Subject: proposal to build high rise

City Council:

We are thoroughly alarmed and disappointed that there is even a consideration for plans to build a 3-5-7 story building in the treasured and well established neighborhood of 25th Ave and Hacienda Streets. My spouse and I moved here because we wanted to invest and live in a community where we could raise a family and in turn, live out our lives in a well respected and familiar environment. This proposed building will change the whole character of the community. Not only will it increase the population and increase parking difficulties, it will change the look of the neighborhood by taking away our airspace. A highrise building would be an eyesore and has no place among a settled and fixed community of single family homes. We pay very high taxes in this area. It is not fair or honest to serve as council members unless one is working for the betterment of the people who reside in this community. A highrise in a settled and traditional family neighborhood is not appropriate. We are a close-knit community that cares and knows each other personally. Currently the space considered serves as a parking lot for church and other community functions. There are weekly Farmer's Markets and Second Harvest meets there also. As council members, please consider how these current functions serve the community in a positive way and support the community in which we live. Please do not cripple our community: help us continue to flourish.
