Subject: San Mateo Integrity

City Council Members and Staff.

A majority of the residents of The City of San Mateo have expressed their desire to maintain the current building height limits for buildings.

Elements of the City Council are influenced by developers to ignore the decision on height limits and overcome the legal limits expressed in Measure Y.

Here we go again: another "study" to rehash the same issue!

Let's move on. Higher buildings are not necessary to achieve the goal of providing housing needs. Higher buildings serve the needs of "developers" who wish to increase profit at the expense of the quality of life for residents of our City.

No! to more studies.

No! to raising height limits for buildings in this City.
