently operational by Local 217 outlined below, will help right that imbalance and ensure that this project helps the City meet the goals of the San Mateo General Plan.

Local 217 has implemented many programs that will enable the City to meet the General Plan and Housing Element goals. These programs include a robust Joint Apprenticeship Training Committee, vigorous utilization of apprentices in San Mateo, healthcare coverage for all members and their families, and innovation within the construction industry.

Joint Apprenticeship Training Committees (JATC's), such as the Carpenters Training Committee for Northern California (CTCNC), are a proven method of career training built around a strong partnership between employers, training programs and the government. This tripartite system is financially beneficial not only for the apprentice, but is a major benefit for the employer and the overall economy of San Mateo. The CTCNC monitors current market conditions and adjusts the workflow of apprentices to meet the needs of the community, heading off any shortage of skilled workers. History has demonstrated that strong utilization of apprentices throughout the private sector helped California builders produce millions of units of housing.

CTCNC recruitment strategies include robust diversity and inclusionary outreach programs, such as pre-apprenticeship, with proven results in representative workplaces and strong local economies. It is imperative that our underserved populations have supportive and effective pathways to viable construction careers, while ensuring that employers are able to find and develop the best and brightest talent needed to thrive in a competitive economy.

Employer-paid health insurance plans for our members and their families provides preventative services to stay healthy and prevent serious illness. Timely care reduces the fiscal burden for our members and their families, and significantly reduces the utilization of safety-net programs administered by San Mateo and San Mateo County.

Embracing new technologies and delivery systems will have a significant impact on the construction industry, particularly the residential sector. Increasing housing delivery methods reduces project durations and provides San Mateo residents housing sooner. Local 217 is at the forefront of ensuring that new construction technologies deliver those benefits while also creating work opportunities for those already in the trades as well as those looking to begin a construction career. These technologies could help the City meet its jobs/housing linkage goals within the San Mateo General Plan and Housing Element.

Local 217 is in a unique position to address many of the key ideas outline in the San Mateo Housing Element Update. By investing in the training and utilization of apprentices, performing outreach to ensure that the workforce closely mirrors the demographics of our local community, providing employer-paid healthcare for our members and their families, and promoting innovation in the residential construction sector, Local 217 is prepared to assist in closing the affordability gap in San Mateo and the Bay Area. We look forward to engaging City staff and elected leaders as the Housing Element moves forward and working cooperatively to bridge the needs of the City with the skills and tools of Local 217.

Thank you for your time and consideration of these comments.

Sincerely,

a

Ed Evans Senior Field Representative Carpenters Local 217 CC: City Clerk: <u>clerk@cityofsanmateo.org</u> OPEIU:29/afl-cio

Subject: Re: Housing Element Sites Inventory

Thank you Zachary. It was our intention for the property to be added to the inventory given the city councils direction for the land-use designation to be updated as part of the general plan amendment process. Understanding now, based on your email below, that the city is only interested in adding sites to the inventory that have a current designation that supports additional development capacity, it makes sense that this property not be included in the inventory. I do know that the landowners are seeking interest in future development applications once the designation has been updated through the city general plan amendment process.

wrote:

Hi Charity,

Thank you for the comment letter and the interest in having this site added to the Housing Element's Adequate Sites Inventory. This letter will be added to the record and provided to the City Council when they review the draft Housing Element at a special meeting on Monday, May 23rd.

In reviewing your site, it appears that based upon it's current land use and density, it does not have any further development capacity. For the Sites Inventory, we are focusing on sites that can accommodate additional housing units based on their current land use and zoning designation and do not require any rezoning Thus, this site does not meet the criteria we have set for inclusion on our Sites Inventory. However, whether or not this site is included on our Sites Inventory does not change its current or future development potential, or ability to pursue a development application.

Thanks again, and have a nice afternoon.

Hi Zach,	
I am following up on o	ur phone conversation from a couple weeks ago regarding a request to add the <u>1501-1555 W</u>
Hillsdale property (Par request from the land	kview Terrace) onto the Housing Sites Inventory list. Please accept the attached letter as a forma owner.
This property is an exc	ellent candidate for the inventory because there is great potential to make use of underutilized
space on an already de	eveloped multi-family housing site. As stated in the attached letter, the existing apartments will ent). Timing of the new construction is alsovery likely within this housing inventory cycle.
	was pleased with the City Council's direction to include this particular property in the preferred
•	map update within an increase to medium density.
Thanks in advance for	your consideration.
Sincerely, Charity

Hi Zach,	
,	

I hope you are having a good week. I am writing to see if you have a minute to connect on the process for adding the property at <u>1501-1555 West Hillsdale</u> into the Housing Sites Inventory as part of the Housing Element Update. I see that the draft element is out for public review. We'd like to formally request inclusion on the inventory. Will the City consider individual requests for inclusion or are they limited to the study areas identified in the draft update? Of course I know that the property doesn't need to be included on the inventory list in order to process an application for housing development. We are just looking at all avenues to promote the possibility for future development on the underutilized portions of this property.

Let me know your thoughts on how best to proceed with this request.

I also left you a voice mail yesterday. I am happy to chat via phone this week if you have time to connect.

Many thanks, Charity

Charity Wagner

Subject: Draft 2023-2031 Housing Element Public Hearing

Dear Mayor Bonilla and Members of the City Council:

Below, in the forwarded message, is a letter that I sent to the Planning Commission on Wednesday May 11, after the study session the prior night, regarding the new building proposal for PA-2021-082 31- 57 S. B St Pre-App that has since been approved. I also attached it as a PDF for reference and for filing, as needed.

Though it is specifically addressing concerns about the proposed project on the corner of B St. and 1st St., I believe it touches on broader issues about housing scarcity, segregation - further marginalizing the low-income, hispanic communities in certain areas of San Mateo.

Since I sent this letter to the planning commission, I have been in correspondence with commissioner Adam Nugent. He provided me with the current draft of the Housing Element, as well as his notes pertaining to the prior draft as well as this draft. I have reviewed each of those three documents extensively, as well as appendix D of the Housing Element. I am writing to say that I fully support his concerns, particularly those around affordable housing in the North Central neighborhood of San Mateo, and the lack of explicit planning on how to address this issue, along with other issues of segregation in San Mateo. I believe that, as it stands, the Housing Element fails to address

In addition to supporting Adam's points, which he details in his notes on the current draft of the Housing Element that will be discussed tomorrow, Monday, May 23, I have some adjacent concerns detailed below:

- In the current draft of the Housing Element, I don't see actionable evidence of real programs and policies intended to address issues of inequality, scarcity, and vulnerability among the low income population in San Mateo
- I am also struck by the fact that the North Central region was not identified as a location in need of more affordable housing, yet it cited multiple times throughout the Housing Element and subsequent appendices, that the region was "overcrowded", thus I can only assume the assessment is made on a technicality that bases on raw volume of housing currently at or under market rate rather than the very observable fact that it still isn't enough?
- I also don't see acknowledgement around what COVID did to the rental and real estate market, which is an extremely temporary phenomena that will inevitably rebound and thus should be further factored into the immediate analysis regarding market value.

Failure to fully address and serve the low-income community that is directly impacted by the development projects in downtown San Mateo as they threaten their community cohesion and livelihood may be in direct violation of the CA Fair Employment and Housing Act, as well as other recently revised and enacted CA laws on housing, particularly SB 330 and SB 8.

My primary draw towards issues of housing, aside from the homelessness and displacement issues that we and neighboring communities continue to witness and feel impacted by, is due to the ongoing development in the downtown region of San Mateo as it is also part of the North Central neighborhood. Rezoning to risk further impacting the neighborhood and negatively impacting housing options and costs for low-income community members is a real threat to the general wellbeing and safety of our whole city. Oakland saw a similar rise in re-development in the early 2010's just after the recession, as did part of San Francisco, and both cities are still struggling with increased crime, violence, homelessness, and civil unrest.

I appreciate your taking my concerns to heart when reviewing the Housing Element and subsequent city planning and development projects, particularly as they apply to the vibrant low-income and predominantly hispanic and latino communities in the North Central and North Shoreline neighborhoods of San Mateo. We should be contributing to a better, healthier community with real, sustainable longevity and opportunity for all of its members, and setting an

example for the greater Bay Area and state of California at large. We should not continue to contribute to the issues of displacement, segregation, inequality, and housing crisis by overlooking the obvious threat of improperly calculated developments and failing to follow through with creating programs and resources for those struggling to get by.

Respectfully, Katrina Monet Salas-Padilla

------ Forwarded message ------From: **Katrina Salas-Padilla** < > Date: Wed, May 11, 2022 at 9:46 PM Subject: Concerns regarding the project proposed for the block on B Street and 1st To: <<u>PlanningCommission@cityofsanmateo.org</u>>

To Whom it May Concern:

My name is Katrina Salas-Padilla, soon to be Katrina Butler. I spoke yesterday during the planning meeting about concerns that I have to do with the proposed rezoning and building project on B St. in San Mateo, on the corner of what is currently Donut Delite. I believe Harvest Properties is developing the proposed plans for the project.

My concerns were specifically about the plan for integrating the nearby latino and hispanic community members who regularly patron the vibrant B St corridor between Tilton and First St, and what efforts are in place to bolster the continued housing crisis in CA and, specifically, the SF Bay Area, particularly for the lower income community immediately surrounding the location of the proposed project.

My fiance and I moved to San Mateo last spring, so unfortunately I was not present at the time of the decision to remove the grocery store in that same vicinity to replace it with a luxury apartment complex, or I would have vocalized these same concerns.

I am a local to the greater Bay Area; I grew up in Benicia just over the bridge from Martinez and Concord. I did my undergraduate degree and worked for many years thereafter at Stanford University. I lived in San Francisco for nearly a decade prior to moving to San Mateo last year. I have seen what projects like the one that Harvest Properties is proposing can do to a community. More than that, I have devoted years of academic study to understanding precisely how displacement, specifically displacement due to industrial pursuits that subsequently brew gentrifying practices, can do to a marginalized group. In short, mental health issues rise, as do suicide rates. If you didn't already know, while the pandemic lowered the overall suicide rate by 3%, it increased the rate by a combined total of 8% among latino, black, and native american young men.

Furthermore, crime will rise. In case you aren't already aware, San Mateo crime rates are presently among the safest in the entire SF Bay Area. San Mateo is currently much safer than Burlingame - the city that Harvest Properties aspires to turn San Mateo into per his presentation last night - and it is even safer than the very safe town of Benicia where I grew up.

This is due to the fact that San Mateo possesses one of the most inspiring elements of any other city I've found in the SF Bay Area; an extremely diverse mix of races, ethnicities, and economic classes. The wealth gap here is very comfortably mended by a strong middle and upper middle class, and the surrounding cities are able to pick up the slack enough to prevent extreme inequality from doing what it does best; push people who do not deserve to suffer - to their very edge.

The economic views that the Harvest Properties representative proposed in last night's meeting were, at best, very flawed. Sure, regions that have a history of being red-lined might make prime real estate for developers who allow the few who own properties in such regions to profit on their coat tails, but how many of the working class families in the north central San Mateo area that pushes out toward the bay actually own their homes? I'd like to remind you that the state of California has recently put several measures in place to strengthen tenants rights for renters. They are also making it much harder to out zone multi family complexes precisely for reasons of scarcity around affordable housing. I am not a legal professional, but I am a policy professional within the National Laboratory system, funded by the U.S. Department of Energy, and I believe that Harvest Properties' pursuit of turning the corner of B St. and 1st in downtown San Mateo solely into a mid-rise commercial and office building could be illegal according to current state regulations, and it is certainly unethical.

I haven't even mentioned the fact that one of the only homeless resource centers is literally on the very next block of this proposed project's location. I intend to forward these concerns to San Francisco officials who might have a vested interest in the matter, given the fact that many of the neighboring homeless end up on their streets at a high cost to their residents.

Though I am a child of Mexican immigrants, and Spanish and English were both my first languages, I am also an entrepreneur, business wise, such that I have taught classes for Stanford in such subjects for years as a Subject Matter Expert. Given that study, I am also qualified to say that my background and history in this region make me a "super user", "pro-sumer", or particularly shaped for understanding what it would take to make this specific region of San Mateo vibrant and attractive to the broader Bay Area community without as much of a social and economic cost downstream. The key word is integration. People like me, like my peers young to middle aged working professionals who are middle, upper middle class, and upper class, who are educated and active members of our communities - do not want to see MORE gentrification and MORE industrial complexes. What we would like to see is subtle preservation of the community gems like this particular corridor of B St. This doesn't mean STOP ALL development projects, because I'm aware that at least two of the buildings on the proposed project's block have been vacant for a long time. This means that building with affordable housing, homage to the historically diverse and primarily latino local groups, and other sustainable and environmentally focused elements, is crucial.

We do not have enough service workers and working class employees to fill our employment needs around the country and that is very true in San Mateo and the SF Bay Area. The moves that Harvest Properties is proposing is only going to make it harder for those people to live and work in our community. There will not be a supply to meet the demand that the development project envisions by opening the door for more working professionals. And where are those working professionals coming from? They don't seem to be repopulating in droves given the new hybrid lifestyle many major companies have promised.

What you can expect to see should you accept Harvest Properties application without consideration for the needs of those currently inhabiting the immediate vicinity of the project location: Aside from rising mental health concerns, homlessness issues, and increased crime, you'll experience even more homeowners fleeing to more affordable parts of the U.S., housing prices will not rise at the rate that they are in other Bay Area cities as has been the case in San Mateo for months. Furthermore, you might even be in over your head with tenant issues which will ultimately come down to planning oversights that should have attempted to promote projects that address the housing and other economic issues we continue to face as a country and as a state, rather than contribute to them.

I appreciate that two out of three of the commissioners who responded last night felt similarly to my above points, but to the one who did not; I encourage you to spend 15 minutes on this specific street corner at 9:45pm on ANY day of the week. It's rather quiet, despite the train, and most of the dinner rush is gone by then. This includes most of the bar scene. Regardless, I lived in the heart of the Mission District as well as North Beach in San Francisco for a long time, and the bustle of a night scene is, for some people, very attractive. This might be especially true for the kind of people you want to work and live in a place like downtown San Mateo; young students, recent grads, working class people with strong work ethics. People who have a very long life and relationship to cultivate with this city - not just those who want to clog the streets on weekends for brunch and then leave like with Burlingame.

I will be sharing these concerns with other officials and interest groups who may also have a concern in the matter, and I will make an effort to continue to show up at planning meetings where this particular project is being discussed.

Respectfully, Katrina Monet Salas-Padilla

Honorable City Council City of San Mateo citycouncil@cityofsanmateo.org 330 West 20th Avenue San Mateo, CA 94403

RE 1900 Norfolk Avenue Request for Mixed-Use Medium designation

Dear Members of the City Council

We request the City Council include 1900 Norfolk on the Sites Inventory List of the Housing Element per the staff report prepared for the May 23, 2022 City Council meeting. We have owned 1900 Norfolk Avenue since 2016 and the property was developed in 1983 with a 165,000 sf office building and 590 at grade parking spaces on the 10 Acre site. Including 1900 Norfolk on the Housing Sites Inventory List with 245 units is consistent with the General Plan Mixed-Use Medium designation the City is studying for this site.

Including 1900 Norfolk on the Sites Inventory list provides the opportunity to develop residential housing on the site. We have in fact conducted various architectural and site studies regarding the feasibility of (a) continued operation of the existing office building and developing the excess land with multi-family residential (b) converting the entire site to a residential use, similar to the immediately adjacent site to the South recently built by Pulte Homes, (c) converting the existing office building to a multi-family residential use, (d) adding additional multi-family housing on the excess land, or (d) a combination of the above referenced uses. We believe there is the opportunity to develop residential housing on this site during the next Housing Element cycle. Including 1900 Norfolk on the Housing Sites Inventory list will allow for the completion of these housing units on this site.

In San Mateo and Santa Clara County older office buildings with significant surface parking have been converted into housing by either replacing the older office or maintaining the office and relocating surface parking into a new parking garage which frees up land for housing. Including 1900 Norfolk on the Sites Inventory list will allow both office and/or housing to occupy the site.

We appreciate your consideration and request the 1900 Norfolk be included on the Sites Inventory List of the Housing Element with 245 residential units.

Best

San Mateo City Council

Who:

Shawn Leong representing the family that has operated Ah Sam Florist and Greenhouses since 1933 and owns the property at 2621 Palm Place and 2645 S El Camino Real San Mateo

Observation:

I have been following planning and development of the areas around our business for 40+ years. The past choices our community has made for development in the past have led to some of the shortcomings now and into the future. We have eleven more years until Ah Sam's centennial anniversary. Celebrating 100 years in business in San Mateo. The business, the family, the employees and retired employees and clients are woven into this community. However, the lack of affordable housing, parking and synergies in our neighborhoods are impacting the quality of life and our ability to enjoy running our flower business. Many of my fellow business owners will repeat the same issues of lack of workers, affordable housing and parking. We continue to see the shrinking presence of the small business that make a community vibrant and captivating.

The short term decisions and loop hole weaving of developers have created a process for everyone looking out for their own needs at the present time. How many developers remain in San Mateo after they have concluded their business. There needs to be a commitment to the community and the future, not just the next 10 or 20 years, but long term, the next 50 to 100 years.

Open for discussion.

The development of 2624 Palm Place into affordable housing and below-market housing with the consideration of generational integration and plenty of parking on the site. We can't just check the boxes to meet the current planning guidelines but need to develop the nucleus of a plan that will give long term purpose to the proposed property. This property and the adjective lots have been excluded from the high density zone even though the properties are closer to the Hillsdale train station than Hillsdale Mall itself. Palm Place would make the ideal commercial alley from 25th ave to the Hillsdale train station in the next 100 years. We are open to discuss how we can achieve this and meet the needs of the family, staff and community.

Summary,

We are part of this community now and will be into the future. By providing for our business, housing for our staff, retired staff and future staff we can continue to provide a service for all the residences. Plus as a member of our community we would like to help individuals be able to live in San Mateo and work in the different businesses that support our San Mateo community. Ah Sam and our family and staff have a plan to continue in this community. We have grown and want to make plans to continue to thrive and that will not be possible unless we are able to do something about affordable housing and parking. No we are not selling our property and No we are not going out of business. We have fought this battle since 1985 when the business transferred from the 2nd generation to the current generation. We invite each member of the Council, Mayor and planning staff to visit with us to discuss this more.

Comment on 2023-2031 Draft Housing Element	This sure doesn't sound like fixing affordable housing.
	" Around 2,000 would be very low income, 1,500 low, 1,600 moderate and 5,700 above average."

I have to assume most of our council is hypnotized by developers. As Joe Biden just said, "Where is our backbone." Very sad.

Comment on 2023-2031 Draft Housing Element	Critical of housing proposals located always near downtown. Abreast logistics neighborhoods could benefit, higher density buildings especially west. San Mateo regarding units why, emphasize lesser "Studios and 1br." pushing out. Families communities need to be mix usage families, seniors and veterans. How many hotels were purchase for temporary housing eventually. Sold due mandated SB-09 were construction of BMR is in development. Sign me up for newsletter. Thanks

July 1, 2022

City of San Mateo 330 W. 20th Ave. San Mateo, CA 94403 **Transmitted Electronically**

Dear Sir/Madam

RE: 6th Cycle Housing Element: Constraints Section

The Building Industry Association of the Bay Area (BIA) respectfully submits the comments contained herein regarding San Mateo's draft Housing Element. Inclusive in each city's DRAFT Housing element is a requirement to include a chapter that provides a comprehensive listing and honest review of government and private sector constraints that may inhibit a city's ability to achieve buildout of its Housing Element.

Per HCD's Construction by Income Building Activity Annual Report, Santa Clara permitted 316 residential units in 2021 (VLI: 0, LI: 38, Mod: 39, Mkt: 239). ABAG's 6th cycle RHNA allocation (2023-2031) for San Mateo is 7,015 total units i.e., VLI: 1,777, LI: 1,023, Mod: 1,175 and Mkt: 3,040. Considering the ongoing housing crisis, it is recommended that San Mateo thoroughly analyze all government-imposed constraints along with non-government constraints that add to the cost and/or inhibit the city's ability to permit and produce new housing of *all* income levels i.e., VLI, LI, Moderate and Market Rate.

BIA recommends the Constraints Section of the city's Housing Element provide, at a minimum, a listing and analysis of the following:

GOVERNMENT IMPOSED CONSTRAINTS:

Development Regulations:

- Parking
- FAR
- Height and/or Density Ranges
- Moratoriums on conversion of non-residential zoned land
- Requiring Commercial Square Footage within Mixed-Use projects

Mitigation Fees

- Increased Park Dedication Fees
- Increase Affordable Housing Fees

Inclusionary Housing (IZ)

- Increasing Inclusionary Housing mandates i.e., accelerating/increasing VLI/LI requirements for new housing projects
- Amenity/Community Benefit Plans (Public Art, PoPo's i.e., Privately Owned/Public Open Spaces, Childcare centers)

• Requiring "above & beyond" dedication requirements for Parks, Roads/Transportation, etc.

Environmental Constraints

- Fault Zones
- Historic Buildings/Neighborhoods

New Taxes

- CFD's for Schools, Infrastructure or Services
- New/Increased/Extended Parcel Taxes
- Any/All New Taxes on Housing
- Revenue "Neutral" conditions (requiring new housing pay 100% for city services)

Mandated Labor Requirements

- Project Labor Agreements
- Prevailing Wage Requirements
- "Local" Construction Workforce Requirements
- Union Apprenticeship Requirements
- "Local" Business Sourcing Requirement

Citizen Concerns:

- Nimbyism/Neighborhood Opposition
- CEQA Lawsuits solely to stop/delay housing projects

Permit Processing Time

Long permitting processing times or permit processes that have a high degree of uncertainty i.e., discretionary reviews or processes with multiple public meetings, increase the cost of housing development for developers by (1) increasing carrying costs waiting for permits or (2) increasing the chance that a project will be rejected following a lengthy processing period.

NON-GOVERNMENT CONSTRAINTS

Land & Housing Development/Construction Costs

- Land (average cost per multi-family unit approaches \$100,000 throughout Bay Area)
- Hard Costs (materials & labor)
- Soft Costs (architects, consultants, govt fees, financing)
- Supply-chain and inflationary costs of materials

BIA appreciates this opportunity to provide comment and recommendation on the City's 6th Cycle Housing Element and looks forward to working with the City of San Mateo to positively address the region's on-going housing crisis.

Respectfully,

Patricia E. Sausedo, Director BIA Bay Area South Bay Government Affairs

Dear Sir/Madam,

Please accept the attached comment letter on behalf of BIA Bay Area for the San Mateo 6th Cycle Housing Element. Thank you,

Patricia Sausedo, Director Government Affairs South Bay BIA | Bay Area From:HousingSent:Monday, August 22, 2022 11:45 AMTo:Nicholas "Nicky" Vu; Eloiza Murillo-GarciaSubject:FW: Housing Element - Measure Y and Hillsdale Station Area

From: Yosef Tahbazof Sent: Friday, August 19, 2022 3:32 PM To: Housing <housing@cityofsanmateo.org> Subject: Housing Element - Measure Y and Hillsdale Station Area

Good afternoon – wondering how measure Y restricts the city's ability to increase height and density along El Camino within the Hillsdale Station Area.

Does any increase over existing zoning require voter approval even if it's necessary to comply with RHNA?

Regards,

--

Hi San Mateo Planning Team and City Councilmembers,

My name is Kendra and I am the Policy Analyst at TransForm. We are a nonprofit policy advocacy organization focusing on better land use and transportation policy at the local, regional, and state level. Thank you for releasing a draft of the City's Housing Element for review and public comment. I am aware that we're sending this past the 30-day comment deadline, but if you get the chance, our team has put together some feedback that we would like to see addressed in the Housing Element.

We applaud the City for releasing their draft Housing Element for feedback so early! We'd love to see if the Element can include clearer goals and language around parking policies and TDM strategies. Please see the attachment in this email to see our comments and recommendations.

Feel free to reach out if you have any questions - we know this is a busy time of year and we thank you so much for your hard work around this!

Thanks, Kendra

Planning Manager and City Council City of San Mateo 330 West 20th Avenue San Mateo, CA 94403

Re: Draft Housing Element Needs Ambitious Parking Updates

Dear San Mateo Planning Department and San Mateo City Council,

TransForm is a regional non-profit focused on creating connected and healthy communities that can meet climate goals, reduce traffic, and include housing affordable to everyone. We applaud San Mateo's work to date on the Draft Housing Element. However, to meet housing, transportation, and climate goals, San Mateo needs to expand on its successful programs and initiate some new ones.

In particular, there will need to be an effective mix of:

- Reducing parking provision and providing incentives and programs to drive less (Transportation Demand Management or TDM)
- Developing sufficient programs to meet affordable home targets of RHNA

We were disappointed to see only passing reference to parking as a constraint to development, in San Mateo's draft Housing Element. The city code currently requires at least 1.5 parking spaces per unit for multi-family developments, and at most 2.2 spaces for 3+ bedrooms. Parking provision is reduced within the Hillsdale Station Area and the Central Parking Improvement District, but not by any substantial margin. **Given that each new parking space costs \$30,000-\$80,000**¹, and with inflation driving up construction costs by these estimates, two spaces may now cost up to \$200,000. This raises the cost of housing development and makes it hard to meet production goals.

TransForm recommends that San Mateo consider the following policies in the Housing Element:

1. Funding a dedicated study of parking reforms, particularly how smart parking policies could positively impact housing, transportation and other goals.

WWW.TRANSFORMCA.ORG

https://www.shoupdogg.com/wp-content/uploads/sites/10/2016/05/Cutting-the-Cost-of-Parking-Requirements.pdf

- 2. Requiring unbundled parking for certain transit oriented developments. This is easier for building managers to implement now with new parking tech tools like <u>Parkade</u>.
- 3. Implementing TDMs such as requiring developers to buy annual bus passes for residents at a discounted bulk rate.

To show the tremendous transportation and climate benefits of these policies, as well as some of the financial savings for residents and reduced costs for development, we have used our GreenTRIP Connect tool to create <u>scenarios</u> for a potential future development site at **480 N Bayshore Blvd**. This site is identified in San Mateo's draft Housing Element Site Inventory as a potential future opportunity site outside of any specific zoning district. The California Office of Planning and Research recommends GreenTRIP Connect as a tool to use while developing General Plans and is especially useful during the development of Housing Elements (the tool is free to use and supports better planning at the site and city-wide level).

By implementing the strategies above at **480 N Bayshore Blvd**, GreenTRIP Connect predicts:

- 1. Implementing unbundling and providing transit passes at this site would decrease demand for parking by 26% and result in resident transportation savings of \$792 per year.
- 2. With right-sized parking, incorporating the benefits of unbundled parking and free transit passes, the development would cost \$6,350,500 less to build relative to current parking standards.
- 3. When combined with 100% affordable housing these strategies resulted in an incredible 58% reduction in driving and greenhouse gas emissions for the site, compared to the city average.
- 4. If an affordable development with smart parking strategies were built on this site each household would drive 6,654 less miles per year creating a greener and safer community.

By eliminating the high costs of parking, homes can be offered at more affordable prices, reducing the number of community members that face extreme housing cost burdens, getting priced out of their community, and/or becoming unsheltered. Residents, new and old alike, will greatly benefit from the reduction in vehicle traffic and associated air pollution (see the scenarios <u>here</u>).

In addition to parking and transportation strategies, we applaud some of the proposed strategies to support more affordable homes, since these would have such tremendous benefits as noted in the GreenTRIP scenario. Two of the most important are Policy 1.3 and 1.6 that streamline affordable development to help reach RHNA goals, by increasing density for BMR developments and streamlining affordable housing review, respectively. These programs are a cost-effective complement to strategies focused on housing production.

The GreenTRIP scenarios and the chart on the final page of our Scenario document also show the imperative of programs to accelerate development of affordable homes, like Policies 1.3 and 1.6. Not only do these households use transit more and drive much less than average, but

| WWW.TRANSFORMCA.ORG

success in this area can help provide homes for unsheltered individuals and families. A commitment to these programs will show that San Mateo is committed to planning for all levels of the 3,975 RHNA BMR units anticipated in this cycle.

Please let me know if you have any questions. TransForm hopes this information explains why San Mateo should make parking reform a priority in the Housing Element update.

Sincerely, Kendra Ma Housing Policy Analyst

RE: 2745 S. El Camino, San Mateo (APN 039-351-070) - Development Capacity

Dear Mr. Dahl:

As discussed, ownership is interested in redeveloping 2745 S. El Camino Real. This corner lot is ~36,000 sq.ft., located along the 28^{th} street themed intersection, directly across from the newly improved Caltrain station and one block from the Hillsdale Shopping Center. Assuming an 85' height limit, a midrise project could comfortably include 165 apartments with 72 x 1-bedrooms (679 average sq.ft.) and 93 x 2-bedrooms (1,071 average sq.ft.). We'd like the draft housing element's sites inventory to reflect this amount. Please let me know if you have any questions or would like to discuss this further at your convenience. Thank you.

Sincerely,

Yosef Tahbazof, Esq. Principal

Hi Zach,

OneShoreline is hosting a PhD fellow from Stanford that is currently working on a countywide analysis of proposed opportunity sites in draft City/County Housing Elements and how they may be impacted by flooding/sea level rise. Would you be able to share the data outlined below from the City's Housing Element Update draft to help inform this analysis by Friday, January 6th? These include data tables and accompanying GIS shapefiles for proposed projects, pipeline projects and housing opportunity sites selected for meeting RHNA requirements.

San Mateo Appendix C Housing Resources: Figure 2 and Table A– Housing Sites Inventory

Sorry to add this request to your list amongst the many priorities you are balancing right now, let me know if there is a more appropriate contact that you could refer me to. I also cc'd the email address listed on the City's Housing Element Update website in case anyone monitoring that email inbox is the more appropriate City contact to work with.

Thanks very much!

Makena

Makena Wong Project Manager | San Mateo County Flood and Sea Level Rise Resiliency District (OneShoreline) <u>OneShoreline.org</u> <u>Pronouns</u>: she/her

City of San Mateo 330 W 20th Ave. San Mateo, CA 94403

To the honorable San Mateo City Council,

The Housing Leadership Council of San Mateo County appreciates this opportunity to engage the City of San Mateo on its housing element. Earlier this year, we sent the city two letters outlining opportunities to approve the initial draft of its housing element, <u>one</u> focused primarily on needs and constraints, <u>the other</u> focused on affirmatively furthering fair housing, the sites inventory, and the goals, policies, and programs.

Now that the city has received its review letter from the department of Housing and Community Development, San Mateo has a new opportunity to address the housing needs of its entire community. However, we are concerned that a <u>recent staff report and matrix of responses to</u> <u>HCD's comments</u> does not adequately reflect the city council's strong commitment to meeting the housing needs of all. One line in particular raises concerns that San Mateo is considering legally dubious options. From the staff report:

It should be noted that HCD certification is not required for a housing element to be found substantially compliant with State law. State law provides that a local jurisdiction may adopt its own findings explaining why its housing element is substantially compliant with State law despite HCD's findings. Thus, a local jurisdiction can continue to work with HCD to achieve certification of its adopted housing element after the deadline without being deemed out of compliance.

A local jurisdiction may attempt to adopt its own findings before receiving HCD certification, but doing so significantly increases the risk of lawsuits. Manhattan Beach attempted to adopt their housing element before receiving HCD certification; the city has now been <u>sued twice</u> by the nonprofit Californians for Homeownership (associated with the CA Realtors Association). If San Mateo were to attempt to adopt its current draft housing element without first implementing significant revisions, it would be asking for a lawsuit.

In order to plan for the needs of its entire community and comply with state law, San Mateo must revise large portions of its housing element as follows:

1. Adjust realistic capacity for sites within the inventory based on site-specific information, and remove unrealistic sites: Currently, San Mateo's site inventory assumes all parcels will be built out to 100% of zoned capacity. On some sites, such as Hillsdale Mall, 100% buildout is inconceivable even if the city made dramatic policy

changes. 12 acres of the ~40-acre Hillsdale site were renovated within the past 3 years, making them extremely unlikely to become new homes anytime soon. Yet San Mateo's current draft housing element assumes that 100% of the Hillsdale site will become new homes at 100% of zoned capacity, a clear violation of the law.¹ In another example, the Bridgepoint Shopping Center recently renewed long term leases with several tenants, making development of the site highly unlikely. Unless the city can provide compelling evidence that these sites will be developed, such as property owner interest *and* the provision of favorable development standards, they must be removed from the inventory.² As referenced earlier, Manhattan Beach has been sued twice for including sites that will not become housing in the next eight years within its inventory. Other sites have similar pre-existing uses that impede housing. Upon removal of unrealistic sites from the inventory and appropriate reduction of realistic capacity for other sites, San Mateo will no longer be able to demonstrate capacity to meet its Regional Housing Needs Allocations. As a result, the city will need to upzone beyond the limits created by Measure Y.

- 2. Fully analyze constraints to housing: The matrix of responses to HCD's review letter provided by staff still makes no commitment to address Measure Y within the housing element. In its review letter, HCD writes "The element must describe the impacts of measure Y on height and density restrictions as a constraint on housing development and affordability. The element must add a program to include outreach and mitigation measures for the impact of Measure Y." Addressing the constraint "as part of the GPU [General Plan Update] adoption process," as staff offer in their matrix of responses, does not suffice. The housing element is a chapter of the general plan; as such, constraints to housing, including Measure Y, should be addressed within the housing element. HCD lists a number of other significant underanalyzed and unaddressed constraints, including discretionary review processes, development fees, and parking requirements.
- 3. Fully analyze Affirmatively Furthering Fair Housing: In its current housing element, San Mateo seeks to justify current patterns of segregation rather than analyze and address them. In fact, by concentrating all of its opportunity sites outside of San Mateo's highest opportunity areas, the housing element actively promotes segregation. In order to satisfy AFFH requirements, the city needs new policies to protect lower-income renters and promote housing in its highest-opportunity areas.
- 4. **Implement new policies and programs to increase validity of site inventory**: Based on complete analyses of sites, constraints, and AFFH, San Mateo will need to implement new policies and programs. State law is particularly clear: Identified constraints must be

¹ <u>HCD Site Inventory Guidebook</u>, p. 20: "The capacity calculation must be adjusted to reflect the realistic potential for residential development capacity on the sites in the inventory. Specifically, when the site has the potential to be developed with nonresidential uses, requires redevelopment, or has an overlay zone allowing the underlying zoning to be utilized for residential units, these capacity limits must be reflected in the housing element."

² Gov. Code, § 65583.2(g)(2): "An existing use shall be presumed to impede additional residential development, absent findings based on substantial evidence that the use is likely to be discontinued during the planning period."

removed to the extent possible.³ Programs must promote AFFH goals.⁴ HLC recommends the following programs:

- Implement an affordable housing overlay focused on land owned by religious institutions and schools in high-opportunity single-family neighborhoods. The overlay should allow development standards at least as generous as the city's R6-D development standards to provide maximum flexibility for these public and semi-public institutions to create new homes. Furthermore, proposals for housing on sites owned by religious institutions or schools should be exempt from design review hearings and limited to two planning commission hearings. (AFFH)
- Implement a rental registry to track rentals and provide data to the city regarding prices and evictions. Data from a rental registry will help the city identify landlords violating the law and devise additional renter protections as needed. (AFFH)
- *Reduce fees on affordable housing*, especially impact fees and open space fees.
 Waive fees entirely for low- and very low-income units, defer them until reception of occupancy permit for moderate-income units. (AFFH, constraints)
- Allow ministerial approval for all opportunity sites, eliminating design review and planning commission review. Discretionary review processes add cost and uncertainty to the development process; these processes also put a heavy burden on planning staff time, which the city is eminently short of. (constraints)
- Reduce parking requirements by (1) requiring only 1 parking space for 1-bedroom, 2-bedroom, and 3-or-more-bedroom units (2) eliminating guest parking requirements throughout the city (3) eliminating parking requirements for units serving those with physical or mental disabilities. (constraints)
- Upzone opportunity sites above Measure Y limits to promote viability of opportunity sites. The exact quantity of upzoning required will depend in part on the results of a complete site inventory analysis. HLC believes that, in order to demonstrate viability of opportunity sites, the city should rezone as follow:
 - i. Rezone R3, R4, R4-D, R5, R5-D, R6-D; all C1, C2, and C3 districts; and all E zoning districts to allow:
 - 1. 85 feet height and 8 stories
 - 2. Eliminate density cap
 - 3. Eliminate minimum lot size
 - 4. Increase FAR to 5
 - ii. Rezone CBD, CBD/S, TOD, and all C4 districts to allow:
 - 1. 125 feet height and 12 stories

³ Gov. Code, § 65583(c)(3): "Address and, where appropriate and legally possible, remove governmental and nongovernmental constraints to the maintenance, improvement, and development of housing, including housing for all income levels."

⁴ Gov. Code, § 65583(c)(10)(A)(v): "Strategies and actions to implement [AFFH] priorities and goals, which may include, but are not limited to, enhancing mobility strategies and encouraging development of new affordable housing in areas of opportunity, as well as place-based strategies to encourage community revitalization, including preservation of existing affordable housing, and protecting existing residents from displacement.

- 2. Eliminate density cap
- 3. Eliminate minimum lot size, rear setbacks, and side setbacks
- 4. Eliminate maximum lot coverage
- 5. Eliminate private open space requirement
- 6. Increase FAR to 8

San Mateo's city council is responsible for providing staff direction to implement these policies and programs. These are not controversial proposals; according to the city's own Community Input Survey, when asked about their zoning preferences, "63% of San Mateo residents indicated they would support concentrating new housing in higher-density buildings downtown and near transit up to 12 stories.⁵ HLC's proposals reflect the widely held preferences of the San Mateo community.

Fundamentally, cities cannot analyze their way into new homes, nor can they analyze their way into compliance with state law. The housing element process challenges cities to provide a series of analyses and then commit to substantially change local policies in ways that incentivize new housing development. HLC looks forward to continue working with San Mateo's leaders as they strive to meet the housing needs of the entire community.

Thank you for your consideration,

Jeremy Levine Policy Manager, Housing Leadership Council of San Mateo County

Re: General Plan Analysis of Borel Square / Hayward Park Station Area

Dear Mayor Papan and Honorable Members of the City Council:

As the owner of the Borel Square Shopping Center, I have been following the General Plan Update process with great interest. Borel Square, located at Bovet Road and S. El Camino Real, is an ideal site for redevelopment. The eight-acre site was built out in the 1960's and largely reflects the design and planning preferences of a bygone era. From the street, visitors must drive through a sea of parking to access retail, restaurants and services clustered in single-story strips located a significant distance from public streets and sidewalks. In connection with the General Plan Update, I have started to evaluate long-term options for revitalizing Borel Square, retained expert consultants to assist with analyzing potential redevelopment scenarios focused on housing and other uses, and I also plan to contact nearby property owners to explore potential collaboration opportunities.

I understand that you will be deciding which areas of the City should be studied as "change areas" at the August 19th City Council meeting, and that Borel Square is included in "Study Area 3." After reviewing the draft map with our team and looking forward to the alternatives process to come, I would like to offer the following thoughts for your consideration.

First, I am excited that the City is taking a fresh look at its existing land use goals and policies. Times have changed significantly. Over the past thirty years, the City's population has grown, leadership at all levels of government has changed, and new best practices have emerged for development and urban planning. In order to cultivate a diverse and thriving economy and responsibly manage for the impacts of growth, we must consider how these and other important trends have impacted the way current and future generations will live, learn, work, play and thrive in San Mateo. I look forward to a more robust conversation around these topics as the City moves forward to the alternatives process.

Second, I look forward to collaborating with your team and providing input on the future land use alternatives to be evaluated for Borel Square and the Hayward Park Station area. I believe there are positive opportunities available to strengthen the connection between Hayward Park and Borel Square, improve the streetscape along Bovet Road and 17th Avenue, and encourage greater walkability, bikeability, and use of public transit. I applaud the City's goal of encouraging greater

Mayor Papan and Honorable Members of the San Mateo City Council August 13, 2019 Page 2

use of alternative modes of transportation and also hope that you consider updating parking requirements to reflect the desired reduction in vehicle use.

Finally, I have some concerns about the size of Study Area 3, and respectfully request that you consider evaluating smaller study areas within Study Area 3, which I believe may lead to better planning outcomes. Study Area 3 is considerably larger than the other study areas and includes two Caltrain stations. As you know, the Hayward Park Station and Hillsdale Station are very different. While the area surrounding Hillsdale includes a regional shopping center, recently renovated retail, and new residential projects (such as Bay Meadows II), the area around Hayward Park largely consists of parking lots, office, retail, and industrial uses and has experienced challenges in redevelopment due to restrictive zoning requirements.

Because these different constraints and opportunities suggest the potential for different future policy and planning frameworks, and in order to make the upcoming conversations more efficient and streamlined, I would respectfully request that the City evaluate a smaller study area that is just inclusive of the Borel Square/Hayward Park area north of State Route 92. State Route 92 provides a natural border between the distinct communities surrounding Hayward Park and Hillsdale Station. Enclosed is a map illustrating the proposed study area prepared by Taecker Planning & Design, which hopefully illustrates some of the potential opportunities for this area of San Mateo for consideration as part of the upcoming alternatives process. In addition to creating a separate study area for the properties north of State Route 92, the enclosed map proposes that Study Area 3 be extended slightly north to include large underutilized parking lots between Bovet Road and Borel Avenue that may be ripe for development.

Thank you for making the General Plan Update a priority and for thoughtfully considering the input you are receiving from the community.

Stephen From China Pain Sincerely

Christina Horrisberger, Community Development Director Zach Dahl, Deputy Community Development Director City of San Mateo 330 West 20th Avenue San Mateo, CA 94403

RE: Hillsdale Shopping Center—Preferred Land Use Scenario

Dear Ms. Horrisberger and Mr. Dahl,

We are writing on behalf of the Bohannon Development Company and our joint venture partner, Northwood Investments Corporation, the owners of the Hillsdale Shopping Center (the "Owners") located at 60 31st Avenue in San Mateo, CA (the "Site"). Thank you for the opportunity to submit our preferred land use map for the City Council's consideration on April 18, 2022.

While the City of San Mateo (the "City") has been studying land use alternative scenarios for the Strive San Mateo General Plan Update process, we have been carefully considering the future of the Site, keeping in mind that the current changes in the retail market present special opportunities for the evolution of the Hillsdale Shopping Center and how it responds to the shifting needs of San Mateans and the Peninsula community at large. Both the General Plan Subcommittee and the Planning Commission recommended Mixed-Use High for the Site in recognition of this special opportunity for transit-oriented development in the heart of San Mateo.

While we have not established a set vision for the Site, we now intend to embark on a robust community engagement effort to help us plan for the future. We do know through our early listening that providing a mix of uses, including residential, retail and commercial spaces, would establish the appropriate land use framework with the necessary flexibility to create a special place that will meet market needs, exceed the community's expectations, and protect the City's fiscal health, all while respecting and blending with the edges adjacent to the existing neighborhoods.

Therefore, as you can see on the attached "Preferred Alternative" exhibit, we are proposing the Mixed-Use High designation for the parcels closest to the Hillsdale Caltrain Station and along El Camino Real, while proposing Mixed-Use Medium for the interior of the Site, with a Transitional Buffer zone to the adjacent neighborhood. We also would like to adjust thethe boundary of the Study Area to include parcel 042-121-090 currently a portion of the Hillsdale Garden Apartments. The exclusion of this parcel, contiguous to the Hillsdale Mall parcel (South Block), creates a mid-block transition that we think hinders the flexibility necessary to plan for the site in the future. This site is

currently occupied with aging housing stock that will be in need of investment in the coming years. Inclusion of this land in the study area will allow greater flexibility in how we answer the community's call for adding housing, especially affordable housing, in reimagining Hillsdale. Inclusion of this parcel, provides an opportunity to think holistically about the future of Hillsdale and avoids having awkward mid-block transitions that can be an impediment to good design and planning.

We believe that the unique size and location of the Site warrant a fresh approach by showing more intensity along El Camino Real and the Transit Corridor and stepping down the intensity toward the existing neighborhoods. This combination of Mixed-Use High and Mixed-Use Medium designations will allow for the greatest master planning flexibility that, in turn, will not over burden the City's existing infrastructure and will protect San Mateo's neighborhoods.

Importantly, this proposed combination provides for the flexibility necessary to achieve a viable and feasible plan for redevelopment of the Site that is deliverable to the marketplace, while also preserving its role as a place for San Mateo residents to gather, shop, and enjoy. Not only will this balance of uses allow us to create an ecosystem that minimizes impacts, but it will create a realistic opportunity to deliver both market-rate and affordable housing that will significantly contribute to the City's housing needs.

We look forward to our ongoing collaboration with the City as it moves forward with the General Plan Update process.

Thank you for your consideration.

Sincerely,

David Bohannon

RE: 2745 S. El Camino, San Mateo (APN 039-351-070) - Development Capacity

Dear Mr. Dahl:

As discussed, ownership is interested in redeveloping 2745 S. El Camino Real. This corner lot is ~36,000 sq.ft., located along the 28^{th} street themed intersection, directly across from the newly improved Caltrain station and one block from the Hillsdale Shopping Center. Assuming an 85' height limit, a midrise project could comfortably include 165 apartments with 72 x 1-bedrooms (679 average sq.ft.) and 93 x 2-bedrooms (1,071 average sq.ft.). We'd like the draft housing element's sites inventory to reflect this amount. Please let me know if you have any questions or would like to discuss this further at your convenience. Thank you.

Sincerely,

DocuSigned by: Usef Talibarot , 79D2B73BD39C4C9.

FW: Meeting Followup and Commentary on RWC Housing Element

Nicholas Hamilton <nhamilton@goodcityco.com> To: Nicholas Hamilton <nhamilton@goodcityco.com></nhamilton@goodcityco.com></nhamilton@goodcityco.com>	Fri, Dec 23, 2022 at 3:23 PM
From: Jeremy Levine Sent: Tuesday, December 20, 2022 9:31 PM To: Manira Sandhir (Control); Eloiza Murillo-Garcia (Control); Zachary Dahl (Control); Diana E Associates/Solutions for Affordable Housing (Control); Zachary Dahl (Control); Diana E Associates/Solutions for Affordable Housing (Control); Zachary Dahl (Control); Diana E Subject: Meeting Followup and Commentary on RWC Housing Element	Firod - D.R. Elrod and
Good evening Manira, Eloiza, Diana, and ZachManira and Eloiza, it was a pleasure to talk with you last week. Thank you f better understand staff's perspective. We're all working to get San Mateo the best housing element possible, and I appreciat HLC's perspective on what that looks like.	
As we discussed at the end of our conversation, I want to help you understand why HLC endorsed Redwood City's housing about RWC's housing element, I hope your team will get a clearer picture of what HLC hopes to see in San Mateo's housing	

For starters, RWC is upzoning its downtown by an additional 20 du/ac. The area to be upzoned is quite a tiny portion of town, much smaller than HLC's original recommendations, but it is an area in which RWC--a city which has an approximately 75% greater per capita rate of housing development than San Mateo--has demonstrated significant capacity for new homes in the past. Despite its great recent track record, RWC is rezoning even further.

Densities in Mixed Use Zoning Districts. To respond to the continued housing demand, Redwood City proposes to increase density in the Mixed Use Zoning Districts.

Objective:

- Complete a zoning text amendment to increase densities in the mixed use zoning districts as follows:
 - Increase <u>MU-CMUC</u> from 60 du/ac to 80 du/ac
 - Increase <u>MU-NMUN</u> from 40 du/ac to 60 du/ac
 - Increase MUTMUT from 20 du/ac to 40 du/ac for base zoning and 40 du/ac to 60 du/ac for projects that propose community benefits

RWC also rezoned single-family neighborhoods along a number of dimensions to allow smaller units on smaller lots. And they cut parking requirements in half throughout the city. (Not just in the 1/2 mile around transit required by state law, but EVERYWHERE.)

- Minimum Lot Size: Revise to 5,000 square feet for all building types (removing 7,500 minimum square feet for duplexes, 10,000 square feet for triplexes, and 1,000 to 2,000 square feet for each additional unit in excess of three units on the same lot, depending on the zoning district).
- Minimum Lot Width: Revise to 35 feet, or 20 feet wider than the driveway approach width, whichever is greater. This is revised down from 50 feet for all building types. This is a single family dwelling or duplex and reduction from 75 feet for a triplex or larger development.
- <u>Parking Requirements:</u>Minimum Lot Frontage: Revise to 35 feet for all building types. This is a reduction from 50 feet for a duplex, triplex, or larger development.
- Parking Requirements: Revise to a minimum of 1 space per unit for a multifamily dwelling outside the downtown and mixed-use zones. This is a reduction of 1 space per unit. Remove requirement for covered parking spaces and allow parking to be located within required setbacks. Remove guest parking requirements. Remove minimum parking requirements for most commercial and all residential in all areas within ½ mile of high frequency transit.
- Minimum Open Space: Reduce requirement from 300 square feet of open space <u>plus 100 additional square feet</u> per bedroom to <u>150300</u> square feet of open space per unit.

It also really helps that RWC is donating city-owned land to support affordable homes. We are looking for subsidy of some form, land, money, or ideally both!

	2023-2031 HOUSING
Program H1-9:	City Owned Sites for Housing. The City-owned vacant lot at 611 Heller St. has been identified as a site suitable for housing, along with the former Magle Street Shieter (1396 Majel). The County of San Mattee has an option to ground lease the Maple Street Site for an affordable housing, development. The County issued a research for proposals for the site and selected MidPen Housing to develop the site in August 2022. The City will complex with the Surglus Land Act and will move forward with affordable housing efforts at these locations.
	Issue an RPF for development of the Heller St site. Identify any site and development constraints, remove barriers, and apply development incentives. Coordinate with the County regarding the proposed affordable housing project at the Maple Street site.
	Timeframe: Issue_BFP_for_Heller_Site_bv_December_2027; Continue.coordinating.with.the_County_on_their_development process for the Males Exters Site until Inroist combellion which is astimated for 2025 Recrossible_Catry_City_Manager's_Office, Housing_Division and Community Development and Transportation Emiding_Sources_Departmental Budget
Program H1-10:	Provide Adequate Sites for Lower Income Households on Nonvacant Sites Previously Identified, Ad. 1397 requires that vacant sites identified in the previous two Housing Elements and non-vacant sites identified in the previous fourise for the only be deemed adequate to accommodate a portion of the housing need for lower-income households if the ite is srond at reidential identities consistent with the default
\leftarrow	→ + 23 ····

And the good policies continue. Redwood City is making big commitments to follow through on implementing its anti-displacement plan; streamline permit processing for 100% affordable housing developments; entirely eliminate a cap on new units in the downtown; and revise the city's affordable housing ordinance to remove city discretion over AH projects.

Fundamentally, RWC's housing element is nowhere near perfect from a pro-housing standpoint, but it commits to a number of significant policy changes that will have a beneficial impact when implemented. Even though Redwood City has an approximately 75% greater per capita rate of housing production than San Mateo, RWC is upzoning substantially in its downtown and pursuing a number of other ambitious production-oriented policies. In comparison, San Mateo's housing element commits to relatively few substantial policy changes beyond the base requirements of state law, yet it assumes that the rate of housing production will more than double.

As we discussed, HLC does not see theoretical upzoning in the general plan in the future equivalent to upzoning in the housing element today, as the housing element is a legally binding contract with the state and the general plan is, well, not. Considering its past track record of development and the constraints to housing present in the city, San Mateo may need to make commitments within the housing element to upzone opportunity sites in order to justify its site inventory. HLC has argued that the city in fact must rezone, but we are willing to wait and see what HCD requires.

However, I continue to believe that San Mateo staff should be prepared to undergo a potentially long period of housing element noncompliance if HCD finds that the city's opportunity sites cannot be justified under current zoning, which would require new rezonings and a time-consuming housing element EIR. HLC would have preferred that the city study the potential environmental impacts of upzoning earlier in this process so that the council would have had the option to rezone now if necessary, but the city did not take that prudent course of action at an earlier time, and so we are faced with the present high-risk circumstances. If possible, HLC wants to help the city satisfy HCD, but we are reluctant to support a housing plan that includes so few incentives for development on the proposed opportunity sites. We look forward to seeing the city's new draft at the end of the month, hopefully with more policies that we can support wholeheartedly.

All of this aside, I recognize that staff are working hard and trying your best, and some housing activists (including myself) have not always recognized your work appropriately. After our conversation, I have been urging other activists to work toward a more constructive, supportive relationship with San Mateo staff. Regardless of differences of opinion, thank you for the opportunity to work together on creating a great housing plan that meets the needs of all San Mateo residents.

Regards,

Jeremy

Honorable City Council City of San Mateo citycouncil@cityofsanmateo.org 330 West 20th Avenue San Mateo, CA 94403

RE 1900 S. Norfolk Street Request for Mixed-Use Medium designation

Dear Members of the City Council

Seagate Properties Inc. represents the ownership of the above referenced property, commonly known as The Atrium. On behalf of the ownership, we request the City Council apply a General Plan designation to the site of either Residential Medium or Mixed-Use Medium for 1900 S. Norfolk Street. We have owned 1900 S. Norfolk Street since 2016 and the property was developed in 1983 with a ~164,000 sf office building and 590 at grade parking on the 10 Acre site.

The designations recommended to the Planning Commission were Mixed Use Medium (Alternative A and B) or Medium Residential (Alternative C). The Planning Commission on March 22 recommended a General Plan Designation of Commercial Services. We feel strongly that this is an inappropriate designation for this site, for multiple reasons. Both office and housing are appropriate based on the existing historic office use and the adjacent residential use immediately south of the site. Concerns associated with noise or air quality will be studied during the General Plan CEQA process and suitable controls can be required to develop the property for residential uses.

The narrow frontage along Norfolk compared to the depth of the property would create significant marketability challenges to business located on the back portion of the property. Specifically, businesses not located on Norfolk would have limited visibility and be "buried" behind the Commercial Services along Norfolk. Any marginal use of the entire site would encourage homeless encampment, potential increased crime as well as the potential for long term dilapidated, minimal quality buildings on the West end of the site. The proximity to Bridgepoint Shopping Center, which adequately serves the community needs for commercial service space, also creates significant competition and challenges to any Commercial Service located on the property.

A Mixed-Use Medium designation provides the flexibility to maintain the office use and when appropriate develop residential housing on the site. We have in fact conducted various architectural and

980 FIFTH AVENUE • SAN RAFAEL, CALIFORNIA 94901 (415) 455–0300 • FAX (415) 453–2892 San Mateo City Counsel April 7, 2022 Page 2

site studies regarding the feasibility of (a) continued operation of the existing office building and developing the excess land with multi-family residential (b) converting the entire site to a residential use, similar to the immediately adjacent site to the South recently built by Pulte Homes, (c) converting the existing office building to a multi-family residential use, (d) adding additional multi-family housing on the excess land, or (d) a combination of the above referenced uses. The current DRAFT Housing Element includes 1900 Norfolk as a potential Housing Site and proposes 245 residential units on the property. The Medium Mixed- Use designation will allow for the completion of these housing units on this site.

In San Mateo and Santa Clara County older office buildings with significant surface parking have been converted into housing by either replacing the older office or maintaining the office and relocating surface parking into a new parking garage which frees up land for housing. In fact, we are discussing this alternative with Sares Regis and believe there will be opportunities now or during the 20-year period of the General Plan for the property to be redevelop with housing on the portions of the existing surface parking lot. A Medium Mixed-Use designation will allow both office and housing to occupy the site.

We appreciate your consideration and request the General Plan designation of the property be Mixed Use Medium.

Best

Ntes

PUBLIC COMMENT: None.

PUBLIC HEARING

2. Draft 2023-2031 Housing Element

Housing Consultant Diana Elrod, Planning Manager Manira Sandhir and Deputy Director Zach Dahl did a presentation on the Draft Housing Element 2023-2031, including providing information on the Sites Inventory, Affirmatively Furthering Fair Housing (AFFH), other Housing Element Sections, and Goals, Policies, and Programs. Planning Commissioners requested to provide discussion and feedback to help refine the Draft Housing Element.

Commissioner Questions:

The Commission asked questions of staff relating to the sites inventory methodology; definition of "preservation" of housing units, and whether executive office zoning allowed residential uses.

Public Comments:

Members of the public, Raayan Mohtashemi, Ken Abreu and Martin Wiggins addressed the Commission, raising concerns relating to sites inventory methodology; exploring more aggressive policies for funding and lowering cost of development; workforce needs, under the Carpenters Union, to build the housing; and Measure Y constraints. Jordan Grimes expressed disappointment that the Housing Element Draft doesn't promote housing inventory based on the sites inventory and realistic housing goals.

Commissioner Comments:

Discussion ensued regarding the methodology used for the sites inventory, including the need to bolster the analysis to support the inclusion of each site; concerns about including Target site and recently established restaurant sites, inclusion of smaller sites and sites within 500 feet of freeways, a site under the County's groundwater protection program; and concerns about anecdotal conversations regarding property owner intent for some of the proposed sites. Commissioner Williams also provided comments relating to conserving and preserving existing housing stock.

Additional Commissioner comments focused on the AFFH narratives asking for significantly more history and background to analyze racially segregated concentrated areas of affluence, considering housing sites within the highest opportunity areas, addressing overcrowding and the history of disinvestment in certain areas, and prioritize addressing the history of segregation by analyzing city-controlled regulatory factors that has caused the situation.

Commissioners also provided comments on outdated, exclusionary CC&Rs and protecting/conserving existing housing stock in good repair.

At 11 pm there was a discussion among the Commissioners if they wanted to proceed with this item or continue to a date certain. The majority of the Commission favored a continuance.

The commission continued this item to a Special Planning Commission remote meeting on May 3, 2022 at 7 pm.

Moved:	Nugent, Seconded: Ebneter
Ayes:	Williams, Ebneter, Nugent, Patel
Noes:	None
Absent:	None

REPORTS AND ANNOUNCEMENTS

Planning Manager, Manira Sandhir provided updates on items for future Planning Commission meetings and provided information on Planning Commission handbook and upcoming trainings. She also provided a staff update related to the meeting being Assistant City Attorney Gabrielle Whelan's last meeting, as she had accepted a role with another jurisdiction. Commissioner Patel confirmed she would be absent for the May 10, 2022, Planning Commission meeting. Chair Williams confirmed she would be absent for the May 24, 2022, Planning Commission Meeting. There were no other reports from Chair, Commissioners or City Attorney.

ADJOURNMENT

The meeting adjourned at 11:13 pm.

PUBLIC HEARING

 <u>Draft 2023-2031 Housing Element – CONTINUED FROM PLANNING COMMISSION MEETING OF 4.26.2022</u> Planning Manager, Manira Sandhir presented an overview of the past meeting, objectives for this meeting, and next steps. Feedback was requested on components of the Draft Housing Element 2023-2031 including Other Housing Elements Sections, and the Goals, Policies, and Programs including the action plan for Affirmatively Furthering Fair Housing Policies and Programs (AFFH).

Commissioner Questions: Commissioners had not questions of staff.

Public Comments:

Members of the public, Kalisha Webster, Senior Housing Advocate and Carol Eldridge with One San Mateo addressed the Commission, regarding supporting policies for accessible housing to address reasonable accommodation for physical and/or mental disabilities; and concerns regarding Measure Y imposed constraints, sites inventory methodology and exclusion of R1 (single-family) zoned neighborhoods.

Commissioners commented on the following items:

The Commission provided several comments relating to strengthening the Constraints Analysis and the Quantified Objectives. The Commission also provided extensive feedback on the Goals, Policies and Programs, including to strengthen the terminology and any non-committal language with firm targets and commitments such as for family housing, missing middle housing, looking at funding options such as vacancy taxes etc., expanding tenant protection, creating new goal to eliminate disparity and overcrowding, longer deed restrictions, special needs, housing,

achieving health and housing parity, address R1-zoned neighborhoods and provide parity of amenities, Bridgepoint condominiums preservation, u- zoning the entire city, and creating objective architectural goals.

CITY OF SAN MATEO Special Meeting Minutes City Council

City Hall 330 W. 20th Avenue San Mateo CA 94403 www.cityofsanmateo.org

May 23, 2022 In Person and Remote 5:30 PM Special Meeting

CALL TO ORDER

Roll Call: Mayor Bonilla, Deputy Mayor Papan, Council Members: Lee, Goethals and Rodriguez

PUBLIC HEARING

1. Draft 2023-2031 Housing Element Public Hearing

Zachary Dahl, Deputy Director, provided a presentation to Council which included an explanation of the methodology for estimating development potential for the sites inventory, which is expected to evolve and change. He provided an overview of the quantified objectives, and the public outreach and engagement process, and further explained how public participation helped influence the development of the Draft Housing Element. He noted Diana Elrod, Housing Consultant, was participating remotely and would be available to answer questions as needed.

Manira Sandhir, Planning Manager, explained additional required components and goals, policies, and actions; she summarized public comments received to date, shared the Planning Commission perspective and reviewed the timeline for the process.

Council asked questions of staff including additional information on the sites inventory methodology, inquired about the consultant's experience and thanked staff for their efforts on preparing the Draft Housing Element.

Public Comments – Tom Taber supported building more housing and fewer office buildings; Michael from Local 217 Foster City stated encouraged labor standards and well-paying jobs are needed; Ken Abreu from local chapter of the Sierra Club restated elements from submitted letter; Karen Herrel stated concern that there seems to be a desire for the Housing Element to fail and why there is still a push for R1 districts; Lisa Diaz Nash supported the proposed Housing Element; Jennifer Martinez read remarks from Carol Steinfeld noted the history of racial segregation through housing; Noelle Langmack concern that there is no rezoning required to achieve housing numbers; Michael Weinhauer stated trickle down housing does not work; Sean stated concern for green space and parks in the planning; Karyl Eldridge commented on historical racial issues; Jordan Grimes noted deficiencies with lack of rezoning in the element; Justin Alley, One San Mateo, noted the City is not following the law; and Jeremy Levine, Housing Leadership Council, noted two letters provided to the City with their recommendations.

Councilmembers complimented staff on the presentation and follow-up responses to questions, and provided individual comments, which included concerns with Commissioner use of their title when providing individual comments, review of the demographic trends narrative to ensure that historical segregation and displacement were appropriately reflected, the need for more affordable home ownership opportunities, the importance of planning for the housing needs of our 'silver tsunami' population and homeless population, the importance of keeping the Housing Element adoption on schedule to maintain funding opportunities and that staff should explore the feasibility of the City achieving a Pro Housing designation from the State.

Staff revisited various comments that were heard to confirm Council consensus on the topics raised, including evaluating minimum residential requirements in mixed-use zoning districts, prioritizing senior housing, evaluating

parking standards for sites near transit, and exploring ways to support non-profits and faith-based organizations that want to produce affordable housing.

ADJOURNMENT – The meeting adjourned at 8:31 p.m.

CALL TO ORDER -

Roll Call

Present: Mayor Bonilla, Council Members: Lee, Goethals and Rodriguez

Deputy Mayor Papan arrived at 5:35 p.m.

CLOSED SESSION

Following the opportunity for public comment, there were no speakers, the City Council convened into Closed Session at 5:32 p.m. to consider:

 <u>Conference with Legal Counsel – Existing Litigation, Workers' Compensation</u> (Paragraph (1) of subdivision (d) of Government Code Section 54956.9 Name of claimant: William Davenport

The City Council reconvened at 5:43 p.m.

STUDY SESSION

Following the opportunity for public comment, there were no speakers, the City Council convened into Closed Session to consider:

2. Draft 2023-2031 Housing Element Study Session

Eloiza Murillo-Garcia, Housing Manager, provided a presentation on the history of the Housing Element effort. Zachary Dahl, Deputy Director of Community Development, provided an overview of the 91 comments received, outlined the activity that needs to take place for the eight-year housing element cycle, and explained the next steps in the process. He requested direction on 13 comments called out regarding responses to the California Department of Housing and Community Development's comment letter on the City's Draft Housing Element.

Council asked questions of staff. Staff and Consultant Diana Elrod responded to questions. Prasanna Rasiah, City Attorney, responded to question regarding exposure to lawsuit.

Public Comment – Ken Abreu expressed the need to deal with the housing crisis on a regional basis. Jeremy Levine stated this Council is not moving in a direction to make substantial changes. Karyl Eldridge, One San Mateo, commented on impact of non-dense housing on affordability. Mitch Speigle spoke of implementation issues. Jordan Grimes stated there are a myriad of issues with the staff report.

Council asked additional questions of staff.

The City Council convened to the Regular Meeting at 7:05 p.m. and reconvened to the Study Session at 10:41 p.m.

Further discussion ensued and staff felt confident in moving forward with Council recommendations.

ADJOURNMENT – After a moment of silence, the meeting adjourned in honor of Lory Lorimar Lawson, Margaret Donnellan, and Linda McCoy at 11:34 p.m.

City of San Mateo Housing Plan

What can we do about the high cost of housing in San Mateo? How can we create housing that is more affordable while ensuring San Mateo is a great place to live? The City of San Mateo is working on its 8-year housing plan, also known as the Housing Element 2023-2031, that provides a roadmap to address housing needs of our community members.

Your input will help us prepare our Housing Element update, which will become part of the City's General Plan. Please take a few minutes to share your thoughts. This information will remain confidential. **THANK YOU!**

WHAT IS YOUR RELATIONSHIP TO THE CITY OF SAN

MATEO? Select all that apply

- ____I live here
- ___l work here
- ___l own a business here
- ___l own property here
- ____I am a visitor or patronize San Mateo businesses
- ___l am a leader/representative of an organization

IF YOU LIVE IN SAN MATEO, WHAT IS YOUR ZIP CODE?

WHAT IS YOUR RACE OR ETHNICITY?

- ____White
- ___Asian
- Latino/Hispanic
- Black/African American
- Pacific Islander
- Mixed or Other

WHAT IS YOUR AGE GROUP?

- ___0-20 years
- 20-35 years
- 35-50 years
- 50-65 years
- 65+ years

GIVEN THAT THERE IS LIMITED LAND AVAILABLE, WHAT DO YOU THINK ARE BEST STRATEGIES TO MANAGE PRODUCTION OF NEW HOUSING? Please select up to three

- _____Redeveloping existing properties that have potential for more housing.
- Create accessory units on existing single-family properties. Convert existing single-family houses into duplexes.
- Increase the allowable density in areas that are close to
- transit.
- ____Allow taller developments.
- ___Other (please describe)_

HOW DOES THE CURRENT HOUSING SITUATION IN SAN MATEO AFFECT YOU OR PEOPLE YOU KNOW?

HOW CAN WE MAKE HOUSING MORE AFFORDABLE? Please select up to three

- Financial assistance programs for people who cannot afford housing.
- Public funding to construct affordable housing.
- Encourage the private sector to construct more affordable housing.
- Encourage conversion of single-family units to duplexes.
- ____Help homeowners add rentable units (ADUs).
- ____Build affordable housing near transit and jobs.
- ____Help homeless people find housing.
- ___Other (please describe)____

Share Your Thoughts on Draft Housing Element

The City has released the Draft Housing Element, its plan for how the City of San Mateo can accommodate at least 7,000 new homes over the next 8 years. It establishes goals, policies and programs to help address the City's current and future housing needs. The 30-day public review period is open from April 6 through May 6, 2022. The Draft Housing Element is available for public review at City Hall and online at www.cityofsanmateo.org/HousingElement2023

Send written comments with subject line "Housing Element"

- By email to: <u>housing@cityofsanmateo.org</u>
- By mail to: Planning Manager, City of San Mateo, Planning Division, 330 West 20th Avenue, San Mateo, CA 94403
- Online: on our Draft Housing Element website

Attend an upcoming public hearing:

- Planning Commission Tuesday, April 26 at 7 p.m.
- City Council Monday, May 16 at 7 p.m.

The plan is guided by over a year of technical analysis and community engagement efforts and articulates five goals to shape policy and programs moving forward:

- Production: Facilitate the production of new housing, especially affordable housing.
- Preservation: Preserve existing housing that is affordable to lower- and middle-income residents.
- Protection: Protect current residents to prevent displacement.
- Promotion: Promote community engagement and public outreach.
- Fair Housing: Ensure fair housing laws proactively protect residents.

For more information on the Draft Housing Element and to make a comment, please visit our Draft Housing Element at www.cityofsanmateo.org/HousingElement2023

San Mateo is also updating its General Plan, which will guide how the City will change over the next 20 years. Upcoming milestones include a City Council meeting to review the input received so far and provide direction on the preferred land use and circulation scenario. The meeting can be accessed online and is scheduled for 7:00 pm, April 18, 2022. More information at: strivesanmateo.org

Comparta sus pensamientos sobre el plan preliminar de elemento de vivienda

La Ciudad ha publicado el Plan Preliminar del proyecto Elemento de Vivienda, el plan sobre cómo la Ciudad de San Mateo puede acomodar al menos 7,000 casas nuevas en los próximos 8 años. Establece metas, políticas y programas para ayudar a abordar las necesidades de vivienda actuales y futuras de la Ciudad. El período de revisión pública de 30 días está abierto del 6 de Abril al 6 de Mayo de 2022. El Proyecto de Elemento de Vivienda está disponible para revisión pública en el Ayuntamiento y en línea en www.cityofsanmateo.org/HousingElement2023

Enviar comentarios escritos con la línea de asunto "Elemento de vivienda"

- Por correo electrónico a: <u>housing@cityofsanmateo.org</u>
- Por correo a: Gerente de Planificación, Ciudad de San Mateo, División de Planificación, 330 West 20th Avenue, San Mateo, CA 94403
- En línea: en nuestro sitio web Draft Housing Element

Asista a una próxima audiencia pública:

- Comisión de Planificación Martes, 26 de Abril a las 7 p.m.
- El Consejo Municipal Lunes, 16 de Mayo a las 7 p.m.

El plan está guiado por más de un año de análisis técnico y esfuerzos de participación comunitaria y articula cinco objetivos para dar forma a las políticas y programas en el futuro:

- Producción: Facilitar la producción de vivienda nueva, especialmente vivienda asequible.
- Preservación: Preservar la vivienda existente que sea asequible para los residentes de ingresos bajos y medios.
- Protección: Proteger a los residentes actuales para evitar el desplazamiento.
- Promoción: Promover la participación de la comunidad y la divulgación pública.
- Vivienda justa: Garantizar que las leyes de vivienda justa protejan proactivamente a los residentes.

Para obtener más información sobre el Proyecto de Elemento de Vivienda y cómo hacer un comentario, visite nuestro Borrador de Elemento de Vivienda en <u>www.cityofsanmateo.org/HousingElement2023</u>

San Mateo también está actualizando su Plan General, que guiará cómo cambiará la Ciudad en los próximos 20 años. Los próximos hitos incluyen una reunión del Concejo Municipal para revisar los aportes recibidos hasta ahora y proporcionar orientación sobre el escenario preferido de uso y circulación de la tierra. La Reunión es accesible en línea y está programada para las 7:00 pm del 18 de Abril de 2022. Más información en: www.strivesanmateo.org

- 2nd Public Review Period Comments Received December 30, 2022 to January 9, 2023 (includes all comments received as of 1/5/23)

Ms Sandhir:

I have reviewed the email of the HEDP and have several questions and areas of concern. Firstly, why has the issue of current substantial vacancy rate in existing housing not being discussed or publicized. I have asked numerous officials including your office and the responses all seem to be "I'm not aware of the current figure." Nice evasion. Is there even any discussion or concerns relating to our declining population and technological changes allowing remote work and population shifts.

Secondly of the five items you wish to address, four relate to subsidized housing in one form or another and the fifth is "education " of housing issues. There is not one mention of how these changes will affect the quality of life in our city and how the impacted neighborhoods may change. There are many thousands of families whose primary net worth is represented by the value of their home. They have saved for a lifetime to enjoy the amenities of life in San Mateo. To the extent that these changes will affect many of these families, are their concerns not even worth some consideration and discussion?

Many of us hear anecdotally of significant vacancy factors in market rate housing. For rent signs are ubiquitous throughout San Mateo. I believe that an honest discussion of how much housing and affordable housing is truly needed before we blatantly accept an arbitrary mandate from the state . The first obligation of the city council should be to address the legitimate needs and concerns of the residents of San Mateo with the equal fervor that it devotes to implementing the state housing creation mandate. То:	Housing
Subject:	Housing Element

Hello,

The plan as written looks good, lots of good suggestions and goals. A few comments:

• What are we doing about water supply? Every new house and apartment is going to have sink taps, showers, dishwashers, toilets, and some with garden hoses. We are in a severe drought, and climate change suggests that might only get worse.

• How can we turn all those empty office buildings into housing? We know about the liabilities and zoning issues. But it's silly to talk about building more buildings when we have so many already in place, some practically new or even unfinished. They all are fitted with plumbing and electricity, and many have full cafeteria facilities. Put your imaginations to work and envision these spaces as potential housing for homeless and low-income San Mateans.

• Re: the homeless, are you working with existing entities that are already expert and experienced in these issues? Such as LifeMoves? https://www.lifemoves.org/

• What about rising sea levels? Is it wise to embark on a huge housing plan on sea-level land next to the Bay? Do we want to look like Hong Kong? It's a fabulous city but do we really want to duplicate that?

• Along with all these plans has to be education. We are lucky to have a diverse population of citizens from all over the world. People need to be educated about how to live in a crowded Bayside region: water use, recycling, transportation, parking, conservation, wildlands protection, environmental stewardship, the list goes on. If I was moving to an unfamiliar state or country, I would need to find out what my responsibilities would be, and how I could participate, support and respect the existing environment and animal life. Volunteers would be good for this, and cheap!

• A lot is said about how hard it is to build and do business here because of all the regulations, especially environmental. They exist for a reason. We have clean air and water and a high quality of life, compared to many parts of the world. We want to keep it that way. Don't back down or weaken those protections.

Thank you, Susan Shankle 30-year San Mateo Resident Lifetime Bay Area Resident

I realize that there is some type of state mandate that requires counties to establish more housing in each of our CA counties. What I do not understand is the lack of obvious concern that California has experienced an alarming drought for years. The seriousness of this water shortage has an effect on our water usage. Considering the amount of new homes, this represents a huge increase in the use of water in a myriad amount of ways. Additionally, there seems to be a rational neglect for the demands of food and home supplies, quality schools, and teachers to staff those schools. There are significant shortages now in these areas, and yet, home building continues. I believe this is both irrational and irresponsible.

Without being caustic, I think the myopic vision of these home planners will result in insurmountable, adverse challenges in our future. Surely, someone on your committees realizes this.

Maureen Zane 76 year old resident of San Mateo Subject: San Mateo's Draft Sixth Cycle Housing Element

From:	
То:	
CC:	

April 20, 2022

To whom it may concern:

The Campaign for Fair Housing Elements is a coalition dedicated to ensuring that every city in California produces a Housing Element which complies with the California Department of Housing and Community Development's requirements. We have reviewed San Mateo's Draft Housing Element as of April 10¹. We previously sent in a letter reviewing San Mateo's Housing Element process and Draft Adequate Sites List as of January 14; this letter is posted at the City's website².

It is discouraging that the city has failed to address the issues previously raised. Furthermore, the city's draft policies do not address the city's constraints, and do not meet HCD's requirements³ that programs include specific action steps, specific timeframes, and specific, measurable outcomes. Lastly, there is evidence that some sites on the inventory list will not be developed.

Previously Identified Issues Still Outstanding

The following issues identified in our previous letter have not been addressed.

- On page H-6 of the draft, the ADU numbers are still overestimated. Pages H-33 through H-34 justify this by stating that "The State now allows jurisdictions to count projected development of accessory dwelling units (ADUs) based on prior years' production averages". However, the state specifically recommends counting trends since 2018, when ADU laws were liberalized.⁴ The city does not provide sufficient explanation to justify exceeding the safe harbor estimates. 480 are estimated; past production justifies an estimate of 344.
- On the same page, the nominal capacity of about 10.9k remains unrealistic. As shown in our February letter, previous production trends indicate a realistic capacity of only 908 units, far short of the realistic capacity needed to achieve the City's RHNA floor of 7,015 units.

⁴ Housing Element Site Inventory Guidebook,

¹ <u>https://www.cityofsanmateo.org/DocumentCenter/View/87532/San-Mateo-2023-2031-Housing-Element--</u> -DRAFT

² <u>https://www.cityofsanmateo.org/DocumentCenter/View/87035/Additional-Correspondence-as-of-2-11-22,</u> pages 1-10.

³ <u>https://www.hcd.ca.gov/community-development/building-blocks/index.shtml</u>

https://www.hcd.ca.gov/community-development/housing-element/housing-element-memos/docs/sites_in_ventory_memo_final06102020.pdf, page 31.

- On page H-28, the city continues to incorrectly average residential project densities *by project*, failing to account for differences in project acreage. The expected density should be 43 du/ac, not 60 du/ac.
- On pages H-28 through H-31, the city uses the same incorrect averaging method for mixed-use developments, on a variety of levels. The expected density of mixed-use projects should be 29 du/ac, not 48 du/ac. (Excluding projects already on the Adequate Sites List, expected density is an alarmingly low 1.7 du/ac!)
- On pages H-40 through H-41, the city makes no mention of surveying property owners to determine whether or not they plan to redevelop their properties. Participating in county-wide listening sessions with builders does not solve this problem.
- In Appendix C⁵, the details of the site inventory are still incorrect. Spot-checking APN 035-466-010, the city is still using *maximum* capacity, rather than *realistic* capacity, to figure site capacity, at least for some sites. Spot-checking APN 032-292-080, the city is still using sites under a half-acre for lower-income RHNA without justification, in violation of HCD's guidelines.
- Also in Appendix C, the site inventory lists 131, 139, and 149 Kingston as "Pending project", despite the relevant project having been withdrawn in August of 2021.⁶ This is not an exhaustive inventory of incorrectly listed sites.

Inadequate "Missing Middle" Program

HCD's "Building Blocks" website states:

Each jurisdiction must identify specific programs in its housing element that will allow it to implement the stated policies and achieve the stated goals and objectives. Programs must include specific action steps the locality will take to implement its policies and achieve its goals and objectives. Programs must also include a specific timeframe for implementation, identify the agencies or officials responsible for implementation, describe the jurisdiction's specific role in implementation, and (whenever possible) identify specific, measurable outcomes.

Section 5.3 (page H-47) of the draft says that one of the programs is:

Support the production of more missing middle housing. (*Policies H1.4, H1.11 and H1.13*)

Policy H1.4 (page H-59) concerns ADU development, policy H1.11 (page H-60) is to adopt an SB 9 ordinance (which would merely adhere to state law), and policy H1.13's targets (same page) read:

⁵ <u>https://www.cityofsanmateo.org/DocumentCenter/View/87528/APPENDIX-C---Housing-Resources</u>

⁶ <u>https://www.cityofsanmateo.org/4004/Monte-Diablo-North-Kingston-SPAR</u>

Evaluate sites that have potential for Missing Middle development. Research and evaluate policies and code amendments to allow for Missing Middle housing under SB 10 and schedule for City Council consideration.

The research and evaluation of policies to allow for Missing Middle housing should be done now, not later. missingmiddlehousing.org provides useful specifications for missing-middle housing.

For example, consider a front-loaded side-by-side duplex⁷. It's illegal to build in San Mateo's R-2 zone⁸ because of insufficient off-street parking; the design provides two stalls, but San Mateo requires four. (Municipal code §27.64.160.)

Next, consider a front-loaded stacked duplex⁹. It's illegal to build in San Mateo's R-2 zone because of insufficient off-street parking; the design provides two stalls, but San Mateo requires four. (Municipal code §27.64.160.) It's also too narrow; the lot is forty-five feet wide, but San Mateo requires fifty feet. (Municipal code §27.18.040.)

Then consider an alley-loaded townhouse¹⁰. It's illegal to build in San Mateo's R-3 zone (the lowest-density zone which is supposed to support townhouses) because the front setback is insufficient; the design has ten feet, but needs fifteen. (Municipal code §27.22.070.) It's also too small; the parcel size is 2750 square feet, but it needs four or five thousand, depending on which area of the city it's in. (Municipal code §27.22.040.)

Identifying the portions of the city's code which prohibit missing-middle housing-parking mandates and minimum lot sizes-does not require a years-long research process. These are constraints, and the city's programs should focus on removing them.

Affirmatively Furthering Fair Housing

Site Locations

As noted in our previous letter, no sites in the city's inventory fall into the "Highest Resource" TCAC Opportunity Area designation, and it appears that the sites predominantly fall into areas where three or four racial groups mix.

Air Quality Issues

The California Air Resources Board has published an Air Quality and Land Use Handbook¹¹ that considers the risks of poor air quality on sensitive receptors such as homes, daycares, etc, and

⁷ <u>https://missingmiddlehousing.com/types/duplex-side-by-side#idealized</u>

⁸ <u>https://sanmateo.ca.us.open.law/us/ca/cities/san-mateo/code/27.20</u> (All zoning laws evaluated as of April 10, 2022.)

⁹ <u>https://missingmiddlehousing.com/types/duplex-stacked#idealized</u>

¹⁰ <u>https://missingmiddlehousing.com/types/townhouse#idealized</u>

¹¹ <u>https://ww3.arb.ca.gov/ch/handbook.pdf</u>

recommends against locating these uses within five hundred feet of a roadway that averages in excess of 100,000 vehicles/day. This standard was cited by the City at least once, as background¹² for a General Plan update in 2009. As far back as 2001, the City identified¹³ Highway 92 (east of Delaware) and Highway 101, as routes exceeding this threshold. Current Caltrans data¹⁴ shows that Highway 92 east of El Camino exceeds 100,000 vehicles per day. Specifically, the Caltrans data shows that Highway 101 daily vehicle counts range from 253,100 to 264,600¹⁵, as it moves through San Mateo city limits. AB 686 and related legislation would discourage locating housing - certainly affordable housing - in areas subject to high air pollution, which is a burden disproportionately borne by disadvantaged communities. A number of sites are within five hundred feet of Highway 101 and Highway 92 east of El Camino, totalling 2,396 units (21.9% of total) and 925 affordable units. Compliance with AB686 suggests the following sites should not be included in the inventory:

Address	APN	Total Units	Affordable Units
1900 S. Norfolk St	035-391-090	245	99
2000 Winward Dr	035-610-030	160	24

Evidence On Specific Sites

Hillsdale Mall

Hillsdale Mall (41 Hillsdale Boulevard) is identified in the Site Inventory as a 39.91 acre parcel with potential for a total 1,995 units, 808 of which are affordable (40.5%). HCD's Housing Element Sites Inventory Guidebook states that sites larger than 10 acres cannot be considered feasible for affordable housing without one of the following factors¹⁶:

a) an analysis demonstrating that sites of equivalent size were successfully developed during the prior planning period with an equivalent number of lower income housing units as projected for the site, or

b) evidence that the site is adequate to accommodate lower income housing such as developer interest, proposed specific-plan development, potential for subdivision, the jurisdiction's role or track record in facilitating lot splits, or other information that can demonstrate feasibility of the site for development. The housing element should include programs promoting, incentivizing, and supporting lot splits and/or large lot development, or

c) a development affordable to lower income households has been proposed and approved for development on the site.

San Mateo's Housing Element states on page H-31 that "The City has a demonstrated track record of large site development, typically completed in phases, that includes affordable

¹⁶ Housing Element Site Inventory Guidebook, page 17.

residential development. Station Park Green (12 acres), Concar Passage (14.5 acres), and Bay Meadows (175 acres) are examples of approved large development projects that include substantial numbers of affordable units." Of these sites, Concar Passage was not completed during the previous planning period; in fact, no site work has even begun. For the two projects that were completed during the prior planning period, each one contains substantially less affordable housing: 97 units for Station Park Green and 98 for Bay Meadows (the portion of the master plan that was actually completed during the last cycle)¹⁷. Furthermore, the City's report contains no information about the availability of the Hillsdale Mall site, and contains no information about a specific development affordable to lower income households that has been approved for the site. As such, the City has not demonstrated that this site should be considered for affordable housing, and certainly not to the tune of 808 units, or 40% of the total. The estimated affordability of the project is not justified by the analysis provided.

If the City were to reasonably extrapolate from their track record of large site development, they would note that their percentage of affordable units delivered is much lower than 40% - closer to 10%. This would suggest that Hillsdale Mall could more reasonably expect 202 affordable units. They would also note that Station Park Green took 15 years to move from planning to completion, and Bay Meadows took 30 years. Hillsdale could reasonably be expected to land somewhere in between these two durations and so only about a third of the units would reasonably be delivered in the 6th cycle - 67 units.

The Hillsdale Mall site also includes, among the 40 total acres, approximately 11 acres that were recently redeveloped and re-opened in late 2019. Records show the owner obtained a \$240 million dollar construction loan for this work¹⁸. It is not reasonable to assume that this investment would be demolished to make way for housing. HCD's guidance states¹⁹ that for non-vacant sites, existing uses must be considered:

For example, an analysis might describe an identified site as being developed with a 1960's strip commercial center with few tenants and expiring leases and, therefore, a good candidate for redevelopment, versus a site containing a newly opened retail center, an active Home Depot, the only grocery store in the city, etc. that is unlikely to be available for residential development within the planning period.

Therefore, this 11-acre portion should be excluded from the site inventory. When the overall site is thus reduced by 27%, the affordable unit count would proportionally drop - from a realistic 67 units delivered in the next cycle down to 49.

1900 S. Norfolk St

The City's inventory describes this as a 1983 Class-B office building, and assigns it 245 units over 8.18 acres at 30 units per acre (including 99 affordable units). However, a cursory review

¹⁷ Compiled City data through 2020, RHNA annual reporting

¹⁸ <u>https://pe-insights.com/news/2022/01/05/northwood-investors-paid-257m-to-purchase-an-interest-in-ma</u> <u>II-asset/</u>

¹⁹ Site Inventory Guidebook, page 25.

of the assessor's map reveals that the site is a "U" shape, wrapping around a PG&E substation with another corner carved off. This unconventional shape will reduce its effective density. Moreover, it contains an easement in PG&E's favor running across the site that further encumbers its development. As mentioned above, it is also within 500' of the intersection of Highway 101 and SR-92. These constraints, taken together, make this site unlikely to be developed.

2208 Bridgepoint Parkway

The City's inventory describes this as a vacant restaurant site, and assigns it 5 units over 0.37 acres at 13.5 units per acre. As a small site there are no affordable units. However, this site is not vacant; a restaurant, Lazy Dog Restaurant & Bar, is under construction and is slated to open in early May²⁰. It is unlikely this brand new use will be discontinued in the next 8 years.

2210 Bridgepoint Parkway

The City's inventory describes this as a Hallmark retail store, and assigns it 5 units over 0.33 acres at 15.2 units per acre. As a small site there are no affordable units. This site is currently under construction and will open as a restaurant, California Fish Grill²¹. It is unlikely this brand new use will be discontinued in the next 8 years.

1900 Fashion Island Blvd

This site is owned by Target and it has come to our attention that James Tucker, Senior Director for Real Estate, has submitted a letter indicating that Target has no plans to change the use of their store in San Mateo. They also explained that the owners of the individual sites that comprise Bridgepoint Shopping Center are under an agreement governing the use of the sites. They did not share details, but explained that generally agreements of this type for shopping center do provide owners with site controls as to site design and uses.

71-77 Bovet Road

This site is currently developed as the "Borel Square" shopping center. It is our understanding that the owner is interested in developing but that the tenants do not wish to leave. The owner has offered "buyouts" to the tenants to break their leases but to date they have all refused. We understand the CVS and 24 Hour Fitness have long term (30 year) leases and at least one other tenant has 7 years remaining on their lease with an option to extend for another 10 years at market rate. Given the tenant opposition to discontinuing their uses, it seems unlikely this site will be developed within the next 8 years.

Please address the issues raised our original letter in order to identify enough sites and commit to an appropriate program of rezoning and constraint removal in a manner that is consistent with

²⁰ <u>https://www.smdailyjournal.com/news/local/lazy-dog-restaurant-opening-in-san-mateo/article_7a53bf46-9b7a-11ec-9577-33f27fd5aefd.html</u>

²¹ <u>https://www.cafishgrill.com/pages/san-mateo</u>

your duty to affirmatively further fair housing and such that the actual capacity of the Sites Inventory over the next eight years meets or exceeds your RHNA.

The housing crisis is a regional problem, and our cities must work together to solve it. Thank you for your time and consideration,

Campaign for Fair Housing Elements

Comment on 2023-2031 Draft Housing Element	Hello San Mateo city planners,
	A little bit about myself: I first moved here in 2015 and then bought a house in Hillsdale in 2019. I'm married and work full time. I do not speak on behalf of any political organization or government.
	To me San Mateo is unique. It's connected to SF and South Bay, ocean and redwood forests. Perfect weather all year. Diverse population. The downtown is a rare walkable gem. Strong economy. Most cities in the world would dream of these resources.
	And yet I know how impossible it is for younger generations to buy a home. I feel it. Everyone in an open house knows it. There's simply not much available within budget on Redfin. I'm deeply worried that the city is becoming too exclusive and rich so I started following the city planning meetings. The new

general plan is very encouraging and I hope we all work together to keep the momentum.

My thoughts on the housing elements:

1. Re-zone for medium density or missing middle wherever possible. We should model after Germany and Netherlands. 4-6 stories will be both dense and not too towering.

2. Re-zone for mixed use blocks. Make homes close to offices and groceries and restaurants and vice versa so that residents don't have to drive (because of the distance). Otherwise people will again reach for cars and cause congestion, making it even harder to up-zone.

3. Encourage the city to connect to the majority of people who aren't in the public hearings. Most people aren't aware of city planning and are too tired from work, from school, from parenting. Yet they are the silent majority who will be impacted.

Every idea is flawed and implementation is flawed too. But stagnation will only make our city more exclusive and unsustainable. Thank you so much for your hard work. San Mateo with more new homes will only match and strengthen our values. The current and future generations will live in what we choose to zone build.

Regards, Kai

SAN MATEO, SANTA CLARA & SAN BENITO COUNTIES

April 26, 2022

City of San Mateo City Council 330 West 20th Avenue San Mateo, CA 94403

Subject: San Mateo 2023-2031 Housing Element - Draft

Dear Mayor Bonilla and Members of the San Mateo City Council and Planning Commission,

The Sustainable Land Use Committee of the Loma Prieta Chapter of the Sierra Club (SLU) advocates on land use issues in San Mateo and Santa Clara Counties. Thank you for providing the opportunity for SLU to provide input on the Draft San Mateo 2023-2031 Housing Element.

The overall draft Housing Element (HE) is a good start, but more focused and stronger policies and programs are needed to have a reasonable expectation of meeting the RHNA number of 7,015 new housing units, particularly for affordable units.

Reaching the RHNA unit goal will require major changes in the speed of development in San Mateo. In order to reach the goal of 7,015 new units from 2023-2031, the city must add almost 900 new units each year. That is roughly the equivalent of building a new Concar Passage each year¹. This will be infeasible unless a major effort is made to streamline and accelerate housing development. And, of course, it is important that new development also be thoughtfully designed to accomplish all the other General Plan goals of open space, quality of neighborhoods, etc. The HE Housing Plan (p.H-55 to H-74) needs to demonstrate a significant change to current policies and programs in order to realistically be able to reach the goal. This will not be easy, as the new RHNA goals are well above the rate of new housing added over the last few decades². But it must be done if we are to adequately address the housing crisis in the region and leave the city well positioned for future generations to prosper.

The HE rightly points out that the housing problem is a regional one and that each city needs to meet or exceed its goal if the housing crisis, particularly for affordable housing, is to be solved. The lack of affordable housing on the Peninsula is a significant contributor to environmental degradation as workers must commute long distances by car, emitting GHG as well as other pollutants. It also leads to sprawl as more development is done in areas that were open space or agricultural land.

There are specific areas that will need to be retained or expanded to make sure the final HE contains the key actions needed to make significant progress on addressing the enormous lack of affordable housing

¹ **Concar Passage** is the largest housing project approved in recent years and required major time and effort for approval. Developing a project like this each year, will therefore require a major effort above the current processes.

² The 2015-2022 RHNA was 3,164 units and with only one year left it has 2,573 units completed. This current RHNA number is less than half the new RHNA number; thus, demonstrating the steep challenge of meeting the new RHNA number of 7,015.

in the Bay Area. Listed below are the most important goals, policies and programs in the draft HE that need to be retained and strengthened in the final HE.

- 1. The HE aims for a 56% buffer above the RHNA. This is a minimum, but perhaps a higher number should be considered as the ability to actually build out housing has proven, over time, to be very difficult.
- 2. Increasing affordable housing is emphasized in the draft HE and that is good. But the "buffers" for affordable housing levels are only 14%, 55% and 37%, while the buffer for market rate housing is 87%. The percentage buffer for affordable units should be at least as high as the buffer for market units since affordable units are needed more and are harder to develop. The affordable housing should be more strongly focused on low, very low and extremely low-income housing, as these are where the largest needs are and where the lack of inventory is the largest. The very poor jobs/housing fit³ in the Peninsula can best be addressed with a focus on more affordable housing. As noted in the HE draft⁴, the lack of affordable housing was one of the major concerns expressed by the public.
- 3. Funding that can be used to support affordable housing is a fundamental need and more must be done to obtain funding. Affordable housing has to be subsidized and a lack of funding will limit the ability to build the needed affordable housing, particularly for low and very low-income units. This could include establishing or increasing: Vacancy Tax, Commercial Linkage Fees, and Transfer Tax. It is particularly important that funding focus on repairing the legacy of discrimination in housing for groups like African Americans. The following policies and programs should be strengthened to accomplish this goal:
 - a. H 1.2 Utilize Public Funding for Low/Moderate Income Housing
 - b. H 1.3 Increase Below Market Rate Unit Production through Density Bonus/Community Benefits Programs
 - c. H 1.18 Fee Schedule Review
 - d. H 3.3 Evaluate Housing Revenue Sources
 - e. H 5.1.1 Adjust the City's Below Market Rate (inclusionary) program to provide larger density bonuses, and/or increased city support in exchange for affordable units that address the needs of residents with disproportionate housing needs
 - f. H 5.1.2 Participate in a regional down payment assistance program with affirmative marketing to households with disproportionate housing needs including persons with disabilities, single parents, and Hispanic households
 - g. H 5.1.3 Support the design of a regional forgivable loan program for homeowners to construct an ADU that is held affordable for extremely low-income households for 15 years
- 4. In addition to increased funding for affordable units, the HE should prioritize policies and programs that reduce costs and streamline the processes for affordable units. The following policies and programs should be strengthened to accomplish this need:

³ Jobs/Housing Fit: Jobs/housing fit means that the majority of homes within the city are affordable to the majority of employees who work in the city, and conversely, the jobs in the city pay enough to cover the cost of housing in the city. Without an adequate jobs/housing fit, businesses find it difficult to hire and retain lower-income employees.

⁴ Page H-43

- a. H 1.6 Streamline Housing Application Review
- b. H 1.8 Adopt Objective Design Standards
- c. H 1.9 Create Minimum Densities for Mixed-Use Residential Projects
- d. H 1.10 Establish By-Right Housing Designation for Prior Housing Sites
- e. H 1.12 Encourage Residential Uses within Housing Overlay

5. Almost the entire city, including R1 areas, will need to contribute to the increased housing through such mechanisms as expanded Missing Middle Units (duplex, triplex and fourplex) and ADUs and, possibly, new mechanisms enabling multi-unit housing on properties with a Residential Neighborhood General Plan land use designation, which generally covers single-family neighborhoods. Increased density should be focused within half mile of transit to align with Climate Action Plan goals for greenhouse gas reductions.

The Climate Action Plan requires attention to creating easy pedestrian and bicycle access to reduce greenhouse gas emissions (GHG). Therefore, while it is important to retain this broad opportunity for more housing, since R1 is a major part of the total area of the city, it is important to keep in mind that creating easy pedestrian and bicycle access to amenities and to transit is a critically important goal for the Climate Action Plan.

<u>The "15-minute Neighborhood" ^{5 6} concept needs to be included in the General Plan, along with</u> <u>the Housing Element</u>, as it would facilitate creating more housing in R1 neighborhoods while simultaneously reducing GHG. This is a mechanism that would insert community amenities, such as small neighborhood retail nodes, into otherwise auto-dominated areas such as R1 neighborhoods.

Even more priority should be placed on these efforts. The following policies and programs should be strengthened to accomplish this need:

- a. H 1.4 Incentivize Accessory Dwelling Units Development with streamlined approvals, development subsidies, or low or zero interest loans for construction cost
- b. H1 11 Consider how Opportunity Housing can be useful to create new housing in R1 neighborhoods within 1/2 mile of the transit corridors
- c. H1-13- Encourage Development of Missing Middle Housing especially within a half mile of transit.
- d. Include overlay zoning, in the General Plan, for "15-minute Neighborhoods" allowing insertion of small new neighborhood retail nodes with <u>Green Streets</u> network ⁷ to create walkable bikeable neighborhoods, with the daily amenities, to reduce auto trips and create healthier walkable neighborhoods, convenient for all ages including kids and seniors.

⁵ 15-minute neighborhoods are being created in many cities especially post-COVID. <u>https://www.strongtowns.org/journal/2019/9/6/7-rules-for-creating-15-minute-neighborhoods)</u>

⁶ Embraced by Mayors around the world, Portland and several small US cities have embraced the concept to rebuild their economies while creating healthier cities. <u>https://en.wikipedia.org/wiki/15-minute_city</u>

⁷ How to insert a Green Street network into an existing City. Sierra Club Loma Prieta https://www.sierraclub.org/sites/www.sierraclub.org/files/sce-

authors/u4142/Green%20Streets%20Presentation%20-%201-20-21%20DC.pdf

5. <u>Climate Change is real.</u> ⁸No mention is made of how housing, particularly new housing, needs to be located so as to be <u>resilient to climate change</u>. Sea levels are predictably going to rise more swiftly in the coming decades, according to the California Ocean Protection Council. ⁹ Wildfires are also predicted to become an increased threat with the continued drought and encroachment into the forested hill areas of our city. The increased risks of sea level rise (SLR) near the Bay and wildfires in the hilly areas needs to be factored into identifying areas for higher density and more affordable housing.

We ask that you consider this information as you finalize the Housing Element for submission to the State. SLU is prepared to help the City in advancing the HE as it is finalized and when it goes into effect.

Respectfully submitted,

Gita Dev, Co-Chair Sustainable Land Use Committee Sierra Club Loma Prieta

Cc: James Eggers Executive Director Loma Prieta Chapter Sierra Club

Gladwyn d'Souza Conservation Committee Chair Loma Prieta Chapter Sierra Club

⁸ Ocean Protection Council- Sea Level Rise Guidance: The rate at which sea levels will rise can help inform the planning and implementation timelines of state and local adaptation efforts. Understanding the speed at which sea level is rising can provide context for planning decisions and establish thresholds for action... https://opc.ca.gov/webmaster/ftp/pdf/agenda_items/20180314/Item3_Exhibit-A_OPC_SLR_Guidance-rd3.pdf

Comment on 2023-2031 Draft Housing Element	I am a single family home owner at and have been a resident of San Mateo for 30 years. I believe San Mateo is already too congested and the City should not pursue a plan for population or housing growth. The City's proposed growth plans are frightening.

Comment on 2023-2031 Draft Housing Element	It appears thatthe 25th Avenue corridor between El Camino and Hacienda has been eliminated. The Study Zone did include the First Presbyterian church parking lot on the NW corner of 25th & Hacienda. There is strong interest in our congregation to build approximately 70 low-income Senior Apartments on this parcel as well as 190 West 25th. We would appreciate consideration of these parcels as potential sites for residential development.

Comment on 2023-2031 Draft Housing Element	Hello,
	I want to show my support for a Housing Element that respects the single family home neighborhoods in the the City of San Mateo. As a long time resident and voter, the collected voice

should be heard. We said yes to measure Y and we do not want our single family neighborhoods zoning changed. I moved to San Mateo to live in a quiet neighborhood and scrounged and saved to realize the dream of owning a home. I feel your Planning Commissioners are not listening to the voice of the community and clearly have their own agenda and are out of touch. It does not go unnoticed that your two newest commissioners are more interested in proceeding on their own agenda than do what is best for all areas of San Mateo. I think the Planning Commission need to listen to real people and stop taking their lead from developers and their own misguided agendas.

City Clerk | City of San Mateo 330 W. 20th Ave., San Mateo, CA 94403 650-522-7042 |

From: Chris Conway
 Sent: Thursday, April 28, 2022 10:54 AM
 To: City Council (San Mateo) <CityCouncil@cityofsanmateo.org>
 Subject: Planning Commission Regular Meeting

My inquiry to the San Mateo City Council is how was the selection of Diana Elrod as San Mateo's consultant in the Planning Commission Regular meeting 04.26.22 determined and who made the selection? I would like to know what this consultant to San Mateo is being paid for work and why a consultant as left leaning as this person (they/them) was selected. It seems they/them is a fellow Columbia University alumnus like one of our very own council people (gender neutral to avoid offending anyone). This person's views can easily be seen by reviewing who they/them advocate for. Also, a request went out for more feedback on Housing Element and development within our city. Why does the city council continue to ask for more feedback when they do not listen to anyone unless they share their same progressive housing policies? It is much too late to try to spin this entire process as anything less than fair, honest and transparent. It is a complete sham to those who actually follow this convoluted procedure and actually know who our council members actually are and what they support. Sad to see what the city council of San Mateo has turned into what it has done to divide our city into sections based on race and wealth. The racial undertones of comments by the city council, contributors and consultants are enough to anger many residents who have lived in and contributed much more to

this city than all of you. Stop ruining San Mateo, you had no part in creating or developing this city to what it is today.

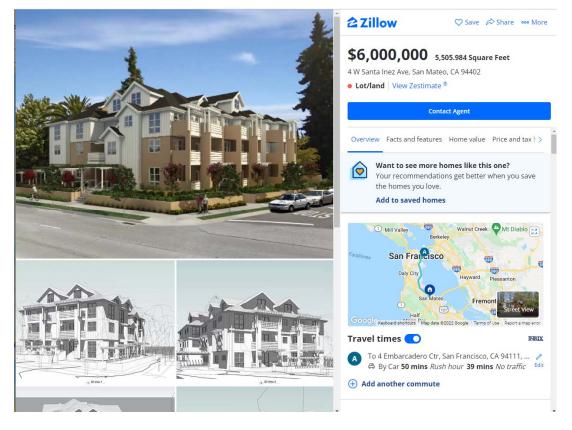

Time to set policy in front of voters instead of behind your screens. End this very undemocratic process of conducting council meetings via Zoom. Face your constituents, or are you too timid to do that.

Chris Conway San Mateo, Ca.

The screenshot below is the problem with simply upzoning and the loss of local control, it simply drives up the cost of the land, after shelling out the asking price I am not sure how the new owner will make an already tight project pencil out.

Thank you,

Thomas Morgan

Comment on 2023-2031 Draft Housing Element	 Slow Growth is the key. None of us knows what the future will bring. Take an Objective look at housing from a multi-view approach. California population is decreasing. Coronavirus and technology has provided opportunities for workers to work from anywhere with no need to live near their old job site. Dense housing has a Negative Impact on schools, police, recreation. I do not want to walk by half-vacant high-rise housing or office buildings that block the sun.

Comment on 2023-2031 Draft Housing Element	"While some people voiced their interest in up zoning single- family neighborhoods or eliminating them altogether, other homeowners want to protect them and are concerned with the future of investments they have made."	
	I'd like to better understand who wants to re-zone or-more worrying-eliminate single-family housing here. "Upzoning" is an adorable word for "kicking people out of their homes to cram more people onto the land." Are these people even San Mateo residents? The "no more housing" ship has sailed, so it's not with any one's energy to complain about more building; please, then, focus on sites that can be updated and REALISTICALLY adapted to include more housing. This would, therefore, include locations closer to mass transit.	
	Building on Campus Drive sounds like a nightmare to me, because public transportation is currently miserable in that area, and the 92/West Hillsdale interchange can be horrific

Please find attached Housing Choices' comments on the City of San Mateo 2023-2031 Housing Element Draft including Attachments A & B. We hope that the city will make meaningful changes to the analysis of housing needs of people with developmental disabilities and Fair Housing Assessment, as well as, further develop policies and programs which will meet the needs of Extremely Low Income households and increase housing accessibility for people with developmental disabilities in the next draft.

Thank you,

housing@cityofsanmateo.org

Re: Comments on the Draft Housing Element

Thank you for sharing this early draft of the Housing Element with the public. On behalf of San Mateo's more than 800 residents with intellectual and developmental disabilities, Housing Choices is grateful for the opportunity to comment before it is sent to HCD. We also appreciate the work that the City of San Mateo has done to engage with Housing Choices throughout the community engagement process and consider the programs and policies that we have recommended as best practices for inclusion of people of all abilities in the city's future housing plans. However, we have concerns that the assessment of the housing needs of the San Mateo population with developmental disabilities in the draft Housing Element is very superficial and does not provide enough analysis to support meaningful inclusion of people with developmental disabilities in the city's housing plans. We also ask that the city immediately update the obsolete and derogatory language used to describe developmental disabilities as including mild to severe "mental retardation" on page H-A-55 of Appendix A-Needs Analysis and instead use the standard term "intellectual disability".

About Housing Choices

Housing Choices is a housing organization funded by the Golden Gate Regional Center to support people with developmental disabilities to be fully integrated in San Mateo's affordable housing supply. We provide housing navigation services for both individuals and families. We also partner with affordable housing developers to make inclusive housing commitments for people with disabilities in their housing projects. At these projects we provide onsite housing retention services. A San Mateo example of this highly successful model is the new Kiku Crossing where 8 of the 225 units will include a preference for people with developmental disabilities who will benefit from Housing Choices' coordinated supportive services funded by the Golden Gate Regional Center. The Golden Gate Regional Center has contracted with

Housing Choices to provide the San Mateo planning staff and Housing Element consultants with an assessment of the housing needs of people with developmental disabilities, as required by SB 812. In addition, 21 Elements has facilitated Housing Choices' involvement of people with developmental disabilities in the planning process through its Equity Advisory Group.

Incomplete Assessment of Housing Needs of People with Developmental Disabilities

On December 2, 2021, Housing Choices submitted an assessment of the housing needs of San Mateo residents with developmental disabilities (Attachment 1) which followed HCD guidance for a complete analysis of special housing needs groups, including:

- A quantification of the total number of persons and households in the special housing needs group, including tenure (rental or ownership), where possible.
- A quantification and qualitative description of the need (including a description of the potential housing problems faced by the special needs groups), a description of any existing resources or programs, and an assessment of unmet needs.
- Identification of potential program or policy options and resources to address the need

After receiving feedback on our comments from City staff Housing Choices submitted revised comments on February 10, 2022 (Attachment 2).

As discussed below, San Mateo's draft does not incorporate any of the Housing Choices' data and analysis, does not meaningfully discuss the potential housing problems, unmet needs or best practices for inclusion of people with developmental disabilities in integrated and least restrictive housing settings in the community. We believe that the inclusion of these missing elements would demonstrate that the city has a clear understanding of the accessibility needs of people with developmental disabilities and how they differ from other disability types. Furthermore it would help the city to create more meaningful programs and policies to meet the housing needs of residents with developmental disabilities as required by Housing Element law.

Underestimation of the San Mateo Population with Developmental Disabilities

The draft analysis undercounts the population of San Mateo residents with developmental disabilities by using outdated demographic data reported by the Department of Developmental Services (DDS) as of 2020 rather than the more current data from DDS as of September 2021 provided in Housing Choices comments. On page H-A-56 of Appendix A- Needs Analysis, Table 12 states that there are **500 individuals age 18+** and **277 individuals under age 18** with developmental disabilities living in San Mateo based on Department of Developmental Services 2020 data of consumer counts by zip code for a total of 777 San Mateo residents with developmental disabilities. However, based on data reported by DDS by zip code as of September 2021 for zip codes 94401, 94402 and 94403 (provided to us by the City of San Mateo planning staff) there were **531 individuals age 18+** and **304 individuals under age 18** with developmental disabilities living in San Mateo for a total of 835 San Mateo residents with

developmental disabilities. This represents an increase of 58 total residents or 7% of the population.

In contrast, on page H-A-57, Table 13 reports a total population of 784 San Mateo residents with developmental disabilities. This is most likely attributable to an error in the reporting of individuals living in Foster/ Family Homes and Other living arrangements which are both reported by DDS as <11 but in Table 13 are both reported as 10.

Failure to Provide Data Establishing Trends Creating a Greater Need for Housing

As mentioned above, Table 13 does report the population of San Mateo residents with developmental disabilities by residence however, because it fails to report residence type for adults separately from that of children and because it omits a comparison to data reported in the 2015 Housing Element important trends about the changing housing needs of San Mateo residents with developmental disabilities is missing from this analysis. When looking at the residence type of only adults aged 18+ we see that the greatest housing provider for adults with developmental disabilities in the City of San Mateo is licensed care facilities (including Community and Intermediate Care Facilities). As of 2021 50% of all adults with developmental disabilities in the 2015 Housing in licensed care facilities, significantly higher than the 32% of adults across all San Mateo County jurisdictions. Yet, when comparing this data to what was last reported in the 2015 Housing Element we find that despite an overall increase in the total population there has been a net decrease in the number of adults with developmental disabilities transitioning into licensed care facilities or into their own apartment with supportive services during this time period.

The decrease of adults transitioning into licensed care facilities reflects data from DDS, and which was reported in Housing Choices comments to city staff, that San Mateo County has experienced a loss of 5% of its supply of community care facilities, a large number of which are located in the City of San Mateo. Data on increased life spans of people with developmental disabilities, which is also omitted from the Housing Element, compounds the loss of supply by increasing turnover of beds available in the remaining licensed care facilities. Coupled with the decline in adults living in their own apartments with supportive services, this data demonstrates that the city must do more to meet the housing needs of people with developmental disabilities by increasing access to integrated affordable housing to prevent them from falling into homelessness or being displaced after the death of a parental home provider.

Other data which Housing Choices' comments reported on which are vital to an understanding of the barriers to housing access for this special needs population that were omitted from the Housing Element analysis are:

- 1. Continuing increases in the diagnosis of autism affecting growth of the population of San Mateo residents with developmental disabilities (21% increase from 2013-2021) beyond that of the general population (6% increase from 2010-2020)
- 2. Decreases in age groups 42-61 despite increases in all other age groups including 62+ which Housing Choices attributes to greater risk of displacement from the home

community among this age group upon the death or infirmity of the parent who was providing housing

Lack of Meaningful Analysis of Strategies to Increase Housing Access for People with Developmental Disabilities

The Housing Element acknowledges the significance of the transition from the family home for an adult with a developmental disability including the increased risk of displacement or homelessness when a parent caregiver passes away or becomes unable to house and care for the adult. There are also basic descriptions of the alternative housing options available to people with developmental disabilities including:

- Living independently in conventional housing
- Group living (including different levels of care and support)

However, there is no further analysis of the housing needs of people with developmental disabilities beyond a single sentence on page H-A-55 which states "Some people with developmental disabilities are unable to work, rely on Supplemental Security Income and live with family members. By not including information, provided by Housing Choices, on best practices for inclusion of people with developmental disabilities in conventional affordable housing, the city is unable to create meaningful strategies to increase housing accessibility for this population needed to decrease the risk of displacement or homelessness when their family home is no longer an option. These best practices to increase accessibility include:

- Integration in typical affordable housing in order to affirmatively further fair housing for a group that has historically experienced no alternatives to segregated living and to counter the loss of supply of licensed care facilities
- **Coordination of housing with onsite supportive services** funded by the Golden Gate Regional Center should be encouraged. These fully funded coordinated services are often as essential to a person with a developmental disability as a physically modified unit is to a person with a mobility, vision, or hearing impairment and provide a supported pathway for people with developmental disabilities to apply for and retain an affordable apartment
- A mix of unit sizes set-aside at inclusive housing properties would address the needs of those who require live-in aides, want to live with roommates or partners, or have children.
- Location near public transit would accommodate the transit-dependency of most adults with developmental disabilities.
- **Deeply affordable housing** is needed, targeting incomes not more than 30% of Area Median Income and taking advantage of Housing Authority Project Based Vouchers or HUD 811 Project Rental Assistance when available to create housing opportunities for those who cannot meet minimum income requirements for units priced at 30% of Area Median Income.

Without this complete analysis of the housing needs of people with developmental disabilities any programs or policies aimed at increasing "accessible units" will be discriminatory in nature as they apply only to people with physical disabilities needing physically modified units and not to people of other abilities who may require services to increase housing access. This is most evident on page H-A-54 of Appendix A where accessible units are defined as designed to "offers greater mobility and opportunity for independence" but makes no mention of the supportive services needed by people with other types of disabilities including developmental and mental health disorders. This model of housing combined with supportive services has been shown to be incredibly effective in helping individuals with developmental disabilities find and retain housing, and is equally as important to a person with a developmental disability as the physical design of a building is to a person with a physical disability. This also puts the city at risk of not meeting HCD's AFFH guidance to promote fair housing choice and access to opportunity to support integration for a historically segregated population. Per HCD guidance, "For persons with disabilities, fair housing choice and access to opportunity include access to accessible housing and housing in the most integrated setting appropriate to an individual's needs as required under federal civil rights law, including equitably provided disability-related services that an individual needs to live in such housing." HCD defines fair housing choice as:

- Actual choice, which means the existence of realistic housing options
- Protected choice, which means housing that can be accessed without discrimination; and
- Enabled choice, which means realistic access to sufficient information regarding options so that any choice is informed.

Need to Clarify How Programs and Policies Will Increase Housing Access For People with Developmental Disabilities

We want to thank planning staff and the consultant who developed this draft for acknowledging the need for affordable housing to increase housing access for people with disabilities. This is especially important for those whose sole source of income is from disability benefits such as Supplemental Security Income, which in 2022 has a maximum monthly payment of \$1,040, well below minimum income requirements for even the Extremely Low Income housing (30% of AMI) available in San Mateo. The lack of housing priced to be affordable to people of Extremely Low Income does not only affect people with disabilities. According to the draft Housing Element, 12.7% of all San Mateo households fall under the Extremely Low Income limits which represents the second largest lower income group in the city, exceeded only by Low Income households. And Figure 13 on page H-A-25 of Appendix A- Needs Analysis shows that Extremely Low Income renters are the second largest proportion of San Mateo Renters exceeded only by Above Moderate Income.

According to the HCD's APR dashboard between 2015-2020 San Mateo met less than 15% of its Very Low Income RHNA target (of which half are supposed to ELI). In order to address this shortfall, the 2023-2031 draft housing element identified Policy 5.2.3: "Prioritize city funding proposals for city funded affordable housing that are committed to serving hard to serve residents (e.g., extremely low income, special needs, on site services)". We strongly encourage

the city to go further in its commitment to meeting the need for more units of Extremely Low Income housing by including proposals for city-owned land and land dedicated to affordable housing under the inclusionary program to this Policy.

Secondly, people with developmental disabilities not only need deeply affordable housing, they also need housing that is coordinated with onsite supportive services funded by the Golden Gate Regional Center. In order to specifically address the housing needs of people with developmental disabilities, San Mateo must clarify their definition of accessible/visitable units as referenced in Policies 5.1.1 and most importantly 5.2.2 Incentivize developers through direct subsidies, fee waivers, and/or density bonuses, to increase accessibility requirements beyond the federal requirement of 5% for subsidized developments. Currently, federal accessibility requirements only address the housing needs of people with physical disabilities. Housing Choices is extremely supportive of Policy 5.2.2 but asks that the city include incentivizing inclusion of units set aside for people with developmental disabilities who will benefit from coordinated on-site supportive services funded by the Golden Gate Regional Center to help them stay stably housed so that we do not continue to see decreases in the number of adults able to transition into their own apartment.

Failure to Follow HCD Guidance for AFFH

Guidance from HCD for AFFH also recommends that jurisdictions complete an intersectional analysis of housing needs for people with disabilities as "there are significant disparities by race within the population with disabilities". While there is data provided on the housing cost burden of all San Mateo residents by race in the Assessment of Fair Housing there is no intersectional analysis which shows the compounding effects of being a person of color with a disability as compared to a person of color without a disability or a white person with a disability. This is a significant component of Housing Choices' recommendations for Affirmatively Furthering Fair Housing, and yet is omitted from the city's draft.

Noncompliance with HCD Guidance for Completing an Assessment of Fair Housing

In response to the passage of AB 686, HCD released the AFFH Data Viewer to support the outreach and engagement jurisdictions are required to complete as part of their Assessment of Fair Housing. HCD explicitly states in their AFFH guidance that the Assessment of Fair Housing should include local data and knowledge defined as "any locally gathered and available information, such as a survey with a reasonable statistical validity or usefulness for identifying contributing factors, policies, and actions." On page H-D-11 of Appendix D- Affirmatively Furthering Fair Housing Narrative it is stated that a survey was administered to support the Fair Housing Assessment which received 150 responses. In a city with a population of over 100,000 residents this low of a response rate seems to indicate that the city did not complete the type of robust, targeted engagement required by HCD in administering the survey.

Reporting of data from the assessment also does not clearly show demographics of who was surveyed to show the number of residents from special needs groups that are most likely to face

fair housing issues such as BIPOC populations, people with disabilities, female-headed households, the unhoused and others. For instance on page H-D-29 when discussing disparities specific to the disability community it is stated that "Of residents with a disability responding to the residents' survey, 30% said that their home does not meet the needs of their household member." However, there is no indication of how many of the 150 respondents indicated having a disability so it is not evident to the reader of this document if 25% is equivalent to 5, 10 or 40 responses. Nor is it clear if only people with physical disabilities were surveyed or this included people with other types of disabilities.

There also appears to be an over reliance on data from the AFFH data viewer in the Fair Housing Assessment. For instance on page H-D-14 there is an explanation of the different agencies to which Fair Housing Complaints can be reported including HUD, DFEH and local enforcement organizations including Project Sentinel, the Legal Aid Society of San Mateo County, and Community Legal Services of East Palo Alto. This section also explains that state Fair Housing Law covers protected classes beyond that of federal Fair Housing Law. Yet, demographics of Fair Housing complaints are only reported for HUD which received only 57 complaints for San Mateo County from 2017-2021. Whereas, data from Project Sentinel shows that they investigated nearly 300 Fair Housing discrimination cases in San Mateo County from 2015-2020. This does not include reports made to any of the other agencies listed. This would indicate that the draft housing element severely underestimates the number of Fair Housing complaints made in San Mateo County and City of San Mateo, and therefore cannot accurately gauge how well the city is doing in addressing Fair Housing issues.

We urge you to review the attached comments we submitted on December 2, 2021 and February 10, 2022 and make changes to the San Mateo Housing Element so that it meaningfully addresses the housing needs of its residents with developmental disabilities.

Sincerely,

Kalisha Wakatan

Kalisha Webster Senior Housing Advocate Email Cell

DEVELOPMENTAL DISABILITIES SUBMISSION FOR

CITY OF SAN MATEO HOUSING ELEMENT

Introduction to Developmental Disabilities

People with developmental disabilities have a disability that emerged before age 18, is expected to be lifelong, and is of sufficient severity to require a coordinated program of services and support in order to live successfully in the community. Developmental disabilities include intellectual disability, autism, Down syndrome, epilepsy, cerebral palsy, and other disabling conditions similar in their functional impact to an intellectual disability. Under California's Developmental Disabilities Services Act and the U.S. Supreme Court's 1999 decision in *Olmstead v. L.C.*, people with developmental disabilities are entitled to receive community-based services that allow them to live in the least restrictive community setting. This shift to de-institutionalization has led to the closure of the most restrictive segregated settings and to the requirement that local jurisdictions in their Housing Elements assess and plan specifically for the housing needs of people with developmental disabilities who receive services from the Regional Center in order to live in their home community.

Demographic and Other Trends Affecting the Housing Needs of People with Developmental Disabilities

The City of San Mateo Population with Developmental Disabilities Grew by 12% Since the Last Housing Element and Accounts for 21% of the County's Total Population with Developmental Disabilities. The City of San Mateo is home to 835 people with developmental disabilities (Table ___). This represents an increase of 12% over the 2013 population of 746 reported in the City's 2015 Housing Element and reflects a much higher growth rate than the general population. In addition, the City's population with developmental disabilities accounts for 21% of the total County population with developmental disabilities, although the city's total population is only 14% of the County's total population.

Age	City of San Mateo	County of San Mateo	City of San Mateo as % of County
Under age 18	304	1169	26%
18 and older	531	2764	19%
Total	835	3933	21%

Table	Comparison of the 202	21 City and County Populati	ions with Developmental Disabilities
-------	-----------------------	-----------------------------	--------------------------------------

Source: The City of San Mateo data is based on zip code level data for zip codes 94401, 94402, and 94403 published by the California Department of Developmental Services as of September 30, 2021. County level data is published by the Department of Developmental Services as of June 30, 2021. Both sources exclude children from birth to the third birthday because approximately 75% of this age group is found not eligible for continuing lifelong services on their third birthday.

Decline in Living Arrangements for Adults with Developmental Disabilities Outside the Family Home. Of the City's total population with developmental disabilities, 531 (64%) are adults and 304 (36%) are under age 18 (Table ___). Assessing the housing needs of adults with developmental disabilities is of particular importance because as they age the adults will require a residential option outside the family home, whereas the family home is the preferred living option for children with developmental disabilities. In 2021, 505 City of San Mateo residents with developmental disabilities lived in the family home compared to 389 in 2013 as reported in the 2015 to 2023 Housing Element. This 30% increase in reliance on the family home is 2.5 times greater than the City's 12% increase in the developmental disabilities population during that same period. Increased reliance on the family home is primarily explained by overall growth in the population with developmental disabilities to live either in licensed care facilities (11% decline) or in affordable housing with supportive services (11% decline). (Table ___.) As adults with developmental disabilities age, they need opportunities to live outside the family home both because of the aging of their family caregivers and also because many adults with developmental disabilities would like to live in their own apartment with supportive services.

Living Arrangements	2013 Number	2021 Number	2021 Percent of Total Adults	% Change Since 2013
Total (children & adults) in the Family Home	389	505		30%
Adults In the family home	Not reported see note	201	38%	
Own apartment with supportive services	64	52	10%	-11%
Licensed Facilities	294	265	50%	-11%
Other (including homeless)	7	13	2%	.8%
Total Adults	Not reportedsee note	531	100%	

	Table	_ Changes in Living	Arrangements of Adults with	Developmental Disabilities
--	-------	---------------------	-----------------------------	-----------------------------------

Note: The 2013 data are reported in the 2015 Housing Element, which failed to separately count those under 18 and those 18 and older, making it difficult to estimate changes in the significance of the family home as a residential setting specifically for adults. The 2021 data are published at the zip code level by the California Department of Developmental Services as of September 30, 2021. These data assume that occupants of licensed facilities are 18 and older which is generally true, but if incorrect this assumption would tend to understate, not overstate, the need for other housing options for adults with developmental disabilities.

Increase of Autism Diagnosis Reflected in Increase in Adults in their 20s and 30s. Growth in the City of San Mateo's population with developmental disabilities since the 2015 Housing Element correlates with a significant annual increase in the diagnosis of autism that began in the mid-1980s and did not level out until after 2015. The cumulative impact of this trend is already seen in the growth in the San Mateo County population age 18 to 41 with developmental disabilities and will continue into the future. This trend has significant implications for housing needs among City of San Mateo adults with developmental disabilities during the period of the 2023 to 2031 Housing Element.

Age	2015 Number	2021 Number	% Change
18 to 31	1023	1189	16%
32 to 41	397	457	15%
41 to 52	382	335	-12%
52 to 61	385	348	-10%
62 plus	327	435	33%
Total adults	2514	2764	10%

Table __ Changes in Age Distribution of Adult Population in San Mateo County

Source: County level data is published by the Department of Developmental Services as of June 30, 2021 and as of September 30, 2015.

Longer Life Spans. Between September 2015 and June 2021, the California Department of Developmental Services reports that the number of San Mateo County residents with developmental disabilities age 62 and older grew by 33% (Table ___). This is not due to migration of senior citizens with developmental disabilities to San Mateo County, but rather to well-documented gains in life span among people with developmental disabilities. With longer life expectancy, more adults with developmental disabilities will outlive their parents and family members with whom a growing number of City of San Mateo adults with developmental disabilities now live because of the lack of other residential options. Longer life spans will also slow the pace of resident turnover in the county's limited supply of licensed care facilities, which will further reduce opportunities for the growing population of people with developmental disabilities to secure housing outside the family home.

Decline in Licensed Care Facilities. The California Department of Developmental Services reports that between September 2015 and June 2021, San Mateo County lost 5% of its supply of licensed care facilities for people with developmental disabilities (including Community Care Facilities, Intermediate Care Facilities, and Skilled Nursing Facilities), thereby increasing the need for affordable housing options coordinated with supportive services funded by the Regional Center. This trend is mirrored in the 11% decline in the number of City of San Mateo adults able to live in licensed care homes between 2013 and 2021 (Table ___). The reduced role of licensed care facilities demonstrates the need for the City's Housing Element to plan for affordable housing that includes people with developmental disabilities so that adults with developmental disabilities are not forced out of the county when they lose the security of their parent's home.

Displacement. The California Department of Developmental Services has documented a 12% decline in the age group 42 to 51 and a 10% decline in the age group 52 to 61 in San Mateo County between September 2015 and June 2021. (Table ___). In light of gains in life expectancy, this loss can reasonably be attributed to homelessness or displacement from the county because of the lack of residential living options (either licensed facilities or affordable housing) when an elderly parent caregiver passes away or becomes unable to house and care for the adult. Displacement takes a particular toll on adults with

developmental disabilities who depend on familiarity with transit routes and shopping and services, as well as support from community-based services and informal networks built up over years in living in the City of San Mateo.

Higher Rates of Physical Disabilities. People with developmental disabilities are more likely than the general population to have an accompanying physical disability. Twenty-seven percent (27%) of San Mateo County residents with developmental disabilities have limited mobility, and 13% have a vision or hearing impairment. The need for an accessible unit coupled with the need for coordinated supportive services compounds the housing barriers faced by those with co-occurring intellectual and physical disabilities.

Ineligibility for Many Affordable Rental Units. Some adults with developmental disabilities depend on monthly income of under \$1,000 from the Supplemental Security Income (SSI) program, pricing them out of even the limited number of Extremely Low Income affordable housing units in the City of San Mateo. Those with employment tend to work part-time in the lowest paid jobs and also struggle to income-qualify for many of the affordable housing units for rent in the City of San Mateo.

Transit-Dependent. Most adults with developmental disabilities do not drive or own a car and rely on public transit as a means to integration in the larger community.

Best Practices for Inclusion of People with Developmental Disabilities in Typical Affordable Housing

As demonstrated by a growing number of inclusive affordable housing developments in neighboring jurisdictions, the City of San Mateo can meet the housing needs of people with developmental disabilities by adopting policies and programs to promote their inclusion with coordinated services in typical affordable housing. The following considerations should guide the City of San Mateo in this pursuit:

- Integration in typical affordable housing is a priority in order to affirmatively further fair housing for a group that has historically experienced no alternatives to segregated living and also to counter the displacement of adults with developmental disabilities out of San Mateo County.
- **Coordination of housing with onsite supportive services** funded by the Golden Gate Regional Center should be encouraged. These fully funded coordinated services provide a supported pathway for people with developmental disabilities to apply for and retain an affordable apartment and are often as essential to a person with a developmental disability as a physically modified unit is to a person with a mobility, vision, or hearing impairment.
- A mix of unit sizes at inclusive housing properties would address the needs of those who require live-in aides, want to live with roommates or partners, or have children.
- Location near public transit would accommodate the transit-dependency of most adults with developmental disabilities.
- **Deeply affordable housing is needed,** targeting incomes not more than 30% of Area Median Income and taking advantage of Housing Authority Project Based Vouchers or HUD 811 Project

Rental Assistance when available to create housing opportunities for those who cannot meet minimum income requirements for units priced at 30% of Area Median Income.

Policy and Program Recommendations

The City of San Mateo has a responsibility not simply to assess the housing needs of people with developmental disabilities but also to create policy, zoning, program and other changes that make it more feasible for affordable housing developers to include people with developmental disabilities in their housing in coordination with the supportive services available from the Golden Gate Regional Center. The City's 2015 Housing Element identified a need for housing for an additional 30 to 87 people with developmental disabilities, but the number of adults with developmental disabilities living in their own apartment actually declined by 11% since the last Housing Element, even as the population grew by 12%. The City's lack of progress in meeting the housing needs of people with developmental disabilities since the last Housing Element demonstrates the need for policies and programs that specifically incentivize inclusion of people with developmental disabilities in affordable housing with coordinated services provided by the Golden Gate Regional Center.

• Establish and monitor a quantitative goal. Tracking the City's success in housing people with developmental disabilities is essential to determine whether policies and programs are having an effect in overcoming historic patterns of discrimination and exclusion of people with developmental disabilities from affordable housing. A goal of 150 new Extremely Low-Income housing units for City of San Mateo residents with developmental disabilities over the period of the 2023 Housing Element would represent meaningful progress towards the total unmet housing need of this special needs population.

Sample Language: The City of San Mateo shall monitor progress towards a quantitative goal of 150 new Extremely Low Income housing units that are subject to a preference for people with developmental disabilities needing the coordinated services provided by Golden Gate Regional Center to live inclusively in affordable housing.

• Target City-Owned Land, Land Dedicated to Affordable Housing under the Inclusionary Ordinance and City Housing Funds to Meet City-Specific Priorities. City-owned land, land dedicated to affordable housing in lieu of providing affordable units under the inclusionary ordinance, and city housing funds are often essential to the development of affordable housing that is financially feasible in high-cost City of San Mateo. In creating guidelines for the scoring of any competitive requests for proposals for these scarce resources, the City should grant additional points to affordable housing projects that address the housing needs of City of San Mateo residents who are most difficult to house under existing state and federal housing finance programs--for example, by prioritizing proposals with a higher number of extremely low income units or that make a percentage of units subject to a preference for identified categories of special needs people who would benefit from coordinated onsite services, including but not limited to people with developmental disabilities who benefit from services of the Golden Gate Regional Center. Sample Language: In publishing requests for competitive proposals for any city-owned land, land dedicated to affordable housing under the city's inclusionary ordinance or city housing funds, the City of San Mateo shall grant additional points to proposals that address the city's most difficult to achieve housing priorities, by, for example, providing a greater number of extremely low-income units or committing to make a percentage of the units subject to a preference for people with special needs who will benefit from coordinated onsite services, such as people with developmental disabilities who receive services from the Golden Gate Regional Center.

Offer Developers a Range of Affordability Options Under the Inclusionary Ordinance. Most adults with developmental disabilities have incomes too low to satisfy minimum income requirements for the Low Income units currently offered under the city's inclusionary ordinance and are effectively excluded from this housing option. California law (AB 1505, the "Palmer Fix") explicitly allows cities to adopt inclusionary housing ordinances that address a range of income levels from moderate-income to extremely low-income. The City should take advantage of this authority to make its ordinance more responsive to local needs by offering developers of market rate housing a menu of options for including affordable units, for example, by setting a higher percentage of units priced at moderate income and a lower percentage of units set at extremely low income. Such a menu would address a broader range of City of San Mateo housing needs, while giving developers more options for meeting the inclusionary requirement.

Sample Language: The City of San Mateo shall revise its inclusionary housing ordinance to offer developers a menu of options for achieving affordability, adjusting the percentage of units required to be affordable depending on the degree of affordability achieved (moderate-income, low income, very low income, and extremely low income).

• Reduce Parking Requirements for People with Developmental and Other Disabilities. Adults with developmental disabilities have reduced parking needs because they rarely have a driver's license or own a car. This may also be true of other categories of people with disabilities. The City should revise its ordinances to limit parking required for affordable units for people with developmental disabilities to .5 space for each affordable studio or 1 bedroom unit and 1 space for an affordable 2 bedroom unit or larger. A similar reduction should be considered for physically accessible units required to be included in affordable housing.

Sample Language: The City shall encourage the inclusion of people with developmental and other disabilities in affordable housing by recognizing their transit dependence and establishing lower parking ratios for units targeted to people with developmental and other disabilities than would otherwise be required for affordable housing.

• Local Density Bonus Concessions. The state density bonus law currently provides additional density for housing projects that include at least 10% of the units for disabled veterans, transition-age foster youth, and homeless persons at the very low income level. Above and beyond the density bonus guidelines mandated by state law, the City should add the same incentives when at least 10% of the units are subject to preference for people with

developmental disabilities who will benefit from coordinated onsite services provided by the Golden Gate Regional Center.

Sample Language: In implementing the California density bonus statute, the City shall provide for the same density bonus, incentives, or concessions for housing projects that include at least 10% of the units for people with developmental disabilities at the very low-income level as are available to projects that include at least 10% of the units for disabled veterans, transition-age foster youth, and homeless persons at the very low-income level.

Affirmative Marketing of Physically Accessible Units: Developers are allowed to affirmatively market accessible units to disability-serving organizations in San Mateo County (i.e. Golden Gate Regional Center, Housing Choices Coalition for Person with Developmental Disabilities, Center for Independence of Individuals with Disabilities and others) but rarely take this step. Affirmative marketing is particularly needed by people with developmental disabilities who, because of cognitive, communication and social impairment, may rely on housing navigation services funded by the Golden Gate Regional Center to learn about and apply for affordable housing.

Sample Language: As a condition of the disposition of any city-owned land, land dedicated to affordable housing under the city's inclusionary ordinance, the award of city financing, any density bonus concessions, or land use exceptions or waivers for any affordable housing project, the City shall require that the housing developer implement an affirmative marketing plan for physically accessible units which, among other measures, provides disability-serving organizations adequate prior notice of the availability of the accessible units and a process for supporting people with qualifying disabilities to apply.

• Extremely Low-Income Accessory Dwelling Units. As part of a larger plan to increase the supply of Accessory Dwelling Units (ADUs), the City should consider creating a forgivable loan program for homeowners who build ADUs and rent them for at least 15 years at Extremely Low Income rent levels to people with developmental disabilities.

Sample Language: Subject to funding availability, the City shall devise a program of financing for Accessory Dwelling Units subject to rent restrictions for at least 15 years at Extremely Low-Income rent levels to people with developmental disabilities who would benefit from coordinated housing support and other services provided by the Golden Gate Regional Center.

• Affirmatively Further Fair Housing. Not only is disability the highest-ranked source of Fair Housing complaints, a growing body of San Mateo County data indicates that Black, Indigenous and other People of Color (BIPOC) with disabilities experience higher rates of housing discrimination and severe rent burden than either BIPOC without disabilities or whites with disabilities. Currently the City of San Mateo offers its residents exceptional employment, educational and social opportunities but the severe shortfall of Extremely Low Income units means that BIPOC--particularly those with disabilities--are too often excluded from enjoying those community assets. Multiple barriers including high land and construction costs and limited funding make it difficult for developers to produce Extremely Low Income units that will overcome such disparities. Policies that lead to increased production of Extremely Low Income units, as well as city staff dedicated to implementing and overseeing those policies, will Affirmatively Further Fair Housing in the City of San Mateo and decrease displacement and homelessnessness for the most at-risk City of San Mateo residents.

Sample Language: The City of San Mateo's plans to Affirmatively Further Fair Housing for Black, Indigenous and other People of Color, particularly those with disabilities, shall include policies designed to increase the production of Extremely Low Income units, as well as adequate staff capacity to implement and monitor the impact of these policies.

DEVELOPMENTAL DISABILITIES SUBMISSION FOR

CITY OF SAN MATEO HOUSING ELEMENT

Introduction to Developmental Disabilities

People with developmental disabilities have a disability that emerged before age 18, is expected to be lifelong, and is of sufficient severity to require a coordinated program of services and support in order to live successfully in the community. Developmental disabilities include intellectual disability, autism, Down syndrome, epilepsy, cerebral palsy, and other disabling conditions similar in their functional impact to an intellectual disability. Under California's Developmental Disabilities Services Act and the U.S. Supreme Court's 1999 decision in *Olmstead v. L.C.*, people with developmental disabilities are entitled to receive community-based services that allow them to live in the least restrictive community setting. This shift to de-institutionalization has led to the closure of the most restrictive segregated settings and to the requirement that local jurisdictions in their Housing Elements assess and plan specifically for the housing needs of people with developmental disabilities who receive services from the Regional Center in order to live in their home community.

Demographic and Other Trends Affecting the Housing Needs of People with Developmental Disabilities

The City of San Mateo Population with Developmental Disabilities Grew by 12% Since the Last Housing Element and Accounts for 21% of the County's Total Population with Developmental Disabilities. The City of San Mateo is home to 835 people with developmental disabilities (Table __). This represents an increase of 12% over the 2013 population of 746 reported in the City's 2015 Housing Element and reflects a much higher growth rate than the general population. In addition, the City's population with developmental disabilities accounts for 21% of the total County population with developmental disabilities, although the city's total population is only 14% of the County's total population.

Age	City of San Mateo	County of San Mateo	City of San Mateo as % of County
Under age 18	304	1169	26%
18 and older	531	2764	19%
Total	835	3933	21%

Table ____ Comparison of the 2021 City and County Populations with Developmental Disabilities

Source: The City of San Mateo data is based on zip code level data for zip codes 94401, 94402, and 94403 published by the California Department of Developmental Services as of September 2021. County level data is published by the Department of Developmental Services as of June 2021. Both sources exclude children from birth to the third birthday because approximately 75% of this age group is found not eligible for continuing lifelong services on their third birthday. **Decline in Living Arrangements for Adults with Developmental Disabilities Outside the Family Home.** Of the City's total population with developmental disabilities, 531 (64%) are adults and 304 (36%) are under age 18 (Table __). Assessing the housing needs of adults with developmental disabilities is of particular importance because as they age the adults will require a residential option outside the family home, whereas the family home is the preferred living option for children with developmental disabilities. In 2021, 505 City of San Mateo residents with developmental disabilities lived in the family home compared to 389 in 2013 as reported in the 2015 to 2023 Housing Element. This 30% increase in reliance on the family home is 2.5 times greater than the City's 12% increase in the developmental disabilities population during that same period. Increased reliance on the family home is primarily explained by overall growth in the population with developmental disabilities to live either in licensed care facilities (10% decline) or in affordable housing with supportive services (19% decline). (Table __.) As adults with developmental disabilities age, they need opportunities to live outside the family home both because of the aging of their family caregivers and also because many adults with developmental disabilities would like to live in their own apartment with supportive services.

Living Arrangements	2013 Number	2021 Number	2021 Percent of Total Adults	% Change Since 2013
Total (children & adults) in the Family Home	389	505		30%
Adults In the family home	Not reported see note	201	38%	
Own apartment with supportive services	64	52	10%	-19%
Licensed Facilities	294	265	50%	-10%
Other (including homeless)	7	13	2%	86%
Total Adults	Not reportedsee note	531	100%	

Table	Changes in Living	Arrangements of Adults with Dev	elopmental Disabilities
	_ •		

Note: The 2013 data are reported in the 2015 Housing Element, which failed to separately count those under 18 and those 18 and older, making it difficult to estimate changes in the significance of the family home as a residential setting specifically for adults. The 2021 data are published at the zip code level by the California Department of Developmental Services as of September 2021. These data assume that occupants of licensed facilities are 18 and older which is generally true, but if incorrect this assumption would tend to understate the need for other housing options for adults with developmental disabilities.

Increase of Autism Diagnosis Reflected in Increase in Adults in their 20s and 30s. Growth in the City of San Mateo's population with developmental disabilities since the 2015 Housing Element correlates with a significant annual increase in the diagnosis of autism that began in the mid-1980s and did not level out until after 2015. The cumulative impact of this trend is already seen in the growth in the San Mateo County population age 18 to 41 with developmental disabilities and will continue into the future. This

trend has significant implications for housing needs among City of San Mateo adults with developmental disabilities during the period of the 2023 to 2031 Housing Element.

Age	2015 Number	2021 Number	% Change
18 to 31	1023	1189	16%
32 to 41	397	457	15%
	202		100/
41 to 52	382	335	-12%
52 to 61	385	348	-10%
62 plus	327	435	33%
Total adults	2514	2764	10%

Table __ Changes in Age Distribution of Adult Population in San Mateo County

Source: County level data is published by the Department of Developmental Services as of June 30, 2021 and as of September 30, 2015.

Longer Life Spans. Between September 2015 and June 2021, the California Department of Developmental Services reports that the number of San Mateo County residents with developmental disabilities age 62 and older grew by 33% (Table ___). This is not due to migration of senior citizens with developmental disabilities to San Mateo County, but rather to well-documented gains in life span among people with developmental disabilities. With longer life expectancy, more adults with developmental disabilities will outlive their parents and family members with whom a growing number of City of San Mateo adults with developmental disabilities now live because of the lack of other residential options. Longer life spans will also slow the pace of resident turnover in the county's limited supply of licensed care facilities, which will further reduce opportunities for the growing population of people with developmental disabilities to secure housing outside the family home.

Decline in Licensed Care Facilities. The California Department of Developmental Services reports that between September 2015 and June 2021, San Mateo County lost 5% of its supply of licensed care facilities for people with developmental disabilities (including Community Care Facilities, Intermediate Care Facilities, and Skilled Nursing Facilities), thereby increasing the need for affordable housing options coordinated with supportive services funded by the Regional Center. This trend is mirrored in the 11% decline in the number of City of San Mateo adults able to live in licensed care homes between 2013 and 2021 (Table ___). The reduced role of licensed care facilities demonstrates the need for the City's Housing Element to plan for affordable housing that includes people with developmental disabilities so that adults with developmental disabilities are not forced out of the county when they lose the security of their parent's home.

Displacement. The California Department of Developmental Services has documented a 12% decline in the age group 42 to 51 and a 10% decline in the age group 52 to 61 in San Mateo County between September 2015 and June 2021. (Table ___). In light of gains in life expectancy, this loss can reasonably be attributed to homelessness or displacement from the county because of the lack of residential living options (either licensed facilities or affordable housing) when a parent caregiver passes away or becomes unable to house and care for the adult. Displacement takes a particular toll on adults with developmental disabilities who depend on familiarity with transit routes and shopping and services, as well as support from community-based services and informal networks built up over years in living in the City of San Mateo.

Higher Rates of Physical Disabilities. People with developmental disabilities are more likely than the general population to have an accompanying physical disability. Twenty-seven percent (27%) of San Mateo County residents with developmental disabilities have limited mobility, and 13% have a vision or hearing impairment. The need for an accessible unit coupled with the need for coordinated supportive services compounds the housing barriers faced by those with co-occurring intellectual and physical disabilities.

Ineligibility for Many Affordable Rental Units. Some adults with developmental disabilities depend on monthly income of under \$1,000 from the Supplemental Security Income (SSI) program, pricing them out of even the limited number of Extremely Low Income affordable housing units in the City of San Mateo. Those with employment tend to work part-time in the lowest paid jobs and also struggle to income-qualify for many of the affordable housing units for rent in the City of San Mateo.

Transit-Dependent. Most adults with developmental disabilities do not drive or own a car and rely on public transit as a means to integration in the larger community.

Best Practices for Inclusion of People with Developmental Disabilities in Typical Affordable Housing

As demonstrated by a growing number of inclusive affordable housing developments in neighboring jurisdictions, the City of San Mateo can meet the housing needs of people with developmental disabilities by adopting policies and programs to promote their inclusion with coordinated services in typical affordable housing. The following considerations should guide the City of San Mateo in this pursuit:

- Integration in typical affordable housing is a priority in order to affirmatively further fair housing for a group that has historically experienced no alternatives to segregated living and also to counter the displacement of adults with developmental disabilities out of San Mateo County.
- **Coordination of housing with onsite supportive services** funded by the Golden Gate Regional Center should be encouraged. These fully funded coordinated services provide a supported pathway for people with developmental disabilities to apply for and retain an affordable

apartment and are often as essential to a person with a developmental disability as a physically modified unit is to a person with a mobility, vision, or hearing impairment.

- A mix of unit sizes at inclusive housing properties would address the needs of those who require live-in aides, want to live with roommates or partners, or have children.
- Location near public transit would accommodate the transit-dependency of most adults with developmental disabilities.
- **Deeply affordable housing is needed,** targeting incomes not more than 30% of Area Median Income and taking advantage of Housing Authority Project Based Vouchers or HUD 811 Project Rental Assistance when available to create housing opportunities for those who cannot meet minimum income requirements for units priced at 30% of Area Median Income.

Policy and Program Recommendations

The City of San Mateo has a responsibility not simply to assess the housing needs of people with developmental disabilities but also to create policy, zoning, program and other changes that make it more feasible for affordable housing developers to include people with developmental disabilities in their housing in coordination with the supportive services available from the Golden Gate Regional Center. The City's 2015 Housing Element identified a need for housing for an additional 30 to 87 people with developmental disabilities, but the number of adults with developmental disabilities living in their own apartment actually declined by 11% since the last Housing Element, even as the population grew by 12%. The City's lack of progress in meeting the housing needs of people with developmental disabilities since the last Housing Element demonstrates the need for policies and programs that specifically incentivize inclusion of people with developmental disabilities in affordable housing with coordinated services provided by the Golden Gate Regional Center.

• Establish and monitor a quantitative goal. Tracking the City's success in housing people with developmental disabilities is essential to determine whether policies and programs are having an effect in overcoming historic patterns of discrimination and exclusion of people with developmental disabilities from affordable housing. Since its last Housing Element, the City of San Mateo facilitated land acquisition and provided city funding for one affordable housing project with a commitment to make 8 of the 225 apartments subject to a preference for people with developmental disabilities (Kiku Crossing). A goal of 100 new Extremely Low-Income housing units for City of San Mateo residents with developmental disabilities over the period of the 2023-2031 Housing Element would represent meaningful progress towards the total unmet housing need of this special needs population.

Sample Language: The City of San Mateo shall monitor progress towards a quantitative goal of 100 new Extremely Low Income housing units that are subject to a preference for people with developmental disabilities needing the coordinated services provided by Golden Gate Regional Center to live inclusively in affordable housing.

• Target City-Owned Land, Land Dedicated to Affordable Housing under the Inclusionary Ordinance and City Housing Funds to Meet City-Specific Priorities. City-owned land, land dedicated to affordable housing in lieu of providing affordable units under the inclusionary ordinance, and city housing funds are often essential to the development of affordable housing that is financially feasible in high-cost City of San Mateo. In creating guidelines for the scoring of any competitive requests for proposals for these scarce resources, the City should grant additional points to affordable housing projects that address the housing needs of City of San Mateo residents who are most difficult to house under existing state and federal housing finance programs--for example, by prioritizing proposals with a higher number of extremely low income units or that make a percentage of units subject to a preference for identified categories of special needs people who would benefit from coordinated onsite services, including but not limited to people with developmental disabilities who benefit from services of the Golden Gate Regional Center.

Sample Language: In publishing requests for competitive proposals for any city-owned land, land dedicated to affordable housing under the city's inclusionary ordinance or city housing funds, the City of San Mateo shall grant additional points to proposals that address the city's most difficult to achieve housing priorities, by, for example, providing a greater number of extremely low-income units or committing to make a percentage of the units subject to a preference for people with special needs who will benefit from coordinated onsite services, such as people with developmental disabilities who receive services from the Golden Gate Regional Center.

• Offer Developers Additional Alternatives Under the Inclusionary Ordinance. Most adults with developmental disabilities and other special needs groups on fixed incomes, are unable to satisfy minimum income requirements for the Lower Income units currently required under the city's inclusionary ordinance. California law (AB 1505, the "Palmer Fix") explicitly allows cities to adopt inclusionary housing ordinances that address a range of income levels from moderate-income to extremely low-income. The City should take advantage of this authority to make its ordinance more responsive to local needs by offering developers of market rate housing an alternative means of compliance with the city's BMR program if deeper levels of affordability are targeted, such as by allowing a lower percentage of units to be set aside if they are affordable to Extremely Low Income households. This same alternative can be extended to projects that make a percentage of units subject to a preference for identified categories of special needs people who would benefit from coordinated onsite services, including but not limited to people with developmental disabilities who benefit from services of the Golden Gate Regional Center. Such a menu would address a broader range of City of San Mateo housing needs, while giving developers more options for meeting the inclusionary requirement.

Sample Language: The City of San Mateo shall revise its inclusionary housing ordinance to offer developers an alternative means of compliance with the BMR program, to consider an applicant's request to lower the percentage of set-aside units in projects which include extremely low income units or units for residents requiring specialized services (such as people with developmental disabilities who benefit from services of the Golden Gate Regional Center) in

1043 of 1252

connection with its review of the planning application for the project and may reject or accept the request in its sole discretion.

• Reduce Parking Requirements for People with Developmental and Other Disabilities. Adults with developmental disabilities have reduced parking needs because they rarely have a driver's license or own a car. This may also be true of other categories of people with disabilities. The City should revise its ordinances to limit parking required for affordable units for people with developmental disabilities to .5 space for each affordable studio or 1 bedroom unit and 1 space for an affordable 2 bedroom unit or larger. A similar reduction should be considered for physically accessible units required to be included in affordable housing.

Sample Language: The City shall encourage the inclusion of people with developmental and other disabilities in affordable housing by recognizing their transit dependence and establishing lower parking ratios for units targeted to people with developmental and other disabilities than would otherwise be required for affordable housing.

 Local Density Bonus Priorities. The state density bonus law incentivizes the production of housing at the Low and Very Low Income level. But in counties like San Mateo County, with the highest Area Median Income in the state, these incentives reward the targeting of income levels that effectively exclude the many people with disabilities and seniors living on fixed incomes well below the Very Low Income target. The City of San Mateo should create additional local incentives to the state density bonus law to reward the production of more housing for City of San Mateo residents who do not benefit from the Low and Very Low Income units produced under the state density bonus law--for example, projects with a percentage of Extremely Low Income units and/or projects that make a percentage of units subject to a preference for identified categories of special needs people who would benefit from coordinated onsite services, including but not limited to people with developmental disabilities who benefit from services of the Golden Gate Regional Center.

Sample Language: In addition to implementing the California density bonus statute, the City shall provide an additional local density bonus, incentives, or concessions for housing projects that include a percentage of the units for people at the Extremely Low-Income affordability level and/or target special needs populations, such as people with disabilities who will benefit from coordinated onsite services provided by the Golden Gate Regional Center.

Affirmative Marketing of Physically Accessible Units: Developers are allowed to affirmatively market accessible units to disability-serving organizations in San Mateo County (i.e. Golden Gate Regional Center, Housing Choices Coalition for Person with Developmental Disabilities, Center for Independence of Individuals with Disabilities and others) but rarely take this step. Affirmative marketing is particularly needed by people with developmental disabilities who, because of cognitive, communication and social impairment, may rely on housing navigation

services funded by the Golden Gate Regional Center to learn about and apply for affordable housing.

Sample Language: As a condition of the disposition of any city-owned land, land dedicated to affordable housing under the city's inclusionary ordinance, the award of city financing, any density bonus concessions, or land use exceptions or waivers for any affordable housing project, the City shall require that the housing developer implement an affirmative marketing plan for physically accessible units which, among other measures, provides disability-serving organizations adequate prior notice of the availability of the accessible units and a process for supporting people with qualifying disabilities to apply.

• Extremely Low-Income Accessory Dwelling Units. As part of a larger plan to increase the supply of Accessory Dwelling Units (ADUs), the City should consider creating a financing program for homeowners who build ADUs and rent them for at least 15 years at Extremely Low Income rent levels or that are subject to a preference for identified categories of special needs people who would benefit from coordinated onsite services, including but not limited to people with developmental disabilities who benefit from services of the Golden Gate Regional Center.

Sample Language: Subject to funding availability, the City shall devise a program of financing for Accessory Dwelling Units subject to rent restrictions for at least 15 years at Extremely Low-Income rent levels and/or target special needs populations, such as people with disabilities who will benefit from coordinated onsite services provided by the Golden Gate Regional Center.

 Affirmatively Further Fair Housing. Not only is disability the highest-ranked source of Fair Housing complaints, a growing body of San Mateo County data indicates that Black, Indigenous and other People of Color (BIPOC) with disabilities experience higher rates of housing discrimination and severe rent burden than either BIPOC without disabilities or whites with disabilities. Currently the City of San Mateo offers its residents exceptional employment, educational and social opportunities but the City's severe shortfall of Extremely Low Income units means that BIPOC--particularly those with disabilities--are too often excluded from enjoying those community assets. Multiple barriers including high land and construction costs and limited funding make it difficult for developers to produce Extremely Low Income units that will overcome such disparities. Policies that lead to increased production of Extremely Low Income units, as well as city staff dedicated to implementing and overseeing those policies, will Affirmatively Further Fair Housing in the City of San Mateo and decrease displacement and homelessnessness for the most at-risk City of San Mateo residents.

Sample Language: The City of San Mateo's plans to Affirmatively Further Fair Housing for Black, Indigenous and other People of Color, particularly those with disabilities, shall include policies designed to increase the production of Extremely Low Income units, as well as adequate staff capacity to implement and monitor the impact of these policies.

May 4, 2022

Dear Mayor Bonilla and San Mateo City Council Members,

Thank you for the opportunity to provide a response to the 2022 Draft Housing Element. My letter focuses on the goal to Affirmatively Further Fair Housing.

State law requires that each community study patterns of racial segregation and concentrated affluence, identify the conditions that have contributed to these patterns, and plan for specific programs that will address these patterns.

First, San Mateo's Housing Element fails to sufficiently study this problem. While the neighborhoods where people of color live have been analyzed, the neighborhoods with high concentrations of white residents have not been studied. By failing to analyze the underlying conditions of these neighborhoods (exclusionary zoning, the history of racial covenants, etc.), the Housing Element also fails to propose policies and programs that will change those conditions and address the racial segregation that *those neighborhoods are also experiencing*. This is an egregious omission that flies in the face of *affirmatively furthering fair housing* to reduce segregation and create equal housing and opportunity access, regardless of race or ability.

Second, without adequate analysis, the Housing Element does not provide adequate solutions - by geography as is required by HCD guidelines - to meet the scale, depth, and nuance of the problem. Many of the proposed programs amount to "more marketing" in low-income neighborhoods. The programs and policy solutions should include approaches that address the underlying conditions of racial segregation, such as

- change the zoning of R-1 neighborhoods to allow for more density,
- pair investment strategies in under-invested areas with stronger anti-displacement measures to ensure low-income residents reap the benefits of neighborhood improvements,
- improve access to reliable, affordable transportation and access to high-quality schools

Third, the minimal AFFH analysis that does exist states that "there is a relative lack of affordable housing opportunities in higher-resourced areas of the city." Yet the Housing Element fails to propose housing sites, let alone affordable housing sites, in the high resource neighborhoods in the city. Again, those neighborhoods are left out of the equation and off the table in terms of being part of the solution to the city's segregation problems.

While much work has been done to create the current Housing Element, it falls short of state guidelines as well as the hopes and aspirations we should have for San Mateo. There is no reason why the burden of the housing crisis we face in our communities should continue to fall on low-income people and people of color,

while the windfall benefits of increased home values accrue to a largely-white, wealthier part of our community. Far from natural segregation, this is the outcome of decades of policies designed to favor some people over others, and we can choose differently. Now is the time to change this pattern of segregation and unequal benefits and burdens and create a different future for the next generations.

Respectfully,

Jennifer Martinez Resident, San Mateo

City Council Members: Rick Bonilla, Mayor; Diane Papan, Deputy Member; Joe Goethals, Council Member; Amourence Lee, Council Member; Eric Rodriguez, Council Member Planning Manager City of San Mateo 330 West 20th Avenue San Mateo, CA 94403

RE: Draft Housing Element

To whom it may concern,

Thank you for reaching out to the community regarding the Draft Housing Element outlining the process and review for expanding housing within our community over the next eight years. The Social Action Ministry (SAM) group at St. Matthew Catholic Church in San Mateo is concerned about the availability of affordable housing in our community.

SAM encourages our City leaders to focus on affordable housing for those members of our community in the very low- and low-income categories of median income for San Mateo County, identified in the Housing Element, many of whom are working in essential services and/or underemployed. We believe too much of our new housing construction has focused on the highest income earners of our region.

Your draft Housing Element correctly identifies the loss of affordability covenants on developments within the City of San Mateo that could potentially create a loss of affordable units, rather than an increase, during a time when the housing shortage is so acute. We need to push strong planning and allow zoning flexibility to convert under-utilized commercial projects for affordable residential developments. Our community is blessed with diversity from many walks of life, and we do not wish it to be only a home for the elite. Shelter and housing are a human right, and this is the time to focus on those who are the most shelter-insecure in our community as housing pressures become more amplified than anytime in our lives.

We appreciate your efforts and consideration of our position. We look forward to the results of your City Council meeting on May 16, 2022.

Sincerely,

Social Action Ministry of St. Matthew Catholic Church

Selected SAM members residing in San Mateo: María del Carmen Muñoz

Subject: San Mateo draft housing element/Comments from One San Mateo

Dear Mayor Bonilla and Members of the San Mateo City Council,

This letter is submitted on behalf of One San Mateo to provide feedback in relation to the draft housing element for the City of San Mateo. One San Mateo is a community group formed in 2017 to work toward creating a city that is responsive to the needs of all. We strive to increase racial and economic equity, primarily through our advocacy for affordable housing and renter protections. We believe that safe and stable housing is fundamental to human dignity and well-being and essential to the health and sustainability of the overall community.

In reviewing the housing element, the core interest of One San Mateo has been to evaluate its effectiveness in upholding the mandates of Affirmatively Furthering Fair Housing. These mandates require cities to work proactively to reverse historical patterns of segregation and foster integrated communities. Our comments are offered from the perspective of these AFFH goals.

HOUSING NEEDS AND THE RISK OF DISPLACEMENT

<u>Misleading metric</u>. Preventing the displacement of existing residents is central to the fulfillment of AFFH, as is made clear by the AFFH guidance memo issued by HCD in April of 2021. As it currently stands, the needs analysis in the draft housing element contains metrics that seriously downplay the risk of displacement in San Mateo. One such metric appears as follows: "According to research from the University of California, Berkeley, 0.0% of households in San Mateo live in neighborhoods that are susceptible to or experiencing displacement ..." Regardless of the source, offering this as a meaningful metric of the displacement threat in San Mateo is extremely misleading. Elsewhere in the needs analysis, the northeast section of San Mateo, particularly the area south of Poplar Avenue, is said to be characterized by high poverty, concentrations of cost burdened households, and overcrowding. The existence of high levels of cost burden and overcrowding are clear predictors of

displacement. Furthermore, the needs analysis reveals that the North Central and downtown neighborhoods are "At Risk of Becoming Exclusive" or "Becoming Exclusive." Looming exclusion necessarily translates into a threat of displacement. Thus, we maintain that this 0.0% statistic taken from UC Berkeley only serves to cloud the gravity of the displacement threat and underplay the need for aggressive action to prevent it. The credibility of the analysis would be strengthened if this statistic were removed.

<u>Jobs-housing fit</u>. The discussion of the increasing jobs-housing ratio does not go far enough toward exposing the growing pressures on lower-income residents and the displacement risk associated with this. While the rising jobs-housing ratio reflects the growing imbalance between jobs and housing, it does nothing to measure the relationship between affordability levels of the housing and the income levels of San Mateo residents. According to the needs analysis, "83.6% of permits issued in San Mateo were for above moderate-income housing, 6.2% were for moderate-income housing, and 10.1% were for low- or very low-income housing ..." Since many of the new jobs created over this period were low-wage, this signals a growing shortage of housing for residents at the lower end of the income scale. This, in turn, creates a risk of displacement. The needs analysis, particularly its assessment of displacement risk, would be strengthened by introducing a discussion of *jobs-housing fit*, a metric specifically designed to measure the number of low-wage workers within the city and the number of homes that are affordable to them.

MISSING CONSTRAINTS

<u>Measure Y</u>. The April 2021 guidance memo from HCD contains a list of zoning and land use barriers that includes an entry that reads: "Voter initiatives that restrict multi-family developments, rezoning to higher density, height limits, or similar measures that limit housing choices." In discussing constraints, the draft housing element makes passing mention of Measure Y, the voter initiative that creates a limit on height and density for new buildings in San Mateo through 2030. However, the perfunctory character of this treatment dramatically understates the importance of Measure Y in restricting the development of new homes at all levels of affordability. Three years ago the city council considered an increase in the Below Market Rate (BMR) requirement to 20 percent. The economic consultants hired by the city ultimately concluded that it was infeasible, given the height and density limits imposed by Measure Y. This is but one illustration of how Measure Y operates to put a chokehold on the creation of housing, including affordable housing. A far more robust discussion of Measure Y is called for in the consideration of constraints.

<u>*R-1 zoning*</u>. The guidance memo from HCD states the following: "In addition to identifying and analyzing racially and ethnically concentrated areas of property, an analysis should also consider concentrated areas of affluence ... to guide meaningful goals and actions to address fair housing issues." In the City of San Mateo, at least 70 percent of the land zoned for housing is R-1, and many of these R-1 neighborhoods are populated primarily by affluent whites. The draft housing element fails to discuss this reality, its causes, and the profound implications of R-1 zoning for segregating the community and perpetuating inequality.

SITES INVENTORY AND R-1 ZONING

One San Mateo's strongest objection to the draft housing element is the fact that none of the sites are located in the highest opportunity areas. More specifically, we take issue with the fact that the housing plan takes a complete "hands-off" approach to neighborhoods zoned R-1. R-1 zoning is, by its very nature, exclusionary. First introduced in the wake of a 1917 Supreme Court decision that banned explicitly racist zoning, its very intent was to accomplish exclusion by other means. Also, the majority of R-1 neighborhoods in San Mateo were developed with racial covenants in their founding documents, barring all but whites from living within their borders. By protecting these neighborhoods from any meaningful densification, the housing element locks this history into place. It not only fails to reverse historical segregation, it entrenches it. Furthermore, this "hands-off" approach to R-1 is a missed opportunity, a huge and tragic one, since it prevents these neighborhood from unleashing their ability to address the community's urgent housing need.

POLICIES, PROGRAMS AND AFFH

Funding for those most at risk. The housing element includes a variety of policies giving priority to the lowest income members of the community, including those with special needs. Since these are the residents hardest to serve and most at risk of displacement, this prioritization is important for the achievement of AFFH goals. However, what is urgently needed is funding to create additional numbers of affordable units for these vulnerable populations. Thus the city is urged to include in its action plan the creation of a new funding source for affordable housing, coupled with the prioritization of units for VLI and ELI and for those with special needs.

<u>Remove the Measure Y constraint</u>. Measure Y is a significant barrier in the effort to create new housing, including affordable housing. The housing element should incorporate a commitment by the city to initiate a community process resulting in a new ballot measure to remove this constraint.

Increase the BMR. San Mateo's Below-Market-Rate Program has been a powerful mechanism for generating affordable homes. As previously stated, the city council considered such an increase of the BMR in recent years, but the height-and-density limits of Measure Y (Measure P at the time) were found to render it infeasible. We encourage the city to include in its action plan an increase in the BMR, to be passed by council immediately in the wake of overturning Measure Y.

<u>Transform exclusive neighborhoods into inclusive ones</u>. As indicated above, there is currently no affordable housing located in the highest opportunity areas. This is clearly inconsistent with AFFH goals. The city should make the changes necessary to facilitate the meaningful densification of R-1 neighborhoods, thereby disabling a decades-old enforcer of segregation and enabling the transformation of exclusive neighborhoods into inclusive ones.

<u>Protect tenants from displacement</u>. In the housing element chart for Programs and Policies, Policy H3.4 includes an enumeration of tenant protections to be enacted during Cycle 6, many of which are currently being worked on. However, this list is muddled and insufficiently robust. Considering that this is an 8-year cycle, the list should include policies other than those currently under consideration. We suggest that this entry be revised to include the following:

- Expand tenant protections under AB 1482: Extend just cause provisions to the first year of tenancy, require documentation prior to remodel, expand relocation assistance for all no-fault evictions, provide first right of return for renovation and demolition.
- Create new resources for emergency rental assistance.
- Investigate adoption of a Community Opportunity to Purchase Act.

This last item, referred to as COPA, creates an opening for community nonprofits to purchase multi-family buildings when they first come on the market, providing an opportunity to preserve the affordability of the units and keep the tenants from being displaced.

<u>*Rent registry*</u>. Policy H3.6 currently reads "Explore rent registry." Elsewhere in the housing element draft, it says that in response to community input, a decision was made to "Adopt a rent registry." Thus the word "Explore" should be changed to "Adopt." Furthermore, the rent registry should also be listed in the AFFH chart, as is the case with Policy H3.4. A rent registry tracks whether existing renter protections are being complied with and functions as a powerful vehicle to prevent displacement.

The creation of this housing element provides an opportunity to chart a course toward a brighter future for San Mateo in which inclusion is at the forefront, disparities are overcome, and the needs of all San Mateo residents are taken into full account. One San Mateo encourages incorporation of the changes described above so that it will fulfill its potential for doing so.

Sincerely,

Karyl Eldridge Vice Chair of One San Mateo

San Mateo Housing Element-Sandy's notes

At Risk Units/Preservation

Humboldt House

Why is expiration of Humboldt House (**2041**!) included in this Housing Element? See Table 9 policy H2.2 (page H-62) and Table 12 H5.3.3 (page H-72). Perhaps this got carried over from prior HE which required agreement extension for that planning period (accomplished in 2021).

Table 13 page H-75 remove Humboldt House 9 units under Preservation

Belmont Building

Section 3.3 page H-22 – the units were converted from commercial office to residential. Funds not used for acquisition, just construction. Although property is owned by private entity and loss of affordability is possible, owner has long participated in Section 8 voucher program, so it may or may not be a "high" risk situation.

Since this property expires in 2032, suggest adding a separate implementation date to work with owner. Perhaps 2030-2031 instead of 2025-2026? See Table 9 policy H2.2 (page H-62) and Table 12 H5.3.3 (page H-72).

Appendix D Attachment 1

Quantified Objective- "Advertise Bridgepointe units going to sale" Seems unlikely to assume that Bridgepointe owner would sell off affordable units since this is one large rental project. Suggest something more general like negotiate with owner to "explore" selling units to non profit and/ or provide rental assistance to displaced tenants

Similar language for Belmont- could also add explore extension of participation in Section 8 program for that building. Update timeline.

Remove Humboldt House.

Funding Sources/Programs-

Section 3.3.3 (page H-24)

State: Can add PLHA

Local funds listed: San Mateo Aff Hsg Fund/Housing Innovation funds (these are county programs, so add County to title). --I believe Innovation Fund was a one-time program and not available at this time-check with County staff

May want to add City funding sources as well.

Section 3.3.6 (page H-38)

Include sources listed on page H-24

Other State programs that could be mentioned, since City has used them: Infill Infrastructure Grant (IIG), Local Housing Trust Fund (LHTF)

Table 8 Policy 1.2 (page H-58) Target Column

Do you want to specify the "Talbots" parking lot project? (Could include some milestones and number of units in the target and timeline columns.)

Table 10 Policy 3.1 (page H-64)- Target Column

Add qualifiers to list of programs ("as funds are available", "for programs that have been funded in the past such as " etc) City does not traditionally fund Vendome, and may or may not continue to fund HIP Housing. Montara is likely only for a couple of years. Rapid ReHousing may or may not continue to get funding if other priorities are identified for future PLHA. This is an 8 year plan and these things can change on an annual basis.

Appendix C Housing Resources Pages HC-6-7:

Section 2.2.2 -could add other State programs as mentioned above

Section 2.3 Suggest adding County AFH Funds--City has relied on them extensively over the past several years.

Section 2.3.1 Former RDA funds include loan repayments from prior loans- this is the source of the \$2.85M for Kiku with 250K balance as described. Seems odd to mention this small fund balance, since it is projected to grow over the HE time period (I did revenue projections on the spreadsheet that summarizes Quantified Objectives.) especially since the other larger sources of funding are not quantified.

The \$706K plus 20% annual contribution (collectively called "boomerang funds- total over \$5M) are still available to spend. Maybe just keep this simple and leave dollar amounts out entirely. Or, go all in ,and list projected resources for all local City housing funds for the entire HE period.

Section 2.3.2 BMR program is not the name of the "fund". It is referred to as "City Housing Fund", which includes fractional BMR fees, as well as other misc housing revenues (fees collected for subordination processing, loan payoffs from old First time buyer program, etc). Also City Housing Fund is mentioned specifically in Section 3.11 (page HC10) and 3.11.2 (p HC 11), so it would be good to be consistent.

Section 2.3.3 The Commercial Linkage fees mentioned are adjusted each year using construction cost index. These are out of date already! Seems too detailed to include specific fee.

Section 2.4.4. HEART Down payment program income requirements are out of date- they change from time to time as median income changes. Also don't think it is called Opening Doors anymore- check website for info.

Appendix C Housing Programs pages HC 9-12

Section 3.5 Acquisition of Land

3rd sentence is incorrect. The two parcels comprise one surface parking lot- does not include the toy store building. Internally, we've always called it "Talbots parking lot", since it is adjacent to Talbots (closed toy store and owned by private party).

The last sentence refers to the other surface parking lot, which is next door to "Raviloli House"- it is not the site of the restaurant. (again staff nick name). The City has owned this surface lot for years and years, so might be misleading to say City acquired it. The "Ravioli" and "Talbots" parking lots are not adjacent to each other, but are about a block away from each other. Also correct Appendix E 4.6 pageHE10.

Section 3.11.1 Life Moves

The "annual CDBG funding" for First Step is relatively recent (2020) and not guaranteed since these funds are competitive. It would be awkward to infer this is a done deal for the future given its short history of funding. Could say " City has provided operational funds in the past and may continue based on available funds"

Also Vendome is not a shelter. Perhaps say they have two properties in San Mateo, the First Step shelter and permanent supportive housing at the Vendome.

Section 3.12.3 HIP Self Sufficiency

City has not funded Self Sufficiency Program for over 15 years- I would eliminate funding comment. (This is different that Home Sharing program)

3.13 HOT Team

The final sentence is out of date- eliminate.

3.14 Homeless Prevention. Second sentence is confusing.

Section 3.14.2 Legal Aid.

Again this funding is not guaranteed since they need to compete for funding. That said, the odds of this program to be funded continuously is more likely than other programs. Maybe say City "traditionally" funds this on annual basis.

Special Needs/Homeless

FYI: Shelter Overview

City has **one** emergency/transitional shelter -First Step for Families (Life Moves)—City provided extensive capital funding to develop property, but typically has not provided ongoing operating subsidy. However, starting in 2020 Community Resource Commission awarded CDBG grants for operations (competitive process).

Vendome (Life Moves) Permanent supportive housing for formerly homeless. City provided 100% of acquisition/rehab costs for this property, but has not provided any annual operating subsidies, but does support their efforts to obtain HUD funds (PUSH) for operations through Continuum of Care process.

Special Needs

Humboldt House (Mateo Lodge)- Permanent supportive housing for individuals with mental illness. (not a shelter) City provided extensive funds for acq/rehab of apartment building formerly owned by private individual with County contracts to house mentally ill. City has never provided annual operating funds.

Delaware Pacific (Mid Pen)- City provided land/ subsidy to construct permanent affordable housing with 10 units set aside for households with mental health issues at risk of homelessness as referred by the County. City has never provided operating subsidies.

Montara (BRDIGE) -City provided land and subsidy to construct permanent affordable housing with 12 units set aside for formerly homeless veterans and 4 other formerly homeless (nonvets). Will provide operating funds for resident services for 4 years with PLHA funds.

Kiku (Mid Pen) - City provided land and subsidy to construct permanent affordable housing with 8 units set aside for IDD, and 16 for formerly homeless

Appendix B Constraints

2.9.5 Emergency Shelters page H B 29 final paragraph- City has one shelter, First Step. Humboldt House and Vendome are not shelters.

2.9.7 Emergency Shelter Strategies page HB 30

Re-use of residential buildings. Humboldt House is not an example of this since it is not a shelter and not really re-use since it was always, and still is, an apartment building. (It served as housing for the mentally ill by a private owner for many years prior to Mateo Lodge acquisition and rehab) Perhaps this example can be moved above to "Special Needs". Humboldt House serves the mentally ill, so conceivably could be considered Housing for persons with Disabilities. (2.9.1). Also, it serves more than 9 individuals since residents share units- Sandy B can provide the number of individuals who live there. The info about the services it provides the residents is correct.

Partnership with Faith Based Organizations -FYI there is a program in existence that does this-Home and Hope, based in Burlingame. Many years ago, it received CDBG Community Funding for the congregations who provided sites in San Mateo.

Appendix D AFFH

<u>Section 5.4 R/eCAP Page HD-23 final paragraph</u>—"Edge" Recap language was supposed to be removed by consultant- it's not required, and for SM is misleading for the CT by Belmont border-could pose AFFH problems for parcels on Sites List along southern stretch of ECR (Mollie Stones, etc.). I thought they made the correction on the revised draft they sent us. Remove final paragraph entirely.

Check top of page HD -24- Seems like a dangling statement--not sure if it is describing R/ECAP or Edge R/ECAP.

Appendix E Review of Prior Element

<u>Section 2.4 page HE 3 ADU's</u> Maybe compare the success of 40-60 units now to the prior average of 2-5/year to stress the success of revisions?

<u>Section 2.7 Preserve Affordable page HE 5.</u> The expiring agreements were negotiated with motivated non profit organizations, and frankly not much of an issue to achieve the affordability extensions. It is an overstatement that it involved "many meetings and prolonged" collaborative efforts. I would delete those describers and just say "Through collaborative efforts between staff......"

Table A H2.3 page5/12 Item 3 Kiku- Construction commenced in Jan2022—correct estimated dates

Hi Manira and Zach,

Thank you, again, for your team's hard work on the City of San Mateo's Draft Housing Element. It is a massive undertaking!

Here are my notes and consolidated input from last night's Planning Commission review of the Draft Housing Element. I spent a few hours following the meeting getting as much of the discussion topics I commented on during the meeting incorporated into my notes as possible.

I hope the additional detail and clarifying elements in these notes prove useful to the team.

Best, Adam

Adam Nugent, PLA Planning Commissioner, City of San Mateo anugent@cityofsanmateo.org

Commissioner Input Draft 2023-2031 Housing Element

Draft for Public Review: Housing Element of the General Plan 2023-2031, April 6, 2022

Commissioner Adam Nugent, April 26, 2022 Planning Commission Meeting

Outline Draft 2023-2031 Housing Element Input

- Introduction and Thank You
- Part 1: Site Inventory Comments
 - Methodology-focused
- Part 2: Affirmatively Furthering Fair Housing Comments
 - General Comments
 - Fair Housing Assessment
 - Contributing Factors

Note: Topics to be discussed at Continuance Meeting, May 3:

- Part 3: Other Housing Element Sections
- Part 4: Goals, Policies, and Programs
 - Including Affirmatively Furthering Fair Housing Policies and Programs

Introduction and Thank You

Thank you, Housing Element Team!

The work you are doing is extremely important and impactful

- All of my comments and questions come from a place of deep respect and appreciation for the hard work you are doing!
- I am proud to have a city with staff of such caliber, who genuinely desire to create a better, more just housing landscape for our future
- This is HARD WORK; and you are undertaking it in uncharted territory that is fraught with puzzles and potential pitfalls

Thank you, Housing Element Team! Fair warning:

- My comments are extensive
- To implement the Housing Element in a way that truly advances fair housing goals and meets the needs of our younger generations it will take:
 - Tough decisions and a lot of work
- This Housing Element is an opportunity to make real progress:
 - Repair racial and economic disparities
 - Combat cost of living increases that are disproportionately harming younger adults

The Push for Change Has Never Been Greater Demographics will drive our housing needs *and* our political will

- The younger half of our population has a different outlook and set of values than many who are in the older generations
- The political winds are blowing in the right direction for positive change
- The Millennial and Gen-Z generations are the largest generations in history and will have continually increasing political voice and power
- It is the younger generations that are feeling the most pain in this crisis, and they are the most motivated to bring about change
 - 14% of 4-year university students experienced homelessness last year; 42% experienced housing insecurity (*Governing*, 4/26/2022)
- We cannot botch this for the next generation

Quantified Objectives Discussion Draft City of San Mateo 2031 Housing Element, Chapter 8

- "According to HCD, the sum of the quantified objectives for the programs should ideally be equal to or surpass the community's identified housing needs." (Page H-75)
- Nevertheless, in the Draft Housing Element, the City has chosen not to produce a plan that meets our Regional Housing Needs Assessment (RHNA) allocation
- The City has (erroneously*) calculated its own, quantified objectives that are below its regionally identified housing needs
- The Draft Housing Element does not currently include meaningful, quantifiable actions that would significantly increase housing production to an appropriate level, but this can and should be changed
- The only way we can justify not planning to meet our identified housing needs is if it is impossible for us to create programs, policies, develop funding, or make land use changes that can commensurably increase housing production in line with our allocation, i.e. if there were no precedents in which municipalities reformed policies and subsequently increased housing production

* The quantified objectives themselves are incorrect due to omissions in the Housing Element's capacity calculation methodology, discussed next

"Unaffordable housing has one and only one cause: purposeful communal enforcement of it. This is legislated poverty."

Kevin Erdmann

Part 1: Sites Inventory

Fundamentally, there is not a set of programs or proposals in the Draft Housing Element that justify an assertion that there will be a 300% increase in housing production over the next eight years.

My comments focus entirely on methodological issues and I will heavily reference state statutes and documented state guidance

Why does zoning capacity matter?

How much buffer do we have and how does it affect housing costs and fair housing?

Historically, most US cities planned for far more housing than was needed for the existing population. But as cities started to integrate in the post-war era of the 1950s and 60s, a backlash ended this practice, and a wave of mass downzonings followed.

The result: Housing is increasingly unaffordable for most households. This was deliberate, and often predicted, as downzonings greatly reduced the "zoning buffer" between current housing stock and the maximum allowable housing capacity. "Before 1960, the buffer in both New York and Los Angeles was at least 300% ... New York's fell to roughly 50% after the 1961 zoning update, and it was just 12% in Los Angeles in 2010." (Shane Phillips, Housing Initiative Project Manager, UCLA Lewis Center for Regional Policy Studies)

Methodological Shortcomings: Nonvacant Sites Analysis

A Necessary Threshold listed in the "HDC Housing Element Completeness Checklist 1/1/2021":

"Nonvacant Sites Analysis: For nonvacant sites. • demonstrate the potential and *likelihood* of additional development within the planning period based on extent to which existing uses may constitute an impediment to additional residential development, past experience with converting existing uses to higher density residential development, current market demand for the existing use, any existing leases or other contracts that would perpetuate the existing use or prevent redevelopment of the site for additional residential development, development trends, market conditions, and regulatory or other incentives or standards to encourage additional residential development on these sites"

This information needs to be objectively quantified

HOUSING ELEMENT COMPLETENESS CHECKLIST

A Quick Reference of Statutory Requirements for Housing Element Updates Updated 1/2021

The purpose of this completeness checklist is to assist local governments in the preparation of their housing element. It includes the statutory requirements of Government Code section 65580 – 65588. Completion of this checklist is not an indication of statutory compliance but is intended to provide a check to ensure that relevant requirements are included in the housing element prior to submittal to the Department of Housing and Community Development pursuant to Government Code section 65585(b). For purposes of the Checklist the term "analysis" is defined as a description and evaluation of specific needs, characteristics, and resources available to address identified needs.

For technical assistance on each section visit <u>California Housing and Community</u> <u>Development Building Blocks Technical Assistance</u> (https://www.hcd.ca.gov/communitydevelopment/building-blocks/index.shtml)

Methodological Shortcomings: Nonvacant Sites Analysis

A Necessary Threshold listed in the "HDC Housing Element Completeness Checklist 1/1/2021":

• "If nonvacant sites accommodate 50 percent or more of the lower-income RHNA [which is the case in San Mateo], demonstrate the existing use is not an impediment to additional development and will likely discontinue in the planning period, including adopted findings based on substantial evidence."

HOUSING ELEMENT COMPLETENESS CHECKLIST

A Quick Reference of Statutory Requirements for Housing Element Updates Updated 1/2021

The purpose of this completeness checklist is to assist local governments in the preparation of their housing element. It includes the statutory requirements of Government Code section 65580 – 65588. Completion of this checklist is not an indication of statutory compliance but is intended to provide a check to ensure that relevant requirements are included in the housing element prior to submittal to the Department of Housing and Community Development pursuant to Government Code section 65585(b). For purposes of the Checklist the term "analysis" is defined as a description and evaluation of specific needs, characteristics, and resources available to address identified needs.

For technical assistance on each section visit <u>California Housing and Community</u> <u>Development Building Blocks Technical Assistance</u> (https://www.hcd.ca.gov/communitydevelopment/building-blocks/index.shtml)

Realistic Development Capacity My Underlying Questions

- How does the city plan to increase home building by over 300%?
 - And is this development increase realistic under the described methodology?
- What is different in cycle 6 from cycle 5?
 - The city's site's capacities have only decreased from cycle 5 as the city has grown and land uses intensified (new developments have replaced existing underutilized parcels)
 - So, is there a proposed program or group of new programs that can be shown to increase home building by over 300%, based on substantial evidence from other municipalities or from economic studies?

Sites Inventory Analysis is Incomplete

Current incompleteness prohibits City from assessing actual capacity to meet its RHNA allocation

- From the Draft Housing Element: "The purpose of the Sites Inventory is to evaluate whether there are sufficient sites with appropriate zoning to meet the RHNA goal. It is based on the City's current land use designations and zoning requirements. The analysis does not include the economic feasibility of specific sites, nor does it take into consideration the owner's intended use of the land now or in the future." (Page H-25 Draft City of San Mateo 2031 Housing Element)
- My Q: What substantial evidence, then, does the city provide that uses will be discontinued for nonvacant sites?
- My Q: How does the city incorporate redevelopment trends in its site capacity calculations?

Site Inventory Methodology - State Law

(Compare to Draft City of San Mateo 2031 Housing Element, Page H-26)

- Government Code section 65583.2(c)(2) The housing element must describe the methodology used to determine the number of units calculated based on the following factors:
 - 1. Land use controls and site improvements requirements,
 - 2. *NEW* The realistic development capacity for the site,
 - 3. *NEW* Typical densities of existing or approved residential developments at a similar affordability level in that jurisdiction,
 - 4. *NEW* The current or planned availability and accessibility of sufficient water, sewer, and dry utilities.

The realistic development capacity for sites has not been factored in an appropriate or meaningful way 1252 Sites Inventory

Site Inventory Methodology

Page H-26 Draft City of San Mateo 2031 Housing Element

- "The number of units that might be able to be developed at various affordability levels was then estimated, e.g., available land zoned at higher densities can be counted toward the very low- and low-income level needs, and land zoned at lower densities are counted toward the moderate and above moderate-income housing need. The analysis was then completed using the actual average residential densities for developments built on land with various zoning designations over the past five years." (Page H-26 Draft City of San Mateo 2031 Housing Element)
- This a surprisingly short description of a crucial part of our otherwise extensive Draft Housing Element
- "was then estimated" is doing a lot of work in this passage
- The City needs to show its math and data so the public can adjudicate its capacity calculations

CITY OF SAN MATEO 2040 BENERAL PLAN HOUSING LIEMENT

- Locational requirements of identified sites (AB 686, 2018)
- Sites identified in previous housing elements (AB 1397, 2017)
- Non-vacant site replacement unit requirements (AB 1397, 2017)
- Rezone program requirements (AB 1397, 2017)

These laws are further described in Section 2.2 (Legislative Context) of the Housing Element.

3.4.2 Site Inventory Methodology

City staff inventoried vacant and underutilized parcels in San Mateo to determine what land is available for development at various levels of density. Types of sites included:

- · Vacant sites zoned for residential use.
- · Vacant sites zoned for nonresidential use that allow residential development.
- Residentially zoned sites, including non-residentially zoned sites with a residential overlay, that
 are capable of being developed at a higher density (non-vacant sites, including underutilized
 sites).
- · Sites owned or leased by a city, county, or city and county.

The number of units that might be able to be developed at various affordability levels was then estimated, e.g., available land zoned at higher densities can be counted toward the very low- and low-income level needs, and land zoned at lower densities are counted toward the moderate and above moderate-income housing need. The analysis was then completed using the actual average residential densities for developments built on land with various zoning designations over the past five years.

The City of San Mateo's Sites Inventory for future housing includes property zoned for multi-family use that is currently vacant as well as land that is severely underutilized. Sites that are zoned commercial or office but allow residential uses

were included. As seen in Table 7 below, the adequate sites analysis demonstrates that there is enough land to meet the City's RHNA. The analysis for affordable housing units for extremely low, very low, and low-income households is based on the assumption that land zoned at densities higher than 30 units to the acre can facilitate affordable housing development, given the City's inclusionary requirements of 15%. More than 50% of the City's below market rate housing would be developed on lands that are underutilized. However, the City's experiencing a high volume of residential and mixed-use development projects looking to revitalize these sites and seeking density bonus and other incentives to achieve higher density residential development.

3.4.3 Site Inventory Approach

Staff conducted a site-by-site review of all potential development sites, citywide. As will be demonstrated below, staff currently believes that the RHNA, plus a reasonable buffer, can be accommodated within the existing zoning densities and the growth limits of the voter-approved initiative known as Measure Y.⁶

Development Potential Ranking. Each site – or potential aggregation of sites – was analyzed to discern the likelihood and feasibility of development during the period 2023-2031. Factors such as underperforming or vacant uses, owner or developer interest, age and size of current improvements, site

Draft for Public Review | April 2022

⁶ Measure Y imposes height and density limits that will limit the amount of development that can be built on any site in San Mateo through 2030.

Site Inventory Methodology

Page H-26 Draft City of San Mateo 2031 Housing Element

- "The number of units that might be able to be developed at various affordability levels was then estimated, e.g., available land zoned at higher densities can be counted toward the very low- and low-income level needs, and land zoned at lower densities are counted toward the moderate and above moderate-income housing need. The analysis was then completed using the actual average residential densities for developments built on land with various zoning designations over the past five years." (Page H-26 Draft City of San Mateo 2031 Housing Element)
- Q: What is the denominator used in calculating the average?
- Q: Does this denominator only use recently developed sites or does it look at all similarly zoned parcels?

CITY OF SAN WATEG 1940 General Flan Housing Liement

- Locational requirements of identified sites (AB 686, 2018)
- Sites identified in previous housing elements (AB 1397, 2017)
- Non-vacant site replacement unit requirements (AB 1397, 2017)
- Rezone program requirements (AB 1397, 2017)

These laws are further described in Section 2.2 (Legislative Context) of the Housing Element.

3.4.2 Site Inventory Methodology

City staff inventoried vacant and underutilized parcels in San Mateo to determine what land is available for development at various levels of density. Types of sites included:

- · Vacant sites zoned for residential use.
- · Vacant sites zoned for nonresidential use that allow residential development.
- Residentially zoned sites, including non-residentially zoned sites with a residential overlay, that
 are capable of being developed at a higher density (non-vacant sites, including underutilized
 sites).
- · Sites owned or leased by a city, county, or city and county.

The number of units that might be able to be developed at various affordability levels was then estimated, e.g., available land zoned at higher densities can be counted toward the very low- and low-income level needs, and land zoned at lower densities are counted toward the moderate and above moderate-income housing need. The analysis was then completed using the actual average residential densities for developments built on land with various zoning designations over the past five years.

The City of San Mateo's Sites Inventory for future housing includes property zoned for multi-family use that is currently vacant as well as land that is severely underutilized. Sites that are zoned commercial or office but allow residential uses

were included. As seen in Table 7 below, the adequate sites analysis demonstrates that there is enough land to meet the City's RHNA. The analysis for affordable housing units for extremely low, very low, and low-income households is based on the assumption that land zoned at densities higher than 30 units to the acre can facilitate affordable housing development, given the City's inclusionary requirements of 15%. More than 50% of the City's below market rate housing would be developed on lands that are underutilized. However, the city is experiencing a high volume of residential and mixed-use development projects looking to revitalize these sites and seeking density bonus and other incentives to achieve higher density residential development.

3.4.3 Site Inventory Approach

Staff conducted a site-by-site review of all potential development sites, citywide. As will be demonstrated below, staff currently believes that the RHNA, plus a reasonable bulfer, can be accommodated within the existing zoning densities and the growth limits of the voter-approved initiative known as Measure Y.⁶

Development Potential Ranking. Each site – or potential aggregation of sites – was analyzed to discern the likelihood and feasibility of development during the period 2023-2031. Factors such as underperforming or vacant uses, owner or developer interest, age and size of current improvements, site

Draft for Public Review | April 2022

⁶ Measure Y imposes height and density limits that will limit the amount of development that can be built on any site in San Mateo through 2030.

Site Inventory Methodology

Realistic Development Capacity for nonresidential, nonvacant, or overlay zoned sites

• Practically all sites are non-vacant, and so we must look at production trends...

PART D: NONVACANT SITES

Realistic Development Capacity

City must consider past experience converting existing uses for Nonvacant Sites

- HCD's "Site Inventory Guidebook," page 24:
- "If the inventory identifies nonvacant sites to address a portion of the RHNA, the housing element must describe the realistic development potential of each site within the planning period. Specifically, the analysis *must* consider the extent that the nonvacant site's existing use impedes additional residential development, the jurisdiction's past experience converting existing uses to higher density residential development, market trends and conditions, and regulatory or other incentives or standards that encourage additional housing development on the nonvacant sites."

"Development potential"

X period of time ("planning period")

= rate of parcel conversion to new housing

Local governments with limited vacant land resources or with infill and reuse goals may rely on the potential for new residential development on nonvacant sites, including underutilized sites, to accommodate their RHNA. Examples include:

- Sites with obsolete uses that have the potential for redevelopment, such as a vacant restaurant.
- Nonvacant publicly owned surplus or excess land; portions of blighted areas with abandoned or vacant buildings.
- · Existing high opportunity developed areas with mixed-used potential.
- · Nonvacant substandard or irregular lots that could be consolidated.
- · Any other suitable underutilized land.

Local governments can meet other important community objectives to preserve open space or agricultural resources, as well as assist in meeting greenhouse gas emission-reduction goals, by adopting policies to maximize existing land resources and by promoting more compact development patterns or reuse of existing buildings.

Definition of a Vacant Site

A vacant site is a site without any houses, offices, buildings, or other significant improvements on it. Improvements are generally defined as development of the land (such as a paved parking lot, or income production improvements such as crops, high voltage power lines, oil-wells, etc.) or structures on a property that are permanent and add significantly to the value of the property.

Examples of Vacant Sites:

- No improvement on the site (other than being a finished lot).
- No existing uses, including parking lots.
- Underutilized sites are <u>not</u> vacant sites.
- Sites with blighted improvements are not vacant sites.
- Sites with abandoned or unoccupied uses are <u>not</u> vacant sites.

If the inventory identifies nonvacant sites to address a portion of the RHNA, the housing element must describe the realistic development potential of each site within the planning period. Specifically, the analysis must consider the extent that the nonvacant site's existing use impedes additional residential development, the jurisdiction's past experience converting existing uses to higher density residential development, market trends and conditions, and regulatory or other incentives or standards that encourage additional housing development on the nonvacant sites.

Site Inventory Guidebook

Page 24

May 2020

Nonvacant Site Analysis Methodology

From HCD's "Site Inventory Guidebook," May 2020, page 25

Development Trends:

The inventory analysis should describe development and/or redevelopment trends in the community as it relates to nonvacant sites, i.e., the rate at which similar sites have been redeveloped. This could include a description of the local government's track record and specific role in encouraging and facilitating redevelopment, adaptive reuse, or recycling to residential or more intensive residential uses. If the local government does not have any examples of recent recycling or redevelopment, the housing element should describe current or planned efforts (via new programs) to encourage and facilitate this type of development (e.g., providing incentives to encourage lot consolidation or assemblage to facilitate increased residential-development capacity). The results of the analysis should be reflected in the capacity calculation described in Part C

Part C: Example Calculation

From HCD's "Site Inventory Guidebook," May 2020, page 22

I cannot find this factor in our site inventory methodology

Example Capacity Calculation

Here is <u>an example</u> of the actual capacity calculation for a particular site in the inventory. The methodology analysis <u>must describe</u> how each of these adjustments was generated per the analysis requirements above. The factors used below are based on the factors outlined in the statute. The percentages and how the factors are applied will vary depending on the unique circumstance in each jurisdiction.

Site Description		
Size of site	2.5 acres	
Zoning	Residential Mixed-Use	
Allowable density	20 – 45 dwelling units per acre	
RHNA affordability	Lower income	
Existing Use	Nonvacant, single storefront	
Infrastructure availability	Yes, no constraints	
Environmental constraints	None known	

Capacity Factors	Adjustment	Reasoning
Land Use Controls and Site Improvements	95%	For net acreage due to on-site improvements including sidewalks, utility easement
Realistic capacity of the site	55%	55% adjustment based on past development trends for residential redevelopment in the residential mixed-use zones, and programs to incentivize development in this zone.
Typical densities	95%	Affordable housing projects are built out to almost maximum density
Infrastructure availability	No adjustment	Not applicable, no constraint
Environmental constraints	No adjustment	No known site constraint

Realistic capacity utilizing factors = (2.5 X 45)(.95)(.95) = 56 units

Realistic Capacity = 56 Units

Site Inventory Approach

Page H-26-27 Draft City of San Mateo 2031 Housing Element

The closest thing I can find to a calculation of the rate at which similar parcels were redeveloped is this non-empirical "Development Potential Ranking".

The writers of this draft used a *subjective*, ranked series of numbers, 1-5, in its calculations to encode what amounts to an unsubstantiated guesstimate of the "realistic development capacity" of sites

> This is like using "thumbs up" emojis where we should be using available, numerical, development trend data

3.4.3 Site Inventory Approach

Staff conducted a site-by-site review of all potential development sites, citywide. As will be demonstrated below, staff currently believes that the RHNA, plus a reasonable buffer, can be accommodated within the existing zoning densities and the growth limits of the voter-approved initiative known as Measure Y.⁶

Development Potential Ranking. Each site – or potential aggregation of sites – was analyzed to discern the likelihood and feasibility of development during the period 2023-2031. Factors such as underperforming or vacant uses, owner or developer interest, age and size of current improvements, site size, and site constraints were reviewed. Depending on these considerations, sites were ranked from 1 to 5, with 1 being a site unlikely to develop/redevelop within the planning period, and 5 being highly likely to develop/redevelop during the period. Samples of these rankings include, but are not limited to:

- National chain gas stations, national chain fast food restaurants, and community-serving grocery stores. The State has indicated these types of sites are the most difficult to justify including in an inventory. <u>Generally, no sites in this category are included in the inventory</u>; however, the city has identified two sites with redevelopment interest that are ranked 4 (i.e. Bridgepointe Shopping Center and Olympic Shopping Plaza).
- Sites that are extremely small with little opportunity for aggregation, sites that may require substantial environmental clean-up, and other heavily constrained sites. <u>No sites in this category</u> <u>are included in the inventory.</u>
- Sites with existing uses that could be redeveloped along with adjacent parcels but which may have
 multiple owners, small underperforming strip malls, and certain office developments. <u>Many of
 the City's sites are within this category.</u>
- Sites that have uses on them but in which a developer has expressed interest in the site, shopping
 malls with significant potential for redevelopment, adjacent sites with only one or two owners,
 and low-density commercial developments in high-density areas. <u>Many of the City's sites are
 within this category.</u>
- Large sites with potential for substantial development, vacant sites, or sites with proposed or soon to be proposed projects and approved projects that have not yet been built. <u>Majority of the City's</u> sites are in this category and have either proposed or approved projects that have not yet been <u>built</u>.

Realistic Development Capacity

for nonvacant sites

 Using qualitative characteristics to "rank" the "likelihood" of redevelopment for various sites is not an acceptable methodology in any HCD guidance documentation (Draft Housing Element, page H-26 to H-27)

- The likelihood of redevelopment should be based on *quantitative*, measurable *trends* [rates] (HCD "Site Inventory Guidebook," page 21)
- The only valid exceptions should be for places without reasonably similar development history to calculate trends from, and that should generally not apply to the Bay Area

Realistic Development Capacity for nonvacant sites

- Using qualitative characteristics to "rank" the "likelihood" of redevelopment for various sites is not an acceptable methodology in any HCD guidance documentation (Draft Housing Element, page H-26 to H-27)
- When ratings are subjective, it is impossible for the public to ascertain the quality of the City's analysis.
- It amounts to staff saying, "there is enough capacity because, to us, it feels like there is enough capacity. Trust us."
- It then becomes uncannily convenient that staff "determined" we have enough zoned capacity to meet our RHNA allocation.

Realistic Development Capacity for nonvacant sites

- Using qualitative characteristics to "rank" the "likelihood" of redevelopment for various sites is not an acceptable methodology in any HCD guidance documentation (Draft Housing Element, page H-26 to H-27)
- When we use objective, quantitative data and we find that the probability of development is lower than what we need to meet our goals, we have the ability to draft policies that will enable changes that will help us meet our goals in predictable ways
- In contrast, when you base development capacity on subjective, nonempirical ratings, the Public has no way to understand how to change policies in ways that will meet our development needs

Non-Vacant Site Analysis Methodology - State Law Government Code section 65583.2, subdivision (g)(2) states:

 "An existing use shall be presumed to impede additional residential development, absent findings based on substantial evidence that the use is likely to be discontinued during the planning period."

• Q: How can a qualitative ranking of sites be considered substantial evidence?

Realistic Development Capacity - Nonvacant Sites

Current incompleteness prohibits City from assessing actual capacity to meet its RHNA allocation

- In sum, past production trends must be used, including whether or not a site will be developed at all. Staff or consultant "intuition" is not acceptable
 - Unless there is substantial evidence that a site will be redeveloped according to a listed density, be it a letter from the property owner or a preapplication submission, the city should be using an objective, calculated probability of redevelopment based on all similar properties locally or regionally over the course of the past RHNA cycle.
 - For the City of San Mateo, that probability is 8.5% according to a UCLA study published in 2021

Realistic Development Capacity - Nonvacant Sites

Current incompleteness prohibits City from assessing actual capacity to meet its RHNA allocation

- In sum, past production trends must be used, including whether or not a site will be developed at all. Staff or consultant "intuition" is not acceptable
 - Each parcel capacity calculation should be multiplied by the probability of development for parcels in San Mateo, something akin to 0.085 (or 1.0 if the parcel has *substantial evidence* of redevelopment)
 - If there is additional, refined and warranted, development trend data, such as the probability of development for parcels with a specific zoningdesignation that are of a functionally equivalent size, that probability may be factored into the calculation if reviewed and approved by the PC or council

Non-vacant Site Analysis Next Steps

The City shall serve the Public in its evaluation of suitable sites

- From HCD Site Inventory Guidebook, page 27:
 - "If a housing element relies on nonvacant sites to accommodate 50 percent or more of its RHNA for lower income households, the nonvacant site's existing use is presumed to impede additional residential development, unless the housing element describes findings based on substantial evidence that the use will likely be discontinued during the planning period. The housing element must include the following:
 - As part of the resolution adopting the housing elements, findings stating the uses on nonvacant sites identified in the inventory to accommodate the RHNA for lower income is likely to be discontinued during the planning period and the factors used to make that determination. This can be included in the body or in the recital section of the resolution."

Step 3A:

If a housing element relies on nonvacant sites to accommodate 50 percent or more of its RHNA for lower income households, the nonvacant site's existing use is presumed to impede additional residential development, unless the housing element describes findings based on substantial evidence that the use will likely be discontinued during the planning period. The housing element must include the following:

 As part of the resolution adopting the housing elements, findings stating the uses on nonvacant sites identified in the inventory to accommodate the RHNA for lower income is likely to be discontinued during the planning period and the factors used to make that determination. This can be included in the body or in the recital section of the resolution.

Example: WHEREAS, based on <name factors here (e.g., expiring leases, dilapidated building conditions, etc.)>, the existing uses on the sites identified in the site inventory to accommodate the lower income RHNA are likely to be discontinued during the planning period, and therefore do not constitute an impediment to additional residential development during the period covered by the housing element.

 The housing element should describe the findings and include a description of the substantial evidence they are based on.

In general, substantial evidence includes facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts. An example of substantial evidence would be a nonvacant site with a grocery store and with a building lease expiring in a year, and evidence that the store has entered into a lease to relocate to another site subsequent to the lease expiring.

Examples of substantial evidence that an existing use will likely be discontinued in the current planning period include, but are not limited to:

- The lease for the existing use expires early within the planning period,
- The building is dilapidated, and the structure is likely to be removed, or a demolition permit has been issued for the existing uses,
- There is a development agreement that exists to develop the site within the planning period,
- The entity operating the existing use has agreed to move to another location early
 enough within the planning period to allow residential development within the
 planning period.
- The property owner provides a letter stating its intention to develop the property with residences during the planning period.

If multiple sites make up a common existing use and the same factors affect each of the sites, the same findings can be used for each of the sites (e.g., an abandoned shopping mall with sites under common ownership that will not be restored to commercial use located in an area where there is recent residential development). The "substantial evidence" would indicate the existing use will not impede further residential development or that the existing use will be discontinued during the planning period. In this type of situation, use of the same findings for each of the multiple sites would be appropriate.

Page 27

Site Inventory Guidebook

May 2020

Non-vacant Site Analysis Next Steps

The City shall serve the Public in its evaluation of suitable sites

- When substantial evidence is provided for site redevelopment, it should be available to the public, early in the process, in an easy, user-friendly way that is connected to the site geographically,
- The substantial evidence's warrant for use should be adjudicated by the the Public through the Planning Commission and verified by HCD
- Absent substantial evidence:
 - The likelihood of redevelopment of any given site should default to the likelihood of development for all sites across the city (or all sites of a particular zoning category and equivalent size, if the data are available)

Realistic Development Capacity Include a Monitoring Program with next-step actions

- Monitoring Programs with next-step actions should be incorporated if the expected housing development is not produced
- "In addition, the housing element should include monitoring programs with next-step actions to ensure sites are achieving the anticipated development patterns. The programs should identify modifications to incentives, sites, programs, or rezoning the jurisdiction will take should these strategies not yield the expected housing potential." (HCD "Site Inventory Guidebook," page 21)

Part 2: Affirmatively Furthering Fair Housing

Using California HCD Guidance for Public Entities and Housing Elements to advocate for our neighbors in San Mateo

Commissioner Adam Nugent, April 26, 2022 Planning Commission Meeting

AFFH General Comments

Where are we going with this?

- We should have a very clear end-state where this city has solved the identified patterns of segregation, geographic disparities, and affirmatively furthered fair housing
- It does not have to be achieved by the end of this single cycle, but its expected year of achievement should be stated and agreed upon, under the direct consultation of identified, excluded demographics and protected classes, like an emissions goal
- This end-state should be discernible and anticipated by the goals and actions

"Many Americans have a hard time recognizing the magnitude and persistence of racial inequality because, psychologically, we resist these truths. Psychologists refer to this kind of broad bias in perception as "motivated cognition" — that is, most Americans want to live in a society that is more racially equal, and so they engage in mental actions that ignore, discount or downplay contradictory evidence to maintain coherence between belief and reality."

Michael Kraus, a social psychologist and an associate professor at Yale University

Likewise, when progress toward equality is seen as inevitable, incentives for political action are low.

We need to end residential segregation and reinvest in our Northern Neighborhoods

Without displacement

State Guidance Affirmatively Furthering Fair Housing

- New California laws require active steps by our city government to dismantle housing segregation
- Actions must be taken in the Housing Element/General Plan creation in 2021 and 2022
- HCD outlines best practices and policies for cities to use

California Department of Housing and Community Development

Affirmatively Furthering Fair Housing Guidance for All Public Entities and for Housing Elements (April 2021 Update)

Quick AFFH Overview for Readers of These Notes

California Department of Housing and Community Development

Affirmatively Furthering Fair Housing

Guidance for All Public Entities and for Housing Elements (April 2021 Update)

What is AFFH? Affirmatively Furthering Fair Housing

Affirmatively furthering fair housing means taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics.

The duty to affirmatively further fair housing extends to all of a public agency's activities and programs relating to housing and community development.

Part 1: Duty of All Public Agencies to Affirmatively Further Fair Housing

AB 686 strengthens existing California fair housing and civil rights laws. California's Fair Employment and Housing Act (FEHA) provides broad protactions to California residents, prohibiting housing discrimination based upon "race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, marital status, national origin, ancestry, familial status, source of income, disability, veteran or military status, or genetic information."³³ California's Government Code section 65008 prohibits discrimination in housing based on occupation, age, or protected characteristic; method of financing, or the intended occupancy by lower or moderate income people. While state law prohibited discrimination through public or private land use practices, decisions, and authorizations based on any of these characteristics, it had not included a state requirement to affirmatively further fair housing. As of January 1, 2019, AB 636 creates a state mandate requiring public agencies and jurisdictions to go beyond combating discrimination to affirmatively further fair housing.

"Affirmatively furthering fair housing" means taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive commun ties free from barriers that restrict access to opportunity based on protected characteristics. Specifically, affirmatively furthering fair housing means taking meaningful actions that, taken together, address significant disparities in housing means taking meaningful actions that, taken together, address significant disparities in housing needs and in access to opportunity, replacing segregated living patterns with truly insegrated and balanced living patterns, transforming racially and ethnically concentrated areas of poverty into areas of opportunity, and fostering and maintaining compliance with civil rights and fair housing laws. The duty to affirmatively further fair housing extends to all of a public agency's activities and programs relating to housing and community development. - (Gov. Code, § 8897,50, subc. b)(1).)

Beyond the housing element requirements, AB 686 requires all public agencies (including, but not limited to, all cities and counties, and housing authorites) to ensure that their housing and community development programs and activities—taken together—affirmatively further fair housing, and that they take no action materially inconsistent with this obligation.³⁴

Affirmatively furthering fair housing includes taking proactive and meaningful actions that have a

33 Gov. Code, §§ 12900-12996 54 Gov. Code, § 3890.50, subds. (s)(1), (b), (d.

14

California Department of Housing and Community Development Allimatively Furthering Fair Housing

Meaningful Action AFFH requirements

- Address significant disparities in housing needs and in access to opportunity
- Replace segregated living patterns with truly integrated and balanced living patterns
- Transform racially and ethnically concentrated areas of poverty into areas of opportunity
- Foster and maintain compliance with civil rights and fair housing laws

- 1. Significant Disparities in Housing Needs and in Access to Opportunity: Examples include incentivizing new residential development to include below-market rate housing; conserving affordability of existing housing, such as limitations on rents or conversion of such housing to higher rent or higher priced housing; encouraging systematic code enforcement activities that maintain housing stock while ensuring such enforcement does not cause displacement; and promoting housing mobility strategies and displacement mitigation strategies to ensure equitable access to opportunity. Housing mobility strategies may include providing affordable and accessible transportation options to enhance access to education and economic development opportunities. Displacement mitigation strategies may include tenant protections, conservation of existing stock, preservation of units at-risk of conversion to market-rate uses, acquisition and rehabilitation of existing stock, including naturally occurring affordable housing, and removing barriers to building affordable housing.
- 2. Replacing Segregated Living Patterns with Truly Integrated and Balanced Living Patterns: Examples include community benefits agreements that balance development proposals with tangible, local benefits to residents in the area (e.g., creating affordable housing, funding renter assistance programs for nearby residents, or other investments that meet community-identified needs, such as infrastructure and community amenities). Other examples include inclusionary zoning requirements and land-value recapture mechanisms, zoning for a variety of housing types, particularly those that may be lacking from the community or neighborhood, including: multifamily housing, low-barrier navigation centers, group homes, supportive housing, and accessible units. Promote education on how restrictions on multifamily housing, such as limited multifamily zoning and height and density limitations, impact inclusive communities. Seek local input on housing proposals while recognizing that "local vetoes" of affordable and mixed-income housing in racially segregated concentrated areas of affluence create fair housing issues.³⁶
- 3. Transforming Racially and Ethnically Concentrated Areas of Poverty (R/ECAP) into Areas of Opportunity: Examples include community-led, place-based strategies to revitalize communities, such as economic development strategies and prioritizing investment in R/ECAPs that meet the needs of existing low-income residents, such as safe routes to school, transit, parks, schools, bike and pedestrian infrastructure, urban forestry, other neighborhood improvements; preserving naturally occurring affordable housing, such as mobilehome parks; and preservation as affordable housing of market-rate units where low-income households live; and promoting mixed-income development coupled with strong anti-displacement protections. Conduct outreach and advertise city program to persons with limited English proficiency. Other examples include community engagement in planning processes, including targeted outreach, technical assistance to help apply for grants, economic development strategies, workforce development, youth engagement and educational programs, healthy food access, affordable energy, and transportation access.
- 4. Fostering and Maintaining Compliance with Civil Rights and Fair Housing Laws: Agencies must diligently comply with civil rights and fair housing laws, including the California Fair Employment and Housing Act (FEHA) (Part 2.8 (commencing with section 12900) of Division 3 of Title 2), Government Code sections 8899.50, 65008, 65583, subdivisions (c)5) and (c)(10), and11135, Civil Code section 51 (the Unruh Civil Rights Act), and FEHA regulations in California Code of Regulations, Itile 2, sections 12005-12271.

Fair Housing Actions What we need San Mateo to do

- Create housing mobility strategies
- Provide new housing choices and affordability in areas of opportunity
- Design place-based strategies to encourage community conservation and revitalization
- Protect existing residents from displacement

Examples of Affirmatively Furthering Fair Housing Actions

Housing Mobility Strategies consist of removing barriers to housing in areas of opportunity and strategically enhancing access. Examples include:

- · Voucher mobility
- · Housing mobility counseling
- City-wide affordable rental registries
- · Landlord outreach to expand the location of participating voucher properties
- Landlord education and outreach on source of income discrimination and voucher programs
- Assistance with security deposits and moving expenses for voucher holders and other low-income tenants.
- Extend search times for particular groups with housing choice vouchers, such as larger families with children or persons with disabilities
- Regional cooperation and administration of vouchers (such as through portability and shared waiting lists);
- Affirmative marketing can be targeted at promoting equal access to government-assisted housing or to promote housing outside the immediate neighborhood to increase awareness and the diversity of individuals in the neighborhood.
- Collaborate with high performing school districts to promote a diversity of students and staff to serve lower income students
- Developing multifamily housing opportunities95
- Encouraging the development of four or more units in a building.
- Encouraging collaboration between local governments and community land trusts as a mechanism to develop affordable housing in higher-opportunity areas.96
- Accessibility programs focus on improving access to housing, transit, public buildings and facilities, sidewalks, pedestrian crossings, and businesses.

New Housing Choices and Affordability in Areas of Opportunity means promoting housing supply, choices and affordability in areas of high opportunity and outside of areas of concentrated poverty. Examples include:

- Zoning, permit streamlining, Iees, incertives and other approaches to increase housing choices, and affordability (e.g., duplex, triplex, multifamily, accessory dwelling units, transitional and supportive housing, group homes) in high opportunity areas
- Target housing creation or mixed income strategies (e.g., funding, incentives, policies and programs, density bonuses, land banks, housing trust funds)
- Inclusionary requirements

72

15 The Federal FHA induces dissign and construction requirements for all residential buildings with four or many estached units in buildings with relevator access, all units must have minimum access. There is no federally mandated standard for accessibility in single family horres. Government Cycle section 12955.1, subcassion (b), requires 10 percent of mics in anulishnik validings without elevator consisting of 3 or more remaind units or 4 or more andonuminum units are subject to accessibility buildings standards.

 See Community Land Trusts and Stable Afferdable Housing, available at https://www.hudurergne/padaleceredge/pdf.cdae.featd. attabe/10419.html, last wated or March '9, 2021.

> California Department of Housing and Community Development Structury (), F., No. 16 Earliesence

Components of New HE Requirements for AFFH

- 1. Outreach
- 2. Assessment of Fair Housing (AFH)
- 3. Site Inventory
- 4. Identification & Prioritization of Contributing Factors
- 5. Goals and Actions/Programs

	ts duty to affirmatively sing (AFFH) in CA
All public agencies required to administer programs and activities relating to housing and community development in a manner to AFFH and take no action that is materially inconsistent with this obligation.	2 New Housing Element Requirements Applies to housing elements due to be reveal on or other Jonuary 1, 2021
Outreach A diligent effort must be made to squilably include all community salement public participation process.	Assessment of fair Housing an assessment of har housing within the housing needs section. This assessment should include an insight of har housing issues in the jurisdiction including existing segregation and inclusion trends and corrent fair housing matters.
Sites Analysis Local juristicrions must evaluate and address how particular sites vasilable for development of outing will meet the needs of bouseholds at moonu levels and will AFFH by opparing spregated living patterns with truly integrated nd balanced living patterns, transforming cually and ethnically concentrated areas of overvi hito areas of opportunity	Priorities, Goals, and Actions Based on Indings from the needs assessment and the ste Inventory analysis with respect to AFPJ, local juriddictors will assess controllution is dators to fair housing barriers and adopt policies with programs that remediate identified fair housing issues and/or fairther promote fair housing.

Affirmatively Furthering Fair Housing

6.3 San Mateo's Fair Housing Assessment

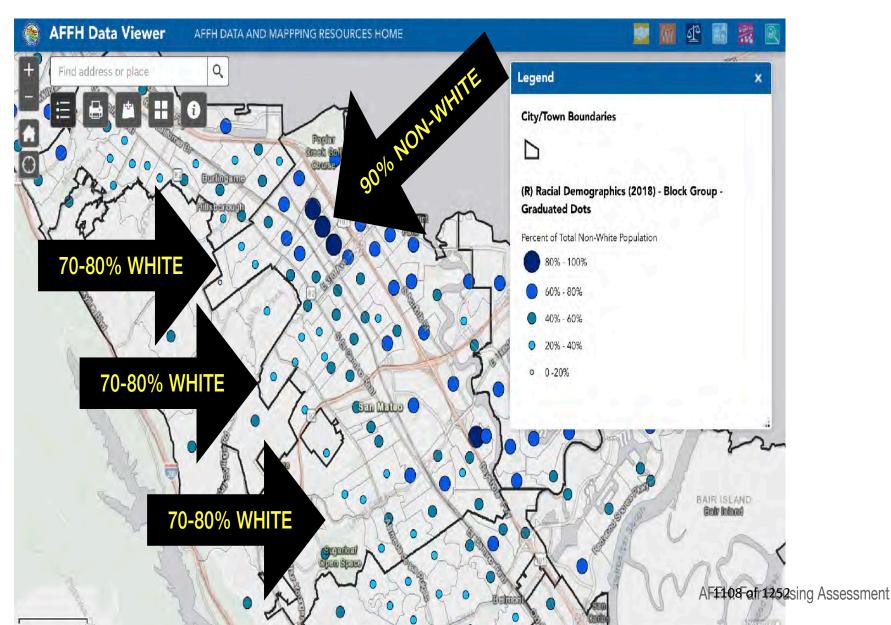

Fair Housing Assessment

Shortcomings In the Assessment of Segregation and Integration Patterns and Trends:

- No analysis of racially segregated, concentrated areas of affluence
 - Missing assessment of the most segregated racial population: non-Hispanic whites (APPENDIX D, Attachment 4 – UC Merced Segregation Report)
- No opportunity sites are located within the city's highest-opportunity areas

Assessment's Miss:

Racially Concentrated Areas of Affluence Completely Left Out of the Analysis and Sites Inventory

"Figure II-6: % Non-White Population by Census Block Groups," 2018, Root Policy Research Map and Data Packet, Page 10

Fair Housing Assessment

Shortcomings In the Assessment of Segregation and Integration Patterns and Trends:

- Why is income-segregation substantially higher in San Mateo compared to the rest of the Bay Area?
 - This assessment should highlight factors that can be fixed
- Why has San Mateo's income segregation at the neighborhood level not improved over time and why is it worse than the Bay Area average?

Fair Housing Assessment

Shortcomings In the Assessment of Segregation and Integration Patterns and Trends:

- Missing meaningful assessment of segregation in San Mateo relative to the Bay Area region
 - Extremely low population of black people. Why?
 - Need assessment of **causes** for the growing exclusion of this demographic from San Mateo in order to solve for this issue

Assessment's Miss: Black population

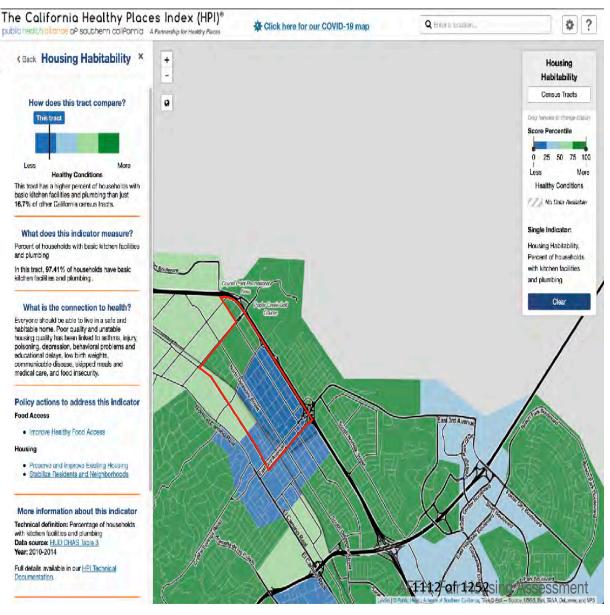

Exclusion and displacement —> low population relative to Bay Area

- Only 2% of the city's population is now black
- In 1990 the North Central census tract was 18% black, the highest in the city
- In 2017 it was only 4% black
- Discuss possible causes:
 - Disinvestment-driven displacement in North Central due to rising rental costs and lack of improvement of rental housing conditions
 - Government policy preventing home purchasing
 - Historical exclusion elsewhere in the city

Black Population in Census Tract 6062 Census Period 1960-Present		
1990	18%	
2000	11%	
2010	6%	
2017	4%	

Assessment's Miss: Geographic Differences Housing Habitability Issues

- Strong and distinguishing characteristic of North Central
- Highly concentrated in North Central and downtown
- North Shoreview is *not* characterized by this issue

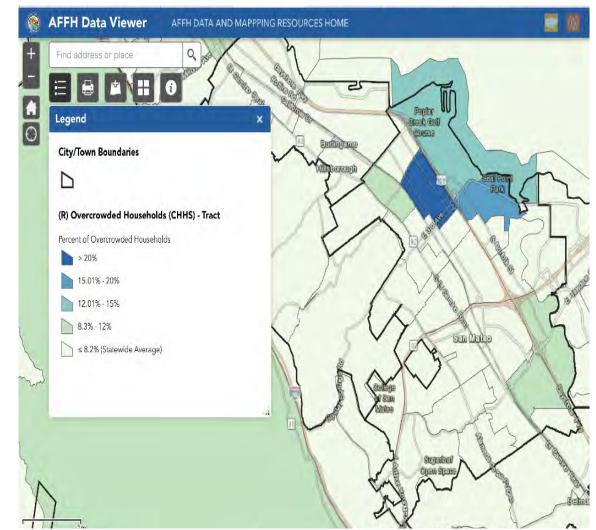

See also: "Figure III-11: Healthy Places Index by Census Tract, 2021," Root Policy Research Map and Data Packet, Page 40

Assessment's Miss: Geographic Differences

Overcrowding issues in North Central

- Strong and distinguishing characteristic of southern North Central
- Highly concentrated in one neighborhood
 - North Shoreview (13%) is much less characterized by this issue
- San Mateo overcrowding overall average: 7%, which is heavily skewed by North Central
- San Mateo Park: < 1%
- North Central north of Poplar Ave: 1%
- North Central south of Poplar Ave: 27%

"Figure IV-19: Overcrowded Households by Census Tract, 2019," Root Policy Research Map and Data Packet, Page 60

11436f1252tributing Factors

Fair Housing Assessment Resident trauma and exclusion

- North Central residents, including many who are alive today, have experienced the trauma of exclusion and steering from other neighborhoods of San Mateo
- Paired with a strong history of disinvestment and government practices to prevent POC from home ownership, the neighborhood and its people will need thoughtful repair in both the public and private realms

6.3.2 Contributing factors and Fair Housing Action Plan.

Excerpt from HCD's AFFH Presentation

4. Identify and Prioritize Contributing Factors

- » The housing element must identify and prioritize significant contributing factors to segregation, R/ECAPS, opportunity access, & disproportionate housing needs
 - Fair housing contributing factor = a factor that creates, contributes to, perpetuates, or increases the severity of one or more fair housing issues.
 - Contributing factors should be based on all prior AFFH analyses (Outreach, AFH, Site Inventory)

Excerpt from HCD's AFFH Presentation

4. Identify and Prioritize Contributing Factors

- » Identification and evaluation of contributing factors must:
 - Identify fair housing issues and significant contributing factors
 - Prioritize contributing factors, giving highest priority to those factors that most limit or deny fair housing choice, access to opportunity, or negatively impact fair housing or civil rights compliance
 - Discuss strategic approaches to inform and strongly connect to goals and actions. Goals and actions should stem directly from Contributing Factors
- » Prioritization is important should be a manageable list (4-6, not 50)
- » Must be tailored to local conditions

Analysis of Contributing Factors is inadequate

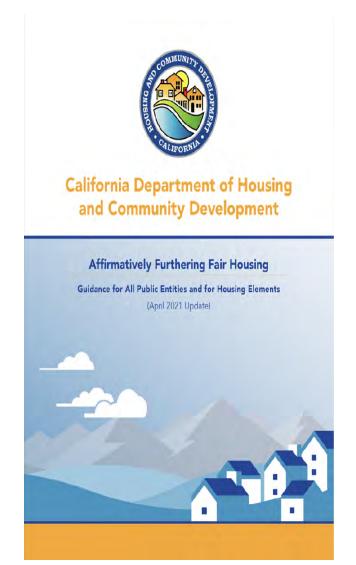

- It currently focuses more on the characteristics of the victims of our discriminatory structures and thus functions more as a continuation of the fair housing assessment than what it's meant to be
- For instance, listing the fact that Hispanic residents are more likely to work low-wage jobs or that Hispanic residents are primarily concentrated in the northeastern area of the city where residents face higher poverty and cost burden as well as poor opportunity outcomes is something that belongs in the fair housing assessment, not in the contributing factors space

Analysis of Contributing Factors is inadequate What is a fair housing contributing factor?

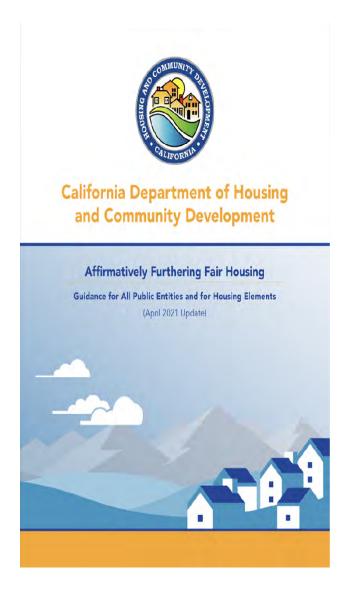

- Fair housing contributing factor = a factor that creates, contributes to, perpetuates, or increases the severity of one or more fair housing issues
 - City-controlled regulatory factors, policies, or ways of doing business that cause or contribute to fair housing issues should be fully identified and take primacy in this analysis, but they are inadequately discussed

From HCD's "Affirmatively Furthering Fair Housing: Guidance to All Public Entities and for Housing Elements" Pages 68-70

- Segregation and Integration
 - Community opposition
 - Lack of community revitalization strategies
 - Lack of private investments in specific neighborhoods
 - Land use and zoning laws

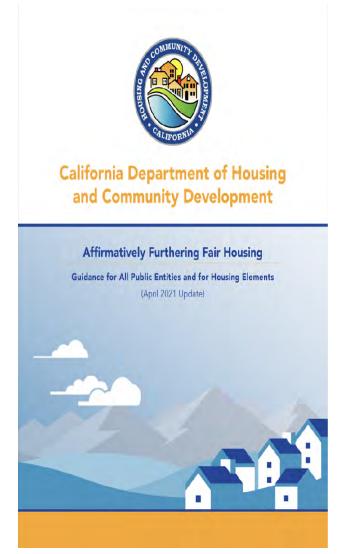

From HCD's "Affirmatively Furthering Fair Housing: Guidance to All Public Entities and for Housing Elements" Pages 68-70

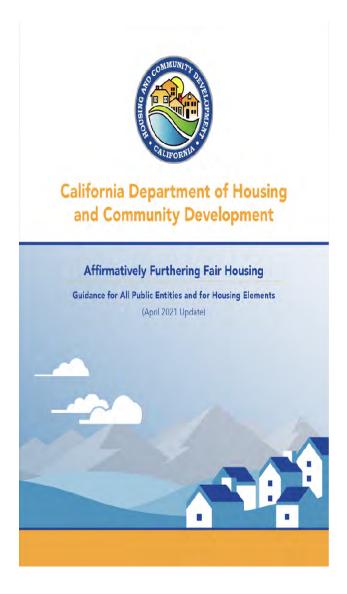

- Racially and Ethnically Concentrated Areas of Poverty
 - Deteriorated and abandoned
 properties
 - Displacement of residents due to economic pressures
 - Land use and zoning laws
 - Occupancy codes and restrictions

From HCD's "Affirmatively Furthering Fair Housing: Guidance to All Public Entities and for Housing Elements" Pages 68-70

- Disparities in Access to Opportunity
 - The availability, type, frequency, and reliability of public transportation
 - Land use and zoning laws
 - Lack of public investments in specific neighborhoods, including services or amenities
 - Location of proficient schools and school assignment policies
 - Location and type of affordable housing

From HCD's "Affirmatively Furthering Fair Housing: Guidance to All Public Entities and for Housing Elements" Pages 68-70

- Disproportionate Housing Needs, Including Displacement Risks
 - The availability of affordable units in a range of sizes
 - Lack of renter protections
 - Land use and zoning laws

Analysis of Contributing Factors Analysis of Contributing Factors is inadequate.

- Contributing Factors analysis must answer key "why" questions:
 - What unique factors, characteristics, and history in North Central and, separately, North Shoreview are leading to the concentration of higher poverty, low economic and environmental opportunity, high-cost burden, overcrowding, and flood hazards compared to the rest of the City of San Mateo?
 - What existing government constraints or policies have perpetuated these concentrated characteristics?
 - What factors, policies, and history in other parts of the city contribute to the absence of these characteristics, especially west of El Camino?

The Analysis of Contributing Factors Shortcomings

- The Housing Element needs to assess the geographic and regulatory causes leading to the concentration of poverty, low economic and environmental opportunity, high-cost burden, and overcrowding in North Central and, to a lesser extent, North Shoreview
- The Housing Element also needs to assess the **geographic and regulatory causes** leading to the concentration of affluence and, disproportionately, white people in western neighborhoods
 - This necessary assessment of **causes** is needed in order to develop placebased programs and actions that will meaningfully repair these issues

The Analysis of Contributing Factors

Must be able to guide Significant, Meaningful, and Sufficient policies to Overcome Patterns of Segregation

- Existing patterns of segregation in San Mateo are significant and persistent
 - Census tract divergence within the city ranges from 82% white to 6% white (San Mateo Park vs North Central, respectively)
 - Class segregation largely follows these lines
 - Actions and policies must be sufficient to overcome this pattern in a reasonable period of time
 - Why is the white population significant? Check out Appendix D and read Segregation by Design by Prof. Jessica Trounstine

The Analysis of Contributing Factors

Must be able to guide Significant, Meaningful, and Sufficient policies to Overcome Patterns of Segregation

- The Housing Element also fails to discuss strategic approaches to inform and strongly connect "Contributing Factors" to "Goals and Actions"
- This contributes to the the creation of goals and actions that are not yet sufficient to produce meaningful action

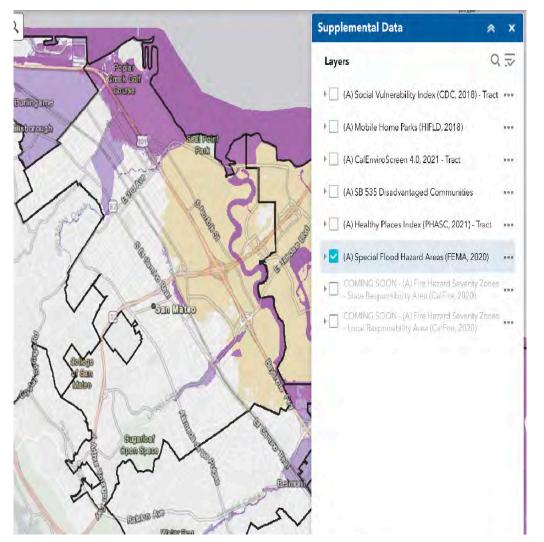

The Analysis of Contributing Factors

Must be able to guide Significant, Meaningful, and Sufficient policies to Overcome Patterns of Segregation

- Again, existing patterns of segregation in San Mateo are significant and persistent
- Analysis of Contributing Factors should be able to connect to Actions and Policies that are structured in a way that, economically, creates value for the city and for residents, without destroying the value of existing places
- This should not be about diminishing the quality of existing high-resource neighborhoods in order to achieve parity
- This process is about:
 - Lifting up disinvested portions of our city, and
 - Pairing that uplift with expanded access and residential integration across the city through thoughtful government-guided programs

Identify and Prioritize Contributing Factors Tell the Story: North Shoreview: Environmental Hazard and Isolation

- Why is North Shoreview an edge Racially/Ethnically Concentrated Area of Poverty?
 - What characteristics distinguish North Shoreview from other similar neighborhoods, and how might they lead to higher concentrations of marginalized or vulnerable groups?

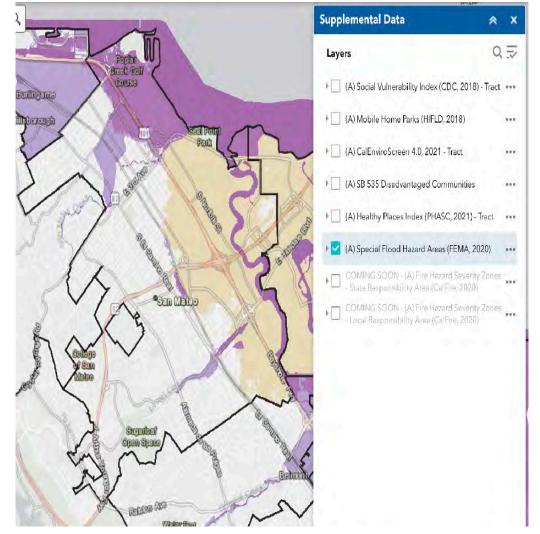

"Figure IV-31: Special Flood Hazard Areas, 2000," Root Policy Research Map and Data Packet, Page 69

1129 6fl 1252 tributing Factors

Identify and Prioritize Contributing Factors: Tell the Story

Identify and Prioritize Contributing Factors Tell the Story: North Shoreview: Environmental Hazard and Isolation

- Why is North Shoreview an edge Racially/Ethnically Concentrated Area of Poverty?
 - Key differences between North Shoreview and South Shoreview:
 - Levy protection and flood hazard chance.
 - Limited access to circulation and transportation

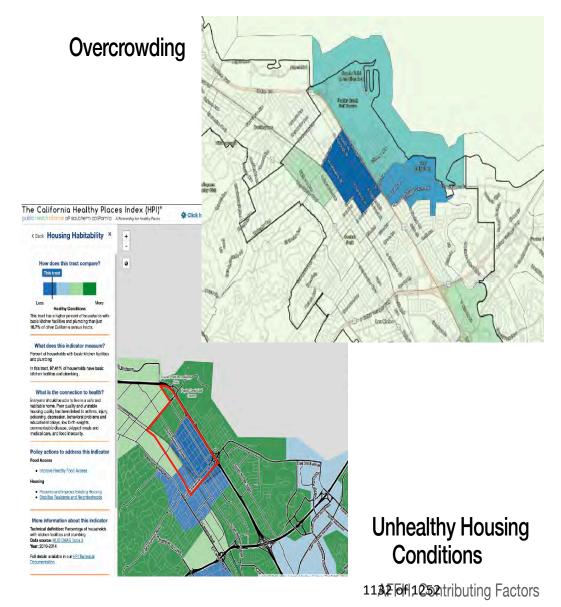

"Figure IV-31: Special Flood Hazard Areas, 2000," Root Policy Research Map and Data Packet, Page 69

Identify and Prioritize Contributing Factors

Tell the Story: North Central: Poor Housing Conditions + Overcrowding

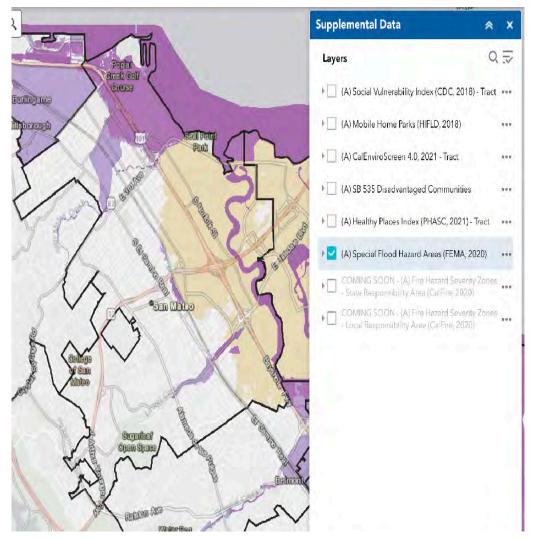

- Why is North Central (south of Poplar) an edge Racially/ Ethnically Concentrated Area of Poverty?
 - What characteristics distinguish North Central south of Poplar Ave from other parts of the city, and
 - How might they lead to higher concentrations of marginalized groups?

Identify and Prioritize Contributing Factors

Tell the Story: North Central: Disinvestment + Environmental Hazard

- Why is North Central (south of Poplar) an edge Racially/Ethnically Concentrated Area of Poverty?
 - Key differences between North Central (south of Poplar) and other areas:
 - Decades of disinvestment:
 - Both private housing stock and public infrastructure
 - Overcrowding and poverty as both symptoms and causes of private disinvestment
 - Levy protection and flood hazard chance (in portions of that area)

"Figure IV-31: Special Flood Hazard Areas, 2000," Root Policy Research Map and Data Packet, Page 69

1133 6f1252 tributing Factors

Identify and Prioritize Contributing Factors

Tell the Story: North Central: Historical Ghettoization + Failed, Segregated Schools

- Why is North Central (south of Poplar) an edge Racially/Ethnically Concentrated Area of Poverty?
 - Key differences between North Central and other areas:
 - History of a highly segregated neighborhood and its underperforming school
 - Neighborhood's Turnbull Learning Academy closed about 15 years ago
 - The building repurposed for the College Park Mandarin Immersion magnet school

Turnbull Learning Academy places dead last again

By Alison Hawkes Daily Journal Reporter 🛛 Jan 19, 2001 Updated Feb 20, 2018 🔍 0

f 🕊 🖬 🖨 🗐 in

Newly released reports which showing Turnbull Learning Academy as one of the worst in the state and in the lowest ranks among similar schools have some community members deeply concerned -- but the district administration is critical of the numbers.

The state Academic Performance Index, re-released on Wednesday, ranked schools' performance on the spring 2000 Stanford-9 tests to others across the state and to smaller groups of schools with a similar socio-economic background.

The information is meant to help school officials and the public better assess where a school stands in relation to others, and how much they need to improve in order to be eligible for additional state funding. Turnbull Learning Academy, an elementary school in San Mateo's North Central neighborhood, received an overall score of 468 out of a possible 1000 points, significantly lower than the state expectation of 800 points and hundreds of points behind all other schools in the San Mateo-Foster City School District.

Turnbull ranked at the very lowest level compared to the rest of the state -- a one, with10 being the highest level.

Attachments:	Planning Commission Input - Draft Housing Element - Adam Nugent - May 3.pdf

Hi Manira and Zach,

I appreciate the work you and your team is doing. Our May 3rd continuance meeting was the right call. Thank you for making it happen!

Here are my notes and consolidated input from that May 3rd Planning Commission review of the Draft Housing Element. Again, I hope the additional detail and clarifying elements in these notes prove useful to the team.

Best, Adam

Adam Nugent, PLA Planning Commissioner, City of San Mateo anugent@cityofsanmateo.org

Draft Housing Element Comments

Draft for Public Review: Housing Element of the General Plan 2023-2031, April 6, 2022

Commissioner Adam Nugent, May 3, 2022 Planning Commission Meeting

Outline Draft 2023-2031 Housing Element Input

- Introduction and Thank You (Same as 4/26)
- Part 3: Other Housing Element Sections
- Part 4: Goals, Policies, and Programs
 - Selected Excerpts of Rejection Letters for Other Cities
 - Goals, Policies, and Actions Discussion
 - AFFH-Specific Policy-by-Policy Review
 - Non-AFFH-Specific Policy-by-Policy Review

<u>Note</u>: Topics that were discussed at the April 26 Planning Commission Meeting:

- Part 1: Site Inventory Comments
 - Methodology-focused
- Part 2: Affirmatively Furthering Fair Housing Comments
 - General Comments
 - Fair Housing Assessment
 - Contributing Factors

Public Comments Notes and Highlights

- Market special-needs units to the most appropriate special needs population. Unit-specific needs should be marketed so that the unique, appropriate population is matched with the special features of the unit
- Measure Y as an obstacle to affordable housing development

Thank you, Housing Element Team!

The work you are doing is extremely important and impactful

- All of my comments and questions come from a place of deep respect and appreciation for the hard work you are doing!
- I am proud to have a city with staff of such caliber, who genuinely desire to create a better, more just housing landscape for our future
- This is HARD WORK; and you are undertaking it in uncharted territory that is fraught with puzzles and potential pitfalls

Thank you, Housing Element Team! Fair warning:

- My comments are extensive
- To implement the Housing Element in a way that truly advances Fair Housing Goals and meets the needs of our younger generations it will take:
 - Tough decisions and a lot of work
- This Housing Element is an opportunity to make real progress:
 - Repair racial and economic disparities
 - Combat cost of living increases that are disproportionately hitting younger adults

The Push for Change Has Never Been Greater Demographics will drive our housing needs *and* our political will

- The younger half of our population has a different outlook and set of values than many who are in the older generations
- The political winds are blowing in the right direction for positive change
- The Millennial is the largest generation in history and Gen-Z is close behind; they will have continually increasing political voice and power
- It is the younger generations that are feeling the most pain in this crisis, and they are the most motivated to bring about change
 - 14% of 4-year university students experienced homelessness last year; 42% experienced housing insecurity (*Governing*, 4/26/2022)
- We cannot botch this for the next generation

"Unaffordable housing has one and only one cause: purposeful communal enforcement of it. This is legislated poverty."

Kevin Erdmann

Part 3: Other Housing Element Sections

Constraints Analysis Draft Analysis Not Very Useful

- Constraints analysis should provide metrics on how existing land use and related policies affect the City's ability to build housing
- What are the counterfactuals?
 - How much more housing could be built under different zoning scenarios?
 - What are the true limiting factors over the long term?
 - Why are construction costs so high and what can the city do to counteract these trends?

Constraints Analysis Zoning and Land Use Constraints

- Height and Density Constraints on BMR Units: Measure Y
 - Height and Density constraints contained in measure Y are limiting the city's ability to increase the percentage of BMR units for the city's inclusionary ordinance
 - Recent city-commissioned study found increasing the inclusionary percentage to 20% would render projects infeasible
 - This adds up and translates to needing significantly more redevelopable land to achieve any given quantity of subsidized units than necessary
 - Increases costs substantially by increasing costs imposed by land acquisition and entitlement processes

Constraints Analysis Zoning and Land Use Constraints

- Height and Density Constraints: Measure Y
 - Density limits also significantly reduce the number of units that can be built by 2-3x, even under the existing 5-story height limit
 - Doubles or triples the land costs per unit for all ranges of affordability
 - Doubles or triples the procedural, consultant, and time costs of additional design and entitlement processes

Constraints Analysis Community Opposition

- Community opposition is a clear problem
 - Most people want more housing and to solve our housing crisis
 - It only takes a few, vocal or influential residents to block housing
 - Counterfactuals are hard to quantify, but the effects of a vocal, negative minority are likely enormous
 - When good, potential projects never even get proposed
 - When bad policies and zoning go unchanged
 - Need policies to overcome community opposition especially as it relates to AFFH

Constraints Analysis

Fee Disparities

- Fees take up an unusually large proportion of the total costs of development in the City of San Mateo compared to the rest of San Mateo County
 - Fees impact small multi-family projects especially hard
 - They are 3.5 times higher per unit than single family homes

Part 4: San Mateo's Goals, Policies, and Actions

"We must come to see that human progress never rolls in on wheels of inevitability. It comes through the tireless efforts and persistent work of men willing to be coworkers with God, and without this hard work time itself becomes an ally of the forces of social stagnation."

Dr. Martin Luther King Jr. "Letter from Birmingham Jail" 1963

Excerpts from HCD's AFFH Presentation

5. Goals and Actions

The HE must include a schedule of actions directly related to AFFH. Together it must:

- » Reflect results of the AFFH analyses and directly address contributing factors
- » Be specific, with concrete language words like 'explore', 'consider' and 'study' don't cut it
- » Have a clear timeline with specific dates and milestones 'ongoing' usually not adequate
- » Quantifiable outcomes
- » Have a beneficial/meaningful impact during the planning period that's the bar to overcome patterns
- » Go well beyond a continuation of past actions
- » Not take any action materially inconsistent with the obligation to AFFH

Affirmatively Furthering Fail Floofsing²

Excerpts from HCD's AFFH Presentation

Common Mistakes & Pitfalls

- » High-quality Assessment of Fair Housing, but status-quo actions/programs
- » A local jurisdiction just refers to a county-level Analysis of Impediments to Fair Housing previously completed
- » Does not include regional comparison in analyses
- » Only analyzes patterns of low-income sites, not all sites
- » Does not ask the public to provide input on AFFH
- » Doesn't prioritize 4-5 contributing factors & connect to programs
- » High resource areas can't rely on ADUs alone
- » No data dumping! Tell the story

Selected Excerpts of Rejection Letters for Other Cities' 6th-Cycle Housing Elements

Los Angeles

LA's exemplary Housing Element Rejected

- Praised for metrics used to demonstrate and determine adequate sites for the Housing Element
- Pursuing large rezoning program

STATE OF CALIFORNIA - BUSINESS, CONSUMER SERVICES AND HOUSING AGENCY

DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT DIVISION OF HOUSING POLICY DEVELOPMENT 2020 W. El Camino Avenue, Suite 500 Sacramento, CA 95833 (916) 263-2911 / FAX (916) 263-7453 www.hctc.ca goy

February 22, 2022

Vincent Bertoni, Director Department of City Planning City of Los Angeles Los Angeles City Hall 200 North Spring Street, Suite 525 Los Angeles, CA 90012

Dear Vincent Bertoni:

RE: City of Los Angeles 6th Cycle (2021-2029) Adopted Housing Element

Thank you for submitting the City of Los Angeles (City) housing element adopted on November 24, 2021 and received for review on November 24, 2021. Pursuant to Government Code section 65585, subdivision (h), the California Department of Housing and Community Development (HCD) is reporting the results of its review. In addition, HCD considered comments from Alliance for Community Transit – Los Angeles (ACT-LA) and a coalition of 24 community organizations, Tieira Ryder and Abundant Housing LA pursuant to Government Code section 65585, subdivision (c).

The adopted housing element addresses most statutory requirements described in HCD's September 3, 2021, review. For example, HCD applauds the substantial rezoning program and actions to facilitate housing choices, affordability and supply, the element now demonstrates adequate sites to accommodate the regional housing need allocation. However, an additional revision is necessary to fully comply with State Housing Element Law, as follows:

Affirmatively further[ing] fair housing in accordance with Chapter 15 (commencing with Section 8899.50) of Division 1 of Title 2...shall include an assessment of fair housing in the jurisdiction. (Gov. Code, § 65583, subd. (c)(10)(A).)

Promote and affirmatively further fair housing opportunities and promote housing throughout the community or communities for all persons regardless of race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability, and other characteristics protected by the California Fair Employment and Housing Act (Part 2.8 (commencing with Section 12900) of Division 3 of Title 2), Section 65008, and any other state and federal fair housing and planning law. (Gov. Code, § 65583, subd. (c)(5).)

LA Rejection Letter Reason: AFFH

- Programs did not include metrics
- "In addition, while the element included some actions to replace segregated patterns, these actions lacked specific geographic focus (communities with fair housing issues), firm commitments and significant targets for AFFH outcomes."

Vincent Bertoni, Director Page 2

> <u>Goals, Priorities, Metrics, and Milestones</u>: Programs and actions must include metrics and milestones to target significant and meaningful affirmatively furthering fair housing (AFFH) outcomes and evaluate the effectiveness and progress towards implementation. While the element included metrics for some programs, it did not include metrics for most programs related to AFFH. In addition, many actions do not appear to explicitly AFFH such as targeting geographic areas or neighborhoods. Without these components, whether the element is targeting meaningful outcomes is unclear, particularly related to place-based strategies to encourage community revitalization. Examples of programs that should be revised include Programs 10 (Affordable Housing Linkage Fee), 20 (New Local Revenue), 22 (Systematic Code Enforcement), 30 (New Models of Acquisition and Rehabilitation), 84 (Citywide Fair Housing Program) 88 (Eviction Defense Program) and 90 (Tenant/Community Opportunity).

> In addition, while the element included some actions to replace segregated patterns, these actions, lacked specific geographic focus (communities with fair housing issues), firm commitments and significant targets for AFFH outcomes. Given the patterns and trends and other relevant factors noted in the assessment of fair housing, the element must include specific and significant actions that adequately promote community revitalization and conservation and replace segregated living patterns to foster more inclusive and equitable communities.

The element will meet the statutory requirements of State Housing Element Law once it has been revised and re-adopted to comply with the above requirements.

As a reminder, the City's 6th cycle housing element was due October 15, 2021. As of today, the City has not completed the housing element process for the 6th cycle. The City's 5th cycle housing element no longer satisfies statutory requirements. HCD encourages the City to revise the element as described in this letter, re-adopt, and submit to HCD to regain housing element compliance. For more information on housing element adoption requirements, please visit HCD's website at: http://www.hcd.ca.gov/community-development/housing-element/housing-element_memos/docs/sb375_final100413.pdf.

For your information, pursuant to Assembly Bill 1398 (Chapter 358, Statutes of 2021), if a local government fails to adopt a compliant housing element within 120 days of the statutory deadline (October 15, 2021), then any rezoning to accommodate the regional housing needs allocation (RHNA), including for lower-income households, shall be completed no later than one year from the statutory deadline. Otherwise, the local government's housing element will no longer comply with State Housing Element Law, and HCD may revoke its finding of substantial compliance pursuant to Government Code section 65585, subdivision (i).

Programs How should programs be structured?

- "Programs must demonstrate that they will have a beneficial impact within the planning period. Beneficial impact means specific commitment to deliverables, measurable metrics or objectives, definitive deadlines, dates, or benchmarks for implementation. Deliverables should occur early in the planning period to ensure actual housing outcomes." (From HCD's Davis, CA rejection letter)
- "Programs should include specific actions and commitments the City will take to implement the program. For example, a Program should be specific on the regulatory incentives, zoning standards, and programs it will offer to assist in the development of housing." (From HCD's Davis, CA rejection letter)

AFFH-specific

Goals and Actions must be significant and meaningful

 "Goals and actions must specifically respond to the analysis and the identified and prioritized contributing factors to fair housing issues and must be significant and meaningful enough to overcome identified patterns and trends... Actions must have specific commitment, metrics, and milestones as appropriate and must address housing mobility enhancement, new housing choices, and affordability in high opportunity areas, place-based strategies for community preservation and revitalization, and displacement protection." (From HCD's Redondo Beach rejection letter)

AFFH-specific

Programs must have metrics and milestones

 "Based on the outcomes of a complete AFFH analysis, the element must add or modify programs to include specific metrics and milestones to target meaningful AFFH outcomes, including providing mobility opportunity, placebased strategies [for community preservation and revitalization], new housing opportunities, and preservation and conservation efforts to address displacement." (From HCD's Davis, CA rejection letter)

AFFH-specific

Programs must have objective measures to determine success of outcomes

- [We need to] "replace non-committal language such as "if feasible", "assess the feasibility of", or "assess" with language that commits to follow-up actions. The program must include specific timeframes for action and provide quantifiable description of actions to objectively measure for successful outcomes." (From HCD's Redondo Beach rejection letter)
- Many policies with AFFH impacts proposed by San Mateo's Draft Housing Element are characterized by this issue
 - All proposed policies that have words like "investigate," "explore," or "evaluate" should be amended to provide specific timeframes for action and provide quantifiable descriptions of actions to objectively measure for successful outcomes

Goals, Policies, and Actions Discussion

Actions must be:

- Significant
- Meaningful
- Sufficient to Overcome Patterns of Segregation
- Affirmatively Further Fair Housing

Goals, Policies, and Actions Necessary Components

- Metrics and milestones for evaluating:
 - Progress on programs/actions
 - Fair housing results
- Remember:
 - Must have a clear timeline with specific dates and milestones paired with quantifiable outcomes
 - Meaningful impact during the planning period
 - Go beyond a continuation of past actions

Meaningful Action AFFH requirements

- Address significant disparities in housing needs and in access to opportunity
- Replace segregated living patterns with truly integrated and balanced living patterns
- Transform racially and ethnically concentrated areas of poverty into areas of opportunity
- Foster and maintain compliance with civil rights and fair housing laws

- 1. Significant Disparities in Housing Needs and in Access to Opportunity: Examples include incentivizing new residential development to include below-market rate housing; conserving affordability of existing housing, such as limitations on rents or conversion of such housing to higher rent or higher priced housing; encouraging systematic code enforcement activities that maintain housing stock while ensuring such enforcement does not cause displacement; and promoting housing mobility strategies and displacement mitigation strategies to ensure equitable access to opportunity. Housing mobility strategies may include providing affordable and accessible transportation options to enhance access to education and economic development opportunities. Displacement mitigation strategies may include tenant protections, conservation of existing stock, preservation of units at-risk of conversion to market-rate uses, acquisition and rehabilitation of existing stock, including naturally occurring affordable housing, and removing barriers to building affordable housing.
- 2. Replacing Segregated Living Patterns with Truly Integrated and Balanced Living Patterns: Examples include community benefits agreements that balance development proposals with tangible, local benefits to residents in the area (e.g., creating affordable housing, funding renter assistance programs for nearby residents, or other investments that meet community-identified needs, such as infrastructure and community amenities). Other examples include inclusionary zoning requirements and land-value recapture mechanisms, zoning for a variety of housing types, particularly those that may be lacking from the community or neighborhood, including: multifamily housing, low-barrier navigation centers, group homes, supportive housing, and accessible units. Promote education on how restrictions on multifamily housing, such as limited multifamily zoning and height and density limitations, impact inclusive communities. Seek local input on housing proposals while recognizing that "local vetoes" of affordable and mixed-income housing in racially segregated concentrated areas of affluence create fair housing issues.²⁶
- 3. Transforming Racially and Ethnically Concentrated Areas of Poverty (R/ECAP) into Areas of Opportunity: Examples include community-led, place-based strategies to revitalize communities, such as economic development strategies and prioritizing investment in R/ECAPs that meet the needs of existing low-income residents, such as safe routes to school, transit, parks, schools, bike and pedestrian infrastructure, urban forestry, other neighborhood improvements; preserving naturally occurring affordable housing, such as mobilehome parks; and preservation as affordable housing of market-rate units where low-income households live; and promoting mixed-income development coupled with strong anti-displacement protections. Conduct outreach and advertise city program to persons with limited English proficiency. Other examples include community engagement in planning processes, including targeted outreach, technical assistance to help apply for grants, economic development strategies, workforce development, youth engagement and educational programs, healthy food access, affordable energy, and transportation access.
- 4. Fostering and Maintaining Compliance with Civil Rights and Fair Housing Laws: Agencies must diligently comply with civil rights and fair housing laws, including the California Fair Employment and Housing Act (FEHA) (Part 2.8 (commencing with section 12900) of Division 3 of Title 2), Government Code sections 8899.50, 65008, 65583, subdivisions (c)5) and (c)(10), and 11135, Civil Code section 51 (lihe Unruh Civil Rights Act), and FEHA regulations in California Code of Regulations, title 2, sections 12005-12271.

Table 4: 2019 Segregation and Select Neighborhood Outcomes^{65 66}

Goals, Policies, and Actions

How to combat exclusion and segregation

- We will need to tie our policies to key quantitative metrics focused on integration and segregation data
- We will also need well-defined anti-displacement program requirements
- Without these two things we will further collectivize the right to exclude

Indicator	Integrated Neighborhoods	Highly Segregated Communities of Color	Highly Segregate White Neighborhoods	
Median Household Income	\$63,830	\$54,278	\$100,956	
Median Home Values	\$244,162	\$266,927	\$474,798	
% Below Poverty	14%	21%	7%	
% Owner-Occupied Homes	59%	46%	77%	
% With Bachelor's Degree	30%	23%	46%	
Life Expectancy	78	77	81	
Median Rent	\$1,177	\$1,174	\$1,545	
% Unemployed	6%	8%	4%	
% of US Land Area	7%	9%	7%	
% of US Population	12%	20%	11%	

The best life outcomes are found, however, in highly segregated white neighborhoods, which is consistent with a theory of "opportunity hoarding" that predominantly white cities and communities have greater resources and often have the fewest people of color living in them.⁶⁷ Household incomes in these neighborhoods are nearly twice those in segregated communities of color. That income differential contributes to wealth disparities, as home values are also nearly twice as high. Even life expectancy is four years longer in these neighborhoods than in segregated communities of color.⁶⁸ But critically, these neighborhoods are difficult to access monthly rents are more than \$300 and \$400 per unit higher than in either integrated or highly segregated POC neighborhoods, respectively. 1166 of 1252

UC Berkeley Othering and Belonging Institute

- Hispanic residents, single female parent households, renters, and the people of North Central, and to a lesser extent North Shoreview, have Disproportionate Housing Needs:
 - 1. Cost Burden & Severe Cost Burden
 - 2. Overcrowding
 - 3. Substandard Housing
 - 4. Displacement risk
 - Investment-driven
 - Disinvestment-driven

- Cost Burden and Severe Cost Burden
 - Site inventory, together with goals, policies, and actions, must be sufficiently developed to actually produce at a minimum, the allocated 7000+ units of housing in San Mateo
 - Previous production trends indicate less than 1,000 units can be reasonably expected to be developed over the course of the 6th housing cycle, as currently planned in this Draft Housing Element
 - Failure to adequately plan for the minimum allocated number of units will lead to further increasing cost burden and severe cost burden. It will also drive young families out of the Bay Area
 - The City's methodology must be revised to produce a high likelihood of meeting our regional allocation in order to address this AFFH disparity

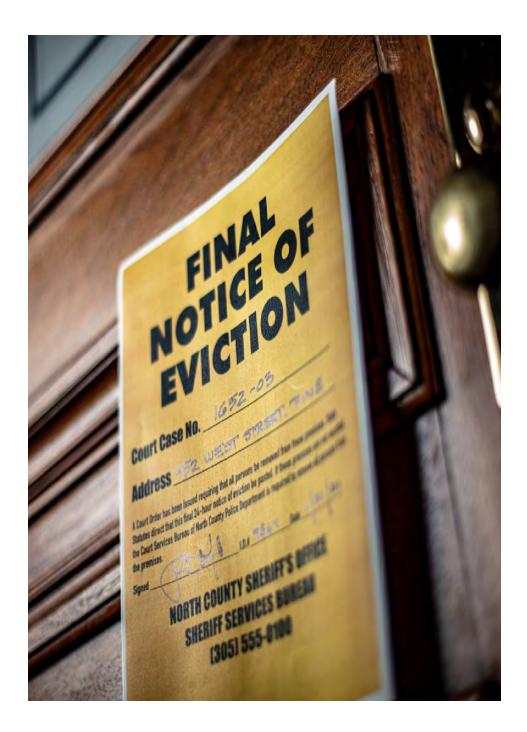

- Overcrowding
 - Overcrowding is similarly affected by the reasonable achievement of the regional housing needs allocation goals
 - Overcrowding is also highly location-specific and must be addressed in a combined effort to prevent displacement as part of a program to transform racially and ethnically concentrated areas of poverty into areas of opportunity
 - North Central contains an area that is nearly 4X the San Mateo average
 - 27% vs 7% overcrowded households
 - Thousands of people in North Central live in overcrowded conditions
 - Overcrowding is a measurable factor.
 - Policies and Actions should be tailored to eliminate disparities in overcrowding and overcrowding in general within set timelines, say 1 and 2 decades, respectively 1169 of 1252

- Substandard Housing
 - Substandard Housing is closely linked geographically to overcrowding in North Central
 - Material conditions must be improved, as with overcrowding, in a way that prevents displacement
 - Best done as part of a larger program to transform racially and ethnically concentrated areas of poverty into areas of opportunity
 - Policies and Actions should be tailored to realistically eliminate substandard and unhealthy housing conditions within a set timeline, say 1-2 decades

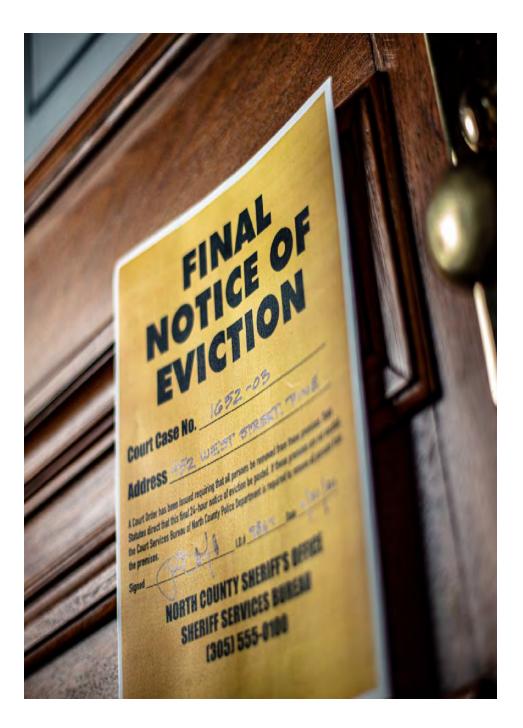

- Displacement Risk 1
 - Programs must be developed to specifically address displacement risk caused both by cost burden and by potential neighborhood reinvestment
 - Robust **Right of Return** for renters, paired with...
 - Alternative option for Unrestricted Negotiable
 Tenant Buyouts
 - Some tenants may not want to return
 - All residents should be materially better off following any neighborhood investment
 - All zoning changes and production policies must be formulated to make the increased costs imposed by associated displacement protections feasible

- Displacement Risk 2
 - Programs must be developed to specifically address displacement risk caused both by cost burden and by potential neighborhood reinvestment
 - **Relocation Payments** for substantial remodel, demolition...
 - and owner move-in
 - All residents should be materially better off following any neighborhood investment
 - All zoning changes and production policies must be formulated to make the increased costs imposed by associated displacement protections feasible

- Displacement Risk 3
 - Programs must be developed to specifically address displacement risk caused both by cost burden and by potential neighborhood reinvestment
 - Create Community Opportunity to Purchase/ Tenant Opportunity to Purchase program, paired with...
 - Partnerships with **Philanthropic Organizations** to bring funds to our most disinvested places
 - All residents should be materially better off following any neighborhood investment
 - All zoning changes and production policies must be formulated to make the increased costs imposed by associated displacement protections feasible

- Displacement Risk 4
 - Programs must be developed to specifically address displacement risk caused both by cost burden and by potential neighborhood reinvestment
 - Extend AB1482
 protections to tenants
 whose tenure is less than
 1 year

Goals, Policies, and Actions Additional Policy Suggestions

- Fee Parity
 - San Mateo charges higher fees than the majority of its peers, and the city's fees impose significant costs on developers-especially for small multi-family housing
 - The city's massive fees for small multi-family projects impose obvious burdens on developers and should be amended to support lower-cost home building
 - Achieve parity with Single Family home development

	Fees in the	City of San Mateo ⁹	
	Single Family	Small Multi-Family	Large Multi-Family
Total Fees/Unit	\$99,003	\$133,658	\$44,907
Fees as a Proportion of Total Development Costs	4%	14%	6%

"Fees" includes entitlement, building permits, and impact fees.

Additional Policy Suggestions

- Affordable Housing Overlay
 - Provide affordable housing developers an advantage in the market for developable properties
 - Geographically locate the overlay(s) to compensate for existing housing disparities in access to opportunity

AFFH-Specific Policy-by-Policy Review

7.2.5 Goal H5: Affirmatively Furthering Fair Housing

To reinforce the objective that AFFH is a top priority for the city, an AFFH Fair Housing Action Plan with programs and actions has been included as the fifth goal of the Housing Element. This Action Plan cross references items that are interwoven with the Housing Plan's other four goals, policies, and programs. The actions to achieve the Fair Housing goal are meant to address the fair housing issues found in the AFFH analysis, specifically for groups that have disparate housing impacts when compared to the whole of San Mateo. This includes, for example, Hispanic and single-female heads of households who have disproportionate housing needs while being concentrated in census tracts that have high rates of poverty. Persons with disabilities are also more likely to experience housing discrimination due to low economic opportunity and failure of landlords to provide reasonable accommodations. Each of the actions identified in Table 12 have specific quantified objectives to reach the target households.

Table 12: Goal H5: AFFH - Implementation Plan

Actions	Fair Housing Issues	Contributing Factors	Fair Housing Category	Action	Type of Action	Responsible Party	Objectives	Quantified Objectives	Timeline
Action Area 1. Enhancing hou	sing mobility strategies	consist of removing bar	riers to housing in an	eas of opportunity a	nd strategica	lly enhancing access.	and making in		Sec. St
Policy 5.1.1: Adjust the city's Below Market Rate (inclusionary) program to provide larger density bonuses, and/or increased City support in exchange for affordable units that address the needs of residents with disproportionate housing needs (e.g., accessible/visit able units for persons with disabilities, child-friendly developments with day care on site for single parents, and 3-4 bedroom units for larger families).	Hispanic and single female parent households are concentrated in low opportunity census tracts.	Lack of affordable housing in high opportunity areas; Lack of accessible affordable units	Disparities in access to opportunities	Assist in development of housing for low- income households and households with special needs	Land use resources	City of San Mateo	Expand the variety of housing units produced under the inclusionary housing program. Currently developments of 11 or more units require 15% affordable to moderate income families for ownership and 15% for low -income families for renters.	Perform a feasibility analysis to redesign the program to allow a menu of options. This item is connected to Policy H 1.3, Policy H 1.5., Policy H 1.14, and Policy H 1.15.	Complete feasibility analysis by Fall 2023; Implement redesigned program by Spring 2024.

Policy 5.1.1 Adjust City's BMR Program

- Positive program but:
- Lacks firm commitments
- Lacks significant targets for AFFH outcomes

Objectives	Quantified Objectives	Timeline	
Expand the variety of housing units produced under the inclusionary housing program. Currently developments of 11 or more units require 15% affordable to moderate income families for ownership and 15% for low -income families for renters.	Perform a feasibility analysis to redesign the program to allow a menu of options. This item is connected to Policy H 1.3, Policy H 1.5., Policy H 1.14, and Policy H 1.15.	Complete feasibility analysis by Fal 2023; Implement redesigned program by Spring 2024.	

Actions	Fair Housing Issues	Contributing Factors	Fair Housing Category	Action	Type of Action	Responsible Party	Objectives	Quantified Objectives	Timeline
Policy 5.1.2: Participate in a regional down payment assistance program with affirmative marketing to households with disproportionate housing needs including persons with disabilities, single parents, and Hispanic households (e.g., Spanish and English, targeted to northeast neighborhoods).	Hispanic households have disproportionate housing needs.	Historic discrimination and continued mortgage denials; Concentration in low opportunity census tracts; High housing costs and low wages	Disparities in access to opportunities	Promote equal housing opportunity	Financial resources	Regional Partnership with HEART (San Mateo County has program with them)	Improve accessibility to home mortgage loans for Hispanic households who have the highest loan denial rates. Provide wealth building through homeownership for moderate income households.	Affirmatively market down payment assistance to 20 Hispanic households; Provide down payment assistance to 30 total households; Provide homebuyer education to 200 households. This item is connected to Policy H 4.4.	Meet quantified objectives by the end of the Housing Element period in 2031; Conduct homebuyer education quarterly in partnership with HEART
Policy 5.1.3: Support the design of a regional forgivable loan program for homeowners to construct an ADU that is held affordable for extremely low-income households for 15 years.	Hispanic and single female parent households are concentrated in low opportunity census tracts.	Lack of affordable housing in high opportunity areas; Lack of accessible affordable units	Disparities in access to opportunities	Incentivize accessory dwelling units (ADUs)	Land use resources	21 Elements/HEART	Increase opportunities for lower-income households to find housing that is affordable.	Design a regional loan forgiveness program. This item is connected to Policy H 1.4.	Begin design in Summer 2025 and complete by winter 2026.

Action Area 2. Encouraging new housing choices and affordability in high resource areas: promoting housing supply, choices, and affordability in areas of high opportunity and outside of areas of concentrated poverty.

Policy 5.1.2 Participate in a Regional Downpayment program

- Program with potential lifechanging outcomes but:
- Limited scope will not significantly address large-scale Systemic issues

Objectives	Quantified Objectives
Improve accessibility to	Affirmatively market down
home mortgage loans	payment assistance to 20
for Hispanic	Hispanic households;
households who have	Provide down payment
the highest loan denial	assistance to 30 total
rates. Provide wealth	households; Provide
building through	homebuyer education to
homeownership for	200 households. This item
moderate income	is connected to Policy H 4.4
households.	

Policy 5.1.3

Support the Design of Regional Forgivable Loan Program for 15-year ELI ADU Construction

- Potential to contribute to overcoming patterns of segregation
- Positive program with potential lifechanging outcomes but:
- Limited scope will not significantly address large-scale systematic issues
- Deliverables should occur early in the planning period to ensure actual housing outcomes
- Lacks specific actions and metric-ready commitments

Objectives	Quantified Objectives	Timeline
Increase opportunities for lower-income households to find housing that is affordable.	Design a regional loan forgiveness program. This item is connected to Policy H 1.4.	Begin design in Summer 2025 and complete by winter 2026.

Policy 5.1.3 continued

Support the Design of Regional Forgivable Loan Program for 15-year ELI ADU Construction

- Policy revision recommendations:
 - Expand to SB 9 projects
 - Incorporate option for longer deed restriction (55 years) for one low income unit within a SB 9 program

Objectives	Quantified Objectives	Timeline
Increase opportunities for lower-income households to find housing that is affordable.	Design a regional loan forgiveness program. This item is connected to Policy H 1.4.	Begin design in Summer 2025 and complete by winter 2026.

CITY OF SAN MATEO 2031 HOUSING ELEMENT

Actions	Fair Housing Issues	Contributing Factors	Fair Housing Category	Action	Type of Action	Responsible Party	Objectives	Quantified Objectives	Timeline
Policy 5.2.1: Add more city supported housing with affordability restrictions in moderate and high resource areas. Affirmatively market the housing to households with disproportionate housing needs including persons with disabilities, farmworkers, single parents, and Hispanic households (e.g., Spanish and English, targeted to northeast heighborhoods).	Hispanic and single female parent households are concentrated in low opportunity census tracts.	Lack of affordable housing in high opportunity areas; Lack of accessible affordable units; Concentration of Naturally Occurring Affordable Housing (NOAH) in low opportunity census tracts.	Disproportionate housing need for low-income households and protected classes	Assist in development of housing for low- income households and households with special needs	Financial resources	City of San Mateo	Affirmatively market the housing to households with disproportionate housing needs including persons with disabilities, single parents, farmworkers, and Hispanic households (e.g., Spanish and English, targeted identified neighborhoods).	Require developers to affirmatively market 1,000 units to those with disproportionate housing needs over the eight-year period (approximately 125 annually). This item is connected to Policy H 1.2. and Policy H 4.4.	2023 - 2031 (Annually)
Policy 5.2.2: Incentivize developers through direct subsidies, fee waivers, and/or density bonuses, to increase accessibility requirements beyond the federal requirement of 5% for subsidized developments.	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts.	Disproportionate housing need for low-income households and protected classes	Promote equal housing opportunity	Financial resources	City of San Mateo	Increase development of accessible units beyond minimum requirements	Modify developer agreements when appropriate; update inclusionary policy. This item is connected to Policy H 1.3	2026

Policy 5.2.1

Affirmatively Market BMR units to households with disproportionate housing needs

- Positive program with metrics
- People with special needs have unique and special needs. Each potential recipient may be quite different from the next and the program will need to be tailorable
- Limited scope will not significantly address large-scale systemic issues

Objectives
Affirmatively market the housing to households with disproportionate housing needs including persons with disabilities, single parents, farmworkers, and Hispanic households (e.g., Spanish and English, targeted identified neighborhoods).

Policy 5.2.2

Incentivize development of new accessible units

- Positive program with potential life-changing outcomes but:
- Limited scope
- Deliverables should occur earlier in the planning period to ensure actual housing outcomes
- Lacks specific actions and metric-ready commitments

Objectives	Quantified Objectives	Timeline
Increase development of accessible units beyond minimum requirements	Modify developer agreements when appropriate; update inclusionary policy. This item is connected to Policy H 1.3	2026

Actions	Fair Housing Issues	Contributing Factors	Fair Housing Category	Action	Type of Action	Responsible Party	Objectives	Quantified Objectives	Timeline
Policy 5.2.3: Prioritize city funding proposals for city funded affordable housing that are committed to serving hard to serve residents (e.g., extremely low income, special needs, on site services)	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts.	Disparities in access to opportunity	Promote equal housing opportunity	Financial resources	City of San Mateo	Create more housing for hard to serve households.	Conduct a best-practices review and develop a program to prioritize City funding for housing projects. This item is connected to Policy H 1.5, Policy H 1.14, and Policy H 1.15.	2026

Action Area 3. Improving place-based strategies to encourage community conservation and revitalization including preservation of existing affordable housing: involves approaches that are focused on conserving and improving assets in areas of lower opportunity and concentrated poverty.

Policy 5.3.1: As part of the General Plan, conduct an area plan for the NorthHispanic and female pare householdsShoreview and North Central neighborhoods and prioritize land use and design around Highway 101 to improve access and reduce the division of the urban form produced by the highway.Hispanic and female pare households concentrate low opportu census tract	ht housing in high re opportunity areas; in Lack of accessible hity affordable units;	Segregation/ integration patterns; disparities in access to opportunities	Conserve and improve the existing affordable housing stock	Land use resources	City of San Mateo	Reduce overcrowding, improve health and safety, and improve mobility and access to services in impacted neighborhoods.	Prepare an area plan for North Shoreview and North Central neighborhoods,	2027-28	
--	--	--	--	-----------------------	-------------------	---	---	---------	--

Policy 5.2.3

Prioritize city affordable housing funds for hard-to-serve residents

- Positive program but:
- Limited \$ = limited impact
- Lacks specific actions and quantifiable commitments

Objectives	Quantified Objectives	Timeline
Create more housing for hard to serve households.	Conduct a best-practices review and develop a program to prioritize City funding for housing projects. This item is connected to Policy H 1.5, Policy H 1.14, and Policy H 1.15.	2026

Policy 5.3.1

Conduct an area plan for North Shoreview and North Central

- Potentially substantial program, but:
- Currently lacking firm commitments and significant targets for AFFH outcomes
 - Policy 5.3.1 should be specific on the regulatory incentives, zoning standards, and programs it will offer
- Deliverables should occur earlier and demonstrate that the program will have a beneficial impact within the planning period
- Provide measurable milestones and a target dates to achieve goals

Action Area 3. Improving place-based strategies to encourage community conservation and revitalization including preservation of existing affordable housing: involves approaches that are focused on conserving and improving assets in areas of lower opportunity and concentrated poverty.

Policy 5.3.1: As part of the General Plan, conduct an area plan for the North Shoreview and North Central neighborhoods and prioritize land use and design around Highway 101 to improve access and reduce the division of the	Hispanic and single female parent households are concentrated in low opportunity census tracts.	Lack of affordable housing in high opportunity areas; Lack of accessible affordable units; Concentration of NOAH in low opportunity census tracts.	Segregation/ integration patterns; disparities in access to opportunities	Conserve and improve the existing affordable housing stock	Land use resources	City of San Mateo	Reduce overcrowding, improve health and safety, and improve mobility and access to services in impacted neighborhoods.	Prepare an area plan for North Shoreview and North Central neighborhoods.	2027-28
urban form produced by the highway.							Part 4: San I	1189 of 1252 Mateo's Goals, Policies,	and Actions

Conduct an area plan for North Shoreview and North Central

- Actions must specifically respond to the analysis and the identified and prioritized contributing factors to fair housing issues and must be significant and meaningful enough to overcome identified patterns and trends
- Specific planning goals must also include:
 - Displacement prevention +
 - Elimination of disproportionate concentrations poverty, low income households, and overcrowding

Action Area 3. Improving place-based strategies to encourage community conservation and revitalization including preservation of existing affordable housing: involves approaches that are focused on conserving and improving assets in areas of lower opportunity and concentrated poverty.

Policy 5.3.1: As part of the General Plan, conduct an area plan for the North Shoreview and North Central neighborhoods and prioritize land use and design around Highway 101 to improve access and reduce the division of the	Hispanic and single female parent households are concentrated in low opportunity census tracts.	Lack of affordable housing in high opportunity areas; Lack of accessible affordable units; Concentration of NOAH in low opportunity census tracts.	Segregation/ integration patterns; disparities in access to opportunities	Conserve and improve the existing affordable housing stock	Land use resources	City of San Mateo	Reduce overcrowding, improve health and safety, and improve mobility and access to services in impacted neighborhoods. urban form produced by the highway.							Part 4: San I	1190 of 1252 Mateo's Goals, Policies,	and Actions

Plan for the opposite of Urban Renewal

Urban Renewal conflated overcrowding with urban density

- Must not repeat the horrors of these Mid-Century Planning Efforts
- Urban Renewal sought to:
 - Disperse and displace the resident population, without providing adequate accommodations elsewhere
 - "Clear" slums, and replace them with things like:
 - Freeways, stadiums, convention centers,
 - Inadequately-sized public housing projects

Conduct an area plan for North Shoreview and North Central

- Planning goals should be structured with metrics and target dates, for example:
 - Eliminate overcrowding by 2040
 - Achieve parity with City in economic integration by 2050

Action Area 3. Improving plac assets in areas of lower oppor			nservation and revita	alization including pr	eservation of	existing affordable ho	ousing: involves approache	s that are focused on conservin	g and improving
Policy 5.3.1: As part of the General Plan, conduct an area plan for the North Shoreview and North Central neighborhoods and prioritize land use and design around Highway 101 to improve access and reduce the division of the	Hispanic and single female parent households are concentrated in low opportunity census tracts.	Lack of affordable housing in high opportunity areas; Lack of accessible affordable units; Concentration of NOAH in low opportunity census tracts.	Segregation/ integration patterns; disparities in access to opportunities	Conserve and improve the existing affordable housing stock	Land use resources	City of San Mateo	Reduce overcrowding, improve health and safety, and improve mobility and access to services in impacted neighborhoods. urban form produced by the highway.							Part 4: San I	1193 of 1252 Mateo's Goals, Policies,	and Activ

Action Area 3. Improving place-based strategies to encourage community conservation and revitalization including preservation of existing affordable housing: involves approaches that are focused on conserving and improving

Conduct an area plan for North Shoreview and North Central

- Plan to feasibly accommodate Community Benefits Agreements that balance redevelopment proposals with tangible, local benefits to residents in the area, e.g.:
 - Creating affordable housing
 - Funding renter assistance programs for nearby residents
 - Other investments that meet community-identified needs, such as infrastructure and community amenities
- 2. Replacing Segregated Living Patterns with Truly Integrated and Balanced Living Patterns: Examples include community benefits agreements that balance development proposals with tangible, local benefits to residents in the area (e.g., creating affordable housing, funding renter assistance programs for nearby residents, or other investments that meet community-identified needs, such as infrastructure and community amenities). Other examples include inclusionary zoning requirements and land-value recapture mechanisms, zoning for a variety of housing types, particularly these that may be lacking from the community or neighborhood, including: multifamily housing, low-barrier navigation centers, group homes, supportive housing, and accessible units. Promote education on how restrictions on multifamily housing, such as limited multifamily zoning and height and density limitations, impact inclusive communities. Seek local input on housing proposals while recognizing that "local vetoes" of affordable and mixed-income housing in racially segregated concentrated areas of affluence create fair housing issues.36

California Department of Housing and Community Development

Action Area 3. Improving place-based strategies to encourage community conservation and revitalization including preservation of existing affordable housing; involves approaches that are focused on conserving and improving assets in areas of lower opportunity and concentrated poverty.

Land use

resources

Policy 5.3.1: As part of the General Plan, conduct an area plan for the North Shoreview and North Central neighborhoods and prioritize land use and design around Highway 101 to improve access and reduce the division of the urban form produced by the highway.

Hispanic and single female parent housing in high households are concentrated in low opportunity census tracts. NOAH in low opportunity census tracts.

Lack of affordable Segregation/ integration opportunity areas; patterns; Lack of accessible affordable units; access to Concentration of opportunities

Conserve and improve the existing disparities in affordable housing stock City of San Mateo

Reduce overcrowding, improve health and safety, and improve mobility and access to services in impacted neighborhoods.

Prepare an area plan for 2027-28 North Shoreview and North Central neighborhoods.

15

Conduct an area plan for North Shoreview and North Central

- R-1 portions of these neighborhoods should be provided total parity of treatment with the rest of San Mateo's R-1 neighborhoods
- Why? The lower home values and lower wealth of non-white, owner-occupant homeowners means we need to carefully manage and enhance the amenity-related value of ownership housing in places predominantly occupied by minorities

· Balance this task with displacement protections

Action Area 3. Improving place-based strategies to encourage community conservation and revitalization including preservation of existing affordable housing: involves approaches that are focused on conserving and improving assets in areas of lower opportunity and concentrated poverty. Policy 5.3.1: As part of the Hispanic and single Lack of affordable Segregation/ Conserve and Land use City of San Mateo Reduce overcrowding. Prepare an area plan for 2027-28

Policy 5.3.1: As part of the General Plan, conduct an area plan for the North Shoreview and North Central neighborhoods and prioritize land use and design around Highway 101 to improve access and reduce the division of the urban form produced by the highway. Hispanic and single
female parent
households are
low opportunity
census tracts.Lack of affordable

CITY OF SAN MATEO 2031 HOUSING ELEMENT

Actions	Fair Housing Issues	Contributing Factors	Fair Housing Category	Action	Type of Action	Responsible Party	Objectives	Quantified Objectives	Timeline
Policy 5.4.1: Establish tenant protections in local profinance to extend measures of AB1482 related to relocation, documentation, and right to return policy in eviction cases.	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD. AND Hispanic households have disproportionate housing needs.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts; Historic discrimination and continued mortgage denials; High housing costs and low wages	Disparities in access to opportunity	Address governmental and non- governmental constraints	Human resources	City of San Mateo	Increase tenant protections to prevent displacement of those with disproportionate housing needs.	Extend AB1482 provisions to require tenant relocation payments for No Fault evictions for those with tenure less than one year and documentation from landlords who use remodel exemption to evict tenants. Establish Right to Return policy for tenants displaced from homes due to demolition or substantial remodels. This item is connected to Policy H 3,4.	2023-24; consistent with general GPP #H 3.4
Policy 5.4.2: Partner with Project Sentinel to perform fair housing training for landlords and tenants. Focus enforcement efforts on race- based discrimination and reasonable accommodations.	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts; Lack of understanding of reasonable accommodation requirements by landlords and property owners.	Outreach capacity and enforcement	Promote equal housing opportunity	Human resources	City of San Mateo/Project Sentinel	Increase awareness of fair housing laws and tenants' rights to reduce unlawful discrimination and displacement.	Provide annual funding to Project Sentinel to provide training every two years in the Spring, targeting 200 landlords each training.	Ongoing

Policy 5.4.1

Tenant Protections to extend AB1482 related to relocation,

documentation, and right to return policy

- Vital, can be strengthened
- Relocation payments for demolition should be uncapped and negotiable

Objectives	Quantified Objectives	Timeline
Increase tenant protections to prevent displacement of those with disproportionate housing needs.	Extend AB1482 provisions to require tenant relocation payments for No Fault evictions for those with tenure less than one year and documentation from landlords who use remodel exemption to evict tenants. Establish Right to Return policy for tenants displaced from homes due to demolition or substantial remodels. This item is connected to Policy H 3.4.	2023-24; consistent with general GPP #H 3.4

CITY OF SAN MATEO 2040 GENERAL PLAN HOUSING ELEMENT

Actions	Fair Housing Issues	Contributing Factors	Fair Housing Category	Action	Type of Action	Responsible Party	Objectives	Quantified Objectives	Timeline
Policy 5.4.3: Create a webpage specific to fair housing including resources for residents who feel they have experienced discrimination, information about filing fair housing complaints with HCD or HUD, and information about protected classes under the Fair Housing Act.	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts; Lack of understanding of reasonable accommodation requirements by landlords and property owners.	Outreach capacity and enforcement	Promote equal housing opportunity	Human resources	City of San Mateo	Increase awareness of fair housing laws and tenants' rights to reduce unlawful discrimination and displacement.	Provide information on the City's website about housing discrimination, laws, and protections. This item is connected to Policy H 4.1.	2024; consistent with general GPP #H 3.4
Policy 5.4.4: Ensure that all multi-family residential developments contain signage to explain the right to request reasonable accommodations for persons with disabilities. Make this information available and clearly transparent on the city's website and fund landlord training and outreach on reasonable accommodations.	Persons with disabilities have disproportionate housing needs. AND Persons with disabilities and persons of color are most likely to file fair housing complaints with HUD.	Lack of accessible affordable units; Lack of access to economic opportunity; Concentration in low income and low opportunity census tracts; Lack of understanding of reasonable accommodation requirements by landlords and property owners.	Outreach capacity and enforcement	Promote equal housing opportunity	Human resources	City of San Mateo	Increase awareness of fair housing laws and tenants' rights to reduce unlawful discrimination and displacement.	Initially, create ongoing condition of approval to ensure both BMR and all- affordable developments contain this information. Explore options for recording against the property and/or including in the affordable housing agreement.	2024

Non-AFFH-Specific Policy-by-Policy Review

- Policy H 1.2 Utilize Public Funding for Low/ Moderate Income Housing
 - Comment: Well defined, ongoing program
- Policy H 1.3 Increase Below Market Rate Unit Production through Density Bonus/Community Benefits Programs *
- Policy H 1.5 Encourage Family Housing *

 - Comment: Existing, ongoing, important
- Policy H 2.6 Require Replacement Units
 - Comment: Make this a permanent local ordinance

Policy Comment Potpourri

Policy H 3.3 "Evaluate Housing Revenue Sources"

- Change "Evaluate" to "Pursue" Additional Local Funding Sources:
 - **Vacancy Tax** Parcel taxes in the form of a vacant property tax have been used by cities (VPT, Oakland) to fund affordable housing and homeless services; as well as to entice owners of undeveloped sites to either sell or build homes on their parcels.
 - Increase Commercial Linkage Fees To help mitigate the increase in demand for housing, cities have the ability to charge a fee on new commercial developments. The revenue generated can then be used to help fund affordable housing construction.
 - **Transfer Tax** A one-time tax payment that is levied by a government on the transfer of ownership to property (i.e. sale of a home) from one individual or entity to another within it's defined boundaries. The raised revenue can then be utilized to fund affordable housing within the jurisdiction.

- Policy H 3.3 Evaluate Housing Revenue Sources*
- Policy H 3.5 Explore Below Market Rate Set Asides*
- Policy H 3.6 Examine a Rental Registry Option*
 - Change to: Adopt a Rental Registry based on best practices
- Policy H 3.7 Explore Code Amendments and Collaboration opportunities for Expanding Homeless Shelters*

Comment on 2023-2031 Draft Housing Element	Thank you to city staff and others for their work on the 2023-31 housing plan. As with all plans, there are many things residents

will agree on and many they won't. The plan, though, is well thought out and addresses many challenges the city faces in meeting housing need at all levels.

I may have missed it in my review, but it appears the plan doesn't speak to public education and alignment with the elementary and high school districts to ensure they have the resources to support additional capacity.

It's very likely these discussions are happening in other settings. However, knowing that this has been an area of concern for many in the past, I encourage staff to address this upfront to ensure it doesn't become a barrier. The districts are capable and can meet the need with appropriate planning and integration with the city.

Thank you again for the thought and well considered plan.

From: Susan Shankle Sent: Friday, December 30, 2022 11:02 AM To: Housing <housing@cityofsanmateo.org> Subject: Housing Element

Great report. I have one comment, which relates to Section 4.3, Climate Change and Energy Conservation:

Let's follow the lead of the CA Central Valley agricultural canal system which, after decades of suggestion and input, finally capped the canals with solar panels, which both significantly reduces evaporation plus offers an additional power source. Smart!

I've been asking for more City solar panel installation in San Mateo for years, especially during the planning and construction of the new 92/82 interchange. Lots of space there for panels. It's getting easier, cheaper and more necessary all the time.

Every new building should have solar panels on its roof.

Thank you, Susan Shankle 30-year San Mateo resident Lifetime Bay Area resident Citizen, Taxpayer and Voter

Comment on 2023-2031 Draft Housing Element	Hi city staff, planning commissioners and council members,

Happy New Year! I'm commenting as a homeowner in Hillsdale and am only representing my small family of three. My wife and I both live and work in San Mateo.

I want to first thank you for your hard work. This is a pivotal moment for current and future San Mateans. For decades our city has been built around driving and parking for literally everything in life, which unfortunately causes climate change, congestions, slow housing production and high cost of living. I believe that a more human-centric, not car-centric San Mateo is popular and achievable so this housing element is our chance to make real progress.

My comments on the housing elements:

1. Teamwork

I urge the newly elected city council to collaborate in good faith, debate and make compromises no matter which sides you're on. After the disastrous and widely publicized mayor appointment in 2022, this is your moment to show teamwork, transparency and integrity. Use our shared core values when you disagree. Show us that you are fixing our housing crisis by completing a compliant housing element.

2. Zoning

Simplify zoning and improve objective standards. Legalize diverse and medium density buildings. Legalize small scale local shops, daycare, and other services in single family communities (Sunnybrae, North Central, the Village, Hillsdale) to reduce car trips. Allow more homes in downtown to increase home supply while minimizing car traffic because walking can get a lot more done in downtown. Develop empty lots in Bay Meadow and Event Center.

3. Circulation

Building thousands of new homes cannot be done without traffic improvements. I know this is outside of the housing element but it is a chicken-egg problem. A city-wide, continuous bike highway needs to be built to encourage more people to run errands, go to school and offices without driving. Palm Ave, Delaware St are streets that could be a north-south bike highway. SF, Mountain View and many more examples are there for us to copy. Allocate more money on e-bike rebate, bike paths and traffic calming features. Building homes unfortunately has become so contentious and expensive throughout California. My house is across the street from the Hillsdale Mall which is ripe for more housing/services. I hope to see new homes, shops and neighbors replacing the lifeless and underutilized parking garage. I want more homes built not for profit but for my friends, coworkers and children to be able to stay without being severely burdened by mortgage or rent.

Inclusivity is one of the values of the City. \$1.5M home prices are not inclusive. I really appreciate what you have done given the constraints and history of San Mateo. I believe you can do the right thing for us and the silent majority.

Thanks again! Kailun

1. The Sewage Treatment Plant should be completed before additional construction is started.

2. Since the City of San Mateo has paid fines for untreated storm runoff into the Bay, the storm water overflow system should also be completed before additional construction is started.

3. Open Space calculations for developments should not include rooftops and balconies.

I am not really sure who really reads our comments and also assume you committee just trashes what you do not like to read I get it but here goes

my name is rick karr and was born in San Mateo Mills Hospital 72 yrs ago and bought my house at 1/2 years ago

Basically I understand you committee gets marching orders from the Board of Supervisors or the Govenor ,,,I am hoping you do not volunteer the number of increased housing to be 7000

Again I will state the infrastructure of San Mateo cannot accomodate a great deal of more building ...The traffic is bad The sewage system is overloaded and I can go on and on You have heard all the reasons why big population growth here in the confines of San Mateo is really almost impossible

No one is going to rip up train lines or destroy freeways to provide more housing space There is not a lot of open space left and I do not expect large landowners like the BOHANNON family to just provide a lot of land to the city so that being said I provide the following solutions

HIP Housing and similar should submit a list of numbers of people who are placed each month and use those number to show that the city of SM has complied or is trying to comply,,,I have no idea The city can also publicize to home owners or similar the advantages to renting out a room for extra income,,,I realize many people may be afraid to take a stranger in the home and those apprehensions are realistic ,,,However volunteers fo assist and publicize HIP and similar organzations would be great as some decent types can rent a room or similar and the homeowners will have some extra money each month,,,I suggest that the HIP contact the nursing department at CSM as these students and others are ideal for elderly types who are still living at home,,,,I personally rented out my front bedroom to someone who was pals with a SM pal of mine and he works in Burlingame and has been here for five years now ,,,i also now have another SM person living in my back room (tv sports room) who has been here for three months now and maybe another four as he split up with his GF,,,,What I am trying to say is that the city and volunteers can assist others like HIP to find people and then those numbers can be tallied ,

we do not have the space or ability to build say 5000 houses in the city of San Mateo. Yes there are places like FRESNO or MODESTO that have a lot of land but San Mateo does not

I highly suggest you counter this absurd high figure of say 7000 and have it reduced and also delayed The recapture of people provided housing like I mentioned above should be seriously mentioned to these GOV HACKS who dictate these absurd numbers...Those people who do build duplexes or fourplexes are helpful of course ...

I do not consider this issue to be a Republican or DEMOCRATIC party issue ,,,,it is a common sense issue for us the tax payers of San Mateo and residents and unfortunately I have no trust in the ability or courage of these elected or appointed people to stand up for us

please respond to my comments You need to solicit others for great ideas and not wait for the elected types to dictate to us ..

We have a 55 foot height limit that was voted in and cannot be changed by one hack using a pen,,,that is what is done in RUSSIA or North Korea or CHINA (PRC) or CUBA

Rick Karr

-----Original Message-----From: David Eligator Sent: Friday, January 6, 2023 1:37 PM To: Housing <housing@cityofsanmateo.org> Subject: Housing Element

Dear Mayor Lee, Councilmembers and Commissioners:

I own and live at **a second second second**. in North Central (at Delaware), a beautiful 1913 Victorian that I have been renovating myself from decades of neglect. I invite you to stop by and see it.

I took a day off and read the most recent draft Housing Element. I commend those who drafted it. My comments are specific to North Central, where you'll find me picking up litter or walking with my dog Susie.

North Central screams with unmet potential. Its location next to downtown is fantastic. It suffers from past redlining, a too-high percentage of renters, and concentrated poverty. By allowing investment, development and growth, North Central could blossom and become one of the truly great walkable neighborhoods in the San Francisco Bay Area.

The housing element acknowledges the damage done by North Central's former redlined status. The City can and should remedy by allowing significant new development in North Central to replace our obsolete housing stock and create vibrant neighborhood commercial areas. Even with the 55ft height limit there is potential to build interesting,

stylish, ornate and even iconic buildings with visual architectural appeal, which provide both public and private benefit and serve far more than mundane utilitarian function. Architectural beauty is key. Let's build while at the same time keeping North Central free of huge, streetlife-deadening projects and bland five-over-one boxes (which the 55-foot limit unfortunately encourages). Let's harness the market to encourage investment in North Central and allow people to build! We want more neighborhood commercial areas, taquerias, cafes, art galleries, music venues, corner stores and commercial gathering places. Please empower mom-and -pop builders and emphasize small scale developments, many small footprint projects, which create a charming, diverse, varied and interesting urban fabric. And more gardens and trees throughout North Central, please!

The housing element rightly focuses attention on AFFH and social issues affecting low-income and other vulnerable residents. For North Central, the way to address this is to invite wealth and economic growth in. While the housing market remains strong, the City can use market forces to reshape North Central in a bold and transformative way so as to make it a more dynamic and truly diverse place and not an island of disenfranchisement and poverty. Look to other cities' models of desirable neighborhoods that truly work. Jane Jacobs' Death and Life of Great American Cities discusses what physical spaces actually work for and feel good to human beings. North Central needs well-constructed, well-designed, architecturally-pleasing housing of all types, not mere utilitarian, uninspired buildings withiut aspiration, style, design, craftsmanship, ornament, or redeeming aesthetic qualities. (Who would want to live in a shoebox?)

Especially for North Central, the

housing element provides an exciting opportunity for bold action. Why not use principles of New Urbanism to make North Central a truly diverse, leafy, walkable and desirable neighborhood with flats, townhouses, and a high percentage of owner-occupants (which create strong communities, prevent blight and permit people and and families to build equity and long-term economic strength)? North Central will greatly benefit from having more stakeholders with longterm economic self-interest.

To make an omelet one must break some eggs. Let's not think small when it comes to North Central! North Central has all the ingredients of becoming a stunning, spectacular, highly desirable neighborhood that transcends its redlined past, for the benefit of all. Let's not be timid or cling to mediocre visions from the past.

David Eligator

From: Skye Nygaard Sent: Friday, January 6, 2023 1:59 PM To: Housing <housing@cityofsanmateo.org> Subject: Housing Element

Hello,

After reading through the new draft housing element, I am overall quite happy with the changes and how they address the needs of the community.

However, I have some points of concern.

On page H-31, there is reference to "physical constraints" limiting the development of smaller lots. Rather, it is zoning regulations, such as setbacks, that are the constraining factor. I would hardly call a law "physical". I would prefer the wording to reflect that it is a result of current policy rather than some universal rule that you can't develop as much on smaller sites.

I appreciate the inclusion of SROs in the latest update. However, it is not a big change. Simply being more specific about where SROs *can* be built does not get them built. SROs tend to have unit sizes in the range of 100-200 sq ft. 1 acre = 43560 sq ft. At just 1 story, you could fit upwards of 200 SRO units. When we have a limit of 50 units per acre, no SROs are going to be built. It is a subpar use of limited unit counts. I would like some mention of this constraint to be included in the housing element, to reflect the reason SROs are not being built.

I appreciated the mention of putting adjustments to measure Y on the ballot, on page H-41. However, I would like it mentioned where measure Y conflicts with state law. Density bonus and state law supersede measure Y already in several conditions, and there was no mention of this in the housing element (at least that I found).

The phrase "a variety of housing" was mentioned on page H-23 and several other locations. On H-23, it was then listed the breakdown of single-family vs 2-4 unit multifamily, vs > 4-unit multifamily. This leads to the implication that the variety of housing merely comes down to single-family vs multi-family, as well as the price point. However, I think there are other very large variety factors. These include the number of lots, rather than units, and the location of those lots. While single-family homes are spread throughout the city, multi-family dwellings are concentrated in just a few locations. As a renter, there are many places in the city where I cannot find a rental available. Therefore, the diversity of locations for multi-family is severely limited, due to the much smaller number of lots available with this zoning. I would like this location diversity to be explicitly mentioned, as it is something I have personally dealt with.

Best, Skye Nygaard, a San Mateo Resident

Re: Draft Housing Element for City of San Mateo 2023-2031 Comments of Housing Action Coalition

Dear Housing Manager, Planning Commission, and City Council:

On behalf of the Housing Action Coalition,¹ we write to further comment on the draft 2023-2031 Housing Element for the City of San Mateo, including changes in the December 2022 draft. The draft Housing Element still does not meet the City's obligation to plan and provide for affordable housing. Absent substantial revisions, it may be found in violation of state law.

Below, we identify two significant issues to be addressed as San Mateo continues to work on formulating an acceptable Housing Element. First, San Mateo has included a number of sites that do not have a realistic likelihood of becoming housing during the next eight years, as required to meet the need for new housing. The inventory includes a major shopping center and a regional mall and claims that these are housing sites that will redevelop in the next eight years, despite busy stores, new long-term leases, and even multimillion dollar improvements that conclusively demonstrate that the current retail uses will continue. Second, San Mateo's methodology for identifying how much of the regional need will be met by the sites on the inventory appears both unprincipled and inconsistently applied. In order to properly evaluate whether the site inventory will meet the needs of San Mateo's anticipated population growth, San Mateo needs to formulate a proper methodology and then apply it consistently, and explain how it evaluates site-specific information, other potential uses of the property, and market evidence on what is likely to actually be built.

¹ The Housing Action Coalition is a nonprofit that advocates for building more homes at all levels of affordability to alleviate the Bay Area and California's housing shortage, displacement, and affordability crisis.

FARELLA BRAUN+MARTELLLP

Housing Element January 7, 2023 Page 2

A. The City Includes Sites That Are Not "Suitable And Available" Because They Do Not Have A "Realistic And Demonstrated Potential" For Redevelopment During The Planning Period To Meet The Need For Housing.

One of the most concrete aspects of any housing element is the inventory of land "suitable and available" for residential development to meet the city's regional housing need by income level. Government Code § 65583(a)(3); HCD Housing Element Site Inventory Guidebook at p. 1 (<u>https://www.hcd.ca.gov/community-development/housing-element/docs/sites_inventory_memo_final06102020.pdf</u>). The list is a specific means of evaluating whether the City has adequately planned for development of housing for all income levels.

Where nonvacant sites are listed on the sites inventory, there must be a "realistic and demonstrated potential for redevelopment" during the next eight years. Government Code § 65583(a)(3). To address past abuses – including where cities list unrealistic sites in order to avoid required rezoning – the California Legislature created a high standard for listing sites that are currently being used for something other than housing. Where nonvacant sites are used to address over 50% of the need for affordable housing for those with lower incomes, the City must show the realistic and demonstrated potential for redevelopment by making formal findings that the existing use does not impede residential development "based on substantial evidence that the use is likely to be discontinued" during the planning period. Government Code § 65583.2(g)(2) (final sentence). The City must analyze the evidence: existing leases, market demand for the existing uses, and anything else that would indicate whether existing uses will continue. Government Code § 65583.2(g)(1).

As explained below, the current draft prepared by San Mateo identifies a number of nonvacant sites that are not realistic, suitable and available for redevelopment. The City relies heavily on the speculative and unlikely assumption that existing uses will cease during the next eight years in favor of affordable housing.

1. The Bridgepointe Shopping Center

(APN 035-466-070, -080, -090, -100, -110)

The City's draft fails to address whether the existing uses will cease during the next eight years. Absent substantial evidence that existing uses will "likely" discontinue, San Mateo cannot count the Bridgepointe Shopping Center parking lot and stores as addressing the need for sites available, realistic, and suitable for 233 units of lower income housing.

As our prior letter explained, the parcels that make up the Bridgepointe Shopping Center have existing uses, with long-term leases and likely rights to the parking lot, that preclude residential development during the period covered by the next Housing Element. While the City has now dropped the ice rink parcel, which had been unoccupied but is now back in operation as

an ice rink, the City fails to mention, much less evaluate, evidence concerning existing leases from major national tenants in place at this power center, with existing leases extending for almost the entire period covered by the Housing Element:

- APN 035-466-070 includes current retail uses by Ross Dress for Less, Marshall's and Total Wine & More. Total Wine & More has a lease through 2027. *See* Housing Action Coalition Comment Letter Dec. 16, 2022 and Appendix Tab 4. Ross opened here in 2021. It is unlikely that Ross moved in with a short-term lease. The City does not appear to have analyzed leases to determine their effect on whether sites are available for housing, as required.
- APN 035-466-080 is occupied by Hobby Lobby, with a lease through 2029. *See* Housing Action Coalition Comment Letter Dec. 16, 2022 and Appendix Tab 1.
- APN 035-466-090 is occupied by a number of national retailers, including Verizon, Petco, Ulta Beauty, and Cost Plus World Market. Ulta Beauty is known to have a lease through 2032. *See* Housing Action Coalition Comment Letter Dec. 16, 2022 and Appendix Tab 2.
- APN 035-466-110 is the loading dock access for all of the stores on parcels APN 035-466-070, -080, and -090, and too narrow to feasibly develop for housing.
- APN 035-466-100 is the parking lot, and is likely subject to the leases of each of the retailers. It is also likely subject to lease rights from the non-listed restaurant parcels on the periphery, and the ice rink.² While it is theoretically possible the lease agreements for the shopping center are compatible with residential development on the parking areas that serve the shopping center, the burden is on the City to demonstrate that such development is likely during the planning period. The City has failed to analyze lease rights that may impede housing uses, as required by the statute.

Particularly given the existing uses, and the publicly known information about existing long-term leases with major national retailers that preclude building housing within the next eight years, the City cannot credibly claim that it is "likely" that these existing uses will

² The parking lot is also larger than 10 acres, and so is subject to the additional analysis of Government Code section 65583.2(c)(2)(B) ("A site larger than 10 acres shall not be deemed adequate to accommodate lower income housing need unless the locality can demonstrate that sites of equivalent size were successfully developed during the prior planning period for an equivalent number of lower income housing units as projected for the site or unless the locality provides other evidence to the department that the site can be developed as lower income housing."). No site of this size was developed for 147 units of lower (very low, low) income housing; the closest comparable size, Station Park Green, was a market rate project with only 60 units of lower income housing in a project of 599 units.

discontinue. While the City explains that it has had "a variety of discussions with the shopping center's ownership representatives who expressed interest in mixed-use redevelopment," (December 2022 draft at H-36), it fails to address *when* redevelopment might occur. The City asserts that the General Plan Update is exploring policies to "guide redevelopment of the shopping center," and refers to a "draft land use plan designat[ing] Bridgepoint as Mixed-Use High, which could allow up to 200 units per acre." *Id.* But given that City voters have twice approved a cap of 50 units per acre (Measure P, extended to 2030 by Measure Y), the City's optimism provides no realistic assurance that affordable housing will be built here before Measure Y, and the 2023-2031 draft Housing Element, expire. Finally, the City's broad reference at page H-C-14 to a "market trend" of developers that "bought out long term businesses to allow redevelopment into housing" refers only to "underutilized" properties; the Bridgepointe Center is not underutilized. The City's argument does not meet the substantial evidence standard for the likelihood of development of this specific site, with its specific constraints and existing uses, during the relevant planning period.

Don't get us wrong: Housing Action Coalition also hopes that Bridgepointe will begin redevelopment within the planning period, and it hopes that the City is successful in rolling back the restrictions of Measure Y through its General Plan revision efforts so that Bridgepointe can be developed with high-density housing. But without a showing, based on substantial evidence, that it is *likely* that Bridgepointe will redevelop "within the planning period," the City should add sites to the inventory that are available to meet the need for affordable housing.

2. Hillsdale Mall

(APN 042-121-040, -060, -080; 039-490-050, -170; 039-353-010, -020, -030, - 040)

As discussed in Housing Action Coalition's prior comment letter, the question about Hillsdale Mall is not about whether the owner is interested in some mixed use housing for the site. The issue is when and how much housing will be built, and on which parcels or portions of parcels. Here, the City lacks evidence to justify the projections on the site inventory, or to claim that the existing uses are likely to discontinue soon enough for housing to be built during the required timeframe.

Retail uses of Hillsdale Mall are almost certain to continue through the next eight years. With the owner just having spent 240+ million on the Hillsdale North project on 12.5 acres of APN 039-490-170, including a new food court on the portion spanning 31^{st} Avenue to connect to the even larger portion of the mall that includes Macy's and Nordstrom, the City Council cannot credibly make findings that all existing uses of that parcel will likely discontinue in the next eight years. Government Code § 65583.2(g)(2). Similarly, the substantial improvements and

new long-term leases at Hillsdale South show that redevelopment of that portion of APN 039-490-170 is also unlikely to take place during the period covered by the draft Housing Element.³

The City makes much of the owner's expressed desire to build housing, including showing images of the owner's proposals to modify the City's general plan to allow housing of 100-200 units/acre on portions of the site. Current San Mateo law does not permit these plans to go forward. As with Bridgepointe, the reality is that the City's voters have constrained housing production by adopting Measure P, then Measure Y, which prohibit such density until 2030. Without knowing the outcome of a hypothetical ballot initiative in 2024 that might permit such density (*see* December 2022 Draft at H-B-56), the City cannot reliably predict that the owner will attempt to build before Measure Y, and the current Housing Element, expire.

3. The Atrium: 1900 South Norfolk Street (APN 035-391-090)

As stated in Housing Action Coalition's earlier comment letter: The executive office building located at 1900 South Norfolk Street is currently used by a large number of office tenants. The draft Housing Element does not perform any analysis of the current use, including whether existing leases would create obstacles to residential development of the site during the next eight years. Publicly available information indicates that a number of leases continue to be signed or renewed for this three-story office building, with at least one such lease publicly reported to extend until 2030. Housing Action Coalition Comment Letter Dec. 16, 2022, Appendix Tab 9. The City should perform the required analysis under Government Code section 65583.2(g)(1), and evaluate whether it has substantial evidence to make the finding that existing uses are "likely to discontinue" during the next eight years, as required by section 65583.2(g)(2). If not, the City should not claim that this site meets the need for 99 lower income affordable housing units, even if the owner has expressed a long-term interest in redevelopment.

The site is currently zoned "executive office," with no residential overlay to make residential housing a permitted use (except by discretionary application for a special use permit). The City does not include a plan to rezone the site to make residential use a permitted use, as required by Government Code sections 65583.2(a)(4) and 65583(c). The owner of the property has indicated an interest in building housing *if* the site is rezoned; nothing suggests that the owner has an interest in going through an expensive two year gauntlet to apply for discretionary

³ Parcel 039-490-170 is also subject to the same problem as the Bridgepointe parking lot site: the City lacks any evidence that a site this large can be developed for 485 units of affordable housing. Government Code § 65583.2(c)(2)(B). The City has never seen a development include that much affordable housing; none of its cited examples come anywhere close. Under the City's inclusionary housing ordinance, even if all 28.91 acres of the parcel were developed and resulted in 1,199 units, only 15% of them would be required to be affordable for lower income households: 179 units, not 485. Meanwhile, the City's citation to projects that were predominantly market-rate, with only limited numbers of lower income units, fails to meet the statutory requirement.

permission to see if the City is willing to let residential housing be built here. The City needs substantial evidence that the existing use will discontinue, paired with a rezoning of the site, in order to take credit on the site inventory towards meeting the Regional Housing Needs Allocation (RHNA).

4. Borel Shopping Center (71-77 Bovet; 1750 El Camino Real) (Consolidated Site AH: APN 039-011-450, -460, -470, -480, -500, -510)

As stated in Housing Action Coalition's earlier comment letter: This site is a busy shopping center anchored by a CVS Pharmacy, a 24 Hour Fitness,⁴ a branch of Patelco Credit Union, a UPS store, and a separate restaurant building for Jack's Restaurant and Bar. There is publicly available information showing that the lease for Jack's extends well into the planning period. Housing Action Coalition Comment Letter Dec. 16, 2022, Appendix Tab 11 (indicating Jack's lease extends from 2013-2029). The City should perform the required section 65583.2(g)(1) analysis of the existing leases, and current market demand for the retail uses at the location. The City currently lacks substantial evidence that the site's existing use is "likely to be discontinued" during the next eight years. It should not count towards 85 units of housing affordable to lower income households.

5. The Elks and The Shriners – 229 W. 20th Street and 150 W. 20th Street (APN 037-052-350 and APN 039-030-220)

The Benevolent and Protective Order of Elks, Lodge 1112 ("San Mateo Elks Lodge"), has been located at 229 W. 20th Street since 1954. The San Mateo Elks Lodge has a membership of over 1,100 as of earlier this year. The Elks use their lodge to operate a popular swimming center for kids and families, hold crab feeds and other events in the meeting hall, and engage in fun activities and philanthropic works.

The only suggestion that the San Mateo Elks are not likely to continue their existing use of the Elks Lodge at 229 W. 20th Street is the statement on the site inventory that "Preliminary conversations with the owner to convert to residential have occurred." That kind of statement might sometimes go unnoticed and unquestioned by the City Council, HCD, or a court. But here, no one should take it as an adequate answer to the question of whether the San Mateo Elks will stop using their lodge in the next eight years. The reason is that the 2015 Housing Element, when listing the same site, said the same thing, word-for-word: "Existing private member club. Preliminary conversations with the owner to convert to residential have occurred."⁵ Nothing has

⁴ In 2008, the 24 Hour Fitness substantially modified the building it occupies when it moved into a space formerly occupied by Albertson's. It added locker rooms, a swimming pool, basketball courts, showers, and other tenant improvements at a cost exceeding \$2.2 million. BD-2007-230493; BD-2007-230029; BD-2008-230692.

⁵ In order to rely on conversations purporting to express intent, the public needs to know much more. Who had the conversation cited by the City, and with whom did they have it? Has

happened in the last eight years to suggest that "preliminary conversations" are substantial evidence on which to predict a likely discontinuation of the existing use, even if the more recent note is based on more recent preliminary conversations, instead of the "preliminary conversations" that took place eight years ago. This site should not be counted towards accommodating the need for 77 units of housing affordable to lower income households. Government Code § 65583.2(g)(2).

A second private club is located just down the street at 150 W. 20th Street: the Shriners. The Shriners are likewise a longtime institution in San Mateo, and are likewise committed to philanthropy and social activities. The Shriners' building is used in part for a day care center. The site inventory provides insufficient detail to evaluate whether they plan to move out in the next eight years, saying only "Owners have considered mixed use with residential." Without more, this is insufficient to justify concluding that the Shriners actually plan to leave or redevelop in the short or mid-term, or to treat their property as accommodating the need for 32 units of lower income housing.

The same analysis applies to other sites. *See, e.g.*, 1500 Fashion Island Blvd. (APN 035-550-040) ("Developer interest in redevelopment."); Consolidated Site B (APN 032-312-250, -270, -150, -100, -070) ("General interest in redevelopment"). Vague expressions of interest do not constitute substantial evidence that the existing use will likely cease during the next eight years. Sections 65583.2(g)(1) and (g)(2) require more analysis, more evidence, and more likelihood.

6. Mollie Stone's – Olympic Shopping Center

(Consolidated Site AD: APN 042-242-050, -060, -070, -160, -180; 042-243-020, 042-244-040, -050; 042-245-040, -050, -060, -070, -080, -090, -100, -110, -120, -130; 042-263-010, 042-264-010)

This site, consisting of twenty parcels, is claimed to accommodate 161 units of housing affordable to those with lower incomes. The only basis for including it appears to be the claim that there is "ownership interest in specific plan redevelopment," which does not indicate that all of the parcels would be redeveloped as housing at the maximum density, or indicate who said what to whom, and when.⁶

the Lodge taken any affirmative steps toward redevelopment beyond this conversation? Without more, the vague reference to "preliminary conversations" between unidentified speakers on an unidentified date does not constitute "substantial evidence."

⁶ Here too, the concern about specificity is not idle. There are five separate owners. Carstens Realty owns most of the parcels, but CLC Investments, Sadigh Sassan, Shamco E LLC, and San Mateo Investment Co. each own one. The City does not discuss or address whether the

Meanwhile, and as discussed further in section B below, the draft Housing Element does not adequately analyze or demonstrate the realistic capacity of the site. Under section 65583.2(g)(1), for a nonvacant site like this, the city must "specify the additional development potential for each site within the planning period." The required analysis is currently missing. A realistic assessment of the current uses and market conditions would preclude listing the entire site at maximum density. Mollie Stone's is the only full-service grocery store in the surrounding area. For households in the southwestern portion of town (for example, everyone near Laurel Elementary School and south to the Belmont border), closing Mollie Stone's would more than double their travel times to the nearest grocery, and extend them well beyond the one-mile used to define a "food desert" – a condition no one expects to develop in this well-resourced city.⁷ Currently San Mateo's land use pattern follows the predictable pattern: few, if any, households are more than one mile from a grocery. There is no reason to believe that the market need for grocery stores will make the need for Mollie Stone's, or another grocery store, superfluous in this part of town. Particularly as San Mateo's population grows, the need for grocery stores will increase, not diminish.

This means that any redevelopment or specific plan of the Olympic Shopping Center will almost certainly include a substantial retail component, at least on the ground floor. Mixed use may be a responsible way to increase density, but it precludes listing the site at maximum density, particularly given the constraints of Measure Y. The City must conduct further analysis, including an analysis of existing leases, common ownership, and market conditions, before claiming that this site will meet the needs for construction of 161 units of housing affordable to lower income households. And, given the substantial demand for the existing use, the City may not be able to make the required finding under section 65583.2(g)(2).

7. Site AN (4100 and 4142 El Camino Real) (APN 042-242-170 and -080)

On the draft Housing Element site inventory, consolidated Site AN consists of a Cityowned vacant site and a neighboring parcel. In a recent staff report for the November 7, 2022 meeting, the chart responding to HCD comments indicated that the City had two City-owned sites: the "Talbot's" site (APN 034-179-050 and -060), and APN 042-242-170, which it referred

five are willing or interested in a joint project, though it lists each of them as having expressed interest in a specific plan. Without evidence of what makes consolidation likely, the smaller sites are deemed insufficient to accommodate the need for lower income housing. *See* Government Code § 65583.2(c)(2)(A).

⁷ If Mollie Stone's closed, and no grocery store was rebuilt in its place, it would create the unlikely situation where an affluent, urban community became a "food desert." The United States Department of Agriculture has defined a "food desert" as an area where at least 500 people, or 33% of the tract population, reside more than one mile from a full-service supermarket. <u>https://www.ers.usda.gov/webdocs/publications/45014/30940_err140.pdf</u>.

to as the "Ravioli" site. The chart indicated that staff recommended adding to the narrative about the Talbot's site, but recommended removing the Ravioli site from discussion.

The draft Housing Element had shown the two sites APN 042-242-170 and APN -042-242-080 as having a potential for consolidation, but if the City does not plan to sell APN 042-242-170, and instead plans to take it off of the site inventory, it should also remove APN 042-242-080 as unsuitably small for affordable housing.

However, the staff report is confusing on this point. It refers to APN 042-242-170 as the "Ravioli" site, and lists a street address of 505 South B Street. This is not the location of APN 042-242-170. APN 042-242-170 is located at 4140 El Camino Real. If it is indeed City-owned, we encourage the City to make plans to develop it, preferably by issuing a Request for Proposals to transfer it to a non-profit housing developer who could build a 100% affordable project on the site. If the site can be consolidated with the neighboring parcels – which have one-story commercial or professional uses, and a relatively large percentage of surface parking – the opportunity would be even more meaningful in terms of providing for the need for housing affordable to those with lower incomes. Even still, the City would need to engage in the process of determining that it is likely the existing uses on the neighboring parcels are likely to be discontinued during the planning period such that consolidation of the sites is feasible and realistic.

B. The Analysis Supporting The Government Code Section 65583.2(c) Calculation Is Insufficient.

In order to determine that the City has a sufficient number of sites to meet the need without rezoning, a key calculation is the projected number of units at each level of affordability. If the City overestimates how many units will be built on the sites it includes, it will incorrectly conclude that it does not need to identify any more. Unfortunately, the City's current draft makes just this error.

The estimate of units on each site is governed by Government Code section 65583.2(c), which provides:

The city or county shall determine the number of housing units that can be accommodated on each site as follows:

 $(1) \dots$ If the city or county does not adopt a law or regulation requiring the development of a site at a minimum density, then it shall demonstrate how the number of units determined for that site pursuant to this subdivision will be accommodated.

(2) The number of units calculated pursuant to paragraph (1) shall be adjusted as necessary, based on the land use controls and site improvements requirement identified in paragraph (5) of subdivision (a) of Section 65583, the realistic

development capacity for the site, typical densities of existing or approved residential developments at a similar affordability level in that jurisdiction, and on the current or planned availability and accessibility of sufficient water, sewer, and dry utilities.

The draft Housing Element fails to demonstrate that the site inventory numbers reflect the realistic development capacity for each site. For sites with the potential for mixed or non-residential use, the Housing Element calculates a discounted probability of residential development, but fails to apply it. For sites zoned entirely residential, the site inventory cherry-picks the data in an effort to claim that every site is likely to be developed at the maximum density permitted by San Mateo zoning laws.

1. Mixed Use/Non-Residential Zoning.

In the site inventory guidebook, HCD explains that where a city uses sites that are zoned for nonresidential uses, the city must evaluate the capacity analysis by taking into account that some or all of the site may be developed – as city law allows – for such nonresidential uses, such as commercial or office uses.

The City discusses this issue at pages H-31 to H-34 of the draft Housing Element, using the data in table 5. It states that 80% of sites developed during 2017-2022 were developed with at least some residential housing.⁸ It states that to account for this, "For those sites that assume mixed-use with residential components in the site inventory, potential density is assumed more conservatively at 30 to 35 du/ac." December 2022 draft at H-31.

Unfortunately, the City does not consistently apply the results of this analysis. Instead of applying the mixed-use density number uniformly, it picks and chooses which sites the City "assume[s]" will be mixed-use, and then ignores the prospect that others may also have mixed-use or no residential use at all. The following sites are zoned for non-residential uses per the site inventory with a reported maximum density of 50, but the City nonetheless lists them at densities higher than what it claims is the "conservative" 30-35 du/ac:

⁸ Note that here the City counts projects, instead of evaluating by acreage. Larger sites are more likely to be developed for commercial or office uses. Table 5 shows that while 20 of 25 sites contained at least some residential component, only 19.99 of the 80.88 acres (75%) did. A realistic calculation of the likelihood of residential development should apply the proportion developed by acreage before multiplying it times the allowable units per acre, rather than using the percentage of sites with entirely non-residential uses.

		units	

The sites in the following chart are zoned for non-residential uses per the site inventory with a reported maximum of 30 or 35 units/acre, but the City does not discount them to take into account the possibility of non-residential development. Applying the City's data showing that mixed zoning sites develop at less than 80% of the maximum zoning, these sites should be estimated at no more than 24-28 units/acre:

Mixed Zoning Sites	With May Of 20 25	Not Droporty Ad	justed For Mixed Zoning:

The City also takes an inconsistent approach to "pre-application" projects. Some are estimated based on similar experience throughout the City (e.g., Fishmarket, estimated at 35 du/ac despite the owner's proposal of 260 units).¹⁰ But for others, the City takes credit based on the projected number of units out of a "pre-application" or pending application, even though the application itself has not yet been approved or, in most cases, even submitted. While some of these sites may ultimately develop for the proposed density, using the un-approved density from a pre-application is not a realistic assessment of their likely capacity. Until entitlements issue and the projects move forward, the realistic estimate of the site's capacity should be based on the typical capacity based on the mixed-use sites that have been approved or built, i.e., 30-35 units/acre:

Site	Zoning	Capacity per Inventory	Capacity at 80% of maximum zoning (before accounting for site-specific factors)
Site AO: Block 20	CBD/S Central Business District Support	84 [72.4 du/ac]	35-41
Site Y: Hillsdale Inn (477 E. Hillsdale Blvd.)	C2-0.5 Regional/Comm. Comm'1	230 [75.4 du/ac]	92-107
1495 El Camino	E2-1/R4 Executive Office/High	35	20-24

¹⁰ At 260 units on 3.5 acres (75 du/ac), the owner's proposal would appear to exceed Measure Y, and so is indeed unrealistic, at least for purposes of calculating a site inventory capacity. This also assumes that all 3.5 acres is developable, despite Bay Conservation District jurisdiction over this shoreline parcel.

	Potential		
	Overestimate:	249-291	

By failing to follow through on the HCD required analysis – that properties zoned for non-residential uses will sometimes not become housing at all – the draft overestimates the capacity of its inventory. Based on the City's own analysis, that sites where mixed or non-residential use is permitted should be estimated at 30-35 units/acre, the City overestimated the capacity by 710-943 units, over 10% of the RHNA totals. And if the "pre-application" sites are adjusted to reflect average capacities for mixed use zoning, instead of accepting pre-application numbers at face value, the overestimate is as high as 1,234 units, constituting 17.5% of the RHNA totals. Before adopting the Housing Element, the City should adjust the site inventory capacity calculations to comply with the state law requirement of realistic, demonstrated capacities, and then identify additional sites to make up for the shortfall.

2. Residential Zoning.

For the limited number of sites on the inventory that are zoned residential without the potential for non-residential uses, the City's analysis is also flawed. As discussed in the Housing Action Coalition's prior comment letter, the draft "cherry-picks" data to argue that capacities should be calculated based on the maximum permitted under the City's zoning laws. At pages H-30 through H-31, and in table 4, the City separates prior residential developments into two categories: "in-fill" and "outliers." The so-called "outliers" represent over 20% of the units, and 46% of the residentially zoned land: it is unreasonable to disregard them when computing the

¹¹ Note that this pre-application appears to have been submitted in 2017, suggesting that it might be a particularly poor basis for an estimate made in 2023.

¹² Note: Only two of the six parcels described at page H-C-33 (narrative description of the "Bespoke" project) are listed on the site inventory.

average. The average density for residential projects, combining both parts of table 4, is approximately 40 units/acre.

Notably, the draft applies the "outlier" density of 18.2 units/acre to only three sites, all adjacent to one another at 717-801 Woodside Road. The sites are in a residential neighborhood surrounded by other apartment buildings.

Meanwhile, the City does not apply the "outlier" density to sites that would appear to have far more in common with those on the list. The "outlier" project on Waters Park Drive was zoned "executive office"; it borders Borel Creek as it flows into Seal Slough. Less than 100 feet away, on the opposite side of Borel Creek as it flows into Seal Slough, is 1900 S. Norfolk Street, zoned "executive office." Yet while the Waters Park Drive project developed at a density of just 17 units/acre, the City projects a capacity for 1900 S. Norfolk of 245 units on 8.18 acres: 30 units per acre. If indeed the Waters Park Drive project resulted in low density because of site-specific conditions (adjacency to the busy Highway 101-Highway 92 interchange; located in a flood zone; no residential zoning overlay), then consistency would demand similar treatment for 1900 S. Norfolk. For that matter, Parkside Plaza and Fishmarket are similarly adjacent to Seal Slough and right next to the interchange; they should also be projected at the "outlier" density.

3. Site-Specific Adjustments.

State housing law requires that site-specific conditions also be taken into account. In the narrative discussion of specific sites in draft Appendix C at pp. H-C-35 through H-C-49, the City identifies site-specific issues that should further reduce the realistic, demonstrated capacity. At the Fish Market and 1900 S. Norfolk sites, for example, there are required setbacks from Borel Creek and Seal Slough. 1900 S. Norfolk is also next to a freeway interchange, and so has restrictions on height relating to the height of the freeway railing; the site also has a long tail that winds around a PG&E substation, none of which could be developed and which should therefore be ignored in calculating realistic capacity. See December 2022 Draft Appendix C at p. H-C-39. Meanwhile, the City seems not to have considered the potential effect of San Mateo Zoning Code section 27.44.065 to this site (currently zoned E1): at least 35% of the parcel area must be open-space, preventing over 1/3 of the land from being developed for housing. Other sites also have odd shapes or watercourse adjacencies. Still others are subject to other rules governing setbacks or required ground-floor uses. See, e.g., San Mateo Zoning Code § 27.29.118 (prohibiting residential uses on first floor in mixed use projects in downtown), § 27.30.027 (prohibiting ground floor residential uses in the first 30 feet facing El Camino Real or 25th Avenue), § 27.39.100 (required retail frontage in downtown), 27.42.010 ("Street Wall" regulations requiring upper floor setbacks in the downtown). Meanwhile, the City mentions, but never really analyzes, how Measure Y can prevent housing from being built at the densities projected, unless state density bonuses are used to override this constraint.

Similarly, given that the \$240+ million construction of Hillsdale North Block precludes use of the 12.5 acres there, and that the pedestrian bridge shows an intention to continue use of significant portions of the main mall building, the City needs to analyze which portions of the

Hillsdale site might realistically be developed as residential housing during the next eight years, then reduce the calculation to take these site constraints into account. The existing leases at Bridgepointe mean that the proper calculation for that site's potential is to determine how large a parking structure would need to be built on the current surface lot to meet the requirements of the existing retail center, ice rink, and restaurants, and then determine the development potential of the fraction of the parking lot that would be available for housing. Applying a 30-35 unit average to these two sites seriously overstates the development capacity for all levels of affordability.

State law requires that the City develop and justify a cogent, realistic methodology to support its anticipated production calculations, and requires that it apply that methodology consistently and thoughtfully to the site inventory to yield realistic results. Unfortunately, the City's draft fails to meet the required standard.

C. Additional Comments On Zoning Status.

As noted above, a number of sites included in the City's inventory are zoned commercial or office without a residential overlay. We request that San Mateo rezone these sites to add a residential overlay, so that developers are assured that residential uses will be permitted, rather than hope the desired inclusion of residential uses will be permitted on a site-by-site basis as part of project-specific approvals. Uncertainty regarding the ultimate success of a rezoning effort discourages residential development in the City. December 2022 Draft at Appendix B, p. H-B-26. The entire point of the housing inventory is to determine if there are sufficient sites that are either (1) vacant and zoned residential, (2) vacant and zoned for nonresidential use "that allows residential development," (3) residentially zoned sites capable of being developed at a higher density, or (4) "sites zoned for nonresidential use that can be redeveloped for residential use, and for which the housing element contains a program to rezone the site, as necessary, to permit residential use." Government Code § 65583.2(a)(1)-(4). The sites zoned for commercial or office use, without a residential overlay, do not fall within section 65583.2(a)(3), because they are not zoned residential. They should therefore be included in a program to rezone to affirmatively permit residential use. Having the City retain discretion to refuse or condition residential development on these properties does not make them available as required by state housing law.¹³ This issue would appear to apply to the following sites¹⁴:

¹³ We note, for example, that the Waters Park Road project, zoned E1, sought a rezoning because it was not zoned residential, as part of its attempt to seek permission to redevelop the site. Sites listed on the inventory should not have to go through this step.

¹⁴ Under San Mateo Zoning Code section 27.44.020, permitted uses in the E1 district include "Residential units, only on parcels designated with a residential overlay district classification . . ." *Id.* § 27.44.020(g). For parcels "without a residential overlay district classification," residential units are permitted only "subject to approval of a special use permit." *Id.* § 27.44.030(g). The same rules apply to E2. *See id.* §§ 27.48.020(b) and 27.48.030. The same rules apply to the C1 and C2 districts, absent a residential overlay. *Id.* § 27.30.010(a)

Sites Where Residential Units Are Not A Permitted Use:

In determining how to rezone to add a residential overlay, the City should also consider whether the overlay after rezoning will enable the sites to realistically achieve the density claimed on the site inventory. *See* San Mateo Zoning Code § 27.29.110 (imposing maximum floor area ratios).

The City should also consider the impact of Government Code section 65583.2(h). Section 65583.2(h) provides that at least 50% of the need for very-low and low-income housing must be accommodated on sites designated for residential use where non-residential uses are not permitted. San Mateo's site inventory does not appear to satisfy this rule, because at least 50% of the need is proposed to be met using sites that allow exclusively commercial uses. (For

⁽permitting "residential units only on parcels designated with a residential overlay" for C1 district); § 27.32.010(n) (same for C2); 27.30.020 (requiring special use permit for "residential units on parcels without a residential overlay district classification" in C1); § 27.32.020(g) (same for C2). It does not appear that residential uses are permitted in the C3 district at all; consistent with the intention "to create and maintain major commercial centers accommodating a broad range of office, retail, and service uses of community-wide or regional significance," residential uses are not listed as a permitted use in § 27.34.010, though they arguably could be permitted as a special use because they are special uses permitted in C1 and C2. *Id.* § 27.34.020(a).

example, the Bridgepointe and Hillsdale shopping centers, zoned for commercial uses, *see, e.g.*, City of San Mateo Zoning Code § 27.34). Meanwhile, the statutory alternative of accommodating 100% of the very low and low income need on sites designated for mixed uses, "if those sites allow 100 percent residential use," would appear not to apply to certain City zoning designations. *See, e.g.*, City of San Mateo Zoning Code § 27.38.110. The City should evaluate how to address the impact of this statutory provision as part of the final drafting of the Housing Element.

* * *

Based on the analysis above, San Mateo's draft Housing Element does not comply with state law, because it proposes to meet more than 50% of the need for affordable housing with sites that are not vacant, and does so without substantial evidence that they are likely to be redeveloped. The City's current analysis, which fails to analyze or account for leases, whether parcels proposed to be consolidated are under common ownership, recent remodeling or construction indicating that existing uses will continue, and other obstacles to development in the next eight years, is insufficient to meet its responsibility under state housing law. In particular, the City lacks substantial evidence showing that the Bridgepointe and Hillsdale shopping center sites have existing uses that are "likely to discontinue" during the next eight years, but as the other examples we cite above illustrate, the required analysis under Government Code section 65583.2(g)(1)-(2) must be done for each site separately in order to have a valid Housing Element.

Meanwhile, the City has also overestimated the capacity of the sites listed on the inventory. Correctly calculating the realistic capacity – even by using the high end of the City's range of 30-35 units for mixed zoning sites with a maximum of 50, and 80% of the zoned capacity for sites zoned for 30 or 35 units/acre – reduces the City's claimed buffer for all categories, and leads to a shortfall for the "very low" and "moderate" categories, even if all sites satisfied section 65583.2(g)(2). Further site-specific analysis leads to an even greater gap. The City should address these shortfalls by planning to rezone more sites. The City should also rezone the inventory sites in districts where residential is not a permitted use without a special use permit; the City itself recognizes that this is a substantial constraint on housing production, and the current zoning prevents the sites from falling into any of the categories of section 65583.2(a)(1)-(4) without rezoning under section 65583(c).

Given these flaws, San Mateo is not yet ready to adopt its Housing Element. Additional sites will need to be identified and potentially rezoned to ensure compliance with state housing law. A more substantial inventory will avoid the possibility that the Housing Element will be invalidated in the event that HCD or a court agrees with the legal issues identified above.

Respectfully submitted,

Thomas B. Mayhew

January 9, 2023

San Mateo City Council 330 West 20th Avenue San Mateo, CA 94403

Dear Mayor Lee and Members of the San Mateo City Council and Planning Commission,

The Sustainable Land Use Committee of the Loma Prieta Chapter of the Sierra Club (SLU) advocates on land use issues in San Mateo and Santa Clara Counties. Thank you for providing the opportunity for SLU to provide input on the Updated Draft San Mateo 2023-2031 Housing Element.

The overall updated draft Housing Element (HE) is an improvement, but more focused and stronger policies and programs are needed to have a reasonable expectation of meeting the RHNA number of 7,015 new housing units, particularly for affordable units. Please find our full comment letter attached.

We ask that you consider this information as you finalize the Housing Element for submission to the State. SLU is prepared to help the City in advancing the HE as it is finalized and when it goes into effect.

Respectfully submitted,

Subject: San Mateo 2023-2031 Housing Element – Updated Draft

Dear Mayor Lee and Members of the San Mateo City Council and Planning Commission,

The Sustainable Land Use Committee of the Loma Prieta Chapter of the Sierra Club (SLU) advocates on land use issues in San Mateo and Santa Clara Counties. Thank you for providing the opportunity for SLU to provide input on the Updated Draft San Mateo 2023-2031 Housing Element.

The overall updated draft Housing Element (HE) is an improvement, but more focused and stronger policies and programs are needed to have a reasonable expectation of meeting the RHNA number of 7,015 new housing units, particularly for affordable units.

Reaching the RHNA unit goal will require changes in the speed of development in San Mateo. In order to reach the goal of 7,015 new units from 2023-2031, the city must add almost 900 new units each year. That is roughly the equivalent of building a new Concar Passage each year¹. This will be infeasible unless a major effort is made to streamline and accelerate housing development. And, of course, it is important that new development also be thoughtfully designed to accomplish all the other General Plan goals of open space, quality of neighborhoods, etc. The HE Housing Plan (p.H-67 to H-87) needs to demonstrate a significant change to current policies and programs in order to realistically be able to reach the goal. This will not be easy, as the new RHNA goals are well above the rate of new housing added over the last few decades². But it must be done if we are to adequately address the housing crisis in the region and leave the city well positioned for future generations to prosper.

The HE rightly points out that the housing problem is a regional one and that each city needs to meet or exceed its goal if the housing crisis, particularly for affordable housing, is to be solved. The lack of affordable housing on the Peninsula is a significant contributor to environmental degradation as workers

¹ **Concar Passage** is the largest housing project approved in recent years and required major time and effort for approval. Developing a project like this each year, will therefore require a major effort above the current processes.

² The 2015-2022 RHNA was 3,164 units and with only one year left it has 2,573 units completed. This current RHNA number is less than half the new RHNA number; thus, demonstrating the steep challenge of meeting the new RHNA number of 7,015.

must commute long distances by car, emitting greenhouse gases (GHG) as well as other pollutants. It also leads to sprawl, as more development is done in areas that were open space or agricultural land.

There are specific areas that will need to be retained or expanded to make sure the final HE contains the key actions needed to make significant progress on addressing the enormous lack of affordable housing in the Bay Area. Listed below are the most important goals, policies and programs in the HE that need to be retained and strengthened in the final HE.

- 1. <u>The HE aims for a 42% buffer above the RHNA, but more buffer is needed</u>. This number is lower than in the first HE draft (56%) which was a minimum. This is concerning, as a large buffer is needed to realistically be able to meet the RHNA, as the ability to actually build out housing has proven, over time, to be very difficult.
- 2. Increasing affordable housing is emphasized in the draft HE and that is good, but stronger action is needed. The "buffers" for affordable housing levels are only 7%, 34% and 12%, while the buffer for market rate housing is 76%. These are all lower than was in the first HE draft and therefore it is concerning. The percentage buffer for affordable units should be at least as high as the buffer for market units since affordable units are needed more and are harder to develop. The affordable housing should be more strongly focused on low, very low and extremely low-income housing, as these are where the largest needs are and where the lack of inventory is the largest. The very poor jobs/housing fit³ in the Peninsula can best be addressed with a focus on more affordable housing. As noted in the HE draft⁴, the lack of affordable housing was one of the major concerns expressed by the public.

The addition of H1.21 "Adopt San Mateo General Plan 2040" is important. It could possibly lead to a ballot measure in 2024 to update Measure Y so that significantly higher density (now 35 -50 units per acre but proposed to change to 100-200 units per acre) and height can be used in key areas, like near transit. This change will make meeting the RHNA numbers much more possible.

<u>Funding that can be used to support affordable housing is a fundamental need and more must</u> <u>be done to obtain funding</u>. Affordable housing has to be subsidized and a lack of funding will limit the ability to build the needed affordable housing, particularly for low and very low-income units. This could include establishing or increasing: Vacancy Tax, Commercial Linkage Fees, and Transfer Tax. It is particularly important that funding focus on repairing the legacy of discrimination in housing. The following policies and programs should be strengthened to accomplish this goal:

- a. H 1.2 Utilize Public Funding for Low/Moderate Income Housing
- b. H 1.3 Increase Affordable Housing Production
- c. H 1.18 Permitting and Development Fee Schedule Review (Increase where necessary)
- d. H 3.3 Evaluate Housing Revenue Sources (Increase)

³ Jobs/Housing Fit: Jobs/housing fit means that the majority of homes within the city are affordable to the majority of employees who work in the city, and conversely, the jobs in the city pay enough to cover the cost of housing in the city. Without an adequate jobs/housing fit, businesses find it difficult to hire and retain lower-income employees.

⁴ Page H-53

- e. H 5.1.1 Adjust the City's Below Market Rate (inclusionary) program to provide larger density bonuses, and/or increased city support in exchange for affordable units that address the needs of residents with unusually high housing needs
- f. H 5.1.2 Participate in a regional down payment assistance program with affirmative marketing to households with disproportionately high housing needs including persons with disabilities, single parents, and Hispanic households
- g. H 5.1.3 Support the design of a regional forgivable loan program for homeowners to construct an ADU that is held affordable for extremely low-income households for 15 years
- 3. <u>In addition to increased funding for affordable units, the HE should prioritize policies and</u> programs that reduce costs and streamline the processes for affordable units. The following policies and programs should be strengthened to accomplish this need:
 - a. H 1.6 Streamline Housing Application Review
 - b. H 1.8 Adopt Objective Design Standards
 - c. H 1.9 Create Minimum Densities for Mixed-Use Residential Projects
 - d. H 1.10 Establish By-Right Housing Designation for Prior Housing Sites
 - e. H 1.12 Encourage Residential Uses within Housing Overlay
- 4. <u>Almost the entire city, including R1 areas, will need to contribute to the increased housing</u> through such mechanisms ADUs and, possibly, new mechanisms such as expanded Missing Middle Units (duplex, triplex and fourplex). However, increased density should be focused within half mile of transit to align with Climate Action Plan goals for greenhouse gas (GHG) reductions.

The Climate Action Plan requires attention to creating easy pedestrian and bicycle access to reduce GHG. Therefore, while it is important to retain this broad opportunity for more housing, since R1 zoning is a major part of the total area of the city, it is important to keep in mind that easy pedestrian and bicycle access to amenities and to transit is a critically important goal for the Climate Action Plan.

<u>The "15-minute Neighborhood"^{5 6} concept needs to be included in the General Plan, along</u> <u>with the Housing Element</u> as it would facilitate creating more housing in R1 neighborhoods while simultaneously reducing GHG. This is a mechanism that would insert community amenities, such as small neighborhood retail nodes, into otherwise auto-dominated areas such as R1 neighborhoods.

Even more priority should be placed on these efforts. The following policies and programs should be strengthened to accomplish this need:

a. H 1.4 - Incentivize Accessory Dwelling Units Development with streamlined approvals, development subsidies, or low or zero interest loans for construction cost

⁵ 15-minute neighborhoods are being created in many cities especially post-COVID.

https://www.strongtowns.org/journal/2019/9/6/7-rules-for-creating-15-minute-neighborhoods ⁶ Embraced by Mayors around the world, Portland and several small US cities have embraced the concept to rebuild their economizes while crating healthier cities. <u>https://en.wikipedia.org/wiki/15-minute_city</u>

- b. H1.11 Implement the Zoning Code to allow duplexes and lot splits on appropriate single- family sites consistent with SB 9.
- c. H1.13- Encourage Development of Missing Middle Housing within a half mile of transit.
- d. Include overlay zoning, in the General Plan, for "15-minute Neighborhoods" allowing insertion of small new neighborhood retail nodes with Green Streets network ⁷ to create walkable, bikeable neighborhoods, with the daily amenities, to reduce auto trips and create healthier walkable neighborhoods, convenient for all ages including kids and seniors.
- 5. <u>Climate Change is real.</u> ⁸No mention is made of how housing, particularly new housing, needs to be located so as to be <u>resilient to climate change</u>. Sea levels are predictably going to rise more swiftly in the coming decades, according to the California Ocean Protection Council. Wildfires are also predicted to become an increased threat with the continued drought and encroachment into the forested hill areas of our city. The increased risks of sea level rise (SLR) near the Bay and wildfires in the hilly areas make including sites in such vulnerable areas a problem and needs to be factored into identifying areas for higher density and more affordable housing.

We ask that you consider this information as you finalize the Housing Element for submission to the State. SLU is prepared to help the City in advancing the HE as it is finalized and when it goes into effect.

Subject:	Housing element

City Council,

I strongly disagree with the housing approvals you are trying to pass. The city of San Mateo does not build any "affordable" housing for anyone, and nobody in our already over crowded neighborhoods want any more apartment buildings or multi unit housing in our single family neighborhoods. If we wanted to live like that, we would live in San Francisco or other big cities. We like our single family homes, and certainly CANNOT handle any more traffic on our already crowded streets. You keep coming up with all these stupid ideas for building more without any room for parking or play areas for our children. These new so called communities you are approving have inadequate parking space for these people which spill out to our neighborhoods, and then we have no parking. You keep destroying our communities, and have totally ruined our small downtown and our small businesses. So thank you city council, I hope the rest of you "older" council members get voted out next time!

Hi Nicky,

Here is an email sent to the commissioners to add to your public comments.

Mary

Subject: Housing Element Update Comments

Housing Element Update Comments for the Planning Commission.

1. Preservation: We would like to see our existing single family and duplex homes along 4th (south side) and north side of 5th Avenues (Delaware to Amphlett) and the west side of Delaware from 5th to 9th Avenue be preserved and not be demolished. These Italian Revival, Craftsmen, and pre-war homes represent the early part of the 20th Century architecture and contribute to the character of the east side of San Mateo and our Historic Downtown. These homes in Central are affordable homes for young families and walkable to the Downtown. The new densities and heights are too high in the General Plan and should be lowered to Measure Y standards to reduce lot accumulation and demolition. We are lacking a buffer zone for transition.

2. Protection: We would like to protect the current residents from displacement. More tall glass buildings and shadows will impact the pedestrian experience. We need to protect the 1930's character of the historic Downtown with compatible architecture with more traditional elements.

3. The reports state the inventory of vacant sites would be adequate for additional housing. The City has the capacity to develop up to 7,934 units. This development exists within the City's current zoned densities and doesn't require any rezoning to achieve. There should be sufficient number of units from 2023 to 2031. There has been a significant amount of development with the current Measure Y in the Downtown areas in Central and North Central Neighborhoods.

4. Other suitable areas for housing can include S Amphlett from 5th Avenue to Folkstone where there are a mix of industrial commercial uses, including warehouses, and auto repair businesses. This is one of the two industrial areas in the Central Neighborhood which has had difficult access for large trucks from 101 through our narrow streets. This would be a win/win situation for Central and Sunnybrae Neighborhoods which have experienced 50 years of adverse environmental impacts. We would like to see low density, owner-occupied townhouses next to our Single Family/Duplex neighborhood. Ryland Bay in Bay Meadows and Arbor Rose in Sunnybrae are both owner-occupied housing next to the 101 Freeway.

Thanks.

Laurie Watanuki

From: Francie Souza Sent: Thursday, January 12, 2023 2:27 PM To: Planning Commission <PlanningCommission@cityofsanmateo.org> Subject: Housing Element Comments

I am a resident of Central San Mateo and am giving my feedback regarding the Housing Plan.

1) My first question is if we have a high number of housing units we need to develop to meet state mandates, why are most of the new projects in downtown primarily office space (other than Kiku Crossing)?

2) PLEASE do not take away the single family and duplex/quadplex homes along north side of 5th Avenue, and south side of 4th Avenue between Amphlett & Delaware. 5th Avenue is a beautiful treelined street with pre-war homes/duplexes/quads and is one of the prime reasons we moved into the area. They are also more affordable to those entering the housing market and are close to amenities of downtown. DO NOT raise the height limit beyond what Measure Y was voted on. There needs to be consideration of a transition between the large complexes, such as the one proposed for S Delaware/5th/Claremont/4th, and the less dense housing further down 5th and Delaware.

3) Please consider other areas to develop for housing which are currently a mix of industrial uses - such as parts of Amphlett Blvd and El Camino

4) I am hopeful if new housing has to take over existing housing, such as along West side of Delaware between 5th & 9th and as mentioned above the north side of 5th Avenue, low density, owner occupied townhomes, not high-rises and large complexes which destroy the nature of the neighborhood community. Alternative 3 or Residential Low is preferred if current housing does need displacement in those areas.

This development of our neighborhoods brings great stress of decisions for current homeowners to make - are we living in a community which will maintain the character of the city we chose to move into, and if not, when should we move? Do we need to consider moving now before nearby construction begins tearing down historic homes in our neighborhood and how does this impact the value of our properties as homeowners? I believe the city planning commission can find properties to develop in order to provide adequate housing that does not require ruining the character of current neighborhoods. Please be considerate of current home-owners and tax-paying citizens.

Frances Souza
