**Subject:** Height Limits Re-Examined

Mayor Lee,

You have been tapping the hornet's nest for so long, and now have fully kicked it.

It cannot be that you think your constituents lack intelligence as they watch you on the dais, but this time, with your 'confusion' over the Council approved height limits for study, you must feel that your position of power allows you to do most anything.

In your 'confusion' and desire to reopen this subject, it's no wonder San Mateo residents are striving to recall you. It's yet another example, after observing your gyrations and manipulations of important matters, staff and your fellow council members, of your continual failure to actually represent the people of San Mateo.

Everyone's best guess is that your goal for tonight, in alliance with special interests, is to maximize the building heights for study and push for a "Do you like Measure Y?" resident survey. Sadly, you are all too predictable, as is your sidekick, Councilmember Loraine.

The disgust of your constituents should be loud and clear tonight. Oh, what a tangled web you weave.

With regret,

Lisa Taner
