Subject: Fwd: San Carlos - Examples of Design Standards for new buildings to better blend in with our Historic Downtown.

Hi Zachary,

These are examples of Contemporary Mediterranean architectural features (arches, stone, fountain, and black iron railings) in Downtown San Carlos which blend into their historic train station.

As Francie Souza pointed out these are the quality design standards we would like to see in our new buildings to blend into our Historic Downtown in San Mateo.

Thanks.

Laurie Watanuki

We had dinner in San Carlos this eve and I noticed this new condo unit which was able to incorporate arches, stone and even a fountain in their design. Wish San Mateo had some design standards for our new buildings in order to blend with historic center.

Francie
