Clifford Robbins, Susan. Rowinski, Segall Michael Kimiko Narita, and Pam Rittelmeyer

The Committee Of Sustainability and Infustructor is one of the most important committees to keep our city, City of San Mateo and the General Plan of 2040 future secure.

The people of this City voted in Propositon "Y". The voters have decided they don't want extremely tall buildings as you would see in a business downtown area.

Our City leaders has accepted The State of California's invite to expand our North and Central neighbors close to public transit to develop to help the homeless and less fortunate.
In exchange, the buildings of the developments exceed the heights of Proposition "Y" .

Also, now the idea to have Office Space in "Mixed Use" has turned into development with extremely large heights.

This committee needs to help protect the safety of our families in the North and Central Neighborhoods. Our streets are too narrow and with the construction projects of Windy Hill and Kiku Crossing since 2021, we now have those that don't have cars trouble walking towards El Camino Real. The taller the building the less walking space on the Sidewalk for wheelchairs and strollers.

It is Imperative that the Proposition "Y" be included in The General Fund 2040.

Thank you

Diana Pettit
