Subject: Concerns over survey and general plan

As a resident of San Mateo I am writing to express my concern over the building heights survey. I didn't get to participate in this survey and neither did several of my neighbors I have asked.

District 5 will be far more impacted than other districts in San Mateo.

I do not support buildings that are predominantly non-residential over 5 stories or Measure Y limits in height.

I do support the preservation of single family home neighborhoods.

I am opposed to additional housing not required by state mandates.

The DEIR should have considered a more moderate alternative other than is being proposed.

Thank you,
Don Bildeau
