Subject: San Mateo General Plan and Height Limits

San Mateo City Council members,

I am disappointed that the issue of increased height limits in our city continues to be raised in light of the last election and the passing of Measure Y by the citizens of San Mateo.

The fact that the proposed land use and increased heights for our beloved 25th avenue area are being considered contrary to what was recently voted upon by the residents is very discouraging. Additionally I'm very disappointed that our new district 5 council member has not specifically brought this to the attention to our neighborhood.

As representatives of the citizens of San Mateo, I respectfully ask that you represent the building heights that residents have voted upon and passed, and not ignore our citizens.

Thank you,

Mike Germano
