Subject: building height limits- please adhere to the limits that we as citizens have voted for and passed

Dear City Council:

Please respect the majority of San Mateo citizens who voted to limit building heights in San Mateo.

The proposed end run around the community's opinions regarding building height limitations is unacceptable and should not occur.

The citizens voted three times to limit height and density. How can you possibly justify overriding this very clear voter mandate?

Please limit the allowable stories to Measure Y levels given the housing density bonus laws could double the allowable heights.

Sincerely,

Martha Moore
